Hydraulic and pneumatic components for logic circuits of automatic controls, considering amplifiers, interlocked systems and use of fluidics

24 p4293 A70-45618

Automatic TV radioscopic X ray control for mass NDT of refractories and grinding wheels

24 p4368 A70-45723

Unmanned Luna 16 landing mission, discussing launching and automatic mission control via onboard computer and earth-radioed data

24 p4412 A70-45982

Automatic control system for Boeing SST engine air intakes, optimizing engine performance and controlling noise propagation

24 p4396 A70-46214

Upper Air Space Control Center Automatic Data Processing and Display System for air traffic control

24 p4323 A70-46238

AUTOMATIC CONTROL VALVES NT PRESSURE REGULATORS NT RELIEF VALVES

Automatic control for filling tanks with stably stratified liquids using analog mixture valve and digital metering pump methods

06 p1062 A70-17617

Fluid system control valve gain dependence on flow characteristics slope due to series resistance or centrifugal pump

09 p1613 A70-23685

AUTOMATIC DATA PROCESSING U DATA PROCESSING AUTOMATIC FLIGHT CONTROL

NT AUTOMATIC LANDING CONTROL

Automatic flight control and instrumentation in civil helicopters, examining military developments and Feranti automatic stabilization system

02 p0329 A70-11834

Inertial navigation systems, discussing role as flight control sensor with advent of all digital interface automatic flight control systems and cost and reliability

02 p0334 A70-11988

Airborne secondary surveillance radar transponders performance and system optimization for automatic altitude reporting, separation standards maintenance and automatic plot extraction

02 p0267 A70-11990

Solid state electronics application in automatic flight control, discussing redundancy, internal failure correction, fault isolation and automatic checkout

02 p0335 A70-12178

UHF ranging system principles, discussing output proportional to approach angle

02 p0257 A70-12179

Automatic flight control systems with aerodynamic characteristic and control parameters deviation from nominal values, discussing mathematical model describing aerodynamic characteristics behavior

02 p0381 A70-12408

Radar visual indicator used with scan converter and as synthetic indicator with computer controlled flight safety system

02 p0263 A70-12700

Ground-airborne steep descent VTOL automatic flight control and vertical path selection using hover augmentation system/HAS/ and remote area terminal system/RATS/

02 p0337 A70-12769

VTOL aircraft fly by wire system eliminating errors automatically, discussing electronic and electrohydraulic control components, flight test model design, prototype, etc

[DGLR-69-41] 04 p0623 A70-15149

Airborne digital letdown computer to guide VTOL aircraft flying complex trajectories to relieve airport congestion

05 p0880 A70-16416

Blind flight and helicopter navigation during prolonged maritime survival operations

07 p1193 A70-19132

Built-in test equipment for automatic flight control systems, discussing testing programs and fail safe hybrid circuitry

08 p1471 A70-20670

Soviet book on control systems for single rotor helicopters covering automatic stabilization system design, autopilots, pilot operation within closed control circuit, etc

08 p1435 A70-20769

Computer managed display system using CRT and appropriate solid state displays providing flight crew with automatically sequenced time varying information

08 p1498 A70-21677

Aircraft instrumentation in automatic flight control, discussing inertial platform, sensors, information transmission and display and digital technology

09 p1676 A70-22607

Flutter suppression in elastic finned beams in supersonic flow controlled automatically by rudder deflection according to flexural strain

09 p1785 A70-23615

Adaptive flight control systems utilization to compensate for variations in aerospace vehicle rigid body dynamics, noting control system performance requirements

[AIAA PAPER 68-970] 12 p2204 A70-28076

Combined radio and physical navigation systems, considering noise rejection and corrections of position and speed

15 p2772 A70-31623

Automatic flight control and instrumentation in civil helicopters, examining military developments and Feranti automatic stabilization system

15 p2772 A70-31771

Optimal adaptive digital autopilot design for reentry vehicle flight path control

16 p2946 A70-33007

V/JSTOL aircraft automatic flight control, guidance and navigation by onboard computer, discussing mathematical model and simulation results

[AIAA PAPER 70-1035] 20 p3665 A70-39502

Automatic aircraft lateral motion stabilization during flight in perturbed atmosphere by HF invariant systems

20 p3670 A70-39839

Metropolitan air transit system design, considering compound helicopters, automatic control by central computer, onboard avionics system and terminal facilities

21 p3956 A70-41250

Maneuver demand control using electric signalling feedback technique in Avro 707C and Hunter Mk 12 aircraft

24 p4374 A70-46203

AUTOMATIC FREQUENCY CONTROL

AFC by digital phase lock loop consisting of zone error detector with phase quantizing circuit and discrete frequency regulator with reversible counter

02 p0258 A70-12542

Frequency monitor design, analyzing relationships between time constants, gain, etc, emphasizing white noise filtration

07 p1227 A70-18991

Optimal control frequency signals for automatic spacecraft docking

08 p1582 A70-21180

Digital sampled-data loop of phase lock control containing digital zone error detector and digital frequency regulator with reversible counter as memory unit

10 p1833 A70-24085

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator

11 p1996 A70-25349

Automatic frequency control of single frequency He-Ne laser, tuning cavity length to extremum output power with Lamb dip

12 p2250 A70-28181

Computer modeling of nonlinear phase automatic frequency control systems under noise and oscillating disturbance

13 p2383 A70-29303

Noise effect on single band modulation receiver using phase automatic frequency control for carrier wave at arbitrary SNR

13 p2370 A70-29739

Phase locked automatic frequency control system, estimating duration of stabilization by theory Markov processes

18 p3228 A70-36625

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator

20 p3589 A70-40461

Automatic frequency control device for power klystron with two cavities, obtaining stabilization at natural frequency of crystal-containing cavity

22 p3998 A70-43236

Phased locked AFC circuit, calculating internal harmonic noise reduction by proportionately integrating filter

23 p4161 A70-43960

Automatic resonance tuning of transmitting and receiving antennas by electronic control for use in mobile communications

23 p4172 A70-44385

AUTOMATIC GAIN CONTROL

Time constant, steady state and tracking error of AGC loops at input/output of FM link in AM-FM telemetry system

12 p2184 A70-27250

Automatic gain ranging amplifier for high speed digital computer controlled data acquisition system used to process input data levels

19 p3383 A70-37919

AUTOMATIC LANDING CONTROL

Automatic landing systems mission and design, discussing pilot-system task coordination, equipment characteristics and reliability, etc

01 p0138 A70-11257

Aircraft pilot-autopilot task division during automatic landing, analyzing man machine interaction in aircraft approach guidance

01 p0139 A70-11258

Integrity monitoring of redundant multiplex control systems for aircraft autoland operations, discussing Triplex autopilot

02 p0329 A70-11833

Automatic landing systems research including VHF ILS accuracy, test equipment for servicing airborne equipment, etc

02 p0333 A70-11981

Hawker Siddeley/Smith Trident Autoland Program, discussing flight test data for Smith autopilot and autothrottle certification

03 p0522 A70-13349

Trident aircraft automatic landing in nearly blind conditions in regular commercial service

11 p2079 A70-25851

Space shuttle automatic landing system based on aircraft low visibility landing, considering economy and safety

14 p2614 A70-30466

All-weather automatic landing in blind conditions, considering Trident system

14 p2615 A70-31392

Automatic landing system assurance of DH 121 aircraft schedule all-weather regularity through high safety level via redundancy

17 p3022 A70-35856

All-weather Autoland control system using inertial smoothing, discussing required redundancy, fault detection, ground beam anomalies compensation, etc

19 p3469 A70-38821

Digital fail-operative flight control computers for automatic landings, describing system requirements and problems and flight test program

20 p3591 A70-39505

AUTOMATIC PATTERN RECOGNITION

U PATTERN RECOGNITION

AUTOMATIC PICTURE TRANSMISSION

Automatic picture transmission /APT/ ground station design for reception of weather satellite cloud cover photographs, discussing SNR

01 p0059 A70-11451

Small read-out stations for automatic picture reception from meteorological satellites, detailing design

02 p0382 A70-12648

Report to COSPAR on Austrian space research covering picture transmissions, solar activity, satellite observation, etc

15 p2829 A70-31707

Report to COSPAR on space research covering satellite tracking telemetry, Apt, meteorology, cosmic rays, solar activity and international cooperative programs, etc

15 p2829 A70-31709

Synoptic surface and upper air analysis and APT mosaics of meridional circulation over Mediterranean by remote satellite images

21 p3846 A70-41399

Picture transmitting systems noise rejection enhancement via redundancy, discussing video coding and decoding and signal filtration

23 p4159 A70-43760

ITOS-1 second generation meteorological satellite launched with Delta N booster, providing direct APT global readout and AVCS TV data recording for playback

23 p4259 A70-44615

AUTOMATIC PILOTS

Aircraft pilot-autopilot task division during automatic landing, analyzing man machine interaction in aircraft approach guidance

01 p0139 A70-11258

Integrity monitoring of redundant multiplex control systems for aircraft autoland operations, discussing Triplex autopilot

02 p0329 A70-11833

Hawker Siddeley/Smith Trident Autoland Program, discussing flight test data for Smith autopilot and autothrottle certification

03 p0522 A70-13349

Harmonic equilibrium method applied in dynamic properties analysis of autopilot electrohydraulic servomechanisms stability

03 p0415 A70-13930

Soviet book on control systems for single rotor helicopters covering automatic stabilization system

design, autopilots, pilot operation within closed control circuit, etc

08 p1435 A70-20769

Digital autopilot design using stochastic noise generator for synchronous random pulse sequence controlled by clock

09 p1720 A70-22418

Computational methods for multiput linear control systems applied to designing lateral and longitudinal autopilots for jet transports subject to gust loads

12 p2203 A70-27417

Minimum-time thrust vector control law in Apollo lunar module computerized autopilot

13 p2499 A70-28399

Aircraft vertical channel landing condition autopilot using state variable feedback control techniques

15 p2773 A70-32553

Optimal adaptive digital autopilot design for reentry vehicle flight path control

16 p2946 A70-33307

Lunar module digital autopilot design, considering attitude state estimator, reaction control system and thrust vector control

[AIAA PAPER 70-991] 20 p3668 A70-39539

Self adjusting autopilot system based on invariance principle for stabilization against wind gusts

20 p3670 A70-39840

Invariant autopilot control system during flight in turbulent atmosphere, allowing for aircraft elastic properties and invariance of coordinates

20 p3561 A70-39845

Flight simulation in SAAB A137 aircraft development, describing analog and digital computers, cockpit simulators, automatic pilots, control and display devices

[ICAS PAPER 70-42] 23 p4178 A70-44140

Elastic fuselage flight vehicle dynamic stability at supersonic speeds, using automatic pilot stabilization

23 p4139 A70-44157

Optimal adaptive digital autopilot design and operation, discussing linear differential equations of motion, algorithms, etc

23 p4215 A70-44504

AUTOMATIC ROCKET IMPACT PREDICTORS

U COMPUTERIZED SIMULATION

U IMPACT PREDICTION

AUTOMATIC TEST EQUIPMENT

Papers on automation in electronic test equipment, Volume 7, covering factory and depot for incoming inspection, production testing, quality control, maintenance and rebuilding

21 p3803 A70-40766

Miniaturized programmer-comparator MINI-BACE /Basic Automatic Checkout Equipment/, discussing design, mechanization, etc

21 p3803 A70-40767

Compact low cost Controller/Programmer/ Evaluator for varied automatic tests, using microminiature components

21 p3803 A70-40768

Electronic equipment test capability, programming methods and operation modes of General Purpose Automatic Test System, describing updating by USN

21 p3803 A70-40769

NASA automatic checkout systems for Saturn 5 stages and instrument units

21 p3803 A70-40770

General Purpose Automatic Test System using building block concept for avionic systems evaluation at military depot level

21 p3803 A70-40771

Computer controlled tester for digital circuits, giving diagrams and operations flow chart

22 p3996 A70-42849

Automated ultrasonic testing and facsimile data recording systems, discussing aerospace, marine and automotive applications

24 p4343 A70-45692

Nondestructive defectoscopic diagnostics, applying cybernetics to materials testing

24 p4344 A70-45694

AUTOMATION

Avionic units automatic testing to increase speed and reliability, discussing system configuration, parts, economics and computer language use

02 p0295 A70-11838

Automated techniques for topographic mapping, considering scales used

07 p1281 A70-19371

Computer and system design automation, considering language problems, microprograms, optimization on subsystem suboptimal basis, etc

10 p1845 A70-24874

Automatic air transportation passenger handling and postflight financial and statistical data processing

12 p2335 A70-27016

Man machine interface between operator and automatic testing equipment based on ergonomic design cost

13 p2360 A70-29687

Automatic laboratory or field testing equipment design requirements

13 p2423 A70-29695

Automatic test equipment for assembly shops, considering skilled personnel shortage, units complexity and repeatable test and repair

13 p2423 A70-29699

Book on automation of mathematical description of controlled plants covering signal generation, information acquisition, statistical disturbance, self adaptive systems, etc

14 p2560 A70-30629

Automated programmed device for fatigue tests based on harmonic oscillator, presenting schematic diagram

16 p2900 A70-33068

Computerized air transportation service including passenger name record, fare quotation, ticketing, etc

17 p3199 A70-34688

National Airspace System air traffic control automation program for en route and terminal facilities

19 p3464 A70-37914

Automatic test technology for avionics systems, discussing equipment and cost reduction

19 p3401 A70-38543

Statistical problems in technical automation - Conference, Moscow, February 1967

20 p3592 A70-39901

Computer calculations automation in mathematical models construction by statistical methods, discussing programs for distributed parameter systems, stochastic approximation, etc

20 p3592 A70-39903

Avionics hardware design guidelines to meet automated testing constraints including malfunction isolation, block requirements, packaging, etc

23 p4173 A70-44538

Air traffic control, future national airspace system improvements in view of air transportation growth, computerized automation technology, etc

24 p4374 A70-45969

AUTOMOBILES

Supersonic transport airworthiness criteria tentatively applied to road characteristics of automobiles

11 p1979 A70-25816

Flying qualities application to automobiles, discussing work load with respect to controllability and pilot behavior

13 p2347 A70-29142

Labyrinthine and sensory information role in driving, discussing car simulator, driver tests with impaired inputs, age factors, etc

22 p3976 A70-43708

AUTONOMIC NERVOUS SYSTEM

NT SYMPATHETIC NERVOUS SYSTEM

Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training

04 p0630 A70-14575

Cholinergic nervous mechanism of autoregulatory dilatation of pial arteries under decreased blood supply to cerebral cortex in rabbits

09 p1622 A70-23583

Autonomic effects on heart rate, portal, renal, cutaneous and muscle blood flows during arterial hypoxia in unanesthetized sham operated thalamic and pontine rabbits

12 p2170 A70-27899

Neurogenically maintained blood pressure component, discussing autonomic nervous system activity in hypertension and normotension, sympatholytic agents effectiveness in hypertensive treatment, etc

24 p4299 A70-45805

Inherited hypertension genetic and autonomic factors, discussing rats crossbreeding for genetic contribution ratio in males vs females, age effects, etc

24 p4299 A70-45806

AUTONOMY

Party autonomy application to standardized international air transport contracts, discussing international treaties, law court judgments and literature

02 p0402 A70-12267

Autonomy and invariance conditions for control systems composed of multivariable components having same number of inputs and outputs

07 p1244 A70-18768

Local control loop model of multiphase rectifier used as power amplifier, considering extension to nonautonomous and discontinuous conduction systems

21 p3802 A70-42267

AUTOPILOTS

U AUTOMATIC PILOTS

AUTOPSIES

Carboxyhemoglobin saturation in post mortem examination of aircraft accident victims, discussing errors in methodology

17 p3033 A70-35568

In-flight coronary occlusions role in aircraft accidents, discussing need for full autopsies, Double Masters ECG and full medical histories

17 p3033 A70-35570

General aviation aircraft accident post mortem findings, emphasizing standardization of format and terminology

17 p3040 A70-35579

AUTORADIOGRAPHY

Book on photographic action of ionizing radiations in dosimetry and medical, industrial, neutron, auto- and microradiography, emphasizing photographic materials reaction to photons and particles
02 p0337 A70-11696
T4 phage proteins radioisotopic examination, determining quantitative analysis, and molecular weight by autoradiography
20 p3583 A70-40325

AUTOROTATION

Weightless astronaut self rotation by limb maneuvers producing pitch and yaw motion
07 p1219 A70-19245
High powered high speed helicopters autorotation entry characteristics, noting capability of meeting control time delay requirement
17 p3014 A70-34715
Photospheric magnetic field differential rotation using synoptic charts for autocorrelation technique
21 p3885 A70-40951

AUTOTROPHS

NT HYDROGENOMONAS
Assimilation and metabolism of C atoms of pyruvate and acetate by strict autotrophs *Thiobacillus* cell, using radioactive substrates
01 p0021 A70-10788
Quantitative and qualitative differences in enzyme levels of intermediate carbohydrate metabolism in obligate autotrophs *Thiobacillus thioautotrophicus* and *Thiobacillus neapolitanus*
04 p0633 A70-15441
Temperature-synchronized semicontinuous culture and monitoring system for autotrophically growing *Euglenas*
04 p0633 A70-15453

AUXILIARY ELECTRIC POWER UNITS

U AUXILIARY POWER SOURCES
AUXILIARY EQUIPMENT (COMPUTERS)
NT PLOTTERS
NT PRINTERS (DATA PROCESSING)
AUXILIARY POWER SOURCES
NT CHEMICAL AUXILIARY POWER UNITS
NT NUCLEAR AUXILIARY POWER UNITS
NT SNAP
NT SNAP 8
NT SNAP 19
NT SNAP 27
NT SPACE POWER UNIT REACTORS
Emergency auxiliary hydraulic and electric power for commercial and military aircraft control, proposing self contained monofueled turbine system
[SAE PAPER 690658]
05 p0797 A70-15838
Flexible nickel cadmium secondary battery as nocturnal power supply for meteorological balloons transceiver and measuring instruments
08 p1440 A70-20711
Stand-by power supply for emergency lighting of Hamburg airport, discussing circuit connections for generators
08 p1482 A70-21371
Reliable and optimum cost power sources design for long life electronic digital communication equipment
12 p2166 A70-27927
Emergency auxiliary electric and/or hydraulic power for commercial and military aircraft using self contained monofueled gas turbine system
16 p2964 A70-33472
Large capacity sealed nickel cadmium battery for spacecraft, describing mechanical and electrical characteristics
16 p2844 A70-33473
MHD power sources for onboard military aircraft electrical application
16 p2964 A70-33474
High voltage DC electric power systems design for aircraft, considering filtering, transmission and loads interaction
16 p2844 A70-33475
Emergency auxiliary hydraulic and electric power for commercial and military aircraft control, proposing self contained monofueled turbine system
[AIAA PAPER 70-651]
16 p2970 A70-33616
Optimum mounting angles for direct solar radiation flux on solar battery on circular orbit satellite
18 p3215 A70-36176
Micropound extended range thrust stand /MERTS/ for testing electric thrusters for spacecraft auxiliary propulsion, providing three thrust measurement ranges and data telemetry system
[AIAA PAPER 70-1111]
20 p3607 A70-40232
Thermionic reactors for spacecraft auxiliary power and electric propulsion, discussing in-core conversion system and diodes
22 p4071 A70-43191
Hydrazine-fueled battery low power consumption auxiliary system with voltage regulator and gas pumps.
22 p3966 A70-43539
Ni-Zn high energy secondary battery cycle life and discharge capability
22 p3966 A70-43540
Airline selection of Auxiliary Power Unit (APU) for transport aircraft, noting benefits of air conditioning during ground operation
[SAE PAPER 700816]
24 p4394 A70-45901

TSCP700 aircraft auxiliary power unit design, fuel consumption and maintainability
[SAE PAPER 700815]
24 p4395 A70-45902
AUXILIARY POWER SOURCES
NT SNAP 27
AVAILABILITY
Availability model for system with exponential reliability function and constant repair time, determining start-up costs, cost-optimal mean up and down time, etc
01 p0221 A70-11382
Cost model based on initial and support costs for studying availability variations effect on system total cost and maintainability and reliability interrelationship
02 p0401 A70-11674
Computer program /SORCBE/ for systems unavailability tradeoff vs added cost for various versions
15 p2706 A70-32658

AVALANCHES

AVALANCHE DIODES
Read theory application to LF operation of avalanche diodes under large signal conditions
04 p0656 A70-14720
High efficiency oscillator using avalanche square wave diode, considering case of silicon p-i-n diode
05 p0819 A70-15815
Ge IMPATT diodes under pulsed operation to produce LF high efficiency oscillations, recording current and voltage waveforms
05 p0821 A70-16417
Phase, frequency and amplitude fluctuations in avalanche diode oscillators, studying noise origin
05 p0823 A70-16883
Bulk GaAs devices and avalanche /IMPATT and TRAPATT/ diodes compared as microwave sources
06 p1018 A70-17357
Optical and electronic mixing in avalanche photodiode during variable amplitude signal demodulation in optical heterodyne receiver, considering conversion losses
07 p1243 A70-20282
TRAPATT oscillator circuit characteristics determined from measurements and equivalent circuit calculations
08 p1475 A70-21277
Microstrip oscillator circuit design for operating with high power/efficiency avalanche diodes, describing low pass filter tuning section role
08 p1475 A70-21278
Circuit allowing direct combining of power from several avalanche diodes, discussing CW power output, single and multiple diode oscillators, etc
08 p1477 A70-21295
Zener diode used as hydrostatic pressure gauge, describing pressure effects on diode current/voltage characteristics
08 p1477 A70-21644
Short high current pulses generation by avalanche transistors in circuits suitable for investigating low impedance laser diode
09 p1642 A70-22035
P-n junction avalanche and bulk Gunn effect microwave oscillators, analyzing IMPATT and TRAPATT modes
09 p1644 A70-22224
Natural oscillation mode in symmetrically graded p-n junction using Missawa small signal equations for avalanche diode
09 p1653 A70-23804
Avalanche diodes and associated microwave circuits power generation in terms of IMPATT, TRAPATT, parametric, space-charge feedback and thermal modes
10 p1847 A70-23887
Tunable L band high power anomalous mode avalanche diode oscillator with coaxial circuit
10 p1847 A70-23888
Silicon diodes pulse operated in avalanche resonance pumped modes for producing stable microwave amplification
10 p1847 A70-23889
Solid state multistage high power avalanche amplifier at X band
10 p1847 A70-23890
Low power microwave IMPATT oscillator as parametric amplifier pumping sources for use in radar and communication systems
10 p1847 A70-23891
Si avalanche diodes oscillations external current waveform measurement using coaxial current monitoring assembly with negligible phase error
10 p1849 A70-24234
Avalanche diodes in presence of microwave instabilities related to field emission and charge transfer across depleted zone, discussing positive and negative resistance
10 p1850 A70-24621
Silicon avalanche diodes contingencies effect on material choice
10 p1850 A70-24622
Avalanche diodes microwave properties in utilization circuit, discussing negative conductance, nonlinear impedance and intrinsic noise current
10 p1850 A70-24623
Avalanche diodes properties, establishing equivalent circuit accounting for static electricity, carriers transit time and thermal effects
10 p1850 A70-24625
Silicon L-band avalanche diodes as high power pulsed microwave sources, discussing fabrication, circuit requirements, radar applications, etc
10 p1852 A70-24893
High power L-band avalanche diode oscillators fabrication and performance
13 p3736 A70-28977
Microwave avalanche diode emission frequency dependence on charge transfer across drift region, considering varactor diode output, negative resistance and noise factor
14 p2555 A70-30354
Millimeter waves generation by tunnel, Gunn and avalanche diodes, tabulating frequency, efficiency and power data
14 p2548 A70-30435
IMPATT microwave diodes small signal characterization by equivalent circuit using iterative computer procedure
15 p2708 A70-31971
Silicon avalanche transit time diodes as CW microwave generators and amplifiers
16 p2876 A70-33404
Avalanche diode transient temperature response, measuring thermal impedance under pulse bias conditions
16 p2878 A70-33695
Zener diodes as voltage transient suppressors for ground vehicle and aircraft power supplies
16 p2879 A70-34060
K-band high power Si avalanche diode oscillators, discussing decrease in pulse peak power output on basis of quenched plasma effect
16 p2880 A70-34260
Avalanche transit time diode and transferred electron oscillators in microwave systems, discussing design, performance and applications
18 p3232 A70-36675
Avalanche transistor circuits for rectangular pulses generation, considering delay line for optimum results
18 p3233 A70-36774
Small signal oscillation and growth for microwave loaded avalanche diodes with drift and ionization allowance
19 p3389 A70-37968
Etching effects on mesa profiles and edge breakdown of silicon avalanche diodes at high power and temperatures, using scanning electron microscope
19 p3389 A70-37971
Constant false alarm rate bias technique to control avalanche photodiode laser receiver over varying operating conditions of temperature, ambient illumination, etc
20 p3641 A70-39483
Avalanche diode microwave oscillators, considering Impatt and Trapatt oscillation modes
21 p3798 A70-41336
Wave instabilities in avalanche diode bulk semiconductors with negative field dependent drift velocity and carrier temperature, noting validity for gas plasma
21 p3863 A70-41915
Tunable high efficiency high peak power UHF avalanche diode oscillator
21 p3800 A70-42117
CW silicon SHF TRAPATT diode oscillator, discussing double sided design and fabrication
21 p3800 A70-42118
State space method for small signal lumped IMPATT diode model predicting small signal impedance
22 p3998 A70-43251
Miniature avalanche MOS diode, investigating capacitance voltage characteristics of deep depletion regime
23 p4172 A70-44007
Discharge pulse generation and equivalent resistance of relaxation oscillator applied to avalanche transistor
24 p4319 A70-45639

AVALANCHES
NT ELECTRON AVALANCHE
Carrier diffusion effect in large signal analysis of semiconductor avalanches in quasi-static approximation
19 p3387 A70-37768
AVERAGE
NT MEAN
Averaging over finite and infinite intervals derived for nonlinear integrodifferential equations with varying variables
03 p0594 A70-13507
Stepwise averaged parameters of nonuniform three dimensional flow through turbine blade cascade determined from conservation conditions
09 p1606 A70-23611
Averaging over finite and infinite intervals derived for nonlinear integrodifferential equations with varying variables
13 p2440 A70-28656

AVIONICS

Civil aviation electronics - Conference, London, September 1969, Part 1, Electronics in flight control

02 p0329 A70-11831

Avionic units automatic testing to increase speed and reliability, discussing system configuration, parts, economics and computer language use

02 p0295 A70-11838

Built-in, airborne and ground based automatic test equipment /ATE/ for fault finding and serviceability of aircraft electronic systems in civil aviation

02 p0295 A70-11845

Helicopter avionic systems man machine capability estimation based on pilot workload, applying results to design evolution

02 p0244 A70-12136

Gas pressure differences and diffusion rates recording using He-Ne laser interferometer, discussing aerodynamic applications and avionic instrumentation problems

02 p0299 A70-12272

Automatic testing of avionic units, describing electrical stimuli, measuring instruments and signal switching connection to test unit

04 p0663 A70-15042

Flammability control requirements and related hazards in avionics systems materials and components, using systems approach

05 p0956 A70-15854

Flight test results of avionics in aircraft

05 p0822 A70-16699

Complex integrated avionics computer system design for navigation, guidance and control of rotary wing aircraft, emphasizing microelectronic modular assembly

06 p1014 A70-17353

Avionic and space electronic equipment converging design, considering chip computer

06 p1017 A70-17354

Airborne computer system program for antisubmarine warfare enhancing human element in man machine system

06 p1185 A70-17974

Civil avionics systems engineering for safety, regularity, weather independence, flight patterns and airport utilization

08 p1468 A70-20649

Computer controlled automatic test system /NARF 5500/ for naval avionics systems support, discussing system hardware and applications and programming cost reductions

08 p1469 A70-20652

Automatic test equipment from fourth generation computer viewpoint, considering cost and size reduction trends in avionics

08 p1469 A70-20654

Carrier-based attack aircraft avionics, describing optimal large scale analysis procedure for flight control, communications and radar subsystems

08 p1470 A70-20660

General purpose support system /GPSS/ simulation for carrier operations and avionic maintenance, considering attack aircraft operations, spare parts, personnel requirements, etc

08 p1470 A70-20661

Automatic testing hardware and software compatibility emphasizing versatile avionic shop test /VAST/

08 p1470 A70-20662

Versatile avionics shop test /VAST/ Implementation Study recommendations on project management for automatic test equipment support system aboard attack aircraft carriers

08 p1601 A70-20663

Avionics maintainability concepts, discussing built-in test equipment, test connectors, automatic test equipment, fault detection and fault isolation

08 p1470 A70-20664

Onboard integrated maintenance system for aircraft avionics in-flight subsystems monitoring

08 p1471 A70-20669

Airplane dependability on basis of improvements in jet engine, avionics, pilot seat cushions and flight control systems

09 p1611 A70-23453

Avionics test station optimum design by computerized simulation involving iteration of computer run, analysis and model change

10 p1861 A70-24907

Automatic maintenance testing of avionic systems, discussing tape controlled equipment and program preparation

11 p2017 A70-25837

Systems engineering study of sensors in fighter aircraft avionics

11 p2081 A70-26501

Soviet book on aircraft AC and DC relay pulse generators, emphasizing controllable frequencies and duty factors and neutral and polarized electromagnetic relays

12 p2194 A70-26874

Avionics technology cost effectiveness effect on airlines and industry, considering systems engineering and specifications

[SAE PAPER 700299] 12 p2335 A70-27447

Multifunctional multimode avionics design integrating communications, navigations and identification subsystems /ICNI/

13 p2368 A70-29619

Relative cost benefits estimation of manual and automatic test systems for avionics in maintenance organization, proposing integrated maintenance and ATC data system

13 p2525 A70-29679

Avionics on military combat-reconnaissance aircraft, discussing automatic systems testing and cost effectiveness model

13 p2380 A70-29698

Flight control and human role in avionics system, discussing stabilization, autopilot and ILS systems

13 p2450 A70-29997

Avionics technology application to air traffic, discussing airborne computers use in navigation and control, secondary radar and correlation protected ILS

14 p2611 A70-30107

Ground and air based avionics for traffic control

14 p2612 A70-30109

Deterministic model for cost effectiveness of avionics support programs based on subsystems support ability, test philosophy and test equipment design and manufacture

14 p2563 A70-30857

Microwaves in integrated military avionics systems, discussing CNI, ECM, component reliability, etc

14 p2551 A70-31177

Avionics and instrumentation, discussing digital techniques application to engine control, electronic head-up and head-down displays, radiation pyrometry, etc

14 p2589 A70-31338

Avionics computers field repair method permitting removal and replacement of flat packs and discrete components on multilayer interconnection boards

15 p2706 A70-32655

Aerospace electronics - IEEE Conference, Dayton, May 1970

16 p2908 A70-33426

Fluidic technology for avionics systems, considering potential cost reduction and reliability improvement

16 p2843 A70-33445

General purpose parallel processor design for avionics, considering radar signal processing

16 p2910 A70-33467

Variable speed constant frequency /VSCF/ generators for avionics systems, discussing power, weight, volume, cost and reliability

16 p2910 A70-33486

Equipment and subsystems application to flight management avionics in military and commercial aircraft, noting role of ground-air information transfer

16 p2878 A70-33724

Space shuttle avionics cost effective design approach, discussing guidance, commonality, reliability, communications and autonomy

16 p2982 A70-33802

Flight deck design since 1920, discussing ergonomics and avionic aspects

16 p2913 A70-34048

Military aircraft avionics central digital computers, discussing memory capacity, computational speed requirements, cost and tradeoffs

17 p3049 A70-34673

Avionics problems in future Army aviation, discussing communications, navigation, instrumentation, automatic flight control, electronic countermeasures, fire control, etc

17 p3051 A70-34725

Aerospace industry instrumentation - Conference, Las Vegas, May 1969, Volume 15

17 p3091 A70-35476

Real time computers design tradeoffs in avionics systems

17 p3050 A70-35510

Flight/accident data recorders and associated equipment for civil and military aircraft requirements

18 p3258 A70-36342

Aircraft electronic equipment cooling techniques, discussing natural and forced convection, phase change and heat pipes

18 p3232 A70-36763

Aircraft digital interior communication systems, combining multiplexing techniques with solid state integrated circuits technology and systems integration

18 p3216 A70-36813

Computerized airborne integrated data acquisition and analysis system, discussing hardware, software and airborne-ground elements interfaces

19 p3382 A70-37393

Avionics role in STOL air transportation operational capabilities in congested air traffic environment

19 p3466 A70-38238

Avionics maintenance effectiveness logistics, discussing symptom pattern observation technique /SPOT/ for in-flight data

19 p3554 A70-38399

Automatic test technology for avionics systems, discussing equipment and cost reduction

19 p3401 A70-38543

Avionic systems automatic test equipment, discussing maintenance, reliability, cost and time reduction

19 p3402 A70-38544

Avionics hardware operational effectiveness assessment method, considering inertial navigation system LN-12D

19 p3442 A70-38837

Aerospace electronics covering fly-by-wire aircraft flight control, ATC, star trackers for spacecraft attitude control, etc

20 p3669 A70-39668

General Purpose Automatic Test System using building block concept for avionic systems evaluation at military depot level

21 p3803 A70-40771

Versatile Avionic Shop Test maintenance system supporting avionic equipment aboard aircraft carriers

21 p3804 A70-40772

Metropolitan air transit system design, considering compound helicopters, automatic control by central computer, onboard avionics system and terminal facilities

21 p3956 A70-41250

Aircraft electronics and instrumentation history, discussing anemometer, barometric altimeter, radar, communications systems, computers, flying control and various flight conditions

21 p3826 A70-41257

Aerospace digital computer and avionics systems man machine relationship optimization, considering human information and control response requirements

21 p3794 A70-41688

Computerized aerospace systems man machine interface mechanization for performance optimization, emphasizing integrated approach to avionic displays

21 p3795 A70-41689

Modular aerospace digital computer system architecture using off-shelf components for rapid avionic computing system realization

21 p3795 A70-41691

Low cost and weight reliable microminiaturized IC automatic cockpit checklist systems for aircraft pilots

22 p3977 A70-42298

Avionics digital computer system using associative memory for executive control functions implementation to mechanize task assignment algorithm

22 p3994 A70-43105

European avionics role in Post Apollo program, noting space shuttles, space tugs, space stations and modules

22 p3999 A70-43501

Aircraft electronics and instrumentation history, discussing anemometer, barometric altimeter, radar, communications systems, computers, flying control and various flight conditions

23 p4193 A70-43888

Avionics system for fighter aircraft, discussing weapons design, navigation-attack systems integration, etc

23 p4173 A70-44413

Avionics hardware design guidelines to meet automated testing constraints including malfunction isolation, block requirements, packaging, etc

23 p4173 A70-44538

High performance military aircraft missile command and control signal data processor microelectronics packaging, using integrated and printed circuit modules

23 p4174 A70-44542

Boeing 747 aircraft passenger entertainment and service system controls electronics design and wire installation improvement by multiplexing techniques

23 p4174 A70-44543

Boeing 747 airliner passenger entertainment and service electronics multiplexing system, discussing cable and connectors selection and design

23 p4174 A70-44544

Avionic components reliability, determining non-steady cooling air environment effects

23 p4175 A70-44744

Fluidics in naval avionics, discussing CH-46A helicopter stability augmentation and approach power compensator for carrier-based aircraft

24 p4293 A70-45428

AVOIDANCE

NT COLLISION AVOIDANCE

AVRO 698 AIRCRAFT

U VULCAN AIRCRAFT

AVRO 707 AIRCRAFT

Maneuver demand control using electric signalling feedback technique in Avro 707C and Hunter Mk 12 aircraft

24 p4374 A70-46203

AXES [COORDINATES]

U COORDINATES

AXES [REFERENCE LINES]

NT AXES OF ROTATION

NT EARTH AXIS

Extensive air shower axis position determined using energy methods and radial distribution geometry of particle density

01 p0171 A70-11252

Individual extensive air showers axes localized by measurement of charged particle densities, assuming age parameter

07 p1365 A70-18777

Earth rotation coordinates, discussing system coupled to earth by fixing of axes to zeniths of selected observatories and equatorial plane orientation

08 p1565 A70-20563

Electrical axis adjustment of east-west antenna array of crossed radio telescope by statistical processing of discrete sources observations

08 p1473 A70-21067

Earth rotation coordinates, discussing system coupled to earth by fixing of axes to zeniths of selected observatories and equatorial plane orientation

15 p2805 A70-32718

Imaginary axes effect of phenomenal space in contrast illusions of distance, discussing division of S field of vision by definite point fixation

20 p3573 A70-39764

Spacecraft principal inertial axis orientation estimation, comparing tangent 2 theta method with eigenvalue solution

[SAWE PAPER 847] 20 p3660 A70-40361

AXES OF ROTATION

NT EARTH AXIS

Shaft misalignment effect on accuracy of precision digital shaft angle encoders, using test fixture and optical methods

05 p0844 A70-15769

Motion equations of rigid vehicle derived in terms of body axes noncoinciding with mass center applied to ships and aircraft

05 p0881 A70-15883

Planets rotation axes inclinations related to Titius-Bode rule of solar distances, noting estimation of unknown inclinations

07 p1386 A70-19557

Asteroids uniaxial rotation as evidence against origin by collisional fragmentation of larger bodies

08 p1581 A70-21951

Spin axis motion of n-body coaxially mounted cluster of differentially spinning bodies, considering combined precession and nutation

11 p2123 A70-26128

Three axis motion simulator for in-orbit spacecraft attitude control evaluation using earth, sun and star sensor references

[AIAA PAPER 69-1029] 11 p2031 A70-26147

Earth rotation perturbations, analyzing secular polar shift dependence on dimensions, depth and location of seismic event

13 p2400 A70-29604

Transparent spherical rotor spin axis orientation by measuring Fresnel drag effect of optical beam inside ring laser cavity

19 p3445 A70-37669

Multiaxis clusters of single axis pendulous accelerometers with coincident centers of angular motion insensitivity

19 p3431 A70-38539

Gyro pendulum mounted on randomly vibrating platform, calculating stability of rotor axis vertical position

22 p4039 A70-43557

AXIAL COMPRESSION LOADS

Thin flat plates effective width under axial edge compression slightly beyond buckling limit, solving von Karman differential equations

01 p0198 A70-10094

Rectangular plates deformation under uniaxial compression, studying postcritical buckling behavior in presence of creep

01 p0201 A70-10937

Sandwich plates plastic buckling stability under uniaxial compressive loads from compressible theory viewpoint

01 p0204 A70-11137

Axially compressed cylindrical shells with edge constraints, determining critical load from inelastic behavior considerations

01 p0205 A70-11141

Reinforced plastics creep rupture strength under compression along elastic symmetry axes

02 p0322 A70-12805

Cylindrical shells buckling under biaxial compression and transverse loads, examining critical loads dependence on shell parameters, end conditions and elastic properties

03 p0590 A70-13380

Cylindrical two layer shells stability under compression and radial pressure, calculating compression and transverse shear strains in carrying layer and filler

03 p0592 A70-13443

Axial compressive forces influence on steel and Al cylindrical shell stability under external pressure

03 p0593 A70-13472

High speed photography for instability onset and subsequent buckling process in photoelastic circular cylindrical shells under axial compression

03 p0594 A70-13659

Far nonlinear postbuckling behavior of noncircular cylindrical shell under axial compression

03 p0598 A70-14241

Supercritical strains and buckling in rib-reinforced cylindrical shells under axial compression using strain-energy method

04 p0766 A70-14478

Elastic orthotropic fiberglass reinforced plastic shells stability under axial compression, analyzing shear modulus influence

04 p0712 A70-14490

Axial compression effect on low cycle fatigue of thin walled metal tubes in torsion

[ASME PAPER 69-MET-H] 04 p0705 A70-14880

Orthotropic axially compressed conical shell stability, evaluating lower critical load and postbuckling state

04 p0772 A70-14921

Orthotropic sandwich cylinders buckling under axial compression, presenting linear theory approximate design equations

04 p0776 A70-15381

Circular cylindrical shells with axisymmetric imperfections tested under axial compressive load, studying imperfection amplitude and wavelength effects on minimum buckling load

04 p0778 A70-15588

Axial compression of elastic circular cylinder in contact with identical elastic half spaces, determining interfacial surface stresses for frictionless and adhesive contacts

05 p0930 A70-16082

Adhesive or frictionless compression /or extension/ under axial load of elastic rectangle between two identical elastic half spaces in condition of plane strain

05 p0931 A70-16132

Incremental stress distribution near circular crack with internal pressure in neo-Hookean solid under deformation due to triaxial compression, illustrating initial stress effect

05 p0956 A70-17108

Thin shell buckling stressing maximum applied loads analysis for circular cylindrical shells with imperfect walls under axial compression

06 p1165 A70-17647

Thin walled cylindrical shell stability under stochastic lateral and axial compression loads using Liapunov method

[AIAA PAPER 70-104] 06 p1169 A70-18037

Local axisymmetric dimple imperfection effects on buckling load of circular cylindrical shell under axial compression

[AIAA PAPER 70-103] 06 p1170 A70-18167

Anisotropic fiberglass reinforced plastics creep properties under biaxial compression, showing compressive to tensile strain elimination or change

07 p1316 A70-19546

Initial perturbation effect of smooth cylindrical shells stability under critical axial compression noting deflection factor

07 p1415 A70-20190

Strain energy method applied to stability analysis of short longitudinally reinforced cylindrical shells under axial compression

08 p1584 A70-20536

Fiberglass reinforced plastics creep behavior under axial compression, studying time dependence of elasticity modulus and Poisson coefficient

08 p1526 A70-21174

Asymptotic analysis for axisymmetric buckling of axially compressed short cylindrical shells with free edges, using Batterman method

08 p1593 A70-21620

Cylindrical shells buckling under axial surface tensions using Donnell stability equations

08 p1593 A70-21624

Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression

09 p1780 A70-23207

Random displacement fields in thin circular cylindrical shells with initial imperfections under axial compression using statistical analysis

11 p2129 A70-25562

Stability loss in cylindrical shell under axial compression, noting critical load reduction by local axisymmetric depression

11 p2130 A70-25566

Clamping edges effect on critical parameters of cylindrical orthotropic shell under axial compression using undetermined Lagrange multipliers

11 p2130 A70-25567

Truncated conical shell buckling under axial compression using method for torsion buckling, correlating to equivalent cylindrical shells

11 p2135 A70-25980

Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations

[AIAA PAPER 69-93] 11 p2135 A70-25986

Buckling load calculations for axially compressed circular cylindrical shells under relaxed boundary conditions

11 p2140 A70-26484

Axisymmetric imperfection distributions effect on buckling of circular cylindrical shells under axial compression, constructing test models from photoelastic liquid epoxy

12 p2319 A70-27140

Stiffened cylindrical shells buckling under axial compression, obtaining imperfections and prebuckling growth mappings

12 p2319 A70-27141

Cylindrical shells design under axially compressed loads by elastic stability analysis, predicting critical loads

12 p2320 A70-27142

Thin cylindrical shells elastic buckling under uniform axial compression, considering Kirchhoff-Love hypotheses in critical stress determinations

12 p2324 A70-27396

Transversely isotropic shells stability with respect to subcritical deformation under axial compression using three dimensional linearized equations, determining critical loads

12 p2324 A70-27529

Shear buckling and uniaxial compression dependence on mechanical properties of clamped orthotropic plates, using Ritz method to compute bifurcation type loads

12 p2326 A70-27817

Cylindrical shells stability under axial compression by two dimensional Kirchhoff-Love applied theories, calculating critical stresses

12 p2328 A70-28282

Laminated glass fiber reinforced cylindrical shell stability resting on hinged supports under axial compression

13 p2514 A70-29285

Cylindrical shells under axial compression, using elastic stability analysis for critical loads prediction

15 p2822 A70-32512

In-plane boundary conditions effect on axially compressed conical shell stability under low buckling loads, using linear Donnell-type theory

17 p1886 A70-34971

Buckling loads and postbuckling behavior of curved panels under axial compression, noting dependence on boundary conditions

17 p1888 A70-35225

Stability of circular cylindrical shell reinforced by elastic rings at edges under longitudinal compression

18 p3341 A70-36581

Thin walled cylindrical shell stability under axial compression edge load beyond limit of proportionality

19 p3534 A70-37243

Stiffened thin walled circular cylinders buckling and postbuckling behavior under axial compression or external hydrostatic pressure

[DFVLR-SONDDR-59] 20 p3719 A70-39621

Dynamic stability of cylindrical shell with small curvature under static or periodically variable axial pressure loads

21 p3932 A70-40554

Ti single crystals plastic deformation in axial compression at high temperatures

24 p4358 A70-45239

AXIAL COMPRESSORS

U TURBOCOMPRESSORS

AXIAL FLOW

Design parameter importance in centrifugal axial flow particle separator tubes performance from separator tube development program data

01 p0163 A70-10680

Axial flow reversal in swirling incompressible tube flow, discussing static pressure, velocity profiles and turbulent Navier-Stokes equation

03 p0465 A70-13017

Boundary layer equations for axial laminar and turbulent incompressible flows over slender bodies of revolution solved by finite difference method

[ASME PAPER 69-WA/FE-2] 04 p0667 A70-14786

Motion generated by spherical body moving along axis of uniformly rotating fluid, measuring particle velocities ahead of and behind body

05 p0789 A70-16013

Axial profile characteristics of hypersonic near wake of slender circular cone based on pitot pressure, static pressure and stagnation temperature measurements

06 p0968 A70-17916

Temperature distribution in active elements of explosion proof asynchronous electric motors with multichannel bilateral axial flow ventilation systems

07 p1196 A70-19841

Transverse pressure gradient effect on parameters of turbulent boundary layer on body rotating in axial flow

08 p1483 A70-21193

Second order conical flows around wing-fuselage system, deriving expressions for axial perturbation velocity for various attack geometries

10 p1804 A70-24972

Flow pattern of axial flow of turbine stage calculated from cascade characteristics

11 p1975 A70-25794

Incompressible boundary layers velocity distributions on cylinders rotating in axial flow, considering

- centrifugal force effects, momentum thicknesses, local shearing stress, etc 11 p2038 A70-26477
- Axial compressor stage head determination by measuring axial thrust, noting fluid velocity nonuniform distribution influence 13 p2474 A70-28892
- Axial flow fans performance dependence on aspect ratio from empirical relationships, plotting various component losses and stage efficiency 14 p2529 A70-31418
- Axial wall conduction effects on steady state laminar flow heat transfer 15 p2825 A70-31815
- Turbulent boundary layer instability on rotating cylinder in axial stream, correlating mixing length to Richardson number 15 p2722 A70-32372
- Forced vortex impeller in axial flow fan without inlet vanes, presenting lift and drag coefficients of blade sections, loss of head, etc 19 p3352 A70-38222
- Three dimensional flow through rotor of axial vortex flow fan, using airfoil method for design 19 p3352 A70-38248
- Heat transfer from cylinder in axial air flow with induced turbulence of incident boundary layer, noting temperature effects 20 p3736 A70-39264
- Spatial gain variations transverse to discharge in axially flowing carbon dioxide laser amplifier, noting relationship to flow velocity 20 p3640 A70-39391
- High output CW carbon dioxide laser design, using gas pressure variation and fast axial flow 22 p4048 A70-42322
- Free jet flow axial gradient effects on drag coefficient measurement of slender blunted cones at zero attack angle 23 p4135 A70-44584
- Axisymmetrical nozzle aerodynamic shape design for conical to axially uniform flow conversion, using method of characteristics 23 p4136 A70-44991
- Subsonic flow around bodies of revolution in axial direction, using ALGOL program for numerical calculations 24 p4289 A70-46237
- AXIAL FLOW COMPRESSORS**
- U TURBOCOMPRESSORS**
- AXIAL FLOW PUMPS**
- NT TURBINE PUMPS**
- Axial flow pump impellers suction performance and cavitation conditions 06 p1075 A70-17137
- Liquid hydrogen axial flow pump inducer, describing suction pressure measurements, fluid conditions and flow rate [AIAA PAPER 70-627] 16 p2919 A70-33592
- Axially reciprocating pump, calculating fluid over-flow effect on working cell pressure change 21 p3759 A70-41775
- AXIAL FLOW TURBINES**
- Axial flow turbine stator and impeller blade twist calculated from gas flow stage area diameter using continuity and vorticity equations 01 p0001 A70-10175
- Cascade tests to investigate nature of flow in rotor blade channels of axial flow turbines with partial admission 01 p0162 A70-10329
- Optimal lift-drag ratio of cascades dependence on optimal pitch of cascades calculated for axial flow turbomachinery 02 p0356 A70-12750
- Tip clearance effects in axial flow turbomachinery, predicting blade-to-blade variation in outlet angles and stagnation pressure losses [ASME PAPER 69-WA/FE-26] 04 p0733 A70-14775
- Sound generation in axial-flow subsonic turbomachinery, using two dimensional model [ASME PAPER 69-WA/FE-4] 04 p0733 A70-14785
- Steady and unsteady flow through Napier turboblower axial flow turbine for full and partial admission, estimating mass flow and power output 07 p1189 A70-20294
- Efficiency loss with tip clearance predicted for mixed and axial flow single stage turbomachines, using perfect fluid model 11 p1974 A70-25787
- Optimal efficiency of axial turbomachines limit loading of blade root and hydrodynamical criteria 11 p1975 A70-25791
- Axial flow multistage turbines performance, examining profile manufacturing tolerances effects on cost 16 p2970 A70-33677
- Axial gas turbine performance prediction method improvements based on comparison with tests [ASME PAPER 70-GT-2] 18 p3304 A70-36859
- Three dimensional boundary layer flow on rotating axial flow turbine buckets, determining velocity profiles [ASME PAPER 70-GT-59] 18 p3243 A70-36874
- Annulus wall boundary layers in axial flow turbomachines, taking into account boundary layer growth and associated secondary flows [ASME PAPER 70-GT-92] 18 p3209 A70-36877
- Blade root design for axial flow compressors and turbines, avoiding tensile stress concentration 19 p3490 A70-38616
- AXIAL LOADS**
- NT AXIAL COMPRESSION LOADS**
- Elastoplastic zone and instability of precracked thin sheets under uniaxial loading applied to rectangular center-notched steel foils 03 p0598 A70-14239
- Equipment for cyclic biaxial testing, producing five biaxial stress states by simultaneous direct pressurization and axial loading of thin walled cylindrical specimen 03 p0464 A70-14309
- Transverse vibration of viscoelastic polymethyl methacrylate column with initial curvature under periodic axial load, determining amplitude-frequency curves [ASME PAPER 69-WA/APM-13] 04 p0772 A70-14915
- Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain-time histories and residual strain 04 p0779 A70-15599
- Biaxial prebuckling loading effect on compliance tensor in plastic buckling of square plates analyzed by local strain statistical theory 05 p0925 A70-15790
- Isotropic elastic cylindrical shell stability under combined compressive and axisymmetric local loads, using equilibrium equations for shallow shells 05 p0936 A70-16240
- Circular cylindrical shells stiffened by rings and stringers and subjected to periodic axial force, analyzing parametric instability 05 p0940 A70-16513
- Finite element method analysis of axisymmetrically loaded thin shells of revolution, considering non-linearity due to material properties and shell geometry changes 05 p0944 A70-16812
- Shear and linear strain energy criteria for limiting stress state model of solid deformable bodies, considering uniaxial, biaxial and triaxial loading 06 p1166 A70-17657
- Thin walled cylindrical shells design for axisymmetric impulsive loads, calculating strains due to explosive forming in water 06 p1167 A70-17867
- Stress-strain state equations for axisymmetrically loaded shells of revolution made of materials with variable moduli 07 p1399 A70-18660
- Circular plates dynamic response to axisymmetric time dependent loads, analyzing transverse restraint effects on response maxima by plate theory 07 p1404 A70-19251
- Axially uniform stress and strain in cylindrical shells, discussing Saint Venant torsion and displacement relations 07 p1405 A70-19255
- Point matching technique for plane elastic problems extended to axisymmetrically loaded elastic body of revolution, developing general computer program 07 p1416 A70-20303
- Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form 08 p1585 A70-20956
- Free vibrations and dynamic buckling of hinged extensible beam under axial force 09 p1768 A70-22061
- Beam vibration eigenfunctions with allowance for shear compliance used to determine beams dynamic stability under pulsating axial load 09 p1785 A70-23600
- Axisymmetric free vibrations of orthotropic cylindrical shell loaded on ends by constant axial force, investigating nonlinear elasticity 09 p1785 A70-23625
- Shells equilibrium with large plastic deformations, discussing stability under uniaxial/biaxial tension and physical models for material mechanical properties 11 p2130 A70-25569
- Axial strain controlled fatigue tests at elevated temperature, discussing specimen gripping, alignment and break detection for mechanical and closed loop hydraulic test machines 11 p2033 A70-26611
- Viscoelastic polymeric materials tensile failure under multiaxial loading 12 p2321 A70-27205
- Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading 12 p2328 A70-28200
- Al-Zn-Mg alloy welds delayed rupture under constant uniaxial load in distilled water or aqueous salt solution 14 p2591 A70-30970
- Shallow shells of revolution under axisymmetrical loads, analyzing plasticity and creep by integral equations algorithm 15 p2817 A70-32164
- Axial stress at notch root of shafts under axially symmetric loading, utilizing integrated birefringent patterns in transmitted light at room temperature [SESA PAPER 1970] 15 p2821 A70-32315
- Axially loaded cylindrical shells prebuckling deformation behavior measurement by holographic interferometry 17 p3086 A70-35012
- High strain fatigue machine with axial loading and servocontrol for short endurance testing 17 p3063 A70-35586
- Pressurized shells of revolution loaded axisymmetrically, formulating equations for calculation of displacements, forces and stresses 18 p3338 A70-36406
- Programmed fatigue testing machine for specimens under cyclic axial loads, transforming angular into linear displacements 18 p3237 A70-36473
- Limit load of cylindrical shell with rigidly clamped edges under varying pressure and axial force, using Tresca yield condition 18 p3343 A70-36722
- Unidirectional composites subjected to free vibration and axial end loading, considering longitudinal stress wave propagation in fiber direction 19 p3540 A70-37954
- Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form 20 p3719 A70-39379
- Perforated steel strip axial tension load limit, considering various hole diameters and numbers 21 p3936 A70-41415
- Parachutes lightweight coated fabrics air permeability under axial tensile loading and load cycling at room temperatures 21 p3843 A70-41835
- Joint strength of three layer fiberglass reinforced plastic panels with bilateral adhesive patches under linear axial force 22 p4115 A70-42812
- Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading 22 p4117 A70-43324
- Curved element approximation of orthotropic axisymmetric thin shells under axial loads 24 p4419 A70-45152
- AXIAL STRAIN**
- Out-of-phase or nonsynchronous biaxial straining effects on low cycle fatigue observed on Al specimen by cycling tension-compression and cyclic torsion 03 p0481 A70-12955
- Thin shells of revolution plastic collapse under axisymmetric loads on basis of Tresca-Nakamura yield criterion, using computer algorithm 03 p0598 A70-14238
- Vacancies influence on macrodefect nucleus formation in single metal crystals under uniaxial strain explaining Griffith crack initiation 05 p0861 A70-15784
- Viscoelastic behavior of styrene-butadiene rubber under finite uniaxial and equal biaxial deformations for nonisothermal case 05 p0929 A70-16068
- Plane circular crack in homogeneous and isotropic elastic body under uniform uniaxial tension using linearized couple-stress theory 05 p0931 A70-16089
- Axisymmetrical stress-strain analysis of viscoelastic cylinder enclosed in elastic shell under internal pressure using singular kernels 05 p0933 A70-16207
- Buckling of three layer cylindrical shells under steady creep conditions, deriving axisymmetric deformation 05 p0935 A70-16234
- Steel tube deformation under constant internal pressure and cyclic heating, plotting tangential and axial strain curves as function of cyclic loading 06 p1163 A70-17399
- Solid propellants mechanical properties under uniaxial tension 09 p1741 A70-22423
- Stressed state in region of strain raisers /round holes/ in plate subjected to two axial tension associated with plastic yield 09 p1771 A70-22464
- Uniaxial strain pulse propagation through various materials loaded uniformly with step function pressure by gas dynamic shock wave reflection 09 p1783 A70-23449
- Nonlinear plane deformation of elastic medium with cylindrical cavity under uniform axial tension using successive approximations 09 p1784 A70-23591
- High temperature fatigue tests of materials under uniaxial controlled strain, describing equipment, failure interpretation and data reduction 11 p2033 A70-26613

Finite element method applications to finite axisymmetric deformations of incompressible elastic solids of revolution

13 p2510 A70-28734

Circular cylindrical membrane axially symmetric deformations, determining axial and circumferential stresses

14 p2657 A70-30844

Uniaxial yielding correlation with substructure in Al-stainless steel metal matrix composites, using compressive loading test

15 p2756 A70-31565

Anisotropic glass fiber reinforced plastics strength and deformability under cyclic axial loads

15 p2766 A70-32897

Stress distributions in tapered bolt assemblies due to interference and uniaxial tension

16 p2992 A70-33989

Elastic membrane axisymmetric deformations, reducing nonlinear equations system to quadratures

20 p3718 A70-39230

Elastic and viscoelastic plates, calculating stress concentration and separation of embedded smooth circular inclusion under uniaxial tension

21 p3932 A70-40548

Hollow spheres and hemispheres nonlinear axisymmetric deformation, using shell theory reduced to two point boundary value problem for differential equations

22 p4112 A70-42288

Laminated composites time dependent static strength and reliability under uniaxial tension

22 p4119 A70-43678

Composite laminates under uniform axial strain, determining interlaminar stresses and displacements by finite difference techniques

22 p4060 A70-43684

Plastic postbuckling and imperfection sensitivity of spherical shells under axisymmetric bifurcation

23 p4272 A70-44714

AXIAL STRESS

Plastic flow under biaxial stress, discussing data acquisition system and computer program for comparing test and theory

03 p0480 A70-12954

Equipment for cyclic biaxial stress states testing by simultaneous direct pressurization and axial loading of thin walled cylindrical specimens

03 p0462 A70-12966

Ti-Al-Sn alloy tensile deformation mechanisms at cryogenic temperature under uniaxial and biaxial stress noting twinning, prismatic slip and dislocation characteristics

03 p0507 A70-13141

Limiting equilibrium under axial tension of brittle body with parallel axisymmetric external cracks, studying critical load, crack propagation, etc

03 p0594 A70-13737

Creep rupture and fatigue strength in solid body mechanics, considering triaxial stress state and simplified creep rupture theory variant

03 p0599 A70-14249

Equipment for cyclic biaxial testing, producing five biaxial stress states by simultaneous direct pressurization and axial loading of thin walled cylindrical specimen

03 p0464 A70-14309

Laplace transform of axial stress resultant in impacting semiinfinite elastic cylindrical membrane as exponential function involving wave propagation speed, applying continued fractions

04 p0769 A70-14859

Difference equations and axial stress tensor component for turbomachinery in curvilinear coordinates systems

04 p0776 A70-15268

Axial point force stresses in infinite elastic cylinder determined by superposition of Love solution and normal and shearing tractions

05 p0930 A70-16081

Static and continuity equations of equilibrium of axisymmetric and periodic stressed states of rectilinear helicoidal shell derived for elasticity relations

05 p0934 A70-16228

Membrane stress concentration near circular cutouts in axially stressed sheets reduced by predeforming immediate surroundings of hole

05 p0940 A70-16515

Axial and nonlinear bending performance compared for compression moldings laminated from random glass fiber mat

05 p0870 A70-16577

Vibrational creep curves of Al alloy under uniaxial stress level and amplitude, noting influence of small vibrations

06 p1168 A70-17930

Numerical analysis of axisymmetric elastoplastic deformation of circular plates under combined lateral load and membrane force

07 p1402 A70-18977

Critical stress-strain diagrams for brittle plate possessing notch-type stress raisers under biaxial tension

07 p1408 A70-19547

Atomic bond rupture rate in rubber subjected to uniaxial tensile strain in ozone environment monitored by electron paramagnetic resonance measurements

08 p1527 A70-21454

Unidirectional filamentary composites failure theory for uniaxial and combined stress, considering constituent material properties and fabrication processes

08 p1532 A70-21902

Multiaxial thermal fatigue cracking in carbon steels predicted by elastoplastic stress-strain analysis using finite element method

09 p1773 A70-22578

Axial tensile stress effects on stability of cylindrical shell under nonuniform external pressure

09 p1786 A70-23721

Materials bending fatigue strength calculations for biaxial tension compared with experiments showing agreement

10 p1964 A70-25289

Uniaxial low cycle thermal fatigue test procedure for ductile metals, describing strain measuring system allowing direct recording of load vs mechanical deformation

11 p2034 A70-26615

Aluminum sheets anomalous plastic behavior under balanced biaxial and uniaxial tensions

12 p2324 A70-27398

Al alloy welded sheets strength and plasticity under biaxial tension, examining excess elastic energy effects on strain kinetics and rupture

14 p2597 A70-30967

Stresses in plate containing circular hole with notch under uniaxial tension, determining parametric coefficients by Fourier transforms

14 p2661 A70-31326

Stress distribution in fiberglass unidirectionally reinforced composite material under uniaxial tension

15 p2765 A70-32180

Stress concentration problems for partially strengthened circular hole in plate under uniaxial tension

15 p2819 A70-32185

Biaxial stress effect on fatigue crack propagation in Al alloy plate under reversed bending

15 p2821 A70-32324

Maximum secondary principal stress axis and isotropic points determination in scattered light photoelastic analysis, considering bar in uniaxial tension and rectangular beam

19 p3546 A70-38345

Cross shaped plates with circular hole, determining stress concentrations under uniaxial and biaxial tension

20 p3734 A70-40443

Clad glass fibers axial stress measurement by photoelastic techniques

22 p4060 A70-43415

Full and half journal bearings in axial magnetic field, discussing hydromagnetic noncyclic squeeze fluid films

24 p4349 A70-45995

AXISYMMETRIC BODIES

Symmetrical body rotational motion with asymmetrical mass distribution about center of mass, determining minimum initial value of angular velocity

01 p0192 A70-11482

Steady axially symmetric MHD flow of inviscid incompressible fluid of small conductivity in strong magnetic field past fixed axisymmetric bodies

02 p0347 A70-12234

Maximum power transfer theorem, discussing rotation symmetry with respect to optic axis and confocal optical resonators

02 p0339 A70-12454

Shock wave shapes over axisymmetric power law bodies in hypersonic flow, noting asymptotic flow theory implications

03 p0406 A70-12946

Pseudo two dimensional photoelastic test method applied to axisymmetric solid propellant rocket grains under pressure and thermal loads

[SESA PAPER 1482] 03 p0482 A70-12968

Two dimensional and axisymmetric bodies shapes providing minimum wave drag to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves

03 p0409 A70-13863

Incompressible boundary layer flow of conducting fluid on solid two dimensional and axisymmetric bodies under transverse magnetic field approximated by momentum method

06 p1031 A70-17199

Hybrid finite element analysis for combination of axisymmetric shell and linear displacement triangular ring elements

[AIAA PAPER 70-137] 06 p1169 A70-18052

Flow field measurements upstream of axisymmetric blunt body in rarefied hypersonic flow used to investigate merging between bow shock and boundary layer

06 p0983 A70-18372

Power series solution of Cauchy problem for axisymmetric state of ideally plastic body

07 p1405 A70-19288

Limiting equilibrium of axisymmetric shells consisting of alternating reinforcement layers separated by layers of homogeneous isotropic material

07 p1415 A70-20184

Aerodynamic drag coefficients and moments for axisymmetric bodies of revolution in rarefied plasma derived for limiting case of delta flux

08 p1432 A70-21088

Aerodynamic coefficients for axisymmetric bodies moving in rarefied plasma, calculating corrections for thermal ion velocities

08 p1432 A70-21089

Axisymmetric or plane bodies temperature distribution from heat conduction analysis using computer program based on finite element method

09 p1788 A70-22581

Hall effect on MGD flow past axisymmetric body by studying incompressible inviscid flow past body of revolution at zero incidence

09 p1661 A70-23074

Boundary layer of MGD flow past axisymmetric insulator body analyzed to determine torque due to Hall effect

09 p1663 A70-23579

Unsteady laminar free convection on heated axially symmetric body under stepwise surface temperature variations and unity Prandtl number

10 p1967 A70-23875

Finite element computer code /AXICRP/ for creep analysis of plane stress, plane strain and axisymmetric bodies of revolution

11 p2015 A70-26682

Gravitational collapse of slightly spherical body with axial symmetry characteristics, taking linear approximation of equation for additions to metric in empty space

12 p2310 A70-28223

Sting diameter and cylindrical protuberance length effects on axisymmetric body base pressure in turbulent supersonic flow

[AIAA PAPER 70-585] 13 p2342 A70-29885

Axisymmetric bodies slow rotation or rotary oscillation in hydrodynamics and MHD using boundary value problems solutions

14 p2527 A70-30276

Maximum impact accelerations of spherical and conical bodies landing on water, using momentum theorem

15 p2722 A70-32524

Laminar compressible boundary layer similar solutions for axisymmetric blunt body, considering viscosity and density variations

16 p2833 A70-33123

Aerodynamic performance of axisymmetric body traveling at transonic Mach numbers for predicting installed nozzle flow fields and efficiency

[AIAA PAPER 70-700] 16 p2835 A70-33562

Laminar and turbulent boundary layer equations solutions for incompressible/compressible flows about two dimensional and axisymmetric bodies, using finite difference method

[ASME PAPER 70-FE-A] 16 p2892 A70-33641

Optimal orientation of axisymmetric spin stabilized rigid bodies as function of moments of inertia ratios, using single jet for alignment

[DFVLR-SONDDR-50] 16 p2976 A70-33773

Heat transfer and pressure drag of axisymmetric body in hypersonic flow, obtaining minimum energy nose and leading edge shapes by Pontryagin principle

[AIAA PAPER 70-825] 16 p3001 A70-33940

Blunt based right circular cylindrical body at subsonic speed, investigating turbulent near wake in wind tunnel

17 p3006 A70-34463

Axisymmetric blunt base cylindrical body with turbulent initial boundary layer, investigating flow structure in annular nozzle wind tunnel

[AIAA PAPER 70-796] 17 p3006 A70-34464

Hypersonic flow of shock heated plasma past axisymmetric blunt body and onboard magnetic source, using numerical method

17 p3008 A70-34491

Nonequilibrium air ionization in hypersonic viscous shock layers in flow about axisymmetric blunt bodies

17 p3008 A70-34501

Axially symmetric parabolic reflector with incident linearly polarized plane wave, determining Poynting vector behavior

17 p3043 A70-34615

Skin friction variation and boundary layer separation for rotating axisymmetric body, using two layer model

17 p3011 A70-35240

Base flow component of total drag for axisymmetric supersonic afterbody with single exhaust jet, considering turbulent mixing

17 p3011 A70-35656

Laminar free convection near two dimensional and axisymmetric nonisothermal bodies, examining surface temperature distribution and heat flux

18 p3345 A70-35999

Optimal orientation control of axisymmetric rotating space vehicle, using cyclic sliding mode theory

18 p3332 A70-36162

Stress concentration on axisymmetric annular wings calculated using method of singularities

18 p3207 A70-36377

Free convection boundary layer on two dimensional or axisymmetric body with sudden temperature increase, determining skin friction and heat transfer coefficients

18 p3346 A70-36487

Axisymmetric structure with elastic contact, analyzing stresses by finite element method with differential displacements

18 p3339 A70-36496

Magnetic three degree of freedom attitude control system for axisymmetric spinning spacecraft, using Kalman filter

[AIAA PAPER 70-974]

20 p3668 A70-39555

Axisymmetric dual spin spacecraft consisting of nonconcentric frictionlessly mounted cylinders equipped with viscous damping mechanisms, evaluating stability criteria by energy method

[AIAA PAPER 70-973]

20 p3715 A70-39556

Axisymmetric contact problem of hollow semi-infinite elastic cylinder subjected to stresses on lower end face, solving by Fourier integral transform

20 p3720 A70-39734

Gravitational collapse of slightly spherical body with axial symmetry characteristics, taking linear approximation of equation for additions to metric in empty space

20 p3710 A70-40098

Slender axisymmetric power-law missile bodies with ballistic factor, using Newton-Busemann centrifugal theory with skin friction

21 p3746 A70-41756

Hypersonic aerodynamic deceleration devices for axisymmetrical bodies with cylindrical main sections and various front sections, using gun tunnel techniques

[AIAA PAPER 70-1174]

21 p3746 A70-41839

Sphere and axisymmetric body with spherical blunting in low density gas flow, measuring local heat transfer flux

21 p3748 A70-42218

Numerical methods for mixed boundary value problem of axisymmetric shells of revolution, using truncated series expansion and finite difference expressions

23 p4272 A70-44712

Axisymmetrical nozzle aerodynamic shape design for conical to axially uniform flow conversion, using method of characteristics

23 p4136 A70-44991

Curved element approximation of orthotropic axisymmetric thin shells under axial loads

24 p4419 A70-45152

German monograph on deformations and tensile stresses calculation in axisymmetric bodies via finite element method involving matrix displacement method

24 p4420 A70-45225

Low gravity fuel sloshing in axisymmetric rigid tank, calculating oscillations by modified Galerkin method

24 p4324 A70-45292

Planetary nebulae NGC 7662 and NGC 7009 axially symmetric models from density distributions, H continuum threshold optical depths and central star temperatures

24 p4409 A70-45757

Time dependent inviscid transonic flow past two dimensional and axisymmetric bodies, presenting numerical procedures including imbedded shock waves as discontinuities

[AIAA PAPER 70-1322]

24 p4288 A70-45943

Viscous heat conducting compressible fluid flow past slender axisymmetric body, presenting Navier-Stokes hypersonic strong interaction theory

24 p4289 A70-46020

AXISYMMETRIC DEFORMATION

U AXIAL STRAIN

AXISYMMETRIC FLOW

NT ANNULAR FLOW

Conservation laws for viscous incompressible two dimensional and axisymmetric flow written in integrodifferential form

01 p0063 A70-10935

Mass transfer analysis for axisymmetric turbulent flow in circular tube, deriving turbulent velocity profile from two part model, based on von Karman similarity hypothesis

01 p0064 A70-11092

Axisymmetric turbulent incompressible and isothermal self preserving jet investigation using linearized constant temperature hot-wire anemometers

01 p0065 A70-11099

Density distributions of electrically charged trace components in axisymmetric jets, considering space charge effect and ambipolar diffusion

01 p0066 A70-11135

Growth rate and shear stress parameter of symmetric, turbulent, two dimensional and axisymmetric self preserving wakes and jets in streaming flow

02 p0223 A70-11861

Steady axially symmetric MHD flow of inviscid incompressible fluid of small conductivity in strong magnetic field past fixed axisymmetric bodies

02 p0347 A70-12234

Low turbulence wind tunnel axisymmetric contraction designed from reformulated Thwaites solution

03 p0462 A70-12935

Turbulent boundary layer of incompressible fluid flow in axisymmetric channels with swirl at inlet, considering components interaction, velocity, circulation profiles and resistance

03 p0466 A70-13389

Axisymmetric incompressible fluid flow aerodynamic properties in flat vortex chamber, studying core and boundary layer interactions and velocity fields

03 p0551 A70-13731

Axisymmetric sonic flow around slender body, determining boundary regions for slender body approximation and Guderley expansion utility

03 p0409 A70-14233

Axisymmetric and three dimensional gas flow around blunt bodies using numerical methods, discussing finite difference algorithms for gas dynamic equations

03 p0410 A70-14251

Asymptotic form of axisymmetric solution with Dirichlet integral for Navier-Stokes equations applied to flow past bodies of revolution with smooth surfaces

03 p0471 A70-14303

Ultrasonic beam scanning measurements in high temperature axisymmetric gas flow, discussing errors and use of numerical transformation methods

04 p0685 A70-14536

Potential axisymmetric vortex flow interaction with stationary flat surface, using existing numerical analysis by transforming boundary value problem to Volterra integral equations

04 p0668 A70-14864

Difference methods application to supersonic gas flow past blunt body and unsteady axisymmetric flow past body of unspecified configuration, analyzing stability

04 p0670 A70-14957

Flow field calculation for axisymmetrical gas flow in axial compressor cascade applicable to optimal blade design

04 p0617 A70-15191

Plane and axisymmetric transonic vortex flow approximate equations of inviscid noneat conducting gas for point on sonic line with entropy having extremal value

04 p0617 A70-15234

Unsteady flow equations for periodic axisymmetric laminar flow of second order fluids in circular cylindrical pipes

05 p0831 A70-15871

Near noise fields of choked axisymmetric air jet, discussing sound pressure levels surrounding jet

05 p0834 A70-16783

Axisymmetric motion of viscous heat conducting gas by constructing indirect analog of Poiseuille gas flow, applying results to slip flow regime

06 p1048 A70-18325

Diffusive separation of Ar 36 and 40 and He in axisymmetric supersonic jet taking into account pressure diffusion

08 p1431 A70-21027

Axisymmetric swirling jet ejection from semiinfinite tube into free space filled by fluid, solving flow equation by Wiener-Hopf method

09 p1658 A70-22153

Second order boundary layer equations for incompressible flow, presenting simplified integral momentum equation for two dimensional and axisymmetric flow

09 p1660 A70-22681

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow

09 p1662 A70-23219

Inverse blunt body problem using integral relations method assuming inviscid axisymmetric hypersonic gas flow

10 p1798 A70-24116

Laminar boundary layer characteristics in axisymmetric hypersonic nozzle calculated by finite difference method

10 p1804 A70-25187

Coaxially flowing jets axisymmetric turbulent mixing between inner and outer streams

12 p2211 A70-27837

Incompressible two dimensional and axisymmetric oscillating laminar boundary layer flows approximated by momentum integral equation, discussing flow along flat plate

12 p2158 A70-28205

Blunt base heat transfer in axisymmetric supersonic separated flow in axisymmetric near wake tunnel, comparing to previous data

13 p2523 A70-29989

Electric arc in unbounded axisymmetric steady gas flow, solving energy equation

15 p2780 A70-32129

Nonlinear two dimensional free boundary problem of axisymmetric heat conduction in tubes with internal surface solidification by variational technique

16 p2996 A70-33002

Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures

16 p2998 A70-33860

Vortices in axisymmetrically separated flows, comparing results of various experiments

16 p2894 A70-33895

Compressible turbulent boundary layers with heat and mass transfer in two dimensional and axisymmetric flows, using eddy transport coefficients

17 p3066 A70-34506

Turbulent mixing of axisymmetrical supersonic air jet into hot air, investigating Mach number and temperature difference effects on axial decay of velocity

17 p3072 A70-35546

Vortex core diameters calculation methods for axisymmetric angular momentum flows

17 p3074 A70-35750

Supersonic axisymmetric flows past bell-shaped bodies of varying bluntness, using Godunov finite difference method

17 p3012 A70-35887

Axisymmetric ideal incompressible fluid jet outflow from cylindrical vessel with conical bottom, using small parameter technique and conformal mapping

18 p3240 A70-36272

Axisymmetric one dimensional compressible flow theory applications to compressible fluids ducted flow

18 p3243 A70-36882

Incompressible axisymmetric flow through turbomachines, developing flowfield for given velocity distribution along arbitrary streamline

19 p3354 A70-38933

Compressible plasma axisymmetric channel flow under electromagnetic forces and ohmic heating, noting velocity profiles and current density

20 p3683 A70-40239

Axisymmetric jet plasma flow in magnetic nozzle, measuring electric potential, electron temperature and ion density and velocity

21 p3856 A70-41380

Self similar formulations for motion of radiating-absorbing perfect gas symmetric flow

21 p3954 A70-42202

Two layer gas flows in supersonic axisymmetric nozzles, using method of characteristics

21 p3748 A70-42210

Laminar axisymmetric incompressible boundary layer calculation based on Mangler transformation

22 p4008 A70-42414

Iterative method based on slender body approximation applied to axisymmetric sonic flow fields, splitting differential equation into coupled parabolic equations

23 p4132 A70-44124

Axisymmetric laminar compressible jet flow characteristics, allowing for compressibility effects due to temperature dependent density and viscosity variations

24 p4325 A70-45584

AXISYMMETRY

U SYMMETRY

AXLES

U SHAFTS [MACHINE ELEMENTS]

AXONS

Loebster giant axon membrane steady state current fluctuations measured under voltage-clamp conditions, considering current potassium component

11 p1987 A70-26006

AZIDES [INORGANIC]

Lead azide detonation hazards and resulting pressure waves, evaluating protective glove material by dynamic pressure measurements

12 p2289 A70-27665

AZIDES [ORGANIC]

Intramolecular formation of azo-linkage accompanying N elimination from bis-azide

05 p0810 A70-16052

Alpha- and beta-styryl azides catalyzed reactions in ethanolic sulfuric acid

05 p0810 A70-16053

Dicyanostilbene formation from phenylethynyl azide and isocyanate

05 p0811 A70-16054

AZIMUTH

Airborne cartographic azimuthal instrument with reflecting prism type optomechanical assembly and trihedral pyramid gyroscope for stabilization

01 p0093 A70-11269

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes

01 p0172 A70-11545

Azimuth between two stations of triangulation net determined by simultaneous observation of two satellites, discussing mathematical principles and applications in Europe

02 p0289 A70-11797

Gyrotheodolites application to azimuth determination, discussing use for directional control, photogrammetry in geodetic measurements, etc
02 p0295 A70-11800

Azimuth information transmission by PCM signals with equal repetition and scanning frequencies, investigating antenna characteristics
02 p0270 A70-12619

Transit instrument azimuthal stability, investigating horizontal axis support, screw controls and tube position during star observations
04 p0693 A70-15484

Direction fluctuations in radio wave scattering in turbulent gyrotropic medium using Einstein-Fokker-Kolmogoroff equation
04 p0653 A70-15722

Azimuth determination by Vector method based on satellite observations compared to Popovichi method, discussing discrepancy
09 p1670 A70-23329

VLF radio noise statistical parameters observed as functions of azimuth, considering atmospheric distribution and parameters correlations
10 p1884 A70-25259

Azimuth measurement techniques for success-run detectors
11 p2019 A70-26712

Steady state symmetrical model for solar wind near equatorial plane, investigating effects of magnetic forces, viscosity and anisotropic pressure on azimuthal motion
13 p2477 A70-29179

Satellite scintillation index variation with zenith angle and azimuth at ground station
14 p2574 A70-30739

Direction fluctuations in radio wave scattering in turbulent gyrotropic medium using Einstein-Fokker-Kolmogoroff equation
14 p2550 A70-30806

Balloon gondola azimuthal angle control by twisting suspension rope
17 p3090 A70-35315

Reaction jet azimuth control system for balloon-borne gondola
17 p3018 A70-35316

Guidance and navigation systems precision azimuth measurement by star sighting and gyrocompass techniques
22 p4067 A70-42663

Tracking elevation/azimuth errors due to frame misalignment, presenting least squares procedure for determining true bias and misalignment angle and axis
23 p4215 A70-44518

AZINES

Somato-vegetative and behavioral reactions of rabbits to electric stimulation of hypothalamus after injecting aminazine
07 p1209 A70-19521

Vegetative cardiovascular, motor and electrophysiological reactions to electrical stimulation of limbic and reticular formations in cerebrum after adrenalin and aminazine injections
13 p2352 A70-29352

AZO COMPOUNDS

NT RDX

Intramolecular formation of azo-linkage accompanying N elimination from bis-azide
05 p0810 A70-16052

Sterically hindered arylidiazonium salts absorption spectra and quantum yield data interpretation, considering photochemical properties
12 p2182 A70-28300

Photoreaction produced N-cyclohexyldiphenylketenimine from cyclohexyl isocyanide and diphenyldiazomethane
17 p3042 A70-34820

Addition and hydrogenation reactions of azomethines in chemistry of carbon-nitrogen bond, emphasizing Schiff bases
20 p3582 A70-38978

Diazo compounds purity effect on photosensitive photographic film quality, determining color image reproduction density
24 p4334 A70-45498

AZOLES

NT ACETAZOLAMIDE

NT INDOLES

NT OXAZOLE

NT PYRROLES

NT TRYPTOPHAN

Photoclimination of N from fused-ring triazoles in methanol
05 p0810 A70-16046

Aniline and o-anisidine production by photoclimination of nitrogen from fused ring triazoles
17 p3042 A70-34821

AZOTOBACTER

Alternating copolymer of guanylic and cytidylic residues synthesized in RNA polymerase-catalyzed reaction
09 p1630 A70-23274

AZULENE

Isomerization of isocyanide into azulene by irradiation and formation from biphenyl isothiocyanate,

observing ring expansion and electrophilic carbenoid properties
05 p0811 A70-16055

AZUR SATELLITE

Azur satellite launching project by NASA and Germany, describing orbit for investigating earth inner radiation belt, auroral zone and solar flares
03 p0580 A70-13797

Yo-Yo system for satellite Azur to reduce payload angular velocity after separation from booster, analyzing final spin error
04 p0762 A70-15152

Space simulation test results compared with analytical methods for thermal data prediction of Azur satellite
04 p0762 A70-15182

Mission objectives and technical realization of AZUR research satellite and Symphonie communication satellite
04 p0763 A70-15303

Pulse width modulation command coder for German research satellite Azur control
04 p0653 A70-15662

Azur satellite program, describing NASA-German cooperative effort
07 p1391 A70-18815

Yo-Yo system for satellite Azur to reduce payload angular velocity after separation from booster, analyzing final spin error
09 p1767 A70-23430

Azur satellite flight results, noting trajectory accuracy telemetry reception, yo-yo triggering and attitude control
13 p2505 A70-28766

Azur satellite ground control, describing system organization to measure scientific and data information for entire satellite lifetime
13 p2384 A70-28976

Azur satellite p- and n-type Si solar cell system providing both power supply and storage battery charging
13 p2506 A70-29553

PCM telemetry transmitters, command receiver and ground control for German research satellite Azur
16 p2890 A70-34349

Thermal space simulation tests on Azur research satellite relating to temperature control subsystems and qualification and acceptance procedures
19 p3399 A70-38288

Environmental tests and checkout procedures for Azur satellite subsystems and subassemblies integration into flight readiness
19 p3533 A70-38289

Azur satellite magnetic parameters simulation, noting spacecraft structure effect
19 p3400 A70-38295

Space motion simulators for Azur satellite, considering satellite attitude related to sun
19 p3400 A70-38296

Project AZUR organizational structure and post-launch problems, discussing onboard experiments
23 p4262 A70-44685

B

B STARS

Radial velocities determined from prism spectrograms for O and B stars in Milky Way field in Scorpius
02 p0369 A70-12062

Photoelectric line photometry used to study H beta/gamma and He I 4471 absorption line intensities of early B stars, determining projected rotational velocity
02 p0369 A70-12072

Catalog of faint Ob stars between Carina and Centaurus
02 p0370 A70-12075

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy
03 p0565 A70-13230

LTE departures in late B stars from measurements of Balmer and Paschen discontinuities
05 p0919 A70-16937

O and B type stars neutral He lines, studying UV line blanketing effects on predicted departures from LTE
08 p1571 A70-20912

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy
08 p1580 A70-21663

Radial velocities tabulated for late B-type north and south of equator listed in Catalog of Bright Stars
09 p1763 A70-23452

B3V stars atmospheres by LTE model and spectroscopic techniques
14 p2652 A70-31384

H gamma profiles of B type supergiants, discussing electron density levels, Stark effect, Balmer and Paschen series breaks, etc
14 p2652 A70-31385

Lyman alpha absorption by interstellar neutral hydrogen observed in O and B stars UV spectra
17 p3162 A70-34898

Observational evidence concerning validity of Saha and Boltzmann laws in O, B and A stellar atmospheres
17 p3170 A70-35387

Carina spiral feature progress report covering O and B star distribution, optical and radio H 2 and H 1 sources and cosmic dust
18 p3330 A70-37185

O and B stars velocity dispersion, considering Oort terms and average residual radial velocity
18 p3330 A70-37188

O-B5 stars mean ages estimation by hyperbolic approximation based on distribution in stellar associations
19 p3524 A70-38762

B stars kinematic parameters determination from radial and tangential velocities
19 p3525 A70-38775

Be star HD 37202 zeta Tauri II envelope instability, discussing radial velocities, profiles, line width and electron density in layers
21 p3888 A70-41119

Southern objective prism plates B stars with strong neutral He I absorption lines
21 p3890 A70-41160

Early B stars photometric examination of variable spectral lines, discussing beta Cephei stars possibility
21 p3922 A70-41981

OB star distribution statistical analysis in Southern Milky Way, discussing concentrations, relations and systematic deviations
22 p4100 A70-42854

Be stars hydrogen emission lines widths measurement
22 p4101 A70-42867

Stellar ring 274 reality confirmed by photometric measurements of OB member stars, determining variable shell star P Cygni location
22 p4101 A70-42868

Single normal main sequence stars rotational velocities compared with giant, supergiant, Be, A and metallic line stars and Population II objects
23 p4248 A70-44802

Be stars rotation, considering emission properties and evolutionary state of main sequence
23 p4249 A70-44807

Rapidly rotating B and Be stars interior evolution models, considering mass and radiation pressure
23 p4249 A70-44808

Be star rotation dynamics phenomenon, discussing time variations on main sequence scale
23 p4252 A70-44828

Gamma Cas star time and spectra observations, examining emission line profile variations and envelope and stellar model
24 p4404 A70-45415

B-52 AIRCRAFT

Flight evaluation of direct lift control (DLC) on modified B-52 aircraft, noting controllability improvement during ILS approaches and aerial refueling [SAE PAPER 690406]
03 p0411 A70-12896

Flying qualities criteria and piloted simulator studies during development and flight testing of stability augmentation system for B-52 aircraft [AIAA PAPER 68-1066]
04 p0624 A70-15380

B-70 AIRCRAFT

XB-70 aircraft flight tests in cruise and landing approach to evaluate handling qualities criteria [AIAA PAPER 70-566]
13 p2346 A70-29031

B-103 AIRCRAFT

U BUCCANEER AIRCRAFT

BABBITT METAL

U BEARING ALLOYS

BAC AIRCRAFT

NT BAC 111 AIRCRAFT

Design modifications for BAC Vanguard 953 aircraft conversion to palletized all-cargo service, discussing interior layout, cargo door, air conditioning and weight
16 p2842 A70-34049

BAC 111 AIRCRAFT

BAC 111 short/medium range jet airliner family status report on program activity
10 p1806 A70-24846

BAC 111 commercial aircraft family development, discussing program management
14 p2532 A70-31334

BACILLUS

Assimilation and metabolism of C atoms of pyruvate and acetate by strict autotrophs *Thiobacillus* cell, using radioactive substrates
01 p0021 A70-10788

Growth rate effect on glucose utilization rate using sporogenic strain of *Bacillus subtilis* during N and L-tryptophan limitation
01 p0021 A70-10790

Quantitative and qualitative differences in enzyme levels of intermediate carbohydrate metabolism in obligate autotrophs *Thiobacillus thioautotrophicus* and *Thiobacillus neapolitanus*
04 p0633 A70-15441

- Synthetic carbohydrates effects on A type clostridium perfringens, observing bacterial mass growth and protein elimination 09 p1614 A70-22081
- Chromosome of temperature-sensitive mutant of bacillus subtilis 168, observing multiforked replication at normal temperature and transfer of DNA 09 p1615 A70-22206
- Synthetic carbohydrates effects on A type Clostridium perfringens, observing bacterial mass growth and protein elimination 15 p2685 A70-32677
- Microgram 2-nitro-1-butyl pyridinium sulfate /NBPS/ inhibition of growth of Bacillus subtilis by blocking thymidylate synthetase 23 p4158 A70-44998
- BACK INJURIES**
- Lumbar vertebrae transverse processes fractures in air crashes, considering factors involved, incidence and pathogenesis 17 p3033 A70-35578
- BACKGROUND NOISE**
- Long term storage effects on noise, leakage current and thickness of Li drifted Si surface barrier detectors 03 p0482 A70-13023
- First order pressure gradient microphone design based on electrostatic principle, using foil electrets to discriminate against airborne and solid-borne noises 05 p0821 A70-16402
- Signal parameter quasi-optimal estimation during reception on background of normal noise with unknown correlation function 06 p1009 A70-17671
- Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtration of Gaussian noise 07 p1226 A70-18760
- HF radio noise environment, discussing local storm effects, noise power estimation, noise measurement methods, etc 07 p1231 A70-19172
- Nonenergetic parameter estimation of signal during optimal reception with random amplitude fluctuation in normal background noise using maximum probability function 08 p1461 A70-20868
- Optimal amplitude modulated radio signal reception on white and narrow band background noise, using nonlinear filtration and phase locked control 09 p1633 A70-22416
- Optimal noncoherent detector for fluctuating radar signals of noise background 13 p2369 A70-29727
- Optimal coherent radar detector for signals with unknown amplitude and background noise intensity 13 p2369 A70-29728
- A priori initial phase distribution influence on optimal nonenergetic parameter estimation of rectangular narrow band radio signals on white noise background 13 p2369 A70-29730
- AM signal reception on strong AM noise background, describing theoretical receiver design 13 p2370 A70-29740
- Optimal temporal and spatial-temporal resolution for unknown parameter of interfering signal on white noise background 17 p3048 A70-35680
- Optimal receiver synthesis for signal detection on background noise resulting from nonlinear filtration of Gaussian noise 18 p3229 A70-37104
- Mechanical parametric amplification, improving SNR of acoustic systems in hostile environments 19 p3422 A70-37695
- Plasma lasers, investigating striation oscillations and excess noise phenomena and generation mechanisms 19 p3446 A70-37858
- Random signal detection on uncorrelated Gaussian noise background with unknown intensity, discussing detector performance 22 p3986 A70-42553
- Optimal reception of phase manipulated signal on noise background with unknown statistics and information parameter a priori probabilities 22 p3987 A70-42561
- Algorithms for analog wideband signals optimal reception in presence of strong Gaussian noise 22 p3988 A70-42568
- Light signals detection on noise background, comparing algorithms based on nonparametric statistics 22 p3989 A70-42569
- Lightning discharge characteristics contributing to electromagnetic background noise at ELF determined from slow tail waveform measurements 22 p4015 A70-42777
- Optimal transducers distribution for estimating random field values in presence of additive noise 22 p4005 A70-43562
- Degraded photographic image enhancement limitations due to film grain noise 23 p4193 A70-43820

BACKGROUND RADIATION

- Millimeter background discrete source model, deriving required source density from small scale anisotropy upper limit 01 p0173 A70-10041
- Model explaining background X radiation spectral properties, assuming production by Compton scattering of radio, IR and optical quanta by relativistic electrons 01 p0171 A70-11124
- Diffused X ray background in isotropic world models in terms of Compton radiation from cosmic ray electrons in intergalactic space 02 p0356 A70-11743
- Extrasolar far IR background radiation observed with liquid He cooled telescope carried by Aerobee rocket 02 p0358 A70-12197
- Gamma ray background near proton synchrocyclotron beam degrader at NASA-LRC Space Radiation Effects Laboratory 02 p0275 A70-12268
- Emission spectrum characteristic distortion in scattering of background X rays at large red shifts by metagalactic electrons, considering photon scattering effect 02 p0358 A70-12491
- Cosmic X ray background interpreted as Compton collisions between cosmic black body photons and relativistic electrons in radio sources 02 p0360 A70-12792
- Diffraction correction of terrestrial, atmospheric and cosmic background radiation at aperture and disk determined by artificial moon method 03 p0442 A70-13084
- Spectral index for diffuse X ray sky background within specific band determined from rocket observations with wide angle telescope 03 p0479 A70-14223
- Sky background brightness temperature measurement at 408 MHz by pyramidal horn antenna 03 p0496 A70-14344
- Neutron monitor calibration method to eliminate natural cosmic ray background, decreasing errors due to ray intensity variation 05 p0846 A70-15938
- Assessing background magnitude caused by earth natural radiation sources during underground detection of solar neutrinos by radiochemical methods 05 p0899 A70-15950
- Galactic synchrotron emission and diffuse X ray background, noting correspondence between spectral indices of radio and X ray emissions in polar directions 05 p0913 A70-16472
- Observational extragalactic dependences obtained within framework of Friedman universe model with matter and neutrino background 07 p1383 A70-19407
- Ion counter circuit using second equivalent condenser for compensating background radiation current, assessing error 07 p1281 A70-19526
- Cloudy sky IR background radiation model for designing simulator of IR background for studying noise rejection characteristics of electro-optical automatic control systems 07 p1246 A70-19527
- Shear and rotation limits on universe from X ray background, using Euclidean shear and vorticity models with open and closed geometries 08 p1561 A70-20901
- Universal X ray background as superposition of nascent pulsars in various galaxies, using Crab Nebula pulsar as guide 09 p1748 A70-23792
- Isotropic background radiation measured in ozone-sphere with balloon-borne far IR radiometer 10 p1917 A70-24630
- Isotropic cosmic background radiation detection in presence of earth and galactic radiation, discussing influence on steady state cosmology 11 p2106 A70-26673
- Cosmic background radiation interactions with matter, discussing molecular excitation and black body radiation interpretation 12 p2291 A70-27054
- Diffuse cosmic X and gamma ray background radiation isotropic component 12 p2295 A70-27887
- Long wave cosmic radio background emission in circumlunar space by Luna 11 and 12 satellites, observing increase in earth magnetosphere tail 12 p2295 A70-28262
- Thermospheric background radiation from Cosmos 225 data 13 p2478 A70-29700
- Low energy neutrino cosmic background, discussing energy density, black body radiation, beta decay, scattering process and origin 13 p2479 A70-30001
- Extrinsic photoconductor with reduced background under uniform illumination, describing frequency response as function of recombination and dielectric relaxation times and load resistances 14 p2586 A70-30989

Cosmic microwaves anomalous absorption by interstellar IR-pumped formaldehyde in dust clouds shock heated layer 17 p3154 A70-34535

- Simultaneous measurement of optical and X ray emission from Scorpius X-1 and X ray diffuse background, using rocket-borne scintillation counter 17 p3157 A70-34831
- UV background radiation observed above atmosphere for intergalactic gas, Galaxy and subcosmic ray components 17 p3163 A70-34903
- Background thermal radiation veiling effect on IR photography extension into long wave spectrum 18 p3257 A70-36282
- Submillimeter wavelength night sky radiation background, observing effects on various cosmic ray phenomena 18 p3308 A70-36330
- Diffuse cosmic X ray background galactic component, using model to predict angular spread 18 p3308 A70-36484
- Centaurus A radio galaxy X ray survey, implying upper limit of background radiation temperature 18 p3308 A70-36516
- Milky Way galaxy continuous background radiation emission observed at various longitude intervals 18 p3322 A70-37130
- Cosmic X ray background measurements, describing ESRO R/73 experiment 19 p3512 A70-38491
- Cosmic electron spectrum formation by acceleration, considering metagalactic background X radiation 20 p3695 A70-39174
- Teleradiometer calibration in background radiation absence, using distant and finite point source method and collimator means 20 p3633 A70-39798
- X ray astronomy proportional counters sensitivity, reducing higher energy radiation background contribution 21 p3821 A70-40653
- Galactic or extragalactic origin of diffuse X ray background, reporting sky survey results 21 p3875 A70-40688
- Diffuse background cosmic X rays in energy range 20-120 keV from balloon observations 21 p3876 A70-40689
- Diffuse background of 2-20 keV X rays over Scorpius to North Galactic Pole sky band by rocket measurements 21 p3876 A70-40693
- Cosmic X ray background measurements at 25-200 keV onboard ESRO Skylark rocket, plotting results against galactic latitude 21 p3876 A70-40695
- Soft X ray background galactic absorption and intensity measurements indicating inverse relation to columnar atomic hydrogen density 21 p3877 A70-40698
- Extragalactic cosmic X ray background source models for intensity and energy spectrum, noting Compton scattering of black body photons by relativistic electrons 21 p3877 A70-40699
- Innerbremsstrahlung of intergalactic protons colliding with electrons as source of cosmic background X rays, interpreting intensity and energy spectrum 21 p3877 A70-40700
- Background gamma ray observations attributed to decay of pi-mesons produced by extragalactic cosmic ray protons collisions, noting radiation sources age 21 p3877 A70-40703
- Gamma ray background anisotropy effects of Sgr A flux arising from Compton scattering and neutral pion decay, discussing complex radio and IR structure 21 p3878 A70-40926
- Cryogenic cooling of IR radiation sensors for increasing sensitivity, considering background radiation interference from sensor optical system and detector/preamplifier noise 21 p3825 A70-41052
- Radio source count formula in zero pressure model universe for background radiation differential density evolution function 21 p3923 A70-42104
- Galactic X ray background due to inner bremsstrahlung associated with suprathermal particles, taking into account interstellar gas self absorption and ionization rate 22 p4093 A70-42465
- Lyman alpha sky background measurements by Mariner 6 UV spectrometer 22 p4094 A70-42932
- Diffuse X ray background attributed to X ray emission during supernova early phases 22 p4095 A70-42998
- BACKLOBES**
- Interference proof characteristics and shielding capability of mirror antennas improved by peripheral sheet metal or wire screens, reducing rear lobe level 09 p1648 A70-23151
- BACKSCATTERING**
- Electromagnetic wave backscattering from composite rough surfaces, using Stratton-Chu integral 02 p0261 A70-12589

Radar pulse scattering from ionized media including nuclear explosion fireballs and high speed reentry vehicle wakes, analyzing to retrieve backscattered pulse signal envelope

02 p0262 A70-12602

Power spectrum of backscattered radiation from turbulent reentry wake illuminated by radar pulse train, discussing electron density decay and pulse shape effects

03 p0408 A70-13585

Radar Thomson backscatter observations of ion temperature and ion-neutral collision frequency used to investigate reversible heating in E region

03 p0477 A70-13988

Backscattering cross sections of metallic bodies of revolution, analyzing statistically echo pattern of complex targets

03 p0452 A70-14225

Tropospheric scattering ability investigation with radar transmitter emitting vertical pulses, considering implications for scatter propagation from backscattering detection

03 p0453 A70-14298

Heat transport conduction mode and earth as heat sink in solar atmosphere, discussing mesopause coldest region, turbulence and solar plasma-earth electromagnetic interactions

[AAS PAPER 69-622]

04 p0677 A70-14644

Raman backscatter of frequency doubled ruby laser beam by water vapor in atmosphere observed by optical radar, calculating water vapor mixing ratio profile

04 p0677 A70-14950

Backscattered signal power density distribution along equivalent propagation path of delayed components, determining reflecting layers characteristics from echo signal phase

04 p0654 A70-15728

Laser atmospheric backscatter measurements using frequency shifted Raman scatter and Rayleigh components for separating returns due to gaseous and aerosol components

05 p0859 A70-16476

Backscatter radar signal phase determination from amplitude data, measuring phase and amplitude in laboratory

05 p0815 A70-16507

Diffuse component of lunar radar echoes, using model with volume backscattering from within lunar regolith, noting rocks permittivity

05 p0816 A70-16826

Backscattered field determination at edge on incidence from thin circular plates illuminated by plane waves

06 p1008 A70-17563

Backscatter observations of F region field-aligned irregularities during IQSY, discussing diurnal variations of echoes

06 p1059 A70-18539

Aspect sensitivity of HF backscatter auroral echoes in F layer, utilizing F supported ground scatter echo to account for ionospheric refraction

06 p1012 A70-18541

CW, pulsed and frequency modulated radar scatterometry, discussing flight, system, terrain and data processing parameters

06 p1012 A70-18594

Field strength predictions for expected returns from backscatter ionospheric soundings, predicting ionospheric propagation modes and losses during sunspot minimum

07 p1229 A70-19161

Ionospheric HF radio wave propagation, describing oblique backscatter sounding during IQSY

07 p1233 A70-19183

Scalar radiative transport equation solved iteratively for microwaves backscattering from turbulent plasma, deriving model for direct and cross polarized cross section

07 p1353 A70-19993

Martian surface radar observation results, discussing data processing method, backscattering behavior evaluation, relief and composition model, etc

08 p1456 A70-20643

Refractive index variations effect on backscattering, scattering and attenuation cross sections of ice sphere at various low temperatures

08 p1536 A70-21098

Atmospheric structure and turbulence relations to radar backscattering from clear air refractive index irregularities

09 p1715 A70-22361

Radar backscattering relationship to refractive index microstructure in turbulent clear atmosphere

09 p1716 A70-22366

Backscattering from rough surface of nuclear fireball measured by two way directive radar antenna on reentry vehicle

09 p1634 A70-22703

Plane electromagnetic wave backscattering from dielectric-coated metallic cylinder calculated as functions of incidence angle and coating external radius

09 p1636 A70-23075

Statistical analysis of aurora backscatter VHF measurements, discussing related stream plasma instability theory and diurnal variation

10 p1885 A70-25263

Sea roughness effect on bandwidth of radar backscatter, analyzing Doppler signals of eight millimeter aircraft navigation system

12 p2228 A70-26906

Axial incidence HF backscattering cross section for absorbing flat based cone assumed to obey impedance boundary condition

12 p2185 A70-27716

Ionospheric probing using pulsed radio waves at oblique incidence, discussing auroral radar, meteor radar, ground backscatter and variable frequency ionosondes techniques

12 p2224 A70-27728

Simultaneous magnetic, photometric and backscatter radio measurement of auroral and ionospheric echoes during geomagnetic storm, confirming electrojet theory

13 p2392 A70-28575

Inclined backscatter sounding of ionosphere in individual channels of multichannel radio link, analyzing data during minimum solar activity

14 p2547 A70-30149

Backscattered signal power density distribution along equivalent propagation path of delayed components, determining reflecting layers characteristics from echo signal phase

14 p2550 A70-30812

Venus radar backscattering properties indicating Muhleman theory applicability, noting radar echoes irregularity

15 p2806 A70-32802

Backscattered radiation depolarization during illumination of aqueous medium by linearly polarized laser beam

15 p2753 A70-32861

Erroneous height correlation coefficients in physical optics formulation of rough surface scatter

16 p2859 A70-32938

Scattered fields evaluation due to creeping waves for smooth convex radar targets, using algebraic expressions

16 p2956 A70-32978

Radar mapping in heavy rain with orthogonal transmit and receive polarization, using backscatter and attenuation to define maximum operating altitude

16 p2863 A70-33434

Millimeter wave radar for high resolution aircraft landing aid, describing experiments to obtain backscatter data from airborne platform

17 p3133 A70-34721

Nonpenetrative reentry vehicle nose thickness ablation sensor using gamma radiation backscatter

17 p3094 A70-35519

Amplitude and phase fluctuations of opposing waves in ring laser with allowance for waves coupling due to backscattering

18 p3267 A70-36618

Backscattering of collimated light beam emitted by pulsed point source into opaque medium

19 p3461 A70-37421

Polar electrojet and VHF auroral radio wave backscattering correlation, discussing geomagnetic disturbances effect

19 p3376 A70-37498

Radar for ionospherically propagated ground backscatter sounding, discussing two-aerial aperture synthesis technique and optical spectrum data recording and processing

20 p3585 A70-39393

Book on molecular and aerosol backscatter measurement from stratosphere by means of ground based laser beams

20 p3623 A70-39925

Multistation observations of long range field aligned backscatter irregularities in F layer, using ray path calculations

21 p3814 A70-40940

Radar backscattering from turbulent rocket exhaust plumes

21 p3791 A70-41730

Holographic interferometry by backscattering, considering displacement and deformation problems

22 p4039 A70-43456

Coherent radar backscatter, calculating autocorrelation and power spectrum of spurious noise from periodic random phase injections for filter design to eliminate noise

22 p3992 A70-43591

EM wave multiple scattering by spheres, attributing cross-polarization absence in backscattered field to spherical symmetry

23 p4160 A70-43767

Laser light polarization and depolarization during backscattering from aqueous suspensions

23 p4215 A70-44271

EM wave backscattering from lossless dielectric sphere, examining diffracted field surface waves role

23 p4165 A70-44960

Radar backscattering cross sections of horizontal and vertical polarizations for thin rectangular plate near grazing incidence

23 p4166 A70-44976

Two identical conducting thin cylinders illuminated by plane wave at arbitrary incidence angle, determining backscattering cross sections and induced current

24 p4314 A70-46133

Positron annihilation in quenched Cd metal from radar backscatter intensities in aircraft model compared with anechoic chamber measurements

24 p4315 A70-46257

BACKWARD WAVE TUBES

Electron trajectories in M-type backward wave tube, TWT and magnetron, giving output power expressions

05 p0823 A70-16885

HF backward wave oscillators with emphasis on limiting factors in millimeter waves generation, discussing ohmic and circuit imperfection losses

14 p2555 A70-30430

Diffraction radiation generator with CW operation in backward wave tube mode, discussing output power dependence on wavelength

18 p3231 A70-36410

BACKWARD WAVES

Backward and complex waves propagation in circular waveguide with coaxial dielectric rod, discussing arbitrary angular dependences

05 p0812 A70-16145

Optical parametric backward-wave instabilities in unbounded medium with stopband dispersion using Fourier-Laplace integral

08 p1552 A70-21595

BACTERIA

NT AZOTOBACTER

NT BACILLUS

NT CLOSTRIDIUM BOTULINUM

NT ESCHERICHIA

NT HYDROGENOMONAS

NT NITROBACTER

NT PSEUDOMONAS

Bacterial and viral detection techniques in liquids based on specific property measurement relevant to biological particle, emphasizing industrial processing applications

01 p0013 A70-10127

Gas chromatography study of fatty acids and polar lipids of thermophilic filamentous bacterial masses from hot Yellowstone Park springs

01 p0021 A70-10791

Chlorobium thiosulfatophilum sulfur bacteria growth on media with/without ammonium chloride exposed to illumination, noting various amino acids effects

02 p0241 A70-12797

Amino acid composition and terminal sequences of ferredoxins from photosynthetic green bacteria

06 p0994 A70-17616

Hydrocarbon distribution of various algae and bacteria, discussing hydrocarbons diagenesis and biological transformations in sediments

06 p0997 A70-18401

Gas mixture composition effect on bacteria growth oxidizing methane and propane, establishing proportional biomass concentration to hydrogen and oxygen in mixture

11 p1991 A70-25938

Hydrocarbon assimilating bacteria cultures selection, considering highest specific growth rate and maximum productivity

11 p1991 A70-25939

Molar growth yields from chemostat cultures of Hydrogenomonas eutropha on succinate and on fumarate, noting equivalence to ATP via oxidation

13 p2350 A70-29113

Nucleated organisms divergence from bacteria compared to nucleated organisms divergence into separate kingdoms by analysis of genetic changes in cytochrome c and transfer RNA

16 p2846 A70-32990

Parental termini-daughter strand linkage in initiation of DNA replication in Bacillus subtilis after thymineless germination

16 p2847 A70-33060

Prototype space foods effects on humans, determining changes in bacterial fecal flora content

17 p3032 A70-35565

Halophilic bacteria electron transport chain, examining hydrophobic forces role in menadione reductase structure

21 p3772 A70-40574

Microbial existence limits in hot springs at varying temperature and pH characteristics

22 p3970 A70-42956

Closed loop life support system employing algae and bacteria cultures to recycle water in addition to atmospheric regeneration

23 p4156 A70-45024

Cosmos 110 satellite experiments concerning radiation effects on lysogenic bacteria and plants

23 p4149 A70-45030

Homogeneous magnetic fields effects on growth rate of Saccharomyces cerevisiae and Micrococcus denitrificans

24 p4306 A70-45102

BACTERICIDES

Natural immunity characteristics in dogs after proton exposure, analyzing integumentary bactericidal activity, oral microflora and neutrophil phagocytic activity

03 p0423 A70-13707

- Activated carbons and ion exchange resins bactericidal action as function of silver coating techniques
04 p0641 A70-14574
- Natural immunity characteristics in dogs after proton exposure, analyzing integumentary bactericidal activity, oral microflora and neutrophil phagocytic activity
11 p1985 A70-25507

BACTERIOLOGY

- Spore and vegetative cell adenylate kinases of *Bacillus subtilis* proved indistinguishable by polyacrylamide gel electrophoresis DEAE cellulose chromatography
01 p0021 A70-10789
- Gnotobiotic mice with orally inoculated microorganisms observed for quantitation and fate of bacteria in intestinal tract
01 p0027 A70-11312
- Synthetic carbohydrates effects on *A. Type clostridium* perfringens, observing bacterial mass growth and protein elimination
09 p1614 A70-22081
- Organic substrates effects on *Hydrogenomonas eutropha* autotrophic and heterotrophic metabolism
10 p1817 A70-24700
- Synthetic carbohydrates effects on *A. Type Clostridium* perfringens, observing bacterial mass growth and protein elimination
15 p2685 A70-32677
- Energy yield measurements of catabolic and anabolic activity in autotrophically growing *Hydrogenomonas eutropha*
23 p4149 A70-44997

BACTERIOPHAGES

- Cytosine-thymine transitions from cytosine-5-H3 decay in bacteriophage S13 DNA, discussing coding change efficiency
05 p0803 A70-16948
- Lambda prophage induction into lysogens, noting nalidixic acid role in DNA synthesis inhibition
20 p3573 A70-39774
- T4 phage proteins radioisotopical examination, determining quantitative analysis and molecular weight by autoradiography
20 p3583 A70-40325

BAFFLES

- Bulk and wall temperature measurements for natural fluid convection in container with and without baffles for various heat flux and aspect ratios
06 p1175 A70-17684

BAGGAGE

- Air terminal design, describing mechanical systems for moving people, baggage and cargo
[SAE PAPER 700259] 12 p2206 A70-27431
- Automated baggage handling and processing, requiring total aviation community participation
[AIAA PAPER 70-917] 17 p3204 A70-35829
- Airport terminal design, describing electromechanical baggage handling and sorting systems
[SAE PAPER 700261] 18 p3237 A70-36822

BAILOUT

- Life support and survival gear design, testing, manufacture, supply and maintenance for combat ejections over rugged enemy terrain, discussing pilot injuries
06 p1002 A70-17706
- RAPIDJET escape, recovery and survival system providing rapid escape for large aircrew complement by manual bailout system utilizing semiautomatic escape slide
06 p0986 A70-17719
- Combat and noncombat ejection/extraction fatalities and major injuries to USAF crewmen
07 p1192 A70-19023
- Combat and noncombat ejection/extraction fatalities and major injuries to USAF crewmen
17 p3039 A70-35576
- Long term effects of ejecting from aircraft, discussing disability incidence after more than ten years
17 p3033 A70-35577
- Pilot airborne recovery device /PAR/ midair rescue system, discussing buoyancy, midair pickup, seat ejection energy absorber, homing avionics and human factors
[AIAA PAPER 70-1206] 21 p3752 A70-41812

BAINITE

- Strain tempering effects on upper and lower bainite, discussing strengthening and fracture toughness as function of temperature
10 p1905 A70-25173

BAINITIC STEEL

- Structure and mechanical properties of martensite and bainite in Fe-Ni-Co-C steels, discussing isothermal aging to obtain tough twinned martensite steels
01 p0119 A70-10733

BAKEOUT

U DEGASSING

BAKER-NUNN CAMERA

- Simple layer model of geopotential from satellite-borne Baker-Nunn camera observations
10 p1876 A70-24645
- Film reduction and time keeping used at Smithsonian Astrophysical Observatory for Baker-Nunn films
11 p2007 A70-26196

BALANCE

- Torsion balance for measuring gravitational constant based on Langevin resonance method
08 p1543 A70-20593
- Wind tunnel balance for measuring small aerodynamic loads on scale models, describing three component construction
17 p3062 A70-35490

BALANCE EQUATIONS

U EQUATIONS

BALANCING

- Balancing method for correcting mathematical model discrepancy with gas turbine based on test data
10 p1930 A70-24289
- Two-disk flexible rotor balancing method based on shaft vibration and bearing forces analysis
10 p1896 A70-25093
- Resistance bridge balancing by time method for dynamic digital measurements
11 p2054 A70-26433
- Color TV tubes white field balancing by spectroradiometer, colorimeter and colorgrad meter
12 p2195 A70-27372
- Tungsten filled urethane in aircraft areas as balancing agent
17 p3126 A70-35418
- Soviet book on vibration and balancing of aircraft engine rotors covering structural deformation and dynamics of turbine engines and compressors
19 p3489 A70-37237
- Asymmetric rotating bodies mass properties measurement on Dynamic Balancing Machine, taking into account aerodynamic forces
[SAE PAPER 69-181] 20 p3634 A70-40351
- Multiplane balancing method for minimizing weight required for spacecraft stability
[SAE PAPER 69-181] 20 p3595 A70-40362

BALL BEARINGS

- Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument gearing for space systems
[ASME PAPER 69-LUB-30] 01 p0100 A70-10379
- Dry lubricated instrument-size ball bearings operation in vacuum for long life and quality performance
[ASME PAPER 69-LUB-21] 01 p0101 A70-10386
- Gyroscopic bearing cross-torque control techniques, noting ball-group misalignment coupling
[ASME PAPER 69-LUB-17] 01 p0101 A70-10388
- Ball bearing performance prediction using analytical technique based on race profilometry data, considering torque variation
[ASME PAPER 69-WA/LUB-4] 04 p0698 A70-14769
- Equilibrium equations solved for statics of double row radial thrust ball bearing, neglecting load angle changes caused by deformations of races and ball bearings
06 p1077 A70-17929
- Sliding friction and wear of polytetrafluoroethylene ball bearing filled with graphite investigated for irradiation effects
06 p1077 A70-18404
- Spherical radial bearing with gas lubricant, solving Reynolds equation by small parameter method
09 p1690 A70-22450
- Despin ball bearing assemblies performance data for TACSAT and Intelsat 4, discussing technology needed for accelerated testing, higher precision, failure detection and lubricants
[AIAA PAPER 70-459] 11 p2058 A70-25471
- Low temperature tempering effects on steel transformations and axial rigidity of radial thrust ball bearings in aircraft
12 p2243 A70-27568
- Oil-vapor lubricated ball bearing system for deployable spin-free antenna of spin stabilized spacecraft
13 p2349 A70-28843
- Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument ball bearings and instrument gearing for space systems
13 p2419 A70-29120
- Crack initiation and propagation in rolling contact fatigue, emphasizing electrochemical effects in ball bearing failure
[ASME PAPER 70-DE-46] 16 p2931 A70-33509
- Ball bearings selection criteria, analyzing cost-value tradeoffs
[ASME PAPER 70-DE-48] 16 p2918 A70-33511
- Instrument size ball bearings lubricated with bonded dry or transfer films in simulated interplanetary spacecraft tests
16 p2923 A70-34166
- Disk forced vibration mounted on rotating shaft with ball bearings, assuming nonlinear elastic characteristic of system
16 p2996 A70-34293
- Ball bearing materials for ultrahigh vacuum space environments, determining frictional and wear behavior
17 p3099 A70-34573
- Accelerated vacuum testing of ball bearings and slippers at 30-130 F, considering dry lubricated brush/slipping material combinations
17 p3101 A70-34762
- Instrument ball bearings running torque prediction at high speed under combined radial and axial loads
[ASLE PREPRINT 70AM 3D-3]

- 19 p3438 A70-38803
- Hollow balls for high speed bearings by electron beam welding, describing full scale and rolling element fatigue tests
20 p3637 A70-39236
- Angular contact bearing balls track position on aero gas turbine engines shaft measurement in test rig at high speeds
20 p3638 A70-40141
- Gas turbine ball bearings, measuring effect of rolling elements shape on hydrodynamic power losses
21 p3834 A70-41776
- Electron beam welded hollow balls for high speed ball bearings, comparing fatigue life with solid balls
[ASME PAPER 70-LUBS-17] 22 p4044 A70-42444
- Fluid film lubricated, thrust loaded, angular contact ball bearing high speed performance, predicting skidding by isothermal Newtonian behavior in ball to raceway contact
[ASME PAPER 70-LUBS-7] 22 p4045 A70-42452
- BALLAST [MASS]
Water ballast effect on glider loads, using concept of characteristic velocities
18 p3213 A70-36253
- Water ballast loadings on sailplane Cobra 17, considering wing, aileron, tailplane, fuselage and landing gear
22 p3962 A70-42962
- Nonrigidly supported ballast effects on dynamic characteristics of slender body during atmospheric entry
23 p4258 A70-44594
- BALLISTIC CAMERAS
Photographic techniques for artillery projectile flight evaluation, emphasizing high speed range and drum film image synchronized cameras
13 p2407 A70-29159
- Ballistic photography system for luminous models in gas medium, using collimator for velocity measurement
20 p3632 A70-39746
- High speed photographic systems for ballistic studies, describing high intensity lighting systems
20 p3635 A70-40527
- Impact times measurement by photography, correlating projectile velocity with projectile-target distance
20 p3635 A70-40530
- Stereo synchroballistic shadowgraph system for explosively projected shock wave, using streak camera
[SMPTE PREPRINT 114] 22 p4031 A70-43027
- Ultrahigh speed ballistic-synchrophotography, using Imacon image converter camera for framing and streak modes
[SMPTE PREPRINT 113] 22 p4031 A70-43028
- High speed X ray flash motion picture installation for ballistic photography
[SMPTE PREPRINT 76] 22 p4037 A70-43068
- BALLISTIC MISSILES
NT MINUTEMAN ICBM
Oblate earth gravitational field effect on ballistic missile trajectories, including body range determination and quadratures expressed by elementary functions
01 p0178 A70-10423
- Modern astronautics, discussing postwar rocket motors and ballistic missiles construction, ELDO program, moon and planetary photographs and space walk, etc
05 p0960 A70-16627
- Soviet book on guided ballistic missiles design and construction employing liquid and solid propellant engines with emphasis on aerodynamic heating
06 p1155 A70-17410
- Reentry into earth atmosphere of heavy ballistic missiles with variable and constant geometry compared with light missile
08 p1433 A70-21766
- Radar system for Safeguard ballistic missile system, detailing perimeter acquisition and data processing system
09 p1638 A70-23421
- Rocket sled launching for reusable single stage-to-orbit ballistic transport system, noting increased payload capacity and global application
09 p1767 A70-23434
- Composite and double base solid rocket propellants manufactured by French factory for ballistic missiles, discussing plant installations
11 p2030 A70-25520
- Wide range wind compensated launcher settings for unguided rockets using wind-weighting model and iterative procedure requiring real time computation
13 p2503 A70-28528
- Safeguard defense system against strategic ballistic missiles, discussing Nike X program, PAR and MSR radars and Spartan and Sprint system
15 p2810 A70-32247
- Ballistic missile instrument orientation optimization based on CEP criterion, considering acceleration induced errors
16 p2947 A70-33317
- Scaling relations showing effects of ballistic coefficient, flight path angle and inverse atmospheric scale height on heating of ballistic entry bodies
17 p3012 A70-35667

Atmospheric temperatures from thin walled ballistic rocket surface measurements with high sensitivity photometer 18 p3261 A70-36997

Two-axis electrolytic bubble level as precision vertical reference and tilt indicator for ballistic missiles inertial navigation systems [AIAA PAPER 70-949] 20 p3631 A70-39578

Unguided rockets dispersion firing pattern and accuracy, discussing aerodynamic forces and ballistic coefficients 22 p4110 A70-43156

Warm gas reaction control thrusts via solid propellant exhaust products for ballistic missiles attitude control [SAE PAPER 700780] 24 p4295 A70-45863

BALLISTIC RANGES

Free flight ballistic range method for measuring average drag coefficients for microscopic spherical iron particles in free molecular flow 06 p0983 A70-18378

Anamorphic optics to focus luminous wakes of hypervelocity projectiles onto focal plane of slitless spectrograph in free flight ballistic range launching 07 p1287 A70-20082

Ballistic range tests to study ablation effects on aerodynamic characteristics of ablating and nonablating slender cones [AIAA PAPER 69-179] 11 p2148 A70-25976

Shock wave attenuation and reflection effects on turbulent hypersonic wakes in ballistic ranges 18 p3237 A70-36708

BALLISTIC TRAJECTORIES

Anomalous roll behavior of spinning ballistic reentry vehicles with compound aerodynamic asymmetry consisting of lateral offset combined with trim angle of attack [AIAA PAPER 69-103] 04 p0763 A70-15411

Suboptimal nonlinear state estimation from noise corrupted measurements in ballistic trajectory, using simplified extended Kalman filter 11 p2028 A70-26303

Ordnance flight dynamics, considering trajectory analysis and inaccuracies due to projectile wobble [AIAA PAPER 70-533] 13 p2506 A70-29001

Nonsimilar ablation of graphite sphere cones under ballistic entry conditions, predicting steady state rate and surface temperature 13 p2523 A70-29975

Hodograph theory for family of almost vertical ballistic trajectories 14 p2617 A70-31355

Variational equation of ballistic trajectory applied to two point boundary value guidance problems 15 p2812 A70-32504

Ballistic reentry vehicle roll-pitch coupling, showing influence of nose asymmetries [AIAA PAPER 69-101] 21 p3930 A70-41736

Ballistic trajectory, packageability, deployment and flight stability of attached ram air inflatable decelerator for high speed/low altitude store delivery [AIAA PAPER 70-1199] 21 p3752 A70-41817

BALLISTIC VEHICLES

Range, block speed and fuel-weight ratio formulas for hypervelocity, boost glide and ballistic vehicles 08 p1582 A70-21871

BALLISTICS

NT INTERIOR BALLISTICS

NT TERMINAL BALLISTICS

Ballistic compressor performance as high intensity pulsed light source, discussing Xe gas heating and laser pumping 02 p0311 A70-11921

Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles 04 p0776 A70-15422

Approximate time solutions to light antiaircraft projectiles velocity, altitude angles, gravity drop and downrange, reducing differential equations of motion to dimensionless forms 04 p0764 A70-15592

Ballistic range measurements of vibrational nonequilibrium effects on leading edge shock wave shape for cone-cylinders fired through chlorine atmosphere at supersonic speeds 04 p0621 A70-15601

German aeroballistic hypersonic test facility with moving model and rest atmosphere, describing acceleration mechanism and several tests 06 p0965 A70-17246

Soviet book on thermodynamic and ballistic fundamentals of designing solid propellant rocket engines 06 p1130 A70-17421

Wind compensation for wind effects with elevation angle in ballistic rocket launching problems 07 p1394 A70-19718

Monopulse ruby lasers for moving object illumination during shadow photography, noting applications to ballistic studies 09 p1698 A70-23173

Temporal echo in plasma for applied rectangular pulses, discussing ballistic approximation 19 p3480 A70-38174

German book on principal characteristics of flight mechanics and ballistics covering mirror symmetric aircraft and axisymmetric bodies such as projectiles and missiles 21 p3749 A70-40738

Slender axisymmetric power-law missile bodies with minimum ballistic factor, using Newton-Busemann centrifugal theory with skin friction 21 p3746 A70-41756

BALLISTOCARDIOGRAPHY

Ballistocardiography and cardiovascular performance - Conference, Atlantic City, May 1968 02 p0240 A70-12675

Display devices for ballistocardiographic test data obtained from professional pilots free of cardiovascular disease subjected to displacement and acceleration 02 p0247 A70-12676

Absolute ULF ballistocardiogram (BCG) values as pulsatile fluid pumping values in cardiodynamic function before and after exercise 02 p0248 A70-12677

Ballistocardiogram force envelopes and pulse pressure relationship, noting perturbation of viscoelastic networks coupling cardiovascular system to ballistic bed 02 p0240 A70-12678

Rigid support properties effect on deformation of ULF ballistocardiogram for quality of recorded curves 02 p0248 A70-12679

Readers interpretation and applications of Starr criteria for ULF ballistocardiograms, showing uniformity for patients with coronary heart disease 02 p0248 A70-12680

Stroke volume formula depending on blood density and viscosity, indicating Hagen-Poiseuille law nonapplicability to ballistocardiography 02 p0248 A70-12681

Chronological age correlations with ballistocardiographic modalities /stroke volume and minute volume indices/ for patients with no cardiovascular disease 02 p0248 A70-12682

Age correlations with ballistocardiogram amplitudes and waveform grades in test pilots 02 p0240 A70-12683

Posture effect on ballistocardiograms, considering ventricular ejection flow changes 02 p0248 A70-12684

Ballistographic psychological evaluation of heart and circulatory system by recording displacement, velocity, acceleration and total forces imparted during each beat 10 p1810 A70-24039

HF ballistocardiograms resonance distortions correction, using electrical selective filters 19 p3369 A70-38210

Ballistocardiogram autocorrelation function and spectrum by scanning graph decoder and computer, determining total power, harmonics periodicity and energy concentration 19 p3370 A70-38211

Ballistocardiography and cardiovascular therapy - Conference, Oporto, Portugal, March-April 1969 21 p3762 A70-41226

Cardiac glycosides and beta receptor blocking agent effect on ULF displacement ballistocardiogram in healthy young men, measuring heart rate and blood pressure 21 p3763 A70-41227

Velocity ballistocardiogram modifications during high altitude stay, observing amplitude and RJ and RI variations 21 p3763 A70-41228

Ballistocardiograms hypertensive observations multivariate analysis, discussing factors for various groups discrimination 21 p3763 A70-41230

Hypoxia and hyperoxia effect on ballistocardiogram of healthy males, determining systolic and minute cardiac forces 21 p3763 A70-41231

Ballistocardiogram relationship to cardiac performance index in hypoxia and hyperoxia conditions, investigating systolic and minute cardiac forces 21 p3770 A70-41232

Work load effect on ballistocardiogram by minute cardiac force (MF) measurement, using bicycle ergometer 21 p3763 A70-41233

ULF ballistocardiogram amplitudes relationship to blood flow velocity for cardiovascular disease diagnosis 21 p3763 A70-41234

Acceleration Bcg dependence on left ventricular ejection flow and properties of vascular system 21 p3763 A70-41237

Algorithm for cardiovascular force computation from phasic regional blood flow and mass motion, interpreting Bcg 21 p3763 A70-41238

Bcg interpretation, discussing degrees of freedom, blood mass displacement, cardiovascular system, etc 21 p3770 A70-41239

BALLOON FLIGHT

Balloon flights for remote sensor systems tests, describing return-beam vidicon and tracking telescope experiments 06 p1061 A70-17153

High energy neutrons searched for during solar flares by balloon flights, giving upper limits for gamma ray and neutron fluxes 06 p1136 A70-18008

Grating spectrometer with Ge-Cu detector used on balloon flights for studying variations of IR solar spectrum with altitude, emphasizing sunset features 06 p1152 A70-18523

Monograph on balloon and satellite borne spark chambers for cosmic gamma radiation energy and direction determination, discussing relativistic electrons multiple scattering 07 p1368 A70-19617

Electronic timing device for light balloon payloads, describing circuit 07 p1286 A70-19975

X ray fluxes upper limits from quasars 3 C 196, 3 186 and 3C 380 measured by balloon flight experiments 09 p1745 A70-23271

Meteorological problems associated with accurate weather prediction affecting launch, trajectory and recovery of ballooning systems 14 p2606 A70-30555

Balloon flight measurements clarifying Arcasonde sensor bias over radiosonde atmospheric temperature data 14 p2585 A70-30570

Free floating balloon position and velocity determination by satellite, using Kalman filter linear estimation theory 14 p2530 A70-30571

Balloon localization with transponder system, measuring payload distance by phase difference in ground transmitted and received CW signal 14 p2588 A70-31308

Stabilized balloon flights during weak winds in stratosphere, discussing pressure vs time curves 14 p2531 A70-31311

Balloon gondola azimuthal angle control by twisting suspension rope 17 p3090 A70-35315

Hunting phenomena of hydrogen gas plastic balloon at ceiling altitude, considering exhaust duct, extra volume and shape 17 p3018 A70-35317

High energy cosmic gamma radiation detection from point source in Sagittarius, using balloon mounted spark chamber with Cerenkov telescope 19 p3500 A70-38078

Thermal design of high altitude balloons and instrument packages, analyzing vertical motion dependence on heat transfer and radiation environment 21 p3755 A70-42077

Position tracking of SOMEX superpressure balloons by solar angle method 24 p4372 A70-45423

BALLOON SOUNDING

Primary cosmic ray nitrogen nuclei intensity and spectrum measured by balloons and Pioneer 8 space probe, obtaining abundance difference from solar atmosphere 01 p0169 A70-10319

Pulsed high energy X rays from Crab Nebula pulsar NP 0532 measured by balloon-borne X ray telescope 01 p0169 A70-10345

Sco X-1 high energy X ray emission intensity changes observed by balloon-borne telescope 01 p0169 A70-10346

Cosmic ray electron intensity diurnal variations measured with combined Cerenkov telescope and Pb-scintillator sandwich detector on balloon flight 01 p0170 A70-10408

Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability [AIAA PAPER 69-1068] 01 p0195 A70-10633

Twilight sky polarization data in visible spectrum obtained by high altitude balloon-borne photoelectric photometers 01 p0079 A70-11219

Gamma ray astronomy using balloon-borne telescope with digitized spark chamber 02 p0364 A70-11785

Celestial X rays from Cygnus XR-1 detected during high altitude balloon flight, noting compatibility with black body radiation or hot thin plasma 02 p0356 A70-11786

Atmospheric IR radiation transmittance in 590 to 750 per cm interval, using balloon-borne spectrometer 02 p0256 A70-11928

Onboard radio altimeter for position finding of research rockets and balloons used for aeronomic investigations 02 p0298 A70-12084

Balloon measurements of cosmic ray alpha particle flux in upper atmosphere over Japan to obtain solar modulation effects data 02 p0357 A70-12122

Superpressure balloon flight trajectories for dynamics of tropical stratosphere, revealing distinctive circulation features

02 p0228 A70-12694

Primary cosmic ray proton energy spectrum determined using balloon-borne ionization spectrometer and spark chamber

02 p0360 A70-12844

GHOST /Global Horizontal Sounding Technique/ balloon for meteorological observation over Southern Hemisphere emphasizing technique to overcome icing in clouds

04 p0622 A70-14550

Stratospheric balloon measurement of near UV from early type stars, discussing gondola, observation method, telescope and photographic recordings analysis

04 p0750 A70-14704

X ray source position determination by balloon observations, estimating intensity in different energy ranges

05 p0904 A70-16978

Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes

07 p1367 A70-19445

Pulse radar altimeter design for balloon sounding, discussing flight tests, superregenerative stage, etc

07 p1286 A70-19996

ROBIN superpressure mylar spherical falling balloon deployed from sounding rocket apogee for density and wind measurements via radar tracking

07 p1194 A70-20260

Nitrogen dioxide presence in solar atmosphere from balloon-borne spectrometer observations, presenting graph of sunset solar spectrum

08 p1575 A70-21262

Astronomical sounding balloon to study interplanetary scattered light, discussing actuating and control, structure, onboard and ground electronics

08 p1497 A70-21349

Solar constant measurement by Eppley normal incidence pyrhemometers on high altitude balloons

08 p1501 A70-21920

Tropospheric elevated layers fine structure characteristics by balloon-borne spaced cavity refractometer

09 p1714 A70-22353

Astronomic observation balloon Thisbe, discussing telescope, stabilization, basket control, data processing and objectives including zodiacal light and night sky brightness measurements

10 p1804 A70-23915

Vertical wind components from balloon ascent observations, considering drag, atmospheric density, wind velocity, etc

10 p1911 A70-23927

Ambient temperature measurement by constant level balloon mounted thermistors, discussing errors from differential heating of thermistor support by solar radiation

10 p1886 A70-23935

Balloon observations of Cen XR-2 X ray emission decrease

10 p1948 A70-24999

Motion of incidence regions of X ray radiation in auroral zone using simultaneous balloon measurements

10 p1935 A70-25283

Energy spectra and composition of heavy nuclei in primary cosmic rays during low solar activity by nuclear emulsion stacks exposure in balloon flights

11 p2105 A70-26295

Balloon-borne device for analyzing atmospheric carbon dioxide, moisture and methane, using cyclic analysis by gas chromatography

11 p2052 A70-26371

Solar gamma ray lines search with high resolution balloon-borne directional spectrometer based on lithium-drifted germanium detector

12 p2292 A70-27178

Multiplexer-interface system for digital nuclear and position control data transfer from high altitude balloons to earth monitoring instruments

12 p2233 A70-27407

Primary cosmic ray proton and alpha particle spectral measurements by balloon flights

12 p2293 A70-27586

Balloon-borne measurement of troposphere refractive index vertical distribution using spaced-cavity refractometer

13 p2394 A70-28789

Solar spectra recording by balloon-borne monochromator, measuring stratospheric Ir absorption

13 p2491 A70-29050

Auroral zone rapid motions associated with electron precipitation, discussing balloon flight data

13 p2478 A70-29198

FPS-16/Jimspere wind profiles measurement, discussing effect of data smoothing on accuracy and resolution

14 p2607 A70-30569

Balloon-borne optical dew point hygrometer and radiosonde measurements of atmospheric range refractive index

14 p2585 A70-30573

Balloon-radar soundings of horizontal wind profiles for booster vehicle design

14 p2653 A70-30588

Balloon-borne midinfrared observations of lunar surface composition from interpreting peak emissivity differences

14 p2645 A70-31058

Daytime auroral zone electron precipitation energy spectrum from atmospheric bremsstrahlung X ray balloon data

14 p2580 A70-31257

Auroral zone X rays balloon-borne conjugate recordings from Iceland and Antarctica

14 p2632 A70-31306

Galactic cosmic rays high altitude measurements by balloon-borne Sparmo type multidirectional detectors, revealing azimuthal anisotropy

14 p2632 A70-31309

X ray and proton flux measurement during solar flare of 29 September 1968 by balloon-borne detectors

14 p2633 A70-31310

Balloon systems characterized by day to night altitude variations for permanent atmospheric sounding

14 p2531 A70-31312

Cyg XR-1 X ray spectrum variability by balloon-borne detectors as eclipsing properties of binary system

15 p2799 A70-31750

Atmospheric temperature vertical distribution measurement using sounding balloon and Skylark rocket

15 p2725 A70-31846

Stabilized platform stellar detector for French probe balloons, using semicircular light modulator

15 p2738 A70-32249

Constant altitude helium filled zero pressure polyethylene balloon for stratospheric meteorological data and atmospheric tides studies

17 p3075 A70-34607

Zero pressure balloon as base for stratopause pressure and temperature measurements, analyzing winds and balloon trajectory and dynamics

17 p3075 A70-34608

Carbon isotopes abundance in primary cosmic radiation by nuclear emulsion stack exposure in high altitude balloon flight

17 p3151 A70-34914

Balloon-borne X ray telescope star sensor with one arc minute accuracy, discussing design and Cyg X-1 location measurement

17 p3090 A70-35312

IR balloon observations of absolute solar brightness and stratosphere transparency, discussing BCA and HSRA models

17 p3078 A70-35580

Buoyant Venus station balloon for deployment and inflation during parachute descent into Venus atmosphere tested with scale model balloons in wind tunnels

17 p3063 A70-35658

Gamma ray pulse height spectra during active and quiet solar periods from midlatitude balloon flights

17 p3152 A70-35774

Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes

18 p3309 A70-36919

Zodiacal light observations at elongation angles from sun, examining surface brightness, color index and polarization degree by balloon-borne instruments

18 p3318 A70-37012

Atmospheric scattering indicatrices from daytime sky brightness balloon measurements in presence of cloud cover

19 p3460 A70-37420

Primary cosmic ray electron flux, energy spectrum and east-west asymmetry, using balloon-borne spark chamber detector

19 p3503 A70-38104

Sco X-1 X ray source properties in 16-111 keV energy interval, using balloon-borne detectors

19 p3505 A70-38116

Primary cosmic ray proton and alpha particle spectra measurements by balloon-borne equipment

19 p3505 A70-38118

Primary cosmic rays above 4.5 GV, measuring charge composition from balloon flight

19 p3507 A70-38133

Primary cosmic ray particles with Z greater than 40 identified by tracks in balloon-borne nuclear emulsions and plastic detectors

19 p3508 A70-38138

Atmospheric gamma rays vertical intensity dependence on spectrum and altitude from high altitude balloon studies

20 p3697 A70-39286

Earth atmosphere cosmic ray neutron albedo from balloon measurement of flux vertical distribution

20 p3698 A70-39298

Solar constant measurements by high altitude balloon sounding, noting anomalous turbidity in upper atmospheric layers due to nuclear explosions and volcanic eruptions

20 p3703 A70-39375

Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability

20 p3715 A70-39677

PCM command control system for high altitude ballooning operations, discussing component equipment

20 p3587 A70-40085

Balloon-borne measurements of hard X radiation from direction of Virgo

21 p3872 A70-40663

Cyg-X-1 X ray source angular size and position measurements by balloon-borne collimator

21 p3873 A70-40665

Diffuse background cosmic X rays in energy range 20-120 kev from balloon observations

21 p3876 A70-40689

Gamma ray astronomical point sources by balloon flight and satellite observation, discussing detector system and telescope for flux and energy spectrum

21 p3821 A70-40694

High energy gamma rays detection by balloon flights, investigating flux and energy spectrum

21 p3876 A70-40696

Auroral X-ray radiation at magnetoconjugate points Kerguelen/archangel region, using balloon-borne spectrometers

21 p3813 A70-40839

Strong newborn X ray source detection during balloon flight, showing softened low energy spectrum

21 p3892 A70-41190

Orientation system for pointing balloon-borne X ray detector using flux gate magnetometer, DC amplifier and motor control relay circuit

21 p3831 A70-42249

Aeolus A satellite for position fixing and automatic meteorological signal transmission in link with balloons for tropospheric observation

22 p4068 A70-42665

Ionospheric current theoretical model and balloon measurement of ionospheric electric field

22 p4017 A70-42795

Air-earth current density time variation in stratosphere by high altitude balloon, comparing with potential gradient diurnal variation over ocean

22 p4017 A70-42798

Stratospheric electric field and conductivity measurements using balloon-borne electrometer tube circuit

22 p4018 A70-42799

Atmospheric electrical conductivity examination by balloon-borne instruments, discussing temperature and ion mobility height distribution profiles

22 p4018 A70-42800

Pointing systems for balloon-borne telescopes in astronomical investigations

22 p4041 A70-43649

Meteorological NEXAIR /Next Generation Upper Air System/ for atmospheric data from balloon-borne instrument packages

24 p4372 A70-46049

BALLOONS

NT HIGH ALTITUDE BALLOONS

NT METEOROLOGICAL BALLOONS

NT ROBIN BALLOONS

NT TETHERED BALLOONS

Balloon satellite orbital time and eccentricity correlated, investigating earth shadow and solar radiation effects

06 p1142 A70-17892

Fiberglass plastic reinforced high pressure balloons design and fabrication with oblated ellipsoid of revolution, discussing deformability, strength and cyclic loadings resistance

12 p2328 A70-28285

Balloon satellites brightness change from rotation effects, analyzing light curves

16 p2980 A70-34317

Small swing angle detector for balloon payloads, using rate gyro principle

17 p3090 A70-35314

Reaction jet azimuth control system for balloon-borne gondola

17 p3018 A70-35316

Plastic balloon platforms for atmospheric research and engineering applications, discussing design and use of unreinforced polyethylene and reinforced Mylar types

22 p3962 A70-43650

Balloon satellite perturbations in orbital period involving air drag, lunar gravity and solar and terrestrial radiation pressures

24 p4414 A70-45358

Balloon satellites orbital accelerations, considering effects due to air drag, solar radiation pressure and spin

24 p4409 A70-45557

BALLUTES

Pilot Airborne Recovery Device /PARD/ using hot air ballute, noting capability to ascend or descend by flow control valve controlling butane burner

07 p1192 A70-19019

Attached inflated BALLUTE /balloon-parachute/ for stabilization and retardation of aircraft stores, high altitude descent devices and planetary entry vehicles [AIAA PAPER 70-1200]

21 p3752 A70-41816

Drag prediction for Ballute and parachute trailing decelerators at supersonic speed and zero angle of attack, using flow field computations
[AIAA PAPER 70-1177] 21 p3746 A70-41836

BALMER SERIES
Chromospheric slitless spectrograms at 1962 eclipse, discussing Balmer-Paschen line intensities, continuum data, reduction and source error
01 p0175 A70-10244
LTE departures in late B stars from measurements of Balmer and Paschen discontinuities
05 p0919 A70-16937
Solar radiation flux observation-prediction discrepancies due to Fraunhofer line absorption, studying Balmer continuum as atmospheric model criterion
06 p1148 A70-18451
Measured and theoretical stark-broadened line profiles and asymptotic wing approximation of hydrogen Balmer lines at specific electron density and temperature
09 p1732 A70-22782
Chromospheric flares electron concentration and structure from half widths and Balmer lines numbers
13 p2493 A70-29394
Atomic emission in water vapor afterglow, revealing presence of Balmer series of H atom with sodium D line
14 p2579 A70-31255
Luminosity effects in Balmer lines of early type stars, noting H alpha equivalent width decrease
17 p3170 A70-35388
Of stars mean spectrophotometric gradients and Balmer jump data with corrections for interstellar absorption
24 p4409 A70-45632

BANACH SPACE
Generalized transform theory for causal operators developed, using Gelfand theory for commutative Banach algebras
03 p0520 A70-14167
Nonlinear equation solution based on local mapping relations and global implicit function theorems for Banach space problems
06 p1092 A70-17224
Multipoint methods for two point boundary value problems with Banach space self mapped, proving convergence theorems for iterative solutions
09 p1712 A70-23420
Banach space stability in presence of constantly acting perturbations bounded in mean, investigating differential operator equation
13 p2452 A70-29309
Chebyshev method for Banach spaces, discussing location theorem for reducing error bounds
18 p3282 A70-36359
Stability theory for approximate solutions and differential approximations for differential equations in Banach space
23 p4212 A70-44345
Second dual space of E sub 0 /Banach space of analytic functions/ identifiable with subspace of L space infinity
24 p4370 A70-46175

BAND STRUCTURE OF SOLIDS
Indium arsenide crystals conduction band structure with various electron concentrations, determining electron mass dependence on concentration and temperature
01 p0154 A70-10096
Edge luminescence effect in doped p-GaAs single crystals with various hole concentrations, determining band structure at liquid nitrogen and room temperature
01 p0154 A70-10097
Nonstoichiometric GeTe defects nature from band structure analysis based on two carrier model
02 p0350 A70-11698
Energy distributions of emitted electrons from Si, GaP and ZnS semiconductors, determining relative core levels and Si valence band states optical density
03 p0537 A70-12879
Pinch characteristics of simple band structure semiconductors and nondegenerate electron gas during bimolecular current carrier recombination, determining hole pairs spatial and recombination spectral distribution
03 p0538 A70-13062
Electromagnetic wave propagation in semiconductors, considering effects of electric field, energy dissipation law and band structure
03 p0540 A70-13719
Interband transitions and optical absorption edge analysis in indium telluride using dependence on photon energy
03 p0541 A70-13725
Nb metal-like compounds energy band structures using X ray fluorescence technique
04 p0707 A70-15213
Probability of three photon band-band excitation of electron in semiconductors using S-matrix formalism, calculating absorption coefficient for two band approximation
07 p1356 A70-19795

Noble metals band structure effects on shielding cloud around impurity and alloys electronic properties in weak scattering limit
09 p1740 A70-22953
Frequency dependent negative resistance of n-type semiconductor doped at acceptor level near valence band top
10 p1927 A70-24273
Negative resistance and cut-off voltage of doped Si p-n diodes subject to deep acceptor levels
10 p1849 A70-24274
Helicon wave dispersion in cold multicomponent plasma of n-type Si and Ge semiconductors in linear hydrodynamic approximation
10 p1928 A70-24832
Rare earth energy band structure effect on RKKY magnetic interaction between atomic spins
13 p2472 A70-29799
Bi-Sb alloys, discussing structural data, crystal preparation, band structure, pressure, nonohmic conductivity, thermoelectric, thermomagnetic and magnetothermal effects
14 p2625 A70-30332
Ferro-magnetic Ni band structure and Fermi surface including spin-orbit and exchange interactions obtained by Mueller interpolation scheme
14 p2626 A70-30479
Energy bands shape effect on fluctuations in nonequilibrium low resistance semiconductor plasma
15 p2784 A70-32192
Band structure of Brillouin zone and electronic states on pure and contaminated crystal surface
15 p2786 A70-32767
Electron momentum distribution function of p-type semiconductor with arbitrary band structure under electric and magnetic fields
17 p3144 A70-35704
Magneto-optics of semiconductors, taking into account intraband and interband effects with Faraday and Voigt field configurations
18 p3297 A70-35951
Band model of switching states between conducting and high resistance states of amorphous semiconductors
18 p3297 A70-35952
Numerical computation of wave functions and energies in complex band structures for two-band case, using k-p method
19 p3483 A70-37547
Phonons and band structure role in metal-insulator phase transition, developing model of electron interactions with lattice vibrations
20 p3686 A70-39149
Current fluctuations in polar semiconductors in strong electric field, taking into account semiconductor band structure
20 p3686 A70-39589
Electron states localization in disordered binary alloys, describing band structure
20 p3687 A70-40498
Band structure contributions to elastic shear constants of hexagonal close packed metals, using optimized model potential
21 p3839 A70-40600
Apollo 11 lunar rock pyroxenes, examining band structure and magnetic ordering by high voltage electron microscopy and electron diffraction
21 p3898 A70-41523
Amorphous semiconductors optical absorption, thermoelectric effects and switching mechanisms characterized by energy band structure model
22 p4086 A70-42773
X ray K and L emission bands and absorption spectra from TiO, TiN and TiC compared with density of states histograms, considering electronic band structure
22 p4086 A70-43003
Highly alloyed indium arsenide reflection spectra and band structural characteristics
24 p4389 A70-45482

BANDPASS FILTERS
Tunable adjustable solid state bandwidth filter using N path system for low pass to bandpass filter transformation
02 p0270 A70-12666
Frequency responses bounds of nonnormalized low pass and bandpass filters
05 p0820 A70-16360
Frequency monitor design, analyzing relationships between time constants, gain, etc, emphasizing white noise filtration
07 p1227 A70-18991
Narrow band limiter influence on SNR at FM reception output by computer simulation using threshold pulse model
07 p1227 A70-19124
Half wave stepped digital elliptic filter design showing improvements over microwave TEM line narrow band bandpass filter
08 p1476 A70-21284
Electromagnetic wave deceleration in open cylindrical waveguide, noting guide action as bandpass filter
09 p1633 A70-22415

Transistorized pulse repetition frequency bandpass and band elimination filters, using trigger circuit to improve pulse-edge steepness and critical frequency stability
09 p1650 A70-23630
Solid state resonant bandpass electronic filter composed of ferroelectric dielectric capacitors with adaptable voltage gain
09 p1653 A70-23801
Time-bounded pulses with energy maximum in frequency band, solving integral equations for bandpass filters for maximum efficiency and optimum pulse shapes
11 p2004 A70-25799
Threshold extension demodulator /TED/ using bandpass filter without oscillator for FM multiplex
12 p2197 A70-27908
Iris coupled YIG tuned filters for 12-4 GHz region, including high field magnets from vanadium permanent
12 p2202 A70-28165
Active RC bandpass filter with independent linear control of Q peak gain and frequency
13 p2376 A70-28801
Circular shielded three layer dielectric waveguide critical parameters, estimating passbands for phase circulators with ferrite inserts
13 p2364 A70-28873
Evaporated multilayer optical bandpass filters in solar radiation technology, discussing design and construction
13 p2411 A70-29665
Comparative passband of optimal and fixed frequency systems in ionospheric scatter communications during nighttime
14 p2547 A70-30239
Microwave band-stop filters based on ladder network low pass prototypes, comparing performance with bandpass type
14 p2557 A70-31179
FM limiter-discriminator followed with ideal bandpass filter, deriving output signal to noise ratio
14 p2558 A70-31189
Hard limiting bandpass limiter output signal to noise ratio in PM signal detection calculated using probability density function
14 p2552 A70-31194
Quasi-optical filters with bandpass and pseudohigh pass structures for millimeter wave and far IR frequencies
14 p2558 A70-31318
Active RC bandpass filter for space fluxgate magnetometer, using state variable synthesis
17 p3054 A70-35526
Fabry-Perot interferometer series as tunable optical narrow passband filter with high spectral and angular resolution, discussing performance in solar magnetograph
17 p3097 A70-35872
Thin films optical constants and thickness measurements and UV bandpass interference filters design
19 p3488 A70-38204
Active bandpass filter configurations with operational amplifiers, noting resonance frequency and Q factor variation relationship to amplifier gain-bandwidth product
21 p3796 A70-40561
Amplitude instability in vibration testing systems, noting effects of bandpass filters in feedback loop of amplitude servo
22 p4006 A70-43250
Lissajous figures for phase response of N-path signal filter transfer functions, using switched modulators
22 p3998 A70-43256
LF passband ideal filter instantaneous pulse response, using delta function model
22 p4005 A70-43555
Directional periodic linear Yagi-Uda arrays application for open low pass or bandpass filters and open resonators
23 p4166 A70-44971
Comparative passband of optimal and fixed frequency systems in ionospheric scatter communications during nighttime
24 p4316 A70-46314

BANDWIDTH
NT BROADBAND
NT SPECTRAL LINE WIDTH
Phased array antennas bandwidth and range resolution, discussing delay elements and antenna size affecting radiation patterns
01 p0042 A70-10262
IF optimum bandwidth for maximizing output SNR in FM receiver with barrier to noise ratio below discriminator threshold
01 p0051 A70-11119
Rise time relationship with signal bandwidth for class of TEM mode microwave delay line filters
02 p0257 A70-12185
Light pulse demodulator using zero crossing technique to eliminate photomultiplier bandwidth and sensitivity limitations
02 p0271 A70-12744

Bandwidth reduction for interlacing two voice and three additional teletype subchannels in standard phone frequency range for use in VHF/UHF satellite link

03 p0450 A70-13623

Pico-nanosecond light pulses from mode-locked Nd glass laser with spectral mode selector, noting correspondence between pulse duration and inverse bandwidth

03 p0503 A70-14210

Band shaped polar aurora widths from photographs analysis, noting wider bands for midnight hours and winter solstice

04 p0682 A70-15732

Frequency bandwidth reduction for geophysical data transmission from satellites or lunar stations by time correlation of signal and transmission channel band changes

05 p0847 A70-15968

Half octave bandwidth traveling wave X band optical phase modulator, noting multiple interactions of optical and microwave fields in electro-optical crystal

06 p1079 A70-17192

Forbidden bandwidth in Brillouin zone and valence band spin-orbital splitting degree determined for mixed gallium-phosphide-arsenide

06 p1126 A70-17815

Holographic system to obtain time-bandwidth product improvement in spectral analysis without sacrificing multichannel processing capability

07 p1288 A70-20098

Circuit development for realizing narrow bandwidth elliptic function filters at microwave frequencies

08 p1476 A70-21285

Receiver bandwidth effect on audible radio noise bursts parameters of quasi-peak value, burst duration and time interval

08 p1464 A70-21800

Hologram spatial bandwidth reduction by space-time multiplexing

09 p1673 A70-22074

FM noise threshold reduction achieved through narrow bandwidth of self synchronized N-path filter tracking incoming FM carrier

10 p1833 A70-24233

Nomograms simplifying noise and natural loop bandwidths calculation for phase locked loop receiver, determining limiter suppression factor

10 p1844 A70-25244

Fourier and Hadamard transformation codings for multidimensional data channel noise immunity and bandwidth reduction

11 p2011 A70-26329

Narrow band FM noise suggested for masking studies application, discussing noise properties

11 p2011 A70-26496

Sea roughness effect on bandwidth of radar backscatter, analyzing Doppler signals of eight millimeter aircraft navigation system

12 p2228 A70-26906

Radio receiver bandwidth effect on lunar occultation observations

12 p2189 A70-27989

Digital transition tracking symbol synchronizer improving SNR without lowering loop bandwidth

13 p2367 A70-29591

Ionospherically reflected HF radio signal frequency spread measurement involving phase difference crossings counting between antennas

14 p2550 A70-30743

Band shaped polar aurora widths from photographs analysis, noting wider bands for midnight hours and winter solstice

14 p2575 A70-30815

Broadband and narrowband pulse signal noise electromagnetic interference prediction techniques for filter or shielding parameters evaluation

16 p2862 A70-33065

Allowable transmission bandwidth of lens waveguide with curved axis, considering light beam deflection due to chromatic aberration

17 p3050 A70-34583

Bandlimiting in coherent optical matched filtering for pattern recognition, eliminating confusion between cross correlations and autocorrelations

19 p3446 A70-37889

Range channel width effect on radar signal digital detector function and parameters optimal value

19 p3380 A70-38068

Occupied bandwidth definition and measurement based on probability density function computation for radio transmitter spurious, harmonic and fundamental emissions

19 p3380 A70-38176

Holographic bandwidth reduction by periodic dispersion structures, noting large viewfield and compact data recording

20 p3627 A70-39096

He/Ne laser amplifier and oscillator threshold bandwidth measurement by double laser device

20 p3643 A70-40126

PCM/NRZ signal band-limiting effect on bit error probability, using sample detector

22 p3990 A70-43339

Omicron Ceti /Mira/ spectrophotometry before, during and after 1969 maximum, noting TiO bandwidth variations

23 p4242 A70-44294

Natural dispersion effect on bandwidth of glass fiber transmission line using optical glasses

24 p4319 A70-46079

BANG-BANG CONTROL U OFF-ON CONTROL

BANKING FLIGHT

U TURNING FLIGHT

BARDEEN APPROXIMATION

U BARRIER LAYERS

U ELECTRICAL PROPERTIES

U SURFACE PROPERTIES

BARIUM

Test program preceding first German satellite experiment using HEOS satellite for Ba ion cloud injection into deep space

02 p0380 A70-12081

Barium ion artificial clouds motions and striations due to cloud-ionosphere coupling, studying electron density variations below cloud in E layer

07 p1271 A70-20155

Barium ionic cloud formation under action of sunlight and expansion in terrestrial magnetic field using plasma model

12 p2214 A70-26892

Signal decoder for barium USA Germany /BUG/ project command reception system, discussing Ba ion cloud propagation and expansion along geomagnetic field

13 p2367 A70-29557

Ba ion cloud motions agreeing with electric field data from balloon measurement in ionosphere and magnetosphere

13 p2402 A70-30079

Ba II emission lines in solar chromosphere, examining excitation and ionization equilibrium and resonance line intensities by eclipse observations

18 p3317 A70-37010

Submarine basalt sea water alteration effects, examining Sr and rare earth concentrations, Ba enrichments or depletions and trace element data

19 p3413 A70-38015

BARIUM ALLOYS

Electronegative adsorbate effect on work function of Ba-W system

18 p3298 A70-37111

BARIUM COMPOUNDS

NT BARIUM FLUORIDES

NT BARIUM OXIDES

NT BARIUM TITANATES

BARIUM FLUORIDES

Barium fluoride film hygrometer elements for radiosondes, discussing manufacturing and testing methods

13 p2408 A70-29470

Barium fluorides single crystals compression, investigating stress-strain behavior and dislocation mobility

19 p3483 A70-37339

BARIUM OXIDES

Phase transitions in FeW doped strontium and barium oxides, using X ray diffraction and Mossbauer effect for transition temperature

24 p4390 A70-45605

BARIUM TITANATES

Metal/ferroelectric work functions in c-domain barium titanate crystals in short circuited capacitor, noting effect of electrodes presence

01 p0156 A70-10186

Static deformation of radially polarized inhomogeneous rotating cylindrical shaft of barium titanate using elasticity, elec

n, for piezoelectric materials

01 p0118 A70-10549

Pyroelectric coefficient extrema measurement at constant stress in barium titanate ceramic at various temperature ranges for various transition points

03 p0513 A70-14205

Barium titanate ceramics with nonlinear electrical conduction, noting I-V relationship dependence on temperature, impurities and electrodes

05 p0891 A70-15990

Electrical properties of unipolar barium titanate single crystals involving hysteresis loops plotting

05 p0894 A70-17024

Excess titanium dioxide effect on electric resistance of semiconductive barium titanate ceramics suitable for posistors

07 p1355 A70-18654

Thin n-type Ge film electrical conductivity effect on ferromagnetic barium titanate single crystals as function of magnitude and sign of polarizing field

11 p2097 A70-25383

Elastic, piezoelectric and dielectric properties of barium titanate single crystals of laminar domain structure

12 p2288 A70-28329

Temperature dependence of electrical properties and permittivity of barium titanate solid solutions containing Nb, Ta, Sb and La, using bridge-circuit of resonance techniques

13 p2469 A70-28853

Dielectric properties of thin barium titanate films from microwave resonance frequencies and resonance reflection coefficient

19 p3482 A70-37255

Valent state of chromium doped barium titanate from EPR spectra and magnetic susceptibility measurements

22 p4086 A70-43133

BARKHAUSEN EFFECT

Permalloy tapes uncertainty in magnetization process, discussing Barkhausen discontinuities measurement method

20 p3673 A70-40058

BAROCLINIC WAVES

Nongeostrophic baroclinic stability theory predictions test experiment with vertical heating provision, describing fluid motions

02 p0289 A70-11830

Geostrophic baroclinic flow with zonal magnetic field in beta plane channel, analyzing instability, phase velocities, Alfvén-Rossby waves and Eady problem

02 p0291 A70-12284

Stratified air flow above relief in baroclinic atmosphere, considering plane nonlinear and three dimensional linearized flow models

03 p0521 A70-13270

Aerohydrodynamic model of relief waves in baroclinic atmosphere based on convection theory, analyzing strong turbulent vortex regime responsible for CAT

[ONERA-TP-727] 03 p0408 A70-13638

Bottom topography effect on jets stability in baroclinic fluid, discussing two layer model

04 p0715 A70-15518

Quasi-geostrophic baroclinic instability in non-separable parallel flow, using perturbation theory

08 p1539 A70-21604

Motion equation derivation for incompressible fluid flow in baroclinic ocean, allowing for horizontal macro-turbulent exchange

14 p2601 A70-30136

Barotropy, baroclinity and baroclinity induced variations of geostrophic wind vector with altitude within planetary boundary layer

14 p2604 A70-30546

Atmospheric circulation two level quasi-geostrophic model, examining dynamic large scale features of baroclinic wave blocking by high latitude cold anticyclonic cells

20 p3621 A70-39372

BAROMETRIC PRESSURE

U ATMOSPHERIC PRESSURE

BARORECEPTORS

Pulsed noise biological effects on human organism, showing stimulation of auditory duct and baric and mechanical reception system causing neural functional shift

03 p0433 A70-13476

Hypothalamic stimulation effects on cardiac and vascular efferent components of baroreceptor reflexes in spinal cats

07 p1202 A70-18866

BAROTRAUMA

Biophysical symptoms and clinical treatment of ailments resulting from pressure drop, considering exposure to higher and lower pressure changes

01 p0011 A70-10036

Otic Barotrauma with bilateral perforation of ear drums suffered during rapid decompression run in chamber, discussing diagnosis

10 p1811 A70-20440

Hypobaric hypoxia effects on MM virus infection resistance in mice

20 p3572 A70-39428

Rapid decompression due to pressure loss in space vehicle or suit, discussing fulminating hypoxia, mechanical trauma and ebullism

22 p3973 A70-43639

Alpine 11,500 ft air atmosphere for manned orbiting laboratory, noting reduced risk of dysbarism during space suit operations

22 p3980 A70-43645

Decompression disorders after exposures to safe pressure or altitude in cats, noting potential embolia from nongradual high-to-normal pressure passage

23 p4157 A70-45080

BAROTROPIC FLOW

Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows

01 p0068 A70-11582

Jupiter upper atmosphere cloud bands zonal motion velocities, examining barotropic stability criterion and geostrophic balance hypothesis

02 p0368 A70-11828

Numerical procedure for determining horizontal wind from geopotential height in barotropic model, discussing solutions for resultant simultaneous equations

08 p1540 A70-21968

Barotropy, baroclinity and baroclinity induced variations of geostrophic wind vector with altitude within planetary boundary layer

14 p2604 A70-30546

Rosby wave critical level time dependent behavior on latitudinally varying flow 19 p3414 A70-38259

BARRELS
Eigenfrequencies of thin barrel shaped shells on simple supports, noting correspondence of ratio of radius to shell wall thickness 08 p1592 A70-21474

BARRICADES
U BARRIERS
BARRIER LAYERS
Al n-type Si Schottky barrier diode characteristics, discussing I-V, barrier height, temperature dependence, photoemission, LF noise, etc 09 p1644 A70-22210
Volt-ampere characteristics of metal-semiconductor contacts for Schottky barrier diodes, investigating suppression of minority carriers and frequency response 09 p1741 A70-23352
Silicon high resistivity surface barrier detectors fabrication for nondestructive tests, discussing long term sensitivity and calibration 10 p1893 A70-24169
High purity pinhole free films (pyrylene) applicability as barrier coating to keep semiconductor surface free from moisture, ions and contaminants 11 p2099 A70-26395
GaAs-Au surface barrier n-type photodiode structure, electrical parameters and response characteristics 12 p2194 A70-26969
Resonance energies of elastic scattering from one dimensional model potential containing barrier, using stabilization method 13 p2455 A70-29222

BARRIERS
Eigenvalue corresponding to decaying modes for wave equation in exterior of obstacle investigated for dependence on obstacle geometry 06 p1095 A70-18474
Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers [AIAA PAPER 69-529] 11 p2123 A70-26119
Wave properties of nuclear optical model for barrier penetration by charged particles, considering square well reflection, absorption and resonance 14 p2619 A70-30491
Radio wave propagation obstacle gain changes with varying distance between obstacle and path terminal 14 p2549 A70-30514
Optimal longitudinal takeoff trajectories, formulating obstacle clearance criterion function based on aircraft design parameters effects [AIAA PAPER 70-963] 20 p3560 A70-39566

BARS
NT ELASTIC BARS
NT PRISMATIC BARS
Computer calculation in elastoplastic range of statically indeterminate structure of bars, considering collapse load, stress and hinge rotation 01 p0200 A70-10524
Normal and tangential displacements distribution at surface and along cross section of bar with free boundaries computed for symmetric and antisymmetric oscillations 02 p0301 A70-12484
Thin walled uniform open bar stability under arbitrary boundary conditions, using Vlasov assumptions and matrix methods 04 p0774 A70-15099
Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain-time histories and residual strain 04 p0779 A70-15599
Neodymium-doped glass bars laser amplification efficiency increased by using conical bar and divergent beam 07 p1302 A70-20096
Unsteady creep of thin walled open section bars under free torsion using successive approximations 09 p1779 A70-23101
Bar produced by sliding thin walled cross section along three dimensional curve, determining twisted shell curvilinear middle plane and deformations by differential geometry 12 p2326 A70-27796
Longitudinal waves propagation in polyethylene bar using Boltzmann-Volterra equation, constructing dynamical stress-strain diagrams by viscous-elastic standard body model 12 p2328 A70-28276
Longitudinal stress waves propagation in polymeric optically active plastic bars using photoelasticity method 12 p2328 A70-28277
Fixed end nonprismatic bar stability in fluid flow, studying form influence on critical flow velocity 13 p2512 A70-28982
Stress and deflection of nonisotropic assembled bar and plate composite structures, using computerized matrix displacement method 14 p2660 A70-31133

Stress-strain vector for straight bar of constant or stepwise cross section, using initial parameter matrix method 15 p2822 A70-32363
Monograph on optimal angles and section partition for buckling strength of twisted and displaced bent bars 16 p2988 A70-33300
Longitudinal wave propagation in variable section bars, solving hyperbolic equation of motion by perturbation method 16 p2993 A70-34088
Titanium alloys quench hardenabilities, determining variations with distance from end of Jominy bars after annealing 17 p3119 A70-34415
Stability conditions in straight bar, taking into account stress direction changes caused by deformation 18 p3337 A70-36372
Maximum secondary principal stress axis and isotropic points determination in scattered light photoelastic analysis, considering bar in uniaxial tension and rectangular beam 19 p3546 A70-38345
Natural flexural vibration frequencies of bars with periodic thickness variations, comparing Hamilton principle, matrix approach and experimental investigations 20 p3735 A70-40536
Elastomechanical system reciprocity relation principles using differential equations for bar with forces in two places 20 p3735 A70-40537
Thermoviscoelasticity stochastic problems for bar with temperature independent viscosity, discussing Fokker-Planck equation for two temperature processes 21 p3937 A70-41435
Acoustic frequency spectra of transverse vibrations in bracketed bar caused by dry friction, using Lagrange method 22 p4073 A70-42612
Elastic-viscoplastic bar quasi-static torsion problem, using approximate method for time dependent torsion function 24 p4425 A70-45993

BARYCENTER
U CENTER OF GRAVITY
BARYON RESONANCES
Proton-deuteron elastic large angle scattering cross sections, noting backward peak consistent with baryon exchange mechanism with resonance transfer 07 p1345 A70-20198

BARYONS
Baryon configurations in relativistic generalized theory of gravitation, discussing field equation transformations, mass distribution, central pressure, etc 09 p1753 A70-22454
Stable hyperon star existence in general relativity, discussing state equations for baryon matter, radial pulsation and superlumina and ultrabarc conditions 21 p3888 A70-41116

BASALT
Lherzolite, anorthosite, Gabbro and basalt dredged from Mid-Indian Ocean Ridge noting geological and geophysical features 04 p0675 A70-14422
Kamchatka regions volcanic deposits structural and mechanical characteristics compared with lunar soil characteristics 04 p0744 A70-14440
Shock and thermal metamorphism of olivine trachybasalt by nuclear explosion at Nevada test site 05 p0843 A70-16946
Earth magnetic field transition recorded in basaltic lavas in southeastern Oregon 07 p1276 A70-20351
Luminescence of powdered silica and basalt bombarded by atomic hydrogen, relating spectral distributions dependence on ion energy to lunar luminescence 10 p1942 A70-24647
Kamchatka regions volcanic deposits structural and mechanical characteristics compared with lunar soil characteristics 13 p2485 A70-28465
Thermal conductivity of particulate basalt as function of density in simulated lunar and Martian environments, noting temperature and pressure effects 18 p3316 A70-36772
Lunar basalt lava bed formations, examining vacuum and gravity effects during cooling 19 p3517 A70-37988
Submarine basalt sea water alteration effects, examining Sr and rare earth concentrations, Ba enrichments or depletions and trace element data 19 p3413 A70-38015
Apollo 11 samples compared to stony meteorites and terrestrial basalt, discussing lunar rock formation processes 21 p3900 A70-41540
Apollo 11 lunar basalt petrogenesis, examining internal constitution and origin by high pressure 21 p3901 A70-41547

Apollo 11 lunar igneous rock mineralogy and petrology, emphasizing ferrobasalt minerals microanalysis electron probe 21 p3903 A70-41557
Apollo 11 lunar rock trace elements, examining basalt, gabbroic igneous rocks, breccias and fines by DC arc emission spectroscopy 21 p3774 A70-41561
Apollo 11 lunar basalt chemical composition and petrogenesis, using stable isotope dilution method 21 p3907 A70-41573
Carbon and nitrogen abundances in Apollo 11 rocks, basaltic achondrites and terrestrial basalts, using meteorite analytical techniques 21 p3776 A70-41592
Apollo 11 lunar rocks oxygen isotope ratios, examining relationship to terrestrial basalts 21 p3776 A70-41596
Apollo 11 lunar, terrestrial and meteoritic basalts relationships, examining Ga, Ge, In, Ir and Au concentrations by neutron activation analyses 21 p3778 A70-41617
Apollo 11 ilmenite basalts petrology from regolith samples 23 p4239 A70-43898
Hawaiian basalt melted in simulated lunar environment, investigating surface characteristics, internal structure and bearing strength 23 p4254 A70-44883
Basalt heating with IR carbon dioxide laser, investigating vapor fractionation for inert atmospheres, very high temperatures and silicon dioxide poor materials 24 p4409 A70-45673

BASE FLOW
Thermal and pressure environments analysis in Saturn S-1C stage base during flight tests, noting base gas flowfield and heating 01 p0195 A70-10833
Roll control method using recirculating base flow reaction against oriented blades or fins attached to reentry vehicle base to produce rolling moments 01 p0003 A70-10847
Base mass injection effects of various gases on slender body supersonic near wake stability, diffusion and cooling [AIAA PAPER 70-110] 06 p0970 A70-18075
Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement [AIAA PAPER 69-570] 13 p2338 A70-28511
Axisymmetric blunt base cylindrical body with turbulent initial boundary layer, investigating flow structure in annular nozzle wind tunnel 17 p3006 A70-34464
Dihedral placed at angle of attack in hypersonic rarefied gas flow, investigating base flow and near wakes 17 p3010 A70-35047
Base flow component of total drag for axisymmetric supersonic afterbody with single exhaust jet, considering turbulent mixing 17 p3011 A70-35656
Transport model for flow field and convective heat transport in planar turbulent supersonic base flow 21 p3744 A70-41030
Subsonic channel incompressible gas flow past semiminfinite flat plate base, using flow pattern for cavitation flow 21 p3748 A70-42213
Reacting gas supersonic flow over two dimensional base, examining reaction rate effects on base pressure 23 p4135 A70-44626

BASE HEATING
Shock tunnel preflight assessment of Apollo Block 2 command module base heating 07 p1394 A70-19722
Convective heat transfer at solid boundaries in separated and reattached subsonic and supersonic flows, considering booster base heating 17 p3007 A70-34484
Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests 20 p3606 A70-39698

BASE PRESSURE
Shock tunnel type differential sensor for low range base pressure measurements on full scale flight reentry vehicles, discussing ground tests 01 p0089 A70-10843
Combustion effects on base pressure of two dimensional body in supersonic flight, considering air-fuel ratio, combustion length and free stream Mach number 02 p0354 A70-12046
Real gas properties effect on base pressure of blunt nosed vehicle flying through atmosphere at high velocities 04 p0764 A70-15556
Full scale R/V flight test base pressure data for slender cones with ablative heat shields, considering mass flow and addition effects [AIAA PAPER 70-109] 06 p0973 A70-18148
Base pressure effects on cone angle of fixed length conical nozzle yielding maximum thrust 11 p1977 A70-26156

- Turbulent boundary layer and base pressure profiles of supersonic flow past conical models in wind tunnel
12 p2159 A70-28229
- Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement
[AIAA PAPER 69-570] 13 p2338 A70-28511
- Turbulent base pressure on conical afterbodies in supersonic axisymmetric flow, including initial direction effect
[AIAA PAPER 70-555] 13 p2340 A70-29020
- Sting diameter and cylindrical protuberance length effects on axisymmetric body base pressure in turbulent supersonic flow
[AIAA PAPER 70-585] 13 p2342 A70-29885
- Blunt planetary entry body free fall drop tests determining low speed stability and base pressure characteristics
[AIAA PAPER 70-577] 13 p2342 A70-29892
- Full scale R/V flight test base pressure data for slender cones with ablative heat shields, considering mass flow and addition effects
[AIAA PAPER 70-109] 21 p3745 A70-41753
- Base pressure behind supersonic vehicle, examining Crocco-Lees mixing theory critical point in laminar near wake
21 p3747 A70-42109
- Cylindrical afterbodies base pressure drag under powered supersonic flight, modifying Korst flow model recompression criterion
22 p3959 A70-42713
- Reacting gas supersonic flow over two dimensional base, examining reaction rate effects on base pressure
23 p4135 A70-44626
- BASES [CHEMICAL]**
Optically active amino acids synthesis by reduction of Schiff bases with sodium borohydride
17 p3041 A70-34748
- BASES [FOUNDATIONS]**
U FOUNDATIONS
- BATHS**
NT SALT BATHS
- BATHY THERMOGRAPHS**
Sea surface temperature relationship with ocean currents, using bathythermograph data
22 p4014 A70-42768
- BATTERIES**
U ELECTRIC BATTERIES
- BATTERY CHARGERS**
Nickel-cadmium batteries rapid deterioration due to destructive demand pulse charging methods
08 p1439 A70-20706
- Third electrode use in charging secondary zinc air battery, presenting performance data and operation problems
14 p2533 A70-30527
- Automatic and command multiple sequencer for spacecraft solar cell battery charger, providing switching logic by integrated circuits design
21 p3758 A70-41218
- Solar cell array peak power tracker and battery charger for Airlark Vehicle coupling Apollo spacecraft and Saturn IVB stage to form manned orbiting workshop
21 p3759 A70-41221
- BAUSCHINGER EFFECT**
Bauschinger effects in repeated tensile and compressive strains in inelastic media under variable temperatures as function of load vector, using plastic yield
01 p0211 A70-11422
- Microdeformation resistance in Ni alloys with ordered phase diagrams related to strain level, analyzing Bauschinger effect
03 p0505 A70-13106
- Intermediate aging influence on Bauschinger effect in low carbon steel at 270 C and 2 hr holding time
04 p0776 A70-15266
- Metals yield locus in strain hardening range in sigma-tau plane determined using slip theory, considering Bauschinger effects
09 p1771 A70-22395
- Yield condition and Bauschinger effect in transition conditions for isotropic and orthotropic bodies
19 p3542 A70-38061
- BAYES THEOREM**
Human feedback and response mode in performing Bayesian decision task
02 p0237 A70-12382
- Bit transition time /bit synchronization/ estimation, developing bit synchronizer from Bayes estimation and optimization theories
[AAS PAPER 69-608] 04 p0647 A70-14655
- Problems experienced in using computers for medical diagnosis and treatment processes, discussing Bayes formula application
04 p0644 A70-15358
- Telemetry decommutation algorithm for applying Bayesian decisions to demodulated received bits data
11 p2008 A70-26238
- Bayesian probabilistic information processing in psychological decision making in air traffic control, discussing bookbag and poker-chip applications
12 p2178 A70-27047
- Weibull process with unknown scale and shape parameters analyzed by Bayesian decision making model, with application to component reliability problem
12 p2243 A70-28011
- Nondestructive screen test efficiency, determining potential failures of electric components by Bayes theorem
15 p2748 A70-32659
- Computer program for assessment and modification of mechanical component life predictions by discrete formulation of Bayes theorem
19 p3440 A70-38816
- Risk interpretation of prior distributions in acceptance sampling by Bayesian analysis
19 p3440 A70-38817
- Reliability analysis based on Bayesian subjective probability implemented by stored time sharing computer programs for engineering computations and operation analyses
19 p3441 A70-38818
- Kalman filter set for state vector and observation error variance estimation in discrete-time linear system, using empirical Bayes techniques
[AIAA PAPER 70-1058] 19 p3395 A70-38873
- Sequential Bayes procedure for demonstrating mean time to failure beyond minimum acceptable value
20 p3658 A70-39642
- Bayes sequential detection test with constrained error probabilities, investigating properties of thresholds equations
21 p3787 A70-41333
- System parameters identification from short-term signal observations, using Bayesian approach
21 p3802 A70-42253
- Supervisor /monitor/ sampling frequency maximizing payoff function, using Bayesian preprocessor information analysis
22 p4127 A70-43498
- Bayesian identification of system parameters for observable and nonobservable input signals
24 p4316 A70-45474
- BAYESIAN STATISTICS**
U BAYES THEOREM
- BAYS**
Auroral absorption bays meridional motion, observing absorption onset systematic lag at various ground stations
14 p2570 A70-30216
- Auroral absorption bays meridional motion, observing absorption onset systematic lag at various ground stations
24 p4331 A70-46291
- BBGKY HIERARCHY**
Nonlinear Knudsen layer gas flow using BGK model for Boltzmann equation
06 p1048 A70-18322
- BBGKY hierarchy state functional formalism in nonequilibrium statistical mechanics for many particle system using Fourier transformation
11 p2087 A70-26548
- Kinetic equation for electron plasma based on BBGKY hierarchy reducible to set of equations with structure similar to Pines-Schrieffer equations
13 p2458 A70-28561
- BBGKY hierarchy pair correlation function for magnetoplasma under weak external force, using operator method and time periodic ansatz for distribution functions
14 p2623 A70-30697
- Shock and expansion waves formation by moving piston based on kinetic theory of gases, solving Bhatnagar-Gross-Krook equation by numerical method
21 p3808 A70-41377
- BCC LATTICES**

NT EXPLORER 22 SATELLITE
Faraday rotation of radio beacon satellite signals during traveling ionospheric disturbances simulated for spaced ground stations
20 p3590 A70-40481
- Geostationary beacon satellite recording of gravity wave influence on ionospheric electron content
21 p3815 A70-40943
- Radio navigation system using multiple satellite beacons /NAVSTAR/ for large area air and sea coverage
22 p4067 A70-42662
- BEACONS**
NT AIRPORT BEACONS
NT OMNIDIRECTIONAL RADIO RANGES
NT RADAR BEACONS
NT RADIO BEACONS
NT RADIO DIRECTION FINDERS
Personnel danger zones demarcation around radar antennas, using beacons
17 p3040 A70-35913
- BEAM COLUMNS**
U BEAMS (SUPPORTS)
U COLUMNS (SUPPORTS)

BEAM CURRENTS

- Colloid engine propellant mass flow distribution, determining beam current and specific charge effects on thrust, efficiency and specific impulse
[AIAA PAPER 70-1109] 20 p3692 A70-40234
- Glow discharge electron guns for welding and heating, discussing beam current and energy balance
22 p4042 A70-42376

BEAM PLASMA AMPLIFIERS

- Surface wave propagation and amplification by electron beam-plasma interaction, inapplicability of coupled mode theory and use for microwave amplifier
06 p1125 A70-18616
- Spatial electric field variations and electron distribution for beam plasma amplification, using nonlinear approximation
16 p2959 A70-34336
- Spread electron beam excitation of magnetoactive plasma waves in quasi-linear relaxation
21 p3855 A70-40948

BEAM SPLITTERS

- Modified Smith-type reflector for long laser cavities using etalon without coatings instead of usual beam splitter, discussing output characteristics
03 p0501 A70-13648
- Divided photoelectric cell position sensitive detectors in laser alignment systems, obtaining independent signals for displacements in orthogonal directions
06 p1081 A70-17624
- Time variations of reflectance measured for carbon dioxide laser beam splitters
07 p1302 A70-20095

- Laser radiation angular distribution determination by self calibrating method based on dividing light beam into spatially similar beams of various intensities
08 p1510 A70-20515

- Quasi-optical beam splitter, using grid diffraction of plane wave at dielectric cylinder, suitable for millimeter and submillimeter wavelengths and thread measuring
08 p1496 A70-21219

- Power density fluctuations in emission peaks of ruby laser determined by splitting beam into two components and using photosensitive element and photomultiplier recording
15 p2754 A70-32874

- Variable ratio beam splitter design and operation for lasers, using birefringent optics
18 p3270 A70-36755

- Double beam diffraction grating spectrometer for vacuum operation over far IR from 40 microns to 1 mm
24 p4339 A70-46323

BEAM SWITCHING

- CRT color displays advantages and limiting factors, considering beam-penetration tube with high voltage switching
09 p1673 A70-22031

- Beam switching Cassegrain antenna for millimeter wave radio astronomical measurements, describing RF and electronic systems
11 p2019 A70-26374

- Laser field transient properties in switching-on processes, discussing Q switching, detuning switch-off and pump power switch-on
11 p2064 A70-26843

- Q switched laser turn-on nonlinear dynamics, deriving field intensity distribution function
18 p3270 A70-36743

BEAM WAVEGUIDES

- Laser communication system for outer space, beam guiding and fiber optical guiding systems
04 p0649 A70-15038

- Beam fluctuations damping in beam waveguide, determining fluctuations cause as random displacement of lenses
04 p0651 A70-15290

- Injection laser amplifier with emitting and amplifying diodes coupled by planar polyharmonic beam waveguide
04 p0702 A70-15292

- Crosstalk in multiple-beam waveguides due to scattering and distortion caused by surface irregularities of focusers, discussing power profile of Gaussian beam
08 p1462 A70-21507

- Optical and quasi-optical transmission of EM wave beams of type in directional antennas Fresnel region, examining free space and waveguide modes
14 p2549 A70-30445

- Allowable transmission bandwidth of lens waveguide with curved axis, considering light beam deflection due to chromatic aberration
17 p3050 A70-34583

- VLF wave propagation in earth atmosphere waveguide, calculating various atmospheric types from waveguide field dependence on frequencies
19 p3416 A70-38566

- Radio beam trajectory in Fresnel zones of isotropic laminarly inhomogeneous ionosphere, discussing point source field and wave propagation
19 p3381 A70-38569

- Regular beamguides of second kind consisting of nonidentical nonequidistant correctors, calculating energy losses
21 p3785 A70-40629

Beamguides with inhomogeneities regulated for constant radiation losses, systematizing broadening 22 p3984 A70-42389

Prism film device for high efficiency laser beam coupling into light guiding thin film, deriving operation theory by plane wave analysis 22 p4030 A70-42948

Optical waveguides and resonators propagation modes detection and discrimination techniques evaluated for circular cylinder dielectrics /optical fibers/ 22 p4030 A70-42949

NT RADAR BEAMS

Monk-Gillieson convergent beam dispersion method applied to rocket-borne photoelectric spectrophotometer for far UV stellar spectra observation 01 p0090 A70-10904

Double beam Michelson interferometer for middle IR with moving mirrors operating in constant velocity mode, applying method to atmospheric emission spectra 01 p0091 A70-10909

Gaussian laser beams diffraction by straight edge bounding opaque plane on basis of Kirchhoff scalar wave theory in Fresnel limit 02 p0313 A70-12456

Natural modes and multiple beam interference in open resonators, taking into account centimeter wave experiments and computations 02 p0340 A70-12829

Quasi-optic electromagnetic beams slow spreading in anisotropic media due to propagation in unusual directions 03 p0447 A70-13288

Pencilbeam scanning observations of solar bursts revealing recognizable postincrease phase 03 p0558 A70-13588

Beam transformation laws and matrices for Gaussian beams, discussing propagation, reflection and refraction in geometrical optics 05 p0883 A70-16773

Stationary phase for beam of radio waves propagating in absorber ionosphere as function of mean directions of real and imaginary parts of wave vector 09 p1665 A70-22049

Equivalent angles of slope calculations based on rotary oblique probing data for spherical models of earth and ionosphere, deriving minimum equivalent beam path 11 p2043 A70-25539

Pencil-beam antenna idealized patterns derived from maximum gains and operating wavelengths, discussing sidelobes 12 p2195 A70-27247

Coherence degradation of collimated and focused Gaussian beams in turbulent atmosphere, using small perturbation method 13 p2453 A70-29824

Radio observations of dense briefly visible Leonid meteor shower with fixed pencil beam antenna in coping with wave scattering in trails 15 p2796 A70-31511

Lens antennas for performing radiation collimating function through refraction, discussing solid and artificial dielectrics lens design, beam scanning applications, etc 17 p3052 A70-35069

Multiple narrow beam antenna system with plasma column and electromagnetic wave ring source, discussing radiation pattern and electronic scannability 18 p3294 A70-36346

Pencil beam synthesis for large circular array with arbitrary number of directive elements, determining optimum excitations 18 p3227 A70-36476

Delay time between beams reflected from different parts of meteor trail, using phase invariant and frequency scanning methods 19 p3512 A70-37313

Group delay times criterion of multibeam propagation of ionospheric radio echoes for communications systems 19 p3375 A70-37332

Power flow patterns of near to far field transition of scalar wave pencil beam without reference to specific radiating structure 19 p3536 A70-37703

Object visibility limits when illuminated by laser beam with spatial selection method, discussing atmospheric conditions and light source radiation power 20 p3641 A70-39448

Pulsed ruby free emission mode laser spectrum narrowing, using diffraction lattice adjusted in resonator transversely to beam axis 20 p3643 A70-39757

Equivalent angles of slope calculations based on rotary oblique probing data for spherical models of earth and ionosphere, deriving minimum equivalent beam path 21 p3819 A70-41289

Coherent beam propagation through turbulent atmosphere, discussing limiting resolving power due to random fluctuations of refractive index 22 p4072 A70-42290

Diffusion effect on carbon dioxide Gaussian laser beam amplification, measuring gain saturation via pinhole method 22 p4051 A70-43335

EM radiation beams higher directivity from sources in two layer plasma in planetary atmosphere 23 p4242 A70-44261

BEAMS [SUPPORTS]

NT BOX BEAMS

NT CANTILEVER BEAMS

NT CURVED BEAMS

NT I BEAMS

NT RECTANGULAR BEAMS

Torsional vibration of thin beam of varying cross section, noting moment of inertia and torsional rigidity proportionality 01 p0200 A70-10525

Nonlinear dynamic beam response for classical and shear deformation theories, comparing stresses and deflections using traveling wave approach with finite difference schemes 01 p0206 A70-11147

Semidiscrete approximation of equation for free vibrations of beam with nonuniform cross section, using method of straight lines 01 p0213 A70-11636

Bending strength analysis for high strength beam with thin and long fibers embedded in matrix of viscoelastic material noting maximum stress 03 p0584 A70-12934

Natural frequency calculation accuracy for coupled beam bending vibrations shown dependent on connection stiffness determination 03 p0595 A70-13929

Singular integral equation applied to elasticity theory of composite beam with or without cavity under torsion 04 p0765 A70-14416

Complex uncoupled modes to analyze forced vibrations of three layer damped sandwich beam with arbitrary boundary conditions, discussing orthogonality 04 p0773 A70-15076

Nonlinear connected oscillations of vibrator and rigid bodies, analyzing plane-parallel and spatial motions, including elastic beams self excited oscillations 04 p0720 A70-15446

Boundary value problems of thin beams theory transformed into initial value problems, using dynamic programming and invariant imbedding 05 p0926 A70-15977

Stress distribution in long beams with circular annular inclusion under concentrated load solved in series form 05 p0928 A70-16024

Simply supported beams large deflection analysis in bending under symmetrical pair of forces, based on integration of elastic line differential equation 05 p0941 A70-16521

Transverse vibrations of isotropic truncated-cone beam fixed at ends compared with cylindrical beam 05 p0942 A70-16666

Support moment of beam with ends embedded in elastic medium subject to creep, noting dependence on load 05 p0947 A70-17010

Static buckling load for beam with pinned ends and Wiegardt-type elastic foundation, considering shear stresses effect 05 p0955 A70-17105

Dynamic response of free-free beams on viscoelastic Winkler foundation using complex foundation modulus based on antivibration isolator 06 p1165 A70-17627

Longitudinal vibration equations of beams for nonlinear stress-strain relation reduced to equivalent linear partial differential equations 06 p1106 A70-17863

Thin walled glass fiber reinforced plastics beams strength analysis combined with results from elasticity theory of anisotropic bodies 06 p1167 A70-17913

Minimum weight beams and frames calculation for random loads taking into account material carrying capacity 07 p1400 A70-18821

Minimum weight reliable beams and frames calculation for random loads, using one degree of freedom system to obtain closed form solution 07 p1401 A70-18825

Optimal linear viscoelastic synthetic sandwich structures, investigating test/calculation agreement for simply supported beams and embedded plates [ONERA-TP-702] 07 p1404 A70-19137

Simultaneous partial integrodifferential equations for transverse oscillations of uniform short beams 07 p1406 A70-19306

Minimum weight design of elastic sandwich beams with deflection constraints using n-dimensional space of discretized bending stiffness 07 p1407 A70-19358

Mechanical vibration of beams analyzed by partial differential equations of beam vibration involving mass concentration and flexibility 07 p1411 A70-19786

Vibrating composite beam test method for determining complex dynamic modulus of viscoelastic materials over broad frequency and temperature ranges 07 p1320 A70-19955

Bending tests for characterizing off-axis unidirectional composite beams, discussing errors due to lift off from supports 07 p1412 A70-19963

Bernoulli-Euler beam equation describing natural frequencies and mode shapes for vibrating beam immersed in fluid 07 p1413 A70-20043

Ductile flexure location in bent beams and systems with variable cross sections to determine critical load using plasticity theory 08 p1587 A70-21072

Lateral buckling of simply supported uniform diaphragm using slope-deflection equations for orthogonally intersecting beams, prescribing boundary conditions 08 p1589 A70-21244

Dissipative heating effects on loss factor of viscoelastically damped beam, discussing stiffness effects [ASME PAPER 69-VIBR-37] 08 p1592 A70-21478

Semiinfinite elastic strip supporting thin heavy beam using Airy stress function and Laplace transform, with boundary conditions expressed as Fourier series 08 p1594 A70-21768

Free vibrations and dynamic buckling of hinged extensible beam under axial force 09 p1768 A70-22061

Rotatory inertia and shear deformation effects on structural vibrations of Timoshenko beams and frameworks using matrix formulation 09 p1770 A70-22257

Flexo-torsional elasticity ellipse determining displacements, hyperstatic reactions and influence lines in beams with straight axis and variable cross section 09 p1771 A70-22398

Constant cross section beam bending and torsion with allowance for moment stresses, deriving differential equations for displacement functions 09 p1773 A70-22538

Longitudinal vibrations propagation in nonlinear elastic beam under harmonic kinematic disturbance solved by harmonic linearization method 09 p1773 A70-22541

Weight function minimization of multiweb box beam in pure bending 09 p1777 A70-22769

Elastic beam stability, natural frequencies and critical forces under longitudinal impact with nonuniform compressing force 09 p1780 A70-23116

Free vibrations of plates and beams of pyrolytic graphite type materials, analyzing transverse shear deformation and rotary inertia [AIAA PAPER 69-55] 09 p1780 A70-23210

Beam vibration eigenfunctions with allowance for shear compliance used to determine beams dynamic stability under pulsating axial load 09 p1785 A70-23600

Transition of stress distribution on collision surface of semiinfinite elastic plane with rigid beam, using Fredholm integral equation 10 p1954 A70-23950

Flexural rigidity of thin walled beams, analyzing relationship between loads and displacements taking into account Saint Venant torsional resistance 10 p1955 A70-24052

Stress-strain determination in nonuniformly heated thin walled cylindrical beams with nonlinear stringers and skin 10 p1957 A70-24281

Uniform beams flexural vibration natural frequencies approximate calculation showing effect of shear flexibility and rotatory inertia 10 p1959 A70-24562

Lines of influence of bending moments and cutting force for straight beam using differential equation integration 10 p1959 A70-24777

Beams stability under flexural stress with periodic intensity variations, deriving differential equation of motion 10 p1960 A70-24973

Moving mass effects on Euler beam analysis extended to Timoshenko beam, obtaining numerical solutions by finite difference method
10 p1963 A70-25073

Compressive stress critical moment induced instability and weakening incorporated in thin walled beam design
11 p2131 A70-25590

Free wave propagation constants in periodically supported infinite beams determined for rigid and flexible supports
11 p2132 A70-25727

Finite element matrix structural analysis by direct stiffness method and use of computers, considering thin wall box beams
[SAE PAPER 700218]
11 p2134 A70-25890

Resonant frequencies and Young/shear moduli of unidirectional graphite epoxy composite beams under high modes of vibration
11 p2136 A70-26082

Stress level, block size and constant and variable loading sequence effect on fatigue life of Al alloy box beams
11 p2138 A70-26094

Finite element solution procedures for inextensible beams elastica problem, using galerkin method for element stiffness matrices
11 p2143 A70-26640

Nonuniform beam element stiffness matrices for dynamic and elastic instability analysis, determining frequencies, mode shapes and critical loads
11 p2143 A70-26643

Structural design for allowable plastic deformation under dynamic loads, deriving finite element representation of elastic-plastic plane frame beam
12 p2317 A70-27117

Sandwich beams elastoplastic stability, determining critical load
12 p2323 A70-27342

Vibrating thin beam cross sectional displacement-force equations coefficients included in coefficient matrix, considering shear deformation and rotary inertia effects on vibration modes
12 p2324 A70-27397

Beam-bending and circular plate testing rigs for creep with constant and variable loading, discussing tests repeatability and accuracy
12 p2207 A70-27618

Maximum impact force and central deflection time function of transversely struck beam, assuming no reflected elastic wave effects on stresses
[DFVLR-SONDDR-48]
12 p2325 A70-27619

Elastic beam vibration under constant amplitude and varying frequency periodic forces during passage through resonance
12 p2326 A70-27798

Free elastic rotating beam with tip masses and inertia, developing solutions for flexible modes and natural frequencies of H-type configuration
12 p2273 A70-27820

Clamped beams steady state free and forced response and stability for large amplitude motion, discussing multimode analytical and numerical technique
12 p2327 A70-27821

Euler-Bernoulli and Timoshenko beam impact models compared for case of finite beam resting on spring supports
12 p2327 A70-27843

Stress measurements for eye beams forming of high fatigue strength based on brittle lacquer studies of isotropic material models
13 p2507 A70-28482

Book on torsion emphasizing beam stressed state calculation and civil engineering problems
13 p2512 A70-28850

Plastic symmetrical bending of freely supported beam under transverse local pulsed load, discussing deflection velocity fields during loading and unloading stages
13 p2514 A70-29307

Arbitrary planform plates with edge clamping and elastic beam spanwise support using Green function
14 p2655 A70-30182

Mechanics of solid structures including shells and beams, considering three dimensional behavior laws in plasticity and creep
14 p2656 A70-30294

Differential equations for coupled bending and torsional vibrations of slender beam in centrifugal force field
14 p2661 A70-31226

Numerical method for roots of algebraic equations, computing continuous beam lateral vibrations natural frequencies
14 p2600 A70-31330

Reticulated shell structure buckling using approximate equivalent shell and discrete analysis of individual beams
15 p2816 A70-32007

Constrained and constant coefficient optimal controls compared in optimizing performance criteria of vibrating beams
16 p2886 A70-33332

Composite beam testing concepts and interpretation under three and four point loading, noting shear deformation effect
16 p2989 A70-33385

Macaulay method extended for slope and deflection of statically indeterminate beams, rewriting design equations into index notation for computer programming
[ASME PAPER 70-DE-2]
16 p2989 A70-33419

Infinite elastic plate with beam reinforced circular insert, using classical plate theory and Euler-Bernoulli hypothesis for beams
16 p2990 A70-33679

Twisted uniform beam element flexibility and stiffness matrices, using continuous bending theory
16 p2894 A70-33887

Embedded damped sandwich beams, determining equations for resonant frequency, loss factor and modal roots
16 p2992 A70-34018

Statistically indeterminate Timoshenko beams oscillations natural frequencies and modes by lumping properties of linear and rotary inertia at discrete points
16 p2994 A70-34235

Linear systems with two degrees of freedom modeled as rigid beam on elastic supports, considering vibration damping
16 p2996 A70-34291

Transversely isotropic Timoshenko beam statics and dynamics under initial stress and transverse loading
17 p3182 A70-34561

Nonlinear vibrations of beam harmonically excited by periodic motion of supporting base, using Galerkin method
17 p3185 A70-34962

Infinite elastic beams system supported on two parameter elastic foundation solved by analogy to single beam lying on one-parameter elastic foundation
17 p3189 A70-35229

Optimal design of elastic sandwich, solid beam and plate structures under dynamic harmonically varying loads
18 p3336 A70-36220

Infinite Bernoulli-Euler beam transient and steady state response, considering damping, elastic foundation and constant axial load effects
18 p3339 A70-36490

Torsional vibration of thin beam with varying cross section, formulating fundamental equation and boundary conditions
18 p3339 A70-36519

Vibrations induced by frictional moving force in viscoelastic beam with free ends on elastic base, showing critical load dependence on damping
18 p3343 A70-36720

WKB or eikonal approximation for waves and vibrations in inhomogeneous Euler-Bernoulli beams and plates and Timoshenko beams
19 p3536 A70-37700

Minimum weight thermoelastic design of sandwich beam for given deflection, using potential energy principle
19 p3541 A70-38044

Minimum weight design of sandwich beams with elementwise constant cross section for prescribed compliances under alternative loads
19 p3543 A70-38303

German monograph on creep in statically indeterminate reinforced concrete beams with graduated cross sections
19 p3548 A70-38473

Book on structural analysis by finite difference calculus covering elastic and elastoplastic states, vibration and buckling of beams, gridworks, plates and shells
19 p3548 A70-38599

Elastic-plastic equilibrium bifurcation in geometrically simple frame model with symmetrically loaded beam, comparing characteristics with Shanley uniformly stressed column model
19 p3549 A70-38671

Pretwisted slender beam coupled torsional and longitudinal vibrations under centrifugal force field, obtaining resonant frequency by Rayleigh Quotient method
20 p3719 A70-39601

Thermoelasticity of fiber reinforced materials, considering stress concentration in beams and reinforcing fibers buckling under thermal loading
20 p3730 A70-40037

Elastic beams optimal design for multipurpose loading, considering compliance and minimum cross section constraints
20 p3733 A70-40382

Dynamic response of simply supported non-homogeneous beam and triangular pulse loads
21 p3933 A70-40584

Stress-strain state of finite length elastic beam free of bending moments and coupled to semiinfinite plate
21 p3933 A70-40603

Solid and sandwich beams lateral vibrations under transverse shear, rotary inertia and variable midplane stretching
21 p3938 A70-41761

Analytical iteration method extended to critical load of clamped beam with symmetrically variable cross section
21 p3939 A70-41963

Weight-optimal sandwich beam design for given static deflection, using energy approach
22 p4113 A70-42535

Finite beam element in bending, deriving shear deflection terms in stiffness matrix based on stress assumption
23 p4274 A70-44909

Anisotropic bodies elastic properties, obtaining solutions for nonorthotropic beams under randomly distributed normal loads and for various plates and strips
24 p4424 A70-45589

Periodically supported beams and plates free vibration, calculating natural frequency spectrum distribution and normal modes
24 p4427 A70-46070

BEAMSHAPING U COLLIMATION BEARING [DIRECTION]

Angular resolution dependence on bearing ambiguities in radio direction finders based on interference measurement, using digital logic circuits
04 p0659 A70-15335

Vortices orientation due to unstable Ekman boundary layer, discussing analogy to Taylor-Goertler and thermoconvective vortices
06 p1096 A70-17465

Gradient method applied to onboard analysis of astronavigational bearings of spacecraft
09 p1719 A70-22165

Auroral orientation curves and auroral oval, determining largest difference between locations
11 p2046 A70-26500

Radio direction finding of celestial bodies from moving platform, determining plane rotation effects on angle measurements
18 p3333 A70-36164

Auditory direction finding ability, discussing experimental arrangement, white noise production, test conduction and statistical evaluation
20 p3582 A70-40538

BEARING ALLOYS

Friction, wear and surface evaluation of alloys as bearing materials in prosthetic devices
09 p1690 A70-22044

Bearing materials rolling contact fatigue life, describing three ball-cone test machine
09 p1702 A70-22555

Ball bearing materials for ultrahigh vacuum space environments, determining frictional and wear behavior
17 p3099 A70-34573

BEARINGS

NT ANTIFRICTION BEARINGS

NT BALL BEARINGS

NT FOIL BEARINGS

NT GAS BEARINGS

NT JOURNAL BEARINGS

NT ROLLER BEARINGS

NT THRUST BEARINGS

Inertia effect of electrically conducting lubricant on load capacity of hydromagnetic inclined slider bearing under magnetic field
01 p0104 A70-11389

Newtonian liquid lubricated spiral groove bearing load capacity and power loss dependence on viscosity variations with temperature
[ASLE PREPRINT 69-LC-21]
02 p0309 A70-12533

Bearing strength and rupture of reinforced plastic composites under intense one-sided electric heating and hydrostatic pressure due to pyrolysis of plastic bond
03 p0515 A70-13244

Stability analysis of rotors consisting of disks on massless shaft mounted in unsymmetrical flexible bearings, considering free and forced vibrations with damping neglected
03 p0599 A70-14248

Conducting fluid as MHD lubricant for cylindrical bearings, deriving equations for ideally conducting shaft and bearing and arbitrary Reynolds numbers
04 p0697 A70-14544

Load capacity and power loss of spiral groove bearings lubricated by incompressible liquid with temperature-dependent viscosity, using momentum and energy equations
05 p0853 A70-15778

Spiral gears bearing disks contact fatigue endurance process, deriving critical points cyclic stability from stress distribution considerations
07 p1291 A70-18819

Flexural vibrations of rotor resting on nonlinear elastic bearings under action of exciting forces harmonics using variational method based on Hamilton principle
07 p1403 A70-19112

Aircraft engine vibrational overload reducible by elastic bearings having controllable elastic characteristics
07 p1364 A70-19113

Hydrostatic bearings design for minimum power loss and leakage and maximum stiffness, using geometry-dependent operating parameter
08 p1508 A70-21600

Electromagnetically suspended bearing equivalent to elastic vinculum with limit on linear displacement, relating weight, power consumption, maximum force, etc
09 p1690 A70-22421

Sliding bearings with nonNewtonian lubricants, noting pressure gradient change effect caused by speed fluctuation and material constants
10 p1893 A70-24015
10 p1598 A70-24520

Monograph on critical speeds of nonzero mass shaft supported at both ends by bearings with nonlinear elastic displacements
13 p2416 A70-28373

Hydrodynamically lubricated rectangular taper-land bearing pads, analyzing geometry, viscosity, load capacity, friction and operating temperature conditions
13 p2418 A70-28740

Viscosity variation factor at film inlet in fluid square taper pad bearing investigated by modified Reynolds equation
13 p2418 A70-28746

Flow dynamic lubrication equation for porous bearings under radial load with undefined axial dimension
15 p2745 A70-32442

Thermal constriction resistance between contacting metallic paraboloids applied to instrument bearings [AIAA PAPER 70-857]
16 p2998 A70-33902

Collection of papers on aerospace mechanisms, Part B, Bearings and suspensions
16 p2922 A70-34154

Controlled leakage sealing of hydrodynamic bearing lubrication systems for space vehicles in synchronous orbit
16 p2923 A70-34158

Torque motor driven despin bearing assembly design with integral slip ring for tactical communications satellite /TACOMSAT/
16 p2986 A70-34160

Bearings for nuclear reactor control components in space environment, discussing sliding friction, compatibility and prototype assemblies tests
16 p2923 A70-34162

Conical pivot bearings for impact accelerations tolerance in space environments, discussing optimum dimensions and minimal torque design
16 p2923 A70-34164

Bearing assembly energy dissipation effects on dual spin spacecraft attitude stability, explaining satellite motion anomalies
17 p3100 A70-34756

MHD slider bearing load carrying capacity in tangential magnetic field, observing optimum profile in step form with riser location and step height ratio
18 p3263 A70-36672

Ultrahigh precision microminiature bearing resistance moment measurement with inductive sensors
18 p3264 A70-37069

Pivoted plane pad bearings, calculating design variables from inner products of two vectors and Rayleigh-Ritz matrix function
19 p3435 A70-37612

Bearing strength and rupture of reinforced plastic composites under intense one-sided electric heating and hydrostatic pressure due to pyrolysis of plastic bond
19 p3455 A70-38462

Rotational stability of heavy horizontal shaft supported on plain lubricated bearings with cavitation in lubricant
19 p3438 A70-38669

Three-lobe fluid film bearing configuration for gas turbine concentric rotating shafts/spool shafts/ [ASME PAPER 70-LUBS-10]
22 p4045 A70-42450

Liquid lubricant unsteady motion and pressure distribution during pivot harmonic vibration in hydrodynamic bearing
23 p4200 A70-44163

BEAT
U SYNCHRONISM
BEAT FREQUENCIES

Length shifts measurement with single 2-mode laser by observing beat frequency, obtaining frequency shift proportional to length shifts
05 p0859 A70-16356

Radiation from nonlinear polarization sideband in Ar lasers, discussing anomalous beat notes and mode locking phenomena
06 p1083 A70-17949

Self pulsation in He-Cd laser, noting decreasing number of modes effect on beat frequency stability
07 p1301 A70-20017

Doppler beat spectrum and modulation depth of He-Ne laser emission with backward beam reflected from moving mirror into resonator
10 p1901 A70-25123

He-Ne lasers mode locking by self beat feedback between cavity modes, achieving nonlinearity control by circuit adjustment
12 p2245 A70-27273

Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics
12 p2246 A70-27352

Frequency locked noise effect on beat frequency measurement of angular velocity with ring laser, comparing gyroscope and phase methods
15 p2749 A70-31551

Voltage-frequency conversion technique using FM principle and RF oscillator beating with crystal oscillator output
15 p2705 A70-32705

Beat and synchronization modes of opposed waves in rotating gas ring laser, examining frequency response asymptotic behavior
17 p3108 A70-35683

Aperture size effect on frequency shift and frequency width variation of beat signals observed with laser Doppler velocity meter
19 p3428 A70-38502

M sub L alignment creation due to beam foil excitation process demonstrated with zero field quantum beats in He and H emission spectra
20 p3674 A70-39148

Doppler beat spectrum and modulation depth of He-Ne laser emission with backward beam reflected from moving mirror into resonator
20 p3643 A70-40516

Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics
22 p4052 A70-43596

Magnetic flux dependent interference beats in spontaneous emission of gas discharge of He-Ne laser, estimating Hertzian coherence duration
23 p4202 A70-45052

BED REST

Motion coordination capacity of persons subjected to 40 days bed rest using dynamographic technique, discussing nature of slackening
03 p0425 A70-13896

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises
03 p0425 A70-13898

Bed rest effects on whole leg venous distensibility, discussing heart rate and leg volume measurements
06 p0999 A70-17288

Recumbency effect on human heel bone density during bed rest using X rays
06 p0996 A70-17850

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia
07 p1209 A70-19513

Human renal function, electrolyte and water metabolism during bed rest with daily leg exercise
07 p1223 A70-19937

Central nervous system activity of white rats during hypokinesia, observing organism shifts and long time effects on functions
09 p1615 A70-22093

Relative value of prolonged bed confinement and hypodynamia in estimating biological effects of weightlessness
10 p1813 A70-24666

Psychic state changes during prolonged bed rest, discussing effects of physical exercise and medicine
10 p1816 A70-24684

Psychic functions stability during prolonged hypodynamia, discussing memory, attention span, sensometer reactions, time estimating, etc
10 p1816 A70-24685

Physical exercise effects on man during prolonged bed rest, investigating muscle performance, static endurance, walking coordination and psychomotor functions
10 p1816 A70-24688

Transverse g-force tolerance and stability after prolonged hypodynamia in bed rest, noting effects of pharmaceuticals, physical exercise and prophylactic measures
10 p1817 A70-24695

Hypodynamia effects on humans during prolonged bed rest, investigating immunological resistance, psychic disorders, myocardium changes, responses to pharmaceuticals, etc
10 p1817 A70-24696

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia
11 p1988 A70-26112

Hypokinesia effects on working capacity of subjects performing manual aircraft control assignments during bed rest
13 p2352 A70-29340

Nine-alpha-fluorohydrocortisone preventing bedrest induced orthostatism, considering plasma volume decrease effects on cardiovascular performance
13 p2358 A70-29433

Central nervous system activity of white rats during hypokinesia, observing organism shifts and long time effects on functions
15 p2685 A70-32689

Human circadian coronary circulatory rhythms during space flight weightlessness or bedrest with and without exercise
16 p2854 A70-33991

Optimum bed rest time schedules for cardiovascular patients from neurological, dynamometric, electromyographic and myogenic-tonus tests
23 p4149 A70-45077

BEDS (PROCESS ENGINEERING)

Cyclic changes in concentration produced in fluid flowing through fixed bed of solid adsorbent, governing separation by beds wave propagation properties
04 p0780 A70-14712

Time dependent transmission of carbon dioxide in air flowing through molecular sieve adsorber beds, developing and programming weighted least squares analysis
04 p0786 A70-15315

Equations and techniques to analyze transient heat and mass transfer characteristics of packed adsorption beds for spacecraft life support systems
04 p0786 A70-15316

Breakthrough curve shape prediction during adsorption from gas stream in fixed bed adsorbers for trace contaminant control applied to activated charcoal
04 p0786 A70-15317

BEER LAW

Absorption cross sections for single and double molecules of oxygen and in UV region noting disagreement with Beer law
06 p1114 A70-18632

BETTER

Space environment and radiation on Biosatellite 2 enhancing radiation effects in developing flour beetle Tribolium confusum
02 p0238 A70-12517

BEHAVIOR
NT HUMAN BEHAVIOR

Collection of articles on chimpanzee central nervous system and behavior
01 p0028 A70-11375

Pigeon response to concurrent variable interval reinforcement schedules, investigating relative and changeover rates regarding key color
05 p0800 A70-16126

Inhibitive stimulus control related to behavioral contrast during discriminative training
08 p1441 A70-20476

Reticular formation of central nervous system in vertebrates described as behavior controlling circuit of interconnected modules, proposing hybrid computer method for operational scheme
08 p1447 A70-21461

Drosophila brain Circadian oscillation as gating device restricting emergence behavior of adult
11 p1989 A70-26661

Feline hypersexuality, aggression and perceptual disorientation resulting from p-chlorophenylalanine administration
12 p2167 A70-27271

Hypothalamic electric stimulation intensity effects on elicited behavior, considering possible neural circuit threshold reduction
13 p2355 A70-29807

Engineering systems construction with behavioral elements of biological objects, describing gyromat
18 p3223 A70-36078

BELGIUM

ATC real time simulation exercises in Brussels Upper Information Region
07 p1250 A70-20227

Real time simulation of air traffic control problems in Brussels upper information region /UIR/
08 p1541 A70-21361

Report to COSPAR on Belgian National Committee for Space Research, discussing efforts of various universities and institutions
15 p2829 A70-31703

BELL AIRCRAFT
NT UH-1 HELICOPTER
NT X-22 AIRCRAFT
BELL MILITARY AIRCRAFT
U MILITARY AIRCRAFT
BELLMAN THEORY

Approximate solutions to Cauchy problem describing controlled pursuit using approximate method of integrating Bellman equation
04 p0713 A70-14602

Optimal terminal control stochastic synthesis for linear systems by Bellman second order nonlinear partial differential equation
21 p3801 A70-40607

BELLOWS

Gas turbine compensating bellows structural strength, discussing low cycle fatigue test under static loads
06 p1167 A70-17664

Expansion bellows fatigue strength based on load and displacement measurements performed during low cycle model tests
10 p1965 A70-25299

BELTRAMI FLOW

Monograph on Beltrami steady state, frictionless flow of incompressible medium past spherical surfaces, assuming vortex and stream lines agreement

11 p2034 A70-25498

MHD nonsteady Beltrami flow between two infinite parallel walls with transverse magnetic field, calculating velocity, skin friction and induced magnetic field

20 p3678 A70-39610

Beltrami flows on spherical surfaces, using scalar equations from kinematic conditions

24 p4326 A70-45990

BENARD CELLS

Atmospheric cellular convection, reducing hydrodynamic equations to amplitude equations for vertical velocity

15 p2770 A70-32064

BENCHES

U SEATS

BENDING

NT ELASTIC BENDING

Photogrammetric deformation measurement of thin steel sheets during static bending tests

02 p0302 A70-12653

Perforated plates bending for multiply connected regions, proving quasi-regularity and uniqueness of boundary value equations

04 p0767 A70-14481

Variable strain bending form design for determining environmental craze resistance of polymers

04 p0713 A70-15375

Electrical network models simulating initial and boundary value problems of applied mechanics, exemplifying with string free vibrations and thin plate bending

06 p1094 A70-17928

Rectangular plates with symmetrical cracks, studying bending under various crack distributions

07 p1399 A70-18662

Stress-strain analysis for rod-shaped structural elements under combined tensile and bending loads

08 p1588 A70-21191

Boundary conditions effect on bending, vibrations and buckling of unsymmetrically laminated rectangular plates

11 p2136 A70-26079

Regular C cubed space curve bending in Euclidean 3-space into piecewise helix, considering torsion and curvature

12 p2260 A70-26973

Tensodiode effect in long plate-shaped semiconductors, noting bend direction effects on I-V characteristics

12 p2195 A70-27312

Reference stress evaluated by numerical analysis techniques, discussing rectangular beam in pure bending

16 p2987 A70-32921

Aircraft wing box beams bending tests to failure loads, considering crushing pressure, bulkhead flexural deformations, structure initial imperfections and instability phenomena

23 p4267 A70-44103

BENDING FATIGUE

Elastoplastic stress concentrations calculations in notched strips and shafts under tension, bending and torsion, using approximate method

01 p0211 A70-11425

Component proportion and porosity effect on fiberglass reinforced plastics properties, establishing relation between bending strength and thermal conductivity coefficient

02 p0323 A70-12814

Reversed bending fatigue tests on stainless steel fibermetal with porous structure to investigate effects of density, thickness, wire diameter, screen stiffening, etc

03 p0481 A70-12957

Low cycle fatigue of alloy and steel materials under bending and cyclic heating, relating strains and number of cycles to failure

05 p0866 A70-17036

Normalized steel low cycle fatigue strength under bending and torsional rotation, testing linear damage accumulation theory

06 p1163 A70-17404

High purity Ni fatigue in reversed bending as function of oxygen pressure and temperature

06 p1086 A70-17454

Ti alloy welded sheets bending fatigue test facility, discussing test stand calibration and optimal welding

07 p1291 A70-18824

Reverse-bend and tension-tension fatigue properties of high strength Cr-Mn-N stainless steel sheet in notched and unnotched conditions

07 p1305 A70-18993

Cyclic bending stresses in web of precessing disk-type gyroscope rotor, considering fatigue failure and forced vibration response

09 p1770 A70-22270

Vertebral injury prediction of seated human subjected to caudocephalad acceleration, suggesting consideration for head and torso forward flexion and external restraints effects

09 p1627 A70-23462

Ni-Cr austenitic steel bending, surface temperature variations, crack development and propagation under double fatigue tests

10 p1902 A70-23819

Materials bending fatigue strength calculations for biaxial tension compared with experiments showing agreement

10 p1964 A70-25289

Stress peak distribution effects on fatigue life of test specimen excited to bending by Gaussian random vibrations

11 p2137 A70-26093

Mechanical notches and saltwater corrosion effects on flexural fatigue behavior of high strength structural alloys, investigating yield strength to density ratio

11 p2066 A70-26097

Low cycle fatigue tests advantages by reversed bending ascribed to simplicity, specimen stability at high strain levels and minimum equipment costs

11 p2034 A70-26614

Biaxial stress effect on fatigue crack propagation in Al alloy plate under reversed bending

15 p2821 A70-32324

Welded Al plates high temperature bend tests, describing materials and procedures

18 p3278 A70-37115

German monograph on refractory materials softening under bending and compression at high temperatures

22 p4061 A70-43742

Double linear damage rule applicability to dual type alloys from two-stress level rotating bending and axial fatigue tests

[ICAS PAPER 70-39]

23 p4267 A70-44137

Plane strain fracture toughness testing of high strength Al alloys and steels, using fatigue cracked bend specimens

23 p4206 A70-44191

Thin Al foil subjected to cyclic bending stresses, investigating substructures and strain regions around fatigue crack

24 p4362 A70-46186

BENDING MOMENTS

Moments and shear forces in plate flexure represented by single valued stress functions of position, stating variational principle for compatibility

01 p0201 A70-10931

Numerical solution of bending stresses in internally pressurized elliptical tubular or ring specimens for testing uniaxial and multiaxial fracture strength

01 p0203 A70-11061

Attachment loads and beam bending moments design curves for linear and right angle fittings on honeycomb inserts to determine internal loading

02 p0386 A70-11949

Stress-strain analysis of rectangular plates under concentrated load, noting sealed liquid compressibility effect on deflections and bending moments

02 p0388 A70-12499

Sinusoidal test for measuring knee moment increase required to flex and extend for various conditions of knee angle, angular velocity and steady knee moment

02 p0238 A70-12546

Finite strain in bending rectangular block into right circular cylindrical shell for transversely isotropic medium along radius vector, using Saint Venant stress-strain relations

03 p0602 A70-14329

Monograph on shear lag measurement in rectangular section beam subjected to bending or torque free from axial restraint, using inductance probe sensors

03 p0603 A70-14351

Stress-strain state under bending of shallow spherical shell having form of circular rectangle with clamped edges

04 p0767 A70-14486

Stress-strain state of circular orthotropic shells under bending, considering distributed loads applied to shell center

05 p0934 A70-16217

Revolving shells local stability developing boundary effect under normal and bending external loads solved by computer program

05 p0935 A70-16237

Compressive forces eccentricity influence on circular cylindrical shell stability noting relation to bending moments

05 p0936 A70-16239

Hammer forces and specimen bending moment-time responses and fracture resistance during notched beam impact test

05 p0938 A70-16479

Simply supported beams large deflection analysis in bending under symmetrical pair of forces, based on integration of elastic line differential equation

05 p0941 A70-16521

Axial and nonlinear bending performance compared for compression moldings laminated from random glass fiber mat

05 p0870 A70-16577

Stress-strain state of plates weakened by reinforced hole and under tensile and bending loads, including boundary conditions

05 p0945 A70-16856

Stress-strain state of drawn and bent circular plate made of rigid viscoplastic work hardened material

05 p0946 A70-16958

Support moment of beam with ends embedded in elastic medium subject to creep, noting dependence on load

05 p0947 A70-17010

Static buckling load for beam with pinned ends and Wighardt-type elastic foundation, considering shear stresses effect

05 p0955 A70-17105

Stress-strain state of curved rod made of anisotropic material under bending loads applied to end face cross sections

07 p1399 A70-18661

Elastic behavior of joint formed by normally intersecting circular cylindrical shells under external bending moment, noting applicability to pipelines and pressure vessels

[ASME PAPER 68-WA/PVP-1]

07 p1400 A70-18710

Bending tests for characterizing off-axis unidirectional composite beams, discussing errors due to lift off from supports

07 p1412 A70-19963

Impact forces and specimen bending moments generated during dynamic tear test interpreted in terms of system dynamics and material fracture characteristics

08 p1518 A70-21319

Stress, strain and strain rate relations determined from dynamic flexural beam tests with bending moment in terms of curvature

08 p1592 A70-21475

End plugs bending moment and shear loads reduction during compression tests of composite orthotropic cylinders

08 p1594 A70-21889

Weight function minimization of multiweb box beam in pure bending

09 p1777 A70-22769

Elastoplastic compressible sheet metals reinforced by isotropic work hardening under action of bending moments, analyzing stresses and strains

10 p1955 A70-24056

Stress distribution in strip with asymmetrically positioned internal row of equal and equally spaced circular holes subjected to longitudinal tension or transverse bending

10 p1955 A70-24082

Lines of influence of bending moments and cutting force for straight beam using differential equation integration

10 p1959 A70-24777

Beams stability under flexural stress with periodic intensity variations, deriving differential equation of motion

10 p1960 A70-24973

Vibrations of combination of cylindrical shells and circular plates, giving bending moment distribution

11 p2139 A70-26415

Thin shell design for minimum bending stresses and transverse shear for composite materials with low interlaminar shear strength

11 p2141 A70-26490

Rectangular beam creep rupture time under bending moment and axial tensile force, using power series to solve integral equations

11 p2142 A70-26635

Orthotropic plates bending with shallow and sharp fillets, determining normal stresses

12 p2325 A70-27533

Postwrinkling nonlinear behavior of conical shell of revolution subjected to bending loads

[AIAA PAPER 69-90]

12 p2326 A70-27816

Rotating shaft model with slight curvature for estimating maximum bending moment through Fourier series analysis

13 p2416 A70-28372

Booster control system reducing maximal wind-induced bending torques, examining booster response to aerodynamic forces

13 p2500 A70-28413

Stability and wind response determining spacecraft structure forces and bending moments

[AGARDGRAPH-115]

13 p2504 A70-28754

Hologram interferometry using moire method to determine bending moments of object surface

13 p2409 A70-29474

Isotropic plates weakened by circular holes, investigating bending by Ambartsumian plate theory

13 p2515 A70-29509

Transverse bending of isotropic rectangular plate with symmetric crack under uniformly distributed load, considering corrections for stress-strain state near cracks

13 p2516 A70-29516

Clamped orthotropic rectangular sandwich plates bending using approximate solution

14 p2661 A70-31429

Pyroceramics transient strength measurements on cylindrical and prismatic samples under static bending

15 p2764 A70-31545

Helicopter rotor blades flapwise bending moments prediction by transfer function/superposition techniques

17 p3013 A70-34704

Normally loaded thin plate displacements, bending moments and stresses determined by hologram interferometry and indirect moiré and superposition of grilles

17 p3085 A70-35011

Plane cross section hypothesis applied to fully developed creep in thin walled tube subjected to internal pressure and bending moments, calculating stress concentration

18 p3340 A70-36571

Static stability requirements relaxation and wing control devices additions for alleviating wing root bending moments in controls configured vehicle /CCV/ design concepts

19 p3355 A70-37395

Concentrated lateral loads effect on elastic stability and moment carrying capacity of circular cylindrical shells in bending

21 p3932 A70-40544

Elastoplastic bending of rotating circular shaft with constant end cross section force couple, assuming small deformations of linearly hardening materials

22 p4118 A70-43570

Cantilever beam optimal stability under concentrated and uniformly distributed bending loads

23 p4268 A70-44171

BENDING THEORY

Elastic support effect on bending of clamped circular, elliptical, rectangular and skewed plates, using variational method and small perturbation technique

01 p0205 A70-11144

Finite element bending stiffness matrices for deflections analysis of pretwisted cantilever plate subjected to static loads

02 p0384 A70-11858

Orthotropic cylindrical shell with initial deflection under long term effect of external hydrostatic pressure, solving bending problem

02 p0390 A70-12809

Triangular conforming plate bending element applied to static and dynamic problems, investigating convergence rates of finite element approximations

03 p0584 A70-12924

Cylindrical bending in laminated plates displaying bending-extensional coupling approximating behavior of rectangular laminated plates with high length-to-width ratio

03 p0587 A70-13125

Simultaneous equations of longitudinal impact bending, introducing temporal and spatial transformations regarding dispersive wave characteristics in elastic rod

03 p0591 A70-13428

R function method for solving plate bending problem by satisfying differential equations coordinates

04 p0767 A70-14489

Bending analysis of cracked plate with arbitrary stress distribution across thickness

[ASME PAPER 69-WA/PPV-2] 04 p0768 A70-14791

Stiffener inclination effect on pressurized cylinder instability under pure bending

[ASME PAPER 69-APM-X] 04 p0769 A70-14868

Fracture criteria in cracked plates under combined extension and cylindrical bending using Sih-Hartman theory

[ASME PAPER 69-MET-L] 04 p0770 A70-14882

Heated isotropic shallow shells results extended to solving nonlinear problem in bending theory of orthotropic shallow shells clamped, heated and under pressure

05 p0927 A70-15993

Bending problem for homogeneous transversely isotropic plate weakened by curvilinear hole

05 p0946 A70-16959

Elastoplastic bending of rectangular plates by finite difference and variational methods assuming homogeneity in elastic region

05 p0946 A70-16962

Rectangular and nonrectangular anisotropic plate bending and stability analysis by difference-differential technique, allowing for combined freely supported and clamped end conditions

06 p1167 A70-17864

Electric network models of nonhomogeneous differential equations applied to elastic beam and thin plate bending and displacement equations

06 p1094 A70-17927

Triangular plate bending elements with enforced compatibility, using cubic interpolation polynomial to describe element displacement

[AIAA PAPER 70-136] 06 p1171 A70-18169

Rectangular three layer plate bending with load carrying central layer obeying Kirchhoff-Love hypotheses and external layers obeying Noether hypothesis

07 p1403 A70-19117

Effect of uniformly distributed circular holes in finite double row on stress distribution in transversely bent strip, based on Kirchhoff bending theory

07 p1407 A70-19385

Anticlastic bending effect on rectangular beam curvature, presenting deflection equations

07 p1414 A70-20175

Ductile flexure location in bent beams and systems with variable cross sections to determine critical load using plasticity theory

08 p1587 A70-21072

Infinitely wide plate bending at small angle of attack in supersonic gas flow, obtaining critical flow rate equal to divergence rate

08 p1588 A70-21175

Linear and nonlinear equilibrium equations for bending deformation of thin elastic cylindrical using Kirchhoff-Love hypotheses

08 p1588 A70-21242

Finite bending elements for static deflections of annular and circular plates loaded by concentrated forces, calculating free vibrations

08 p1588 A70-21243

Yield criterion for plastic bending of transversely anisotropic circular plates under plane stress

08 p1589 A70-21250

Stiffeners inclination effects on instability of pressurized cylinder under bending by Ritz method, considering finite deflection and initial imperfections in strain-displacement relations

08 p1591 A70-21464

Flexural rigidity of thin walled beams, analyzing relationship between loads and displacements taking into account Saint Venant torsional resistance

10 p1955 A70-24052

Bending of homogeneous orthotropic rectangular plate of variable thickness supported on opposite edges, obtaining solution as Fourier series

10 p1955 A70-24083

Plate bending triangular finite element for shell structure analysis, considering displacement functions, stiffness matrix and load vector

10 p1957 A70-24482

Rigid/plastic or rigid/perfectly plastic anisotropic plate under uniform bending, analyzing stress distribution

10 p1964 A70-25092

Elastic bending of clamped and supported elliptic and parabolic plates under external pressure investigated by lines of equal deflection

11 p2133 A70-25839

First order differential equations for unsymmetrical bending of shells of revolution

11 p2135 A70-25978

Transient bending and shear stresses at clamped support of orthotropic circular cylindrical shells

11 p2135 A70-25985

Clamped thin circular plate bending under various loadings due to action of rigid square column on center

11 p2139 A70-26404

Finite element bending stress analysis of thin rectangular and skew plates, discussing computational procedure generating stiffness matrices

11 p2143 A70-26641

Conforming plate bending solution with third degree polynomial deflection functions in triangular finite elements, using Lagrange multipliers as stress parameters

11 p2143 A70-26642

Finite element method solutions for plate bending, improving convergence based on error analysis

11 p2144 A70-26676

Glass fiber reinforced thin rectilinear orthotropic plastic plates bending using finite difference method with allowance for creep

12 p2324 A70-27531

Iteration procedures for boundary value problem of orthotropic rectangular plate under bending loads, discussing convergence of procedures

12 p2325 A70-27552

Derivation procedure for dynamic flexibility matrix including material damping for triangular plate in bending, twisting and shear

13 p2509 A70-28540

Open cross section thin walled prismatic beam twisting and bending based on virtual displacements

13 p2511 A70-28744

Stress distribution in isotropic plates weakened by elliptical holes under bending based on elastic shallow shell theory and small parameter technique

13 p2514 A70-29291

Plastic symmetrical bending of freely supported beam under transverse local pulsed load, discussing deflection velocity fields during loading and unloading stages

13 p2514 A70-29307

Thermoelastic equations for circular sandwich plates bending due to asymmetric temperature distribution

13 p2518 A70-29976

Fourth order differential equations eigenfunctions construction and convergence of expansions in theory of flexure of sector plates

14 p2658 A70-30997

Cosmic rays geomagnetic bending and effective angles of approach for various ground stations

14 p2633 A70-31313

Cylindrical conical shell junction asymmetric bending, using numerical method and exact solution

15 p2822 A70-32360

Elastoplastic bending of thin plate under increasing and uniformly distributed loads, defining statically admissible stresses

16 p2988 A70-33107

Monograph on optimal angles and section partition for buckling strength of twisted and displaced bent bars

16 p2988 A70-33300

Twisted uniform beam element flexibility and stiffness matrices, using continuous bending theory

16 p2894 A70-33887

Shear coupling effect in cylindrical bending of anisotropic composite laminates

17 p3182 A70-34558

Linear bending theory of thin homogeneous isotropic plates

18 p3339 A70-36482

Structure of flexural members, analyzing torsional and lateral stability by finite element method and matrix formulation

18 p3339 A70-36494

Creep bending of rectangular plates with stress-strain and strain displacement nonlinearities

18 p3343 A70-36703

Arbitrary cross sections center of flexure formula, transforming surface integral to line integral dependent on boundary conditions

18 p3343 A70-36716

Bent plates strain analysis using in-plane moiré method for small and large deflections

19 p3535 A70-37383

Straight thin walled elliptical cylindrical shells stability in pure bending, solving boundary value problem

19 p3550 A70-38683

Large deflection of simply supported aluminum alloy annular plate with nonlinear stress-strain curve, considering compressibility effects and membrane force

20 p3718 A70-39138

Anticlastic bending analysis of long narrow plates oscillations and stability based on elastic plates nonlinear theory

20 p3721 A70-39779

Stressed state in thermoelasticity plane steady state problem of thin plate under bending based on dislocations and temperature stresses relationship

20 p3721 A70-39780

Structural mechanics of continuous fiber reinforced composites, discussing bending and stretching of cylinders, pressure vessels, plates and beams

20 p3730 A70-40039

Bending of rigidly fixed or simply supported parallelogram plates, using Ritz and Rubnov-Galerkin variational methods

21 p3933 A70-40742

Cantilever bending under gradual contact with cylindrical supporting surface compared with solution by elasticity theory

21 p3934 A70-41251

Support elasticity role in axisymmetric plates bending, discussing Rayleigh-Ritz solution

21 p3937 A70-41739

Bending stress at clamped support of impulsively loaded semiinfinite conical shell, obtaining formulas from perturbation theory

21 p3938 A70-41759

Third isotropic point in rectangular beam under bending stresses by Hertzian load, using Stokes-Wilson method and photoelastic comparison

21 p3941 A70-42265

Variable thickness flexible plates thermoelastic flexure and buckling, obtaining nonlinear differential matrix equations by difference-differential method

22 p4115 A70-42811

Elastic plate uniform extension with rectangular crack by three dimensional bending theory, using variational principle

22 p4115 A70-42941

Finite element method for bending-extensional coupling in angle-ply laminates deformation behavior

22 p4061 A70-43685

Transverse bending of orthotropic glass fiber reinforced plastic plates under uniformly distributed loads

22 p4120 A70-43720

Two dimensional shell equations derivation from three dimensional elasticity theory, considering rotationally symmetric bending of shells of revolution

23 p4265 A70-43942

Fundamental error in Galerkin method application to bending problem of elastic rods

23 p4268 A70-44172

Finite beam element in bending, deriving shear deflection terms in stiffness matrix based on stress assumption

23 p4274 A70-44909

Prismatic isotropic homogeneous cantilever beams flexure for case of power series conformal mapping function

23 p4275 A70-44944

German monograph on stress-strain state in prestressed, rigidly supported flexible plates subjected to large deflections, using extended Wolmir solution

24 p4418 A70-45083

BENDING VIBRATION

- Spurious flexural vibrations in cylindrical mechanical resonators, transducers and wires used as component parts in electromechanical filters, indicating dependence on material dimensions and properties
02 p0268 A70-12450
- Unidirectional carbon and glass fiber reinforced polyester resins dynamic characteristics under torsional and flexural vibration, showing damping independence of cyclic stress amplitude
03 p0514 A70-13111
- Nonlinear flexural vibration properties of thin circular cylindrical shells with simply supported ends assuming deflection mode
03 p0594 A70-13549
- Complex Young modulus of plastics during flexural vibration, discussing deformation of viscoelastic bodies and test results of various plastics
[ONERA-TP-715] 03 p0487 A70-13645
- Natural frequency calculation accuracy for coupled beam bending vibrations shown dependent on connection stiffness determination
03 p0595 A70-13929
- Frequency equation for flexural vibration of simply supported beam, considering tabular procedure for cantilever beam
03 p0602 A70-14330
- Cyclic bending stress in disk type gyroscope rotor under steady precession, discussing solutions for modal functions and resonant frequencies
[ASME PAPER 69-DE-A] 04 p0689 A70-14873
- Optimal iterative weighted least squares estimation of rotation-coupled flexural oscillations of boom stabilized satellites in earth orbits
04 p0763 A70-15413
- Thin gas turbine disk strength under axisymmetric flexural vibrations, noting agreement of calculated and experimental rotor rpm danger zone
06 p1166 A70-17654
- Energy dissipation during torsional and flexural vibrations of steel and duralumin specimens subjected to plastic deformation, accounting for discrepancies due to methodical errors
06 p1166 A70-17658
- Complex elastic system coupled flexural vibrations resonant frequencies determined with allowance for friction
07 p1363 A70-19111
- Flexural vibrations of rotor resting on nonlinear elastic bearings under action of exciting forces harmonics using variational method based on Hamilton principle
07 p1403 A70-19112
- Inductive sensor design and circuitry for measuring rapidly rotating shaft bending deflections at various vibration frequencies
07 p1279 A70-19115
- Rotating rotor with mass distributed along shaft analyzed for nonlinear flexural and torsional vibrations, determining dynamic instability ranges
08 p1584 A70-20694
- Amplitude-frequency characteristics of arbitrary elastic system performing flexural vibrations determined using computer
08 p1588 A70-21184
- Free in-plane flexural vibrations of circular rings, developing equation of motion to include shear deformation and rotatory inertia effects
08 p1592 A70-21473
- Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect
09 p1766 A70-23239
- Natural bending vibrations of circular plates with allowance for stress tensor asymmetry, deriving transcendental frequency equation
09 p1782 A70-23292
- Static tensile stresses effect on magnetized ferromagnetic materials damping properties explained by anisotropic microplastic strains dissipating energy during bending vibration
10 p1904 A70-24246
- Shrouded aircraft engine turbine blades vibration stresses found minimum by setting up paired blades with fixed tension along shroud
10 p1964 A70-25288
- Flexural vibrations of homogeneous elastic circular cylinder supported at both ends, imposing zero stress conditions on skirt
12 p2321 A70-27154
- Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc
12 p2327 A70-27823
- Energy dissipation during independent flexural-torsional vibrations of rods, noting alternating shear stress superposition effect on damping
15 p2813 A70-31530
- Kinetic instability of elastic cantilever beam under excitation by rotating masses, relating bending and torsional vibrations to masses angular velocity
18 p3334 A70-35960

Flexural vibrations of laminated composite plates, maintaining continuity of displacements and surface tractions at intersurfaces between reinforcing layers and composite matrix
19 p3537 A70-37790

Nodal patterns on thin elastic circular plate vibrating in flexure, considering natural and compounded modes
19 p3543 A70-38245

Low aspect ratio cantilever plate wings supersonic bending torsion flutter speed calculation, using spanwise and chordwise variables and potential energy principle
22 p4112 A70-42276

Nonlinear flexural vibration of thin circular cylindrical shells with clamped ends, using method of averaging for stability
22 p4112 A70-42517

Cross ply laminated plates natural frequencies, approximating flexural vibration by classical theory
22 p4119 A70-43679

Flexural vibrations of clamped circular plate with nonlinear elasticity for small strains and displacements, using variational principle
22 p4120 A70-43719

Bending vibrations of propeller blades calculated by successive approximation
24 p4422 A70-45300

Rope transverse oscillations due to impact taking bending rigidity into account
24 p4424 A70-45627

BENDS [PHYSIOLOGY]

U DECOMPRESSION SICKNESS

BENTONITE

Optimum composition of sand-bentonite materials for aluminum alloy casting in molds compacted by high pressure
08 p1506 A70-21137

Middle Devonian Tioga Bentonite age from Rb, Sr and Sr isotopes in weathered whole rock samples
20 p3615 A70-38989

BENZENE

Thermospectrometric investigation of stimulated Raman lines in benzene to identify generation modes, observing optical sideband effect at 8050 Å
13 p2425 A70-28712

Vapor phase fluorescence spectra from benzene and deuterated benzene at zero point vibrational level
15 p2694 A70-31731

Thermal stability of polymers based on aromatic diamines and isomeric dibenzoylbenzenes
21 p3782 A70-42129

Thermal conductivity of water, toluene and benzene in coaxial cylinders, taking into account edge heat losses
23 p4276 A70-44216

BERENICE ROCKET VEHICLE

Estimated aerodynamic coefficients of reentry body compared with coefficients derived from Antares and Berenice flights
06 p0966 A70-17248

BERNOULLI EQUATION

U BERNOULLI THEOREM

BERNOULLI THEOREM

Martin method for reducing determination of steady plane MHD flow to Bernoulli and direct functions satisfying quasi-linear partial differential equations
03 p0533 A70-14200

Bernoulli-Euler beam equation describing natural frequencies and mode shapes for vibrating beam immersed in fluid
07 p1413 A70-20043

Wind temperature measurement, taking Bernoulli effect and kinetic theory into account
22 p4009 A70-42525

Boundary geometry of region with fluid motions harmonic functions obeying Bernoulli law containing free surface curvature
23 p4218 A70-44337

BERYLLIUM

NT BERYLLIUM 9

NT BERYLLIUM 10

Low speed Ga lubricated sliding electrical contacts of Be in vacuum, discussing Ga film role in friction and contact resistance
01 p0099 A70-10325

Beryllium properties and processing including magnesianothermal reduction, power purity, oxygen content, grain size and temperature effects on mechanical properties
01 p0124 A70-11618

Be oxidation in carbon dioxide at high temperatures, explaining observed kinetic discontinuity in terms of oxide morphology
01 p0124 A70-11638

Ingot and powder metallurgy polycrystalline Be flow and fracture behavior and microstructure pressure dependence at room temperature
02 p0317 A70-12318

Case hardened steels structure and properties, intermetallic phases, hardness variation with depth and hardening techniques by Be and B
03 p0510 A70-13351

Shear testing and data reduction based on torsion analysis to obtain elastic shear constants of thin orthotropic Be sheets
04 p0664 A70-15552

Beryllium single crystals deformation under high pressures at room temperature similar to deformation under atmospheric pressure at elevated temperatures
05 p0863 A70-16203

Atmospheric contamination due to Be solid propellant exhaust products, discussing pollution levels, governmental restrictions on testing, etc
[AIAA PAPER 70-117] 06 p0997 A70-18085

Be atoms effect on lattice structure of three component sodium oxide-beryllia-silicate glasses using IR absorption spectra
07 p1315 A70-18704

Oxide transport and water vapor effects on flash-heated beryllium droplet combustion
10 p1969 A70-25042

High purity beryllium dynamic tests determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/for elastic pulses
[AIAA PAPER 69-360] 11 p2066 A70-25964

Isotropic Be billet fabrication by gas pressure consolidation and pressureless sintering techniques
12 p2252 A70-26888

Beryllium proportional counters for satellite X ray astronomy, noting long term stability and environmental resistance
12 p2232 A70-27403

Cleavage cracks initiation and propagation in basal plane of Be single crystals, determining propagation energy as function of temperature, purity and alloying
12 p2256 A70-27614

Surface oxidation effects on thermionic work functions of Be determined by visual observation and X ray diffraction patterns analysis
12 p2288 A70-28004

Plastic deformation of Be single crystals under hydrostatic pressure, considering resolved shear stresses on glide systems
14 p2595 A70-30334

Al and Be single particles combustion in various oxidizers, using pulsed Nd-glass laser and Xe flash heating device and scanning electron microscope
14 p2628 A70-30949

Beryllium fibers and Al matrix interactions at high temperatures and various durations, investigating diffusion by X ray diffraction, electron microscope and microprobe analysis
15 p2757 A70-31812

Polygonized and cellular Be structures formation, examining temperature, strain, annealing and material purity effects
15 p2758 A70-32122

F-4 Be rudders design and tests compared to Al structure
[ASM PAPER W70-12.4] 15 p2676 A70-32336

Bend formability and fracture toughness tests on Be ingot and cross-rolled powdered sheet and brake grade block materials
[ASM PAPER W70-15.3] 15 p2760 A70-32337

Beryllium mirrors optical performance, describing causes and effects of anisotropy and dimensional instability
16 p2904 A70-33146

Lamellar and fibrous Be-reinforced epoxy resin and metal matrix composites, describing preparation and properties
16 p2939 A70-33693

Metallographic observations on slow crack growth in Be monocrystals suggesting explanation for transition regions
16 p2933 A70-32475

Crack initiation in wrought polycrystalline Be sheet, investigating three point loaded bend fractures of powder and ingot samples by optical and electron microscopy
17 p3122 A70-34551

Fine grained Be structure and mechanical properties under tensile deformation at temperatures from 20 to 1000 C
18 p3276 A70-36311

Residual stress of electroless nickel deposits on beryllium from bow deformation measurements, noting role of phosphorus content
19 p3451 A70-37708

Ti-Be composite materials production by coextrusion of powders, investigating microstructure by microprobe analysis and X ray diffraction
20 p3649 A70-39945

Be production, development, potential uses and properties
[ASM PAPER GG8-102] 20 p3650 A70-39970

Beryllium use in inertial navigation as stable platform structure and control gyro, discussing physical properties, design concept, fabrication, service, cost and tradeoffs
20 p3639 A70-40451

Beryllium orbital diamagnetic susceptibility calculated by pseudopotential method compared to experimental data
23 p4208 A70-44886

- High purity Be preparation by Kroll process using Na as reductant, noting mechanical properties and ease of conversion to powder 24 p4341 A70-45242
- BERYLLIUM ALLOYS**
Be-Al-Ti system liquidus surfaces and invariant equilibria by chemical, thermal, X ray and microscopic methods, discussing phase diagrams 14 p2595 A70-30839
Temperature effect on radiation characteristics and cryogenic tensile properties of irradiated Be, Ti and Al alloys 20 p3647 A70-39111
Al-Be eutectic alloys structure, using laue X ray method and electron microscopy in studying fibrous morphology due to unidirectional solidification 24 p4356 A70-45143
- BERYLLIUM COMPOUNDS**
NT BERYLLIUM FLUORIDES
NT BERYLLIUM NITRIDES
NT BERYLLIUM OXIDES
Beryllium sulfate effect on rabbits vascular plasma volumes, using albumin method for blood groups 15 p2681 A70-31884
- BERYLLIUM FLUORIDES**
Solid and liquid lithium tetrafluoroberyllate enthalpy relative to 273 K measured at temperatures between 323-873 K, deriving thermodynamic properties 04 p0646 A70-14583
- BERYLLIUM ISOTOPES**
NT BERYLLIUM 9
NT BERYLLIUM 10
BERYLLIUM NITRIDES
Alpha beryllium nitride enthalpy and thermodynamic properties measured between 273-1173 K using drop calorimetric method 04 p0646 A70-14582
- BERYLLIUM OXIDES**
BeO whiskers formation on burning Be droplets surface using scanning electron microscopy, noting temperature effects 02 p0318 A70-12641
Normal incidence reflectance of BeO single crystals, analyzing data by Kramers-Kronig inversion for dielectric function and energy loss function 05 p0891 A70-16047
Ar ion laser performance improvement by using beryllia for sealed-off discharge tube 09 p1699 A70-23443
- BERYLLIUM POISONING**
Toxicity and downwind diffusion of Be rocket exhaust product measurements, using ADOBE experiment and AFRPL micromet meteorological data system 14 p2628 A70-30611
- BERYLLIUM 9**
Solar neutrons detection from recording high energy electrons in reactions, using Li 7, Be 9 and B 11 as detectors 05 p0899 A70-15964
- BERYLLIUM 10**
Cosmic ray lifetime, investigating radioactive Be 10 nuclei decay effects on intensity ratios Be/B and Be/Li, suggesting nuclei confinement to galactic disk 19 p3509 A70-38148
- BESSEL FUNCTIONS**
NT HANKEL FUNCTIONS
Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties 03 p0608 A70-14304
Bessel generalized polynomial series convergence and summability on contour of convergence region 11 p2071 A70-25521
Relationship between fundamental matrices of solutions to boundary value problems of parabolic and elliptical systems with Bessel functions 13 p2441 A70-29314
Computer program for two body problem literal series expansions using Kepler functions with Bessel and Poisson series operation 14 p2638 A70-30702
Zero order Bessel function fringe shape measurement for holographic sinusoidal vibration fringes 17 p3087 A70-35020
Spherical Bessel functions fast generation recurrence technique, presenting real or complex arguments 22 p4062 A70-42920
- BESSEL-BREDICHIN THEORY**
Particle ejection moments from tail of comet Ikeya-Seki determined from photographs having visible terminal synchroes 06 p1140 A70-17732
- BETA PARTICLES**
Two phase density and void fraction measurement using beta, gamma and X ray radiation, considering optimal accuracy and beam collimation 02 p0305 A70-12835
Parachute-borne densitometer using forward scattering of low energy beta particles for direct measurement of atmospheric density at 30-60 km [AAS PAPER 69-570] 04 p0687 A70-14654
- Atmospheric ionization by beta particles due to fission product decay, showing diagram for magnetic shell parameters and postfission periods 04 p0743 A70-15739
Cosine dependence of F 1 critical characteristics on solar zenith angle discriminating alpha neutralization and mixed alpha-beta deionization 06 p1057 A70-17841
Neutron beta decay in strong quantizing magnetic field using Dirac wave function for electron, noting lifetime dependence on field strength 08 p1549 A70-21744
Permeability disturbances in skin capillaries of rabbits and rats following exposure to Sr90-Y90 beta radiation 09 p1619 A70-22789
Electron-neutrino weak interaction and beat decay coupling constants found nearly equal, describing astrophysical tests based on white dwarf stars luminosity intervals 09 p1733 A70-23451
Atmospheric ionization by beta particles due to fission product decay, showing diagram for magnetic shell parameters and postfission periods 14 p2632 A70-30823
Coating thickness measurement and analysis by radioisotope techniques including beta-particle, X or gamma ray backscatter and X ray fluorescence and absorption 15 p2742 A70-32780
Inverse beta decay thermonuclear reactions induced by neutrinos proposed for neutrino detection from solar interior 20 p3704 A70-39471
- BETATONS**
Nondestructive betatron radiographic testing techniques for Ti billets, evaluating various lead screen, film and geometry combinations 08 p1508 A70-21746
Energy spectrum of electrons accelerated in linear plasma betatron close to potential compared to cyclic betatron results 13 p2463 A70-29379
High current betatrons for defectoscopy of manufactured articles and materials compared with other radiation sources 24 p4348 A70-45846
Betatron monoenergetic electron beams in radiometric, spectrometric and radiographic testing of composite materials 24 p4339 A70-45850
- BETHE-SALPETER EQUATION**
Radiation transfer problem in waveguide with statistically uneven walls reduced to Dyson and Bethe-Salpeter equations in quantum field theory 03 p0524 A70-13066
- BIAS**
NT RESPONSE BIAS
Antenna biasing with DC field to improve power handling capacity tested on U-slot and helical antennas 02 p0269 A70-12595
Bias-free estimation of linear process in recursive filtering, avoiding numerical inaccuracies introduced by computations with vectors and matrices 02 p0273 A70-12730
Biased measurement of angular coordinates of phase modulated signals under meter input quantization 11 p2012 A70-26806
Loran C coordinates bias function determination by regression analysis using observed time differences 14 p2615 A70-31195
Extrinsic photoconductive detectors, comparing performance for microwave and DC bias based on gain bandwidth product and SNR analysis 18 p3232 A70-36746
Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability 20 p3659 A70-40261
Temperature and bias voltage dependence of zero bias tunneling structure in p-type GaAs-Au Schottky junctions 21 p3863 A70-41917
Optimal control of magnetic torque for bias momentum removal from attitude controller, discussing applications to Skylab 23 p4258 A70-44503
- BIBLIOGRAPHIES**
Gunn effect bibliography supplement /1960-1968/ 01 p0159 A70-10799
Water immersion for weightlessness simulation, presenting annotated bibliography covering physiological responses, human performance and simulation techniques and facilities 01 p0038 A70-10965
Soviet bibliography on heat and mass transfer covering thermodynamics, heat conduction, convection and radiation, phase and chemical transitions, aerodynamics, geophysics, etc 03 p0605 A70-13392
Annotated bibliography of laser eye hazards 03 p0434 A70-13680
- Soviet bibliography on heat and mass transfer covering thermodynamics, heat conduction, convective and radiant heat transfer, phase and chemical transformations, combustion, etc 05 p0957 A70-16297
German bibliography on astronomy for 1968 covering astrophysics, astronomical instruments, position determination, solar, terrestrial, planetary and lunar and stellar astronomy, etc 08 p1580 A70-21700
Abstracts with references to literature sources on oceanography from space and aircraft 09 p1665 A70-22014
Soviet bibliography on aviation, high altitude and space biology and medicine 09 p1615 A70-22204
Bibliographies for AIAA technical disciplines 09 p1792 A70-22344
Bibliography of literature on bioengineering, biocontrol, medical physics, biotechnology, safety and human factors in technology 09 p1629 A70-23692
Bibliography for powder metallurgy and related fields covering powder fabrication, compacting and sintering, refractory metals, hard materials, etc 10 p1904 A70-24387
Mechanics of continuous media for noncanonical regions, surveying Soviet literature on stress concentration near shell holes, elasticity theory, fluid aerohydroelasticity, etc 10 p1965 A70-25319
Aeronautics and astronautics bibliographies for college students 12 p2336 A70-27666
Soviet literature on galactic origins and physics including radio emission, star formation, quasars, nuclei activity, etc 12 p2307 A70-27868
Lubrication literature covering rolling bearings, fluid films, seals, automotive, gear and metalworking lubricants, boundary lubrication, friction and wear 13 p2419 A70-29150
Bibliography of far IR spectroscopy with subject index 14 p2586 A70-30987
Graph theory in Soviet literature, applications and bibliographies 14 p2600 A70-31421
Powder metallurgy literature /1968-69/ covering metal powders, sintering, porous materials, etc 15 p2760 A70-32349
Relativistic gravitation theory and experimentation, surveying literature on gravity waves, EM propagation, gyroscopic precession, etc 16 p2973 A70-33230
Thermal radiation configuration factors tables giving reference sources, discussing historical development of factors [AIAA PAPER 70-814] 16 p3002 A70-33947
Boundary layer theory development in U.S.S.R., surveying findings and papers 17 p3067 A70-34662
Solar wind interaction with earth, moon, Venus and Mars, reviewing literature on continuum fluid model, spacecraft observations, plasma characteristics, etc 17 p3150 A70-34669
Cryogenic temperature measurement including metallic and semiconductor resistance thermometers, thermocouples and bibliography 17 p3082 A70-34740
Nonideal plasma thermodynamics data, discussing particle interactions, Coulomb potential, stability, etc 17 p3142 A70-35733
Discrete automatic control theories, including linear, nonlinear, feedback, optimal and adaptive systems and bibliographies 18 p3235 A70-36626
Passive type stable test platforms /slabs/ covering configurations, foundations, vibration isolation, environmental effects, etc 20 p3605 A70-39569
Biographical guide for literature concerning chemical evolution and origin of life 23 p4148 A70-44842
Ferrite junction microwave circulator bibliography /1956-1969/ covering stripline and waveguide versions theory, designs, constructions and applications 24 p4318 A70-45210
Cumulative reference list of published books on microelectronics and reliability 24 p4322 A70-46014
- BICARBONATES**
U CARBONATES
BICRYSTALS
Sintering processes using boundary porosity in welded Nb bicrystal for model of final stages 13 p2434 A70-29081
- BIHARMONIC EQUATIONS**
Fourier transform applied to Riemann boundary value solution to biharmonic equation governing elastic theory for half plane with circular protrusion or indentation 01 p0199 A70-10155

- Alternating direction implicit difference schemes for solving Laplace and biharmonic elliptic equations
03 p0518 A70-13026
- Dirichlet problem of biharmonic operator in boundary region containing infinite number of pieces
05 p0877 A70-16878
- Wedge with symmetric crack at vertex in plane elastostatics, solving biharmonic equation by Wiener-Hopf technique
06 p1164 A70-17441
- Optimal control for distributed parameter systems described by biharmonic linear partial differential equation using dynamic programming
07 p1244 A70-18843
- Biharmonic equation in polar coordinates solved for circular plates and plate sectors with various boundary conditions, using finite difference approximations
08 p1589 A70-21246
- Biharmonic boundary value problems with re-entrant boundaries, comparing Motz and Woods finite difference solution methods
09 p1711 A70-22285
- Biharmonic equation numerical solution by finite differences, discussing outer and inner iteration schemes
14 p2599 A70-30647
- Boundary value problems of biharmonic finite difference equation in rectangular domain, deriving calculation formulas for summary representations solution method
15 p2814 A70-31583
- Reduced dissipation of biharmonic oscillations, examining dynamic model under force and kinematic harmonic perturbation
18 p3344 A70-37070
- BILLETS**
- Nondestructive betatron radiographic testing techniques for Ti billets, evaluating various lead screen, film and geometry combinations
08 p1508 A70-21746
- Isotropic Be billet fabrication by gas pressure consolidation and pressureless sintering techniques
12 p2252 A70-26888
- BIMETALS**
- Rolled bimetallic Ni-Mo mechanical properties produced by powder metallurgy methods
01 p0116 A70-10157
- Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents [AIAA PAPER 69-425]
06 p1128 A70-17179
- Welding techniques for Nb-stainless steel bimetal tubing for liquid metal containment, determining structural integrity and bond interface condition after thermal cycling
10 p1897 A70-25309
- Thermal stability of simply supported bimetallic shallow spherical shell, considering rotationally symmetric deflection modes
14 p2657 A70-30845
- Soviet monograph on bimetal and refractory metals production by rolling in vacuum or inert media
19 p3433 A70-37402
- Cu-Ni diffusion couples voids and edges effect on concentration gradients measurement by electron probe microanalysis
22 p4054 A70-42740
- Strained state of Ti and steel sheets during unsymmetric rolling, constructing deformed metal particles displacements rates field based on ideal fluid motion equations
22 p4045 A70-42814
- BINARY ALLOYS**
- Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness
01 p0124 A70-11617
- Quenched Ti-Mn alloy omega transition phase microstructure characteristics by transmission electron microscopy using thin foils
01 p0125 A70-11639
- Ti-Mn alloy quenched in brine and aged at high temperature studied for structural transformations using electron microscope
01 p0125 A70-11640
- Co-Cr alloy oxidation behavior at high temperatures and various oxygen pressures
02 p0319 A70-12720
- Mo separation from W during chemical analysis of W in binary Mo-W alloys, using organic reagents for precipitation and extraction
03 p0504 A70-12982
- Nb binary and tertiary alloys density changes found proportional to alloying element content
03 p0511 A70-13489
- Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys
03 p0512 A70-13855
- Heat treatment produced semicoherent and incoherent precipitations diminished susceptibility to stress corrosion cracking of aluminum binary and ternary alloys
04 p0708 A70-15370

- Binary Al-Y system thermal and microstructural analyses at room temperature and 200 C, obtaining partial diagram and mechanical properties
05 p0864 A70-16546
- Disordered ferromagnetic binary alloys of transition metals magnetic moment distributions based on thermal neutron scattering experiments
05 p0893 A70-16950
- Mn-Bi films Curie point switching with laser, measuring magnetization dependence via magneto-optic effect [IEEE PAPER 9.3]
05 p0893 A70-16997
- Solid solution softening in bcc Ta-Re alloy system attributed to substitutional-interstitial interaction
07 p1310 A70-19736
- Knudsen effusion cells high temperature uses, discussing binary alloys phase boundary determination and volume and surface diffusion studies
07 p1424 A70-19900
- Pyrolytic C-TiC alloys obtained by precipitation from gaseous phase, discussing microstructural properties anisotropy
08 p1517 A70-21146
- Binary and ternary systems phase diagrams construction by diffusion layer method and X ray analysis, studying concentration dependence of diffusion coefficient
09 p1703 A70-22564
- Mechanical and physical properties of Nb-Ti binary annealed alloys as function of compound NbTi using microscopic and X ray phase analysis
09 p1704 A70-22755
- Ordered Ni8Ta phase in nickel-rich binary alloy using electron microscopy and diffraction analysis
09 p1705 A70-22808
- Optical properties of beta prime phase CoAl, CoGa and NiGa as functions of composition and photon energy
10 p1919 A70-23986
- Vapor pressure of binary alloys with volatile components measured by combined Knudsen-torsion method, using thermal balance in vacuum
11 p2065 A70-25773
- Fe-Cr system and Fe-Cr-Ni liquid alloys studied by Knudsen cell-mass spectrometer combination, deriving phase equilibria from ion current ratios
12 p2255 A70-27602
- Dispersion strengthened Ni-Cr alloys elastic and plastic properties at room temperature, studying preferred crystallographic orientation effect
12 p2255 A70-27609
- Binary and ternary Mg alloys ductile fracture mechanism, studying coherent/noncoherent particles effects
12 p2256 A70-27612
- Alloy oxidation at high temperatures emphasizing binary and ternary alloys
12 p2257 A70-28005
- Interstitial atoms arrangement in binary alloys with body centered lattice, describing pressure effects by statistical theory
13 p2435 A70-29321
- Metallic thermoelectric materials, measuring electrical resistivities and Seebeck coefficients of binary Ni alloys
14 p2533 A70-30530
- Binary Co-In system thermal analysis, X ray diffraction and microscopy, discussing phase diagram
14 p2595 A70-30838
- Binary titanium-oxygen and titanium-carbon alloys, investigating interstitial pair mechanism for internal friction peak formation
17 p3115 A70-34383
- Ti interaction with elements of periodic systems, considering binary system phase diagrams
17 p3115 A70-34384
- Ti binary alloys beta phase continuous cooling transformation, investigating additives effects
17 p3118 A70-34408
- Martensitic transformation effects on mechanical properties of beta quenched Ti binary alloys
17 p3119 A70-34414
- Two-component metal coatings on Ni alloys for gaseous corrosion resistance increase, comparing microstructure and properties
17 p3125 A70-35393
- Cobalt binary alloys allotropic transformation and thermal expansion at various temperatures
18 p3271 A70-35967
- Ti-Al binary and Ti-Al-X ternary alloys grain boundary precipitation kinetics and correlation with mechanical properties
18 p3272 A70-36035
- Aligned composite materials preparation by unidirectional lamellar eutectoid decomposition in Co-Si, Cu-Al, Ni-In and in supersaturated solid solution Sn in Pb
18 p3274 A70-36052
- Fe-Ni alloy alpha-gamma phase transformation after heating, noting deformation planes and directions in martensite
18 p3275 A70-36204

- Electron microscopic investigation of alpha-epsilon iron phase transformations in Co-Ni alloys above and under phase equilibrium temperature
18 p3276 A70-36205
- Ti binary alloys with V, Nb and Mo, determining phase boundaries by diffusion layers method and electron microscope analysis
20 p3649 A70-39727
- Electron states localization in disordered binary alloys, describing band structure
20 p3687 A70-40498
- Zr-Nb alloys mechanical strength increase due to beta phase martensitic decomposition
21 p3840 A70-41897
- Allotropic transformation points and linear thermal expansion coefficients of Co-base binary alloy terminal solutions, using dilatometric method
23 p4203 A70-43864
- Self flammability temperature of binary alloy Al-Si powders in aerosol state as function of chemical and phase compositions
23 p4205 A70-44046
- Zr-Cu alloys corrosion resistance in carbon dioxide at high temperatures, noting composition effect on behavior
23 p4208 A70-44875
- Ni-Nb-W and Ni-W alloys phase equilibrium, obtaining diagrams from analysis of liquid and solid phases separated electromagnetically before tempering
24 p4359 A70-45372
- Longitudinal phenomena and two phase structures effect on ductility of low carbon steel-chromium subjected to high temperature torsion
24 p4361 A70-46173
- BINARY CODES**
- Circuit and operation of transistorized RF power attenuator with linear attenuation and binary code control by digital computer
06 p1022 A70-17777
- Capacity and error bounds derived for nonsynchronized channel, discussing binary coding strategy
06 p1012 A70-18623
- Pseudonoise sequence generation with 3-tap linear feedback binary shift registers, citing reduction theorems
11 p2025 A70-26224
- Digital-to-analog converter for voltage representation of signals in 2-4-2-1 binary decimal code
12 p2235 A70-27681
- Binary code distortion in relative phase telegraphy signals under wideband and correlated noise
13 p2364 A70-28870
- Analog computer simulation of command signal detectors for reconstruction of transmitted binary character from noisy binary coded signal
13 p2385 A70-29560
- Noise rejection during synchronous quasi-coherent radio signal reception with binary narrow band linear filter used for voltage shaping
13 p2369 A70-29737
- Noise rejection for optimal reception of incoherent binary signals in one beam Rayleigh dispersion radio channel under ionospheric electron density fluctuations
13 p2369 A70-29738
- Binary division by logic gates cellular arrays, noting accuracy and operating speed
14 p2556 A70-30517
- Rank order statistics for optimum detection of binary pulsed signals in white noise and DC drift
14 p2551 A70-31122
- Image processing and picture enhancement by computer, using fast binary log-antilog conversion
15 p2768 A70-32567
- Binary coded radar signal autocorrelation function main-to-sidelobe ratio improvement, using echo signal processed in mismatched filter
17 p3043 A70-34590
- Lower reliability estimates for block codes of binary channels with feedback noise
18 p2325 A70-36599
- Single-error nongroup binary codes with maximum codewords, including quadratic residue, Reed-Muller and triple-error constructions
24 p4313 A70-46057
- Sequential decoder program for low weight codewords in binary convolutional code over one-half constraint length
24 p4313 A70-46065
- Suboptimum sequential algorithm for recovery decoding errors in convolutional codes, using Hamming distance criterion
24 p4314 A70-46066
- BINARY DATA**
- Binary systems noise resistance with various cross correlation functions and indefinite moment of arrival
03 p0448 A70-13512
- Binary decoding extension to achieve unquantized demodulation performance for nonfading phase shift keyed coherent channel with white Gaussian noise
06 p1008 A70-17525

- Output autocorrelation properties of ideal limiters driven by binary deterministic signal plus stationary zero-mean Gaussian noise
06 p1013 A70-18625
- Communication channel average binary error and stationary Markov chain state probabilities relationship, using mathematical model and HF ionospheric FSK error sequence measurement
08 p1458 A70-20793
- UHF satellite receiver for binary FSK data collection system using matched integrate and dump filter detectors
08 p1459 A70-20804
- Bit error probability after decoding for binary perfect single error correcting codes
11 p2014 A70-26247
- Decision directed receiver with unknown a priori probabilities, obtaining tight bound on runaway for binary and multiple signal detection
14 p2554 A70-31117
- Optimum adaptive reception for binary sequences, using posteriori probability density function computing device synthesized from correlator, instantaneous nonlinearity and multiplier
14 p2552 A70-31188
- Binary data system parameters sudden change detection by noisy observation based on Bayes criterion
17 p3056 A70-34856
- Computer generated holograms, using binary transmittance for wave fronts and three dimensional images construction
17 p3085 A70-35006
- Cyclic block code structures for generating binary sequences with good autocorrelation properties
19 p3375 A70-37284
- Existence theorem concerning arbitrarily long good binary block /nonlinear/ codes preserved under large permutation groups
20 p3594 A70-39974
- Rank permutation codes equivalence to binary code class capable of generation and detection through direct and inverse transformations respectively
20 p3594 A70-39975
- Frequency synchronization channel pulse fluctuations effect on noise stability of binary signal reception
20 p3587 A70-40145
- Statistical pattern recognition and threshold learning in signal detection of noisy binary pulses
21 p3794 A70-41332
- Binary codes linear metric properties description reduced to finite set determination by convex programming procedure
22 p3993 A70-42494
- Binary data transmission via radio channel, discussing phase and frequency modulation and error probability as SNR function
23 p4159 A70-43756
- BINARY DIGITS**
Binary digital radar signal detectors optimization for radiation pattern of sin x/x radar antenna and for non-fluctuating target
02 p0255 A70-11899
- Quasi-logarithmic readout of conventional binary scaler provided by reduced logic system following generalized equations
05 p0851 A70-16844
- Book on numerical control covering principles, electromechanical system using digital logic circuits, binary numbers and arithmetic, etc
10 p1854 A70-24023
- Optimum binary digital detector of radar targets, using confidence ratio as criterion of target presence
12 p2182 A70-26890
- BINARY FLUIDS**
System of equations describing isothermal two phase-two component fluid flows with negligible dissipation effects, emphasizing slug flow
02 p0288 A70-12856
- Shock wave width and temperature expressions for argon-helium mixture
04 p0672 A70-15223
- Electrically heated wire diameter and orientation on heat flux in saturated pool and surface boilings of water and aqueous binary mixtures
07 p1417 A70-18643
- Oscillatory relaxation of binary system of heat conducting viscous gases composed of nonspherical molecules
08 p1547 A70-21085
- Shock wave structure in binary mixture of monoatomic gases based on integral kinetic equations, using iteration process
08 p1483 A70-21086
- Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation
08 p1486 A70-21808
- Thermal conductivity of monatomic binary gas mixtures at moderately low temperatures and pressures, considering various Ar-He mixtures
11 p2147 A70-25755
- Heat conductivity of Xe-He binary gas mixtures, allowing for molecular transfer and polarity effects
15 p2827 A70-32107
- Bubble frequencies random distribution during boiling of pure liquids and binary liquid mixtures by optical measurement
21 p3941 A70-40775
- Critical heat flux during forced pipe flow of boiling ethanol-water and acetone-water binary mixtures
23 p4283 A70-44730
- BINARY MIXTURES**
NT BINARY FLUIDS
NT EUTECTIC ALLOYS
NT EUTECTICS
Phase diagrams for binary mixtures at high pressures suggesting layered structures existence in Jupiter and Saturn atmospheres resulting from phase separations in hydrogen-helium mixture
02 p0368 A70-11819
- Gas diffusion coefficients for He-N and nitrogen-carbon dioxide systems in diffusion cell utilizing porous stainless steel barrier
04 p0780 A70-14710
- Free electron formation ahead of strong shock waves traveling into nitrogen-oxygen mixtures in shock tube, observing electron densities
06 p1065 A70-18029
- [AIAA PAPER 70-83] Boltzmann equation for binary mixtures of rarefied gases solution involving specific expansion of distribution functions
06 p1047 A70-18311
- Shock structure in binary gas mixture, discussing governing equations and Chapman-Enskog procedure
06 p1051 A70-18344
- Binary mixture molecular beam apparatus combining aerodynamic acceleration and arc heating techniques, discussing particle energy and density
07 p1341 A70-20106
- Bromine monoxide formation by atomic oxygen-bromine reaction in flash photolysis of bromine-nitrous oxide and bromine-nitrogen dioxide mixtures
08 p1455 A70-21342
- Weak plane waves propagation in binary mixtures of diatomic gases subject to vibrational relaxation, solving piston problem in acoustic approximation
12 p2209 A70-27151
- Translational spectral bands of compressed rare gas binary mixtures, considering mass and temperature effects
12 p2275 A70-27172
- Approximate formula for viscosity of binary polar gas mixtures confirmed for unlike cross sections
16 p2996 A70-33055
- Hypersonic flow of chemically reacting binary mixture of oxygen atoms and molecules past blunt body, presenting viscous shock layer equations and slip boundary conditions
17 p3005 A70-34458
- [AIAA PAPER 70-805] Rarefied binary gas mixture transient Couette flow, considering nonlinear case of plate with equal temperature accelerated impulsively
17 p3067 A70-34546
- Linear corrections formulas for shear stress and heat transfer coefficients associated with boundary layer blowing in binary gas mixture
21 p3748 A70-42207
- Binary gas mixture separation effects by centrifugation in cylindrical tube, calculating maximum radial concentration difference between wall and axis by numerical integration
23 p4181 A70-44206
- Rarefied binary gas mixture, determining temperature gradient effect under various pressures
23 p4284 A70-44984
- Two incompressible isotropic nonlinear elastic solids mixture, investigating entropy production inequality effects
24 p4425 A70-45991
- BINARY STARS**
NT ECLIPSING BINARY STARS
White dwarfs formation in close binary systems ascribed to mass exchange between components, describing evolutionary followup of primary from main sequence by model
01 p0189 A70-11343
- Gravitational finite propagation velocity effects in celestial mechanics, describing binary star motion studies
02 p0380 A70-12783
- Hypotheses for symbiotic stars nature, emphasizing binary with late type giant and hot small star components
03 p0568 A70-13325
- Psi Orionis light variations, using photoelectric photometry, indicating ellipsoidal variability
03 p0570 A70-13552
- Binary star formation using singular solution of Kepler problem in general theory of relativity
04 p0755 A70-15355
- Right ascension and flux density of source in Crab Nebula measured at meter wavelengths, evaluating spectrum and relative position to binary star center
05 p0917 A70-16908
- Binary star frequency and orbital axes distribution, discussing visual orbits, mass ratios, photometrical detection, etc
06 p1138 A70-17308
- Stellar interferometer with superposed beams designed for measurements of close binaries, showing point light modulation convenient for photoelectric recording
08 p1493 A70-20564
- Binary star spectrum analysis establishing seasonal and season-to-season variations in He II emission band intensity and shift toward long wave region
08 p1569 A70-20827
- Cygnus and Perseus symbiotic stars as binaries, studying radial velocities, relative emission line intensities and energy distribution
08 p1569 A70-20830
- Potential flow pertaining to motion of gas surrounding close binary systems generated by orbital motion of stars and matter outflow from stars
10 p1946 A70-24968
- Mass transfer in close binary stars and in highly variable stars
12 p2306 A70-27858
- Stellar intensity interferometer for close binaries and emission line stars, investigating gamma-two Velorum
14 p2640 A70-30733
- Runaway stars and pulsars near Crab Nebula, discussing binary system explosion and remnant motion
14 p2642 A70-30894
- Binary AX Monocerotis brightness variations in UV from photoelectric UVB observations
15 p2796 A70-31610
- Stellar interferometer with superposed beams designed for measurements of close binaries, showing point light modulation convenient for photoelectric recording
15 p2742 A70-32719
- Orbit and component velocities of double line spectroscopic binary HR4072 on high dispersion spectrograms, noting mass ratio close to Guthrie relation
16 p2976 A70-33786
- Frequency spectra of gravitational waves radiated from celestial phenomena, suggesting mass exchange in binary containing neutron star
17 p3067 A70-34619
- Zero moments surface in problem of two immovable centers, taking into account cosmic dust accumulation before binary apex moving forward with periastron of bright component
18 p3324 A70-37147
- Visual binary stars orbits computation catalog from data obtained in 1939-1969 period
19 p3530 A70-38895
- Binary stars dynamical parallaxes, masses, absolute magnitudes and provisional orbits, fitting deduced masses into empirical visual mass-luminosity relations
19 p3531 A70-38896
- Stellar evolution covering formation, structure and time-varying properties of single spherical, nonspherical, magnetic and binary stars
19 p3531 A70-38950
- Cygnus X-2 point X ray source, establishing as spectroscopic binary with peculiarities
21 p3875 A70-40682
- Sco X-1 radio emission models, considering possible binary nature and thermal bremsstrahlung
21 p3875 A70-40685
- Close binary stars evolution, discussing initial parameters effects on mass exchange and orbital period model
21 p3884 A70-40872
- Gravity darkening of tidally and nonuniformly rotating Roche components of close binary systems, calculating surface temperature and spectral distributions
21 p3888 A70-41120
- Circumstellar matter observations between binary star components, considering emission and absorption spectra, velocity and light curve distortion and orbital period changes
21 p3889 A70-41151
- Beta Cephei star discovery criteria, examining mu-mechanism theory by He and N overabundances, far UV flux, spectral line width and binary character
21 p3890 A70-41159
- Sirius components relative photographic positions and magnitude difference, discussing color effect, grating image separations and emulsion contraction
21 p3922 A70-41984
- Intrinsic polarization from Thomson scattering in binary systems with tidal distortions, taking into account gray atmosphere, axial rotation, gravitational interaction and radiative interaction
22 p4103 A70-42988
- Close binary star components axial rotation, considering synchronism, angular velocity and mass exchange
23 p4250 A70-44814
- Upper main sequence and close early type binaries evolution by fission of rapidly rotating protostars
23 p4250 A70-44815
- Synchronous close binary stars primary component structure, using rapidly rotating polytropic method
23 p4250 A70-44816
- Binary star axial rotational correlation, determining coupling between components spin angular momenta
23 p4250 A70-44817

- Stellar rotational velocities in open star clusters, noting evolutionary expansion, tidal coupling in binaries and Ap stars magnetic braking
23 p4251 A70-44820
- A type stars rotation, examining UVB color and rotational velocity relationship, spectral classification and spectroscopic binaries
23 p4251 A70-44822
- BINARY SYSTEMS [DIGITAL]**
U DIGITAL SYSTEMS
- BINARY SYSTEMS [MATERIALS]**
NT BINARY ALLOYS
NT BINARY FLUIDS
NT BINARY MIXTURES
NT EUTECTIC ALLOYS
NT EUTECTICS
- Two phase liquid-vapor system specific heat increase at temperatures approaching critical point, using nonanalytic vapor pressure equation with data for nitrogen and oxygen
04 p0780 A70-14584
- Relative motion of two spheroidal homogeneous rigid bodies of isolated binary system, obtaining potential energy
05 p0880 A70-15760
- Binary system Mo-C determined in temperature range 1250-2270 C, using microscopic and thermal analyses and microhardness testing
05 p0862 A70-16198
- Binary transition metal hydrides consisting of single metal and single hydrogen isotope, discussing preparation and kinetic, thermodynamic and structural properties
05 p0863 A70-16523
- Alpha and beta solid solutions chemical composition in two phase alloys of Ti-Al-Mo and Ti-Al-V determined by electron microprobe analyzer
05 p0864 A70-16549
- Binary CdSb-CdTe systems investigated by X ray and microstructural analyses, showing mechanical mixture constitution and p-type conductivity
07 p1355 A70-18701
- Elastic fields in bimaterial plate under uniform compressive and anti-plane shear loadings, finding stress distribution and induced interfacial shear stresses
07 p1412 A70-19957
- Radar model of shower and hail clouds as two phase system of independently scattering spherical particles, stressing radar properties dependence on particle properties
08 p1536 A70-21097
- Elastic oscillations amplitude-dependent damping during phase transformations in two phase systems
08 p1556 A70-21121
- Enthalpy-entropy, enthalpy-pressure and composition diagrams of fluorine-hydrogen system, noting possible applications to rocket propulsion systems
10 p1929 A70-25100
- Copper alloy composite reinforced by unidirectional solidification of pseudobinary eutectic Cu-ZrCuSi, discussing mechanical properties and electrical conductivity
11 p2066 A70-25775
- Solid-gas phase equilibria of binary systems related to cryogenics
12 p2329 A70-27023
- Titanium base binary systems phase diagrams, describing component activity and compound phases heat of formation
17 p3114 A70-34379
- Nitrogen solubility calculation in transition metals liquid binary systems, using quasi-chemical model
18 p3273 A70-36045
- Binary Nb vapor systems mutual diffusion coefficients concentration and temperature dependences, discussing interatomic bonds and melting point of alloys
19 p3454 A70-38715
- Cd-Se and Cd-Te systems phase diagrams based on regular solutions theory, discussing molecular interaction energy dependence on composition
22 p4085 A70-42678
- Oxides compounds heats of formation isocomponent and primary product composition relationship in binary systems
22 p3982 A70-42679
- Dynamic elastic moduli of model two phase continuous composites, using polymer and metallic foams
22 p4059 A70-43077
- Solid solutions of quasi-binary cross section CdP-CdTe and ZnP-CdTe, using X ray, thermal, microstructural and microhardness analyses
22 p4086 A70-43132
- BINAURAL HEARING**
Loudness lateralization of acoustic signals in right and left ear during binaural interaction
12 p2174 A70-28357
- BINDERS [ADHESIVES]**
U ADHESIVES
- BINDERS [MATERIALS]**
NT PROPELLANT BINDERS
NT SOLID ROCKET BINDERS
- Rational design of structurally anisotropic plane multilayer plates with weak binder, suggesting

- strengthening fibers orientation in internal stresses direction
03 p0516 A70-13379
- Silicon organic binding materials properties, assessing ethyl silicate-50 perspectives in fabrication of precision castings
08 p1506 A70-21144
- Fiberglass reinforcement effects on injection molded thermoplastics physical properties, noting role of binder and glass content
13 p2438 A70-29204
- Polymeric binders adhesion to glass fibers as function of type and chemical structure
16 p2938 A70-33379
- Binder wetting relation to solid film lubricant wear life
[ASLE PREPRINT 70AM 5A-3]
- Unidirectional fiberglass-reinforced plastic, investigating binder content and porosity effects on strength
21 p3841 A70-40647
- Energy absorption and dissipation in friction brakes, investigating brake lining polymer binder contribution through molecular reorientation, crystallinity increase and entropy decrease
24 p4342 A70-45585
- BINOCULAR VISION**
Binocular brightness mixing and autocorrelation function, discussing mathematical model, computer simulation and test results
01 p0025 A70-11053
- Human eye contribution to visual evoked responses under different color stimuli during all possible monocular and binocular combinations
05 p0801 A70-16382
- Macaque monkey stereoscopic vision, obtaining behavioral evidence by random dot stereoscopic patterns and finding cells sensitive to binocular depth in cortex
07 p1205 A70-19276
- Evoked potential /EP/ correlate of binocular depth perception in man, discussing responses to horizontal and vertical changes in retinal disparity
07 p1205 A70-19284
- Binocular fusion and rivalry effects on cortically evoked human potential, obtaining pattern characteristic responses to monocular stimulation
07 p1215 A70-20214
- Optic chiasm damage effects on human depth perception implying interhemispheric link for binocular integration in central vision
09 p1618 A70-22669
- Corpus callosum damage effects on human depth perception implying interhemispheric link for binocular integration in central vision
09 p1618 A70-22670
- Movement information from spatio-temporal integration in binocular-kinetic space perception of time varying optical inputs
09 p1618 A70-22672
- Visually evoked cortical potentials /VECP/ to different probe stimuli to suppressed human eye in binocular rivalry experiments, discussing eye dominance problems
09 p1618 A70-22674
- Choice reaction time task involving right or left hand button pressing in monocular and binocular visual response to directional commands by colored lights
11 p1990 A70-25830
- Neurophysiological framework for binocular single vision and depth discrimination, concerning construction of horopter for cat
14 p2539 A70-31348
- Binocular disparity detectors in human visual response to moving gratings confirmed by electrophysiological evidence
17 p3025 A70-35150
- Panum phenomenon explained by projection, attraction and figure ground psychological theories
19 p3366 A70-38505
- Lighting and background effects on human binocular color vision of signal lights in industry
19 p3366 A70-38923
- Visually evoked responses in man to different light stimuli intensities, noting marked increase in binocular over monocular visual response
22 p3972 A70-43408
- Stroboscopic stereophenomenon, investigating depth shift of oscillating target motion binocularly viewed for interocular luminance differences
23 p4147 A70-44781
- Binocular fundus reflectometry and plethysmography in rabbits and man after dye injection and in patients with carotid occlusion
24 p4310 A70-46345
- BINOMIAL THEOREM**
N binomial events approximations to high probabilities of overall success for reliability situations and mission accomplishment, including operations research implications
01 p0134 A70-11475

BIOACOUSTICS

- Loudness lateralization of acoustic signals in right and left ear during binaural interaction
12 p2174 A70-28357
- BIOASSAY**
Bioscience for recovered lunar samples, discussing Surveyor analyses, Lunar Receiving Laboratory methods and life detection using biological markers
01 p0042 A70-11637
- Microbiological assay procedures for spacecraft sterilization and tabulation of microorganisms found on Surveyor 7
05 p0808 A70-16705
- Human biological organism analysis based on physiological determination of regulating and control functions dependence on oscillatory properties
08 p1452 A70-21460
- Microdissection morphology of vestibular apparatus sensory regions in guinea pig, rabbit, cat, squirrel, monkey and man
10 p1811 A70-24200
- Electron microscope-thin film microprobe techniques in biomaterial studies of chemical segregation, species diffusion and small particle analysis
13 p2411 A70-29808
- Countercurrent sandwich type dialyzer for small animals, noting membrane support function and applicability to human use
13 p2360 A70-29950
- Viable organisms in Apollo 11 lunar fines, discussing tests, laboratory and sterile biological barrier system
21 p3911 A70-41634
- Computer system for ECG interpretation in hospital heart station
22 p3979 A70-43483
- Squid head cartilage properties in terms of light and electron microscopic appearance, amino acid composition and X ray diffraction
24 p4305 A70-46348
- BIOASTRONAUTICS**
Aerospace technology application to biomedical problems in astronautics
01 p0027 A70-11256
- Astronaut vestibular fitness determined from threshold labyrinthine tests on isolated horizontal and vertical semicircular canals
03 p0437 A70-14059
- Collection of papers on spaceflight radiological problems experimentation covering satellite data, dosimetry, solar flares, etc
06 p0989 A70-17259
- Solar proton flare dose rates, discussing tissue-equivalent-ionization-chamber /TEIC/ data usefulness in analyzing possible dose received by man behind shielding
06 p1134 A70-17265
- Spacecraft radiation environment, dosage and shielding problems, discussing high energy protons and electrons exposure hazards for astronauts and mission planning computer codes
06 p0991 A70-17273
- Biomedical concepts for aerospace engineering, discussing human body as self regulating system /homeostasis/ and physiological time regulator /circadian/
- Near zero magnetic fields effect on biological systems studied to determine terrestrial magnetic field absence effect on astronauts
06 p0992 A70-17315
- Bioastronautics and earth ecology, discussing environmental pollution, nutritional, microbiological and psychological problems
08 p1449 A70-20724
- Medicobiological approach to living conditions for sustained residence and human activity during prolonged space flights, describing sealed chamber experiment
18 p3350 A70-36757
- Biological compatibility problem in long duration space operation crew change, discussing human metabolic processes and difference effects
19 p3367 A70-37525
- Orbital biotechnology laboratory requirements concerning man systems integration, life support and protective systems
22 p3980 A70-43641
- Long term space flight crew habitation emphasizing food management, station housekeeping, personal hygiene and waste handling
22 p3980 A70-43644
- Astronaut biological parameters monitored under prolonged space flight conditions for rescue operations
23 p4154 A70-44622
- Calcium metabolic balance reports discrepancies with radiologic indications of astronaut bone loss
23 p4148 A70-44838
- Astronautics - IAF Conference, New York, October 1968, Volume 4, Bioastronautics
23 p4155 A70-45022

- Space biological exploration for determining life origin on earth, emphasizing extraterrestrial life possibilities on other planets 24 p4301 A70-46000
- BIOCHEMISTRY**
- NT BACTERIOLOGY
- NT BIOGEOCHEMISTRY
- NT ENZYMOLOGY
- NT PHYSIOCHEMISTRY
- Book on radiation biochemistry covering effects on biological tissue, nucleic acids, proteins, carbohydrates, lipids, hormones, vitamins, living cells, metabolism and toxic substances formation 01 p0011 A70-10030
- Soviet collection of articles on problems of brain biochemistry, Volume 4 01 p0017 A70-10504
- Book on chemical evolution of life covering molecular paleontology, prebiotic chemistry, membrane structures, molecular evolution and structure, etc 02 p0230 A70-11685
- Biochemical, electron microscopy and experimental medicine data indicating pathogenetic mechanism responsible for arteriosclerosis 03 p0431 A70-14278
- Biochemical disturbances during early myocardial ischemia, examining coronary sinus lactate and K levels using electrocardiographic correlation 06 p0997 A70-18406
- Peptide formation by stepwise tetramer-mediated condensation of alpha-amino acid as possible prebiotic process 07 p1204 A70-19202
- Chlorella species found to contain ergosterol as major sterol 09 p1616 A70-22330
- Mass spectrometric sequence determination of oligopeptides via acetylacetyl derivatives, giving reliable results with small peptides 09 p1630 A70-22976
- Anoxia effects on biochemical processes in human body, comparing chemical energy balances under aerobic and anaerobic conditions 10 p1821 A70-25082
- Structural and functional properties of phosphates in biochemical reactions, discussing linkages 14 p2544 A70-30346
- Molecular respiratory reflex and fluorescent signal in rabbits during hypoxia, determining redox kinetics of intracellular pyridine nucleotides 14 p2539 A70-31346
- Biological conversion of solar energy, discussing photosynthesis and nonphotosynthesis mechanisms 15 p2688 A70-31600
- Parental termini-daughter strand linkage in initiation of DNA replication in *Bacillus subtilis* after thymineless germination 16 p2847 A70-33060
- Systems design and instrumentation for chemical/biochemical space manufacturing at zero g, developing scaling laws for transition to larger production units 16 p2919 A70-33719
- Book on biochemical predestination covering life origin, biomonomer synthesis, polymerization, colloidal systems, etc 17 p3025 A70-34925
- Quantitative and qualitative analysis of biochemically and radiobiologically important thiols and disulfides via gas-liquid chromatography 19 p3373 A70-37836
- Cells chemical origin, discussing terrestrial fractionation, amino acids, macromolecules, metabolism, etc 20 p3569 A70-38992
- Biochemistry of blood group antigens involved in agglutination reactions, discussing effect of proteolytic enzymes on cell membrane structure 21 p3764 A70-41447
- Oxidative enzymes histochemistry in nervous system, liver and kidney of rats in immediate and remote periods after 24-hr artificial hypobiosis 21 p3764 A70-41478
- Cellular irradiation sensitivity in tissue culture modified by propyl gallate as radical reactions inhibitor 21 p3767 A70-42242
- Infused cortisol disappearance rates and distribution volumes in hyper-, hypo- and normocalcemic dogs 24 p4296 A70-45334
- BIOCLIMATOLOGY**
- Human bioclimatology at high altitude, discussing energy balance in terms of net solar and terrestrial radiation balance in mountain area 19 p3367 A70-37369
- BIOCONTROL SYSTEMS**
- Bibliography of literature on bioengineering, biocontrol, medical physics, biotechnology, safety and human factors in technology 09 p1629 A70-23692
- Nine degree of freedom pitch axis model of human postural control system, deriving kinetic and potential energy expressions 11 p1990 A70-25675
- Control and guidance theories for biological problems, discussing signal transfer of linear control units and mathematical approaches 15 p2689 A70-31741
- Serum growth hormone response to hypoglycemia in man following insulin administration, reviewing lumped parameter model 19 p3360 A70-38006
- Muscular activity in regulation of organism functions during aging, considering hypokinesia effects 22 p3968 A70-42894
- Body oxygen control under muscular activity in aging individuals 22 p3969 A70-42899
- Mathematical model of heart beat control during muscular activity in aging individuals, reflecting neutral and hormonal control circuits 22 p3969 A70-42901
- Linear lumped parameter mechanical model of muscle spindle in postural control 22 p3979 A70-43496
- Structure and function of juxtaglomerular apparatus of kidneys controlling synthesis and secretion of renin 24 p4305 A70-46392
- BIODYNAMICS**
- Biomechanics - Conference, Rock Island, Illinois, April 1967 01 p0033 A70-10494
- Biomechanics of microcirculation, discussing rheological characteristics of blood, erythrocyte and vessel wall, hydrodynamics of erythrocyte-shaped bodies mathematical models, etc 01 p0039 A70-11160
- Reactive forces and torques of musculoskeletal system during lifting and carrying materials, using computerized biomechanical models 02 p0247 A70-12549
- Knee joint walking mechanics, calculating forces transmitted by joint tissue 07 p1205 A70-19246
- Aeroelasticity problems, discussing unrestrained flexible structures design, nonconservative systems stability, biomechanics, etc 09 p1777 A70-22972
- Plane flow problem for two hinged plates in motion toward each other with fluid displacement, discussing single vortex application to biomechanics 13 p2338 A70-28481
- Environmental heat stress indices of human subjects in bicycle ergometer experiment 18 p3224 A70-36226
- Muscle function mechanics across knee joint in walking, relating tension to length, velocity and energy absorption 19 p3368 A70-37810
- Biological action of constant magnetic fields, discussing axons electrical properties, biomolecules spatial orientation, electrolytes and liquids 22 p3978 A70-43138
- BIOELECTRIC POTENTIAL**
- EEG investigation of cerebral biocurrents during polar night-day cycle, studying central nervous system nonspecific automatic control mechanism dependence on ecological factors 01 p0030 A70-11466
- Frequency and postextrastolic potentiations in guinea pig isolated auricles and dog heart in vitro and in situ, noting myocardial diagnostic use 02 p0235 A70-12088
- Autocorrelation and cross correlation analysis of slow EEG potentials in rhythm of movement as cortical activity pattern of cerebral hemispheres during work 03 p0421 A70-13687
- Origin and functional designation of associative evoked potentials in orbital cortex of cats, showing phases connected with neuron activity and excitation 03 p0422 A70-13689
- Increased oxygen partial pressure effects on cerebral bioelectric activity from EEG recordings on unanesthetized dogs 03 p0422 A70-13690
- EEG patterns of functional state effect on evoked cortical potentials in response to DC pulses in dogs after nembutal administration 04 p0638 A70-15503
- Norepinephrine-induced depolarization effects on brown fat thermogenesis in cold-acclimated rats determined from in vivo measurement of intracellular potentials 05 p0799 A70-16020
- Rod and cone contributions to S potentials from cat retina using spectral sensitivity observation 05 p0801 A70-16379
- Rod-cone interaction in cat S potentials, analyzing effect of wavelength and intensity upon dark adapted responses 05 p0801 A70-16380
- Rod aftereffect relationship to percent rhodopsin bleached in S potentials from cat retina 05 p0801 A70-16381
- Cats visual analyzer functional rearrangement mechanisms under prolonged light stimulation, considering evoked potential dependence on pulse duration and intensity 07 p1198 A70-18699
- Rabbits visual cortex evoked potential changes due to light flashes under different conditions 07 p1198 A70-18716
- Bioelectrical reactions in anesthetized cats cortical zones in response to stimulation of contralateral sciatic nerve 07 p1199 A70-18722
- Cerebral biopotentials of rabbits exposed to RF weak electromagnetic field indicating cortex inhibition in EEGs 07 p1199 A70-18728
- Hypothalamus influence on potentials and recovery cycles of mesencephalic reticular formation in response to sciatic nerve stimulation in anesthetized rabbits 07 p1204 A70-19138
- Evoked potential /EP/ correlate of binocular depth perception in man, discussing responses to horizontal and vertical changes in retinal disparity 07 p1205 A70-19284
- Electrical recording of retinal and occipital potentials in response to stimulation of human visual system used at levels from receptor to striate cortex 07 p1220 A70-19364
- Auditory averaged evoked potentials to clicks in man subjected to selective listening task, comparing effect on attended and rejected ear 07 p1215 A70-20213
- Binocular fusion and rivalry effects on cortically evoked human potential, obtaining pattern characteristic responses to monocular stimulation 07 p1215 A70-20214
- Direct anatomical couplings between retina and hypothalamus via centripetal and centrifugal fibers by investigating light evoked potentials in rabbits brains 08 p1444 A70-20737
- Hypothalamus stimulation effect on electrical activity of hippocampus at threshold and super-threshold levels in cats 08 p1446 A70-21448
- Heart dipole moment calculation error due to deletion of individual electrode contributions to surface potential map, analyzing multielectrode grids 08 p1453 A70-21753
- Motor performance effects on averaged sensory-evoked potentials in reaction time tasks 10 p1811 A70-24226
- Different retinal regions simultaneous stimulation, describing evoked potentials measurement method 10 p1811 A70-24227
- Psychophysical and evoked potential correlates of changes in stimulus color and intensity compared with minimum subjective flicker conditions 12 p1717 A70-28035
- Human forearm motion control mechanism, examining mechanogram, instantaneous velocity, acceleration and biopotentials of biceps and triceps brachii 12 p1713 A70-28314
- Sensory afterdischarge of human brain under light stimuli during sleep and wakefulness 12 p1713 A70-28354
- Evoked cerebellar potentials time characteristics during spinal cord stimulation in cats, investigating cerebellar intercalated connections effect 13 p3553 A70-29357
- Portable autonomous EEG analyzer for processing brain biopotentials without use of computer hardware and qualified personnel 13 p3660 A70-29522
- HF permittivity variations detector for blood circulation telemetry 14 p2542 A70-30389
- Steady state evoked potentials Fourier analysis from human scalp during psychophysical procedure of heterochromatic flicker photometry, obtaining spectral sensitivity curve 15 p2682 A70-32015
- Electrical potentials in response to auditory stimuli recorded in cat brains by averaging computer 15 p2685 A70-32831
- Cortical evoked potentials in human motor conditioning to photic stimulus 18 p3221 A70-37212
- Evoked potentials in dogs sensorimotor cortex during defensive instrumental conditioning 18 p3221 A70-37213
- Visual attention and temporal cortex stimulation effects on evoked electrical activity in monkey brain 19 p3360 A70-37812
- EEG analysis for poststimulus events, examining contingent negative variation and late positive wave of average evoked potential 19 p3368 A70-37813
- Intracellular myocardium potentials under vagus inhibition by electrometric DC amplifiers with positive and negative feedback 19 p3370 A70-38213
- Multipoint recording of bioelectric potentials based on electroencephalography, discussing multiple leadout, amplification, analysis, etc 19 p3370 A70-38217
- Extracellular spontaneous sequences of action potentials of thalamic neurons during asphyxia in rats under artificial respiration 19 p3361 A70-38306

Enhanced evoked potentials sited by auditory stimuli in complex task, considering EEG and neurophysiological basis of selective attention

19 p3363 A70-38318

Pulse coding system for average evoked EEG potential data acquisition and analysis, describing pulse generation circuitry and computer implemented logic

20 p3578 A70-38985

High fidelity microelectrode recording of phase zero cardiac transmembrane action potentials, utilizing memory oscilloscope

21 p3772 A70-42163

Bioelectric activity changes in rats lumbar neurons, membrane and postsynaptic potential and discharge frequency during and after asphyxiation

22 p3971 A70-43404

Visual system recording neuron pulse potential spatial and temporal responses to sinusoidal stimuli

23 p4144 A70-43922

BIOELECTRICITY

Reversible cold induced deactivation of cat neocortex bioelectric activity in chronic experiment, noting cooling system

01 p0031 A70-10056

Bioelectrically controlled system for indirect heart massage, noting dynamic simulation of system on digital computers using block oriented programming languages

01 p0047 A70-10261

Scaling and refractoriness effect in neutral-pulse train transmission on eye incremental sensitivity, discussing applicability as intraretinal mechanism concept

02 p0247 A70-12466

Synchronizing and desynchronizing systems for cerebral electrical activity, noting roles in sleep and wakefulness mechanisms

03 p0417 A70-13073

Cats cerebral cortex background electrical activity measured during development of conditioned reflexes, noting shift toward higher frequencies

03 p0418 A70-13217

Vascular electrical activity in cats and rats by inserting glass microelectrode into blood vessel, showing blood flow conditioning effect on activity

03 p0422 A70-13691

Aplysia periodic spontaneous gill movements controlled by central neuron activity in abdominal ganglion

04 p0629 A70-14425

Small amplitude discharges and neuron activity in dorsal hippocampus of cats recorded simultaneously with pyramid cell activity

04 p0632 A70-15221

Bioelectrical activity of brain during conditioned motor reflex system operation modes in response to stimulating light pulses

08 p1447 A70-21450

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation

09 p1615 A70-22091

Lobster giant axon membrane steady state current fluctuations measured under voltage-clamp conditions, considering current potassium component

11 p1987 A70-26006

Electrical activity of visual cortex, subcortical structures and reticular formations in cats during conditioned reflex stimulation by light

12 p2173 A70-28351

Electronic simulation of neuron membrane demonstrating nervous impulses generation and propagation behavior

14 p2542 A70-30387

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation

15 p2685 A70-32687

Gas exchange, body temperature and electrical activity of neck and back muscles of cold-acclimated white rats subjected to various temperatures

18 p3219 A70-36540

Repeated local spine cooling effect on gas exchange and electrical activity of white rats skeletal muscles

18 p3219 A70-36541

Posterior ventral thalamic nucleus neuron reactions converging lemniscus and spinothalamic signals in cats

18 p3221 A70-36639

Cerebrum electrical activity and myogenic tonus relation in subjects performing tasks in response to visual and acoustic stimuli

18 p3221 A70-37216

Human brain LF activity in visual evoked response, determining relationship to stimulation

19 p3360 A70-37846

Time analysis of pulsed activity of neurons, using amplitude analyzer with programmable control unit

22 p3972 A70-43551

Visual system recording neuron pulse potential spatial and temporal responses to sinusoidal stimuli

23 p4144 A70-43922

Intense white pulsed jet engine noise effects on cochlea biocurrents in cats

23 p4157 A70-45076

Sympathetic transmission model, discussing transmitter liberation capacity under various stresses by mobilization of stores, acceleration of synthesis, etc

24 p4299 A70-45804

BIOENGINEERING

NT ANTHROPOMETRY

NT BALLISTOCARDIOGRAPHY

NT BIOINSTRUMENTATION

NT BIOMETRICS

NT BIOTELEMETRY

NT BODY MEASUREMENT [BIOLOGY]

NT CARDIOGRAPHY

NT ELECTROCARDIOGRAPHY

NT ELECTROENCEPHALOGRAPHY

NT ELECTROMYOGRAPHY

NT ELECTRORETINOGRAPHY

NT PLETHYSMOGRAPHY

Humanoid unmanned reconnaissance and assault vehicle maneuvers, describing cover-seeking and obstacle-avoidance functions from physiological and engineering viewpoint

01 p0033 A70-10495

Rocky Mountain Bioengineering - Conference, Laramie, Wyoming, May 1969

02 p0242 A70-12093

Book on engineering in heart and blood vessels stressing technological aspects of artificial internal organs

06 p1001 A70-17649

Minimum ventilation volume requirement for space suit relation to air contaminants and body gas discharge intensities and locations

13 p2358 A70-29333

Medical electronics and biological engineering - Conference, Nancy, France, June-July 1969

14 p2540 A70-30376

Amplifiers with selective feedback and clamping circuits for electrocardiology and electroencephalography

15 p2691 A70-31924

BIOGENESIS

U BIOLOGICAL EVOLUTION

BIOGEOCHEMISTRY

Biogeoecosis applicability to artificial closed ecological systems consisting of plants creating organic matter and heterotrophic organisms

13 p2353 A70-29501

BIOINSTRUMENTATION

NT BIOTELEMETRY

Frequency characteristics of air, water and blood filled pressure transducer systems using various needle and connecting tubing sizes

01 p0031 A70-10275

Skeletal status evaluation in space flight, describing instrumentation for bone mineral measurement and acoustic velocity method for bone elasticity

01 p0032 A70-10369

Constant magnetic fields effects on blood coagulatory processes, describing microcalorimetric determination

01 p0015 A70-10372

Analog time delay device for returning respiratory flow signal to correct time

01 p0035 A70-10654

Piezoelectric ultrasonic crystal on cardiac catheter tip measuring cardiac diameter in vitro and in excised canine hearts

01 p0038 A70-11025

Radiology instrument for examining pulmonary functions during deep inspiration, expiration and rest, describing material, components and assembly, mounting and radiogram development

01 p0040 A70-11401

Respiratory mass spectrometer design specifications, considering sampling and vacuum systems

01 p0041 A70-11649

Stainless steel micropipettes implantation in rat amygdala to study role in gastric secretion

02 p0234 A70-11729

Silicon strain gage transducer for measurement of pressure between tongue and teeth, developing two types of temperature compensated strain gages

02 p0242 A70-12054

Physiological signals of cardiovascular system transducing methods applied to vector ECG, heart sounds, peripheral pulse waves, chest microphone and plethysmography

02 p0243 A70-12095

Monitoring and recording of physiological parameters, discussing heart, muscle, brain potentials, blood pressure, respiration measurements and instrumentation

03 p0439 A70-14267

Blood flow sensors based on electrical conductivity dependence on flow rate, discussing system instrumentation and experimental results

04 p0644 A70-15295

Multiple optical properties measurement instrumentation for cellular specimens to classify biological cells, analyzing and displaying data by on-line computer

04 p0644 A70-15361

Bioelectronic equipment shock hazards reduction by current limiting diodes use in signal and ground leads

06 p0998 A70-17285

Cine recording ophthalmoscope with TV monitoring for retinal photography during centrifugation

06 p1061 A70-17286

Electromagnetic induction blood flowmeter measuring blood velocity as function of voltage in pick-up electrodes

07 p1217 A70-18952

Blood reflection densitometer with linear response to changes in indocyanine green dye concentration, using simple analog computation

07 p1221 A70-19589

Biomedical instrumentation evaluation procedure to minimize redesigns and delays and to bridge communication gap between medical and engineering fields

08 p1450 A70-20791

Simultaneous recording of fast and slow precision manual movements with electroencephalogram and electromyogram

08 p1452 A70-21438

Electromagnetic flowmeter for cardiac output changes in unanesthetized rats, discussing construction, form and associated electronic equipment of implanted probe

09 p1627 A70-23267

Ventricular preexcitation syndrome studied by catheter technique for heart electrical activity recording, noting His bundle bypass effects

10 p1819 A70-24934

ECG telemetry system within small irregular metal chamber

11 p1992 A70-26514

Electromagnetic blood flow determination by catheter in external magnetic field, discussing intravascular EM flow sensor capable of percutaneous introduction into vascular system

11 p1993 A70-26663

Heart dimension measurement by miniature implantable ultrasonic sonomicrometer, describing system design and operation

12 p2174 A70-26897

Transistorized pulsed activity converter for observing analog curve of change in pulse frequency

12 p2179 A70-28316

Transducers for bioimplantable telemetry systems self used by nonhospitalized patients

13 p2357 A70-28816

Neuroregulatory agents instrumentation based on compounds brain level, enzymatic formation and radio labeling

14 p2536 A70-30347

Thoracic impedance changes in premature infants respiration monitoring, noting Respiratory distress syndrome/Rds/physiopathology

14 p2541 A70-30382

Automatic recording respirometer for industrial wastes, discussing design and advantages

14 p2543 A70-31164

Actoballistocardiography based on piezoelectricity for biorthmic activity, respiratory movements and heart rate of small animals

14 p2543 A70-31321

Comparative cardiac output measurements in dogs using left/right heart dye injections and pulmonary/aortic electromagnetic flow probes

15 p2688 A70-31434

Intraarterial hot film constant temperature anemometry for point blood velocity measurements, detecting flow reversal

15 p2688 A70-31435

Miniaturized electromagnetic catheter flowmeter for measuring volume flow rate by potential difference between electrodes

15 p2689 A70-31747

Data system obtaining sampling rate for cardiac volume measurement via fast biplane cineangiography

15 p2691 A70-31922

Aerospace Medical Association Conference, St. Louis, April 1970

17 p3026 A70-35326

Portable hybrid automatic sleep analyzer for on-line EEG and EOG processing

17 p3040 A70-35606

Instrumentation safety for physiological research in hyperbaric chamber environment, taking into account pressure, isolation, atmosphere, electricity and fire

18 p3222 A70-35939

Multichannel time marker network synthesis device for physiological data assembly, transformation and processing, generating pulses

18 p3223 A70-36083

Left ventricular dynamics ultrasonic visualization, involving catheter-borne transducers array and computer for data acquisition and display

18 p3225 A70-36750

Extradural sensor for continuous measurement and recording of human intracranial pressure in neurosurgical practice

19 p3367 A70-37353

- Analog computer for continuous recording of oxygen consumption of muscular area in canine foot via blood flow rate and oxygen saturation
19 p3367 A70-37354
- Exhaled alveolar air data acquisition using mass spectrometer and multichannel analyzer
19 p3367 A70-37356
- Thermal thermesthesiometer for skin heat sensibility studies
19 p3368 A70-37806
- Thermal electronic instrumentation applied to biological flows including blood flow, cardiac outputs and volumes
19 p3368 A70-37843
- Uncoated quartz twin crystal microbalance for monitoring water vapor content of respiratory gases
19 p3368 A70-37844
- Cardiac rhythm, respiration and rhythmical processes of alimentary tract, using digital data device
19 p3370 A70-38214
- Arterial pressure measurement by automatic control system based on external compression pressure for maximum amplitude intraarterial pressure pulse oscillations
19 p3370 A70-38215
- Electronic differentiator for physiological research, discussing electrical voltage derivatives reproduction, sensitivity, etc
19 p3371 A70-38219
- Stabilograph and support dynamograph based on amplitude modulation of carrier frequency for standing stability determination in humans
19 p3371 A70-38220
- Reliability tests of blood carbon dioxide pressure measurement methods, indicating carbon dioxide-electrode method superiority
19 p3365 A70-38371
- Coulometric microrespirometer for long term numerical recording of oxygen consumption in respiratory chamber under sterile conditions
19 p3371 A70-38372
- Electromagnetic blood flowmeters for circulatory research
20 p3579 A70-39371
- Medical monitoring system onboard Soyuz spacecraft, describing equipment design, data acquisition and analysis, telemetric recordings, etc
20 p3581 A70-40193
- High resistance thermistor measurements of rapid blood temperature variation, discussing power dissipation effects
21 p3769 A70-41143
- Blood velocity in ascending aorta in man by transcutaneous ultrasonic Doppler technique, investigating heart hemodynamic performance and systemic perfusion
21 p3770 A70-41235
- Myocardium bioelectric activity electrocardiogram simulator, describing block diagram and operation
22 p3979 A70-43553
- Astronaut physiological monitoring aboard Soyuz spacecraft
22 p3980 A70-43691
- Semiconductor thermometer for skin temperature differences using resistance bridge, transistor amplifier and thermistors
23 p4150 A70-44317
- Miniature respiratory minute volume and rate sensor as pilot personal equipment in flight environment
23 p4155 A70-44840
- Photon-coupled biomedical amplifier for measuring and recording physiological signals
23 p4155 A70-44848
- Indirect blood pressure measurements using motion artifact suppression circuit based on K-sound electrocardiography
24 p4296 A70-45335
- Chronically implantable water perfused thermode system for hypothalamic temperature waveforms generation
24 p4309 A70-46117
- HF sinusoidal fluid pressure generators driven by electromagnetic vibrators for arterial applications
24 p4309 A70-46118
- Subminiature transistor photosensor for direct measurements of capillary blood cell motion
24 p4309 A70-46119
- Recording system errors for measuring pulmonary pressure-volume curves of excised lungs
24 p4309 A70-46122
- Conscious rat systolic blood pressure measurement, using arterial pulse wave detection to occluding cuff by photoconductive cell
24 p4309 A70-46213
- Fluorescent probes inserted into biological membranes for molecular structural and dynamic facets
24 p4304 A70-46231

BIOLOGICAL EFFECTS

- NT RELATIVE BIOLOGICAL EFFECTIVENESS (RBE)
Book on radiation biochemistry covering effects on biological tissue, nucleic acids, proteins, carbohydrates, lipids, hormones, vitamins, living cells, metabolism and toxic substances formation
01 p0011 A70-10030
- Medico-engineering experiment in partially closed ecological system for long term manned space missions
01 p0032 A70-10363
- Constant magnetic fields effects on blood coagulation processes, describing microcalorimetric determination
01 p0015 A70-10372
- Gnotobiotic mice with orally inoculated microorganisms observed for quantitation and fate of bacteria in intestinal tract
01 p0027 A70-11312
- Book on radiation protection, discussing atomic structure, nuclear transformations, effects on biological cells, total body exposures, somatic and genetic effects, etc
01 p0040 A70-11381
- Numerical solutions for laser beams intensity focused by simple lenses with varying primary spherical aberration, demonstrating isophote nonuniformity role in biomedicine
01 p0000 A70-11650
- Guinea pig cochlear hair cell damage after exposure to impulse noise
02 p0236 A70-12322
- Space environment and radiation on Biosatellite 2 enhancing radiation effects in developing flour beetle *Tribolium confusum*
02 p0238 A70-12517
- Biological dosimetry techniques for irradiation damage evaluation
02 p0239 A70-12581
- Pulsed noise biological effects on human organism, showing stimulation of auditory duct and baric and mechanical reception system causing neural functional shift
03 p0433 A70-13476
- Biological hazards of laser radiation, noting eye injuries and cataract from transscleral exposure on rabbits
03 p0434 A70-13679
- Organisms resistance to biological environmental factors, surveying published literature on pressure chamber experiments, tissue resistance, cellular protein stability, etc
03 p0422 A70-13701
- Fraction of Chlorella and Scenedesmus biomass, noting changes in adrenal cortex and renal glomerulus
03 p0425 A70-13889
- Ground-based biological experiments on insects and frog eggs to investigate effects of space flight weightlessness and radiation on mitosis and meiosis
04 p0631 A70-14942
- Nutritive value of mycelium of *Cantharellus cibarius* mushroom on rats compared with eggs and fresh and sour milk
05 p0809 A70-17111
- Nonionizing radiation sources relationship to human targets, discussing damage threshold levels
06 p0998 A70-17201
- Soviet monograph on radiobiological effects of ionizing radiation covering physicochemical and functional cellular changes, recovery mechanisms, etc
06 p0992 A70-17350
- Gravitational effects on organisms - Conference, Warsaw, March 1969
07 p1200 A70-18784
- White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen
07 p1207 A70-19503
- High energy protons irradiation biological effects, noting qualitative and quantitative variations in radiation disease symptoms
07 p1208 A70-19508
- Microbiological corrosion effects on aluminum alloy fatigue properties inducing further microbiological corrosion compared to chemical corrosion effects
07 p1310 A70-19735
- Near zero magnetic fields effect on biological systems studied to determine terrestrial magnetic field absence effect on astronauts
08 p1449 A70-20724
- Biological effects of laser radiation on human eye, discussing damage caused by long term exposure to visible, IR and UV wavelengths
08 p1451 A70-21043
- Oxygen enhancement ratio and relative biological effectiveness of accelerated helium nuclei on mouse tumor cells, discussing applicability in radiation therapy
09 p1617 A70-22336
- Laser radiation cumulative effects compared to single dose in mice, using hair growth stoppage as test objective
09 p1624 A70-22817

- Laboratory simulations of geomagnetic field suppression, studying biological effects on human, mice, plants and microorganisms
09 p1626 A70-23113
- Microwave radiation thermal and nonthermal biological effects, considering exposure limits
10 p1824 A70-24061
- Orbital space flight effects on dry barley seeds, noting increased intracellular rearrangements
10 p1811 A70-24324
- Mercury arc injection lamp as radiation source for testing sunlight biological effects
10 p1888 A70-24388
- Relative value of prolonged bed confinement and hypodynamia in estimating biological effects of weightlessness
10 p1813 A70-24666
- Organisms resistance to biological environmental factors, surveying published literature on pressure chamber experiments, tissue resistance, cellular protein stability, etc
11 p1985 A70-25501
- Extraterrestrial gravitational effects on microorganisms, describing impulse-applied high g study of freeze dried *Escherichia coli*
11 p1987 A70-26028
- White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen
11 p1987 A70-26102
- High energy protons irradiation biological effects, noting qualitative and quantitative variations in radiation disease symptoms
11 p1987 A70-26107
- Seed germination in simulated planetary atmospheres, considering biological responses of various organisms
14 p2537 A70-30692
- Wheat seedlings cellular response to weightlessness during NASA Biosatellite II flight compared with simulated weightlessness effects
15 p2688 A70-31662
- Human renal response to various exercise rates, measuring endogenous creatinine clearance, urine volume, solutes, acid, elements and protein excretion
15 p2684 A70-32534
- High strength magnetic fields effect on early embryonic development of frogs, relating growth abnormalities and paramagnetic ferritin motions
16 p2848 A70-33099
- Thermal-chemical damage to carbon particles in egg albumin under ruby laser irradiation, using chemical rate equations for protein denaturation
17 p3035 A70-34577
- Mitotic activity and aberrant mitoses frequency in mice corneal and duodenal epithelium cells under fast fission neutron irradiation
17 p3032 A70-35319
- Transport processes in chemical reactions and biological functions of living systems, using nonequilibrium thermodynamics approach
17 p3032 A70-35539
- Biological tests of fish and invertebrates exposed to Apollo 11 lunar surface material, noting absence of pathological effects
19 p3513 A70-37409
- Lighting effects on phenylethanolamine-N-methyltransferase (PNMT) activity and adrenal epinephrine content in rats
20 p3568 A70-38982
- Toxicity problems from burning or heating of polymeric materials, discussing laboratory experiments and standardized toxicity testing procedures
20 p3579 A70-39406
- Soviet book on dynamics of postradiation damage of biological objects covering dosage and protection effects on various animals
20 p3573 A70-39824
- Mice immunobiological reactivity at simulated high altitude
20 p3575 A70-40189
- Proton irradiation effects on dogs with partial body protection
20 p3575 A70-40192
- Biological action of constant magnetic fields, discussing axons electrical properties, biomolecules spatial orientation, electrolytes and liquids
22 p3978 A70-43138
- Biological compatibility problem in long duration space operation crew change, discussing human metabolic processes and difference effects
22 p3980 A70-43641
- Safety standards and biological effects of microwave radiation, investigating cataractogenesis and heart rate in rabbits
23 p4144 A70-43790
- Mammalian tissues metabolic and genetic alteration during weightlessness, relating rats liver regeneration delay to centrifuging intensity following hepatectomy
23 p4146 A70-44617
- Mice intestinal epithelium, investigating high energy protons irradiation effect on cells
23 p4149 A70-45028

BIOLOGICAL ACTIVITY
U ACTIVITY (BIOLOGY)
BIOLOGICAL ANALYSIS
U BIOASSAY
BIOLOGICAL CELLS
U CELLS (BIOLOGY)

- Cosmos 110 satellite experiments concerning radiation effects on lysogenic bacteria and plants
23 p4149 A70-45030
- Homogeneous magnetic fields effects on growth rate of *Saccharomyces cerevisiae* and *Micrococcus denitrificans*
24 p4306 A70-45102
- Lasers biomedical applications based on thermal and ionization effects on biological targets, considering eye surgery, tumor treatment, etc
24 p4308 A70-45568

BIOLOGICAL EVOLUTION

- NT ABIOTIC GENESIS
Solar system evolution based on Darwin theory, discussing energy inputs effect on primeval atmospheric molecules
02 p0229 A70-11666
- Fatty acids and aliphatic hydrocarbons in 3.4 billion year old metamorphosed sediment, suggesting biological origin
03 p0475 A70-13820
- Replicating molecules on primordial earth, suggesting chemical evolution on Jupiter via demonstrable alpha-aminonitriles synthesis
14 p2536 A70-30364
- Nucleated organisms divergence from bacteria compared to nucleated organisms divergence into separate kingdoms by analysis of genetic changes in cytochrome c and transfer RNA
16 p2846 A70-32990
- Organic compounds detection and identification on Mars surface for living systems existence or evolution
16 p2857 A70-33977
- Precambrian cherts hydrocarbon and fatty acid concentrations and C and S stable isotope ratios, discussing biological evolution rate
18 p3244 A70-35969
- Thermally prepared poly-alpha-amino acids catalytic activity after long term dry state storage, suggesting enzyme activity role in biological evolution
21 p3772 A70-40713
- Apollo 11 lunar dust and microbreccia micropaleontological examination, discussing biological morphology
21 p3778 A70-41620
- Space biological exploration for determining life origin on earth, emphasizing extraterrestrial life possibilities on other planets
24 p4301 A70-46000

BIOLOGICAL MODELS

- U BIONICS
BIOLOGICAL RHYTHM
U RHYTHM [BIOLOGY]
BIOLOGY

- NT MARINE BIOLOGY
Earth orbital experiments synthesis in space programs methodology, discussing examples in astronomy, biology and oceanography research
22 p4097 A70-42500
- Biology of fossil genus *Kakabekia* and living species *Kakabekia borshegniana* Siegel cultured from Alaskan soil samples
24 p4304 A70-46232
- Functional systems in biology, discussing inter-scientific demarcation, research strategy, physiological experiment, operational architectonics, etc
24 p4305 A70-46391

BIO LUMINESCENCE

- Hereditary UV luminescence of transplanted cancerous and lymphosarcomatous cells in mice and rats after ionizing radiation exposure
13 p2358 A70-29341

BIO MECHANICS

- U BIODYNAMICS
BIO MEDICAL DATA
Standard urinary excretion by healthy adult for free adrenaline, noradrenaline, creatine and hydroxymethoxy mandelic acid, making catecholamine determinations
12 p2168 A70-27622
- Cardiac cycle and phases shortening observations from analyzing electro- and phonocardiographic data recorded during Gemini flights
13 p2359 A70-29437
- EKG data automatic classification using discriminant analysis
13 p2360 A70-29627
- Digital filter facilitating biological data analysis through zero or linear phase shift filtering without distorting time relationship in data
14 p2542 A70-30796
- Physiological data analyzer modification for simultaneously estimating scaled interval histograms (SIHs) written in one memory subgroup
14 p2542 A70-30799
- Photon-coupled biomedical amplifier for measuring and recording physiological signals
23 p4155 A70-44848

BIO METEOROLOGY

U BIOCLIMATOLOGY

BIO METRICS

- NT ANTHROPOMETRY
NT BALLISTOCARDIOGRAPHY
NT BODY MEASUREMENT [BIOLOGY]
NT CARDIOGRAPHY
NT ELECTROCARDIOGRAPHY

- NT ELECTROENCEPHALOGRAPHY
NT ELECTROMYOGRAPHY
NT ELECTRORETINOGRAPHY
NT PLETHYSMOGRAPHY
Sinusoidal test for measuring knee moment increase required to flex and extend for various conditions of knee angle, angular velocity and steady knee moment
02 p0238 A70-12546
- Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations
03 p0436 A70-13900
- Thorax potential resistivity at sea and high altitude levels measured in children and adults inferring relation to ECG differences
07 p1206 A70-19296
- Pulmonary extravascular (PEV) and intravascular (PBV) fluid volumes measured at rest and exercise
07 p1211 A70-19595
- Deductive model of vision statics formulated for Grassman laws without using operation of color composition
08 p1450 A70-20729
- Postcaloric nystagmus clinical evaluation by analog computer measuring fast-phase eye displacement in Vestibular Function laboratory
08 p1448 A70-21942
- Cardiac output in humans by analog computer program using mass spectrometer analysis of expired air
08 p1454 A70-21948
- Air transport of cardiac patients with auriculoventricular blocks, noting feasibility due to portable surveillance and treatment apparatus
12 p2172 A70-28041
- Pulmonary vital capacity measurements in young recruits for respiratory function, considering relationship to body weight and height
16 p2850 A70-34348
- Soviet book on isolated animal heart autoregulation, considering cardio-pulmonary preparations, functional capacity, biometrics and computer technology for heart activity simulation models
19 p3359 A70-37404
- Frank orthogonal vectorcardiograms on humans during acceleration, using beat-by-beat real time analog-digital computer technique
20 p3572 A70-39435
- BIONICS
Book on dynamics of complex systems represented by control and human operators and animals behavioral activities models
01 p0034 A70-10501
- Analog, analog/digital, digital and hybrid computer simulation current advances, emphasizing physiological problems and optimum solution
02 p0264 A70-11687
- Mechanical properties of human skull specified for construction of physical and mathematical models
02 p0243 A70-12097
- Mathematical model formulated in terms of feedback controller for simulation of horizontal eye movement for positioning upon objects of interest
02 p0243 A70-12098
- Reactive forces and torques of musculoskeletal system during lifting and carrying materials, using computerized biomechanical models
02 p0247 A70-12549
- Arterial model with effects of thick walls, linear viscoelasticity and wall tethering for studying arterial mechanics
02 p0247 A70-12550
- Arrhythmia resembling atrial flutter simulated in dogs by coronary sinus and left atrial pacing and in man by coronary sinus pacing
02 p0240 A70-12696
- Model for simulating normal/abnormal depolarization and repolarization of heart and to reproduce electrocardiograms, describing design and programming
03 p0432 A70-12889
- Electrical analog simulation of cardiovascular system, determining blood flow rate and pressure in aorta and peripheral vessels
03 p0420 A70-13490
- Martian hypothetical organisms biological model, describing nonchlorophyll photosynthesis, epithelial hydrochrome pigments, scale insect morphology, etc
03 p0422 A70-13702
- Real image holography of complex organism or body organs as teaching aid and research tool in medicine and biology
04 p0685 A70-14558
- Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm
05 p0810 A70-17118
- Pavlovian conditioned reflexes theory reappraisal, discussing cortex-subcortical formations interrelations models
07 p1197 A70-18694
- Human head model for craniocerebral trauma analysis, studying fluid filled spherical shell free vibrations axisymmetric response
07 p1219 A70-19243

- Normal and stenosed aortic valve closure wing measurements in model valve in pulsatile water tunnel showing turbulence generation
07 p1220 A70-19249
- Geometrical model of human cardiac excitation stages based on normal heart anatomy, discussing application to study of QRS loop in vectorcardiogram
07 p1211 A70-19592
- Human color vision simulation by mathematical and electronic analogs for photoelectric color measurement and eye resolution
08 p1450 A70-20727
- Psychophysiological regularities of nonlinear human color vision model, analyzing sensitivity curves, achromatic tints and hyperbolic position in perception space
08 p1443 A70-20728
- Cardiovascular control system mathematical model incorporating fundamental properties of heart muscle for digital simulation using FORTRAN program
08 p1453 A70-21513
- Pituitary hormone ACTH stimulatory effect on steroid hormone cortisol secretion by canine adrenal cortex, constructing seventh order state variable model
10 p1819 A70-24868
- Functional model of signal analysis and pulse sequence conversion in nervous system at periphery of hearing
10 p1827 A70-25127
- Information theory, considering biological applications, coding and information content and transmission
10 p1846 A70-25284
- Martian hypothetical organisms biological model, describing nonchlorophyll photosynthesis, epithelial hydrochrome pigments, scale insect morphology, etc
11 p1985 A70-25502
- Nine degree of freedom pitch axis model of human postural control system, deriving kinetic and potential energy expressions
11 p1990 A70-25675
- Cardiovascular model for closed loop analog simulation of congenital heart defects hemodynamics
11 p1990 A70-25705
- Cochlear microphonics in guinea pigs using analog equivalent electrical circuit
11 p1992 A70-26494
- Dimensionless parameters associated with heat transport within living tissues using biothermal model
11 p1992 A70-26513
- Mathematical model for rats nonlinear time-varying glucocorticoid secretion control mechanism, obtaining time dependent characteristics of hypothalamic-hypophyseal complex
12 p2174 A70-26893
- Myocardial individual fibers length calculation based on ellipsoidal model of left ventricle and fibers helicoidal course, noting distension nonuniform effect
12 p2174 A70-27020
- Inert gas absorption from tissue cavities in body, using models with different wall distribution patterns of capillaries and diffusion resistance
12 p2171 A70-28025
- Anatomical and physiological correlations between mathematical model components for vestibular nystagmus mechanisms
13 p2351 A70-29331
- Intracranial pressure pulse waves formation mechanism mathematical model, estimating role of biomechanical factors
13 p2353 A70-29520
- Mathematical models for human adaptive and optimizing characteristics in manual control systems regarding behavior phase
13 p2360 A70-29780
- Soviet collection of papers on automation theory and biological systems simulation covering game theory and mathematical models
14 p2542 A70-30630
- Book on visual perception space covering biological optics, eye model, monocular vision, etc
14 p2539 A70-31349
- Optimal manual control model of human compensatory tracking response
14 p2543 A70-31408
- Model for pilots optimal manual control of hovering VTOL aircraft longitudinal position
14 p2543 A70-31409
- Control and guidance theories for biological problems, discussing signal transfer of linear control units and mathematical approaches
15 p2689 A70-31741
- Mechanical model of arterial viscoelasticity effect on input impedance and wave travel in systematic tree
15 p2691 A70-31941
- Air bubble breaking in blood and water flow passage of simulated cardiopulmonary bypass system with flow constriction
15 p2692 A70-32312
- Human postural motor control systems nonlinearities, describing physiological experiments and mathematical models
15 p2693 A70-32568

Compartmented physiological system dynamics by bilinear control model, relating homeostasis to system 15 p2693 A70-32571

Muscular behavior analog simulation model from generalization of laws governing viscoelastic behavior of polymeric materials 15 p2693 A70-32820

Distributed-lumped parameter model for impled mass transfer and blood-gas maldistribution effects in human respiratory system 15 p2694 A70-32844

Speech signals reflection in nervous system, constructing functional perception model for signals conversion into phonetic patterns 15 p2687 A70-32870

Fluid analog for lung tissue response to gravitational acceleration, examining lung density, transpulmonary pressure, expansion, etc 16 p2850 A70-34257

Arterial wall nonlinear distensibility effects on blood flow velocity profiles, considering various mathematical and physical artery models 17 p3035 A70-34468

Human body radiation shielding, describing development of computerized standing and seated model for space missions [AAS PAPER 70-053] 17 p3036 A70-34794

Mathematical model for short term adaptation effects in human semicircular canal response to rotation, discussing nystagmus 18 p3216 A70-35940

Engineering systems construction with behavioral elements of biological objects, describing gyromat 18 p3223 A70-36078

Continuous functions transformation by artificial neuron networks, investigating electrophysiological data for nerve tissues excitability 18 p3223 A70-36081

Adaptation to extreme stimulation in machine-organism system 18 p3224 A70-36529

Mathematical simulation of human thermoregulatory system, considering automatic control theory 18 p3224 A70-36530

Biophysical model of heat transfer from organism, describing adaptation to ambient temperature 18 p3218 A70-36531

Skin simulation for thermal radiation protection studies, considering fused silica and epoxy resin filled with Al powder 18 p3225 A70-37093

Alpha rhythm phase coherence during photic blocking, examining pacemaker model 19 p3368 A70-37811

Multipurpose microminiature multichannel biomedical telemetry system, discussing design 19 p3368 A70-37856

Electroencephalography with automatic frequency analysis to simulate processes involving brain self regulation 19 p3370 A70-38218

Axiomatic approach to homeostasis, discussing living systems as oscillators with input-output and transit variables in duration and elongation 19 p3365 A70-38411

Computer simulated decision hierarchical model of helicopter and VTOL pilot for multiloop closure and tracking characteristics of man-vehicle system 19 p3372 A70-38921

Mathematical model of human pituitary gland mechanism controlling secretions of serum growth hormone in response to glucose deficiency 20 p3569 A70-38995

Digital computer model of total body ECG surface maps, simulating male torso with lungs 20 p3578 A70-39369

Skeletal muscle force generation stochastic model based on motor unit, discussing Poisson distribution and dynamic force response 21 p3769 A70-41199

Electrokinetic model for semicircular canal transduction, focusing IR beam on exposed ampullae from posterior canals of Rana pipiens 21 p3765 A70-41696

Model for human brain visual information processing networks, considering visual search, selection, storage, correlation, recognition and recall functions 22 p3977 A70-42287

Linear lumped parameter mechanical model of muscle spindle in postural control 22 p3979 A70-43496

Acceleration effects on human organisms, describing centrifuge, rocket sleds and catapult simulators 22 p3979 A70-43528

Semicircular canals dynamic cross coupled responses to rotational movement, discussing mechanical model applicability 22 p3981 A70-43703

Ureter fluid mechanical model from lubrication theory viewpoint, discussing waveforms, pressure distribution, etc 23 p4179 A70-43966

Mathematical model simulating human respiratory physiopathology, based on hypothetical stable autotooscillations dependence on ventilation/pulmonary exchange system 23 p4155 A70-44859

Blood circulatory system and hemodynamic interdependencies simulation by analog computer, using Warner model 23 p4155 A70-44862

Hypogravic skeletal atrophy model, considering bone maintenance as feedback control system 24 p4296 A70-45328

Long wave approximation for peristaltic transport in circular cylindrical tube, noting inertia and wavelength effects on backward flow 24 p4309 A70-46224

Functional systems in biology, discussing inter-scientific demarcation, research strategy, physiological experiment, operational architectonics, etc 24 p4305 A70-46391

BIOPHYSICS

NT HEALTH PHYSICS

Left ventricle confocal prolate spheroid model taking into account physiologic variations of thickness 01 p0040 A70-11373

Biophysics research, discussing supramolecular biological structures, synthesis of proteins, nucleic acids and genetic codes, biological membranes, coding in nervous system, etc 03 p0420 A70-13491

Open circuit gas washout test of lungs under inspiration-expiration transmission symmetry, using Hilbert-Schmidt operators 12 p2175 A70-27021

Physical principles of biological membranes - Conference, University of Miami, December 1968 16 p2847 A70-33026

Molecular structural relationship between cellular membranes and photoreceptors in plants and animals 16 p2847 A70-33028

Cylindrically symmetric transient heat conduction in biological systems for inhomogeneous media and internal sources, using finite difference method 23 p4150 A70-43900

BIOREGENERATION

U REGENERATION [PHYSIOLOGY]

BIOSATELLITE 3

Biosatellite 3 experiment with male marmoset nemes-trima monkey, discussing cardiac rate, vascular data, water balance, weight loss and brain temperature 22 p3973 A70-43646

BIOSATELLITES

Biosatellite Primate Mission Program for component qualification levels validated by flight tests data, performing vibration tests on prime structure spacecraft [AIAA PAPER 70-403] 10 p1951 A70-24902

Biosatellite environmental control coolant loop system design for 30-day mission program, discussing fuel cell power source, cryogenic subsystem, etc 11 p2127 A70-26360

Carbon dioxide output monitoring from biosatellites for circadian system behavior in closed organism-environment systems 16 p2849 A70-33992

Biological satellite experiment, considering long term weightlessness effects on metabolism and biological rhythms of medical leech 16 p2854 A70-33993

Unnatural environment behavior of leeches for long term biosatellite experiment, determining temperature, humidity, oxygen pressure, carbon dioxide concentration, calcium hydroxide limits, etc 16 p2854 A70-33994

GE-RESD primate life support subsystem design for NASA-ARC biosatellite program 17 p3174 A70-34766

Automated orbiting biosatellite program with reentry system, studying long term weightlessness and radiation effects 17 p3178 A70-35258

Xanthine dehydrogenase activity in Drosophila and Habrobracon under hypogravity conditions onboard Biosatellite 23 p4144 A70-43863

Life support systems for biological flight experiments on Biosatellite project and Skylab A mission 23 p4154 A70-44665

BIOSENSORS

U BIOINSTRUMENTATION

BIOSIMULATION

U BIONICS

BIOSPHERE

U EARTH HYDROSPHERE

U LOWER ATMOSPHERE

BIO SYNTHESIS

Catecholamines biosynthesis, distribution, combining, uptake, deposition, release and metabolism in physiological and pathological reactions of organism 01 p0019 A70-10512

Growth rate effect on glucose utilization rate using sporogenic strain of Bacillus subtilis during N and L-tryptophan limitation 01 p0021 A70-10790

Biophysics research, discussing supramolecular biological structures, synthesis of proteins, nucleic acids and genetic codes, biological membranes, coding in nervous system, etc 03 p0420 A70-13491

Melatonin biosynthesis, discussing regulation by light and sympathetic nerves, daily pineal rhythms, estrous rhythms and ovarian hormones 03 p0424 A70-13809

Joint Chlorella-yeast cultivation on metabolites, investigating biomass accumulation and pigment synthesis 07 p1197 A70-18655

Biologically active fragments formation and functions in organism following liberation from inactive proteins via limited proteolysis 10 p1811 A70-24390

Cytoplasm, nucleus and membrane combination techniques for reassembly to form viable amoebae 11 p1986 A70-25849

Space diets with pure nutrition for balanced nutrition obtained through biological and physicochemical synthesis 23 p4157 A70-45027

Nitrogen deficient algae nitrification, showing cellular N compounds oxidized to nitrate and nitrite followed by nitrate reductase 24 p4297 A70-45407

Sympathetic transmission model, discussing transmitter liberation capacity under various stresses by mobilization of stores, acceleration of synthesis, etc 24 p4299 A70-45804

Synthesis regulation of p-hydroxybenzoate hydroxylase and protocatechuate oxygenase in beta-ketoadipate pathway in Pseudomonas putida 24 p4304 A70-46145

Heme biosynthesis defect in vitamin E-deficient rats affecting bone marrow synthesis of delta-aminolevulinic acid and liver formation of porphobilinogen 24 p4304 A70-46146

BIOT METHOD

Weighted residual and Biot variational methods for solving one dimensional heat conduction problems 09 p1789 A70-23260

BIOTECHNOLOGY

Laser radiation effects on eye, quantifying light necessary for coagulation for retinal detachment surgery, discussing risks in laser surgery 01 p0037 A70-10859

Nontoxic method of immobilizing protozoan Tetrahymena pyriformis and bacterium Escherichia coli in acrylamide polymers, discussing microorganism viability 05 p0802 A70-16477

Contamination control of spacecraft for planetary exploration missions emphasizing monitoring equipment and cleaning procedures 05 p0808 A70-16702

Peristaltic motion of viscous incompressible fluid, applying long wave approximation to two dimensional urine flow model 07 p1219 A70-19247

Medical laser systems applications, design criteria, general functions, etc 08 p1450 A70-20819

Soviet papers on biocybernetics covering man and computer, biological and engineering systems, heart self regulation, etc 18 p3223 A70-36076

Mechanical analysis involving clamping apparatus for cardiac muscle contractile response 20 p3570 A70-39362

Ultrasonic detection of tooth surface layer demineralization, noting surface and subsurface enamel structural differences 22 p3978 A70-42955

Orbital biotechnology laboratory requirements concerning man systems integration, life support and protective systems 22 p3980 A70-43644

Biotechnological design of shirt-sleeve side-by-side crew station for shuttle vehicle, including pilot vision and landing experience from X-15 program [AIAA PAPER 70-1327] 24 p4416 A70-45923

BIOTELEMETRY

Radio telemetry of athlete hearts, noting strenuous physical stress induction of transient serum potassium increase, metabolic acidosis, T-wave amplitudes, etc 02 p0230 A70-11694

Vital function telemetry system specifications, design and application to highway accident victims 02 p0243 A70-12096

Civil aviation personnel cardiovascular rehabilitation using single-lead electrocardiographic telemetry for monitoring and assessing cardiovascular status during supervised exercise 03 p0438 A70-14069

Energy converters and radio transmitters for physiological telemetry, using electric power converted from thermal and mechanical energy of human respiratory activity 04 p0644 A70-15276

Miniature piezoresistive pressure transducers for catheter and external physiological measurements in small animals

07 p1220 A70-19297

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation

09 p1615 A70-22091

Physiological reactions detection, transmission and data evaluation of aircraft pilots subjected to various stress environments, using radio telemetry

09 p1626 A70-23009

HF permittivity variations detector for blood circulation telemetry

14 p2542 A70-30389

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation

15 p2685 A70-32687

Human phasic right ventricular blood velocity, examining respiration, rhythm disturbances and Valsalva maneuver influence by radiotelemetry

16 p2850 A70-33111

Bioradiotelemetry of human cardiac activity during professional activities, using ultrasonic searchless Doppler cardiography

17 p3038 A70-35365

Multipurpose microminiature multichannel biomedical telemetry system, discussing design

19 p3368 A70-37856

Dynamic radio telemetry in physiology and medicine, discussing recordable parameters, multichannel systems, automatic data processing, etc

19 p3370 A70-38216

Cardiovascular stress testing using posterior bipolar lead for radiotelemetry monitoring

20 p3578 A70-39199

Radio telemetry measurements of blood pressure and flow in unrestrained animals

20 p3579 A70-39370

Four channel FM radio telemetry for exercise physiology, measuring EKG, respiration rate and pulmonary ventilation

23 p4151 A70-44380

Digital recording system for body temperature telemetry from small animals, using FM transmitter implanted in peritoneal cavities

23 p4151 A70-44381

Astronaut biological parameters monitored under prolonged space flight conditions for rescue operations

23 p4146 A70-44678

BIOTITE

Static and shock kink bands in biotite deformed by metamorphism, meteorite impact, nuclear explosion and laboratory experiments

09 p1665 A70-22053

Shock deformation of single crystal biotite /lepidomelane/ imbedded in impedance matching NaI, relating kinking intensity to peak pressure and pulse duration

09 p1670 A70-23375

Erasure fission tracks in soda-lime glass, tektite, biotite and apatite by shock loading, determining dynamic pressure and associated temperature effects

19 p3414 A70-38035

BIPROPELLANTS

U LIQUID ROCKET PROPELLANTS

BIRDS

NT CHICKENS

NT PIGEONS

Bird impact damage effect on aircraft structural design, considering forward facing areas and minimum weight

01 p0200 A70-10687

Bird deflection grill device for turboprop engine inlet ducts, noting effects on inlet flow characteristics, engine performance, etc

01 p0165 A70-10688

Bird strikes on aircraft, discussing airport control and environment alteration, radar tracking and link between migratory flights and weather conditions

03 p0411 A70-13075

Icing, bird collisions and static charge problems for jet aircraft, discussing protective devices

03 p0413 A70-13792

Degenerate retinal fibers in duck photoreceptor path connecting to supraoptical hypothalamic region detected following optic nerve dissection

03 p0427 A70-13955

Flight Impact Simulator for simulating bird strikes and bird-proofing of aircraft

16 p2888 A70-33290

Bird hazards to aircraft - Conference, Queens University, Canada, September 1969

18 p3210 A70-35976

Netherlands Air Force bird strike problem and warning system

18 p3211 A70-35977

RAF aircraft damage due to bird strikes in U.K., discussing preventive measures at airfields

18 p3211 A70-35978

German Air Force aircraft bird strikes statistics

18 p3211 A70-35979

West German aircraft bird hazards problems, discussing research activities and recommendations for strike avoidance

18 p3349 A70-35980

Statistical measurement of bird hazards to aircraft in terms of strike rates at airports, considering international strike rate standard

18 p3211 A70-35981

FAA research activities on eliminating birds at airports and improving aircraft components resistance to impact, including interagency committee functions on hazard problems

18 p3349 A70-35982

Bird hazards at Hong Kong airport, considering environmental and ecological problems

18 p3222 A70-35983

U.S. Air Force Bird-aircraft collisions problem and bird control research

18 p3211 A70-35984

Aircraft bird hazards in New Zealand, discussing ecological research techniques and preventive measures

18 p3212 A70-35985

Bird strikes in U.S.S.R., discussing frequency, damage, etc

18 p3212 A70-35986

Aircraft damage from bird impact and alleviating measures, taking into account windshield and intake guard designs, microwave beams for protection and chemical agents as repellent

18 p3212 A70-35987

Military airlift command bird hazard minimization near airfields by environmental control, including uses of scare devices, chemicals, trapping, etc

18 p3212 A70-35988

Canadian civil aircraft bird hazards problem and alleviating measures including airport surrounding lands control

18 p3212 A70-35989

Bird scaring from airfields based on ecological research

18 p3222 A70-35990

Aircraft bird hazards minimization by planning airport location and surroundings

18 p3236 A70-35991

Bird dispersal techniques in use or under study in Britain, including neurophysiological and bioacoustic systems to minimize hazards on airfields

18 p3222 A70-35992

Bird dispersal measure at airports, using behavioral and electrophysiological effects of high power microwave radiation

18 p3222 A70-35993

Aircraft design minimizing damage by bird strikes to gas turbine engine components, discussing service experience, airworthiness demonstration tests and research programs

18 p3300 A70-35994

Gas turbine aero engines damage due to bird strikes, emphasizing rig testing and simulation at first stage rotor blading

18 p3236 A70-35995

Prototype grill device for turboprop aircraft engine inlet protection against bird ingestion, discussing performance tests

18 p3212 A70-35996

International Civil Aviation Organization (ICAO) work on bird hazard reduction, including aircraft airworthiness specifications, bird data dissemination, etc

18 p3349 A70-35997

Airport bird detection equipment /ABDE/ radar to display airfield map for presence and magnitude of bird groups and vegetation on runway

18 p3226 A70-35998

Birdstrikes as aircraft hazard, discussing structural damage, engine ingestion and various countermeasures

18 p3213 A70-36319

Respiratory gas metabolism of liver, heart, brain and muscle tissues in birds exposed to various ambient temperatures for long periods

18 p3220 A70-36547

Soviet monograph on collision hazards between aircraft and birds covering accidents, damage and preventive measures

23 p4137 A70-44099

Soviet civil aircraft-bird collisions, stressing hazard forecast and prevention by bird identification and migration patterns

24 p4289 A70-45644

Birdproofing aircraft research program using pneumatic cannon firing real and simulated bird carcasses

24 p4292 A70-46398

BIREFRINGENCE

Picosecond on-off light gate based on Kerr cell design, using optical pulses to induce birefringence in liquids

01 p0111 A70-10571

Birefringent lens producing spatially separated multiple images, discussing polarization control, thin crystalline lenses and electro-optic control

01 p0091 A70-10915

Birefringences and phase retardations in lithium niobate crystals for light propagation directions near optical axis, considering electro-optic modulation

02 p0313 A70-12451

Optically trapped filaments in liquid carbon disulfide by side illumination and crossed polarizers using glass laser, noting birefringence and duration time

04 p0703 A70-15619

Successive small birefringences undergone by polarized light ray crossing photoelastic model represented by rotations in equatorial plane on Poincare sphere

06 p1168 A70-17918

Birefringence determination from contrast of interfering natural light beams

08 p1543 A70-20521

Electro-optic effects in ferroelectric ceramics with electrically variable coefficients of piezoelectricity and birefringence, discussing applications

09 p1739 A70-22633

Magneto-optical birefringence anisotropy and light propagation in terbium ferrite garnet in presence of Faraday and Cotton-Mouton effects

11 p2097 A70-25377

Solar horizontal telescope monochromator improvement by adding birefringent monochromator and diffraction grating

11 p2057 A70-26590

Photoelastic analysis using fringe multiplication instrument applied to two dimensional models under load and frozen stress slices

11 p2061 A70-26834

Instrument for measuring and recording strains and birefringence in glasses and crystal under compressive, tensile or bending loads at low/high temperatures and in vacuum

12 p2237 A70-28161

Ruby laser radiation frequency control by birefringent calcite plate and KDP electro-optical Q switch

13 p2428 A70-29363

Zero birefringent blend consisting of rigid and flexible polyesters with viscoelastic mechanical and optical response

15 p2765 A70-32318

Hologram interferometry with birefringent objects, showing advantages over polariscope and classical interferometers

17 p3086 A70-35013

Variable ratio beam splitter design and operation for lasers, using birefringent optics

18 p3270 A70-36755

Holographic registration of isochromatic and isopachous diffraction patterns of photoelastic birefringent objects, showing stress concentrations

19 p3422 A70-37649

Thermally induced stress birefringence effect on linearly polarized CW YAG-Nd laser

21 p3834 A70-40566

Thermal and birefringent effects on output of continuous Nd-YAG laser rod, using 6328 A probe

21 p3837 A70-41906

YIG single crystals piezo-optical effect and magnetic double refraction, describing stress measurement technique

23 p4230 A70-43931

Plasticized high polymers mechanical and optical properties, studying birefringence phenomena interrelation with applied external stresses

24 p4424 A70-45590

BIREFRINGENT COATINGS

Stress analysis based on observing birefringence effects in photoelastic surface coating

04 p0689 A70-14922

Fiber-reinforced narrow rectangular beam flexural strain analysis by birefringent coating technique, deriving isochromatic and isoclinic patterns

23 p4275 A70-44915

BIRTH

Gravity effects on perinatal organ growth in chicks

24 p4297 A70-45342

BISMUTH

Electrode surface bismuth coating selected for reducing electrostatic analyzers photocurrents

05 p0851 A70-16734

Bismuth concentrations in various carbonaceous and equilibrated chondrites determination by neutron activation technique

07 p1388 A70-20036

Oscillatory transverse and longitudinal magnetotription in single crystal Bi, obtaining deformation potentials

08 p1557 A70-21838

Far IR radiation transmission through bismuth and gallium normal and superconducting thin films, considering transition temperature role

09 p1739 A70-22323

Bi polycrystalline film grown by vacuum deposition on amorphous substrates investigated for electron microscope beam effects

12 p2285 A70-27261

BISMUTH ALLOYS
Quenched MnBi thin films measured for magnetic, magneto-optical and optical properties, noting Faraday rotation

12 p2284 A70-27246

Bi-Sb alloys, discussing structural data, crystal preparation, band structure, pressure, nonohmic conductivity, thermoelectric, thermomagnetic and magnetothermal effects 14 p2625 A70-30332

BISMUTH COMPOUNDS
NT BISMUTH OXIDES

Laser induced vaporization of Bi compounds with group VIa elements, analyzing vapor species, condensed phase and molecular configurations by mass spectroscopy 08 p1455 A70-21338

Electro-optic device using ferroelectric bismuth titanate, discussing electrical and optical properties and matrix addressed display 21 p3830 A70-42114

Thin film BiSb-oxide-BiSb tunneling junction I-V characteristics anomalies as function of temperature, magnetic field and bias voltage 24 p4390 A70-45662

BISMUTH OXIDES

Bismuth oxide resistivity and structural characteristics at high temperature and during transformation from solid to liquid state 10 p1927 A70-24272

BISTABLE AMPLIFIERS

U FLIP-FLOPS

BISTABLE CIRCUITS

Pneumatic fluidic oscillator consisting of bistable multivibrator, analyzing feedback loop operation based on electropneumatic analog system 02 p0229 A70-12673

Bistable optical resonators with saturable absorbers, discussing hysteresis characteristics and Q switching applications 06 p1105 A70-17449

Transistor bistable multivibrator design by graphic analytic method, considering effects of loading and supply voltages, temperature and component values on circuit performance 10 p1848 A70-23995

BISTATIC REFLECTIVITY

Backscattering, bistatic scattering and current distribution on thin wires during electromagnetic wave incidence 15 p2700 A70-32412

Bistatic lidar/laser radar/ detection of atmospheric aerosol size distribution, using angular scattering measurements of polarization parameters 15 p2704 A70-32609

BIT SYNCHRONIZATION

Bit-slippage errors due to onboard tape recording of PCM/FM telemetry data for Apollo Telescope Mount, noting roles of S/N ratio, data characteristics, etc 01 p0044 A70-10940

Bit transition time /bit synchronization/ estimation, developing bit synchronizer from Bayes estimation and optimization theories [AAS PAPER 69-608] 04 p0647 A70-14655

Random synchronization errors in PN and PSK systems reduce input signal power and introduce additional self noise 07 p1236 A70-20069

PSK demodulation by optimal carrier and bit synchronization methods based on nonlinear filter theory, relating error probability to signal to noise ratios 08 p1458 A70-20795

TDMA system burst synchronizer with periodic channel slots reallocation feature 10 p1835 A70-24331

Bit clock synchronous system for communications satellites TDMA 10 p1839 A70-24368

Review of 1969 London International Conference on Digital Satellite Communication session covering modulation, synchronization and coding [AIAA PAPER 70-464] 11 p1997 A70-25409

Phase noise and cycle slip optimization of steady state digital data transition tracking loop used as bit synchronizer in phase-coherent receiver 11 p2024 A70-26202

Discrete sequential algorithms for bit synchronization implemented with digital computer for optimum data detection 12 p2184 A70-27249

Noise stability of optimal binary detection receiver of rectangular-pulse and discrete pseudorandom signals under nonideal synchronization 13 p2364 A70-28869

Digital transition tracking symbol synchronizer improving SNR without lowering loop bandwidth [JPL-TR-32-1488] 13 p2367 A70-29591

Frame synchronization in biorthogonal coded multiplex communication system, describing PCM, pattern insertion and double encoding methods 17 p3045 A70-35266

PGM noisy high bit rate processing system, describing preprocessor, bit detector and synchronizer 19 p3379 A70-37903

Digital bit synchronization phase locked loop steady state and transient performance in white Gaussian noise 21 p3802 A70-41352

PCM/NRZ signal band-limiting effect on bit error probability, using sample detector 22 p3990 A70-43339

BITERNARY CODE

Bit error probability after decoding for binary perfect single error correcting codes 11 p2014 A70-26247

BITS

Holographic optical memory systems operational principles and potential advantages, discussing feasibility of 100 million bit memory capacity and one microsecond random access time 10 p1892 A70-25245

Fixed information bit rate approach to coding over space channel introducing redundancy and check digits for error probability 11 p2014 A70-26223

Telemetry decommutation algorithm for applying Bayesian decisions to demodulated received bits data 11 p2008 A70-26238

Linear superposition /LSP/ of isolated pulses in tape recording, discussing validity for multibit waveform synthesis 11 p2057 A70-26627

Bits quantity required to represent coefficient within digital controller with high sampling rate 12 p2203 A70-27410

Digital controller bits number determination to meet nominal controller coefficients accuracy requirements 16 p2867 A70-33304

BITUMENS

Powdered metallic additions effect on combustion rates of ammonium perchlorate with bitumen and polymethyl methacrylate and potassium perchlorate with bitumen mixtures 18 p3299 A70-36247

BIVARIATE ANALYSIS

Fifty percent coverage problem /Circular Error Probable/ of general bivariate Gaussian distribution from viewpoint of navigation systems error analysis 16 p2948 A70-33451

BLACK ARROW LAUNCH VEHICLE

U BLACK KNIGHT ROCKET VEHICLE

BLACK BODY RADIATION

Thermodynamic aspects of ray invariance of spectral brightness ratio to square of local index of refraction compared to black body power radiation 01 p0144 A70-11293

Electromagnetic wave diffraction on absorbing black metallic and magnetic cylinders and strip, plotting radar scattering cross sections 05 p0813 A70-16262

Radiation fluxmeters involving black plates and sensor disk respectively for use in space simulation chambers 05 p0849 A70-16636

Antenna calibration by measuring emission of absorbing black disk positioned in Fresnel region 07 p1239 A70-18759

Inverse Compton collisions of relativistic electrons with universal black body photons for diffuse component of cosmic X rays 07 p1369 A70-20166

Black body radiation properties with temperature important only in rest frame, using transformation formulas for coherence and spectral parameters 10 p1968 A70-24631

Cosmic background radiation interactions with matter, discussing molecular excitation and black body radiation interpretation 12 p2291 A70-27054

Observational cosmology, discussing aspects of radio source and quasar counts, intergalactic medium and cosmic black body radiation 12 p2298 A70-27061

Variable reproducible black radiator of resistance heated carbon tube designed for temperatures between carbon glowing and sublimation point 12 p2329 A70-27090

Radiative heat transfer in spherical space bounded by perpendicular annular ring system with gray diffuse and absolutely black body surfaces 12 p2331 A70-27554

Tungsten strip lamps spectral radiance calibration, discussing accuracy requirements for radiation constants, wavelength and black body temperature 13 p2410 A70-29655

Black bodies radiation properties and design for applications as absolute radiation standards 13 p2410 A70-29657

Black body design for radiometry, discussing error sources in calibration 13 p2410 A70-29658

Comet Bennett 1969 photometric observations, showing blackbody-like continuum at short wavelengths with sharp peak due to silicate grains 14 p2642 A70-30895

Reflectivity measurement in near IR using black bodies near room temperature for light sources 14 p2588 A70-31210

Black body cavity type radiometers for high accuracy measurement of irradiance 15 p2737 A70-32036

Uniform model universes containing gaseous matter and background blackbody radiation, solving Einstein equations without zero pressure assumption 18 p3313 A70-36215

Antenna calibration by measuring emission of absorbing black disk positioned in Fresnel region 18 p3233 A70-37103

Reflectance measurements of directional spectral emittance of black body cavities with specific geometries, using laser source and integrating hemi-ellipsoid 20 p3627 A70-39091

Stepwise linear regressions method for estimating black body surface radiances from model atmospheres and corresponding simulated Nimbus 2 window-channel radiances 22 p4013 A70-42617

Ta spectral emissivity, using ratio of specimen surface and black body spectral radiant intensities 23 p4207 A70-44447

Uranus and Neptune millimeter wave observations, showing brightness temperatures in excess of black body equilibrium temperatures derived from solar heating 24 p4403 A70-45398

BLACK KNIGHT ROCKET VEHICLE

Manufacturing and technology of hybrid microelectronics packaging in Black Arrow X-3 satellite equipment 16 p2879 A70-33959

UK space program, describing scientific satellites, Black Arrow launch vehicle and sounding rockets 17 p3167 A70-35206

Black Arrow launch vehicle for inexpensive and reliable payload injection into low polar orbits 17 p3178 A70-35255

Black Arrow X3 spacecraft design and experiments, including silicon cells performance electronic assemblies and micrometeoroid fluxes 17 p3178 A70-35256

BLACKBURN B-103 AIRCRAFT

U BUCCANEER AIRCRAFT

BLACKOUT [PHYSIOLOGY]

NT BLACKOUT PREVENTION

BLACKOUT [PROPAGATION]

NT ATMOSPHERICS

NT COSMIC NOISE

NT DAWN CHORUS

NT ELECTROMAGNETIC NOISE

NT HISS

NT IONOSPHERIC NOISE

NT IONOSPHERICS

NT SHOT NOISE

NT SUDDEN ENHANCEMENT OF ATMOSPHERICS

NT THERMAL NOISE

NT WHISTLERS

Radiation enhancement from spherical antenna by overdense plasma coating, noting use for reentry vehicle blackout prevention 02 p0262 A70-12601

BLACKOUT PREVENTION

Syncope prevention in orthostatic heat test by inflating cuffs around legs and lower abdomen 24 p4306 A70-45331

BLADDER

H ion increased activity effect on sodium transport across short circuited turtle bladder 02 p0234 A70-11730

ADP-ATP catalyzed exchange reaction in turtle bladder microsomes, using chromatographic measurements of conversion rates 17 p3034 A70-35900

Intermediary complexes between Na-K ion stimulated ATPase /adenosine triphosphate/ and microsomal proteins of turtle bladder epithelial cells 18 p3225 A70-36233

Turtle bladder walls osmotic properties, discussing transrenal water flow transient acceleration by sodium transport inhibition 21 p3762 A70-41223

Turtle bladders isolated mucosal and serosal fractions histological and physiological properties, discussing ion transport and oxygen consumption 21 p3762 A70-41224

BLADE TIPS

Tip clearance effects in axial flow turbomachinery, predicting blade-to-blade variation in outlet angles and stagnation pressure losses [ASME PAPER 69-WA/FE-26] 04 p0733 A70-14775

Wire dischargers at helicopter propeller blade tips reducing electrostatic RF interference, substituting stainless steel wire tufts for nichrome wire 05 p0848 A70-16320

Tuft position on rotating helicopter blade in hovering and forward flight, calculating tip path plane and tuftlines 08 p1438 A70-21868

Efficiency loss with tip clearance predicted for mixed and axial flow single stage turbomachines, using perfect fluid model 11 p1974 A70-25787

Tip clearance contactless measurement in jet engine turbine based on radioactive isotopes properties 11 p2055 A70-26446

Inducer tip clearance effect on centrifugal pump section performance with velocity and total head distributions at outlet 14 p2592 A70-31332

Sweep tip rotor blade design, discussing wind tunnel-whirl stand correlations 17 p3015 A70-34736

BLADES

Flexible blades cascade design compared with various correlation criteria, describing cascade and profiles geometry and loss coefficient 05 p0790 A70-16029

Film type solar energy reflector peripheral blades for connection to receiver, discussing precession control and despin for rotating concentrators 07 p1196 A70-19501

Shear flow near walls through cascade of untwisted blades, observing variation in lift coefficient across span 11 p1975 A70-25788

Film type solar energy reflector peripheral blades for connection to receiver, discussing precession control and despin for rotating concentrators 15 p2678 A70-32746

BLADES [CUTTERS]

NT RAZOR BLADES

BLANKS

Impact against elastoplastic blank allowing for base and striker compressibility, giving solution in region of plane wave first reflection from base 05 p0947 A70-17016

Kinematic characteristics of annular-blank elements extruded by pulsed magnetic fields, noting proportionality to energy stored in capacitor bank 05 p0857 A70-17018

Displacement rate measurement in initial portion of blank subjected to explosive forming by capacitance pickup 06 p1076 A70-17868

Explosive forming of large domes from flat blanks with full scale trial-and-error elimination [ASTME PAPER MF-69-186] 12 p2240 A70-27079

BLASIUS EQUATION

Initial value method for solution of nonlinear two point boundary value problems in fluid mechanics, considering Blasius equation and unsteady gas flow [ASME PAPER 69-WA/FE-8] 04 p0667 A70-14782

BLASIUS FLOW

Blasius flow stability on deformable surface of membrane using Orr-Sommerfeld equation to calculate amplitude of function for perturbation flow 09 p1658 A70-22182

Numerical integration of Orr-Sommerfeld equation for flat plate Blasius boundary layer transition 23 p4179 A70-43973

Tollmein-Schlichting waves in flat plate Blasius boundary layer, comparing experimental and theoretical critical Reynolds number 23 p4179 A70-43975

BLAST LOADS

Initial blast wave axisymmetric shock-on-shock interaction for blunt bodies moving supersonically at zero angle of attack solved in Taylor series 10 p1797 A70-23954

Nonsteady flow past duct junctures, investigating ventilation system of underground bomb shelter for blast wave passage prevention 11 p2036 A70-26139

Shock wave diffraction by moving thin wing over flat terrains, discussing aircraft blast encounter 18 p3205 A70-36195

Blast loaded cylindrical shell collapse hinge dynamic instability prediction by mathematical model 19 p3545 A70-38334

BLASTOFF

U ROCKET LAUNCHING

BLEACHING

Wave front reconstruction for perfectly bleached holograms not achievable by simple coherent illumination due to remaining amplitude variation 04 p0691 A70-15033

Bleach process giving high efficiency low noise holograms using potassium ferricyanide, noting drying procedure and developer 06 p1072 A70-18520

Efficiency, low noise and photochromic effects suppression in bleached silver halide holography with various films 20 p3627 A70-39097

BLEED-OFF

U PRESSURE REDUCTION

BLENDS

U MIXTURES

BLIND LANDING

Holographic dynamic head-up display system for aircraft carrier deck landings in low visibility 12 p2232 A70-27371

All-weather automatic landing in blind conditions, considering Trident system 14 p2615 A70-31392

BLINDNESS

NT FLASH BLINDNESS

Bleached eye pressure blinding at bleaching light termination during wavelength settings, discussing effect on interocular hue shifts 03 p0427 A70-13951

Character recognition methods applied to reading machines transforming printed material into forms acceptable to blind 13 p2360 A70-29809

Blind persons susceptibility to acute motion sickness during stressful Coriolis acceleration 15 p2689 A70-31887

BLISTERS [PROTUBERANCES]

U PROTUBERANCES

BLOCKING

Electrocardiographic features and clinical finding in patients with left axis deviation combined with right bundle branch block 01 p0013 A70-10269

Alpha rhythm phase coherence during photic blocking, examining pacemaker model 19 p3368 A70-37811

BLOCKS

Buckling equilibrium equations for thick rectangular block under compression loads, noting bifurcation points 19 p3536 A70-37683

BLOOD

NT EOSINOPHILS

NT ERYTHROCYTES

NT LEUKOCYTES

NT LYMPHOCYTES

NT WHITE BLOOD CELLS

Artificial pulmonary ventilation effects on carbonic anhydrase activity in human blood during hypoventilation and hyperventilation 01 p0025 A70-11029

Blood pH effects on adrenomedullary response to hemorrhage, studying catecholamines release in anesthetized dogs 02 p0235 A70-11733

Oxygen and carbon dioxide partial pressures bloodless determination in mixed venous blood, using platinum electrode and IR carbon dioxide meter 02 p0236 A70-12091

Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs 03 p0423 A70-13706

Stimulated thyroid gland temperature variations and oxygen metabolism in decorticated dogs and anesthetized rabbits and rats 04 p0639 A70-15511

Ionol concentration variations in oncological patients blood, using liquid gas chromatography to determine removal by urine and feces 07 p1209 A70-19519

Automatic control theory found effective in studying arterial blood saturation with oxygen during ascent to 4000 m in pressure chamber 07 p1210 A70-19523

Blood reflection densitometer with linear response to changes in indocyanine green dye concentration, using simple analog computation 07 p1221 A70-19589

Adaptive reactions in thyroidectomized rats blood and brain during adaptation to hypoxia compared with intact animals 07 p1214 A70-19794

Radial immunodiffusion for serum proteins quantitation adapted to capillary blood and compared with results for venous blood 07 p1214 A70-19932

Biochemical and histochemical parallels of enzymatic activity in blood, cardiac muscle and liver under hypoxia 08 p1446 A70-21445

Acute oxygen deficiency effects on blood electrolyte concentrations in altitude-adapted and nonadapted humans 09 p1616 A70-22217

Blood carbon dioxide and oxygen content determined by respiration mass spectrometer using carrier gas 09 p1629 A70-23584

Physiology and pathophysiology of oxygen transport in human blood, discussing fluctuations in O₂ capacity and affinity 10 p1821 A70-25079

Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs 11 p1985 A70-25506

High altitude effects on total protein content and composition in rats blood serum 13 p2352 A70-29346

Acceleration effects on Na, K, and pH in rabbits cerebrospinal fluid and cerebral blood 13 p2352 A70-29347

Gas mass diffusivity measurements in plasma and reaction velocity constant in human and dog blood 15 p2692 A70-32311

Pursed lips breathing effects on ventilation and blood gas exchange in patients with chronic airway obstruction 15 p2684 A70-32538

Diffusion coefficient of dissolved oxygen in blood proteins aqueous solutions 15 p2686 A70-32848

Arterial blood carbon dioxide tension effects on rhythmic volley activity of respiratory medulla oblongata neurons in cats 17 p3030 A70-35354

Reliability tests of blood carbon dioxide pressure measurement methods, indicating carbon dioxide-electrode method superiority 19 p3365 A70-38371

Heart stroke volume estimation at submaximal exercise using blood hemoglobin content and heart rate 20 p3576 A70-40328

Lateral and angular acceleration effects on blood and urine contents in specific metabolic indices of healthy young men 22 p3971 A70-43136

Mossbauer spectrum of submolecular changes of oxyhemoglobin in animal blood exposed to microwave irradiation 23 p4144 A70-43788

Blood oxygen, carbon dioxide and pN during hypothermia induced by He-oxygen mixture and cold exposure in hamsters, comparing with hibernation state 23 p4147 A70-44787

Altitude and alcohol intake effects on blood alcohol concentrations 24 p4306 A70-45329

Ganglione and quaterone cholinolytic agents effects on arterial blood acid-base balance indicators in cats 24 p4298 A70-45633

BLOOD CIRCULATION

NT BRAIN CIRCULATION

NT CARBOXYHEMOGLOBIN

NT CORONARY CIRCULATION

NT INTERCRANIAL CIRCULATION

NT INTRAVASCULAR SYSTEM

NT ISCHEMIA

NT OCULAR CIRCULATION

NT PULMONARY CIRCULATION

Pulmonary artery blood sampled before or during rebreathing of carbon dioxide in nitrogen mixtures, at rest and during exercise, discussing oxygen pressure changes 01 p0020 A70-10652

Retinal vessels of humans at 11-2.0 atmosphere oxygen partial pressures, noting arterioles and venules dilation response to hypoxia and vasoconstriction response to hyperoxia 01 p0023 A70-10863

Biomechanics of microcirculation, discussing rheological characteristics of blood, erythrocyte and vessel wall, hydrodynamics of erythrocyte-shaped bodies mathematical models, etc 01 p0039 A70-11160

Humans and dogs breathing CO in closed system, discussing distribution on blood, body stores and oxygen metabolism 02 p0234 A70-11727

Electrical analog simulation of cardiovascular system, determining blood flow rate and pressure in aorta and peripheral vessels 03 p0420 A70-13490

Hemodynamics in cardiosclerosis patients and healthy subjects under hypoxia, investigating heart activity and blood circulation 06 p0994 A70-17667

Biological fluorescent substances passage in rabbit central nervous system as indicators of blood supply to cells 07 p1197 A70-18657

Blood volume and circulation rate in dogs subjected to traumatic shock and hemorrhage under high mountain conditions 07 p1198 A70-18708

Lower limbs circulation of peripheral vascular diseased patients transcutaneously assessed with ultrasonic flow detector, comparing results with arteriograms 07 p1217 A70-18956

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia 07 p1209 A70-19513

German monograph on determination of blood velocity, pressure, pulse rate and vascular structure parameters using Doppler effect 08 p1452 A70-21297

Prolonged hypodynamia effect on human external respiration, arterial blood oxygenation, circulation rate and gas exchange under various physical stress conditions 10 p1814 A70-24674

Human head-up tilt circulatory stress effects on left ventricular systolic time intervals 10 p1820 A70-24937

Brain oxygen supply during cerebral edema, examining venous and arterial blood gases, circulation, oxygen uptake, blood volume and pressure and EEG 10 p1822 A70-25087

ECG changes attributed to reduction of blood supply to myocardium during orthostatic tests after prolonged hypokinesia 11 p1988 A70-26112

Electrical stimulation of dogs hypothalamus effect on blood and lymph circulation and composition
13 p2352 A70-29354

Left ventricle zone as principal reflexogenic zone of heart participating in greater circulation vessel tonus control
13 p2353 A70-29356

HF permittivity variations detector for blood circulation telemetry
14 p2542 A70-30389

Pressure-flow relation for fluid in pipe obeying Casson equation, considering applicability to human blood
15 p2690 A70-31917

Isolated human heart measurements for time course and instantaneous distribution of normal heart excitatory process
15 p2683 A70-32471

Emergency hypotonia regional control with/without blood circulation centralization, describing device consisting of inflatable balloon, extracorporeal shunt, electromagnet valve, manometer and circuit
15 p2687 A70-32891

Arterial pH change effects on circulation and oxygen consumption in dogs, discussing respiratory acidosis heart rate, cardiac output and arterial blood pressure
17 p3024 A70-34593

Atropine effects on circulatory responses to diminished effective blood volume and vasodepressor syncope, noting heart rate increase
17 p3032 A70-35562

Peripheral vasculocapillary blood circulation by television UV capillaroscopy and electronic finger plethysmography
19 p3370 A70-38212

Cardiovascular blood circulation system dynamic characteristics analysis by linear statistical correlation methods, describing test for determining weighting function
20 p3581 A70-39905

Ambient near vacuum pressure effect on blood circulation, examining thoracic aorta blood flow, pressures, gas expansion and water vaporization
20 p3576 A70-40326

Continuous blood oxygen analyzer standardized with atmospheric air, demonstrating on dogs during occlusion of left anterior descending coronary artery
21 p3772 A70-42162

Physical training effects on blood circulation, respiratory and muscular functions in aging persons
22 p3970 A70-42905

Blood-brain and blood-cerebrospinal fluid barriers alterations under various physical environments in manned orbital laboratory
22 p3973 A70-43647

Blood circulatory system and hemodynamic interdependencies simulation by analog computer, using Warner model
23 p4155 A70-44862

Conduit arteries viscoelastic properties in normal and hypertensive dogs from recorded pressure and diameter waves
24 p4299 A70-45808

Arterial hemodynamics in hypertension, discussing pulse changes mechanism as consequence of decreased arterial distensibility via disturbed relationship between ventricular ejection wave and impedance characteristics
24 p4299 A70-45809

BLOOD COAGULATION

Constant magnetic fields effects on blood coagulation processes, describing microcalorimetric determination
01 p0015 A70-10372

Human blood platelets volume measured in Coulter counter, noting relation to temperature
03 p0416 A70-13008

Interactions between nutrition, blood coagulation and atherosclerosis by Duguid theory, emphasizing fibrinolysis, thrombosis and alimentary lipids
03 p0431 A70-14280

Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation
04 p0630 A70-14578

Blood clotting and fibrinolysis under short term physical work in healthy men measured using thrombelastograms
06 p0992 A70-17423

Hydrodynamic model of blood coagulation in stagnation point flow, analyzing platelet diffusion, white cell bonding stress and thrombus formation
06 p1003 A70-18123

Adhesive and aggregative properties of blood platelets in rats after beta irradiation linked to activity of serum factor
07 p1207 A70-19474

Empirical formulas derived for intuitive estimates of blood coagulability in patients to facilitate medication dosage prescription
07 p1210 A70-19558

Platelet aggregation in whole blood, basing measurement method on filtration pressure with added adenosine diphosphate (ADP)
07 p1210 A70-19591

Flight stress in Starfighter aircraft pilots related to fibrinolysis activity in blood
09 p1625 A70-23003

Flight stress effect on blood clotting stabilization of Starfighter aircraft pilots, observing no change in thrombocytes number
09 p1625 A70-23005

Prolonged hypodynamia effect on human blood coagulation, noting antihemophilic effect of physical exercise
10 p1815 A70-24678

Pro- and anticoagulants dynamics in rats blood during early phases of prolonged sound effect
12 p2168 A70-27347

Blood coagulation process, investigating thermal effects by microcalorimetry and correlating with thromboelastographic indices
13 p2353 A70-29502

Thrombus formation on foreign surface in fresh blood stagnation point flow, applying fluid mechanical and mass transfer models
17 p3035 A70-34470

Blood platelets aggregation and release reaction in thromboembolic disease due to injury
17 p3032 A70-35471

BLOOD FLOW

Physiological interpretation of blood velocity curves recorded in right heart cavities of dogs by ultrasonic directional probe, using Doppler effect
01 p0035 A70-10709

Transcutaneous Doppler-shift flowmeter for arterial blood velocity measurement by ultrasound
01 p0037 A70-10880

On-line electronic integration of aortic flow during systole to provide beat by beat readout of stroke volume
01 p0038 A70-11044

Perfusion pressure and flow effects on coronary resistance, noting venous blood perfusion
01 p0026 A70-11075

Dogs coronary vasodilator responses to hypoxia and induced tachycardia before and after lidoflazine and adenosine
02 p0230 A70-11702

Muscle force and electromyogram behavior with alteration in blood flow and composition in anesthetized cats
02 p0231 A70-11708

Spinal cord blood flow response to carbon dioxide partial pressure in anesthetized goats
02 p0232 A70-11713

Blood flow changes in portal vein and hepatic artery of anesthetized cats following intraportal and intrahepatic arterial administration of isoproterenol, epinephrine and norepinephrine
02 p0232 A70-11718

Canine aortic flow as function of simultaneous mean aortic and mean right atrial pressures
02 p0233 A70-11723

Oxygen consumption, lactic acid production and mechanical performance of anesthetized dog gastrocnemius muscle with increased blood flow
02 p0235 A70-12090

Capillary blood flow, discussing red blood cells deformation, motion, pressure drop and plasma flow/bolus/ between red cells
02 p0238 A70-12545

Stroke volume formula depending on blood density and viscosity, indicating Hagen-Poiseuille law nonapplicability to ballistocardiography
02 p0248 A70-12681

Posture effect on ballistocardiograms, considering ventricular ejection flow changes
02 p0248 A70-12684

Doppler flowmeter-catheter system to record aortic flow velocity in man during cardiac arrhythmias, considering atrial fibrillation, heart block, etc
02 p0241 A70-12697

Time varying blood flow in pulmonary capillaries affecting overall diffusing capacity and alveolar-arterial oxygen tension gradient
03 p0421 A70-13570

Statistical equation of motion of blood by averaging motion of individual blood elements over small volume, finding constitutive equations
03 p0434 A70-13572

Vascular electrical activity in cats and rats by inserting glass microelectrode into blood vessel, showing blood flow conditioning effect on activity
03 p0422 A70-13691

Cardiac output and coronary blood flow changes in patients at rest and during peak exertion, stating correlation coefficients
03 p0428 A70-14065

Pulsatile flows in living animals and model arteries, discussing flow profiles, instability and wall shear
03 p0430 A70-14244

Blood flow through veins and collapsible tubes simulated by physical model, downstream pressure effect and importance of collapse phenomena
04 p0641 A70-14631

Analog computer cardiovascular system model to simulate pressure and flow events in veins including effects of gravity, collapse, breathing and venous valves action
04 p0641 A70-14632

Blood flow sensors based on electrical conductivity dependence on flow rate, discussing system instrumentation and experimental results
04 p0644 A70-15295

Blood flow velocity and pressure measurements on conscious man with catheter-tip velocity probe
04 p0645 A70-15439

Myocardial blood flow in patients with acute myocardial infarction determined from measuring effective capillary flow (ECF) by direct counting of rubidium 86 uptake
04 p0636 A70-15468

Arterial pressure and suprarenal blood flow in dogs under basal conditions and nerve stimulation by stochastic method using analog correlator
05 p0806 A70-16400

Slope and shape of blood-gas dissociation curve as factor influencing pulmonary gas exchange in presence of ventilation-perfusion inequality
06 p0994 A70-17522

Frequency analysis of arterial sounds used in studying atherosclerosis, correlating spectra with jet flow turbulence past occlusion
06 p1003 A70-18220

Haematocrit variations effect on electromagnetic blood flowmeter sensitivity, discussing blood specific impedance changes
07 p1217 A70-18951

Electromagnetic induction blood flowmeter measuring blood velocity as function of voltage in pick-up electrodes
07 p1217 A70-18952

Increased blood flow resistance caused by red cell membrane shrinking due to plasma surface tension alteration
07 p1203 A70-18999

Cylindrical tubes steady axisymmetric inlet flow at lower Reynolds numbers, applying results to blood vessels entry flow
07 p1205 A70-19244

Blood-endothelial surface shear stress in artery inlet, considering asymmetric and radially symmetric plugging effects
07 p1220 A70-19248

Normal and stenosed aortic valve closure wing measurements in model valve in pulsatile water tunnel showing turbulence generation
07 p1220 A70-19249

Phasic aortic blood flow and left ventricular pressure measured at constant heart rates during pulsus alternans, discussing ejection duration and peak flow rate
07 p1210 A70-19588

Posture change effects on vasodilator responses in humans, studying reactive, postexercise and local heat hyperaemia in forearms of subjects lying and standing
07 p1211 A70-19596

Oxygen uptake by brain as function of oxygen tension in rats using venous outflow method and blood gas analysis
08 p1446 A70-21436

Strong magnetic field effects on squirrel monkeys electrical and mechanical cardiac functions determined from vectorcardiogram and aortic blood flow characteristics
09 p1617 A70-22524

Conscious dogs temporary local hypoxia effect on coronary blood flow regulation
09 p1623 A70-23585

Vertical distribution of pulmonary blood flow (DPBF) in dogs without thoracotomy prone, supine, head-up, head-down and right and left decubitus positions
10 p1810 A70-24004

Sodium balance effect on intrarenal distribution of blood flow in normal man determined with Xe washout method
10 p1810 A70-24005

Physiology of oxygen transport in human organism and genesis of tissue hypoxia, discussing pulmonary functions, blood transport properties and tissue blood flow and diffusion
10 p1821 A70-25077

Pulmonary blood flow direction and distribution in dogs during near vacuum exposure and recompression
11 p1984 A70-25351

Shock waves in unsteady aortic blood flow at systole beginning, considering aorta elastic properties and shock formation distances
11 p1992 A70-26479

Electromagnetic blood flow determination by catheter in external magnetic field, discussing intravascular EM flow sensor capable of percutaneous introduction into vascular system
11 p1993 A70-26663

Indicator dispersion model for cardio-pulmonary system based on continuity past sampling site, observing diffusion coefficient nonlinear increase with blood speed
12 p2174 A70-27019

Canoe paddlers physical training effect on cardiac output and local blood flow and metabolism at and during exercise and recovery
12 p2169 A70-27653

Blood flow redistribution during sustained high skin temperatures of men in supine position

12 p2169 A70-27654

Autonomic effects on heart rate, portal, renal, cutaneous and muscle blood flows during arterial hypoxia in unanesthetized sham operated thalamic and pontine rabbits

12 p2170 A70-27899

Systemic hypoxia effect on renal tubule sodium reabsorption in anesthetized mongrel dogs

[AMRL-TR-69-135] 13 p2353 A70-29435

Implantable EM blood flowmeter errors due to nonsymmetrical blood flow velocity distribution and nonuniform magnetic flux density

14 p2542 A70-30797

Comparative cardiac output measurements in dogs using left/right heart dye injections and pulmonary/aortic electromagnetic flow probes

15 p2688 A70-31434

Intraarterial hot film constant temperature anemometry for point blood velocity measurements, detecting flow reversal

15 p2688 A70-31435

Red cell deformability and flow resistance and blood electrical resistance under low g centrifugation

15 p2680 A70-31700

Miniaturized electromagnetic catheter flowmeter for measuring volume flow rate by potential difference between electrodes

15 p2689 A70-31747

Cardiovascular and circulatory phenomena fluid mechanical aspects emphasizing pulsatile blood flow

15 p2720 A70-31789

Doppler effect pulsed ultrasonic blood flowmeter using transducer alternating as transmitter and receiver

15 p2690 A70-31919

Automatic numerical analysis of velocity information from Doppler effect ultrasonic blood flow meter

15 p2691 A70-31920

Phase shift ultrasonic flowmeter measuring transit time between oppositely propagating waves in blood vessels

15 p2691 A70-31921

Data system obtaining sampling rate for cardiac volume measurement via fast biplane cineangiography

15 p2691 A70-31922

Water and blood flow characteristics in converging-diverging plastic tube, considering implications in occlusive vascular disease

15 p2691 A70-31937

Wave propagation through Newtonian fluid in compressible thick walled viscoelastic tube, considering blood flow in arteries

15 p2691 A70-31938

Comparative arterial pressure pulse transmission velocity in dogs, relating wall elasticity with vascular disease

15 p2682 A70-31939

Mechanical model of arterial viscoelasticity effect on input impedance and wave travel in systematic tree

15 p2691 A70-31941

Air bubble breaking in blood and water flow passage of simulated cardiopulmonary bypass system with flow constriction

15 p2692 A70-32312

High altitude liver function and blood flow, determining bromsulphthalein transport maximum and storage capacity and galactose elimination

15 p2683 A70-32531

Human phasic right ventricular blood velocity, examining respiration, rhythm disturbances and Valsalva maneuver influence by radiotelemetry

16 p2850 A70-33111

Arterial wall nonlinear distensibility effects on blood flow velocity profiles, considering various mathematical and physical artery models

17 p3035 A70-34468

Thrombus formation on foreign surface in fresh blood stagnation point flow, applying fluid mechanical and mass transfer models

[ALAA PAPER 70-787] 17 p3035 A70-34470

Weightlessness and gravitational effects on human pulmonary blood flow distribution, considering optimal gas exchange efficiency

[ALAA PAPER 70-785] 17 p3035 A70-34472

Intermittent forced inspirations or expirations effects on venous tone and blood flow in human skin vessels

17 p3024 A70-34595

Eating and digestion effects on arterial pressure and mesenteric and aortic blood flows in intact unanesthetized dogs

17 p3024 A70-34848

Human cardiac flow during acceleration as function of time with and without anti-g suit, using electric plethysmograph

17 p3040 A70-35915

Analog computer for continuous recording of oxygen consumption of muscular area in canine foot via blood flow rate and oxygen saturation

19 p3367 A70-37354

Thermal electronic instrumentation applied to biological flows including blood flow, cardiac outputs and volumes

19 p3368 A70-37843

Circulating blood volume and heart minute and stroke volumes in rabbits, using isotope-labeled albumin

19 p3366 A70-38724

Visceral blood flow during exercise in sled dogs, testing hypothetical compensatory decrease as cardiovascular reserve for skeletal muscle by biotelemetry

20 p3571 A70-39366

Pulmonary hypertension in congenital heart diseases as function of blood flow

20 p3571 A70-39367

Radio telemetry measurements of blood pressure and flow in unrestrained animals

20 p3579 A70-39370

Electromagnetic blood flowmeters for circulatory research

20 p3579 A70-39371

Ambient near vacuum pressure effect on blood circulation, examining thoracic aorta blood flow, pressures, gas expansion and water vaporization

20 p3576 A70-40326

Hypoxia effects on cerebral blood flow in anesthetized dogs, considering acidosis and vasodilation

20 p3577 A70-40330

Liver blood flow in dogs during increased oxygen consumption

20 p3577 A70-40448

Myocardial blood flow response to cardioacceleration by right atrial pacing in normal subjects, using coincidence counting

21 p3760 A70-40576

Viscous fluid motion equations through anisotropic nonrigid porous solid, discussing blood flow in capillary vessels and extracellular fluid through interstitial space

21 p3768 A70-40776

High resistance thermistor measurements of rapid blood temperature variation, discussing power dissipation effects

21 p3769 A70-41143

ULF ballistocardiogram amplitudes relationship to blood flow velocity for cardiovascular disease diagnosis

21 p3763 A70-41234

Blood velocity in ascending aorta in man by transcutaneous ultrasonic Doppler technique, investigating heart hemodynamic performance and systemic perfusion

21 p3770 A70-41235

Acceleration Bcg dependence on left ventricular ejection flow and properties of vascular system

21 p3763 A70-41237

Algorithm for cardiovascular force computation from phasic regional blood flow and mass motion, interpreting Bcg

21 p3763 A70-41238

Bcg interpretation, discussing degrees of freedom, blood mass displacement, cardiovascular system, etc

21 p3770 A70-41239

Reverse curvature silicon transistor linearizer for hot-wire and thin-film constant temperature anemometers for aorta blood flow velocity measurements

21 p3827 A70-41458

Left ventricular surface electrocardiogram T-wave amplitude and circumflex coronary artery blood flow during headward acceleration in unanesthetized dogs, observing velocity decrease

21 p3764 A70-41481

Human leg blood flow distribution between deep and superficial veins during alternate treadmill work-rest periods

21 p3767 A70-42160

Aortic regurgitated flow estimation by dye injection technique, noting correlation with cineangiography method

22 p3977 A70-42301

Blood flow antagonistic changes in various vascular beds following spinal cord central thermal stimulation attributed to sympathetic vasoconstrictor activity

22 p3971 A70-43405

Potential liquid flow in pulsating bulb applied to blood flow

23 p4155 A70-44847

Regional cerebral cortical blood flow measurement, using heat clearance thermistor probe

23 p4157 A70-45082

Intact human forearms venous blood velocity measurements, using nuclear magnetic resonance techniques

24 p4309 A70-45675

Oxygen transport, arterial resistance and consumption in normovolemic and hypovolemic dogs in hemorrhagic shock

24 p4302 A70-46106

Dynamic response of peripheral blood flow to hypothalamic temperature waveforms in baboon, using implanted thermodes

24 p4303 A70-46116

BLOOD GROUPS

Peripheral blood and structural changes in hemopoietic organs of rabbits and mice exposed to microwave radiation

07 p2126 A70-18730

Beryllium sulfate effect on rabbits vascular plasma volumes, using albumin method for blood groups

15 p2681 A70-31884

Biochemistry of blood group antigens involved in agglutination reactions, discussing effect of proteolytic enzymes on cell membrane structure

21 p3764 A70-41447

BLOOD PLASMA

Acid base responses of arterial plasma of anesthetized man during acute carbon dioxide partial pressure changes, discussing anesthesia effects

01 p0020 A70-10651

Capillary blood flow, discussing red blood cells deformation, motion, pressure drop and plasma flow /bolus/ between red cells

02 p0238 A70-12545

Temperature and hemoglobin concentration effect on oxygen solubility in blood, constructing table for Bunsen solubility coefficients

03 p0428 A70-14156

High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses

04 p0630 A70-14576

Plasma free fatty acid level relationship to acute and chronic exposure to cold in rabbits, rats and humans

04 p0631 A70-14983

Nomograms for correlation of dose to methemoglobinemia or plasma monomethylhydrazine /MMH/ concentration observed on dogs, considering human skin contact evaluation

06 p0992 A70-17298

Increased blood flow resistance caused by red cell membrane shrinking due to plasma surface tension alteration

07 p1203 A70-18999

LF ultrasound not producing irreversible denaturation of blood serum proteins but capable of modifying electrophoretic properties

07 p1206 A70-19470

X ray structural and electrophoretic investigation of donor and fibrinolytic blood protein components, observing crystalline to amorphous transition in blood serum and plasma lyophilization

09 p1621 A70-23149

Thyroid gland function following radiation injury by measuring plasma protein bound iodine in irradiated rat blood

09 p1621 A70-23150

Plasma viscosity and aggregation effects on whole-blood viscosity investigated in observation chamber for erythrocyte aggregation

09 p1622 A70-23546

Blood lactate changes during prolonged exhaustive running at varied intensities and durations

10 p1809 A70-24001

Maximum isovolemic hemodilution by volume substitution determined by plasma expanders infusion in dogs

10 p1821 A70-25083

Blood serum enzyme activity in rats during prolonged hypokinesia, noting increase of aminotransferases

13 p2351 A70-29329

Nine-alpha-fluorohydrocortisone preventing bedrest induced orthostatism, considering plasma volume decrease effects on cardiovascular performance

13 p2358 A70-29433

Resting concentrations of fibrinogen, plasminogen and levels of euglobulin fibrinolytic activity, plasmin inhibitors and urokinase in blood in inactive and exercising men

13 p2356 A70-29942

Beryllium sulfate effect on rabbits vascular plasma volumes, using albumin method for blood groups

15 p2681 A70-31884

Blood plasma and red cell volumes simultaneous measurement in native group living at high altitude

15 p2684 A70-32537

Organic solutes diffusion in stagnant blood plasma and red cell suspensions, using models from transport theory

15 p2686 A70-32847

Plasma free fatty acids and glucose relative role in contribution to metabolic state and energy production in partially hepatectomized rats

16 p2850 A70-34319

Blood glucose and plasma immunoreactive insulin concentrations before, during and after intermittent short duration maximal exercise and glucose infusion

17 p0300 A70-35420

Chloride ion shift of respiration occurring between plasma and erythrocytes as function of carbon dioxide, using rapid filtration method

19 p3364 A70-38366

Portable battery operated system for rapid measurements of blood plasma electrolytes during aeromedical evacuation

20 p3579 A70-39433

Water and salt metabolism changes during prolonged hypokinesia of rabbits, noting blood plasma dilution, hematocrit number and hemoglobin concentration reduction, etc 23 p4146 A70-44656

BLOOD PRESSURE

NT HYPERTENSION
NT HYPOTENSION
NT SYSTOLIC PRESSURE

Arterial pressure pulse waves mathematical analysis applied to variations in stroke volume in anesthetized dogs subjected to spine-to-breast accelerations 01 p0012 A70-10125

Male macaque monkey physiological deterioration in Biosatellite 3, noting falling brain temperature, lowered central venous pressure, fluid loss, blood redistribution into visceral pools, etc 01 p0023 A70-10822

Perfusion pressure and flow effects on coronary resistance, noting venous blood perfusion 01 p0026 A70-11075

Canine aortic flow as function of simultaneous mean aortic and mean right atrial pressures 02 p0233 A70-11723

Capillary blood flow, discussing red blood cells deformation, motion, pressure drop and plasma flow /bolus/ between red cells 02 p0238 A70-12545

Ballistocardiogram force envelopes and pulse pressure relationship, noting perturbation of viscoelastic networks coupling cardiovascular system to ballistic bed 02 p0240 A70-12678

Phasic phrenic nerve electrical activity relation to systemic blood pressure oscillations produced in paralyzed dogs by ventilation arrest or hemorrhage 03 p0416 A70-13010

Acceleration component in pelvis to head direction found influencing hyperemia of brain at various g forces 04 p0630 A70-14579

Analog computer cardiovascular system model to simulate pressure and flow events in veins including effects of gravity, collapse, breathing and venous valves action 04 p0641 A70-14632

Polymethylene-bis-lepidine dibromides effect on blood pressure and peripheral vessel tonus in dogs, analyzing depressor reaction as function of binding chain 04 p0632 A70-15204

Arterial pressure and suprarenal blood flow in dogs under basal conditions and nerve stimulation by stochastic method using analog correlator 05 p0806 A70-16400

Blood pressure indirect recording using ceramic crystal pick-up over brachial artery and under pneumatic cuff 06 p0992 A70-17299

Ventilation function, pulse rate and blood pressure measured for adaptation to vertical upright and head-down positions 07 p1201 A70-18794

Phasic aortic blood flow and left ventricular pressure measured at constant heart rate during pulsus alternans, discussing ejection duration and peak flow rate 07 p1210 A70-19588

Screen filtration pressure of human blood, establishing time, anticoagulant, red cells, platelets and leucocytes as physical determinants 07 p1210 A70-19590

German monograph on determination of blood velocity, pressure, pulse rate and vascular structure parameters using Doppler effect 08 p1452 A70-21297

Venous pressure of man in space, investigating return to heart in absence of gravity and distention by hydraulic pressure 08 p1448 A70-21943

Blood pressure variations resulting in permanent irreversible hypertonia in air force pilots subjected to repeated stress situations and emotional irritations 09 p1626 A70-23011

Diastolic and systolic pressure measurement in acute and chronic experiments 09 p1627 A70-23302

Arterial oscillograms, pressure and heart beat rate during prolonged hypodynamia, noting neurocirculatory dystonia 10 p1817 A70-24693

Chronic hypoxia exposure effect on development and maintenance of renal hypertension in rats 14 p2539 A70-30956

Sleep intensity and stages from EEG studies concerning rapid eye movements, vegetative nervous system, heart/respiration rate, blood pressure, body temperature and stomach motility 15 p2680 A70-31743

Phase errors of hydraulic input impedance of arterial bed due to proximal or distal pressure measurements 15 p2682 A70-31940

Heart rate elicitation and blood pressure increase, considering parasympathetic and sympathetic nervous

outflows adjustments of initial cardiovascular response to muscular contraction 15 p2684 A70-32535

Positive pressure breathing effects on cerebral blood pressure and catecholamine content of hypothalamus and adrenal glands in dogs 16 p2849 A70-33997

Eating and digestion effects on arterial pressure and mesenteric and aortic blood flows in intact unanesthetized dogs 17 p3024 A70-34848

Arterial pressure measurement by automatic control system based on external compression pressure for maximum amplitude intraarterial pressure pulse oscillations 19 p3370 A70-38215

Dynamic intravascular pressures measured in small vessels of frog lung using micropressure transducer inserted into vessel lumen 19 p3364 A70-38368

Radio telemetry measurements of blood pressure and flow in unrestrained animals 20 p3579 A70-39370

Human body elastic properties effects on arterial pressure measurement by sphygmomanometer 20 p3581 A70-39879

Ambient near vacuum pressure effect on blood circulation, examining thoracic aorta blood flow, pressures, gas expansion and water vaporization 20 p3576 A70-40326

First derivative of ventricular pressure recorded by conventional cardiac catheters, analyzing in terms of Fourier series 21 p3767 A70-40578

Ethanol ingestion effect on human response to submaximal and maximal exercise, measuring cardiac output and intraarterial pressure 21 p3761 A70-41135

Cardiac glycosides and beta receptor blocking agent effect on ULF displacement ballistocardiogram in healthy young men, measuring heart rate and blood pressure 21 p3763 A70-41227

Systolic and diastolic pressure in central artery of retina in deep-sea divers during oxygen inhalation at atmospheric pressure 23 p4150 A70-45081

Indirect blood pressure measurements using motion artifact suppression circuit based on K-sound electrocardiography 24 p4296 A70-45335

Neurogenically maintained blood pressure component, discussing autonomic nervous system activity in hypertension and normotension, sympatholytic agents effectiveness in hypertensive treatment, etc 24 p4299 A70-45805

HF sinusoidal fluid pressure generators driven by electromagnetic vibrators for arterial applications 24 p4309 A70-46118

BLOOD VESSELS

NT AORTA
NT ARTERIES
NT CAPILLARIES [ANATOMY]
NT VEINS

Vascular electrical activity in cats and rats by inserting glass microelectrode into blood vessel, showing blood flow conditioning effect on activity 03 p0422 A70-13691

Book on engineering in heart and blood vessels stressing technological aspects of artificial internal organs 06 p1001 A70-17649

Cylindrical tubes steady axisymmetric inlet flow at lower Reynolds numbers, applying results to blood vessels entry flow 07 p1205 A70-19244

Aeromedical significance and pathophysiological mechanisms of clinical entities mimicking vasovagal syncope 08 p1454 A70-21946

Perivascular pH influence on arteriolar diameter on brain surface of anesthetized rats and cats by micropipette technique 12 p2168 A70-27623

Dynamic intravascular pressures measured in small vessels of frog lung using micropressure transducer inserted into vessel lumen 19 p3364 A70-38368

Blood vessels constriction in rear limbs, small intestine and spleen of dog with arterial blood heated above rectal temperature 20 p3574 A70-40173

Structure and function of juxtaglomerular apparatus of kidneys controlling synthesis and secretion of renin 24 p4305 A70-46392

BLOWDOWN WIND TUNNELS

60 cm intermittent blowdown type trisonic wind tunnel, discussing main parts basic dimensions and characteristics determination method, detailing design and construction 01 p0055 A70-10148

Local skin friction measurement on model in blowdown hypersonic wind tunnels using floating element transducer, giving results for flat plate and wedge [ONERA-TP-756] 03 p0463 A70-13629

Rotovale induced flow angle variations associated with data repeatability and scatter in blow down wind tunnels at transonic speed 13 p2385 A70-29888

Intermittent blowdown supersonic wind tunnel as economic test facility covering subsonic test velocity range, discussing data quality [AIAA PAPER 70-581] 13 p2342 A70-29889

BLOWERS

Turboblowers and compressors air tests for gas operation performance prediction 06 p1129 A70-17136

Comparative load capacity of disk models of natural gas blowers of different designs under plastic strain 23 p4232 A70-43941

BLOWING

Air cooling with radial and jet blowing on gas turbine stage, discussing influence on aerodynamic characteristics 03 p0551 A70-13486

Blowing intensity influence on turbulent boundary layer of incompressible fluid and friction drag of flat plate 06 p1036 A70-17852

Massive blowing effect on stagnation point radiative energy transfer of ablative heat shield during planetary entry at hypersonic velocities [AIAA PAPER 70-203] 06 p0971 A70-18101

Flow properties and heat transfer of wall jet spreading over permeable surface with suction and blowing 07 p1258 A70-19720

Massive blowing from porous cone with embedded shock wave in supersonic flow, assuming inviscid and conical injected flow field 09 p1662 A70-23216

Flat plate laminar boundary layer blowoff due to wall injection analyzed by parameter matched asymptotic expansion 10 p1862 A70-23844

Two dimensional film cooled turbine blade aerodynamics, investigating massive blowing effect through discrete holes in single blade test facility [AIAA PAPER 70-713] 16 p2834 A70-33537

High lift airfoils boundary layer separation suppression by blowing, describing wall jets streamline development prediction methods [AIAA PAPER 70-872] 17 p3010 A70-34818

Flow field model for large surface blowing problem accounting for upstream and downstream effects with large rate normal injection near trailing edge 20 p3559 A70-40110

Flat plate boundary layer flow with surface blowing and suction /mass transfer/, investigating stability by numerical techniques 20 p3615 A70-40507

Linear corrections formulas for shear stress and heat transfer coefficients associated with boundary layer blowing in binary gas mixture 21 p3748 A70-42207

Wing lift increase by spanwise blowing along upper surface, causing flow reattachment on wing and vortex induced effective aerodynamic camber increase [ICAS PAPER 70-09] 23 p4132 A70-44120

Flat plate film cooling efficiency behind tangential slot at blown-main flow velocity ratio over three 23 p4283 A70-44741

BLUE GREEN ALGAE

NT NOSTOC

Biochemical characteristics, nitrogenase activity and nitrogen fixation in heterocysts of blue green algae 01 p0024 A70-10894

Spacecraft level vibrations and gravity effects on blue-green algae Plectonema Boryanum proposed as gas exchange medium 06 p0999 A70-17292

Amino acid composition of protein in blue green algae Stratonostoc Linckia 14 p2540 A70-30158

Pigments absence in photosystem II of photosynthesis in heterocysts of blue-green algae 23 p4148 A70-44870

BLUE STREAK LAUNCH VEHICLE

Optimum second stage sizes for Blue Streak first stage for maximum payload injection into various orbits, tabulating sizes and payloads 05 p0924 A70-16589

BLUFF BODIES

Wake behind axisymmetric bluff body in steady laminar flow, noting role of Reynolds number 04 p0619 A70-15392

Free recirculation areas in wake of flame holders used for flame stabilization at bluff bodies in supersonic flow 06 p0965 A70-17244

Base bleed fluid injection effect on steady separated flow past two dimensional bluff body, studying streamline pattern near object 06 p0967 A70-17518

Turbulent flames bluff-body stabilization model, measuring recirculation zone concentrations and temperatures for methane and propane-air mixtures 10 p1967 A70-24092

BLUNT BODIES

Boundary layer around blunted cone solved numerically by finite difference method 01 p0001 A70-10297

Flow about blunted wedge with laminar boundary layer at stagnation point and approaching Falkner-Skan flow at infinity, discussing asymptotic behavior
01 p0061 A70-10540

Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path
[AIAA PAPER 68-1150] 01 p0195 A70-10827

Stagnation point velocity gradients for spherical segment models with bluntness ranging from hemisphere to flatnose cylinder in hypersonic flow
03 p0406 A70-12947

Explosion analogy to study hypersonic flow region behind shock wave including boundary layer at blunt body surface
03 p0406 A70-13332

Approximate solution for hypersonic inviscid flow around spherically blunted bodies at small angle of attack, noting stagnation problems
03 p0407 A70-13547

Supersonic unsteady state three dimensional flow around blunted bodies with detached shock wave
03 p0409 A70-13864

Similarity laws in hypersonic flow of real gas around slender blunted bodies, particularly bodies with rough lateral surface
03 p0409 A70-13866

Axisymmetric and three dimensional gas flow around blunt bodies using numerical methods, discussing finite difference algorithms for gas dynamic equations
03 p0410 A70-14251

Hypersonic flow over blunt bodies, discussing Mach number, specific heat and blast wave limits
04 p0613 A70-14454

Numerical analysis of near equilibrium flow regions in chemically relaxing gas mixtures past blunt bodies at supersonic speeds
04 p0666 A70-14603

Hypersonic blunt body heat transfer prediction, including coupled effects of real gas behavior and slip boundary conditions
[ASME PAPER 69-WA/HT-28] 04 p0614 A70-14809

Axisymmetric radiating flow behind paraboloidal shock in ideal inviscid gas hypersonic stream, using differential approximation method for blunt body solution
04 p0669 A70-14937

Difference methods application to supersonic gas flow past blunt body and unsteady axisymmetric flow past body of unspecified configuration, analyzing stability
04 p0670 A70-14957

Hypersonic flow region about ducted blunt bodies of revolution, assuming correspondent flow conditions to maximum intake through duct
04 p0617 A70-15233

Unsteady pressure at slender blunt body surface in three dimensional hypersonic gas flow
04 p0618 A70-15244

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution
[AIAA PAPER 68-1158] 04 p0620 A70-15530

Viscous shock layer at hypersonic blunt body stagnation point, applying finite difference and nonlinear overrelaxation methods to seven species air model
04 p0620 A70-15539

Real gas properties effect on base pressure of blunt nosed vehicle flying through atmosphere at high velocities
04 p0764 A70-15556

Hypersonic near wake, discussing correlations from optical studies, laminar near wake, blunt body and turbulent wake measurements
05 p0790 A70-16120

Drag reduction on blunt-based body of revolution with boat-tailed afterbodies in low speed flow
05 p0790 A70-16501

Slender wing with blunted leading edge to reduce thermal stresses at supersonic speed studied for aerodynamic characteristics in hypersonic flow
05 p0791 A70-17001

Frictionless hypersonic flow around blunt bodies of revolution, taking into account real gas effects in equilibrium and frozen flow calculations
06 p0965 A70-17242

Laminar hypersonic blunt cone wakes, discussing flow fields and axial static pressure distributions
06 p0968 A70-17553

Inviscid hypersonic blunt body flow of hydrogen-oxygen mixtures in shock layer stagnation region
06 p0968 A70-17555

Melting ablation for two dimensional and axisymmetric blunt bodies with body force, predicting gas-liquid interface temperature for free stream conditions
06 p1176 A70-17690

Nose bluntness, angle of attack and oscillation amplitude effect on hypersonic unsteady aerodynamics of slender cones
[AIAA PAPER 70-216] 06 p0969 A70-18059

Viscous radiating flowfield coupled with ablation for computations on blunt body entering earth atmosphere at interplanetary return velocities
[AIAA PAPER 70-128] 06 p0970 A70-18090

Pressure distributions prediction on blunt bodies at angle of attack, considering bodies of revolution and large angle cones
[AIAA PAPER 70-208] 06 p0971 A70-18104

Knudsen iteration for predicting cooled blunt body near free molecular drag in hypersonic stream, using BGK model for collisions
06 p0979 A70-18313

Density field around leading edge of blunted flat plate, using electron beam measurements in low density hypersonic wind tunnel
06 p0980 A70-18351

Cone bluntness effect on merging onset and downstream flow in merged region at Mach 8 and various Reynolds numbers
06 p0980 A70-18352

Drag coefficients of sharp and blunt cones in rarefied supersonic flow for bluntness ratios and angles of attack
06 p0981 A70-18360

Flow field measurements upstream of axisymmetric blunt body in rarefied hypersonic flow used to investigate merging between bow shock and boundary layer
06 p0983 A70-18372

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc
06 p0985 A70-18557

Aerodynamic heating of blunt-nosed reentry bodies noting effects of angles of attack
[DGLR-69-0401] 07 p1392 A70-18983

Asymptotic behavior of inviscid radiating gas flow near stagnation point of blunt body
07 p1188 A70-19315

Hypersonic flow past blunted cylinder at Mach number of infinity, investigating real gas effect using Lighthill ideal dissociating gas model
08 p1431 A70-20646

Aerodynamic coefficients for blunt cones in rarefied gas calculated as functions of angle of attack using empirical formulas
08 p1432 A70-21092

Interaction between bodies and spherical detonation wave, measuring force pulse transfer to immobile cylinder and flow patterns past flying blunt body
09 p1659 A70-22186

Aerodynamic heating of blunt bodies, investigating dependence of hypersonic limit distribution on Mach number
09 p1603 A70-22419

Shock layer thickness in supersonic inviscid gas flow past blunt bodies, calculating boundary layer near stagnation point
09 p1603 A70-22442

Aerodynamic characteristics of cooled blunt spherical bodies in low density hypersonic gas flow, discussing heat flux representation for different body surface temperatures
09 p1604 A70-22447

Slender body approximation for shape determination of nonslender hypersonic body of revolution with minimum convective heat transfer rate
09 p1788 A70-22931

Navier-Stokes equations for laminar near wake of blunt based body, obtaining numerical solutions for adiabatic and constant wall temperatures
09 p1605 A70-23176

Wake source model for two dimensional incompressible potential flow past bluff body, considering pressure distribution, flow separation, wake width, etc
09 p1607 A70-23681

Blast wave eigenvalues in asymptotic expansions approximation for hypersonic flows past blunt bodies
10 p1797 A70-23953

Initial blast wave axisymmetric shock-on-shock interaction for blunt bodies moving supersonically at zero angle of attack solved in Taylor series
10 p1797 A70-23954

Inverse blunt body problem using integral relations method assuming inviscid axisymmetric hypersonic gas flow
10 p1798 A70-24116

Shock wave and gas flow structure at constant Mach number past three dimensional blunt bodies, applying method for unsteady flow
10 p1799 A70-24127

Wind tunnel study of entropy extremum upon critical streamline in supersonic three dimensional flow past blunt bodies at zero angle of attack
10 p1800 A70-24131

Plane shock wave interaction with supersonic blunt body, considering pressure-time studies for stagnation point of flow
10 p1801 A70-24145

Vibrational and dissociation relaxation effects on plane shock wave structure and supersonic flow around blunt bodies
10 p1801 A70-24150

Rarefied hypersonic axisymmetric blunt body, examining bow shock and viscous layer upstream merging
10 p1804 A70-24823

Gasdynamic functions of supersonic flow past spherically and ellipsoidally blunted inverted cones
11 p1973 A70-25522

Blunted spherical shells stability under hydrostatic pressure by reducing equilibrium equations to differential
12 p2322 A70-27333

Vibrational relaxation effect on supersonic flow past nose section of blunted body
12 p2159 A70-28231

Radiant shock layer in hypersonic air flow past blunt bodies, showing effects on temperature field and density
12 p2159 A70-28245

Electromagnetic shock tube demonstrations of electrode spark breakdown, strong shock behavior, plasma conductivity and hypersonic shock flow over blunt body
13 p2404 A70-28623

Blunt heat shield effectiveness for trailing payload in reentry capsules, discussing dynamic instability effect
[AIAA PAPER 70-563] 13 p2341 A70-29028

Transonic static and dynamic stability of large angle spherically blunted high-drag cones
[AIAA PAPER 70-564] 13 p2341 A70-29029

Blunt planetary entry body free fall drop tests determining low speed stability and base pressure characteristics
[AIAA PAPER 70-577] 13 p2342 A70-29892

Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer
[AIAA PAPER 69-67] 13 p2343 A70-29951

Viscous shock layer equations of laminar hypersonic flow past blunt body at moderate to high Reynolds numbers
13 p2343 A70-29952

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection
[AIAA PAPER 69-706] 13 p2343 A70-29954

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases
[AIAA PAPER 69-716] 13 p2523 A70-29977

Blunt base heat transfer in axisymmetric supersonic separated flow in axisymmetric near wake tunnel, comparing to previous data
13 p2523 A70-29989

Unsteady incompressible laminar boundary layer equations solution after Crocco transformation by implicit finite difference scheme for flow around blunt body
14 p2528 A70-30290

Explosion analogy to study hypersonic flow region behind shock wave including boundary layer at blunt body surface
14 p2528 A70-30711

Viscous gas hypersonic flow past blunt nosed bodies based on Navier-Stokes equation
15 p2671 A70-31481

Finite difference algorithm for supersonic three dimensional steady flow past blunt bodies with generating line bends, allowing for gas equilibrium and frozen states
15 p2671 A70-31495

Internal shock waves in axisymmetric flowfield of perfect gas past blunted cone, noting roles of Mach number and cone half angle
15 p2672 A70-31592

Laminar heat transfer to blunted wedge with constant wall temperature, describing energy field in boundary layer by analytic solution
15 p2825 A70-31818

Laminar compressible boundary layer similar solutions for axisymmetric blunt body, considering viscosity and density variations
16 p2833 A70-33123

Supersonic and hypersonic gas flow past blunt bodies, using finite difference and integral relation methods
16 p2890 A70-33244

Supersonic flows past two dimensional blunted bodies, using method of ascertainment
16 p2833 A70-33248

Book on aerodynamics of bodies of revolution covering hypersonic flow parameters effects, method of characteristics, slender body drag, blunt bodies, rarefied gas aerodynamics, etc
16 p2834 A70-33271

Flow structure in wake of blunt bodies placed perpendicular in parallel airstream determined from hot-wire anemometry
[AIAA PAPER 69-746] 16 p2838 A70-33876

Boundary layer to wake bleed venting for flare-induced separation prevention in hypersonic flow over blunt bodies
16 p2838 A70-33884

Time asymptotic solutions for hypervelocity blunt body flow field with coupled nongray radiation, treating shock as discrete surface
[AIAA PAPER 70-865] 16 p2999 A70-33908

Viscous absorbing emitting shock layer in blunt body stagnation region, calculating skin friction and radiative heat transfer
[AIAA PAPER 70-868] 16 p2999 A70-33911

Transonic flow around perpendicular plate, determining front side velocity and pressure from known stagnation point and transonic region
16 p2839 A70-34236

Axisymmetric detached shock preceding blunt body immersed in hypersonic monatomic gas flow, considering radiative ionization in cold precursor by differential approximation
16 p2839 A70-34252

Hypersonic flow of chemically reacting binary mixture of oxygen atoms and molecules past blunt body, presenting viscous shock layer equations and slip boundary conditions
[AIAA PAPER 70-805] 17 p3005 A70-34458

Blunt based right circular cylindrical body at subsonic speed, investigating turbulent near wake in wind tunnel
17 p3006 A70-34463

Axisymmetric blunt base cylindrical body with turbulent initial boundary layer, investigating flow structure in annular nozzle wind tunnel
[AIAA PAPER 70-796] 17 p3006 A70-34464

Wedge and cylinder high supersonic wakes stability and transition at various Reynolds numbers
17 p3006 A70-34465

Hypersonic flow of shock heated plasma past axisymmetric blunt body and onboard magnetic source, using numerical method
17 p3008 A70-34491

Plasma diagnostic data from onboard Langmuir probes, reflectometers, antenna VSWR and beacon and telemetry attenuation for blunt body reentry flow field
[AIAA PAPER 70-756] 17 p3008 A70-34495

Nonequilibrium air ionization in hypersonic viscous shock layers in flow about axisymmetric blunt bodies
17 p3008 A70-34501

Time dependent solution for inviscid hypersonic flow of chemically reacting gas mixture about blunt bodies
[AIAA PAPER 70-771] 17 p3009 A70-34502

Shock wave and viscous layer structures ahead of blunt body in rarefied hypersonic flow, using continuum theory
17 p3009 A70-34698

Nonadiabatic self absorbing radiative flow of gray gas around sharp cornered blunt body at hyperbolic speed by integral relations method
17 p3010 A70-34974

Adiabatic and chemically inactive hypersonic continuum flow around blunt body, analyzing flow field
17 p3010 A70-35036

Blunt nose effects on drag of flared conical body in supersonic flow, considering pressure loss through shock wave and vorticity
17 p3196 A70-35237

Supersonic axisymmetric flows past bell-shaped bodies of varying bluntness, using Godunov finite difference method
17 p3012 A70-35887

Aerodynamic characteristics of transonic and supersonic blunt vehicles, reviewing numerical methods
17 p3012 A70-35895

Nonequilibrium gas states evolution in detached wave front of hypersonic blunt body, comparing vibrational relaxation in free flight and wind tunnel flow
18 p3335 A70-35962

Unperturbed atmospheric parameters calculation from surface measurements of blunt body at hypersonic speeds under various aerodynamic conditions
18 p3247 A70-36181

Hypersonic gas flow around blown plane of segmentally blunted cones at large angle of attack, using two dimensional model
18 p3206 A70-36258

Viscous hypersonic flow around nonslender bodies with mass supply at small Reynolds numbers, using thin shock layer model
18 p3206 A70-36259

Nonuniform external flow near blunt body stagnation point in diverging hypersonic thin shock layer
18 p3206 A70-36267

Equivalent bodies of revolution method extension for use in semiempirical approximation technique, calculating pressure distribution of nonaxisymmetric blunt bodies
18 p3208 A70-36569

Nonequilibrium ionized hypersonic flow over blunt body at low Reynolds number, using thin shock layer assumption in analysis
18 p3208 A70-36689

Nonequilibrium processes and body geometry as stagnation point conditions in blunt body inviscid flow
20 p3557 A70-39355

Spinning blunt entry vehicles dynamic stability tests in terminal regime, discussing dependence on angle of attack
[AIAA PAPER 70-988] 20 p3714 A70-39541

Stagnation point heat transfer coefficient to elliptical model taking into account pressure, model blunting and diameter, Mach number, etc
20 p3737 A70-39699

Spike effect on nose drag and static stability of blunt bodies, estimating optimum length for drag reduction at zero angle of attack
20 p3558 A70-39702

Laminar viscous effects over blunt cones at hypersonic conditions, taking into account first and second order boundary layer theories
20 p3559 A70-40285

Axisymmetric detached shock before blunt body in hypersonic monatomic gas flow, obtaining radiative ionization patterns in cold precursor
21 p3950 A70-41731

Thin radiating shock layer about axisymmetric blunt bodies, investigating energy-momentum transport coupling
21 p3950 A70-41746

Sphere and axisymmetric body with spherical blunting in low density gas flow, measuring local heat transfer flux
21 p3748 A70-42218

Internal shock waves in axisymmetric flow field of perfect gas past blunted cone, noting poles of Mach number and cone half angle
23 p4133 A70-44276

Heat transfer and shock wave shapes about blunt slender cones in viscous-inviscid coupling hypersonic flow
23 p4134 A70-44569

Radiative energy transfer during interaction between blunt body and hypersonic gas flow, noting effect on flow temperature, shock wave separation, etc
23 p4136 A70-45020

BLUNTNES
U ELLIPTICITY
BLURRING
Ground terrain blurring during aircraft flight at low altitude and high speed, calculating theoretical blur zone
07 p1220 A70-19285

Optimal photometric data processing for planetary characteristics and surface details, considering errors due to image blurring in telescope
07 p1384 A70-19419

Image processing for motion blur removal, discussing methods for measuring degradation and filter design for image restoration
09 p1688 A70-23773

Laser-light spatial-domain scanning function for deconvolution of blurred photographs using point-spread and holographic Fourier transform division filter
11 p2050 A70-25832

Spatial domain deconvolution by laser scanning of blurred photographs, using holographic Fourier transform division filter and photoelectric integration
12 p2230 A70-26979

Blurred photographic image restoration by combining computer generated holographic phase and photographic amplitude filters
12 p2230 A70-26981

Human eye accommodation system, discussing blur detection on retina
13 p2360 A70-29671

Holographic technique to record hypervelocity projectile with front light resolution, discussing image blurring
15 p2736 A70-32031

Photographic image deblurring method, using image forming holograph and amplitude weighting transparency
22 p4042 A70-43670

BO-105 HELICOPTER
Bolkow BO-105 twin turbine rigid rotor helicopter flight tests
08 p1437 A70-21731

BOATTAILS
Cylindrical afterbody drag reduction in transonic flow by combined gas ejection and boat-tailing
11 p1976 A70-25991

Minimum-drag boattail configurations optimization for supersonic flow, determining wave drag coefficients
22 p3961 A70-42714

BODIES OF REVOLUTION
NT CELESTIAL SPHERE
NT CONICAL BODIES
NT CYLINDRICAL BODIES
NT PARABOLIC BODIES
NT POINCARÉ SPHERES
NT ROTATING CYLINDERS
NT ROTATING SPHERES
NT SLENDER CONES
NT SPHERES
NT TORUSES
Thin shells of revolution torsional vibration including bending terms and thickness considerations
01 p0205 A70-11142

Carrying capacity of shells of revolution obtained with threads spun around metallic shell, including stresses during spinning process
01 p0210 A70-11414

Spinning top motion stability in homogeneous incompressible ideal resting fluid, using stability derivative for body of revolution
01 p0145 A70-11438

Symmetrical body rotational motion with asymmetrical mass distribution about center of mass, determining minimum initial value of angular velocity
01 p0192 A70-11482

Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis
02 p0384 A70-11665

Kerr physical optics formula usefulness for calculation of radar reflectivity of metallic bodies of revolution in terms of electric and magnetic dipoles
02 p0262 A70-12598

Shells of revolution having arbitrary stiffness distribution and subjected to arbitrary loads and temperatures
03 p0583 A70-12916

Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends
03 p0589 A70-13337

Approximate method of boundary perturbation to solve elasticity and viscoelasticity problems for non-canonical bodies of revolution applied to stress concentration at ellipsoidal cavity
03 p0591 A70-13439

Stress-strain state of body of revolution having transversely isotropic elastic properties, using perturbation technique
03 p0591 A70-13441

Backscattering cross sections of metallic bodies of revolution, analyzing statistically echo pattern of complex targets
03 p0452 A70-14225

Thin shells of revolution plastic collapse under axisymmetric loads on basis of Tresca-Nakamura yield criterion, using computer algorithm
03 p0598 A70-14238

Asymptotic form of axisymmetric solution with Dirichlet integral for Navier-Stokes equations applied to flow past bodies of revolution with smooth surfaces
03 p0471 A70-14303

Surface singularities method for calculating incompressible potential flow about bodies of revolution with arbitrary thickness ratio and angle of attack
03 p0410 A70-14322

Natural circular frequencies of small axisymmetric vibrations of shells of revolution of arbitrary shape, using Rutishauser algorithm for eigenvalues
04 p0767 A70-14525

Thin elastic revolving shells free axisymmetric oscillations by determining differential equations eigenvalues and eigenfunctions
04 p0768 A70-14604

MHD Stokes flow for magnetized bodies of revolution, rotating with steady motion in viscous conducting fluid at rest at infinity
04 p0726 A70-14615

Boundary layer equations for axial laminar and turbulent incompressible flows over slender bodies of revolution solved by finite difference method
[ASME PAPER 69-WA/FE-2] 04 p0667 A70-14786

Boundary layer transition limits at high Mach numbers, discussing transition on flat plate and bodies of rotation and Reynolds number
04 p0672 A70-15177

Hypersonic flow region about ducted blunt bodies of revolution, assuming correspondent flow conditions to maximum intake through duct
04 p0617 A70-15233

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution
[AIAA PAPER 68-1158] 04 p0620 A70-15530

Geometrically linear anisotropic shell deformation under transverse shear applied to stability analysis of orthotropic shells of revolution sustaining axisymmetric stresses
05 p0933 A70-16212

Stressed state of shallow spherical shells of revolution undergoing large displacements reduced to Kármán equation, solved by small parameter method
05 p0935 A70-16235

Stability and critical load algorithm for flexible shallow spherical and conical shells of revolution derived from variational equation
05 p0935 A70-16236

Revolving shells local stability developing boundary effect under normal and bending external loads solved by computer program
05 p0935 A70-16237

Drag reduction on blunt-based body of revolution with boat-tailed afterbodies in low speed flow
05 p0790 A70-16501

Finite element method analysis of axisymmetrically loaded thin shells of revolution, considering non-

linearity due to material properties and shell geometry changes

05 p0944 A70-16812

Digital computer program for analyzing axisymmetrically loaded ring-stiffened segmented composite elastic shells of revolution, giving vibration frequencies

05 p0944 A70-16814

Lower bound limit analysis of symmetrically loaded thin shells of revolution having arbitrary meridional profiles, demonstrating methods for pressure vessel problems

05 p0944 A70-16815

Axisymmetric deformation of shells of revolution with variable thickness solved by asymptotic method in form of higher Fourier series harmonics

05 p0945 A70-16853

Potential flow over rocket contour containing bends calculated by polygonal distribution of singularities on axis of body of revolution, determining friction effects

06 p0964 A70-17239

Frictionless hypersonic flow around blunt bodies of revolution, taking into account real gas effects in equilibrium and frozen flow calculations

06 p0965 A70-17242

Liquid propellant rocket nozzle configurations maximum stress and stability limits using computer program for composite ring-stiffened shells of revolution [AIAA PAPER 70-138]

06 p0104 A70-18053

Nonlinear aerodynamic moments for arbitrary motions of bodies of revolution in free flight

[AIAA PAPER 70-205] 06 p0971 A70-18102

Flow model for steady axisymmetric vortex system shed from slender body of revolution in coning motion

[AIAA PAPER 70-52] 06 p0971 A70-18118

Stability derivatives for bodies of revolution at subsonic and transonic speeds

[AIAA PAPER 70-190] 06 p0976 A70-18239

Stress-strain state equations for axisymmetrically loaded shells of revolution made of materials with variable moduli

07 p1399 A70-18660

Three dimensional boundary value problems for bodies of revolution rotating in fluid at rest and for bodies at rest in rotating fluids

07 p1252 A70-18709

Cylindrical shell of revolution stress-strain state calculated during shaping in stamp with unclamping dies

07 p1292 A70-18836

Equations for general shells of revolution reduced to simultaneous fourth order ordinary differential equations for stress and displacement functions

07 p1401 A70-18892

Revolving shallow shells steady creep equations solved by approximation adaptable to computer

07 p1402 A70-19051

Integration by orthogonalizations of envelopes of revolution loaded asymmetrically, introducing boundary conditions and structure discontinuities

07 p1404 A70-19128

Segmented elastic shells of revolution supported by rings, studying buckling and vibration by matrix method

07 p1405 A70-19257

Filament wound bodies of revolution manufacture with consideration for linear and nonlinear winding, analyzing mechanically and electronically controlled machines

07 p1295 A70-19765

Natural vibration frequencies and mode shapes for laminated orthotropic shells of revolution using finite element method

07 p1411 A70-19951

Heavy solid body motion about stationary point at small nutation angle, estimating region of series convergence representing periodic solutions to motion equations

07 p1336 A70-20298

Point matching technique for plane elastic problems extended to axisymmetrically loaded elastic body of revolution, developing general computer program

07 p1416 A70-20303

Limiting equilibrium of shells of revolution with different yield points under tension and compression

08 p1583 A70-20527

Boundary value problem solution in study of axisymmetric viscous heat conducting gas flow past body of revolution

08 p1431 A70-20854

Aerodynamic drag coefficients and moments for axisymmetric bodies of revolution in rarefied plasma derived for limiting case of delta flux

08 p1432 A70-21088

Elastic paraboloid of revolution under axisymmetric and nonaxisymmetric loads, using Bessel functions of real and imaginary arguments with trigonometric functions

08 p1587 A70-21165

Thin shells of revolution natural oscillation frequencies approximation based on shell subdivision into series of cylindrical shells

08 p1588 A70-21194

Heat transfer in axially symmetric laminar viscous boundary layer flow due to rotating bodies of revolution, obtaining temperature distribution

08 p1485 A70-21698

Cylindrical shell vibration modal characteristics finite element solutions accuracy compared with exact solutions

08 p1596 A70-21979

Differential equations of motion for body with stationary point, allowing for Kovalevskaya conditions and assuming nonzero gyrostatic moment

09 p1726 A70-22149

Electromagnetic waves diffraction on ideally conducting bodies of revolution, deriving design formulas for electric dipole

09 p1632 A70-22401

Generatrix shape determined for body of revolution moving at supersonic speed with minimum wave drag

09 p1603 A70-22434

Acoustic pressure sensors positioning on bodies of revolution to determine laminar boundary layer stability loss during ideal liquid flow at nonzero angles of attack

09 p1660 A70-22479

Slender body approximation for shape determination of nonslender hypersonic body of revolution with minimum convective heat transfer rate

09 p1788 A70-22931

Hall effect on MGD flow past axisymmetric body by studying incompressible inviscid flow past body of revolution at zero incidence

09 p1661 A70-23074

Transversely isotropic body of revolution under combined surface loads and stationary axisymmetric temperature field, obtaining displacement vector and stress tensor in analytic functions

09 p1778 A70-23086

Axisymmetric thermal stress state in bodies of revolution studied by successive approximation algorithm for digital computer

09 p1778 A70-23088

Elastoplastic stressed state of thin walled shells of revolution under repeated loads, assuming isotropic incompressible material

09 p1779 A70-23092

Endurance limit of momentless shells of revolution under uniform internal pressure, deriving differential equations based on aging and creep theories

09 p1779 A70-23096

Stress distribution in shells of revolution with variable elastic moduli, considering material rigidity and strain state

09 p1781 A70-23286

Carrying capacity of shallow shells of revolution, determining buckling stress and limiting equilibrium of shells with varying thickness under transverse load

09 p1781 A70-23288

Contour immobility effect on load carrying capacity of rigid plastic thin shells of revolution, establishing minimum reinforcement value for edge

09 p1783 A70-23388

Ribs reinforced shells of revolution designs calculations by approximate numerical method, considering surface geometry and cyclic temperature loads effect

09 p1784 A70-23589

Finite deformations of flexible inelastic orthotropic shells of revolution for generalized plastic flow and deformation theories

10 p1955 A70-24079

Shape of minimum drag slender body of revolution in Newtonian flow for given volume, length and maximum cross section determined by stochastic optimality principle

10 p1802 A70-24278

Heat transfer influence on three dimensional boundary layer separation on walled ellipsoid of revolution

10 p1870 A70-24781

Superconducting ellipsoid of revolution in alternating magnetic field, computing disturbed field components using boundary value problem

10 p1917 A70-25201

Stress concentration near ellipsoidal cavity in transversely isotropic body using solutions for transversely isotropic ellipsoid of revolution

11 p2129 A70-25564

Compressible turbulent boundary layer with adverse pressure gradients and crossflow over revolving bodies, integrating numerically three dimensional compressible integral equations

11 p2035 A70-25689

Load carrying capacity of isotropic rigid-plastic shells of revolution with different yield points under tension and compression applied to spherically coupled cylinders

11 p2134 A70-25932

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration

[AIAA PAPER 69-56] 11 p2135 A70-25962

First order differential equations for unsymmetrical bending of shells of revolution

11 p2135 A70-25978

Flat plate flowfield for freestream/jet interaction wrap-around on bodies of revolution, using separation shock model and blast wave analogy

11 p1976 A70-26135

Monograph on shells of revolution and prismatic shells of arbitrary cross sectional shape with arbitrary load covering partial shells, programs, boundary condition methods, etc

11 p2141 A70-26600

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Dirichlet problem

11 p2085 A70-26621

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Neumann problem

11 p2085 A70-26622

Axisymmetrically loaded shells of revolution with displacement behavior defined by fourth order differential equations, discussing finite difference method suitability for solution

11 p2144 A70-26679

Elastic conical shells of revolution linear theory, calculating stress resultants and couples

11 p2145 A70-26689

Wave propagation in finite length revolving shells, describing advantages of modal superposition method generated by finite element computer program

12 p2317 A70-27124

Stability analysis of ring-stiffened orthotropic, multilayered shells of revolution under axisymmetric torsionless loads by digital computer

12 p2320 A70-27143

Shells of revolution under combined thermal and mechanical loading, presenting analytical basis of BOSOR 3 digital stress analysis program

12 p2320 A70-27144

Large deflection analysis of elastic-plastic shells of revolution by computer program based on nonlinear theory and multisection method of numerical integration

12 p2320 A70-27147

Stress-strain state of thin revolving shells composed of multiple variable thickness layers, assuming layers deformation free of slipping and separation

12 p2322 A70-27332

Postwrinkling nonlinear behavior of conical shell of revolution subjected to bending loads

[AIAA PAPER 69-90] 12 p2326 A70-27816

Thin walled shells of revolution equations boundary conditions formulated by stress state separation, giving small parameter perturbation theorem

12 p2327 A70-28191

Three dimensional laminar boundary layer equations for body of revolution at angle of attack in supersonic gas flow derived for equations

12 p2158 A70-28198

Boundary layer equations with pressure gradient for revolving slender body, examining transverse curvature influence on layer separation and integral characteristics

12 p2214 A70-28249

Finite element method applications to finite axisymmetric deformations of incompressible elastic solids of revolution

13 p2510 A70-28734

Wind tunnel interference for inviscid compressible conducting fluid on slender body of revolution, discussing disturbance potential

13 p2464 A70-29449

Axisymmetric compressible boundary layer on body of revolution transformed into two dimensional turbulent boundary layer

13 p2391 A70-29995

Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends

14 p2657 A70-30715

Soviet monograph on thermal conductivity of plates and bodies of revolution covering temperature and stress distributions, multilayer shells, etc

14 p2666 A70-30952

Curved finite element for shells of revolution based on minimum potential energy principle, discussing stiffness and equilibrium of domed and branched shells

14 p2659 A70-31130

Wind tunnel tests of flow past oblate ellipsoid of revolution incident on major axis, measuring pressure distribution

15 p2671 A70-31494

Reinforced shells of revolution carrying capacity under limit subjected to internal adiabatic ideal gas flow

15 p2814 A70-31534

Shells of revolution zero moment stressed state calculation by analytical functions, solving boundary value problem for edge loading

15 p2814 A70-31587

Stress-strain state of catenoid, cylindrical and spherical shells of revolution, emphasizing catenoid shell bending problem

15 p2815 A70-31648

Sinusoidal stress and strain in elastic shells of revolution, reducing linear theory to simultaneous second order differential equations

15 p2816 A70-32008

Elastic shells of revolution stability and critical loads, discussing moment stress state and edge effect

15 p2816 A70-32158

Shallow shells of revolution under axisymmetrical loads, analyzing plasticity and creep by integral equations algorithm

15 p2817 A70-32164

Bifurcation stability in geometrically nonlinear shells of revolution under transverse loads, considering tension and compression deformation

15 p2817 A70-32168

Stability characteristics of elastic shallow shells of revolution in temperature field and under compression, reducing variational equation of bending by Ritz method

15 p2817 A70-32169

Elastic two cavity hyperboloid of revolution under stress due to rotating rigid stamp, solving torsional problem numerically

15 p2819 A70-32189

Hyperboloid of revolution acoustic scattering, using Bloom-type method for hard hyperbolic cylinder

15 p2701 A70-32416

Book on aerodynamics of bodies of revolution covering hypersonic flow parameters effects, method of characteristics, slender body drag, blunt bodies, rarefied gas aerodynamics, etc

16 p2834 A70-33271

Shells of revolution nonlinear finite element analysis by matrix displacement method, including higher order strain energy terms

16 p2991 A70-33885

German monograph on supersonic flows calculation past slender bodies of revolution using perturbation approach based on Poincare-Lighthill-Kuo method

16 p2839 A70-34082

Nonlinear dynamic analysis of shells of revolution under symmetric and asymmetric loads, obtaining solutions for shallow cap buckling

16 p2994 A70-34229

Critical load of shallow shell of revolution as function of geometric and material parameters

17 p3192 A70-35717

Flow field on suction side of slender body of revolution with/without wings, investigating by directional probe in wind tunnel

17 p3013 A70-35924

Axisymmetric torsion by terminal loads of elastic shells of revolution, investigating energy inequalities for assessing quality of approximate solution of thin shell problem

18 p3335 A70-36058

Rayleigh-Gans-Born approximation application to thermal radiation of reflecting convex plasma sphere, cylinder and ellipsoid

18 p3294 A70-36146

Pressurized shells of revolution loaded axisymmetrically, formulating equations for calculation of displacements, forces and stresses

18 p3338 A70-36406

Equivalent bodies of revolution method extension for use in semiempirical approximation technique, calculating pressure distribution of nonaxisymmetric blunt bodies

18 p3208 A70-36569

Stress-strain equilibrium of thin isotropic elastic shells of revolution loaded along meridian

18 p3340 A70-36577

Funnel shaped vector radiation pattern realized by synthesizing axisymmetric distribution of elliptically polarized currents on body of revolution

19 p3392 A70-37277

Book on thermoelasticity covering thermal stresses in disks, plates, shells and bodies of revolution under steady and unsteady temperature fields

19 p3541 A70-37974

Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis

19 p3547 A70-38439

Modified linearized transonic flow theory application to pressure coefficient distribution on circular arc bodies of revolution

20 p3608 A70-39614

Reentry bodies of revolution subsonic and supersonic aerodynamic characteristics

20 p3558 A70-39704

Complex waveguides with diverging body of revolution shaped horn, solving equation by Frobenius-Latsysheva method

20 p3587 A70-39765

Thin shells of revolution static and dynamic stability under symmetric loads, presenting eigenvalue algorithm for boundary value problems

20 p3725 A70-39863

Stability loss in linear approximation by thin elastic shell of revolution with negative Gaussian curvature

20 p3726 A70-39872

Paraboloid of revolution, examining mixed axisymmetric buckling problem

20 p3727 A70-39892

Transonic flow past bodies of revolution, using finite difference scheme

21 p3743 A70-40611

Elastic-plastic axisymmetric shells of revolution, analyzing large deflection and yielding for internal and external pressures by finite element method

21 p3937 A70-41738

Continuous surface of revolution parachute for supersonic/hypersonic speeds, performing wind tunnel tests

[AIAA PAPER 70-1173]

21 p3754 A70-41840

Conducting fluid supersonic flow past slender body of revolution in circular wind tunnel under inclined magnetic field, investigating MHD interference problem

22 p3958 A70-42669

Thin walled shells of revolution equations boundary conditions formulated by stress state separation, giving small parameter perturbation theorem

22 p4117 A70-43316

Three dimensional laminar boundary layer equations for body of revolution at angle of attack in supersonic gas flow derived from equations

22 p3960 A70-43323

Two dimensional shell equations derivation from three dimensional elasticity theory, considering rotationally symmetric bending of shells of revolution

23 p4265 A70-43942

Three dimensional elasticity for figures close to ellipsoid of revolution with displacements on boundary

23 p4266 A70-43988

Conducting bodies of revolution, calculating surface currents due to axially incident plane electromagnetic wave by computer program

23 p4162 A70-44005

Entrainment theory for incompressible turbulent boundary layer velocity and drag on bodies of revolution employed in fuselage, submersible and cowlings for propulsion design

23 p4182 A70-44400

Numerical methods for mixed boundary value problem of axisymmetric shells of revolution, using truncated series expansion and finite difference expressions

23 p4272 A70-44712

Computer program for geometrical nonlinear static and dynamic structural analysis of arbitrarily loaded shells of revolution

23 p4273 A70-44724

Stress, buckling and vibration analysis of shells of revolution by numerical integration and finite difference methods, summarizing computer programs

23 p4273 A70-44725

Pointed ogival body of revolution in supersonic flow field, investigating local pressure distributed by variational methods

23 p4136 A70-44992

Bodies of revolution optimal configuration, considering minimum head drag coefficient and low heat transfer at hypersonic speeds, using modified Newtonian and hypersonic flow theories

23 p4136 A70-45021

Shell of revolution/pressure vessel/with meridional slope discontinuity, calculating pressurization effect on stresses by computer program

24 p4420 A70-45277

Subsonic flow around bodies of revolution in axial direction, using ALGOL program for numerical calculations

24 p4289 A70-46237

BODY CENTERED CUBIC LATTICES

Strain rate, temperature and alloy content effects on plastic flow in binary substitutional alloys of bcc iron

01 p0119 A70-10735

Interstitial atoms ordering effects on low and high temperature phase transformations in alloys with bcc lattice

03 p0505 A70-13102

Superconducting transition temperature variation in bcc region of Ti-Nb-V ternary alloys measured as function of valence electrons and composition

03 p0538 A70-13154

Surface energy data calculated for bcc and hcp metals and high melting point compounds

06 p1090 A70-17845

Solid solution softening in bcc Ta-Re alloy system attributed to substitutional-interstitial interaction

07 p1310 A70-19736

Cleavage fracture of Ta-Mo bcc alloys, investigating short range ordering and size effects by X ray diffraction

09 p1708 A70-23573

Chemisorption on Mo single crystal surfaces observed by LEED techniques, discussing bcc planes and adsorbed gases

12 p2181 A70-27256

Interstitial atoms arrangement in binary alloys with body centered lattice, describing pressure effects by statistical theory

13 p2435 A70-29321

Superconducting resistive critical field H_c of bcc region of Ti-Nb-V ternary system

15 p2782 A70-31754

Specific heat and enthalpy of body centered cubic refractory metals at high temperatures

15 p2757 A70-31943

Thermodynamic properties of bcc beta phase in Ti-Cu and Ti-Al systems, discussing activities determination technique

17 p3114 A70-34378

Beta Ti-V-Cr-Al phase transformations below 500 C, discussing metastable phase, bcc formation and thermodynamics

20 p3646 A70-39106

Bcc metals and alloys stress relaxation, internal stress and work hardening, discussing temperature dependence and dislocation motion

20 p3647 A70-39108

Orientation and applied stress effects on pure Nb-6W bcc single crystals yield stress, discussing thermal activation strengthening and crystal dislocations

22 p4052 A70-42318

Bcc metals, measuring correlation between residual stress level and fatigue damage by X ray diffraction analysis

23 p4207 A70-44422

Bcc Fe base alloys volume diffusion measurements, determining activation energy and frequency factor dependence on solute content

24 p4357 A70-45232

Fe-Ni-Co martensitic alloys isothermal age hardening, comparing bcc phase energy parameters of binary systems

24 p4362 A70-46182

Fe-Ni-Mn ternary martensitic alloy, discussing metastable miscibility gap island existence in bcc phase

24 p4363 A70-46193

BODY COMPOSITION [BIOLOGY]

Macaca nemestrina total body water measurement by dilution technique

20 p3577 A70-40333

Body composition and weight changes estimation after physical exercise by prediction equations based on skinfold and girth measurements

21 p3766 A70-42155

Ultrasonic velocity in human bones measured for calcium content and density

22 p3979 A70-43522

Absolute ULF ballistocardiogram (BCG) values as pulsatile fluid pumping values in cardiodynamic function before and after exercise

02 p0248 A70-12677

Rat body fluids displacement during positive centripetal accelerations by radioisotope tracer compounds, freezing rats in liquid nitrogen to fix hemodynamic changes

07 p1202 A70-18796

Gas bubbles formation in supersaturated solutions and body fluids during decompression

07 p1208 A70-19511

Gas bubbles formation in supersaturated solutions and body fluids during decompression

11 p1988 A70-26110

Systemic hypoxia effect on renal tubule sodium reabsorption in anesthetized mongrel dogs

13 p2353 A70-29435

Macaca nemestrina total body water measurement by dilution technique

20 p3577 A70-40333

Intracellular shifts in body fluids and dehydration tolerance in burro, comparing water content of desert animals

21 p3766 A70-42157

BODY KINEMATICS

Three machine parts problem with relative motion and given active forces distribution and time variation, determining entrainment motion

01 p0142 A70-10554

Stability conditions for helical motions of body bounded by multiply connected surface in fluid

01 p0145 A70-11439

Kirchhoff kinematic analogy applied to solution of gyrostat motion, noting elastic rod deformation under torsion, using Kharlamov equations

01 p0094 A70-11441

Body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body

01 p0068 A70-11576

- Motion coordination capacity of persons subjected to 40 days bed rest using dynamographic technique, discussing nature of slackening 03 p0425 A70-13896
- Perturbed motion of solid body with cylindrical cavity partially filled with viscous fluid, using Rabinovich equations 04 p0766 A70-14476
- Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm 04 p0629 A70-14569
- Calcium isotopes tracer migration in caged rats in metabolism study 04 p0630 A70-14571
- Reciprocating force measurement at shake table and subject interface and repetitive circumferential human torso deformation under sinusoidal input at various frequencies and intensities [ASME PAPER 69-WA/BHF-3] 04 p0631 A70-14850

- Temperature variations in organs of man and animals performing physical work as physiological base of metabolic processes and for daily activity timetable development 04 p0638 A70-15502
- Synchronous variations in skin and muscle temperatures of musculus gastrocnemius and flexor carpi in human subjects performing intermittent physical exercises 04 p0639 A70-15507
- Muscle temperature variations and respiratory activity of athletes under various exercise regimens, outlining optimal weight lifting training programs 04 p0639 A70-15507
- Rat survival rate after prolonged gradually decreased body temperature without motion restraint or kept in fixed position 05 p0804 A70-17115
- Heart rate-body temperature relationship during walking in hot environment 06 p0993 A70-17431
- Esthesiometric analysis of cutaneous thermoreceptors reaction dependence on heat production rates of human organisms 07 p1206 A70-19472
- Esophageal, rectal and quadriceps muscle temperatures, oxygen uptake, weight changes, skin conductance and skin evaporation during thermal transients caused by bicycle exercise 10 p1810 A70-24006
- Heat accumulation, oral temperature and heart rate recovery of subjects in various thermal environments 10 p1810 A70-24034
- Extravehicular activity space suits evolution emphasizing appropriate body temperature control under various conditions and work loads 10 p1824 A70-24412
- Body temperature effect on pulmonary ventilation response to exercise 10 p1819 A70-24773
- Thermostability and survival rates of white mice in ambient medium with temperature variations 13 p2351 A70-29330
- Physiological indices criteria for human thermal stress tolerance, discussing rectal temperature, body surface condition, body temperature and local cooling effects 13 p2351 A70-29332
- Intraocular tension due to muscular fatigue in overheated albino rats, determining Na and K content in eye tissue 14 p2535 A70-30159
- Physical methods in applied climatology, analyzing meteorological effects on human body and building thermal conditions and plant biomass growth 15 p2771 A70-32111
- Integrating influence of mediobasilar hypothalamic structures upon temperature regulation of juvenile rat based on Area praeroptica medialis stimulation 16 p2849 A70-33697
- Biological media thermal behavior, discussing maintenance of constant internal temperature under varying conditions in man 16 p2854 A70-33948
- Tympanic membrane and rectal temperatures compared over wide range of ambient environments as indicators of deep body temperature 17 p3029 A70-35332
- Cooling hood effect on physiological responses to work in hot environment, discussing body temperature 17 p3031 A70-35422
- Body temperature-maximum oxygen intake relations in hot humid air 17 p3038 A70-35424
- Aircraft crew oral temperature related to work-rest schedules, discussing hypothermia, flight stress and in-flight depression 17 p3032 A70-35563
- Mathematical simulation of human thermoregulatory system, considering automatic control theory 18 p3224 A70-36530
- Temperature change relation between anterior hypothalamus and concha auricularis in rabbits 18 p3218 A70-36532
- Varying thermoregulatory responses of different rodent species to long term heat and cold 18 p3218 A70-36534
- Gas metabolism, chemical thermoregulation, body temperature and weight of rats during adaptation to repeated high temperature exposure 18 p3219 A70-36538
- Gas exchange, body temperature and electrical activity of neck and back muscles of cold-acclimated white rats subjected to various temperatures 18 p3219 A70-36540
- Prolonged cold adaptation effect on heat transfer during recovery period after hypothermia in white rats 18 p3220 A70-36543
- Repeated snow cooling effect on heat transfer in white rats during temperature homeostasis recovery after hypothermia 18 p3220 A70-36544
- Psychotropic drugs radioprotective effects in mice, noting oxygen consumption and body temperature decrease after X ray exposure 19 p3367 A70-37558
- Human body core temperature control dependence during exercise on heat dissipation, noting sweating control 20 p3570 A70-38997
- Body surface cooling level and rate effects on psychomotor performance tested at various levels of mean weighted skin temperature/MWST/ 20 p3573 A70-39675
- Human peripheral blood flow rewarming in cold ambient temperature, examining skin, rectal and tympanic membrane and oxygen uptake 20 p3576 A70-40327
- Localization and functional topology of thermosensitive central nervous structures in rats cervical spinal cord, discussing role in generating heat to avert coldness 22 p3967 A70-42316

Circadian rhythm in human body temperature by Cosinor method, showing inapplicability for narrow time span

22 p3977 A70-42872

Mean skin temperatures of human body by 10 point method, using cold and hot exposure data

22 p3978 A70-42874

Spinal cord thermal stimulation effects on regional sympathetic activity in rabbits and cats determined from integrated sympathetic efferent discharges

22 p3971 A70-43406

Carbon dioxide exposure limits of rhesus monkeys, examining body temperature, respiratory rate and pressure effects

22 p3973 A70-43642

Digital recording system for body temperature telemetry from small animals, using FM transmitter implanted in peritoneal cavities

23 p4151 A70-44381

Human body heat production and transfer through convection, radiation and evaporation under normal and reduced atmospheric pressure

23 p4154 A70-44654

Hypothermia and body rewarming effects on renal hemodynamics in anesthetized dogs

24 p4301 A70-45998

Chronically implantable water perfused thermode system for hypothalamic temperature waveforms generation

24 p4309 A70-46117

BODY TEMPERATURE REGULATION

U THERMOREGULATION

BODY VOLUME (BIOLOGY)

Bed rest effects on whole leg venous distensibility, discussing heart rate and leg volume measurements

06 p0999 A70-17288

Human lung volume-to-ventilation ratios regional dispersion, using expired nitrogen concentrations analog simulation

24 p4303 A70-46113

BODY WEIGHT

Vasopressin antidiuretic hormone effects on evaporative body weight loss during heat exposure

01 p0020 A70-10516

Chicken body mass and percentage body fat following 24 weeks chronic acceleration determined from fatty acid metabolism, liver citrate cleavage and malic enzyme activities

02 p0233 A70-11720

Thin, fat and average men responses to cold during one year period in Antarctica, measuring metabolic rates, skin and rectal temperatures

03 p0429 A70-14163

Evaporative weight losses by sweating in man exposed to warm environment as function of time, including graphical method for heat storage prediction

03 p0430 A70-14164

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure

09 p1623 A70-22088

Prolonged hypodynamia effect on human nutritional habits and protein metabolism, noting decrease in energy requirement and body weight

10 p1814 A70-24675

Single and combined hypoxia and hypercapnia effects on growing rats, discussing body weights, blood and histological measurements

13 p2357 A70-29948

Mass measuring device used on biological specimens in zero gravity environment, determining normal and disturbed physiological mechanisms

14 p2542 A70-30795

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure

15 p2693 A70-32684

Pulmonary vital capacity measurements in young recruits for respiratory function, considering relationship to body weight and height

16 p2850 A70-34348

Astronaut weight loss relation to flight duration during manned space missions

20 p3574 A70-40125

Differential sphygmogram of young men, determining lean body mass on basis of anthropometrical data

21 p3763 A70-41229

Body composition and weight changes estimation after physical exercise by prediction equations based on skinfold and girth measurements

21 p3766 A70-42155

BODY-WING AND TAIL CONFIGURATIONS

Man-computer graphic systems utilization for wing/body aerodynamic design and analysis concept for subsonic vehicles

[AIAA PAPER 69-1130] 01 p0002 A70-10610

Wing-fuselage interference influence in aircraft dihedral effect, discussing role of velocity direction on wing

03 p0406 A70-13020

Aircraft aerodynamics, Volume II, covering profile and wing theory at subsonic and supersonic speeds, fuselage, wing-fuselage and tail assembly, etc

03 p0407 A70-13350

Modified tailed delta configuration selection for U.S. SST, discussing power plant installation choice [RAES PAPER 17]

03 p0411 A70-13544

Blended wing-body design concept for F-15 air superiority fighter, providing fixed wing planform for maneuverability at transonic speed

04 p0622 A70-14395

Variable sweep aircraft aeroelastic stability, considering wing-tail interaction flutter [AIAA PAPER 70-80]

06 p1170 A70-18162

Analog computation in supersonic steady flow and digital technique for wing-fuselage and wing-tail interactions

[ONERA TP-804] 10 p1802 A70-24544

Unsteady supersonic flow past tail-body system with harmonic oscillatory motions

10 p1803 A70-24789

Second order conical flows around wing-fuselage system, deriving expressions for axial perturbation velocity for various attack geometries

10 p1804 A70-24972

Tensile tests on wings and wing components of plastic engine-driven aircraft, discussing design, configurations and mechanical properties

14 p2656 A70-30250

Critical flutter behavior of variable geometry aircraft with wing of 70 degree leading edge sweep, noting wing-tail interference

18 p3338 A70-36445

Aerodynamics of steady, inviscid transonic flows around slender bodies and wing-body combinations at free stream Mach number one

[AIAA PAPER 70-798] 20 p3559 A70-39900

Unsteady supersonic flow around oscillating cross-shaped wing-fuselage system, determining perturbation velocities and pressure distributions

22 p3958 A70-42609

Short wing lift investigated via lateral fluid jets fired in wind tunnel for various lengths

22 p3958 A70-42614

BOEING AIRCRAFT

NT B-52 AIRCRAFT

NT BOEING 707 AIRCRAFT

NT BOEING 727 AIRCRAFT

NT BOEING 737 AIRCRAFT

NT BOEING 747 AIRCRAFT

NT BOEING 2707 AIRCRAFT

NT C-135 AIRCRAFT

NT CH-46 HELICOPTER

NT CH-47 HELICOPTER

Slide and sleeve type servovalves used in Boeing aircraft possessing chip shearing capability of 200 pounds axial force

02 p0229 A70-12863

Boeing 2707 SST horizontal tail multiple channel actuation system features

17 p3020 A70-35827

BOEING MILITARY AIRCRAFT

U BOEING AIRCRAFT

U MILITARY AIRCRAFT

BOEING 707 AIRCRAFT

Boeing 707 B-epoxy composite foreflap design, analysis, fabrication and flight testing

02 p0307 A70-11955

Boeing 707 aircraft operational efficiency optimization by modification program to extend wing life

03 p0497 A70-14052

Thrust control unit in Lufthansa Boeing 707 aircraft designed to maintain landing approach speed by adjusting throttle setting and landing flap position

05 p0845 A70-15903

Boeing 707 and 727 aircraft components on condition maintenance program based on statistical analysis and performance monitoring for replacing scheduled overhauls

15 p2748 A70-32656

BOEING 727 AIRCRAFT

Boeing 707 and 727 aircraft components on condition maintenance program based on statistical analysis and performance monitoring for replacing scheduled overhauls

15 p2748 A70-32656

BOEING 737 AIRCRAFT

Boeing 737 aircraft nose gear gravel deflector and engine vortex dissipator [AIAA PAPER 70-912]

17 p3020 A70-35824

BOEING 747 AIRCRAFT

Area navigation and automatic data communications in air traffic control proposed for New York area STOL aircraft operations and Boeing 747 aircraft [AIAA PAPER 69-1054]

01 p0138 A70-10640

Air traffic problems connected with Boeing 747 introduction, discussing cargo/passenger handling, fueling and maintenance procedures

02 p0227 A70-12620

Positive displacement low pressure air motors for Boeing 747 fan thrust reverser pneumatic actuators and controls

03 p0550 A70-12881

Boeing 747 nacelle development programs involving outdoor and ground test rigs, flying test bed, flight tests, etc

[SAE PAPER 690389] 03 p0550 A70-12894

Ground support and service features present facilities to handle B-747 and DC-10 aircraft [SAE PAPER 690560]

03 p0463 A70-13264

Boeing 747 aircraft family design options related to utilization, performance and economics, discussing development through large turbofan engine availability [AIAA PAPER 68-1020]

04 p0624 A70-15382

Hydrostatic synchronized steering of tow tractor for Boeing 747 and wide body jets compared to mechanical system

05 p0829 A70-16421

Hydraulic jacks for Boeing 747 support during assembly, discussing operation, console, pressure system and safety features

05 p0798 A70-16422

Boeing 747 aircraft container system deployment simulation written in GPSS/360 to minimize stockholding of containers at individual stations

08 p1481 A70-20931

Boeing 747 pretesting work including wind tunnel, components, engines and static structural tests, flight simulation, etc

08 p1437 A70-21730

Boeing 747 aircraft impact on air transportation passenger and freight rates and traffic congestion reduction

10 p1806 A70-24765

Hydraulic systems for Boeing 747 aircraft flight control

12 p2167 A70-28019

Aircraft accidents during descent, approach and landing, discussing B 747, C5A and SST

15 p2675 A70-32216

Variable loads programming by semicomputers/semihardware method for 747 fatigue testing

17 p3050 A70-35511

Boeing 747 aircraft operation in first three months of service, discussing crew training, instrumentation, navigation system improvement, etc

[AIAA PAPER 70-891] 17 p3019 A70-35805

Boeing 747 maintenance and inspection program, discussing condition monitoring, test methods, etc

[AIAA PAPER 70-889] 17 p3019 A70-35806

Boeing 747 aircraft JT9D engine deflections and removals during early service experience and maintenance

[AIAA PAPER 70-890] 17 p3019 A70-35807

Boeing 747 ground operations and airport services, discussing computerized check-in, baggage handling equipment, etc

[AIAA PAPER 70-892] 17 p3019 A70-35808

Boeing 747 aircraft pressure fueling system, describing tanks, feed system, refueling and electrostatic charge minimization

[SAE PAPER 700276] 18 p3214 A70-36816

Engine vibration monitoring system for Boeing 747 aircraft, including piezoelectric transducer, transmission assembly and differential charge converter

19 p3426 A70-37898

Boeing 747 wing panels shot peening process, discussing machine, control technique and operational requirements

19 p3437 A70-38498

Boeing 747 transport airplane flight test data system, discussing recording media, major PCM and FM tape systems, etc

19 p3431 A70-38531

Boeing 747, L-1011 and DC-10 introduction costs, profits and terminal facilities

19 p3357 A70-38951

Boeing 747 pilot transition training, discussing takeoff, landing, eyelevel, flareout taxi speeds, inertial navigation and electrical, fuel and hydraulic systems

20 p3562 A70-40083

Boeing 747 aircraft early operations experience covering airframe, engines and parts, performance, pilot and engineer training, maintenance, etc

[AIAA PAPER 70-886] 21 p3749 A70-40740

Boeing 747 aircraft passenger entertainment and service system controls electronics design and wire installation improvement by multiplexing techniques

23 p4174 A70-44543

Boeing 747 airliner passenger entertainment and service electronics multiplexing system, discussing cable and connectors selection and design

23 p4174 A70-44544

Boeing 747 flight test certification program, describing methods, data systems, inertial navigation, engines, flutter, etc

[SAE PAPER 700828] 24 p4290 A70-45891

BOEING 2707 AIRCRAFT

Boeing 2707 SST design for low community noise, discussing engine-airframe matching effect

[SAE PAPER 700808] 24 p4290 A70-45906

BOGOLIUBOV THEORY

Bogoliubov approach generalized and applied to unstable and inhomogeneous plasmas

07 p1347 A70-19108

BOHR THEORY

Hoyle-Narlikar gravitation theory, considering Bohr quantization of direct interparticle action over all pairs

24 p4403 A70-45405

BOILERS

- Solar radiation heated boilers efficiency and operational temperature range improved by application of coatings, noting surface absorption properties
11 p2148 A70-25930
- Water and alkali metal boilers, predicting helical-flow-promoting inserts effect on pressure drop penalties by constant slip model
21 p3949 A70-41308

BOILING

- NT FILM BOILING
NT LEIDENFROST PHENOMENON
NT NUCLEATE BOILING
- Pseudoboiling heat transfer from platinum wire to carbon dioxide during free convection
03 p6064 A70-13209
- Heat transfer and flux density during bubble boiling of liquid oxygen employing simulated weak gravitational fields
03 p6065 A70-13393
- Electrically heated wire diameter and orientation on heat flux in saturated pool and surface boilings of water and aqueous binary mixtures
07 p1417 A70-18643
- Empirical method for calculating critical thermal flux density during boiling of underheated liquid-vapor systems
07 p1420 A70-19068
- Vapor bubble separation diameter and flow in channel boiling applied to supercooled boiling zone determination
09 p1789 A70-23379
- Fluid boiling heated nonuniformly in pipe, deriving formulas for unsteady temperature field by integrating energy equation
09 p1791 A70-23716
- Empirical method for calculating critical thermal flux density during boiling of underheated liquid-vapor systems
10 p1970 A70-25219
- Surface temperature fluctuations during steady state boiling from tube, using fast response thermocouple
18 p3347 A70-36504
- Heat transfer in boiling liquid from temperature field and temporal changes in liquid above heating surface, determining isotherms by laser interferometry
19 p3447 A70-38455
- Bubble frequencies random distribution during boiling of pure liquids and binary liquid mixtures by optical measurement
21 p3941 A70-40775
- Local or surface boiling phenomenon under triangular channel laminar flow conditions, investigating heat transfer with and without phase change
24 p4429 A70-46089
- Peak pool boiling heat flux on horizontal cylinders, describing interactions of gravity and heater size effects
24 p4429 A70-46176
- BOLKOW AIRCRAFT
NT BO-105 HELICOPTER
BOLKOW BO-105 HELICOPTER
U BO-105 HELICOPTER
- BOLOGRAMS
U BOLOMETERS
BOLOMETERS
- Ge bolometer cooled by liquid helium 3 to near absolute zero to achieve high sensitivity for far IR detection
01 p0091 A70-10910
- Microsecond-response bolometer for measuring thermal fluxes as function of time in high explosion driven shock tubes and plasma jets
06 p1070 A70-18445
- Thin film capacitive bolometer dependent on temperature sensitivity derived from electron trapping effects
09 p1683 A70-23509
- Cryogenic Ge bolometers sensitivity variation and noise, noting radiation absorption by sensor and by coating
12 p2237 A70-28151
- Liquid He temperature fluctuation effects on cryogenic superconducting bolometer noise spectrum, deriving transfer functions
12 p2237 A70-28156
- Superconducting bolometer operating temperature stabilization
13 p2412 A70-29868
- Microsecond response bolometer for measuring thermal radiation fluxes in shock tube, discussing design, calibration and performance
21 p3824 A70-40859
- Superconducting Sn bolometer under isothermal and nonisothermal conditions, measuring noise spectra dependence on displacement current and resistance
22 p4026 A70-42397

BOLTS

- Bolted joints inspection using mechanical impedance algorithm method involving bolt head mechanical shock pulse response in adjacent structure
01 p0098 A70-10017

- Stress analysis of eyebolts in turbine blades hinged locks based on perforated plate theory with concentrated force, discussing stress distributions
01 p0210 A70-11416
- Nut and bolt locking, describing cotter pins, lock washers, elastic washers, prestressing, nut with lock nut and self locking nuts
06 p1075 A70-17436
- Wear resistance of turbine rotor blade stabilizing elements in form of bolts connecting overlapping leading and trailing edges of adjacent tips
09 p1768 A70-22095
- Stress distributions in tapered bolt assemblies due to interference and uniaxial tension
16 p2992 A70-33989
- Ball-lock-bolt separation mechanism for spacecraft applications requiring low shock, controlled release, nonfragmenting fastener
16 p2922 A70-34119
- Stainless maraging steel bolts tensile, shear and fatigue strengths and stress corrosion resistance at room and high temperatures
20 p3650 A70-39964
- Ti alloy bolts mechanical properties improvement by beta heat treatment
20 p3650 A70-39965

BOLTZMANN DISTRIBUTION

- Rotating and oscillating spectra in diatomic molecule excited by slow and fast electrons, discussing Boltzmann distribution of excited molecules
07 p1337 A70-19044
- One dimensional steady neutral shock wave structure, using expanding Boltzmann equation distribution function in terms of Hermite polynomials
07 p1260 A70-19984
- Boltzmann equations for distribution functions of gas, analyzing neutral or ionized components by linearization method
11 p2090 A70-25946
- Boltzmann equation for Knudsen layer and outer region of weakly rarefied gas flow
15 p2777 A70-32131
- Krook gas particle collision model for relaxation from nonequilibrium to equilibrium Boltzmann distribution in spatially uniform gases
17 p3068 A70-34697
- Observational evidence concerning validity of Saha and Boltzmann laws in O, B and A stellar atmospheres
17 p3170 A70-35387
- Gas and semiconductor diode lasers construction and operation principles, discussing terminology, Boltzmann distribution function, excitation methods, population inversion, etc
20 p3643 A70-40535

BOLTZMANN TRANSPORT EQUATION

- Particle diffusion distribution function of two component ionized degenerate gas from Boltzmann transport equation, giving tables for various spin and mass ratios
01 p0151 A70-10318
- Solution existence of linear unsteady Boltzmann equation for single space variable in Hilbert space defined by scalar product
01 p0143 A70-10673
- Chapman-Enskog expansion for Boltzmann equation solution, using PLK method to obtain higher approximations for shock wave structure
01 p0063 A70-10923
- Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities
01 p0068 A70-11568
- Hydrostatic equation nonequilibrium terms role in single and multicomponent atmospheres, deriving solutions to Boltzmann equation
02 p0328 A70-12386
- Riccati equation role in solving finite dimensional time invariant transport equations based on equivalent coupled linear equations
02 p0324 A70-12667
- Density effects on transport coefficients of gaseous mixtures, solving modified Boltzmann equation including collisional transfer and three-particle collision effects
03 p0606 A70-13576
- Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitean polynomials, using ordinary differential equations
03 p0526 A70-14302
- Nonlinear Boltzmann equation for heat transfer in rarefied gases between parallel plates at different temperatures using Monte Carlo method
04 p0782 A70-14811
- Numerical methods for solving Boltzmann gas kinetics equation, assessing various methods effectiveness
06 p1036 A70-17752
- Kinetic Boltzmann equations for spatially uniform two component gas mixture solved with allowance for relaxation processes, assuming differing temperatures
06 p1109 A70-17754

- Boltzmann equation direct numerical integration using successive iterations algorithm
06 p1036 A70-17755

- Kinetic relaxation and Boltzmann equations for studying shock waves propagating in gas composed of rigid ideally elastic spherical molecules without internal degrees of freedom
06 p1036 A70-17756

- Iteration for Boltzmann equation solution for relaxation of gas having solid molecules with time variable and velocity dependent distribution function
06 p1109 A70-17757

- Approximate solution to Boltzmann gas kinetics equation, using moment relations of collision integral and reverse collision operator
06 p1036 A70-17758

- Time dependent transport equations for full Reynolds stress tensor and turbulence decay function using flux approximations and relaxation model [AIAA PAPER 70-3]
06 p1038 A70-18080

- Kinetic flow regime in hypersonic flow past flat plate leading edge, using Boltzmann equation [AIAA PAPER 70-181]
06 p0970 A70-18094

- Boltzmann equation at arbitrary Knudsen numbers and kinetics of polyatomic molecule gases
06 p1047 A70-18310

- Boltzmann equation for binary mixtures of rarefied gases solution involving specific expansion of distribution functions
06 p1047 A70-18311

- Monatomic gas flow past moderate curvature body, obtaining approximate solutions to Boltzmann equation under form of matched asymptotic expansions
06 p0979 A70-18316

- Linear Boltzmann equation in bounded domain, studying solutions existence, uniqueness and structure
06 p1047 A70-18317

- Discrete ordinate technique for nonlinear Boltzmann equation tuned for computing collision integrals to instantaneous nature of distribution function
06 p1047 A70-18319

- Nonlinear Knudsen layer gas flow using BGK model for Boltzmann equation
06 p1048 A70-18322

- Monte Carlo method applied to Boltzmann collision integral in solving heat transfer between plates at different temperatures in elastic spheres gas
06 p1183 A70-18324

- Thermal slip velocity of gas in infinite temperature gradient tangential to solid wall, basing calculation on linearized Boltzmann kinetic equation
06 p1049 A70-18332

- Surface diffusion slip velocity in binary gas mixture above solid surface, basing calculation on distribution functions determined from Boltzmann equation
06 p1049 A70-18333

- Monte Carlo method applied to solving nonlinear Boltzmann equation for plane shock waves in elastic sphere gases
06 p1050 A70-18335

- Least squares method to determine shock thickness at arbitrary Mach number from Boltzmann equation for rigid sphere rarefied gas
06 p1051 A70-18345

- Hyperthermal leading edge analyzed by examining adjacent relevant mean free paths for collisions, establishing basis for formal expansion of Boltzmann equation
06 p0979 A70-18347

- Free molecular heat transfer from sphere at rest in rarefied monatomic gas solved for Krook model of Boltzmann equation
06 p1183 A70-18375

- Time dependent relaxation model for heat flux in metals from quantum mechanical form of Boltzmann transport equation, yielding damped wave equation for temperature
06 p1090 A70-18612

- Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations
07 p1347 A70-18678

- Molecular beam approximation introduced in Boltzmann equation to investigate high speed rarefied flows
07 p1261 A70-20130

- Boltzmann systems dynamics, discussing excitation spectrum, momentum relaxation time, particle diffusion trajectory, macroscopic theory of quasi-collective processes, hydrodynamics, etc
08 p1545 A70-21421

- Kramer problem in kinetic gas theory and gas dynamics applied to Boltzmann equation, discussing uniqueness theorem [ONERA-TP-776]
08 p1486 A70-21845

- Shock wave structure nonequilibrium kinetic model using Boltzmann and Navier-Stokes equations
09 p1662 A70-23306

- Flux equations of single velocity Boltzmann type for unsteady transport problems applied to concentration discontinuity propagation through plane layer
10 p1966 A70-23871

- Coupled Boltzmann and rate equations for free electron distribution function and level populations in monatomic partially ionized gas including nonelastic collisions
10 p1918 A70-23958

Boltzmann collisionless transport equation for relativistic plasma solved by expanding distribution function in terms of unnormalized spherical harmonics 10 p1923 A70-24228

Hydrodynamic equations for ions and electrons of ionized collisional plasma in inhomogeneous magnetic field based on Boltzmann kinetic equations 11 p2088 A70-25710

Boltzmann equation in circular magnetic field solved by Fourier series and Legendre polynomials, correcting distribution function due to Fourier harmonics 13 p2464 A70-29485

Cross coupling relations in Boltzmann equations solution for inhomogeneous plasmas, using spherical harmonics expansion and Laguerre-Sonine polynomials 13 p2464 A70-29539

Ionization coefficient calculation for preionizers through electron distribution function solution to Boltzmann equation 13 p2468 A70-29962

Quantum mechanical Boltzmann equation for atomic gas of composite particles, considering excited level degeneracy 14 p2619 A70-30651

Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations 15 p2777 A70-31470

Soviet book on rarefied gas dynamics involving methods and approaches for kinetic description of gas behavior, emphasizing Boltzmann equation 17 p3067 A70-34604

Exact and normal solutions of Boltzmann equation linearized around total equilibrium, yielding Navier-Stokes and Burnett transport coefficients 17 p3128 A70-34628

Kinetic theory of moderately dense gases, obtaining generalized Boltzmann equation 17 p3072 A70-35534

Chamber solution of Boltzmann time dependent equation in relaxation time approximation 17 p3136 A70-35596

One dimensional steady gas flow, deriving algorithm for iterative solution of Boltzmann kinetic equation by statistical approach 18 p3241 A70-36285

Boltzmann equation for relativistic gas, adapting Grad solution method 19 p3403 A70-37584

Cauchy problem for linearized relativistic Boltzmann equation near equilibrium, using functional analysis 19 p3403 A70-37585

Boltzmann equation for relativistic gas without dissipation, solving for relaxation time and elastic collisions 19 p3403 A70-37586

Magnetoelectric electromotive force in media of ions and neutral molecules, using Boltzmann transport equation 21 p3855 A70-40909

Minimum entropy production in kinetic theory of rarefied gases described by Boltzmann equation 21 p3850 A70-41957

Computerized evaluation of Krook kinetic relaxation equation approximating Boltzmann nonlinear integral equation for rarefied gas motion 21 p3851 A70-42201

Plasma kinetic theory, applying Boltzmann equation, Lorentz gas model and relaxation method 23 p4224 A70-44177

Homogeneous plasma in unidirectional oscillatory electric field, solving Boltzmann equation by electron distribution function expansion 23 p4225 A70-44240

Electron distribution function in homogeneous ionized plasma under oscillating electric fields and steady magnetic fields, solving Boltzmann transport equation 23 p4226 A70-44248

BOLTZMANN-VLASOV EQUATION

Higher order magnetic field-free temporal and spatial plasma wave echoes, solving collisionless Boltzmann equation by method of characteristics 19 p3476 A70-37557

Electron-neutral collisional damping of longitudinal electron oscillations in weakly ionized plasma, solving linearized Boltzmann-Vlasov equation 21 p3860 A70-42014

BOLZA PROBLEMS

Closed loop nonlinear optimal control systems sensitivity to small parameter variations noting influence of feedback 03 p0461 A70-14171

Analytical approach to gradient method within framework of Bolza problem of variational calculus, using linearized differential and isoperimetric constraints 03 p0520 A70-14341

Endpoint sufficiency test based on differential calculus method, considering Bolza problem of continuous state and piecewise control variables 11 p2073 A70-26233

BOMBER AIRCRAFT

NT B-52 AIRCRAFT

NT B-70 AIRCRAFT

NT VULCAN AIRCRAFT

BOMBS [ORDNANCE]

Fin slots and tabs effect on dynamic stability characteristics of low drag bomb, discussing free rolling and pitching tests 21 p3747 A70-41880

BOMBS [PRESSURE GAGES]

U PRESSURE GAGES

BOMBS [SAMPLERS]

U SAMPLERS

BONDING

NT CERAMIC BONDING

NT EXPLOSIVE WELDING

NT METAL BONDING

NT METAL-METAL BONDING

NT RESIN BONDING

Particle, resin and inorganic bonding of solid lubricant to surface and dry lubricant film performance 05 p0855 A70-16043

Resistance strain gauge load cell for measuring compressive loads under high hydrostatic pressure, discussing gauge bonding 05 p0848 A70-16377

Mechanical fastening, adhesive bonding and machining methods for laminated fiberglass reinforced plastic materials 05 p0856 A70-16618

Fiberglass reinforced plastics bonding, discussing structure fabrication and use as material 07 p1295 A70-19759

Longitudinal strength characteristics of filament reinforced composites, discussing bond strength effect on filament fracture 08 p1533 A70-21918

Electrical conductance test for composite materials adhesive bond degradation by liquids 11 p2071 A70-26345

Nondestructive bond inspection by interferometric holography of ultrasonically excited plates 14 p2588 A70-31166

Glass bonding techniques for semiconductor strain gages, discussing outgassing minimization, hysteresis and repeatability and operational temperature range extension 15 p2739 A70-32325

Holographic interferometry for evaluating bond between diaphragm and base in pressure transducer 16 p2904 A70-33138

Adhesive bonds strength parameters, discussing substrate type, surface preparation, etc [ASME PAPER 70-DE-33] 16 p2939 A70-33504

Adhesives selection based on bond performance requirements, considering joint design, stress distribution, temperature effects, etc [ASME PAPER 70-DE-69] 16 p2939 A70-33519

Bond stress distribution in elastic solid with axisymmetrical inclusions under uniform tension, using three function and point matching techniques 17 p3184 A70-34911

IR NDT bond inspection system for helicopter rotor blade honeycomb box assemblies, using closed circuit slow scan video system to detect bondline voids 17 p3101 A70-35184

Joint designs, attachment methods and load introduction in composite structures, suggesting adhesive bonding 20 p3730 A70-40041

Bond stresses between fiber and matrix of fiber reinforced composite materials determined by numerical method based on superposition 21 p3934 A70-41252

Photochromic paint nondestructive testing for survival equipment, detecting bond defects and sandwich water 23 p4197 A70-44490

BONE MARROW

Hypoxic stimulation effect on erythropoiesis in vivo bone marrow 01 p0017 A70-10464

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs 09 p1614 A70-22083

Rhesus monkey active bone marrow distribution and volume studied by radioactive tracing techniques 09 p1616 A70-22301

Therapeutic power of bone marrow transplanted from mice earlier irradiated by high energy protons into newly irradiated mice 09 p1619 A70-22814

Thymidine tracer distribution in bone marrow chromosomes of rats and mice treated with radioprotectors, noting cell metabolic activity reduction by sulfhydryl-type radioprotectors 09 p1619 A70-22818

Therapeutic effects of hemopoietic tissue transplants of bone marrow on irradiated rats, using diffusion chamber for resettlement prevention 13 p2354 A70-29753

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs 15 p2685 A70-32679

Simulated space flight radiation effects on dogs DNA synthesis and bone marrow cell differentiation 20 p3575 A70-40191

Heme biosynthesis defect in vitamin E-deficient rats affecting bone marrow synthesis of delta-aminolevulinic acid and liver formation of porphobilinogen 24 p4304 A70-46146

BONES

NT CARTILAGE

NT CEREBRUM

NT CRANIUM

NT FEMUR

NT MARROW

NT SCIATIC REGION

NT SKULL

NT ULNA

NT VERTEBRAE

Recumbency effect on human heel bone density during bed rest using X rays 06 p0996 A70-17850

Percentage changes in X ray calibration wedge mass equivalency to actual changes in bone Ca content 06 p0997 A70-18015

Long bone necrosis in response to reduced atmospheric pressure exposure, comparing lesions with caisson disease 08 p1449 A70-21944

Mineral saturation in calcaneal bone and hand finger phalanx in humans under prolonged hypodynamia by X ray analysis, observing Ca salts reduction 10 p1815 A70-24676

Bone and muscle tissue morphological changes in caged and immobilized rodents and in myasthenic humans 17 p3030 A70-35357

Ultrasonic velocity in human bones measured for calcium content and density 22 p3979 A70-43522

Weightlessness and immobilization effects on mechanical tolerance of bone compressive and breaking strength in monkeys 22 p3973 A70-43648

BOOLEAN ALGEBRA

NT BOOLEAN FUNCTIONS

BOOLEAN FUNCTIONS

Symmetric Boolean function detection by method using potential concept, determining alpha numbers with potential values for canonical terms 02 p0324 A70-12188

BOOMS [EQUIPMENT]

Deployable STEM/storable tubular extendible member/booms for aerospace gravity gradient stabilization, noting interlocked BI-STEM 04 p0761 A70-14725

TV system for satellite antenna boom position monitoring, describing camera system and programming, imaging techniques, position calibration, etc 10 p1891 A70-24898

Hybrid satellite attitude control system deformation model, utilizing pivoted flexible boom with tip mass as actuator and inertia wheels to dampen gravity induced librations 11 p2123 A70-26127

Orbit eccentricity effect on gravity gradient system with single damping boom, investigating optimum steady state and transient response conditions 11 p2123 A70-26129

Motion stability of rapidly spinning satellite, discussing elastic booms effect 11 p2128 A70-26784

Thermal coated extendable boom for space applications, describing construction and vacuum metallizing technique 12 p2242 A70-27266

Subcaliber cylindrical boom at base of spin stabilized projectile shown to produce aerodynamic changes in static and Magnus moments 13 p2340 A70-29023

Book on tubular spacecraft booms covering design and flight experiences, system performance, evaluation, etc 16 p2983 A70-33961

Spacecraft boom design and performance, including Russian spacecraft photographs 16 p2985 A70-34137

Thermal and mechanical properties of materials for spacecraft booms design 16 p2986 A70-34138

Gearhead DC/AC electric motors with wet/dry lubricants, discussing selection criteria for spacecraft boom deployment 16 p2846 A70-34139

Spacecraft boom selection, discussing parameters, intended use, environment and effect on vehicle 16 p2986 A70-34140

Closed tubular extendible boom [Multiple Applications Storable Tube/ design, fabrication and applications, including stress factors and materials 16 p2846 A70-34142

Space erectable boom with interlocked seam, perforations and coatings to provide torsional rigidity and thermal stability 16 p2986 A70-34143

ATS attitude stabilization boom packages, describing torque transmission, drum synchronization, electrical isolation, lubrication, etc 16 p2846 A70-34145

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle
[AIAA PAPER 69-920] 21 p3931 A70-41856

Comparative stability of freely spinning satellites for arbitrary number of flexible booms in rotation plane
22 p4111 A70-43440

Spacecraft thin walled tubular booms thermal curvature time constants in relation to solar induced despin of satellites
23 p4258 A70-44521

BOOST

U ACCELERATION (PHYSICS)

BOOSTER RECOVERY

Space shuttle atmospheric maneuvers, examining booster and orbiter entry, flyback and abort
[AAS PAPER 70-047] 17 p3175 A70-34787

BOOSTER ROCKET ENGINES

ELDO booster rocket third stage design and construction, including pictures of parts and devices
03 p0580 A70-13795

Altitude simulation equipment for third stage Europa 1 booster rocket
04 p0664 A70-15302

Fluidics application in sounding rocket guidance control circuits used in space boosters
05 p0797 A70-15809

Air force booster growth inventory, noting combination with space-configured upper stages and strap-on solid motors
[SAE PAPER 690713] 05 p0922 A70-15831

ELGO launcher system with apogee booster for placing payload in geostationary orbit
13 p2505 A70-28768

Digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device
[AIAA PAPER 69-988] 14 p2615 A70-30771

Europa 3C light alloy space booster powered by Rolls-Royce engines using kerosene and LOX
15 p2810 A70-32257

Ion electric propulsion system coupled with small booster for geostationary orbit realization
15 p2790 A70-32276

Velocity vector for boost vehicles guidance, comparing implicit and explicit computation
16 p2947 A70-33441

Speed convergence of hybrid vs digital computer synthesis of optimal boost vehicle controller, considering fuel consumption and pitch dynamics
16 p2981 A70-33442

Control systems synthesis with parametric invariance for spacecraft boosters
17 p3177 A70-35219

Launch vehicle injection error sensitivity minimization by trajectory shaping using excess booster capability
[AIAA PAPER 70-1078] 19 p3534 A70-38889

Combustion chamber, turbopump and combustion control system for French turbopump-fed booster rocket motor
20 p3688 A70-39649

Hybrid combustion ram rocket drives, discussing booster initial acceleration, exhaust gas use as fuel and payload gain
[ICAS PAPER 70-50] 23 p4233 A70-44147

Europa 2 booster perigee stage engine design, discussing total and propellant masses, spin stabilization, materials, etc
23 p4234 A70-44672

Saturn 5 Apollo booster stages oscillations induced by coupling between vehicle structure and engine thrust corrected within existing systems
[AIAA PAPER 70-1236] 24 p4417 A70-45954

Italian space satellite booster programs for launching satellite payloads into low orbit
03 p0609 A70-13846

Reusable booster rocket heat protection system design, discussing ablation and insulation methods
05 p0958 A70-16635

Expendable propellant tanks /Tip Tank Concept/ on lifting body reusable booster operations to reduce cost for low earth orbital transport mission
11 p2122 A70-26052

Two stage rocket booster-ram rocket launcher combination compared to single and two stage rockets
11 p2126 A70-26287

Low cost orbital space transportation system with shuttle service, discussing booster and configuration selections, weight, costs, etc
[AIAA PAPER 70-256] 13 p2506 A70-29615

Balloon-radar soundings of horizontal wind profiles for booster vehicle design
14 p2653 A70-30588

Reliable collet release mechanism design for separation and ejection of reentry vehicle payload from booster
16 p2922 A70-34118

Booster parameterized guidance algorithms investigated on basis of steering forms validity, discussing exoatmospheric ascent applications
[AIAA PAPER 70-1006] 20 p3669 A70-39584

BOOSTGLIDE VEHICLES

Space shuttle structural technology for booster and orbiter, discussing hot and cold structure concepts, reentry bodies, military payloads, radiating protective coatings, refractory materials, etc
22 p4111 A70-43516

BORANES

NT CARBORANE

BORES

U CAVITIES

BORESIGHTS

Nonimaging remote sensor data display in spatial registration with ground scene to determine sensor boresight position accuracy
12 p2229 A70-26940

BORIC ACIDS

Third body coefficients of water and heavy water reactions in KCl coated and aged boric acid coated vessels with vibrational-vibrational exchanges
14 p2546 A70-31091

BORIDES

NT TITANIUM BORIDES

Phase content determination in borides and borocarbides mixtures based on compounds different chemical stabilities during hydrolysis and reaction with acids
03 p0514 A70-12984

Metastable tau-phase in Fe-Ni-B melt solidifying into boride, noting lattice constant and solubility
07 p1307 A70-19393

Synthesis procedure for single crystal transition metal diborides, using high pressure capability in controlling stoichiometry
07 p1313 A70-19895

Boride composites with high strength and thermal resistance suitable as nose cap and leading edge materials for reusable lifting reentry systems
[AIAA PAPER 70-278] 07 p1315 A70-20387

Thermal emission cathodes made from lanthanum, yttrium and gadolinium hexaborides, measuring I-V characteristics
22 p3998 A70-43442

Ti, Zr and Hf diborides electrophysical properties, discussing temperature effects and electronic structures
23 p4205 A70-43991

Thermal and electrical conductivities of zirconium and hafnium diborides polycrystalline powders at 300-1300 K
23 p4209 A70-44443

BORN APPROXIMATION

Electron loss in heavy body collisions from free scattering model and Born approximation
02 p0342 A70-11879

Hydrogen-hydrogen double excitation collision cross sections computed by impact parameter method, using Born and two state approximations
02 p0342 A70-11881

Spectrum function in Booker scattering formula /first order Born approximation/ for dielectric constant fluctuations in hypersonic wake plasmas
03 p0529 A70-12908

Born wave for atom-atom inelastic cross sections, calculating He excitation from ground state to higher states by H atom collision
07 p1346 A70-20241

Born approximation used in calculating wave functions of helium atom for determining generalized oscillator strengths in first ionized continuum of helium
10 p1919 A70-24072

Electron-atom collisions, treating elastic and Mott scatterings, Born approximation and ionization
12 p2274 A70-27062

Born approximation limit for plane wave multiple scattering by inhomogeneous electron density distribution in plasma
16 p2957 A70-32981

Rayleigh-Gans-Born approximation application to thermal radiation of reflecting convex plasma sphere, cylinder and ellipsoid
18 p3294 A70-36146

Electron excitation cross sections for light atoms using Slater wave functions and Born-Bethe approximations
21 p3853 A70-41393

BORN-MAYER EQUATION

U BORN APPROXIMATION

BORN-OPPENHEIMER APPROXIMATION

Coupled Schroedinger equations for diatomic molecules internal motion solved using best adiabatic approximation to obtain energy correction to Born-Oppenheimer method
08 p1548 A70-21522

Adiabatic corrections to long range Born-Oppenheimer interatomic potentials from rotationally coupled Schroedinger equations
17 p3138 A70-35199

BORON

NT BORON ISOTOPES

Tensile tests of heat treated silicon carbide coated B filament reinforced metals, discussing fiber strength and interfacial stability
01 p0117 A70-10483

Fiber breakage during powder metallurgy fabrication of compact Al-B composites as function of density
01 p0104 A70-10741

Injected B particles burning in hot gas stream of oxidant mixture with Ar and H, observing trace widening by motion picture technique
01 p0218 A70-11016

Boron fiber reinforced epoxy fatigue life dependence on reinforcing fibers aspect ratio
01 p0129 A70-11082

Al-B composite missile adapter design for aerospace structures
02 p0306 A70-11951

Boeing 707 B-epoxy composite forelap design, analysis, fabrication and flight testing
02 p0307 A70-11955

B and C fiber unidirectionally reinforced plastic composites, discussing mechanical properties, fabrication and testing
02 p0321 A70-12082

Boron combustion in air augmented rockets, examining mixing and burning between subsonic air and supersonic fuel rich exhaust
[AIAA PAPER 68-634] 03 p0603 A70-12910

Quantitative method developed for photometric determination of B in nickel or titanium borides, using magnezon I reagent in alkaline solutions at various pH
03 p0504 A70-2983

Axial and traction loaded boron epoxy laminates tensile and compressive elastic properties and strengths compared from test data including strain gauge measurements
03 p0586 A70-13115

Case hardened steels structure and properties, intermetallic phases, hardness variation with depth and hardening techniques by Be and B
03 p0510 A70-13351

Two step B vacuum diffusion from boron oxide into Si surface using evacuated tube and N atmosphere
05 p0891 A70-15791

Boron and other high performance reinforcements made by vapor plating process, discussing boron filament atomic structure and morphology
05 p0873 A70-16609

Boron-epoxy composite materials for secondary and primary aircraft structural components, discussing multidirectional laminates, joint analysis, etc
05 p0942 A70-16620

Joint design for braze bonding and joining of Al-B composites using Borsic tape backed with alloy brazing foil
07 p1293 A70-18994

Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure
[AIAA PAPER 69-562] 07 p1359 A70-19583

Boron fiber reinforced composites structure and loading capacity, describing network-like fiber winding technique for light reinforced structures
07 p1318 A70-19771

Fatigue tests to relate boron-epoxy laminate fatigue behavior to thermal preconditioning environments
07 p1320 A70-19960

Nickel boronizing in high temperature vacuum, studying mechanical properties and layer thickness time dependence
08 p1517 A70-21148

Graphite crystals surface ribbed growth in Ni-C solutions due to B content observed by scanning electron microscope
08 p1520 A70-21552

Axial constant load creep and strength rupture measurements of B-coated and silicon carbide-coated B filament reinforced Al alloys
08 p1521 A70-21702

Transverse and shear strengths of Al-B composite materials used in F-111 aircraft components, investigating cold work, thermal treatments and steel wire addition effects
08 p1509 A70-21857

Tension, compression and in-plane shear tests to obtain boron epoxy composite materials mechanical properties to design FB-111 wing box extension
08 p1529 A70-21879

Compression test data of Al-B composites used for predicting structural element failure
08 p1523 A70-21886

Test standards for boron epoxy flat laminates, proposing specimen geometries and testing methods
08 p1530 A70-21887

Matrix optimization of boron filament reinforced polymeric for short duration high temperature aerospace applications
08 p1530 A70-21891

Fatigue testing and thermal mechanical treatment effects on uni- and biaxial Al alloy-B composites tensile strength at room and elevated temperatures
08 p1523 A70-21893

Tensile, fatigue, creep and stress-rupture behavior of unidirectional, unidirectional off-axis and cross-piled composites of B filaments in Al alloy matrix
08 p1531 A70-21896

- Laminated anisotropic rectangular plates of boron-epoxy composite material, studying shear stability by potential energy and Ritz method
08 p1595 A70-21903
- Structural analysis of boron filament-epoxy composite laminate tubes for use as spacecraft long column members
08 p1595 A70-21911
- Fractography of Al-B metal matrix composites to study micromechanical behavior, using scanning electron microscopy
08 p1524 A70-21913
- Al-B composites mechanical properties, using heat treatments and transverse steel wires to increase matrix shear and transverse tensile strengths
09 p1701 A70-22551
- Solar boron abundance from BH, BN and BO absorption bands in sunspot spectra, noting no traces in solar atmosphere
11 p2108 A70-25738
- Al and B particles combustion in methane-oxygen system, considering reaction zone models, energy release rate, particle kinetics, instabilities, etc
11 p2149 A70-26284
- Boron epoxy composite structural parts for aerospace vehicles, discussing production times and cost reduction
[ASTME PAPER EM-69-143] 12 p2240 A70-27076
- Boron fibrous composite panels machining methods including drilling, routing, band sawing and reaming
[ASTME PAPER EM-69-141] 12 p2240 A70-27077
- Wide goods fabrication of boron composites, discussing mechanical properties and cost effectiveness
[ASTME PAPER EM-69-142] 12 p2240 A70-27078
- Filament winding process for boron modified phenolic resin tape used in high temperature applications
12 p2242 A70-27204
- Aluminum-boron composite material applications to structural components of F-106 aircraft, noting weight saving and mechanical properties
[AIAA PAPER 68-975] 12 p2257 A70-28082
- Aircraft structure fabrication combining unidirectional strength and stiffness of B composite with metal, including test and weight/cost data
13 p2418 A70-28777
- Aluminum-boron composites for aircraft adapter fabrication
13 p2435 A70-29247
- Boron particles combustion behavior prediction by incorporating condensed phase effect into diffusion controlled model
[WSCI PAPER 70-9] 13 p2472 A70-29612
- Metallic base fiber and particulate composites, emphasizing silicon carbide, sapphire, boron and graphite filaments
14 p2597 A70-31168
- Al-B composites forming and machining, discussing tooling, methods and filament orientation
[ASM PAPER W70-5.2] 15 p2744 A70-32334
- Mechanical properties prediction analysis of boron filament wound reinforced composite structures verified by structural tests
16 p2937 A70-33370
- Boron, silicon carbide and graphite fibers surface properties
16 p2937 A70-33376
- Boron particles ignition and combustion in supersonic air stream, emphasizing axial and lateral two phase flow injection
[AIAA PAPER 70-737] 16 p2856 A70-33496
- Boron epoxy composite wing structures design, fabrication and testing
16 p2990 A70-33703
- Boron-epoxy stiffener reinforced metal wings, examining structural efficiency of multiweb beam aluminum cover skins and Z stiffened panels
16 p2994 A70-34230
- Electrochemical oxidation of p-type boron anode in aqueous solutions, using galvanostatic technique
17 p3041 A70-34514
- Secondary combustion products of air augmented boron loaded solid propellant rocket ram burner, measuring properties by spectroscopy
17 p3196 A70-35196
- Boron thermal diffusion effects on plastic of pure Mo subjected to recrystallization
17 p3102 A70-35408
- Al alloy matrix-boron fiber-stainless steel wire composites fabrication into various shapes with desired mechanical properties for aerospace structural components applications
18 p3263 A70-36837
- Boron composites development for aircraft structures compared with titanium
[ASME PAPER 70-GT-120] 18 p3344 A70-36851
- Refractory metals interaction with boron during vacuum boronizing, investigating kinetics and optimal process conditions
19 p3434 A70-37452
- Boron and boron carbide coatings formation on graphite by vapor deposition, determining optimum parameters for reaction control
19 p3455 A70-38250
- Boron vs carbon fiber reinforced plastics, discussing layer and panel structures, molded and mechanical sections, preimpregnation, cost and structural concepts
21 p3842 A70-41263
- Electronic transitions in B by beam foil technique for spectral lines in 450-5000 Å range, measuring excited levels mean lives
21 p3781 A70-41932
- Particulate boron levitated electrostatically in air and ignited by pulsed laser to avoid contamination, investigating combustion by high speed photography [SMPT PREPRINT 100] 22 p4032 A70-43034
- Boron-Al composite filament fracture behavior and postimpact tensile strength, examining shock loading and impact velocity effects
22 p4060 A70-43682
- Boron-epoxy composites rectangular reinforcing arrays spacing aspect ratios, considering matrix stress concentrations and stiffness estimates
22 p4119 A70-43688
- Boron impurities introduction into InP crystals grown by liquid encapsulation, detecting IR absorption bands due to localized lattice vibration
23 p4231 A70-44891
- Boron and boron-carbide coatings formation by vapor deposition, determining optimum thermodynamic parameters from experiment
24 p4366 A70-45241
- Carbon steel diffusion saturation with Ti and B, investigating layer depth, weight gain and microhardness dependence on powdered mixture composition
24 p4364 A70-46336
- BORON ALLOYS**
B-C alloys chemical composition effect on high temperature stability in pure oxygen
03 p0514 A70-12978
- Isothermal sections in Ti-Ni-B, Mo-Ni-B and W-Ni-B at 800 C determined by X ray analysis
06 p1090 A70-17846
- Isothermal section determination in Mo-Cr-B at 1000 C using X ray, metallographic analyses and microhardness measurements
06 p1090 A70-17847
- Alloying elements effects on vanadium alloys case hardening by boronizing
07 p1303 A70-18742
- Tensile strength of nitrided boron-aluminum alloy composite modules, noting effect of Ti cladding on panel surfaces
11 p2066 A70-26085
- Boron effects in austenitic stainless steels, considering chromium carbide formation, high temperature strength, ductility, etc
16 p2916 A70-33079
- Sintered boron-alloyed Mo electron beam welding behavior examined by texture-revealing color etching method
21 p3833 A70-41411
- BORON CARBIDES**
Phase content determination in borides and borocarbides mixtures based on compounds different chemical stabilities during hydrolysis and reaction with acids
03 p0514 A70-12984
- Boron and boron carbide coatings formation on graphite by vapor deposition, determining optimum parameters for reaction control
19 p3455 A70-38250
- Temperature effect on friction coefficient of boron and silicon carbides, using similar wear pairs in vacuum
23 p4205 A70-44044
- Boron and boron-carbide coatings formation by vapor deposition, determining optimum thermodynamic parameters from experiment
24 p4366 A70-45241
- BORON CHLORIDES**
Luminescence and destruction of gaseous boron trichloride by carbon dioxide laser radiation
11 p2064 A70-26818
- Luminescence and destruction of gaseous boron trichloride by carbon dioxide laser radiation
24 p4351 A70-45190
- BORON COMPOUNDS**
NT BORIC ACIDS
NT BORIDES
NT BORON CARBIDES
NT BORON CHLORIDES
NT BORON FLUORIDES

NT BORON OXIDES
NT CARBORANE
NT DIBORANE
NT TITANIUM BORIDES
- Boron carbonitride soldering with refractory metals by molybdenum disilicide as solder, analyzing electrical resistance and gas tightness
09 p1707 A70-23123
- Amorphous boron arsenide films deposited on Si substrates, measuring current voltage characteristics
15 p2785 A70-32584
- BORON FLUORIDES**
Oxygen difluoride-diborane reaction kinetics and boron fluoride formation rate
[WSCI PAPER 70-11] 13 p2362 A70-29611
- Pressure dependence and high pressure limiting values of rate constants of gas phase reaction of monomethylamine and trimethylamine with boron trifluoride
19 p3373 A70-37775
- BORON HYDRIDES**
NT CARBORANE
BORON ISOTOPES
Solar neutrinos detection from recording high energy electrons in reactions, using Li 7, Be 9 and B 11 as detectors
05 p0899 A70-15964
- BORON NITRIDES**
Thermal stability of turbine sealant mica-ceramic materials containing boron nitride
04 p0712 A70-14467
- Tensile strength of nitrided boron-aluminum alloy composite modules, noting effect of Ti cladding on panel surfaces
11 p2066 A70-26085
- BORON OXIDES**
Density, refractivity, thermal expansion coefficient, softening point and soaking stability for glass containing barium, lead, boron, bismuth and titanium oxides
05 p0871 A70-16594
- Crystallization and dielectric properties of glass containing barium, lead, titanium and boron oxides, noting frequency and temperature dependence
05 p0871 A70-16595
- Ingredient proportions for enamels containing titanium and boron oxides
05 p0871 A70-16597
- BORON TRIFLUORIDE**
U BORON FLUORIDES
BOSE-EINSTEIN STATISTICS
U QUANTUM STATISTICS
BOSON FIELDS
Five dimensional rotations and representation of isomorphic spinor groups by boson operators calculus, expanding Gelfand states in Weyl patterns
01 p0147 A70-10521
- BOSONS**
NT ALPHA PARTICLES
NT MESON RESONANCES
NT MESONS
NT PHOTONS
NT PIONS
- Self gravitating bosons or fermions equilibrium configuration in ground state, confirming Oppenheimer-Volkoff treatment approximation
08 p1581 A70-21741
- Second quantization exciton theory in amorphous disordered materials, discussing hamiltonian, boson annihilation operators and electronic polarization
14 p2627 A70-30693
- BOUGUER LAW**
Bouguer single-scatter theory applicability dependence on angular aperture of receiver and laser beam parameters in water mists
03 p0451 A70-13756
- Configuration factors independence on Lambert law in radiation from spheres and infinitely long cylinders [ASME PAPER 69-HT-J] 04 p0784 A70-14870
- Bouguer single-scatter theory applicability dependence on angular aperture of receiver and laser beam parameters in water mists

- BOUNDARIES**
NT FLUID BOUNDARIES
NT FREE BOUNDARIES
NT GAS-SOLID INTERFACES
NT GRAIN BOUNDARIES
NT JET BOUNDARIES
NT LIQUID-LIQUID INTERFACES
NT LIQUID-SOLID INTERFACES
NT LIQUID-VAPOR INTERFACES
- Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field
01 p0082 A70-11522
- Love wave propagation in layers with irregular boundaries, investigating scattered field to determine reflection from triangular notch
13 p2394 A70-28831
- Au-Pd films boundary structure during diffusion annealing, noting polymerized oil vapor effect originating from vacuum pump
15 p2758 A70-32121
- Point source electric field over different sections of impedance piecewise inhomogeneous surface, calculating attenuation function near boundaries
19 p3381 A70-38570
- BOUNDARY LAYER COMBUSTION**
Thermal conditions and graph-analytic solution of laminar boundary layer combustion of disk rotating in free atmosphere and plate in Couette flow
01 p0218 A70-11017
- Inert, oxidizing or reducing fluids wall injection into combustion gas boundary layer of variable composition noting effects on wall temperature
05 p0956 A70-15919

Thermal conditions and graph-analytic solution of laminar boundary layer combustion of disk rotating in free atmosphere and plate in a Couette flow
09 p1787 A70-22266

Laminar boundary layer behind normal shock wave with vaporization and combustion, obtaining profiles on analog computer
11 p2148 A70-25967

Two layer model of burning in turbulent boundary layer on porous surface for carbon monoxide oxidation reaction
18 p3346 A70-36268

BOUNDARY LAYER CONTROL
NT POROUS BOUNDARY LAYER CONTROL
Turbulent boundary layer control by wall jet, analyzing wall jets in adverse pressure gradients for two limiting cases
[AIAA PAPER 70-107] 06 p1041 A70-18160

Aircraft development for subsonic and transonic flight dependent on methods using blowing and boundary layer control and Coanda and Magnus effect
09 p1610 A70-22220

Boundary layer to wake bleed venting for flare-induced separation prevention in hypersonic flow over blunt bodies
16 p2838 A70-33884

Moving skin boundary layer control on airfoil achieved by moving wetted surface in streamwise direction
[AIAA PAPER 70-881] 17 p3010 A70-34808

High lift airfoils boundary layer separation suppression by blowing, describing wall jets streamwise development prediction methods
[AIAA PAPER 70-872] 17 p3010 A70-34818

Suction velocity effects on Rayleigh problem in MHD of flat nonmagnetic nonconducting plate, solving for velocity distribution and skin friction
19 p3481 A70-38448

Turbulent boundary layer control by uniform fluid injection and suction, discussing velocity profiles, wall and wake laws, skin friction and shear stress transport equation
[ICAS PAPER 70-10] 23 p4180 A70-44121

Aircraft longitudinal motion during takeoff and landing due to loss of lift after boundary layer control system failure
24 p4372 A70-45448

BOUNDARY LAYER FLOW
NT BOUNDARY LAYER SEPARATION
NT REATTACHED FLOW
NT SECONDARY FLOW
NT SEPARATED FLOW
Boundary layer equations for plane steady incompressible flow, studying given velocity profiles effects on equations solutions
01 p0060 A70-10144

Boundary layer around blunted cone solved numerically by finite difference method
01 p0001 A70-10297

Turbulent boundary layer computations for flows with various pressure distributions
01 p0063 A70-10928

Laminar airfoils for Reynolds numbers above 4,000,000, utilizing potential and boundary layer flow theories
01 p0063 A70-10930

Boundary layer and singular inviscid stagnation point reacting flow matching, corrections structure and decay and ranking comparison with second order effects in fluid mechanics
01 p0065 A70-11096

Galerkin method applied to boundary layer flows, considering transport problems in unbounded domains
01 p0066 A70-11129

Modified Granville moment of momentum method used with integral equations in integral moment method for turbulent boundary layer flow, considering pressure gradient influence
02 p0282 A70-12334

Heat transfer, three dimensional boundary layers and high speed flow calculations, utilizing original entrainment equation
02 p0284 A70-12341

Differential strip method developed for turbulent boundary layer equations, describing flow by law of wall coupled to wake solution utilizing constant eddy viscosity
02 p0285 A70-12352

Boundary layer prediction methods criteria, discussing advantages and disadvantages of differential and integral methods for various flows
02 p0286 A70-12356

Waves vs eddies in dynamics of turbulent boundary layer fluctuating motions with scale of mean flow
02 p0287 A70-12361

Graphical display of diverse methods of flow predictions by various authors for turbulent boundary layers
02 p0287 A70-12363

Boundary layer calculation for semiinfinite plane turbulent jet on porous wall
02 p0287 A70-12691

Hypersonic flow characteristics on yawed circular cone surface at moderate angle of attack, applying

results to inviscid and boundary layer flow computations
03 p0406 A70-12944

Book on flow and thermal boundary layers covering laminar and turbulent flow velocity profiles, Prandtl equation, heat transfer problems, etc.
03 p0465 A70-13015

Boundary layer processes under unsteady suction allowing for compressibility, relating suction value to external velocity and wall temperature
03 p0465 A70-13275

Boundary layer transition from laminar to turbulent in hypersonic wind tunnel, determining Reynolds and Mach number effects
[ONERA-TP-737D] 03 p0467 A70-13641

Axisymmetric incompressible fluid flow aerodynamic properties in flat vortex chamber, studying core and boundary layer interactions and velocity fields
03 p0551 A70-13731

Hall current effect on steady boundary layer flow of incompressible viscous electrically conducting fluid past semiinfinite flat plate in transverse magnetic field
03 p0469 A70-14183

Magnetic boundary layer equations applied to flow past stationary circular cylinder and sphere, showing graphical variation of slip velocity with angle
03 p0471 A70-14334

Sonic throat formation from two dimensional viscous flow interaction with supersonic inviscid outer stream, using boundary layer equations
04 p0665 A70-14452

Values measured on sharp flat plate in 10.4 Mach boundary layer induced pressure gradient, discussing effects of wall pressure and temperature gradients
04 p0621 A70-15609

Steady state boundary layer of anisotropic Ericksen fluid incident obliquely on infinite cylinder, obtaining differential equations for dynamic behavior
05 p0835 A70-16860

Incompressible boundary layer flow of conducting fluid on solid two dimensional and axisymmetric bodies under transverse magnetic field approximated by momentum method
06 p1031 A70-17199

Flow disturbance calculation for heat transfer between boundary layer flows and adjacent walls modified to allow for wall attachment of thermal boundary layer
06 p1032 A70-17228

Rotta differential equation for turbulent boundary layer flow with fixed profiles of length scale, shear stress and kinetic energy
06 p1035 A70-17694

Porous matrix flow, surface liquid layer and hot gaseous boundary layer interactions at nose tip of reentry vehicle
[AIAA PAPER 70-152] 06 p1037 A70-18028

Boundary layer-induced pressures on flat plate in unsteady hypersonic flight calculated using tangent wedge approximation
[AIAA PAPER 70-184] 06 p1039 A70-18095

Integral moment method for interactions between laminar boundary layer and external supersonic flow applied to hypersonic laminar boundary layer near sharp expansion corner
[AIAA PAPER 70-186] 06 p1039 A70-18111

Higher order boundary layer effects on zero-lift drag of sphere-cones, investigating transverse curvature, shock vorticity, displacement, slip and temperature jump
[AIAA PAPER 70-185] 06 p1041 A70-18173

Flat plate boundary layer flow of partially ionized gas, measuring charged particle density, electron temperature and plasma potential distributions with Langmuir probe
[AIAA PAPER 70-86] 06 p1041 A70-18174

Asymptotic behavior for small mean free path of rarefied gas steady flow over smooth solid boundary
06 p1048 A70-18328

Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution
07 p1252 A70-18670

Unsteady boundary layer flow with suction, deriving equations for circular cylinder impulsive motion
07 p1253 A70-18862

Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles, momentum and displacement thicknesses
[AIAA PAPER 69-35] 07 p1256 A70-19312

Downstream distribution of trace element injected into boundary layer of flat plate or cone with self similar mass transfer
[SAMSO-TR-69-56] 07 p1256 A70-19313

Unsteady boundary layer in compressible fluid laminar flow over accelerating semiinfinite flat plate
07 p1258 A70-19566

Radiation effect on heat transfer during film boiling in forced convection boundary layer of liquid flow past plate, noting vaporization temperature
07 p1423 A70-19812

German book on fluid dynamics for nonideal fluids covering viscosity effects, Prandtl boundary layer, turbulence and aerodynamics
08 p1431 A70-20751

Heat transfer in axially symmetric laminar viscous boundary layer flow due to rotating bodies of revolution, obtaining temperature distribution
08 p1485 A70-21698

Monograph on hypersonic flow boundary layers research conducted by European countries, determining pressures, velocity and temperature profiles, skin friction, heat transfer, displacements, etc.
[ONERA-TP-770] 08 p1601 A70-21844

Turbulent energy spectra in stably stratified atmospheric boundary layer flow
09 p1715 A70-22360

Flow noise measurement for boundary layer pressure fluctuations at rigid wall, analyzing effect of transducer size, shape and orientation on resolution
09 p1675 A70-22387

Shock layer thickness in supersonic inviscid gas flow past blunt bodies, calculating boundary layer near stagnation point
09 p1603 A70-22442

Second order boundary layer equations for incompressible flow, presenting simplified integral momentum equation for two dimensional and axisymmetric flow
09 p1660 A70-22681

Two dimensional equations of boundary layer with arbitrary pressure gradient solved using successive approximations for numerical integration
09 p1605 A70-23168

Boundary layer equations for multicomponent flow with finite chemical reactions solved by finite difference method
09 p1605 A70-23201

Cross hatching on surface of ablating bodies exposed to supersonic turbulent boundary layer flow using mathematical model
09 p1605 A70-23232

Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method
[ASME PAPER 69-HT-7] 09 p1663 A70-23560

Boundary layer of MGD flow past axisymmetric insulator body analyzed to determine torque due to Hall effect
09 p1663 A70-23579

Laminar boundary layer parameters on porous surface in presence of pressure gradient obtained for inner /wall/ and outer regions
09 p1664 A70-23712

Wake-boundary layer interaction in wind tunnel tandem cascades, discussing end wall suction
09 p1609 A70-23750

Upstream influence distance estimation associated with critical pressure rise in two dimensional shock-boundary layer interactions based on Lighthill subsonic inner boundary layer concept
10 p1862 A70-23840

Boundary layer flow near flat plate trailing edge taking into account pressure gradient induced locally in external flow
10 p1862 A70-23846

Orr-Sommerfeld equation of hydrodynamic stability theory solved for incompressible two dimensional boundary layer flow on basis of reduction to integral equation
10 p1867 A70-24161

Laminar boundary layer flow of incompressible fluid in wake of symmetrical disturbance, deriving higher order approximations and introducing Euler transformation
10 p1802 A70-24420

Unsteady compressible laminar boundary layer flow around flat plate influenced by compressibility as function of Mach number
[ONERA-TP-803] 10 p1869 A70-24543

MHD boundary layer flow equations solution by initial value method to eliminate iteration process
10 p1924 A70-24563

Axisymmetric or two dimensional incompressible laminar boundary layer flow field numerical analysis using quasi-linearization and Chebyshev series
11 p2072 A70-25965

Linear viscous theory of steady rotating fluid flows with nonlinear modification of boundary layers, considering inertial modifications
11 p2036 A70-26011

Three dimensional periodic boundary layer flow noting successive approximations method, noting steady streaming in first order cross flow
11 p2037 A70-26296

Laminar boundary layer flow with exponential velocity distribution in outer flow described by differential equations, studying slip velocity at wall
11 p2037 A70-26350

Incompressible boundary layers velocity distributions on cylinders rotating in axial flow, considering centrifugal force effects, momentum thicknesses, local shearing stress, etc.
11 p2038 A70-26477

Motion and shape of interface at separation of turbulent and nonturbulent regions in boundary layer with zero pressure gradient

11 p2040 A70-26539

Harmonic fields with boundary flow losses, discussing similarity on basis of dimensional analysis and pi theorem

12 p2271 A70-26877

Singularities of boundary layer conditions on parabolic cylinder in homogeneous incompressible viscous flow with leading edge, using Weyl integral equation

12 p2210 A70-27559

Compressible turbulent boundary layers velocity profiles, Coles universal wake function, least squares methods, wake-wall representation, etc.

12 p2157 A70-28080

Incompressible two dimensional and axisymmetric oscillating laminar boundary layer flows approximated by momentum integral equation, discussing flow along flat plate

12 p2158 A70-28205

Flow equations for curvilinear boundary layer based on laminar incompressible boundary layer in streamwise corner

13 p2386 A70-28541

MHD boundary layer flow past yawed flat plate in presence of pressure gradient, determining skin friction expansion terms

13 p2461 A70-28804

Wind tunnel boundary interference on V-STOL model calculated in test section with solid vertical and slotted horizontal walls, using image method and Fourier transforms

[AIAA PAPER 70-575]

13 p2343 A70-29894

Gravity effect on conical vortex separator, predicting body force effect on heavy fluid boundary layer flow for limiting condition determination

13 p2391 A70-29978

Transient free convection flow due to arbitrary motion of vertical plate, linearizing equations of boundary layer flow and heat transfer

13 p2523 A70-30009

Incompressible turbulent fluid flow through ducts and pipes by integral boundary layer techniques, considering entrainment principles

14 p2564 A70-30258

Three dimensional boundary layer along semi-infinite swept stagnation line, assessing counteracting effects of cross flow and mass transfer

14 p2565 A70-30278

Boundary layer flow between nodal and saddle points of attachment, comparing matched series and finite difference methods

14 p2565 A70-30281

Unsteady incompressible laminar boundary layer equations solution after Crocco transformation by implicit finite difference scheme for flow around blunt body

14 p2528 A70-30290

Subsonic boundary lift interference in wind tunnels with perforated walls, using point matching method

14 p2563 A70-30869

Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution

15 p2718 A70-31462

Boundary layer retarded flow past porous surface with suction, using Runge-Kutta computerized integration of Falkner-Scan equation

15 p2720 A70-31586

Viscous incompressible fluid nonstationary flow boundary layer extension around porous plate at Prandtl number equal to unity

15 p2722 A70-32873

Subsonic turbulent boundary layer with mass addition and combustion for combustion effects on velocity profiles in constant pressure and accelerating flows

[AIAA PAPER 70-724]

16 p2997 A70-33498

Outer boundary conditions derivation from asymptotic form of similar boundary layer equations with unit Prandtl number

16 p2894 A70-33874

Equilibrium air boundary layer flows at three dimensional stagnation points, discussing flow characteristics and real gas heat transfer parameters

[AIAA PAPER 70-806]

17 p3005 A70-34455

Steady two dimensional MHD boundary layer flow with uniform suction or injection past semiinfinite flat plate in cross fields

17 p3067 A70-34618

Heat and mass transfer in flowing fluid, deriving conservation and constitutive equations, with application to boundary layer flow of gases

17 p3069 A70-35033

Hypersonic flow past slender bodies, discussing inviscid flows, outer edge singularity of boundary layer and three dimensional interaction on needle-like bodies

17 p3010 A70-35035

Laminar free convection boundary layer on vertical heated plate near discontinuity in plate temperature, discussing velocity field

17 p3198 A70-35593

Incompressible laminar boundary layer equations approximate solution by Galerkin-Kantorovich technique

18 p3238 A70-35972

Laminar flows with surface injection, calculating thermal boundary layer-porous wall coupling effects

[ASME PAPER 70-GT-1]

18 p3243 A70-36860

Boundary layer momentum thickness growth in channels with adverse pressure gradients by stepwise integration of Truckenbrodt equation and extending Gruschwitz-Schmidbauer separation criterion

[ASME PAPER 70-GT-12]

18 p3243 A70-36864

Three dimensional boundary layer flow on rotating axial flow turbine buckets, determining velocity profiles

[ASME PAPER 70-GT-59]

18 p3243 A70-36874

Boundary layer optimization for high turning axial flow compressor blades, using flow theory and conformal mapping

[ASME PAPER 70-GT-88]

18 p3209 A70-36879

Canonical coordinates for numerical computation of free surface flows, considering steady motion and elliptic partial differential equations

19 p3457 A70-37679

Boundary layer equations for two dimensional flow of incompressible constant density micropolar fluid past plane wall, noting skin friction

19 p3404 A70-37962

Velocity distribution and shear stress measurements in three dimensional turbulent boundary layer approaching separation

19 p3405 A70-38021

Multicomponent chemically unstable nonequilibrium gas flow past body, taking into account boundary layer behavior

19 p3373 A70-38182

High temperature gas boundary layer flows with or without magnetic fields, discussing measurement by X ray absorption technique

19 p3405 A70-38192

Two dimensional equations of boundary layer with arbitrary pressure gradient solved using successive approximations for numerical integration

19 p3406 A70-38390

Boundary layer oscillatory flow interaction with nonuniformly rotating lamina, calculating velocity distribution and transitional frequencies

19 p3406 A70-38443

NonNewtonian boundary layer flow having arbitrary potential velocities from methods for Newtonian fluids

19 p3407 A70-38932

Radiation effect on heat transfer during film boiling in forced convection boundary layer of liquid flow past plate, noting vaporization temperature

20 p3736 A70-39259

Spectral lines self rotation effects on plasma temperature and density measurement in MHD duct boundary layer

20 p3678 A70-39632

Combustion driven Hall configuration MHD generator, discussing boundary layer analysis, gas density nonuniformity and electrode drop

20 p3566 A70-40003

Simulated neutral atmospheric boundary layer measurements in wind tunnel, extending power spectral and correlation determinations

20 p3613 A70-40139

Flat plate boundary layer flow with surface blowing and suction / mass transfer, investigating stability by numerical techniques

20 p3615 A70-40507

Nonstationary compressible laminar boundary layer similar solutions by parameter-invariant method, obtaining velocity and temperature profiles by partial differential equations numerical integration

21 p3806 A70-40555

Asymptotic behavior of boundary layer equations solution for viscous incompressible flow past curvilinear obstacle

21 p3806 A70-40613

Flat plate compressible laminar boundary layer flow with variable fluid properties, using series solution by splitting up flow variables into sets of universal functions

21 p3806 A70-40825

Subcritical viscous flow around arbitrary airfoils, calculating boundary layer effect on pressure distribution from inviscid flow approximation

21 p3744 A70-40924

Accelerated self similar compressible laminar boundary layer flows with and without mass transfer, obtaining numerical solutions

21 p3807 A70-41031

Two dimensional body slow motion through stratified fluid bounded by parallel vertical walls, examining flow at different Peclet numbers

21 p3744 A70-41246

Self similar flow instability behind collapsing cavity boundary, examining perfect gas adiabatic equation of state

21 p3808 A70-41500

Rarefied gas flow over plane wall, considering boundary layer thickness of order of mean free path

21 p3809 A70-41715

BOUNDARY LAYER SEPARATION

Upstream mass injection effects on downstream heat transfer of supersonic reacting boundary layer

21 p3952 A70-42079

Incompressible laminar boundary layers thermal response behavior in wedge flow, obtaining surface response, temperature fields, heat flux and steady state data

21 p3811 A70-42164

Three dimensional laminar boundary layer equations for film condensation on curved surface in quiescent vapor, investigating flow at stagnation point

21 p3954 A70-42168

Heat and mass transfer in plane inductionless and dissipationless incompressible MHD boundary layer with longitudinal pressure gradient

21 p3861 A70-42231

Flow past streamlined obstacles under nonNewtonian fluid injection into hydrodynamic laminar and turbulent boundary layer

21 p3812 A70-42266

Elastic plate response to boundary layer pressure fluctuations, estimating vibration modes dependence on fluctuation convection velocity and response magnification as function of flow direction

22 p4007 A70-42283

Viscous flow field in pneumatic vortex rate sensor, discussing boundary layer parameters, velocity profiles and swirling flow theory

[ASME PAPER 70-FLCS-16]

22 p4007 A70-42411

Existence theorem for boundary layer problems, including swirling flow between coaxial rotating disks

22 p4009 A70-42484

Unsteady hydromagnetic boundary layer flow past semiinfinite flat plate under steady magnetic field and small free stream perturbation

22 p4080 A70-42631

Liquid droplet breakup by aerodynamic forces, obtaining solutions for fluid flow inside droplet and in coupled liquid-gaseous boundary layer

22 p4012 A70-43741

Tollmein-Schlichting waves in flat plate Blasius boundary layer, comparing experimental and theoretical critical Reynolds number

23 p4179 A70-43975

Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions

23 p4182 A70-44565

Turbulent boundary layer velocity profiles and shear stress distributions computation based on mixing length approach

23 p4182 A70-44574

Highly accelerated boundary layer turbulence structure, measuring intermittency factor distribution with hot-wire probe

23 p4182 A70-44587

Channel vs deflection flow in boundary layer theory, considering Navier-Stokes equations

23 p4183 A70-44736

Friction-originated ageostrophic mass flux in ground friction layer at nonaccelerated geostrophic boundary layer flow

24 p4370 A70-45133

NonNewtonian fluids injection into boundary layer, comparing flow and pressure effects with water injection

24 p4324 A70-45364

Boundary layer instantaneous velocity distributions theoretical and experimental determination

24 p4288 A70-45583

Two dimensional boundary layer growth with suction for oscillating circular cylinder, considering stream functions and phase angles

24 p4326 A70-46002

BOUNDARY LAYER NOISE

U AERODYNAMIC NOISE

U BOUNDARY LAYERS

BOUNDARY LAYER SEPARATION

MHD boundary layers in transverse magnetic field with low Reynolds number, investigating suppression of separation with emphasis on behavior near rear stagnation point

01 p0152 A70-11095

Incompressible turbulent boundary layer and separation flow into forward facing normal step, considering step heights and boundary layer thickness

01 p0066 A70-11133

Prediction criteria regarding turbulent separation in fluid mechanical devices and systems, emphasizing vanishing wall shear stress

02 p0286 A70-12358

Pulsation frequency affecting boundary layer separation from channel wall in incompressible fluid flow calculated by equation

03 p0466 A70-13399

Boundary layer separation in divergent portion of conical ducts in overrelaxed supersonic regime in air and water, showing influence of medium, pressure and thrust

03 p0467 A70-13682

MHD boundary layer separation near rear stagnation point with magnetic field normal to wall solved by

series expansion, calculating skin friction by numerical quadratures

03 p0469 A70-14182

Similarity properties of laminar or turbulent boundary layer separation in uniform supersonic flow, discussing wall cooling, pressure evolution, etc.

03 p0469 A70-14234

Laminar compressible wake behind thin flat plate at zero angle of attack, solving boundary layer equations in von Mises coordinate plane

[ASME PAPER 69-WA/FE-6] 04 p0614 A70-14783

Laminar flow separation, reattachment and transition over downstream step, including visual observations of smoke filaments, velocity fluctuation measurements and velocity profiles

[ASME PAPER 69-WA/FE-5] 04 p0667 A70-14784

Plume-induced flow separation effect on thermal environment using Saturn 5 film and instrument data, attributing heating rate increase to recirculated exhaust gases

[ASME PAPER 69-WA/HT-18] 04 p0761 A70-14815

Stationary and vibrating circular cylinders for boundary layer separation point, determining vortex excited oscillation range

04 p0670 A70-14988

Incompressible laminar Falkner-Skan boundary layer suffering sudden acceleration by moving belt, noting boundary layer separation

[AIAA PAPER 69-40] 04 p0674 A70-15534

Tail screens and spoiler rings aerodynamic braking effect in hypersonic range, discussing separated boundary layer periodic unsteady flow

06 p0965 A70-17247

Rotation and forward flight effects on separation line of laminar incompressible boundary layer along helicopter blade of airfoil shape

[AIAA PAPER 70-49] 06 p0973 A70-18151

Supersonic flow separation over rearward facing step, measuring upstream boundary layer, lip shock and shear layer formation by pitot probe and surface pressure survey

[AIAA PAPER 70-106] 06 p0973 A70-18153

Laminar boundary layer development on cylindrical body set in motion from state of rest, determining time for boundary layer separation occurrence

07 p1253 A70-18771

Supersonic oblique shock wave reflection on turbulent boundary layer, considering layer separation and pressure effects

07 p1255 A70-19210

Air flow disturbances over mountains in terms of turbulent boundary layer separation dissolution

07 p1330 A70-19800

Laminar separation bubble in incompressible flow produced on flat plate by pressure gradients, correlating bursting with Reynolds number and pressure distribution

09 p1660 A70-22770

Laminar boundary layer separation noting effect of mass slot suction

09 p1662 A70-23236

MHD boundary layer on rotating body in viscous incompressible conducting fluid, studying magnetic field effects on time-to-separation

10 p1924 A70-24572

Heat transfer influence on three dimensional boundary layer separation on walled ellipsoid of revolution

10 p1870 A70-24781

Three dimensional incompressible turbulent boundary layer detachment on rotating blading of axial impellers

11 p1975 A70-25793

Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point

12 p2209 A70-27289

Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer

12 p2278 A70-27324

Similar laminar boundary layer solutions exhibiting separation, pressure gradient and mass transfer

12 p2211 A70-27828

Boundary layer equations with pressure gradient for revolving slender body, examining transverse curvature influence on layer separation and integral characteristics

12 p2214 A70-28249

Transonic scaling effects for shock boundary layer interaction on circular and two dimensional airfoil models, discussing separation and reattachment

[AIAA PAPER 70-541] 13 p2339 A70-29008

Backward facing separated step boundary layer flow at Mach 2.25 investigated by diffraction grating interferometer and color schlieren technique

[AIAA PAPER 70-571] 13 p2343 A70-29898

Thermal boundary layer separation in conducting fluids by rotating magnetized blunt body

13 p2469 A70-30008

Magnetoaerodynamic boundary layer of incompressible conducting fluid over right circular cylinder under magnetic field, showing flow separation

14 p2621 A70-30550

Prandtl number effects on adiabatic wall temperature and pressure gradient at separation point for hypersonic compressible laminar boundary layer

14 p2566 A70-31027

Three dimensional boundary layer separation, noting necessity of streamlines perpendicular to pressure gradients near wall

15 p2719 A70-31488

Upper troposphere pressure variations through 20 km separation layer, noting interdiurnal temperature changes

15 p2772 A70-32458

Boundary layer to wake bleed venting for flare-induced separation prevention in hypersonic flow over blunt bodies

16 p2838 A70-33884

Hypersonic cruise vehicles viscous interactions areas, examining compression corners, shock interactions, laminar and turbulent flow, boundary layer separation, etc

[AIAA PAPER 70-781] 17 p3007 A70-34475

Analytical model for jet interaction induced separation of supersonic turbulent boundary layers, conducting flat plate tests at Mach 4

[AIAA PAPER 70-765] 17 p3007 A70-34486

Transitional flow separation upstream of compression corner at trailing edge of sharp leading edge flat plate

[AIAA PAPER 70-764] 17 p3007 A70-34487

High lift airfoils boundary layer separation suppression by blowing, describing wall jets streamwise development prediction methods

[AIAA PAPER 70-872] 17 p3010 A70-34818

Skin friction variation and boundary layer separation for rotating axisymmetric body, using two layer model

17 p3011 A70-35240

Airfoil trailing edge stall in laminar flow, investigating circulation around flat plate

18 p3205 A70-36194

Plane stationary supersonic flows with laminar separation zones at large subcritical Reynolds numbers

18 p3206 A70-36257

Subsonic and supersonic laminar boundary layers separation near sharp corners, considering curvature and Reynolds number effects

18 p3208 A70-36486

Stratford prediction method of separation position for compressible boundary layer flow

19 p3406 A70-38617

Three dimensional boundary layer on lee- and wind-side of protable spheroid, emphasizing separation and embedded streamwise vortices

20 p3608 A70-39359

Boundary layer separation in MHD generators, discussing differences between insulating and electrode wall boundary layers

20 p3680 A70-39985

Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point

20 p3613 A70-40339

Loads induced by terminal shock boundary layer interaction on cone-cylinder bodies, discussing angle of attack effect

21 p3746 A70-41863

Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer

21 p3860 A70-42065

Upstream disturbances propagation during hypersonic flow boundary layer interaction

21 p3748 A70-42205

Three dimensional laminar and turbulent boundary layers separation criteria

21 p3811 A70-42206

Two dimensional incompressible flow, calculating strong surface effects on laminar boundary layer separation by linear model

22 p4010 A70-42630

Perfect gas three dimensional boundary layer separation on circular cone at incidence, comparing numerical calculation and experimental results

23 p4133 A70-44207

Vane type vortex generators to prevent turbulent compressible boundary layer separation, measuring drag in supersonic flow

23 p4133 A70-44527

Three dimensional laminar boundary layer separation at infinite swept stagnation line with high mass injection rates

23 p4182 A70-44568

Unsteady separation criteria for three dimensional laminar boundary layer on finite obstacle

24 p4327 A70-46268

BOUNDARY LAYER STABILITY

Flow visualization of boundary layer transition downstream of Gortler vortices, distinguishing successive instability modes by Te method

01 p0065 A70-11094

Turbulence constant for flows near walls, analyzing viscosity dependence on wall distance by utilizing maximum stability principle

01 p0069 A70-11627

Laminar boundary layer in incompressible liquid, noting effect of variation of kinematic viscosity and density on stability

03 p0468 A70-13870

Vortices orientation due to unstable Ekman boundary layer, discussing analogy to Taylor-Görtler and thermoconvective vortices

06 p1096 A70-17465

Laminar natural convection boundary layer stability over vertical uniform flux surface, measuring disturbance temperature and velocity distributions

06 p1035 A70-17686

Unsteady laminar boundary layers calculation for arbitrary velocity distributions at inner boundary in presence of suction/blowing through porous surface

07 p1254 A70-19080

Solar system origin theory emphasizing brother star approaching nebula for instability of boundary layer

08 p1568 A70-20638

Incompressible laminar boundary layer stability of incompressible fluid for nonparallel oncoming flow, deriving perturbed motion equation

08 p1483 A70-21179

Acoustic pressure sensors positioning on bodies of revolution to determine laminar boundary layer stability loss during ideal liquid flow at nonzero angles of attack

09 p1660 A70-22479

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow

[AIAA PAPER 69-10] 09 p1662 A70-23219

Vorticity distribution influence on inviscid laminar jet boundary layer instability investigated for large Reynolds numbers, using shear flow and linearized theory

[DFVLR-SONDDR-14] 10 p1868 A70-24163

Monograph on stability of laminar boundary layer separation at free jets and turbulent free jet flames, considering effects of velocity gradients and temperature

11 p2146 A70-25499

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration

[AIAA PAPER 69-56] 11 p1235 A70-25962

Planview shadowgraph method for observing disturbances generated by spark discharges into laminar boundary layer

13 p2385 A70-29982

Turbulent boundary layer instability on rotating cylinder in axial stream, correlating mixing length to Richardson number

15 p2722 A70-32372

Magnetic field effect on hydromagnetic Görtler instability in boundary layer flow of conducting fluid over concave wall

19 p3481 A70-38352

Multilayered and multiple supersonic jets, deriving dispersion equations for boundaries stability

19 p3354 A70-38663

Turbine blade profiles calculation by hodographs, obtaining compatibility with continuous flow velocity distribution and improved boundary layer stability

19 p3491 A70-38949

Natural convection boundary layer stability on isothermal flat vertical wall or subjected to linear temperature distribution

21 p3950 A70-41443

Combined effects of flow unsteadiness and surface mass transfer on displacement thickness of boundary layer, using flat plate geometry

21 p3811 A70-42092

Neutral stability curve for flat plate boundary layer in zero pressure gradient with increasing thickness, giving critical Reynolds number

23 p4179 A70-43974

BOUNDARY LAYER TRANSITION

Görtler vortices effect on boundary layer transition on concave surface, discussing instability oscillations breakdown leading to turbulent motion

01 p0061 A70-10539

Flow visualization of boundary layer transition downstream of Görtler vortices, distinguishing successive instability modes by Te method

01 p0065 A70-11094

Ablation effects on transition Reynolds number of hypersonic boundary layer on slender cones

03 p0465 A70-12945

Boundary layer transition from laminar to turbulent in hypersonic wind tunnel, determining Reynolds and Mach number effects

[ONERA-TP-737D] 03 p0467 A70-13641

Boundary layer transition limits at high Mach numbers, discussing transition on flat plate and bodies of rotation and Reynolds number

04 p0672 A70-15177

Spin-up of electrically conducting fluid between infinite flat plates under axial magnetic field, considering Ekman-Hartmann boundary layer on single plate

05 p0832 A70-16017

Dynamic stability loss on ablating vehicles ascribed to boundary layer transition effect from turbulent at body heating
[AIAA PAPER 69-106] 06 p0961 A70-17166

Vortices orientation due to unstable Ekman boundary layer, discussing analogy to Taylor-Goertler and thermoconvective vortices
06 p1096 A70-17465

Laminar boundary layer critical height determination using Rouse stability parameter
07 p1257 A70-19336

Laminar to turbulent boundary layer transition and separation on circular cylinder measured by heated end-window film sensor applicable to water flow
07 p1259 A70-19831

Boundary layer research during past decade covering crosshatching during reentry, transition, drag reduction by LFC or compliant surfaces
08 p1483 A70-21040

Laminarization parameter magnitude determination for turbulent boundary layer in convergent channel flow
08 p1484 A70-21518

Plasma sheath in quadrupole and hexapole geometries, investigating magnetic field variation, particle density and electrostatic potential in transition layer
08 p1552 A70-21530

Boundary layer development on body accelerating in viscous incompressible fluid, using straight lines approximation and asymptotic expansions
08 p1485 A70-21631

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow
[AIAA PAPER 69-10] 09 p1662 A70-23219

Boundary layer transition measurements on flight tests of experimental 22 degree conical reentry vehicle with Be heat shield and graphite nose
[AIAA PAPER 68-1152] 09 p1606 A70-23243

Laminar-turbulent boundary layer transition in incompressible fluid under surface roughness action, developing theory by generalizing Taylor hypothesis
09 p1664 A70-23713

Two dimensional MHD flow past solid body at large Reynolds numbers, treating boundary layer transition
10 p1922 A70-24011

Transition regime of rarefied gas dynamics using kinetic theory of gases, discussing Couette and Poiseuille flow, heat transfer and time dependent problems
10 p1919 A70-24141

Boundary layer transition detection at supersonic speeds using thin film gages to infer local laminar and turbulent supersonic skin friction
11 p2035 A70-25970

Uncooled leading edge effect on cooled-wall hypersonic flat plate boundary layer transition, discussing leading edge bluntness effects
11 p1976 A70-25984

Boundary layer transition at high Mach numbers on adiabatic wall, showing effects of wind tunnel size, surface roughness and freestream disturbances
[AIAA PAPER 70-586] 13 p2342 A70-29884

Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests
[AIAA PAPER 69-12] 13 p2343 A70-29953

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection
[AIAA PAPER 69-706] 13 p2343 A70-29954

Supersonic skin friction measurements in grit type boundary layer transition trips with zero heat transfer
13 p2343 A70-29969

Discrete sonic jets as boundary layer trips producing turbulent hypersonic flows with negligible intrinsic drag and downstream distortions
13 p2523 A70-29973

Axisymmetric compressible boundary layer on body of revolution transformed into two dimensional turbulent boundary layer
13 p2391 A70-29995

Unstable Ekman boundary layer vortex structure analysis by generating similar flow in liquid filled rotating cylinder
14 p2604 A70-30545

Heat transfer from acceleration induced boundary layer reverse transition, considering free stream turbulence effects
14 p2667 A70-31169

Laminar boundary layer transition on sharp cone at zero yaw in supersonic wind tunnels, correlating aerodynamic noise disturbances with transition Reynolds numbers
[AIAA PAPER 70-799] 17 p3006 A70-34462

Acoustic measurement of surface pressure fluctuations in supersonic transitional boundary layers
17 p3092 A70-35482

Asymmetric boundary layer transition effects on slender reentry vehicle motion by changing static stability characteristics
[AIAA PAPER 70-987] 20 p3557 A70-39542

Boundary layer transition application to space shuttle design, relating aerodynamic noise to turbulent boundary layers
21 p3744 A70-41015

Vapor volume entrained in liquid bulk from boundary layer boiling on vertical plate in low gravity field
21 p3947 A70-41055

Boundary layer transition region of flat plate in incompressible flow by subsonic wind tunnel tests, demonstrating harmonic wall perturbation effect
21 p3808 A70-41440

Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows
[AIAA PAPER 69-704] 21 p3809 A70-41744

Transitional flow separation upstream of compression corner for two dimensional model relationship to attached flow and boundary layer transition on plate
21 p3746 A70-41864

Numerical integration of Orr-Sommerfeld equation for flat plate Blasius boundary layer transition
23 p4179 A70-43973

Laminar to turbulent boundary layer flow transition over flat plate, using space amplified numerical solutions of Orr-Sommerfeld equation
23 p4181 A70-44234

Wind tunnel testing at transonic speeds, discussing boundary layer transition and dynamic sting interference
23 p4134 A70-44581

Heat exchange on turbine blade profiles, examining boundary layer flow transition region coordinates
23 p4283 A70-44732

Aerodynamic drag and local convective heat transfer on smooth plate for various flow velocities, determining effects of turbulator in boundary layer transition region
23 p4283 A70-44733

Boundary layer transition under small tridimensional perturbations interacting with excitations from wall
24 p4327 A70-46206

BOUNDARY LAYERS

NT COMPRESSIBLE BOUNDARY LAYER

NT HYPERSONIC BOUNDARY LAYER

NT LAMINAR BOUNDARY LAYER

NT SUPersonic BOUNDARY LAYERS

NT THERMAL BOUNDARY LAYER

NT THREE DIMENSIONAL BOUNDARY LAYER

NT TURBULENT BOUNDARY LAYER

Diffusion flame structure in boundary layer with fuel injection from wall, analyzing expansions with single step reversible chemical kinetics, including nonequilibrium case
01 p0214 A70-10334

Turbulent viscosity and thermal conductivity coefficients for entire cross section of fluid flow including wall boundary layers
01 p0069 A70-11624

Aerosol induced light scattering optical properties in atmospheric boundary layer measured with three photometer setup with He-Ne laser
02 p0328 A70-12437

Boundary layer equations describing flow field in turbulent swirling jet diffusion flame solved in von Mises plane
03 p0603 A70-12911

Pitot boundary layer probes with position indicators using extensometric gages for boundary layers on wind tunnel test models
[ONERA-TP-754] 03 p0487 A70-13628

Time of establishment of steady state mixing in plane and axisymmetrical jets determined, using self similar motions in unsteady state boundary layer and free turbulence
03 p0409 A70-13875

Boundary layer equations of motion linearized with self similar profiles
04 p0665 A70-14482

Reflected shock wave velocity, boundary layer disturbance and wall ionization measurements using thin film resistance thermometers
04 p0666 A70-14537

Boundary layer momentum integral equations to predict shear layer behavior, developing method to avoid nonphysical constraint appearance
[ASME PAPER 69-WA/APM-11] 04 p0669 A70-14916

Charge separation effects in boundary layer between cold streaming plasma and perpendicular magnetic field with relativistic electrons
04 p0727 A70-14997

Boundary layer equations closed form similarity solutions for laminar jet of compressible pseudoplastic fluid, discussing velocity transverse behavior
04 p0671 A70-15053

Equilibrium shapes of rotating weightless fluid with surface tension in absence of external force field obtained by boundary layer theory
04 p0673 A70-15241

Mass transfer and viscous interaction combined effects on axisymmetric hypersonic flow of perfect gas over slender bodies
[AIAA PAPER 68-717] 04 p0675 A70-15576

Nozzle boundary layer displacement thickness at Mach 30-70 in helium using Langley hotshot tunnel tests
04 p0675 A70-15603

Optimized compressor blades, examining Le Foll boundary layers theory possibilities as design method
04 p0621 A70-15667

UV radiation propagation in atmospheric boundary layer, analyzing solar UV background and UV signal attenuation along horizontal path
05 p0882 A70-16241

Engineering methods developed for controlling boundary layer, jet and compressor noise, discussing theoretical formulations usefulness
05 p0896 A70-16778

Self similar problems of anisotropic fluid boundary layer involving infinite disk rotation and fluid flow near stagnation point
05 p0835 A70-16857

Boundary layer on sharp flat plate in low density flow computed by continuum approach, obtaining parabolic partial differential equation system
[DVL-914] 06 p1034 A70-17250

Turbulence characteristic scale for atmospheric boundary layer, using wind profile data
06 p1096 A70-17466

Electron distribution functions in weakly ionized plasmas by asymptotic analysis of boundary layer near wall
06 p1121 A70-17903

Ignition and extinction of diffusion flames predicted from studying forced convection in boundary layers
[WSCI PAPER 69-36] 06 p1178 A70-17976

Supersonic exhaust plume/boundary layer interactions, developing integral method and extending to turbulent interactions
[AIAA PAPER 70-230] 06 p1040 A70-18117

Surface shielding from reentry radiation by injecting metal vapors into oxygen bearing boundary layer, calculating particle size distributions, optical depths and attenuation factors
[AIAA PAPER 70-156] 06 p1041 A70-18163

Planetary boundary layer thickness estimation, considering geostrophic wind speed and potential temperature average vertical gradient
07 p1377 A70-18922

Boundary layers calculation for nonporous surface extended to porous with suction by replacing velocity distribution with longitudinal pressure gradient
07 p1254 A70-19083

Electrical effects of boundary layers on insulator wall of MHD generator, considering equilibrium and nonequilibrium ionization generators performance
07 p1196 A70-19321

Ablation products and high temperature boundary layer chemistry of polytetrafluoroethylene (Teflon) in arc jet streams using mass spectrometer
07 p1319 A70-19886

Two dimensional flow field behind shock wave resulting from boundary layer growth in driven gas of shock tube
07 p1260 A70-19983

Reflected molecular beam intensity distribution interpreted in terms of disturbances in boundary layer between gas and solid
07 p1343 A70-20122

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory
08 p1585 A70-20955

Boundary layer research during past decade covering crosshatching during reentry, transition, drag reduction by LFC or compliant surfaces
08 p1483 A70-21040

Perfect fluid sonic flows around weakly lifting three dimensional bodies downstream of shock wave, proving existence of lifting boundary layer
08 p1433 A70-21238

Two dimensional natural convection boundary layer on finite isothermal horizontal plate, examining upward facing cold plate and downward facing hot plate
08 p1598 A70-21580

Atmospheric boundary layer wind and temperature analysis according to similarity scheme for mathematical modeling of atmosphere
08 p1540 A70-21974

Turbulent heat transfer in boundary layer at inlet of porous tube under nonisothermal conditions, studying velocity variations
09 p1787 A70-22169

Solar chromosphere-corona transition region properties, discussing temperature increase within very thin layer and inferring temperature-density structure from emission line intensities
09 p1752 A70-22246

Laminar-turbulent regions boundary, discussing convective layer form and FM-CW microwave and acoustic radar measurement techniques
09 p1717 A70-22378

Potential flow and boundary layer theory application as design tools in aerodynamics, basing calculations on digital computer methods
09 p1605 A70-22947

Doppler-effect-like phenomena of waves or pulses reflected and refracted at moving boundary layers
09 p1728 A70-23072

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counterrotating longitudinal vortices in boundary layer

[ALAA PAPER 69-11] 09 p1662 A70-23223

Taylor-Goertler vortex formation effect on heat transfer through boundary layer on concave wall

[ASME PAPER 69-HT-3] 09 p1790 A70-23556

Turbulent flow criterion for negligible initial boundary layer case, introducing corrections regarding Korf criterion as function of geometric and aerodynamic flow

10 p1799 A70-24128

Gas viscosity high temperature measurement method in shock tube using boundary layer equations for velocity and static temperature distributions

10 p1867 A70-24151

Carbon oxyfluoride IR radiation from boundary layer formed by arc-heated air passing over Teflon surface

10 p1968 A70-24475

Annulus wall boundary layer effect on spatial flow in subsonic axial compressors by shearing stresses concept between stream surfaces

11 p1974 A70-25777

Seeded dense plasma-electrode system behavior, studying effect of adsorption and emission from boundary surfaces

11 p2090 A70-25952

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface

[ALAA PAPER 69-724] 11 p2035 A70-25977

Pressure gradient, wind structure and shearing stress in atmospheric boundary layer related by formulation based on quasi-parallelism and boundary condition at Ekman layer top

11 p2076 A70-26071

Uniform asymptotic theory of diffraction by edge of three dimensional body, obtained boundary layer solution applied to scattering by circular cylinder

11 p2084 A70-26422

Variational analysis of fluid flow in hydrodynamic, thermal and diffusional boundary layers including viscous effects, heat and mass transfer and chemical reactions

11 p2041 A70-26652

Pressure fluctuations in acoustic field of boundary layer under slot suction, considering vortex formation and separation on edges

12 p2209 A70-27298

Book on aerodynamics covering flow theory, boundary layers, shock waves, wing design, etc

12 p2157 A70-28148

Chemically reacting stagnation point boundary layers with wall injection of gas, comparing multicomponent solution with binary approximation and chemical simplifications

14 p2565 A70-30265

Radiative heat transfer in optically thick gas between concentric spheres treated by matched asymptotic expansions, comparing results with Rosseland approximation and numerical solution

14 p2663 A70-30266

Variangular wind spirals for vertical wind and shear profile estimation in atmospheric boundary layer

14 p2602 A70-30370

Barotropy, baroclinicity and baroclinity induced variations of geostrophic wind vector with altitude within planetary boundary layer

14 p2604 A70-30546

Velocity and pressure distributions of tornado-like two cell vortices within boundary layer, using different assumptions for eddy diffusion coefficient

14 p2604 A70-30547

Orr-Sommerfeld equation asymptotic solution corresponding to boundary layer velocity distribution

15 p2721 A70-32357

Unequal diffusion film coefficient formulation based on transfer coefficient approach for ablative material coupled multicomponent boundary layer problems

16 p2998 A70-33879

Mechanical erosion concomitant with thermochemical erosion in mass and energy transfer at interface of boundary layer and ablating nylon-silica-phenol material

[ALAA PAPER 70-824] 16 p2941 A70-33942

MHD flow velocity and magnetic flux profiles in rectangular ducts for secondary boundary layer

16 p2959 A70-34239

Boundary layer formation on walls of conical pressure nozzle during vortex flow

16 p2896 A70-34299

Atmospheric contaminants dispersion simulation in meteorological wind tunnel with capability to simulate thermally stratified boundary layers

17 p3065 A70-34496

Boundary layer theory development in U.S.S.R., surveying findings and papers

17 p3067 A70-34662

Atmospheric boundary layer model, considering air-surface interaction, heat and humidity exchange, wind, temperature and humidity profiles, etc

17 p3132 A70-34667

Current sheet structure of hydromagnetic boundary layer formed by mixing two conducting fluid streams containing oppositely directed magnetic fields

17 p3140 A70-34930

Pressure distribution measurements on wedges in compressible flow at Mach 0.5-2.2, discussing wedge angle, Mach number and boundary layer thickness effects

17 p3013 A70-35923

Horizontal boundary layers development on flat plate in nondiffusive stratified flow characterized by Reynolds and Russell numbers

18 p3239 A70-36192

Density diffusion and buoyancy effects on horizontal boundary layers in stratified flow

18 p3239 A70-36193

Soviet book on passenger aircraft aerodynamics covering motions of gases and immersed bodies, similarity laws, boundary layer theory, finite span wing, etc

18 p3208 A70-36507

Unsteady light field spatial moments in turbid medium boundary layer with intense anisotropic scattering during illumination by narrow beam

18 p3285 A70-36631

Subcritical and supercritical boundary layer problems, reviewing various momentum integral solution methods

18 p3242 A70-36705

Annulus wall boundary layers in axial flow turbomachines, taking into account boundary layer growth and associated secondary flows

[ASME PAPER 70-GT-92] 18 p3209 A70-36877

End wall boundary layers effect included in performance prediction method for multistage axial compressors

[ASME PAPER 70-GT-80] 18 p3210 A70-36884

Steady state nonlinear dynamics of low latitude atmospheric global boundary layer, indicating inverse relation between air flow vertical velocity and distance from equator

19 p3460 A70-37417

Supersonic turbine blade rows design, discussing boundary layer interaction around leading edges and flow around trailing edges

19 p3490 A70-38223

Elastic boundary layers analysis based on strain gradient theory of linear elasticity

19 p3544 A70-38331

Meteorological observation on atmospheric boundary layer during winter, determining width and inclination of frontal zones

19 p3463 A70-38758

Flame stabilization in boundary layer during mixing of cold homogeneous fuel mixture and hot gas based on combustion and turbulent jets theories

20 p3736 A70-39267

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory

20 p3719 A70-39378

Parametric boundary layer theory numerical solution in two parameter approximation, solving partial differential equation by finite difference method

20 p3611 A70-39807

Local variables in boundary layer of high temperature ionized gas flowing in magnetic field, using X ray absorption

20 p3613 A70-40344

Electron temperature measurements in flowing high density plasma by cooled Langmuir probe, considering probe temperature variations effects in boundary layer

21 p3854 A70-40557

Secondary flow model for planetary boundary layer, considering flow as finite perturbation

21 p3813 A70-40904

Boundary layer problems with resonance solved by matched asymptotic expansions and WKBJ method

23 p4179 A70-43945

Laser light pulse reflection by atmospheric boundary layer calculated on computer by Monte Carlo method, comparing results with full scale measurement

23 p4166 A70-45072

Porous tube inlet region, calculating fluid injection effect on laminar flow from integral form boundary layer equations

24 p4326 A70-45782

Cold boundary layer effect on chemical kinetic parameters behind reflected shocks in single-pulse shock tube

24 p4323 A70-46044

BOUNDARY LUBRICATION

Finite element solution of incompressible lubrication problem by minimum principle for transient incompressible Reynolds equation with boundary conditions

[ASME PAPER 69-LUB-A] 01 p0100 A70-10378

Film properties of organic liquids squeezed between two solid flats using order liquid model, discussing applications to boundary layer lubrication

08 p1508 A70-21601

Hydrodynamic lubrication film breakdown in cold strip rolling, showing thickness consistency with critical value of modified Sommerfeld number

21 p3833 A70-41256

BOUNDARY VALUE PROBLEMS

NT NEUMANN PROBLEM

General boundary value problem solutions for degenerate second order elliptic equations

01 p0130 A70-10128

Energy inequality solutions properties pertaining to mixed boundary value problem of partial differential equations, using Fourier method

01 p0130 A70-10154

Fourier transform applied to Riemann boundary value solution to biharmonic equation governing elastic theory for half plane with circular protrusion or indentation

01 p0199 A70-10155

Finite difference scheme for linear second order third boundary value problem in ordinary differential equations

01 p0131 A70-10455

Self excited oscillators zero crossing times distribution for Markov process formulated as boundary value problem involving Kolmogoroff backward equation

01 p0143 A70-10891

Functional optimization within partial differential equation solutions class by choosing optimum boundary values

01 p0131 A70-10922

Steady burning process equations numerical solution for boundary conditions prescribed at saddle point singularity

01 p0218 A70-11019

Boundary value problems of elasticity theory in space perforated by cylindrical cavities with parallel axes solved by infinite algebraic equations

01 p0202 A70-11033

Collection of papers on boundary value problems of mathematical physics and related aspects of function theory, Part I

01 p0131 A70-11066

Navier-Stokes equation generalized solutions to initial boundary value problems, considering uniqueness theorem and smoothness

01 p0132 A70-11068

Sound generation by multiblaaded single stage fans operating in free field, deriving model as boundary value problem involving inhomogeneities due to quadrupole distribution

01 p0166 A70-11197

Runge-Kutta method with position dependent optimal parameter alpha for initial value problem solution to minimize total error

01 p0134 A70-11364

Boundary conditions at reinforced edge of shell by separating solution into zero moment stress and edge effect solutions

01 p0209 A70-11407

Nonlinear boundary value problem algorithm in shell theory

01 p0212 A70-11566

Boundary value problem for quasi-linear equation of unsteady transonic gas flow, including linear model and operators for group of transformations

01 p0069 A70-11628

Electrical domain instability in homogeneous hot electron semiconductors, discussing boundary conditions application to fluctuations

02 p0350 A70-11697

Parametric approximation method extended to incompressible laminar boundary layers with surface suction or injection

02 p0277 A70-11857

Integral equation of first kind solution based on two dimensional boundary value problem solution

02 p0323 A70-11994

Three dimensional linear combustion instability in liquid propellant rocket motors using concentrated combustion model, presenting mathematical analysis as boundary value problem

02 p0353 A70-12011

Bounded region satisfying regularity necessary to Korn inequalities and Sobolev immersion theories, discussing plasticity theory operator monotony in Minty-Browder sense

02 p0387 A70-12109

Unstable electron plasma initial value problem solved by numerically integrating Vlasov equation in one dimension

02 p0347 A70-12235

Viscoelastic boundary value problems involving time dependent boundary regions reduced to elastic problems, starting with aging viscoelastic body

02 p0388 A70-12269

Boundary conditions of heat conduction in systems of vessels connected by rods with given heat capacity and unknown temperature

02 p0400 A70-12674

Mixed boundary value problem for viscoelastic body with constant Poisson ratio solved by variables separation method, proving convergence

02 p0390 A70-12802

Summary representation formulas for solving boundary value problems for Helmholtz and Poisson equations in rectangle

03 p0518 A70-13076

Axisymmetric elasticity theory problem of stressed state of space weakened by concentric circular cracks solved using p-analytic functions to generate boundary value problems

03 p0586 A70-13077

Summary representations method to analyze finite difference schemes for integrating parabolic equations with constant coefficients, solving boundary value problems

03 p0518 A70-13078

Summary representations method to determine eigenfrequencies of finite difference Laplace operator for boundary conditions

03 p0518 A70-13079

Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends

03 p0589 A70-13337

Control problem of linear system with phase coordinate constraints, discussing solution properties, boundary conditions and function minimization procedure

03 p0460 A70-13340

First and second boundary value problems of steady vibrations of viscoelastic bodies reduced to algebraic equations

03 p0589 A70-13345

Elasticity theory contact type problems, proving solutions existence and uniqueness

03 p0589 A70-13346

Static contact mixed boundary value problems in elasticity theory, noting limitations

03 p0590 A70-13383

Discontinuous solutions of nonlinear boundary value problems of heat conduction for second order ordinary differential equations using modified difference method

03 p0604 A70-13390

Eigenfunctions of oscillating infinite perforated membranes for various boundary conditions at holes

03 p0591 A70-13415

Asymptotic behavior at infinity of mixed boundary value problem analyzed for Sobolev equation involving operator

03 p0518 A70-13433

Shallow elliptical planform shell under uniformly distributed normal load calculated with 'ritz and Bubnov-Galerkin variational methods

03 p0593 A70-13496

Boundary value problems for orthotropic half plane and infinite orthotropic plane with cuts, considering loads at various points

03 p0593 A70-13497

Linear functionals over Sobolev spaces and elliptical boundary value problems generated by theorems on homeomorphisms

03 p0519 A70-13505

Three dimensional combustion instability in liquid-propellant rocket engines, investigating dependence on design and operating parameters via boundary value problem analysis

03 p0551 A70-13574

Two point boundary value problem arising from Pontryagin maximum principle application in optimal control, describing solution based on combined existing methods

03 p0460 A70-13699

Variational stress solutions for static case of bounded bodies in Cosserat continuum theory, assuming anisotropic inhomogeneous material and defining boundary value problem solution

03 p0596 A70-13973

Variational principles in linear elasticity theory with couple stresses, solving boundary value problems in Mindlin theory with microstructure and first strain gradient theory

03 p0596 A70-13974

Differential equations system under side condition, examining solutions existence

03 p0519 A70-14073

Fourier expansion method applied to hydrodynamic stability of plane jet, testing boundary conditions

03 p0469 A70-14180

Boundary value problems for partial differential equations representing steady gas flow hydrodynamic problems

03 p0469 A70-14228

Axisymmetric sonic flow around slender body, determining boundary regions for slender body approximation and Guderley expansion utility

03 p0409 A70-14233

Navier-Stokes boundary value problem describing viscous incompressible fluid flow between coaxial fixed and rotating cylinders, emphasizing stability analysis

03 p0470 A70-14242

Elastokinetic three dimensional boundary value vibration problem, involving rectangular area on surface of elastic half space under periodic normal stress

03 p0601 A70-14319

Solutions properties of initial and mixed initial-boundary value problems of wave equations

03 p0537 A70-14384

Perforated plates bending for multiply connected regions, proving quasi-regularity and uniqueness of boundary value equations

04 p0767 A70-14481

Soviet book on boundary value problems involving motion of ideal fluids in unsteady cavities of various geometries, determining attached fluid masses and oscillation frequencies

04 p0666 A70-14678

Initial value method for solution of nonlinear two point boundary value problems in fluid mechanics, considering Blasius equation and unsteady gas flow [ASME PAPER 69-WA/FE-8]

04 p0667 A70-14782

Transient heat conduction solution by finite element methods application to nonlinear boundary condition problems

[ASME PAPER 69-WA/HT-36]

04 p0781 A70-14804

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle

04 p0661 A70-15011

Perturbation technique for numerically sensitive nonlinear two point boundary value problems

04 p0713 A70-15045

Numerical analysis of nonlinear boundary value problems for ordinary differential equations, considering patch bases and monotone methods

04 p0714 A70-15046

Complex uncoupled modes to analyze forced vibrations of three layer damped sandwich beam with arbitrary boundary conditions, discussing orthogonality

04 p0773 A70-15076

Boundary value problems of Cauchy-Riemann differential equations using solution to derive integral equation for stationary infrasonic flow

04 p0671 A70-15094

Thin walled uniform open bar stability under arbitrary boundary conditions, using Vlasov assumptions and matrix methods

04 p0774 A70-15099

Plane static boundary value problems solutions in zero moment elasticity theory, proving solutions existence and uniqueness

04 p0775 A70-15214

Mixed nozzle flows solution complex boundary value problem reducible to Cauchy problem for hyperbolic system with three dependent variables by applying flow stabilization method

04 p0617 A70-15236

Thermoelastic boundary value problems solutions in quadratures applicable to problems with given parameters on boundary sections

04 p0775 A70-15257

Directional pattern of waveguide radiators using Kirchhoff boundary values of electric, magnetic or electric and magnetic fields, discussing aperture reflection coefficient

04 p0653 A70-15397

Soviet book on three dimensional boundary value problems in mathematical theory of elasticity and thermoelasticity

04 p0777 A70-15474

Approximate boundary controllability of heat equation, considering smoothness conditions on piecewise-smooth boundary

05 p0875 A70-15781

Stefan free boundary problems with prescribed flux reduced to form solvable by numerical methods, proving existence and uniqueness theorems

05 p0956 A70-15783

Terminal states and time specifications influence on optimum control systems, using Pontryagin principle for boundary value problems application

05 p0824 A70-15874

Three dimensional elastostatics problems solution method using singular integral equations solvable numerically for surface tractions and displacements of fully mixed boundary value problem

05 p0926 A70-15912

Boundary value problems of thin beams theory transformed into initial value problems, using dynamic programming and invariant imbedding

05 p0926 A70-15977

Dual trigonometric series solution for mixed boundary value problems in two dimensional elasticity

05 p0926 A70-15979

Mixed boundary value problems of plane elasticity, solving stress field of central Griffith crack in wedge using singular integral equations

05 p0932 A70-16173

Mixed boundary value problems of isotropic elastic half space with ring shaped separation region

05 p0935 A70-16232

Unsteady heat conduction numerical approximation for infinite cylinder with variable heating and boundary conditions of third kind

05 p0936 A70-16294

One dimensional unsteady heat conduction with variable boundary conditions solved by difference-differential method using rectangular and cylindrical coordinates

05 p0957 A70-16295

Heat source temperature distribution on surface of infinite cylinder with zero temperature, presenting solution to boundary value problem

05 p0957 A70-16296

Self adjoint boundary value problems with interior point boundary conditions using differential operator in Hilbert space

05 p0876 A70-16423

Displacements and stresses obtained for elastic half plane with variable Poisson ratio under certain traction boundary conditions, using Fourier transform method

05 p0940 A70-16512

Existence and uniqueness of nonlinear boundary value problem solutions formulated by fixed point theorem and Green function

05 p0876 A70-16562

Green operator structure and eigenvalue approximation of boundary value problems regarding vibrations and buckling of clamped plates using orthogonal invariants

05 p0876 A70-16563

Fluid boundary at curved wall under pressure

05 p0834 A70-16680

Dirichlet problem of biharmonic operator in boundary region containing infinite number of pieces

05 p0877 A70-16878

Boundary value problems in closed spaces with fine grained Liapunov boundary described by second order elliptic differential operators

05 p0877 A70-16881

Hydrodynamic coefficients of algebraic equations for boundary value problems in disturbed motion of body with rib-reinforced liquid filled cavity

05 p0836 A70-16956

Thermoelasticity boundary value problems solutions in quadratures based on symmetry property and Fourier integrals

05 p0947 A70-16971

Unsteady temperature field of uniformly thick disk for inhomogeneous boundary conditions and small Fourier numbers solved by Laplace operation

05 p0958 A70-17013

Numerical solution of nonlinear Vlasov equation for collisionless plasma problems, discussing initial value problems, external electric fields, magnetic fields, etc.

06 p1108 A70-17419

Radio wave propagation in stratified media consisting of periodically stacked dielectric slabs solved for boundary condition by reducing Maxwell equations to Hill equation

06 p1007 A70-17463

Electrical network models simulating initial and boundary value problems of applied mechanics, exemplifying with string free vibrations and thin plate bending

06 p1094 A70-17928

Uncoupled quasi-static boundary value problem for linear viscoelastic solids undergoing thermal and mechanical deformation solved by computational algorithm

06 p1168 A70-17937

Boundary conditions and iterative procedures for plasma sheath problems, using matrix equation to represent differenced Poisson equation

06 p1123 A70-18295

Kinetic theory treatment of linearized Rayleigh problem using wall boundary condition models

06 p1049 A70-18329

Transition regime gas flows using Navier-Stokes equations and boundary conditions set, considering heat transfer, torque and drag in spherical geometry

06 p1049 A70-18331

Mixed boundary value potential theory problem numerical solution by integral equation invariant imbedding

06 p1171 A70-18511

Boundary value problems in nonlocal elasticity, considering two one dimensional media coupling with microstructure by Green function analog

07 p1399 A70-18665

Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas

07 p1252 A70-18671

Equilibrium forms of prolonged rectangular plate in gas flow in terms of nonlinear boundary problem, emphasizing plate with hinged supports

07 p1187 A70-18679

Three dimensional boundary value problems for bodies of revolution rotating in fluid at rest and for bodies at rest in rotating fluids

07 p1252 A70-18709

Soviet collection of papers on boundary problems for differential equations covering variational problems in half space, polynomial behavior at infinity, function spaces, Fourier transformation, etc.

07 p1322 A70-18851

Boundary value problems solutions estimated for heat conduction equation in unbounded domain, considering function satisfying heat induction equation

07 p1419 A70-18852

Existence and uniqueness theorem for boundary value problem solution for parabolic equation in domain with singular points on boundary

07 p1322 A70-18853

First boundary value problem for quasi-elliptic and quasi-parabolic equations, discussing solvability and boundary behavior near characteristic points

07 p1322 A70-18854

Finite element method using cubic polynomials over triangle as trial functions for solving second order boundary value problems in linear theory of elasticity

07 p1324 A70-19075

Inverse boundary value problems for supercavitating bodies, deriving singular integral equations using Prandtl acceleration potential method

07 p1254 A70-19076

Direct boundary value problem for supercavitating profile with finite cavity, deriving singular integral equations by Prandtl acceleration potential method

07 p1254 A70-19077

Circular plates with optimal natural frequency of transverse vibrations, discussing boundary conditions

07 p1405 A70-19256

Stress rate boundary value problem formulation for elastoplastic body by singular integral equations

07 p1405 A70-19258

Flexural elastic behavior of rectangular plates with boundary restraint acting on same side using finite differences method

07 p1406 A70-19348

Plane electromagnetic wave reflection from laminar anisotropic medium, analyzing piecewise-constant permittivity tensor as boundary value problem

07 p1235 A70-19448

Digital computer design of electric and radio equipment using secondary source method for field boundary calculation in inhomogeneous environment

07 p1241 A70-19480

Boundary value problems solution for infinite elastic isotropic plane weakened by arbitrarily distributed circular holes based on using series in Taylor functions

07 p1408 A70-19549

Book on some methods of solving boundary value problems of mathematical physics covering linear operators, boundary conditions, perturbation and Monte Carlo methods

07 p1326 A70-19696

Book on mathematical theory of viscous incompressible flow covering stationary and nonstationary boundary value problems for linearized and nonlinear Navier-Stokes equations

07 p1258 A70-19697

Self adjoint operator generated by differential expression and pseudodifferential boundary conditions, using Berezanskiĭ procedure for operator eigenfunction expansion

07 p1327 A70-19809

Parameters identification in nonlinear boundary value problems by successive approximations technique, using Lagrange multipliers and Newton-Raphson method

07 p1327 A70-20025

Boundary value problem for self conjugate elliptical fourth order differential equation with variable coefficients, proving convergence of iterative process

07 p1328 A70-20143

Two point boundary value problems of quasi-differential equations, discussing conditions for continuous and increasing lower bounds of functions

07 p1328 A70-20349

External and internal three dimensional dynamic problems in elasticity theory for multiply connected region with circular cylinder boundaries

08 p1584 A70-20537

Nonlinear steady state diffusion elliptic boundary value solutions exemplifying enzyme kinetics and radiation cooling

08 p1596 A70-20580

Boundary value problem solution in study of axisymmetric viscous heat conducting gas flow past body of revolution

08 p1431 A70-20854

Optimization of control of oscillatory process with deviating argument in maximum principle form, reducing solution to boundary value problem

08 p1544 A70-20954

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

08 p1585 A70-20956

Mixed problems with linear homogeneous boundary conditions with time-independent coefficients for semihyperbolic equations, discussing constraints

08 p1534 A70-21005

Stability of solutions to linear differential equations pair, determining bound conditions having S-property

08 p1534 A70-21100

Boundary value problem for linear elliptic differential operator degenerating on region boundary

08 p1534 A70-21119

Lateral buckling of simply supported uniform diaphragm using slope-deflection equations for orthogonally intersecting beams, prescribing boundary conditions

08 p1589 A70-21244

Biharmonic equation in polar coordinates solved for circular plates and plate sectors with various boundary conditions, using finite difference approximations

08 p1589 A70-21246

Boundary value problems in one speed transport theory, applying Green function technique to neutrons with spherical symmetry

08 p1542 A70-21253

Boundary value contact problems in thermoelastic oscillations theory found to have unique solutions for any frequency

08 p1591 A70-21440

Potential vortex flow interaction with stationary surface calculation extended to Volterra equations by transforming boundary value problem, improving critical Reynolds number bounds

08 p1484 A70-21472

Thermoelastic energy functions bounding by variational principles for anisotropic composite materials properties

08 p1592 A70-21510

Semiinfinite elastic strip supporting thin heavy beam using Airy stress function and Laplace transform, with boundary conditions expressed as Fourier series

08 p1594 A70-21768

Asymptotic distribution of operator eigenvalues for self adjoint elliptic boundary value problem in unbounded region using Green function

09 p1711 A70-22148

Biharmonic boundary value problems with reentrant boundaries, comparing Motz and Woods finite difference solution methods

09 p1711 A70-22285

Mixed system of simultaneous linear differential equations under general boundary conditions, deriving numerical solution in Chebyshev series

09 p1711 A70-22288

Boundary problem for displacement equilibrium equations of elastic body using iterative methods, demonstrating convergence of difference equation solution

09 p1771 A70-22467

Thermo-elastic analysis and optimum start-up in power plant, discussing transfer function for thermally loaded bodies with restricted boundary temperature

09 p1774 A70-22584

Continuous dependence theorem and differentiability properties of free boundary problem solution for heat equation

09 p1788 A70-22609

Hankel integral transforms of half orders for solving boundary value problems in terms of spherical coordinates

09 p1712 A70-22834

Steady harmonic oscillations of half space with circular holes, deriving algebraic equations for boundary value problems

09 p1782 A70-23296

Boundary value problem of torsion for equilibrium of elastic body based on moment theory in absence of bulk forces

09 p1782 A70-23381

Point boundary value problem solution for differential equations with parameters in form of power series, considering Cauchy problem

09 p1712 A70-23383

Boundary value problem for cavitating flow around thin wing reduced to two dimensional singular integral equations from acceleration potential

09 p1663 A70-23393

Multipoint methods for two point boundary value problems with Banach space self mapped, proving convergence theorems for iterative solutions

09 p1712 A70-23420

Soviet monograph on method of functional equations for solving boundary value problems, discussing computer programs and various applications

09 p1712 A70-23548

Stress tensors in initial value problem for incompressible flow with nonlinear viscosity

09 p1663 A70-23570

Reissner-Sagoci transient mixed boundary value problem concerning displacement of infinite half space of isotropic elastic material, deriving surface displacement and reactive torque

09 p1784 A70-23571

Initial value problem of macroscopic disorder-order transformation in random thermal convection phase of fluid heated from below

09 p1791 A70-23679

Progressive shock waves propagation, reflection and transmission through sudden changes in pipe cross sectional area, obtaining boundary conditions for quasi-steady junction flow

09 p1664 A70-23738

Heat conduction analysis for plane body with boundary condition and time variable heat exchange coefficient, applying automatic control technique

10 p1966 A70-23869

Unsteady heat transfer on electronic analog model, using installation prescribing variable boundary conditions of third kind

10 p1966 A70-23872

Integral relations describing laws of conservation and Sobolev theorem used in deriving a priori estimates for nonlinear parabolic equations first boundary value problem

10 p1908 A70-23924

Existence and uniqueness of mixed problem solution for Tricomi equation proved by a priori estimates

10 p1908 A70-23925

Nonstationary thermoelasticity in half space with moving boundary condition described in Cartesian rectilinear coordinates allowing for time term in heat conduction equation

10 p1954 A70-24012

Ill conditioned linear two point boundary value problems solved by Riccati transformation avoiding forward integration

10 p1909 A70-24059

Unsteady MHD flows of viscous, incompressible and electrically conducting fluid, proving boundary value problem solutions existence and uniqueness

10 p1922 A70-24095

Nonautonomous boundary value problems for plates in plane and three dimensional supersonic flows, obtaining eigenfunctions of vibration by Laplace transform

10 p1956 A70-24118

Gas flow from nozzle into duct with enlarged cross section investigated for flow pattern and boundary conditions, noting oscillation behavior

10 p1799 A70-24123

Equilibrium equations integration for body in isotropic linear viscoelastic medium with contact-type boundary conditions

10 p1957 A70-24267

Error analysis and monotone convergence of finite difference approximations to linear one dimensional singular boundary value problems

10 p1909 A70-24406

Quasi-linearization extension to numerical solution of multipoint boundary value problems for ordinary differential equations arising from state constrained optimal control problems

10 p1909 A70-24421

Parameter introduction during boundary value problem solution for second order nonlinear ordinary differential equations

10 p1909 A70-24510

Kinematic analysis of limit loads of equilateral triangular plates under various boundary conditions

10 p1958 A70-24517

MHD boundary layer flow equations solution by initial value method to eliminate iteration process

10 p1924 A70-24563

Adjointness in nonadjoint boundary value problems, extending Neuberger symmetry study to obtain expansion theorem for nonself adjoint p-point problems

10 p1910 A70-24606

Partial differential equation describing one dimensional heat transmission problems solved by eigenvalues for initial and boundary conditions

10 p1969 A70-25098

Superconducting ellipsoid of revolution in alternating magnetic field, computing disturbed field components using boundary value problem

10 p1917 A70-25201

Mixed boundary value problem for linear parabolic equations with discontinuous coefficients, proving solution existence and uniqueness by functional method

10 p1911 A70-25304

Boundary value problem in parallelepiped constructed for linear partial differential equation with constant coefficients using expansions in Riesz bases

10 p1911 A70-25305

Temperature and heat flux in plane, cylindrical and spherical multilayer diaphragms with boundary conditions, assuming harmonic temperature variation

10 p1970 A70-25321

Viscoelastic half plane creep under discontinuous boundary conditions, obtaining exact closed-form solution based on Fourier transforms and distribution theory

10 p1965 A70-25325

Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state

11 p2129 A70-25396

Classical and elastically restrained boundary conditions requirements for anisotropic plates Ritz solution

11 p2135 A70-26076

Boundary conditions effect on bending, vibrations and buckling of unsymmetrically laminated rectangular plates

11 p2136 A70-26079

Guidance boundary value problem estimation by continuous least mean square (CLMS) method, describing application to generation of velocity required coefficients

11 p2081 A70-26322

Spacecraft temperature prediction and heat conduction problems with nonlinear radiation boundary conditions by perturbation theory, applying to heat shield analysis

11 p2150 A70-26355

Monograph on integral calculation method for disk problems with mixed boundary conditions covering two dimensional stress-strain state, extrapolation methods, etc

11 p2140 A70-26474

Elastodynamics mixed initial and boundary value problems numerical solution method applied to deformation of elastic solid

11 p2140 A70-26485

Discrete models for boundary value problems analysis in first strain-gradient elasticity theory, extended finite element method

11 p2142 A70-26637

Asymptotics of linear diffusion processes altered by weak nonlinear effects, discussing deterministic and statistical initial value problems

11 p2074 A70-26686

Book on successive approximation methods in control and oscillation theory covering two point boundary value problems iterative solutions, orbital transfer, etc

12 p2260 A70-26852

Coerciveness /Korn/ inequalities role in boundary value problems for elliptic systems of partial differential equations, noting applications to three dimensional linear elasticity theory

12 p2260 A70-26974

Kantorovich theorem application as weak Newton method used in boundary value problems containing Euler-Lagrange equation for variational problems and ordinary differential equations

12 p2260 A70-27002

Differential equations in two point boundary value problems solved by combining Newton-Raphson iterative method with parameter variation extrapolation

12 p2260 A70-27003

Stable and unstable crack growth in viscoelastic media, solving boundary value problem and continuum mechanics prediction of crack propagation

12 p2315 A70-27092

Heat equation initial value problem with dissipative term nondecreasing and discontinuous function of unknown, discussing existence and uniqueness theorem of periodic solution

12 p2330 A70-27160

Coordinate function selection for boundary value problems solution by Galerkin method demonstrated for heat conduction equation of anisotropic parallelepiped with internal source

12 p2271 A70-27291

Classical eigenvalue problem transformation by invariant imbedding into initial value problem suited for numerical integration, noting applications to columns elastic buckling

12 p2261 A70-27424

Iteration procedures for boundary value problem of orthotropic rectangular plate under bending loads, discussing convergence of procedures

12 p2325 A70-27552

Laminar natural convection plumes behavior above energy sources calculated by simplest variables, indicating optimum formulation of boundary value problem

12 p2332 A70-27700

Spatial relaxation of electron gas colliding with positive ions from plasma velocity distributions, solving time independent Fokker-Planck boundary problem

12 p2280 A70-27791

Linear and nonlinear parabolic boundary value problems with first boundary conditions solved by method of lines, estimating error

12 p2262 A70-28031

Thin walled shells of revolution equations boundary conditions formulated by stress state separation, giving small parameter perturbation theorem

12 p2327 A70-28191

Volterra method applied to solution of mixed boundary value problems for wave equation

12 p2159 A70-28243

Mixed boundary value problems involving time dependent boundary regions for penny-shaped crack in viscoelastic materials with one relaxation function

13 p2508 A70-28489

Inverse boundary value problems involving elliptic equations solved by Newton method and discrete invariant imbedding

13 p2440 A70-28650

Partial differential equations in regions with curvilinear boundaries solved by difference network approximation method

13 p2440 A70-28961

Elliptic equations solved by projection network methods noting estimate derivation for convergence rates

13 p2440 A70-28962

Elastoplastic continuum under specified rates of body forces, surface tractions and displacements, formulating minimum principle for solving boundary value problem

13 p2513 A70-29154

Boundary value problems of ordinary and generalized heat conduction equations using reflection method

13 p2521 A70-29311

Relationship between fundamental matrices of solutions to boundary value problems of parabolic and elliptical systems with Bessel functions

13 p2441 A70-29314

Viscous and inviscid incompressible fluids motion boundary value problems solutions with aid of kinetic stress functions

13 p2388 A70-29319

Nonlinear equations boundary value problem solution by Galerkin method in integrodifferential equations form, determining Lipschitz conditions constant and proving existence and uniqueness

13 p2442 A70-29513

Operator originated by Schroedinger equation having inhomogeneous boundary conditions on portion of boundary of Hilbert spaces orthogonal sum, defining region of self conjugation

13 p2442 A70-29514

Rotating stellar configurations structure consisting of degenerate matter or density dependent temperature describing boundary value problem reduction for Cauchy problem

13 p2494 A70-29518

Variational principles derivation for inelastically deformable body mixed boundary value problem, considering loading conditions with basic functions free of discontinuities

13 p2516 A70-29524

Elastic anisotropic body analysis, formulating boundary value problem solutions

13 p2516 A70-29525

Mixed boundary value problems with radiation-type boundary conditions solved by complex Green function, discussing water waves in irrotational motion

13 p2452 A70-29536

Soviet collection of articles on transactions of seminar on boundary value problems covering plates in weightless fluid, cavitation flow channel, unsteady flows, etc

13 p2390 A70-29643

Generalized Frankl boundary value problem solution uniqueness formulation and proof using auxiliary function

13 p2390 A70-29647

Aerodynamic characteristics of supercavitating airfoil, investigating effect of free surface of unsteady fluid flow with stream separation, solving boundary value problem

13 p2391 A70-29650

Boundedness of solutions and higher derivatives for degenerate matrices, showing dependence on characteristic numbers and linear groups

13 p2443 A70-29744

Boundary conditions and initial value lines for unsteady homentropic flow, performing straight pipe calculations

13 p2392 A70-30023

Multichannel scattering variational bounds reformulation without using projection operators, calculating resonance-energy relations

14 p2619 A70-30490

Closed form solutions of boundary value problems for Burger equation within half plane from zero to infinity

14 p2598 A70-30492

Mixed boundary value problems for pseudoparabolic partial differential equations solved in Hilbert space, demonstrating solution existence and uniqueness

14 p2599 A70-30635

Method of ascent for general representation in boundary value problems associated with differential equation of n variables

14 p2599 A70-30636

Differential equations eigenvalue and boundary value problem finite difference approximation convergence under consistency and stability conditions

14 p2599 A70-30643

Boundary value problems reduction to variational problem by transversality conditions of calculus of variations

14 p2599 A70-30644

Quasi-linear elliptic boundary value problem approximate solution and error bounds, considering linear programming for computation

14 p2599 A70-30646

Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends

14 p2657 A70-30715

First and second boundary value problems of steady vibrations of viscoelastic bodies reduced to algebraic equations

14 p2657 A70-30720

Recoverability for amplitude and rate bounded optimal control of linear time varying systems

14 p2562 A70-31203

Pontryagin principle for thin vibrating plates under mixed boundary conditions, examining optimal control

14 p2660 A70-31205

Cylindrical shell nonaxisymmetric vibration frequencies and boundary values relation, using Lagrangian

14 p2661 A70-31273

Boundary value problem for Navier-Stokes equations to obtain stationary flows as limits of nonstationary solutions

14 p2600 A70-31347

Cesaro Fourier series summation method for boundary value problems in electrostatics

14 p2600 A70-31419

Boundary value problem of nonlinear one dimensional conduction in radiating heat shields, using perturbation and numerical methods

15 p2824 A70-31450

Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas

15 p2718 A70-31463

Equilibrium forms of prolonged rectangular plate in gas flow in terms of nonlinear boundary problem, emphasizing plate with hinged supports

15 p2671 A70-31471

Diffraction on strip, investigating for Dirichlet boundary conditions, deriving excited current density and scattered pattern

15 p2696 A70-31515

Boundary value problems of biharmonic finite difference equation in rectangular domain, deriving calculation formulas for summary representations solution method

15 p2814 A70-31583

Cauchy spatial problem of Laplace equation, obtaining approximate solution based on initial conditions

15 p2767 A70-31584

Shells of revolution zero moment stressed state calculation by analytical functions, solving boundary value problem for edge loading

15 p2814 A70-31587

Axissymmetrical boundary value problem solution by net point method via transformation into self adjoint second order elliptic equation, obtaining positively determinate matrix

15 p2767 A70-31588

Natural oscillation frequencies of shallow shells with mixed boundary conditions on clamped edges, using summary representations method

15 p2814 A70-31590

Laminar boundary conditions for heat transfer in gradient flow region for plane turbulent jet impingement on plate normal to flow

15 p2721 A70-32134

Nonlinear higher order canonical time lag equations initial and boundary value problems solutions by approximate iterative two way integration

15 p2767 A70-32171

Heat conductivity equations transformation for Cartesian and cylindrical coordinates and various boundary conditions using static electrointegrator

15 p2827 A70-32172

Nonlinearly elastic bodies under subcritical strain, analyzing boundary value problems for three dimensional stability

15 p2818 A70-32179

Boundary value problem of elastic isotropic material, obtaining pointwise bounds of Cosserat continuum, considering couple stresses and constrained rotation of particles

15 p2821 A70-32340

Boundary value problem in linear elastodynamics, investigating Ignaczak type theorems for microstructure effects in transient heat conduction problems

15 p2822 A70-32343

Riemann-Hilbert problem for discontinuous coefficient solving mixed boundary value problems in infinite elastic strip, discussing shear stress along whole boundary

15 p2822 A70-32355

Orr-Sommerfield equation asymptotic solution corresponding to boundary layer velocity distribution

15 p2721 A70-32357

Wave scattering from elliptic cylinder, solving boundary value problem for two dimensional wave equation

15 p2700 A70-32404

Variational equation of ballistic trajectory applied to two point boundary value guidance problems

15 p2812 A70-32504

Optimal control stochastic problem with initial conditions treated as random variables, using matrix minimum principle

15 p2716 A70-32563

Series expansions convergence of solutions to boundary value problem for Navier-Stokes equations, introducing small parameter in boundary conditions

16 p2890 A70-33243

Difference schemes approximating boundary value problem for heat conductivity and oscillation equations, considering brute force method stability

16 p2951 A70-33245

Elliptic boundary value problems involving pseudodifferential operators on bounded manifold, examining solutions analyticity

16 p2941 A70-33269

State estimation for nonlinear discrete time systems with quantized measurements, obtaining recursive algorithm through boundary value problem linearization

16 p2867 A70-33305

Initial condition sensitivity functions in bang-bang and optimal control, considering discontinuous functions, perturbation equations, iteration algorithms terminal states, cost functions, etc

16 p2885 A70-33325

Particular solutions for nonlinear two point boundary differential equations with initial and final conditions

16 p2942 A70-33692

Continuous space discrete time /CSDT/ method using initial value formulation for partial differential equations, discussing applications to one dimensional problem

16 p2943 A70-33736

Boundary value problem of two dimensional Poisson equation solution procedure with Hockney formulas, applying to unsteady viscous incompressible flow past flat plate

16 p2943 A70-33737

Dwell time boundary and mean values for laminar flows through channel and tube reactors, obtaining field representation from streamline network and isochrones

16 p2893 A70-33745

Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method

16 p2991 A70-33854

Outer boundary conditions derivation from asymptotic form of similar boundary layer equations with unit Prandtl number

16 p2894 A70-33874

Initial reentry body motion effects on angle of attack envelope value throughout trajectory, including altitude of maximum transient amplification

16 p2982 A70-33892

German monograph on stress-strain state determination for rotors of turbomachines covering strain equations, partial differential equations, boundary conditions, etc

16 p2971 A70-34078

Nonlinear partial differential equations initial value problems asymptotic solution using two time method

16 p2943 A70-34245

Boundedness theorem for solutions to differential equations system in applied mechanics

16 p2944 A70-34287

Canonical variational principle for boundary condition contractions in elastic shell theory

17 p3182 A70-34545

Singular perturbations of boundary value problems, investigating asymptotic solutions to finite difference equations

17 p3128 A70-34613

Boundary conditions for electrodynamics of wave reflection from conducting bodies, using perturbation technique

17 p3128 A70-34633

Boundary value problems for symmetrically excited biconical antennas surrounded by free space, treating spherical and thin wire antennas

17 p3044 A70-35062

Boundary value problem of Hertzian dipole antenna in presence of conducting half space, analyzing lossy earth effects on input impedance and radiation pattern

17 p3044 A70-35074

Antennas in plasma, investigating electromagnetic and electroacoustic waves and boundary value approach

17 p3045 A70-35076

Existence and uniqueness theorem for boundary value problem solutions to nonlinear canonical ordinary differential equations

17 p3131 A70-35339

First boundary value problem solution for parabolic equation by differential invariant method

17 p3131 A70-35340

Shallow shell theory boundary value problems, calculating stress concentration for domes and shells with holes

17 p3192 A70-35694

Axisymmetric mixed boundary problem for elastic infinite cone, obtaining solution by assuming zero shearing stresses

17 p3192 A70-35698

Three dimensional mixed boundary value problems, obtaining solutions for elastic body differential equilibrium equations

17 p3192 A70-35699

Class of third order difference methods for hyperbolic equations in one and two dimensions applicable to nonlinear initial value problems

17 p3131 A70-35893

Two dimensional free boundary problems approximate solution by finite difference method, deriving algorithms for computer program implementation

18 p3230 A70-35941

Elastic layer with circular cylindrical cavity under axial tension /Kirsch problem/, determining stress concentration from boundary value problem

18 p3335 A70-36130

Finite difference theory applied to first boundary value problem of elasticity theory for Lamé equation

18 p3280 A70-36158

Generalized Carleman boundary value problem, discussing analytical function in simply connected region on Liapunov contour

18 p3280 A70-36159

Ritz procedure for problems with eigenvalues in boundary conditions

18 p3336 A70-36222

Boundary value problem for Navier-Stokes equations of viscous incompressible fluid flow, discussing convergence of iterative solution

18 p3241 A70-36290

Boundary value problem approximation method for large numbers, using projective method applicable to linear integral, integrodifferential and differential equations

18 p3282 A70-36360

Monotonic difference schemes for parabolic differential equations with nonlinear boundary conditions, discussing convergence and stability

18 p3282 A70-36361

Linear multistep algorithms in discretization of nonlinear initial value problems of ordinary differential equations

18 p3283 A70-36366

Singular integral equations of elasticity theory, formulating boundary value problem for discontinuous plane stresses

18 p3337 A70-36370

Finite element procedure convergence for fourth order boundary value problems solution

18 p3283 A70-36493

Torsional vibration of thin beam with varying cross section, formulating fundamental equation and boundary conditions

18 p3339 A70-36519

Generalized boundary value problems solution for elliptic differential equations by Schwarz method, proposing algorithm

18 p3283 A70-36573

Thermoelasticity boundary value problems by finite difference method, determining thermal, displacement and stress fields in continuous medium

18 p3342 A70-36671

Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions

18 p3316 A70-36683

Arbitrary cross sections center of flexure formula, transforming surface integral to line integral dependent on boundary conditions

18 p3343 A70-36716

Laminar incompressible flow in arbitrary cross sectioned entrance region of ducts by numerical technique after transformation to boundary value problem

[ASME PAPER 70-GT-91] 18 p3243 A70-36878

Plane electromagnetic wave reflection from laminar anisotropic medium, piecewise-constant permittivity tensor as boundary value problem

18 p3229 A70-36922

Boundary value problems in MHD, considering viscous and nonviscous fluids

19 p3479 A70-37592

Initial boundary value problems for hyperbolic partial differential equations, including Cauchy problem

19 p3457 A70-37678

Linear time varying systems optimal control through decoupling of boundary value problems

19 p3393 A70-37866

Mixed boundary value problems approximate solution in linear elasticity by variational method, noting applications to micromechanics

19 p3540 A70-37957

Nonlinear two point boundary value problem, examining quadrature error effects in approximate numerical solutions by variational techniques

19 p3458 A70-37979

Boundary value problem solution in nonlinear viscoelasticity by constitutive equations

19 p3544 A70-38330

Boundary value problems for elastic sphere, extending Kelvin general solution of Cauchy equations

19 p3545 A70-38333

Sandwich panels geometrically and physically nonlinear theory, obtaining equations of motion and boundary conditions consistent with strain displacement relations

19 p3547 A70-38360

Equilibrium equations integration for body in isotropic linear viscoelastic medium with contact-type boundary conditions

19 p3547 A70-38395

Elastoplastic work hardening continua incremental boundary value problem with allowance for distributed dislocations, using quadratic programming concepts

19 p3549 A70-38667

Helmholtz equation initial value problem solution by integral operators

19 p3459 A70-38680

Simultaneous approximation of function and product with given operator, applying to boundary value problems of partial differential equations

19 p3459 A70-38682

Straight thin walled elliptical cylindrical shells stability in pure bending, solving boundary value problem

19 p3550 A70-38683

Initial value or boundary value problems in mathematical physics, solving by process of condition elimination

19 p3472 A70-38727

Coordinate sequences for regions with complex geometries and various boundary conditions, using linear operators

19 p3460 A70-38940

Singular integral equation formulation for torsion from membrane analogy, obtaining boundary value problem solution by computer program

20 p3718 A70-39000

Quadrature solution for elastic shape deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

20 p3719 A70-39379

Plane electromagnetic scattering from perfectly conducting bodies, comparing exact numerical solution with experiment

20 p3585 A70-39394

Boundary value problems in potential theory for electrical disk and spherical cap reduced to problems for two dimensional Laplace equation

20 p3657 A70-39446

Spacecraft trajectory initial conditions expressions as parameters dependent functions, applying results to Mars lander mission [AIAA PAPER 70-1016]

20 p3666 A70-39517

Second order approximations to velocity required concept for boundary value problems in guidance, deriving Riccati equation and position required concept

20 p3666 A70-39518

Uniqueness theorem for first boundary value problem of heat conduction equation with discontinuous coefficient

20 p3737 A70-39710

Boundary value problems in dynamic two dimensional elasticity theory for domains bounded by circles and straight lines

20 p3721 A70-39770

Boundary value problems in uniform incompressible inviscid flows past complex profile bodies by R functions method and variational technique

20 p3610 A70-39772

Shock tube with diffuser in low shock wave Mach number range, considering gas flow models to relate wave intensity to initial conditions in chambers

20 p3606 A70-39820

Elasticity theory boundary value problems reduction to one dimensional integral equations

20 p3724 A70-39853

Elastic bodies static stability theory variational principles, introducing equilibrium equations and boundary conditions of initial state by Lagrange multipliers

20 p3724 A70-39857

Elasticity theory equations polynomial solutions for use in boundary value problems

20 p3726 A70-39874

Structurally closed orthotropic circular cylindrical reinforced shell stability, developing approximate method to obtain various boundary conditions

20 p3727 A70-39886

Singular points in elasticity theory solved by correct boundary value problem and homogeneous solutions theorem

20 p3728 A70-39894

Thin elastic shells displacement vector and strain boundary conditions determination from stress-strain relations

20 p3728 A70-39896

Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state

20 p3732 A70-40100

Falkner-Skan type boundary value problem of three dimensional flow near stagnation point

20 p3658 A70-40103

Nonlinear free boundary problem for hyperbolic one dimensional gas dynamics equations

20 p3658 A70-40105

Boundary value problems in dynamic elasticity by perturbation method with displacement components

20 p3732 A70-40111

Boundary conditions on vector and scalar potentials in viscous three dimensional hydrodynamics, investigating compressible flow problems

20 p3612 A70-40115

Boundary value problems for linear ordinary differential equations with singularities, determining eigenvalues by computer oriented method

20 p3659 A70-40134

Hilbert type nonlinear boundary value problem, determining conditions for analytical function solutions based on algebraic isotherms theory

20 p3659 A70-40169

Metallic shell with passive thermal protection coating, solving boundary value problem for high temperature heating with simplified mathematical model

20 p3739 A70-40296

Dynamic external boundary value problems for elastic body bounded by spherical surfaces 20 p3734 A70-40433

Strip array excitation by field with large phase shift per period, deriving approximate solution from averaged boundary conditions 21 p3784 A70-40627

Integral equation of viscoelastic media with unstable properties, solving boundary value problems by approximation method 21 p3933 A70-40643

Boundary value problems for elliptic equations with discontinuous coefficients, using finite element method 21 p3845 A70-40734

Vibration of combined cylindrical shells via Lagrangian minimization regarding unknown boundary values 21 p3934 A70-40897

Assumed vibration modes generation method in beams with arbitrary boundary conditions, applied to cantilevered beams, using modified Rayleigh-Ritz analysis 21 p3934 A70-40923

Supersonic flows with imbedded separated regions, emphasizing cavities with recompression against solid boundary layer 21 p3745 A70-41372

Aerodynamic forces on flexible launch vehicles and missiles in supersonic flight based on first order method, solving boundary value problem for surface velocities 21 p3746 A70-41853

First order linear distributed systems with two point boundary values, obtaining eigenfunction expansion by generalized Fourier method 21 p3846 A70-41949

Viscous laminar parallel flow along cylindrical surfaces, discussing boundaries described by algebraic polynomials 21 p3810 A70-41959

Boundary value problem solution for elliptical crack subjected to impulsive load by method of characteristics and discontinuity relations, calculating stress distribution 21 p3938 A70-41960

Isoperibol calorimetry for laser power and energy measurements, discussing boundary value problem for heat flow 21 p3838 A70-42021

Cracks stress intensity factors in plane problems by combined conformal mapping and boundary collocation technique 21 p3940 A70-42036

Surfaces separated by radiatively nonparticipating medium, determining absorptivities and heat transfer boundary conditions in gray surface problems by irradiation factor method 21 p3953 A70-42085

Dirichlet problem for Tricomi equation emphasizing gap in boundary data 22 p4061 A70-42289

Nonlinear one dimensional conduction in radiating heat shields, solving two point boundary value problem by asymptotic and numerical solutions [ASME PAPER 70-HT-E] 22 p4121 A70-42422

Existence theorem for boundary layer problems, including swirling flow between coaxial rotating disks 22 p4009 A70-42484

Time dependent shock wave structure, considering shock tube flow as initial and boundary value problem 22 p4009 A70-42516

Heat conduction into semiinfinite homogeneous solid with thermal conductivity dependence on temperature, noting temperature profile asymptotic behavior for similarity solution 22 p4123 A70-42641

Harmonic mixed boundary value problem with singularity, deriving approximate solution by dual series technique with conformal transformation and finite difference method 22 p4062 A70-42642

Oscillating wing aerodynamic load boundary value problem reduction to sequence of steady lifting-surface problems 22 p3959 A70-42715

Finite difference method for initial value problems of fokker-Planck equations 22 p4080 A70-42743

Irrational incompressible free falling jet, using asymptotic expansion solution for mixed boundary value potential problems 22 p4012 A70-42938

Viscoelastic continuous shaft whirling motion, discussing boundary conditions and internal linear viscous damping 22 p4012 A70-42939

Stress distribution around moving cracks in finite width strip, obtaining solutions for boundary conditions by Schwarz-Christoffel transformation and complex functions theory 22 p4116 A70-43025

Thin walled shells of revolution equations boundary conditions formulated by stress state separation, giving small parameter perturbation theorem 22 p4117 A70-43316

Newton regularized method for nonlinear boundary value problems in combination with conjugate gradients 22 p4064 A70-43480

Geodetic boundary value problem reformulation based on geometric satellite geodesy involving gravity measurements 22 p4025 A70-43667

Boundary value problems of elasticity for layer and strip with arbitrary inhomogeneity along thickness 22 p4120 A70-43712

Elasticity theory for circular cylinder weakened by cavities, discussing boundary conditions on butt ends and Galerkin solutions 23 p4265 A70-43983

Conducting bodies of revolution, calculating surface currents due to axially incident plane electromagnetic wave by computer program 23 p4162 A70-44005

Notch stress intensity factor representation as boundary traction weighted average, deriving weight functions from stress field boundary displacements 23 p4266 A70-44021

Iterative method for boundary value problems in mathematical physics, showing convergence by heat conduction equation solutions 23 p4276 A70-44218

Ordinary differential equations boundary value problems solution based on continuation and reduction to Cauchy problems 23 p4211 A70-44309

Boundary geometry of region with fluid motions harmonic functions obeying Bernoulli law containing free surface curvature 23 p4218 A70-44337

Approximate method for solving thermal conductivity first boundary value problem via reduction to auxiliary Cauchy problem solved by Laplace transform and power series 23 p4277 A70-44339

Nonlinear free boundary value problems involving region bounded by curvilinear ring consisting of smooth curves, reducing problem to nonlinear equations in Banach space 23 p4212 A70-44342

Boundary value problems of fluid dynamics in dynamic cavities reduced to integral equations system 23 p4182 A70-44347

Homotopic classification of boundary value problems with directional derivatives for harmonic functions 23 p4212 A70-44348

Axially compressed circular cylindrical shells subject to relaxed boundary conditions, calculating buckling loads as function of length to radius ratio [ASME PAPER 70-APM-O] 23 p4269 A70-44397

Temperature dependent materials heat flow analysis using perturbation method for nonlinear boundary value problems 23 p4282 A70-44589

Numerical methods for mixed boundary value problem of axisymmetric shells of revolution, using truncated series expansion and finite difference expressions 23 p4272 A70-44712

Rotating spherical shell equations as initial value problem, noting maximum convective heat transport at equator 23 p4249 A70-44805

Periodic boundary value problems with cyclic totally positive Green functions, considering applications in vibrating physical systems and spline theory 23 p4213 A70-44899

Nonlinear filtering for linear parabolic distributed parameter systems with white noise, considering stochastic boundary value problem 23 p4177 A70-44905

Corrugated plates, closed cylinders and developable shells nonlinear elastic analysis, deriving boundary conditions 23 p4275 A70-44913

Numerical solution of first boundary value problem of elasticity theory involving biharmonic stress function relating to rim loads 23 p4275 A70-44942

Dipole antenna in compressible lossy plasma, calculating sheath and absorptive surface effects on current distribution from boundary value problem formulation 23 p4228 A70-44963

Linear viscoelastic solid quasi-static deformation, deducing associated minimum principles under assumption of unique solutions existence for boundary value problems 24 p4420 A70-45264

Asymptotic properties of integral equations solutions for boundary value problems in theory of elasticity and mathematical physics 24 p4422 A70-45490

Flame propagation limits and damping mechanism in gases under convection, determining boundary and initial conditions 24 p4428 A70-45492

Variational solution of eigenvalues and eigenfunctions of second boundary value problem of elasticity minimizing functional 24 p4424 A70-45629

Asymptotic small-parameter solution of boundary value problem for second-order elliptic equations with variable coefficients in thin regions 24 p4424 A70-45635

Plate constituting doubly connected region bounded by outside curvilinear polygon and inside by eccentrically located circle, using series summation 24 p4424 A70-45636

Nonlinear boundary value problems, deriving existence theorems 24 p4369 A70-46022

Variational principle and reciprocity theorem for initial value problems associated with wave equations, discussing solution uniqueness conditions 24 p4380 A70-46037

Stochastic boundary value problem involving differential equation with random forcing function, proving monotone property of solution covariance variation 24 p4426 A70-46039

Nonlinear parabolic initial value problems, including Navier-Stokes equations 24 p4370 A70-46414

BOUSSINESQ APPROXIMATION

Boussinesq eddy viscosity concept solving equations of two dimensional incompressible turbulent boundary layer, using implicit five point finite difference method 02 p0285 A70-12350

Asymptotic solutions of paraboloidal boundary layer system for thermally driven convective flows governed by nonlinear Boussinesq equations 03 p0519 A70-14077

Solar spin down procedure simulated via Boussinesq fluid spin down in circular cylinder 23 p4252 A70-44832

BOW SHOCK WAVES

U BOW WAVES

U SHOCK WAVES

BOW WAVES

Resonance amplification theory of standing interfacial gravity waves in viscous fluids applied to obtain wavelengths prediction of atmospheric bow waves 01 p0081 A70-11299

Standing bow shock in plasma flow into dipole magnetic field, measuring particle density, electron temperature, magnetic field flux and oscillations 03 p0530 A70-13158

Earth bow shock and magnetopause oscillatory motions with respect to positions assumed under quiet solar wind conditions, discussing satellite observations 05 p0840 A70-16586

Hydromagnetic wave interaction with magnetopause and bow shock, considering solar wind turbulence and magnetopause tail stability 07 p1270 A70-20070

Initial deceleration of solar wind positive ions upstream of earth bow shock determined fromOGO 5 high time resolution plasma measurements 08 p1562 A70-21377

Electron and proton temperature differential near earth bow shock determined from plasma probe measurements by Vela 4B satellite 09 p1670 A70-23486

Supersonic transports bow and rear shock pressure jump lower bounds for various physical constraints 10 p1805 A70-24558

Rarefied hypersonic axisymmetric blunt body, examining bow shock and viscous layer upstream merging 10 p1804 A70-24823

Plasma density and velocity required for simulating solar wind flow over magnetosphere /bow shock/ in plasma wind tunnel 11 p2032 A70-26372

Fast time-resolved spectra of earth bow shock electrostatic turbulence based on broadband analog electric data fromOGO-5 13 p2396 A70-29111

Electron and positive ion velocity distributions measurements near earth bow shock by electrostatic analyzer on Vela 4B satellite 13 p2481 A70-30068

Bow shock associated hydromagnetic waves generation in upstream interplanetary medium, constructing model in terms of ion cyclotron resonance 14 p2631 A70-30359

Solar wind interaction with planetary ionosphere, considering flow behavior across bow MHD shock 14 p2647 A70-31073

Supersonic transport sonic boom theory and effect reduction, discussing Whitham rule, bow shock, overpressure, engine and aircraft design and shock wave control 16 p2843 A70-34263

Electrostatic turbulence in bow shock magnetic structures observed byOGO 5, explaining turbulence as ion acoustic or Buneman mode due to two stream instability

18 p3311 A70-36006

Plasma properties across bow shock and in magnetosheath as function of supersonic solar wind

19 p3494 A70-37481

Solar energetic charged particles interaction with earth bow shock and magnetopause

19 p3494 A70-37482

Magnetic and electric field changes across earth bow shock and magnetosheath, discussing Pioneer 8 andOGO-5 data

19 p3494 A70-37483

Wedge angle large amplitude slow oscillations in hypersonic and supersonic flows, examining attached bow shock

20 p3559 A70-40288

Magnetosheath turbulence generation by hydromagnetic waves amplification carried by solar wind through earth bowshock, computing refracted and incident energy fluxes ratio

21 p3815 A70-41059

Inner magnetosheath large amplitude hydromagnetic waves, discussing power spectrum, earth bow shock and solar wind

21 p3816 A70-41083

Turbulent collisionless plasma shocks formation, wave front steepness and explanation for earth bow shock

23 p4225 A70-44183

BOX BEAMS

Aircraft wing box beams bending tests to failure loads, considering crushing pressure, bulkhead flexural deformation, structure initial imperfections and instability phenomena [ICAS PAPER 70-33]

23 p4267 A70-44103

Rumanian book on torsion in thin walled elastic structures of various cross sections covering calculation methods for box beams, cylindrical and conical shells, aircraft wings, etc

24 p4418 A70-45147

BRADYCARDIA

Artificially induced heart rate changes effect on atrial circumference and pressure in anesthetized cats, showing increase with tachycardia and bradycardia

01 p0017 A70-10473

Ventricular ectopic beats and bradyarrhythmia associated with myocardial infarction, discussing enhanced automaticity, reentry activity, drugs and heart pacing

06 p0998 A70-18407

Bradycardic rhythms in acute myocardial infarction, investigating pathophysiologic, hemodynamic and electrophysiologic aspects and ECG interpretation

06 p0998 A70-18408

Heart rhythm disorders among flying personnel, noting occurrence frequency of sinus bradycardia and arrhythmia

12 p2180 A70-28362

BRAGG ANGLE

Ultrasonic imaging of internal structure by Bragg diffraction, noting reflection and dark field extension and use for flaw detection and medical diagnostics

01 p0111 A70-10570

Aperture dissection scheme to reduce transit time of Bragg angle acousto-optical scanning of laser beam

05 p0860 A70-16657

Bragg reflecting crystals for spectroscopy and polarimetry in X ray astronomy

13 p2489 A70-28904

Laser Doppler heterodyning system for velocity measurements without directional ambiguity, employing incident beams of different frequencies through rotating diffraction grating or Bragg cell application

15 p2751 A70-31986

Integrated Bragg X ray scattering intensities for monatomic crystalline lattices, considering thermal diffuse component contribution

20 p3686 A70-39193

Acoustic Bragg diffraction for laser light deflection, solving high speed photography and holography motion problems [SMPT PREPRINT 5]

22 p4035 A70-43055

BRAIN

NT BRAIN STEM
NT CEREBELLUM
NT CEREBRAL CORTEX
NT CEREBRUM
NT HIPPOCAMPUS

Carbohydrate-phosphorus metabolites content in gophers brains under normal conditions during hypothermia and spontaneous warming at room temperature

01 p0012 A70-10055

Soviet collection of articles on problems of brain biochemistry, Volume 4

01 p0017 A70-10504

Nicotinamide adenine dinucleotide/NAD/ deamination and role of nicotinamide hypoxanthine dinucleotide/deamino-NAD/ in forming ammonia from amino acids in rats/rabbits brain and liver tissue

01 p0018 A70-10505

Indirect ADP deamination and reamination of corresponding deamino form of ionosine diphosphate in rabbit brain tissue

01 p0018 A70-10506

Glutamic and aspartic acid concentrations in brain tissue and incubation medium after adding gamma-aminobutyric acid

01 p0018 A70-10507

Glutamine deamidation enhancement by N-acetyl-L-aspartic acid addition to mitochondrial preparations of rabbit brain incubated in Tris buffer

01 p0018 A70-10508

Gamma-aminobutyric acid effect on oxidative phosphorylation of rabbit and rat brain mitochondria, noting dependence on ionic concentration, temperature and amount of additions

01 p0019 A70-10509

Gamma-aminobutyric acid influence on 5- hydroxytryptamine in rat brain after intraperitoneal administration

01 p0019 A70-10510

Metabolism and biological activity of urea, citrulline, arginosuccinic acid in organism ornithine cycle, discussing role in brain and liver

01 p0019 A70-10513

Polycythemia and hypercapnia effects on apparent oxygenation of rat brain during acute hypoxia by changes in creatine phosphate concentration and lactate/pyruvate ratio

02 p0232 A70-11717

Brain norepinephrine synthesis rate in gonadectomized and control rats treated with alpha-methyl paratyrosine

03 p0416 A70-12987

Noble gases breathing effects on free amino acid pool increase in rat brains, considering O mixtures with He, Ar and Ne

04 p0632 A70-15086

Tetrodotoxin /TTX/ effects on mammalian brain studied by introducing TTX into cat lateral geniculate body /LGB/, causing flash evoked potentials and visual cortex decrease

05 p0799 A70-16049

Hypothalamus influence on potentials and recovery cycles of mesencephalic reticular formation in response to sciatic nerve stimulation in anesthetized rabbits

07 p1204 A70-19138

Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation

07 p1208 A70-19505

Nucleic acid and protein synthesis dynamics in rat brain and heart during adaptation to high altitude hypoxia

07 p1209 A70-19518

Respiratory neurons pulsating activity in medulla oblongata of anesthetized cats during imposed rhythm

07 p1213 A70-19774

Respiratory neurons activity in respiratory center of medulla oblongata during suspension and forced recovery of respiratory motions

07 p1213 A70-19775

Visual perception of black-and-white photo in aerial photographic interpretation, examining processes in human brain

07 p1221 A70-19777

Adaptive reactions in thyroidectomized rats blood and brain during adaptation to hypoxia compared with intact animals

07 p1214 A70-19794

Oxygen uptake by brain as function of oxygen tension in rats using venous outflow method and blood gas analysis

08 p1446 A70-21436

Bioelectrical activity of brain during conditioned motor reflex system operation modes in response to stimulating light pulses

08 p1447 A70-21450

Time course of changes in rat brain norepinephrine levels after olfactory bulb lesions, discussing automatic and biological mechanisms

08 p1448 A70-21841

Neural information processing taking into account differences between living brain and artificial processor

09 p1617 A70-22496

Machine design similar to human brain for recognition and classification of information

09 p1641 A70-22708

Critical oxygen supply of cerebral mitochondria and intercapillary oxygen transport

10 p1821 A70-25080

Brain oxygen supply during cerebral edema, examining venous and arterial blood gases, circulation, oxygen uptake, blood volume and pressure and EEG

10 p1822 A70-25087

Anterior lobe role of brain limbic region in analysis of afferent pulses arising in receptors of respiratory system

11 p1987 A70-25942

Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation

11 p1987 A70-26104

Drosophila brain Circadian oscillation as gating device restricting emergence behavior of adult

11 p1989 A70-26661

Memory mechanisms of brain, discussing molecular physiology, information storage in living systems

12 p2168 A70-27278

Sleep biphasic paradoxical stage in cats, correlating brain structures electroencephalographic data with various somatic and vegetative signs

12 p2173 A70-28345

Sensory afterdischarge of human brain under light stimuli during sleep and wakefulness

12 p2173 A70-28354

Acceleration effects on Na, K, and pH in rabbits cerebrospinal fluid and cerebral blood

13 p2352 A70-29347

Portable autonomous EEG analyzer for processing brain biopotentials without use of computer hardware and qualified personnel

13 p2360 A70-29522

Epinephrine uptake and metabolic disposition in rat brain, determining pathways and turnover of endogenous brain hormone and enzymatic synthesis

14 p2536 A70-30348

Rats under constant environmental conditions exhibiting circadian rhythmicity in rate of bar pressing with hypothalamic and septal reinforcing brain electrical stimulation

14 p2539 A70-30986

Electrical potentials in response to auditory stimuli recorded in cat brains by averaging computer

15 p2685 A70-32831

Sodium oxybutyrate effects on brain tissue oxidation during hypoxia in mice

15 p2686 A70-32851

Noise bursts response of positive and inhibitory conditioned eyelid reflexes in cats brain, discussing auditory system function

15 p2687 A70-32871

Daily rhythm in accumulation of rat brain catecholamines synthesized from circulating tritiated tyrosine

16 p2848 A70-33096

Corpus callosum role in auditory information transmission between hemispheres in intact dogs

18 p3221 A70-37215

Human brain LF activity in visual evoked response, determining relationship to stimulation

19 p3360 A70-37846

Electroencephalography with automatic frequency analysis to simulate processes involving brain self regulation

19 p3370 A70-38218

Acetylcholinesterase and simple esterases distribution in squirrel monkey brain, examining activity in neopile and postrema area neurons

20 p3569 A70-38993

Rats brain oxygenation during hyperventilation with air or oxygen-nitrogen mixture, measuring creatine phosphate concentration and lactate/pyruvate ratio

21 p3762 A70-41225

L-dihydroxyphenylalanine intraperitoneal injection effect on S-adenosylmethionine concentration in rat brain

21 p3764 A70-41269

Model for human brain visual information processing networks, considering visual search, selection, storage, correlation, recognition and recall functions

22 p3977 A70-42287

Blood-brain and blood-cerebrospinal fluid barriers alterations under various physical environments in manned orbital laboratory

22 p3973 A70-43647

Biocybernetics of human central nervous system, discussing electronic computers analogy to human brain

23 p4145 A70-44222

Amino acids L-glutamate and gamma-aminobutyric acid as communication agents in brain

23 p4148 A70-44864

Respiration rhythm mechanism from medulla oblongata electric shock stimulation in cats, considering inspiration-expiration phase shift relation to neuron fatigue

24 p4297 A70-45493

BRAIN CIRCULATION

Vestibular analyzer stimulation effects on cerebral blood circulation in humans during angular acceleration using rheoencephalography

03 p0422 A70-13692

Acceleration component in pelvis to head direction found influencing hyperemia of brain at various g forces

04 p0630 A70-14579

Cerebrum hyperemia of dogs subjected to craniocerebral hyperthermia, recording rheoencephalograms by occipitofrontal needle electrodes

07 p1207 A70-19473

Intracerebral, peripheral and central blood circulation relationship in humans during transverse accelerations

07 p1209 A70-19520

Human central nervous system changes during hypodynamia, noting unidirectional shifts in brain

- hemodynamics, rheographic wave propagation time reduction, etc 10 p1815 A70-24680
 - Brain oxygen supply during cerebral edema, examining venous and arterial blood gases, circulation, oxygen uptake, blood volume and pressure and EEG 10 p1822 A70-25087
 - Brain tussular respiration and oxygen consumption in rats during hypothermia 12 p2168 A70-27345
 - Perivascular pH influence on arteriolar diameter on brain surface of anesthetized rats and cats by micropipette technique 12 p2168 A70-27623
 - Cerebral circulatory reactions of smokers and non-smokers exposed to altitude, measuring vasomotor, blood flow and cardiac frequency indexes using scalp electrodes 12 p2172 A70-28042
 - Capillary details in lentiform nucleus region of human brains, measuring blood vessels diameters, lengths and densities 12 p2173 A70-28347
 - Positive pressure breathing effects on cerebral blood pressure and catecholamine content of hypothalamus and adrenal glands in dogs 16 p2849 A70-33997
 - Space flight effects on dogs cardiac activity, brain circulation and systemic-tissue circulation interactions 22 p3972 A70-43635
 - Oxidative phosphorylation and oxygen intake during circulatory hypoxia in mitochondria of liver and brain in rats subjected to acute ischemia 23 p4145 A70-44315
 - Regional cerebral cortical blood flow measurement, using heat clearance thermistor probe 23 p4157 A70-45082
 - Vasodilating carbon dioxide effect on brain circulation in occipital cortical area in cats and rabbits using thermoelectric method 24 p4300 A70-45842
- BRAIN DAMAGE**
- Soviet book on higher cortical functions of man and disorders due to local brain injuries, describing methods for neuropsychological studies of motor functions 01 p0017 A70-10503
 - Oxygen tension and pressure effects on hyperbaric oxygenation induced depletion of brain norepinephrine and 5-hydroxytryptamine in mice 02 p0235 A70-11992
 - Glycogen accumulation in astroglia following brain trauma caused by partial transection of cerebral hemisphere in rats 09 p1620 A70-22898
 - High risk factors for posttraumatic epilepsy /head injury complicated by subdural hematoma and spike EEG abnormality/ precluding return to flying 09 p1622 A70-23470
 - Skin galvanic reaction manifestation degree correlated to EEG changes accompanying injuries of human brain limbic structures 11 p1985 A70-25400
 - Centrifuging as therapeutic device tested on male assault victim with bullet fragment floating freely in brain ventricular system 11 p1993 A70-26523
 - Ionizing X radiation influence in lethal and sublethal doses on cerebral hyaluronic acid in mice and guinea pigs 14 p2536 A70-30186
 - Balloon-borne monkeys possible brain damage due to cosmic rays, discussing thindown tracks and acute vasculitis 21 p3764 A70-41476
 - Forebrain participation in motor response suppression reaction during stimulation of caudate nucleus in rats and cats, noting brain damage effects 24 p4299 A70-45836
 - Pathways of short latency reticulo-cortical responses to thalamic nuclei and hypothalamus destruction in cats 24 p4299 A70-45837
- BRAIN STEM**
- Time sense in human subjects kept in caisson or cave isolation determined as function of upper brain stem paraconsciousness 01 p0041 A70-11474
 - Arterial blood carbon dioxide tension effects on rhythmic volley activity of respiratory medulla oblongata neurons in cats 17 p3030 A70-33534
 - Visual cortical anomalous response to paired photic stimulus in rabbits with ablations in rostral part of brain stem 18 p3221 A70-37214
- BRAKES (FOR ARRESTING MOTION)**
- NT AERODYNAMIC BRAKES
- NT AIRCRAFT BRAKES
- NT BALLUTES
- NT DRAG CHUTES
- NT TRAILING-EDGE FLAPS
- NT WHEEL BRAKES
- NT WING FLAPS
- Air brake with compressed air fed bearings for testing small turbines, determining power and friction moment 08 p1481 A70-21188
 - Parachute decelerator system for 1975 Viking Mars Lander mission, discussing configuration selection, design factors, trajectory simulation, weight and mass analysis, etc 21 p3931 A70-41849
 - [AIAA PAPER 70-1162] Solid cloth personnel parachutes opening forces, discussing loading conditions, flight path shock parameters, mass ratio variations and elasticity of system 23 p4137 A70-43992
 - [AIAA PAPER 70-1167] Self stopping in involute gear mechanisms with external and internal gearing 07 p1290 A70-18818
 - Solar wind interaction with galactic cosmic radiation resulting in wind radial motion braking, discussing possible solar wind focusing 07 p1373 A70-20343
 - Accelerate-stop distance problem in takeoff refusal due to critical engine failure, emphasizing runway limited length hazards 08 p1436 A70-21270
 - Solid body control moments ensuring braking from rotational motion, finite orientation and angular velocity under minimum energy constraint 11 p2023 A70-25609
 - Spacecraft optimal impulsive braking by onboard engine to ensure maximum angle of atmospheric reentry 12 p2310 A70-28253
 - C-5A aircraft six wheel main landing gear bogie pitching control, emphasizing braking torque compensating mechanism design 17 p3020 A70-35826
 - [AIAA PAPER 70-914] Amplitude-phase characteristics of relay slave mechanisms with AC and DC motors under dynamic braking, using harmonic linearization 22 p4002 A70-42842
- BRANCHING (MATHEMATICS)**
- Soviet monograph on branching theory of nonlinear equations, covering solutions with analytical operators dependent on numerical or functional parameters 06 p1093 A70-17412
 - Nonlinear branching point problems in fluid mechanics using perturbation technique 14 p2565 A70-30471
- BRANCHING (PHYSICS)**
- Spheroidal wave function theory, calculating eigenvalues with branch points for propagation constants complex values 24 p4315 A70-46134
- BRASSES**
- Mechanical responses and residual defect structures in brass and stainless steel following explosive shock loading and cold reduction by rolling 03 p0507 A70-13139
 - Metal fiber multiple necking effect on uniaxial metal matrix composites ductility and plastic deformation behavior for brass-W model system 15 p2761 A70-32378
- BRAYTON CYCLE**
- Rankine cycle technology concerning high temperature, refractory alloy and liquid metal experience, showing applicability to nuclear Brayton and thermionic power systems 02 p0229 A70-12513
 - Brayton cycle electric power generator simulation to study turbomachinery startup 03 p0415 A70-14050
 - Brayton, Hg, organic-Rankine and potassium-Rankine dynamic space power systems for use with nuclear energy sources 13 p2450 A70-29492
 - Radiant gas heater for Brayton cycle space power system 18 p3303 A70-36834
 - [ASME PAPER 70-GT-36] Brayton cycles in gas turbines, investigating intercooling or reheat and pressure ratio proportioning influence on efficiency and specific work 18 p3304 A70-36856

- BRAZIL**
- NT LOW TEMPERATURE BRAZING
- NT ULTRASONIC SOLDERING
- Ta-V-Cb and Ta-V-Ti alloys used as brazing fillers for refractory metals bonding, noting wetting and flow characteristics, shear strength, remelt temperatures, etc 02 p0319 A70-12753
- BREATHING APPARATUS**
- Brazing time and temperature effect on depth of Ag based brazing alloys penetration into thin Ti-Al-V sheet substantiated by microprobe analysis 06 p1078 A70-18513
 - Joint design for braze bonding and joining of Al-B composites using Borsic tape backed with alloy brazing foil 07 p1293 A70-18994
 - Metal matrix fiber reinforced materials bonding, discussing brazing and fusion and diffusion welding [ASM PAPER W9-23.2] 09 p1690 A70-22557
 - Dip brazing aluminum fan vanes used in high bypass turbofan jet engines 10 p1893 A70-23858
 - Book on metal joining techniques covering various welding and brazing processes 11 p2061 A70-26599
 - Vacuum brazed stainless steel hot gas actuators for guided weapons 18 p3265 A70-37202
- BREAKAWAY**
- U BOUNDARY LAYER SEPARATION
- BREAKDOWN**
- Breakdown of cryptocyanine dye in methanol solution by ruby laser pulses providing passive Q switching mechanism 06 p1083 A70-18524
 - Pulse duration and beam diameter effects on threshold energy density in laser induced transparent dielectric breakdown 13 p2428 A70-29382
 - Threshold light flux densities for thin Al film breakdown by laser radiation 13 p2428 A70-29383
 - Hydrodynamic lubrication film breakdown in cold strip rolling, showing thickness consistency with critical value of modified Sommerfeld number 21 p3833 A70-41256
 - Secondary breakdown meter for semiconductor diodes and transistors with reverse base drive, utilizing I-V characteristics and voltage waveform 21 p3801 A70-42248
 - Breakdown mechanism in Q switched ruby laser triggered spark gap, noting pulse duration and power peak 22 p4049 A70-42352
 - Prebreakdown ionization growth in gases based on initial photocurrents production from high voltage uniform field electrodes 22 p4026 A70-42353
- BREAKERS (ELECTRIC)**
- U CIRCUIT BREAKERS
- BREATHING**
- Endtidal oxygen and carbon dioxide partial pressures, oxygen uptake and carbon dioxide after apnea and during apneic diving 02 p0235 A70-12089
 - Airway resistance effect on ventilation and gas exchange during exercise, discussing minute volume and work of breathing response 03 p0429 A70-14157
 - Inhalation in functional respiratory exploration, describing equipment for aerosol volume measurement in contact with bronchopulmonary effectors 14 p2541 A70-30377
 - Pursed lips breathing effects on ventilation and blood gas exchange in patients with chronic airway obstruction 15 p2684 A70-32538
 - Diaphragmatic muscle reactions and pneumogram changes in rats immediately after air passage obstruction 19 p3360 A70-37804
 - Human sensory perception associated with breathing, comparing physical stimulus intensity with judgement of magnitude 19 p3365 A70-38370
 - Vagus nerve blockage effect on arterial carbon dioxide tension and breathing regulation in dogs 24 p4303 A70-46112
 - Excised perfused dog lungs stratified dead space changes due to transpulmonary pressure and breathing frequency increase, considering pulmonary circulation 24 p4303 A70-46114
- BREATHING APPARATUS**
- NT OXYGEN MASKS
- Dynamic testing instrumentation for oxygen breathing equipment emphasizing demand regulators and masks, connecting hose, helmets and individual components 01 p0041 A70-11458
 - Open loop portable life support system containing light breathing vest within space suit 05 p0806 A70-16123
 - Breathing valve with reduced air resistances based on aerodynamic principles 06 p1000 A70-17433
 - Metabolic Rate Monitor for measuring continuous oxygen consumption during changes in work in real time 15 p2741 A70-32540

BRECCIA

Apollo 11 lunar rocks, breccias, dust and chip mineralogy and petrology, examining composition, texture, grain size and morphologies

21 p3896 A70-41511

Apollo 11 lunar soil and breccia shock metamorphism, examining plastic deformation structures in plagioclase, pyroxene and olivine

21 p3897 A70-41520

Petrography and shock vaporization origin of Apollo 11 lunar breccias and glasses compared to terrestrial impactites and chondrites

21 p3898 A70-41524

Lunar breccia and fine sample metal particles, using optical and scanning electron microscopy and electron probe microanalysis

21 p3899 A70-41529

Apollo 11 lunar rock lavas and breccias, examining opaque minerals and olivine by reflection microscopy, electron probe and optical absorption measurements

21 p3899 A70-41530

Glass spherule lunar particles and breccia from Apollo 11 site, showing passage through impact generated cloud of hot fragmental material

21 p3901 A70-41541

Shock metamorphism in lunar microbreccias and loose regolith materials, assuming crater formation by meteorite impacts

21 p3902 A70-41551

Rare gas analysis of Apollo 11 lunar soil and breccia for surface layer history

21 p3906 A70-41571

Chemical analysis for Li, Na, K, Rb, Cs, Ca, Sr and Ba in achondrites and Apollo 11 lunar rocks, breccia and soil samples

21 p3910 A70-41611

Apollo 11 lunar dust and breccia micromorphology and surface characteristics implying weathering processes

21 p3910 A70-41622

Apollo 11 type C breccia sample remanent magnetism, observing viscous component with several hours time constant

21 p3914 A70-41651

Mossbauer spectra of Apollo 11 lunar fines and microbreccia, showing iron oxidation, site symmetry and magnetic state

21 p3915 A70-41657

Magnetic properties of Apollo 11 lunar breccia samples, determining natural remanent magnetization and susceptibility via paleomagnetism instruments and methods

21 p3916 A70-41668

Apollo 11 lunar crystalline rock and breccias petrography and luminescent properties, spectral analysis, color, emission bands and shock effects

21 p3918 A70-41678

Apollo 11 lunar crystalline rock, microbreccia and fines compressibilities at room temperature, loading-unloading and pressure volume curves

21 p3918 A70-41679

Apollo 11 lunar breccia and fines magnetic properties, examining remanence, composition, oxidation, volcanic activity and stoichiometry

21 p3918 A70-41680

BRECCIES

U CLOSURES

BREMSSTRAHLUNG

Semiconductor laser excitation by bremsstrahlung from electrons and gamma radiation from nuclear reactor

01 p0107 A70-10187

Bremsstrahlung radiation in intense magnetic fields rejected for pulsar radiation mechanism

01 p0169 A70-10344

Electromagnetic showers fluctuations produced by electrons and photons in heavy materials, determining moments of particle numbers and bremsstrahlung differential cross sections

01 p0171 A70-11026

Directional and spectral characteristics of bremsstrahlung X rays from auroral arc in low energy range during cosmic rays sounding rocket measurements

02 p0357 A70-12069

Bremsstrahlung emission from thermal plasma coexisting with relativistic electron tails, noting enhancement at electron plasma frequency harmonics

02 p0348 A70-12240

Electron-electron and electron-atom bremsstrahlung, giving graphical expressions for one and two electron atoms cross sections

04 p0721 A70-14667

Critique of paper on transverse enhanced bremsstrahlung from supraluminous and subluminal longitudinal waves in isotropic homogeneous plasma

04 p0728 A70-15006

Gamma rays due to cosmic ray electrons bremsstrahlung in interstellar medium, predicting diffuse galactic X ray flux

04 p0742 A70-15713

Hard electron bremsstrahlung measurement during intense polar aurorae in January and February 1968, determining electron flux penetration region

04 p0682 A70-15731

Astrophysical plasmas radio emission interpreted as collective bremsstrahlung due to ultrarelativistic electron tails, discussing Crab Nebula, quasars and Jupiter

05 p0904 A70-16932

Electron bremsstrahlung in intense magnetic fields calculated for emission rate and absorption coefficient in large quantum number limits

06 p1104 A70-17182

Cosmic X ray source spectra possibly due to plasma bremsstrahlung

07 p1368 A70-19700

Photon bremsstrahlung from relativistic hydrogen plasma determined by studying electron-positron pairing effect on plasma radiation intensity

09 p1735 A70-22986

Bremsstrahlung radiation in intense magnetic field proposed as emission mechanism from pulsars, discussing absorption coefficient

11 p2104 A70-25697

Bremsstrahlung radiation emitted from homogeneous, field free, nonrelativistic plasma, deriving formulas

13 p2456 A70-28500

Hard electron bremsstrahlung measurement during intense polar aurorae in January and February 1968, determining electron flux penetration region

14 p2575 A70-30816

Daytime auroral zone electron precipitation energy spectrum from atmospheric bremsstrahlung X ray balloon data

14 p2580 A70-31257

High energy electron temperature in beam plasma discharge pulsed laser measured by bremsstrahlung X radiation spectrum

15 p2752 A70-32194

Gravitational bremsstrahlung for small mass with relativistic velocity passing large mass in unbound trajectory, calculating energy flux of emitted waves

17 p3136 A70-34596

Bremsstrahlung from weakly ionized plasma, discussing emission and absorption characteristics, electron-atom collisions and dispersive effects

18 p3294 A70-36347

Neutrino production by synchrotron process /magnetic bremsstrahlung/ in relativistic electron gas under intense magnetic field

20 p3695 A70-39050

Bremsstrahlung and photoneutrons from electron-photon cascades in thick tungsten and tantalum targets bombarded with low energy electrons

20 p3674 A70-39222

Sco X-1 radio emission models, considering possible binary nature and thermal bremsstrahlung

21 p3875 A70-40685

Innerbremsstrahlung of intergalactic protons colliding with electrons as source of cosmic background X rays, interpreting intensity and energy spectrum

21 p3877 A70-40700

Diffuse X rays from nonthermal intergalactic bremsstrahlung, discussing cosmic ray injection models

21 p3878 A70-40705

Nonrelativistic electron bremsstrahlung in dense plasma with strong magnetic field

21 p3855 A70-40721

Electrons optical scale time averaged motion dependence in focused laser beam on light intensity gradient, calculating bremsstrahlung spectrum

21 p3836 A70-40723

Particle acceleration phase in solar flare development, discussing H alpha maximum, hard X ray burst and bremsstrahlung

21 p3880 A70-40971

Angular distribution of thick target bremsstrahlung produced by electron bombardment of Be, Sn and Au surfaces

21 p3854 A70-42020

Galactic X ray background due to inner bremsstrahlung associated with suprathermal particles, taking into account interstellar gas self absorption and ionization rate

22 p4093 A70-42465

Ionospheric bremsstrahlung X ray flux and ionization rate, considering electron-atom and electron-ion collisions as function of altitude

22 p4095 A70-43293

Bremsstrahlung X rays caused by energetic electrons precipitating into upper atmosphere, calculating photoionization rate as function of altitude

22 p4096 A70-43310

Plasmas kinetic theory, considering crossing from instability to stability, waves decay by collisional damping and emission by bremsstrahlung

23 p4224 A70-44178

Fluoroscopes for radiographic examination of materials and products with X ray and hard bremsstrahlung radiation

24 p4348 A70-45847

BREWSTER ANGLE

Longitudinal magnetic field effect on output power and emission polarization of CW Ar laser employing Brewster windows

03 p0500 A70-13529

Ice radiation and reflection characteristics in IR spectral region at certain Brewster angles

14 p2568 A70-30133

Triangular ring laser polarization, using discharge tube with Brewster angle windows in optical circuit

20 p3639 A70-39084

BRIGHTNESS

Current dependence of integral brightness and electroluminescence spectrum of ZnS-GaAs heterojunctions obtained by I vapor reaction in H flow

01 p0155 A70-10142

Near limb solar IR brightness distribution observed during total solar eclipse of 12 November 1966 in Argentina by sounding rocket photometers

01 p0186 A70-11271

Thermodynamic aspects of ray invariance of spectral brightness ratio to square of local index of refraction compared to black body power radiation

01 p0144 A70-11293

Satellite rotation periods determination accuracy from photometric observation data improved by determining initial and terminal moments of maximum brightness

02 p0255 A70-11769

Aerosol size distribution from data on atmospheric spectral transmittance and solar corona brightness spectral and angular variations

02 p0292 A70-12434

Jupiter radio telescope observations at cm wavelengths, describing radiation belt emission characteristics and planetary brightness temperature spectrum

03 p0565 A70-13233

Brightness distribution over source, discussing regularization algorithms for radio astronomical data reduction from crossed telescope

05 p0917 A70-16902

Radio brightness distribution observation over Venus disk, investigating absorption of millimeter radio emission of hot surface by planetary atmosphere

06 p1141 A70-17801

Particles and surface brightness distributions in nonionized cometary tails, considering near nucleus source and particle acceleration

07 p1378 A70-19035

Source power molecule lifetime, acceleration and particle velocity in region near comet nucleus determined from brightness

07 p1378 A70-19036

Surface brightness distribution in comet head investigated photometrically

07 p1379 A70-19038

Kilston comet 1966b brightness correlated with solar flares occurrence

07 p1379 A70-19041

Correlation function prediction of rapid brightness variations in quasar based on variable optical emission model including flares

07 p1383 A70-19403

Mars planet smoothing factor determined from phase curve of integrated brightness distribution on disk

08 p1564 A70-20557

Brightness distribution of spectroheliograms in metal lines reflecting velocity field structure in photosphere

08 p1570 A70-20839

Darkening and brightening of disturbed spot on sun surface determined by abnormal stress in seen layers due to magnetic and velocity fields

08 p1570 A70-20903

Meteors spectral intensity variations along flight path noting color dependence on brightness

08 p1572 A70-20946

Radio sources model brightness distribution and internal magnetic fields deduced from long baseline interferometer observation data

08 p1577 A70-21491

Jupiter radio telescope observations at cm wavelengths, describing radiation belt emission characteristics and planetary brightness temperature spectrum

08 p1580 A70-21666

Hydroxyl emission during auroras, noting absence of correlation with O I brightness fluctuations for IBC II-III aurora of 1 November 1968

09 p1671 A70-23496

Spectral, angular and spatial evolution of earth twilight aureole brightness pattern from visual observation and spectrophotometry on Soyuz 5 spacecraft

10 p1873 A70-24270

Autocorrelation and brightness distribution functions for irregular variable star

11 p2115 A70-26579

Mars and Venus radio temperature measurements by 210 ft telescope, obtaining effective brightness

12 p2309 A70-27896

Brightness temperature of earth atmospheric emission in submillimeter band at 35 km, describing airborne radiometer

12 p2265 A70-28171

Mars border-disk brightness comparison noting atmospheric transparency effects

12 p2311 A70-28303

- Radio brightness distribution observation over Venus disk, investigating absorption of millimeter radio emission of hot surface by planetary atmosphere 13 p2487 A70-28651
- Absolute magnitudes of first brightest galaxies in rich clusters from luminosity model, allowing for mass variation 13 p2495 A70-29795
- Solar magnetic and brightness fields simultaneous measurement by multiimage spectroheliograph 13 p2496 A70-29844
- Solar limb integrated brightness distribution in continuous spectrum during 20 May 1966 solar eclipse 13 p2498 A70-30003
- Mercury mm wave observations, examining longitude dependence of disk average brightness temperature and epilith thermal parameters range 14 p2467 A70-31076
- Lunar occultation observation of Jupiter by radio telescope, determining one dimensional strip brightness distribution 14 p2648 A70-31086
- Clouds and precipitations radio brightness temperature contrasts taking into account underlying surface humidity 15 p2771 A70-32070
- Mars planet smoothing factor determined from phase curve of integrated brightness distribution 15 p2805 A70-32712
- Meteors spectral intensity variations along flight path noting color dependence on brightness 15 p2806 A70-32758
- Balloon satellites brightness change from rotation effects, analyzing light curves 16 p2980 A70-34317
- Cloud brightness as function of illumination and underlying surface conditions, relating macrooptical parameters and microstructure 18 p3284 A70-36628
- Brightness field spatial structure of solar radiation reflected from earth by Cosmos 149 satellite, discussing homogeneity and isotropy 18 p3247 A70-36629
- Ascending long wave radiation brightness from aircraft measurements, observing angular distribution dependence on atmospheric stratification 18 p3287 A70-36970
- Mercury photometric measurement, examining surface brightness for photometric function 18 p3319 A70-37052
- Observed meteor brightness curve shortening with respect to theoretical curves 19 p3514 A70-37645
- Lunar maria distribution, explaining origin and characteristics by surface brightness 19 p3517 A70-37987
- Solid state laser with transverse mode selection to increase brightness, discussing plano-concave resonator 19 p3447 A70-38508
- Soviet book on brightness of irregular and semiregular variable stars by statistical methods 20 p3705 A70-39899
- Holographic exposure and reconstruction processes, considering illumination beam polarization effects on image brightness 22 p4040 A70-43616
- Pluto albedo at various wavelengths from spectrophotometric measurements 24 p4399 A70-45129
- Coherent motion effects on brightness of clouds moving above photosphere, describing H alpha Doppler brightening and Lyman alpha Doppler dimming in solar prominences 24 p4400 A70-45313
- BRIGHTNESS DISCRIMINATION**
- Binocular brightness mixing and autocorrelation function, discussing mathematical model, computer simulation and test results 01 p0025 A70-11053
- Human eye image accumulation effect and meteor brightness estimation dependence on angular velocity based on visual and telescopic observations 03 p0569 A70-13358
- Human eye image accumulation effect and meteor brightness estimation dependence on angular velocity based on visual and telescopic observations 11 p2118 A70-26723
- Optimal spatial discretization and brightness quantization of graphical symbols for pattern recognition, considering illumination and reflection coefficient 14 p2553 A70-30423
- Planetary surface smoothness factor by disk brightness, Mars red light and phase curves methods, indicating superiority of visual observation 18 p3315 A70-36602
- Brightness contrast by human observer binocular matching, discussing neural networks models 19 p3366 A70-38924
- Plate illumination relation to opacity in photometry and spectrophotometry, using digital techniques 20 p3630 A70-39475
- Bilateral cortical cerebellar hemispheric ablations effect on feline light-dark discrimination learning 21 p3762 A70-41142

BRIGHTNESS TEMPERATURE

- X ray differential drift scans of moon, measuring cold limb brightness temperature and temperature distribution 16 p2974 A70-33646
- Radio observations of chromospheric brightness temperature distribution during solar eclipse of March 1970 16 p2977 A70-33846
- IR radiometer for Mariner Mars 1971 project providing surface brightness temperatures 16 p2913 A70-34028
- Hour-angle and declination center-to-limb profiles of quiet sun 3.3mm brightness temperature distribution 17 p3174 A70-35868
- Planetary nebula NGC 7027 radio component, determining brightness temperature from fringe amplitude 18 p3313 A70-36327
- Spectrophotometric solar brightness temperature measurements in far IR, discussing collision type spectral variation of absorption coefficient 18 p3319 A70-37056
- Venus lower atmosphere structure and brightness temperature spectrum analysis for composition, temperature and pressure profiles 18 p3323 A70-37139
- Milky way galactic plane corrugation, discussing maximum hydrogen brightness temperature oscillating in sinusoidal pattern 18 p3328 A70-37167
- Night airglow hydroxyl rotational brightness temperature determined from emission spectra 19 p3412 A70-37777
- Temperature and radio brightness distributions in active regions and upper chromosphere during minimum activity periods 19 p3522 A70-38557
- Passive microwave sensors based on brightness temperature vs frequency model for various atmospheric conditions, presenting vegetation pictures 20 p3626 A70-39054
- Solar equatorial limb brightening at quiet sun from solar disk scanning statistical analysis 20 p3712 A70-40418
- Comet Schwassmann-Wachmann I brightness variations due to interplanetary shock waves in solar wind 22 p4097 A70-42475
- High speed plasma jet propagation, obtaining time of arrival measurements, brightness temperature, pressure and impact data 22 p4012 A70-43014
- Spectral brightness temperature, directional emissivity and surface temperature of earth from remote radiance observations by balloon-borne multidetector grating spectrometer 23 p4194 A70-44035
- Quiet sun and new moon brightness temperature measurements at 3.3 and 5.7 mm wavelengths, giving radiometric maps 23 p4241 A70-44254
- Uranus and Neptune millimeter wave observations, showing brightness temperatures in excess of black body equilibrium temperatures derived from solar heating 24 p4403 A70-45398
- BRILLOUIN EFFECT**
- Brillouin scattering of hypersonic waves produced in liquid medium, using He-Ne laser light source 02 p0313 A70-12471
- Satellite lines from diffraction grating observed by densitometer tracings of plates connected with optical mixing in stimulated Brillouin scattering 04 p0701 A70-15030
- Sound wave velocity and damping in liquid N measured along saturated vapor line using thermal Brillouin scattering techniques 06 p1105 A70-17491
- Acoustic velocity in rarefied argon and nitrogen using Brillouin scatter and Burnett equations 09 p1698 A70-23314
- Waveguide windows for energy outlet in microwave devices analyzed by plane /Brillouin/ modes, discussing dielectric element reflection coefficient 09 p1651 A70-23646
- Stimulated Mandelstam-Brillouin scattering and fracture of molten quartz and silicate glasses produced by laser giant pulse 11 p2061 A70-25380
- Stimulated Mandelstam-Brillouin and entropy backscattering of light pulses, determining intensity and spectral distribution allowing for fluctuations in medium 12 p2248 A70-27550
- Hypersonic sound speeds measured in methane at moderate pressures by spontaneous Brillouin light scattering experiments 21 p3830 A70-41938
- Brillouin effect lines shape dependence on analogous acoustical waves temporal and spatial coherence 21 p3839 A70-42100
- Threshold parameters of liquid and gaseous helium breakdown caused by ruby laser beam, noting Mandelstam-Brillouin scattering in liquid phase 22 p4051 A70-43465

BRILLOUIN ZONES

- Forbidden bandwidth in Brillouin zone and valence band spin-orbital splitting degree determined for mixed gallium-phosphide-arsenide 06 p1126 A70-17815
- Band structure of Brillouin zone and electronic states on pure and contaminated crystal surface 15 p2786 A70-32767
- Thermoelectric power and Hall effect quantum resonances in graphite for locating majority carrier electron and hole Fermi Surfaces in Brillouin zone 24 p4389 A70-45597
- BRITISH AIRCRAFT CORP AIRCRAFT**
- U BAC AIRCRAFT**
- BRITTLENESS**
- Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium 01 p0124 A70-11615
- Limiting equilibrium under axial tension of brittle body with parallel axisymmetric external cracks, studying critical load, crack propagation, etc 03 p0594 A70-13737
- Brittle fracture in neutron irradiated and nonirradiated Mo specimens tested in tension and compression at low temperature 03 p0513 A70-14013
- InAs-GaAs solid solutions microhardness and brittleness, studying chemical composition effects 04 p0730 A70-14464
- Fracture mechanical theory for crack propagation in brittle ceramics subjected to thermal shock, deriving crack stability criteria 04 p0767 A70-14505
- Erosion characteristics similarities and differences of brittle and ductile materials, noting dependence on particle velocity and diameter (ASME PAPER 69-WA/MET-7) 04 p0704 A70-14761
- Brittleness of joints using Ga solders prevention by high temperature annealing noting application to aluminum alloys 05 p0855 A70-16199
- Three dimensional brittle body limiting axisymmetric stability under tensile stresses and weakened by ring shaped cracks, determining critical tensile loads 05 p0945 A70-16855
- Impurities effect on grain boundaries composition and brittle fracture of metals 06 p1087 A70-17608
- Critical brittleness temperatures of low C steels determined to distinguish main failure types 06 p1166 A70-17655
- Dual model for describing brittleness and plasticity of solid elastic deformable body, formulating criteria for passage into inelastic state 06 p1166 A70-17656
- Critical stress-strain diagrams for brittle plate possessing notch-type stress raisers under biaxial tension 07 p1408 A70-19547
- Brittle failure mechanics application to steels sensitivity to rupture at low temperatures, discussing crack propagation resistance and heat treatment effect on impact toughness 09 p1768 A70-22076
- Quasi-brittle materials limit surface, approximating curve in deviator plane by second order curves leading to strength criteria 10 p1965 A70-25292
- Hollow cylindrical sample scale effect on accuracy of testing heat resistance of brittle materials 10 p1965 A70-25301
- Brittle fracture strength of welded joints in high strength steels 11 p2059 A70-25663
- Phenomenological properties of stress relief embrittlement in nickel steel, noting toughness recovery via retempering 11 p2059 A70-25665
- Interstitial and substitutional impurity effects on fracture strength, plastic properties and ductile-brittle transition temperature of vanadium determined from impact and tensile tests 11 p2066 A70-25913
- Hot shortness of molybdenum alloys under tensile testing due to molybdenum carbide precipitation on grain boundaries 11 p2066 A70-25914
- Critical loads for brittle bodies weakened by sharp holes under combined diffuse thermal fluxes and crack crossing 12 p0000 A70-28321
- Residual gas effects on critical load and brittleness of pure and molybdenum-coated niobium bars after annealing in vacuum 12 p2258 A70-28324
- Thin cut plate quasi-brittle breakdown under tensile stress, considering elastoplastic equilibrium under Tresca-St. Venant yield conditions 12 p2329 A70-28325
- Plastic deformation in brittle and ductile fracture, discussing elastoplastic stress analysis of cracked bodies, plane strain deformation near cracks, etc 13 p2509 A70-28601
- Niobium carbides formation in Nb containing steels during gamma-alpha transformation, establishing rela-

tionship between brittleness and carbide distribution characteristics

15 p2758 A70-32123

Curvilinear cracks development in flat brittle body under asymmetrical loads using small parameter method

15 p2817 A70-32165

Instrumented Charpy impact test evaluating strain rate, alloying and irradiation effects on ductile-brittle transition temperature and fracture of pressure vessel steels

15 p2820 A70-32239

Work to fracture measurements on brittle fiber ductile-matrix metal composites, using Charpy test

15 p2763 A70-32832

Weld brittleness during laser beam welding of Ni-Cu, Ni-Ti and Cu-Ti due to diffusion processes

16 p2916 A70-33052

Microscopic and macroscopic viewpoints of low temperature brittle fracture, noting Inglis, Griffith and Barenblatt theories

16 p2989 A70-33671

Unalloyed Ti hydrogen embrittlement, determining factors affecting brittle-ductile transition temperature

17 p3117 A70-34398

Cone crack closure in brittle solids, discussing optical and X ray studies on glass and silicon during unloading

17 p3183 A70-34621

Elastic crack structure, discussing formalism for force law between faces of brittle and semibrittle fractures

17 p3191 A70-35461

Hydrostatic pressurization effect on ductile-brittle transition temperature of polycrystalline chromium

18 p3274 A70-36053

Chemical composition selection for Ti alloys with low susceptibility to hydrogen induced brittleness

18 p3274 A70-36121

Brittle fibers strand strength as function of statistical distribution of limiting stresses

18 p3342 A70-36648

Nb effects on steel susceptibility to brittle fracture at various temperatures, discussing impact strength and nucleation energy of crack formation

19 p3453 A70-38709

Brittle failure under creep during slow cyclic loading, discussing damage accumulation assumptions

20 p3725 A70-39868

Brittle bodies with sharp pointed defects, constructing limiting equilibrium diagrams by stress concentration factor representations

20 p3733 A70-40393

Cracked brittle body limiting equilibrium, determining critical loads for two half spaces with various circular rib couplings

20 p3733 A70-40393

Intergranular brittleness in powder metallurgy W by Auger Electron Emission Spectroscopy for fracture surfaces chemical analysis

22 p4053 A70-42733

Ceramic composite materials structural application, improving brittleness and thermal shock resistance via reinforcing refractory fibers [ICAS PAPER 70-40]

23 p4267 A70-44138

Brittle fracture of welded notched steels with different stress concentrations, using subzero tensile tests

24 p4347 A70-45732

Precompression and pressurization effects on ductile-brittle transition of polycrystalline cast Cr, W and Mo bcc transition metals

24 p4365 A70-46371

BROADBAND

Small signal opto-electronic wideband transformer with coupling element ensuring fast response and low sensibility to parasitic magnetic fields

03 p0459 A70-14266

Broadband sound attenuation in soft walled /low acoustic impedance/ circular ducts found dependent on frequency

05 p0883 A70-16787

Antenna exciter of crossed radio telescope, discussing design, performance and increased wide band sensitivity

08 p1473 A70-21069

Five resonator broadband frequency doubler design using charge storage diodes

08 p1475 A70-21280

Broadband remote sensing magnetometer for measuring fast-rising pulsed magnetic fields

09 p1676 A70-22716

Probability of given configuration and statistical distribution of peaks between mean crossings of broadband locally stationary and Gaussian processes [ONERA-TP-806]

10 p1805 A70-24546

Wideband stochastic signals for radar range and velocity measurements using polarity coincidence correlation technique

12 p2188 A70-27942

Wideband pulse signal synthesis and optimal filtration by dispersive ultrasonic delay lines, estimating potential noise stability for analog data transmission

15 p2696 A70-31502

Unidirectional tear drop radiation Archimedean spiral broad band frequency independent antenna using printed circuit with cavity

21 p3801 A70-42246

Wideband TEM quarter wave microwave coupler with continuously variable coupling range, employing even and odd mode characteristic impedance levels change

24 p4318 A70-45215

BROADBAND AMPLIFIERS

Wideband HF amplifier development for ionospheric radio sounding, describing various stages

02 p0255 A70-11895

Wideband parametric and tunnel diode amplifiers synthesizing method for obtaining maximum flat amplitude frequency response

03 p0457 A70-13727

Transistorized wideband amplifiers synthesis by combining dynamic parameters method with poles and zeros method

05 p0819 A70-16249

Parasitic effects due to coupling of wideband regenerative amplifier with nonideal ferrite circulators to antenna feeder duct

08 p1468 A70-20575

Multipole coupling circuits for wideband radio amplifiers

08 p1474 A70-21225

Broadbanding method for microwave reflection type amplifiers using additional resonators

09 p1645 A70-22604

S band CW high power broadband power source consisting of transistor amplifier-driven varactor doubler chains in hybrid integrated form

10 p1846 A70-23885

Broad band power amplification with Gunn effect diodes, describing frequency response and saturation characteristics and FM/AM noise spectrum measurements for reflection amplifier in X band

10 p1847 A70-23886

Wideband transistorized DC amplifier circuit and operation for outputs of tensometers, thermoelectric, electrodynamic and resistance sensors

11 p2019 A70-26435

Equivalent circuits for transistors in class A amplification over wide frequency band

11 p2021 A70-26831

Maser amplifier with nonoriented Fe-doped rutile powder as active material, observing broad absorption bands under magnetic field

12 p2249 A70-27649

Broadband traveling wave masers bandwidth increased by staggering direct current magnetic field along active structure length

12 p2249 A70-27690

Single and multistage parametric amplifiers for broadband communications, noting nonideal circulator characteristics by scattering parameter and signal flow graph

12 p2197 A70-27933

Wideband high power output transistor amplifier design features and operational characteristics

12 p2199 A70-27980

Wideband microwave transistor IF amplifier for mm wave communication system

14 p2555 A70-30283

Computerized design of transistorized UHF wideband amplifier, using successive approximations for optimum circuit automatic selection

14 p2556 A70-30668

Low noise wideband amplifier design for Intelsat 3 satellite ground stations

16 p2877 A70-33415

Wideband UHF amplification in bulk n-type GaAs during domain generation, comparing cut-off and Gunn frequency

17 p3143 A70-35684

Computerized design of broadband microwave amplifiers with complex terminations, using transfer scattering parameters for analysis and optimization

24 p4316 A70-45211

BROADCASTING

TV broadcast satellite system operating with home receivers or special receivers, evaluating technological and cost factors [AIAA PAPER 68-1061]

01 p0044 A70-10831

Satellite TV broadcast requirements impact on high power transmitter design, permitting low cost terrestrial receiving systems [AIAA PAPER 70-434]

11 p1999 A70-25450

Wave polarization effects on ionospheric HF radio wave transmission and reception in communication and broadcasting networks

14 p2550 A70-30650

Mechanically despun multifrequency, attitude sensing antenna for spin stabilized spacecraft, deep space probes, tactical communications and community broadcast applications

16 p2986 A70-34159

Satellite broadcasting frequency resources, discussing interference, frequency sharing, antenna transmitting and receiving patterns, etc

17 p3046 A70-35271

Optimal receiving systems for satellite broadcasting, considering costs, power requirements, service area, etc

17 p3046 A70-35272

UN space committee discussion on rules governing direct TV broadcasting by satellite, taking into account frequency allocation, geostationary orbits, etc

17 p3201 A70-35779

International norms establishment for direct TV broadcast by satellites

17 p3201 A70-35780

Satellites for direct radio and TV broadcasting, considering system quality and cost, network planning, frequency economy, etc

20 p3588 A70-40158

BROMIDES

NT DIBROMIDES

NT HYDROBROMIDES

BROMINE

Diatomic Br molecular vibration-rotation coupling effects on energy transfer during Br-Br collisions, determining probability distributions

07 p1339 A70-20054

Scattering cross sections of K atoms on bromine molecules determined as function of particle energy using supersonic atomic beams

07 p1344 A70-20133

Ion production cross sections determined for alkali atoms and bromine molecules collisions, noting charge transfer

07 p1345 A70-20138

Vibrational relaxation time and transition probability in bromine collisions with He, Ne, Ar, Xe atoms determined by shock wave method

12 p2275 A70-27353

BROMINE COMPOUNDS

NT DIBROMIDES

NT HYDROBROMIDES

Tetrafluorodibromoethane combustion inhibitor effects on aircraft hydrocarbon fuels flame propagation rate and explosion pressure

01 p0160 A70-11011

Bromine monoxide formation by atomic oxygen-bromine reaction in flash photolysis of bromine-nitrogen oxide and bromine-nitrogen dioxide mixtures

08 p1455 A70-21342

BRONCHI

Flow profiles in models of human bronchial tree typical junctions, visualizing inspiration and expiration patterns for various Reynolds numbers

01 p0034 A70-10653

Human lung and upper airway pressure drop and fluid flow regime of inspired air

12 p2170 A70-27660

Surface active lipoproteids of lung, discussing quantitative determination and labeling on basis of per-bronchial wash-out procedure over trachea

15 p2680 A70-31725

BRONCHIAL TUBE

NT PHARYNX

NT TRACHEA

Electronic measurement of bronchial flow resistance in pulmonary function to determine impediment in inhaled and exhaled air passage

08 p1449 A70-20676

Resistance to two phase gas-liquid flow in airways simulating human bronchial tree

24 p4303 A70-46111

BRONZES

Thermal porous bronze screened microphones for noise measurements in medium under large heat flow

14 p2555 A70-30298

BROWNIAN MOVEMENTS

Aerosol particles Brownian motion under inertial forces in absence/presence of obstacle

01 p0143 A70-10997

Stochastic processes providing exposition of differential-integral calculus for Brownian motion paths, with applications to diffusion processes and related parabolic partial differential equations

01 p0133 A70-11322

Statistical decision problem of Brownian motion with moving boundaries in automatic daylight star tracker design for aircraft navigation solved by image method

01 p0139 A70-11635

Brownian motion for large viscosity, deriving modified Fokker-Planck equation based on quasi-Huygens relation

11 p2084 A70-26398

BRUSHES

Brush current collectors for strain measurements in rotating machine parts, discussing acceptance testing

11 p1983 A70-26438

Brush collector for strain measurement in jet engine compressor and turbine elements at high RPM

11 p1983 A70-26439

BUBBLE CHAMBERS

Hologram resolution and information storage along depth of reconstructed image related to maximum track density of bubble chamber

10 p1892 A70-25113

- High energy and contemporaneous cosmic ray tracks in bubble chamber picture noting evidence of quarks
12 p2276 A70-27997
- Bubble chamber photography and track image reconstruction by holography, discussing measurement apparatus, accuracy and tolerances
19 p3428 A70-38510
- Criticism of evidence for cosmic ray quark passage through low density bubble chamber
20 p3701 A70-40499
- BUBBLES**
- Organic liquid nucleate pool boiling experiments determining stresses, surface tension, viscosity and gravitation relationships to bubble shape and microlayer formation
01 p0218 A70-11180
- Microlayers evaporation contribution to vapor bubbles growth rate from heated wall in liquid near saturation temperature during nucleate pool boiling
01 p0218 A70-11181
- Heat transfer and flux density during bubble boiling of liquid oxygen employing simulated weak gravitational fields
03 p0605 A70-13393
- Gas bubble formation and equilibrium conditions in air supersaturated fuel stored under atmospheric pressure after injection into evacuated tank
03 p0605 A70-13394
- Sound wave propagation in liquid containing gas bubbles allowing for relative motion of bubbles and liquid, deriving steady shock wave structure
04 p0671 A70-14991
- Bubbles elimination in glass filament wound parts involving total or partial placement of production equipment and process in vacuum
05 p0856 A70-16825
- Time-temperature relation necessary to fine Libyan desert glass and remove gas bubbles calculated by viscosity determination at various temperatures
05 p0843 A70-16833
- Entropy fall in superheated liquid related to vapor bubble growth from finite so-called zero radius to critical radius, noting pressure effects
07 p1418 A70-18645
- Phase growth of free vapor bubbles in water, ethanol and isopropanol at uniform superheats under normal and zero gravity
07 p1418 A70-18646
- Gas bubbles formation in supersaturated solutions and body fluids during decompression
07 p1208 A70-19511
- Initial vapor bubble growth on horizontal heated wall during saturated nucleate boiling using combined streak and high speed frame photography
08 p1542 A70-21584
- Laminar separation bubble in incompressible flow produced on flat plate by pressure gradients, correlating bursting with Reynolds number and pressure distribution
09 p1660 A70-22770
- Vapor bubble separation diameter and flow in channel boiling applied to supercooled boiling zone determination
09 p1789 A70-23379
- Fluid material line growth in grid-generated isotropic turbulent flow measured by tagging lines with hydrogen bubbles
11 p2035 A70-25843
- Gas bubbles formation in supersaturated solutions and body fluids during decompression
11 p1988 A70-26110
- Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers
12 p2331 A70-27325
- Tribonucleation emphasizing viscosity-velocity product in gas nuclei formation and cavitation
12 p2170 A70-27661
- Bubble dynamics in subcooled nucleate boiling, deriving mathematical model based on evaporation-condensation mass transfer mechanism
12 p2333 A70-28113
- Bubbles, steady streaming and surface instability in vibrated liquid columns
14 p2663 A70-30255
- Air bubble breaking in blood and water flow passage of simulated cardiopulmonary bypass system with flow constriction
15 p2692 A70-32312
- Cavitation nuclei in liquids, discussing sources, stability and gas bubble growth
16 p2891 A70-33632
- Gas bubbles thermal rejection and formation in Ni electrodeposit during annealing over 200-1000 C range
18 p3272 A70-36039
- Lagrange equations for translational motion and diameter variation of bubble system moving in hydrostatic field, taking into account dissipative forces
18 p3240 A70-36270
- Oscillations of rigidly clamped elastic liquid filled hemispherical shell with gas bubble
18 p3242 A70-36583
- Erythrocyte suspension subjected to gas bubble ultrasonic oscillation, investigating hemolysis mechanism
20 p3573 A70-39981
- Bubble motion in ideal incompressible fluid, deriving motion equation in low viscosity fluid
20 p3614 A70-40392
- Bubble frequencies random distribution during boiling of pure liquids and binary liquid mixtures by optical measurement
21 p3941 A70-40775
- Vapor bubble response to sinusoidal pressure pulsation in water bulk and on metal wall
21 p3949 A70-41309
- Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers
21 p3952 A70-42066
- Surface tension role in microliquid layer formation on solid surface with growing bubble in nucleate boiling, using optical method
21 p3953 A70-42089
- Gas bubbles effect on recovery and recrystallization in W sheet deposited from tungsten fluoride vapor
24 p4358 A70-45243
- Shock wave structure calculation in liquids containing gas bubbles, taking into account compression wave steepening by convection
24 p4326 A70-45783
- BUCCANEER AIRCRAFT**
- Machine tools used in production of Hawker Siddeley Buccaneer low level strike and reconnaissance aircraft
09 p1691 A70-22608
- BUCKETS**
- Three dimensional boundary layer flow on rotating axial flow turbine buckets, determining velocity profiles
18 p3243 A70-36874
- [ASME PAPER 70-GT-59]
- BUCKLING**
- NT CREEP BUCKLING
- NT ELASTIC BUCKLING
- NT EULER BUCKLING
- NT THERMAL BUCKLING
- Thin flat plates effective width under axial edge compression slightly beyond buckling limit, solving von Karman differential equations
01 p0198 A70-10094
- Sandwich plates plastic buckling stability under uniaxial compressive loads from compressible theory viewpoint
01 p0204 A70-11137
- Static and cyclic stress distributions in buckling shear panel comprising flat plate of clad Cu-Al alloy
02 p0388 A70-12497
- Monograph on buckling and postbuckling behavior of plates tapered in planform, comparing stability of tapered and rectangular plates
03 p0586 A70-13002
- Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering Lure theory and variational principle for uniform compression load
03 p0589 A70-13336
- Far nonlinear postbuckling behavior of noncircular cylindrical shell under axial compression
03 p0598 A70-14241
- Tension field theory describing buckling of membranes or thin plates with boundaries subjected to excessive planar displacements
03 p0599 A70-14246
- Local buckling and failure of thin walled compression column with supported flanges, analyzing strength reduction by eccentricity
03 p0600 A70-14254
- Differential equations solution in terms of elementary functions applied to evaluate critical buckling loads for struts of variable cross sections
03 p0602 A70-14328
- Supercritical strains and buckling in rib-reinforced cylindrical shells under axial compression using strain-energy method
04 p0766 A70-14478
- Thin orthotropic composite circular cylindrical shells buckling under axial and radial loads, satisfying end boundary conditions for clamped and simply supported shells
04 p0771 A70-14910
- [ASME PAPER 69-WA/APM-21]
- Orthotropic axially compressed conical shell stability, evaluating lower critical load and postbuckling state
04 p0772 A70-14921
- Orthotropic sandwich cylinders buckling under axial compression, presenting linear theory approximate design equations
04 p0776 A70-15381
- Clamped and simply supported shallow spherical shells buckling using computer programs
04 p0778 A70-15555
- Circular cylindrical shells with axisymmetric imperfections tested under axial compressive load, studying imperfection amplitude and wavelength effects on minimum buckling load
04 p0778 A70-15588
- Buckling of toroidal shells with reasonably uniform thickness distribution manufactured by casting epoxy resin material
04 p0779 A70-15615
- Biaxial prebuckling loading effect on compliance tensor in plastic buckling of square plates analyzed by local strain statistical theory
05 p0925 A70-15790
- Energy method for analyzing rectangular panels buckling under nonuniform in-plane loading, considering stability under uniform compression
05 p0931 A70-16117
- Galerkin method to formulate buckling problem of homogeneous and fiber reinforced anisotropic plates simply supported under uniform membrane loads
06 p1160 A70-17313
- Stress and buckling measurement of shallow cylindrical steel shells linked to thin plate using resistant strain gauges and high precision indicators
06 p1167 A70-17866
- Nonlinear postbuckling equilibrium of thin cylindrical shell and axisymmetric buckling pressure of imperfect spherical shell calculated by Rayleigh-Ritz method
06 p1169 A70-18036
- [AIAA PAPER 70-102]
- Local axisymmetric dimple imperfection effects on buckling load of circular cylindrical shell under axial compression
06 p1170 A70-18167
- [AIAA PAPER 70-103]
- Buckling-critical composite shell structures, describing pseudo T-rib stiffening and integrated composite design concepts
06 p1171 A70-18235
- [AIAA PAPER 70-101]
- Buckling of clamped skew plates under uniform system of applied stress using Galerkin method
07 p1406 A70-19339
- Inextensional nonlinear theory of arches applied to analysis of hinged-hinged circular arches subjected to downward point load, calculating critical load value
07 p1408 A70-19561
- Buckling stress calculation and measurement in cylindrical fiberglass reinforced composite shells under axial pressure
07 p1409 A70-19756
- Circular cylindrical shells buckling under lateral and hydrostatic pressure using Donnell and Flugge equations, assuming membrane stress state for prebuckling deformation
07 p1414 A70-20168
- Truncated conical shells buckling under hydrostatic pressure using Donnell equations, assuming membrane stress state for prebuckling deformation
07 p1414 A70-20170
- Lateral buckling of simply supported uniform diaphragm using slope-deflection equations for orthogonally intersecting beams, prescribing boundary conditions
08 p1589 A70-21244
- Rectangular plate girder webs buckling under partial edge loadings, using finite element method for flange-web interaction
08 p1589 A70-21247
- Optimal inextensional buckling of uniformly loaded simply supported arches with large opening angle
08 p1589 A70-21310
- Asymptotic analysis for axisymmetric buckling of axially compressed short cylindrical shells with free edges, using Batterman method
08 p1593 A70-21620
- Cylindrical shells buckling under axial surface tensions using Donnell stability equations
08 p1593 A70-21624
- Free vibrations and dynamic buckling of hinged extensible beam under axial force
09 p1768 A70-22061
- Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression
09 p1780 A70-23207
- Shallow rectangular shell panels nonsymmetric nonlinear deflection states computed by finite difference equations iteration, discussing snap-through buckling loads
09 p1780 A70-23209
- Plastic buckling of eccentrically stiffened circular cylindrical shells with multiple isotropic layers under combined axial and lateral pressure, deriving stability criterion
09 p1780 A70-23213
- Carrying capacity of shallow shells of revolution, determining buckling stress and limiting equilibrium of shells with varying thickness under transverse load
09 p1781 A70-23288
- Buckling stability of slender knife-edge suspended rods subjected to compression end loads
10 p1955 A70-24053
- Truncated conical shell buckling under axial compression using method for torsion buckling, correlating to equivalent cylindrical shells
11 p2135 A70-25980
- Buckled plates flutter at zero dynamic pressure, considering initial plate imperfections, including aerodynamic damping in quasi-steady supersonic approximation
11 p2135 A70-25988

Boundary conditions effect on bending, vibrations and buckling of unsymmetrically laminated rectangular plates

11 p2136 A70-26079

Dynamic buckling of shell or arch structure determined from response of two degrees of freedom structure to step load application

11 p2138 A70-26158

Buckling load calculations for axially compressed circular cylindrical shells under relaxed boundary conditions

11 p2140 A70-26484

Cylindrical shells plastic flow buckling under radially inward impulsive loading, showing mode number dependence on shell length

11 p2140 A70-26486

Ring buckling under constant and centrally directed pressure, considering small displacement and inextensional deformation

11 p2141 A70-26492

Stiffened cylindrical shells buckling under axial compression, obtaining imperfections and prebuckling growth mappings

12 p2319 A70-27141

Subdivisional method for linear systems vibration and buckling problems, reducing governing equation to ordinary differential equation with variable coefficients

12 p2320 A70-27145

Thin circular cylindrical polyvinyl chloride plastic shells tested under axial compression and end-shortening conditions for buckling

12 p2324 A70-27473

Shear buckling and uniaxial compression dependence on mechanical properties of clamped orthotropic plates, using Ritz method to compute bifurcation type loads

12 p2326 A70-27817

Pressure buckling values of rod and plate profiles with thicknesses graduated across pressure direction in presence of uniform and nonuniform stress distributions

13 p2507 A70-28477

Eccentrically stiffened orthotropic cylinders with intermittently attached stiffeners under bending and axial load, analyzing instability and buckling

13 p2518 A70-29966

Postbuckling of flat variable thickness rectangular plates with unloaded transverse edges, using dynamic relaxation method

13 p2518 A70-30024

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering hure theory and variational principle for uniform compression load

14 p2657 A70-30714

Thin spherical shell postbuckling behavior with constrained rigid boundary under edge load, using deep and shallow shell theory

14 p2658 A70-30848

Nonlinear dynamic analysis of shells of revolution under symmetric and asymmetric loads, obtaining solutions for shallow cap buckling

16 p2994 A70-34229

In-plane boundary conditions effect on axially compressed conical shell stability under low buckling loads, using linear Donnell-type theory

17 p3186 A70-34971

Axially loaded cylindrical shells prebuckling deformation behavior measurement by holographic interferometry

17 p3086 A70-35012

Mass distribution role in stability theory of rods under nonconservative buckling load

18 p3335 A70-35961

Elastic and plastic cylindrical shells, investigating dynamic buckling under impulsive loads

18 p3338 A70-36436

Flutter design charts for isotropic panels stressed to verge of buckling for tropical values of structural damping

18 p3338 A70-36446

Postbuckled integrally stiffened wide column weight optimization, developing stress equation

18 p3339 A70-36447

Buckling problem numerical analysis by nonlinear programming and minimum energy formulation

18 p3339 A70-36495

Buckling of fiber reinforced composite orthotropic plates

18 p3343 A70-36706

Lateral compression of rocks and global shells multilayers, using equations for buckling of single free stratum

18 p3255 A70-37076

Waveform changes in postbuckling behavior of thin rectangular plates under axial compression

19 p3535 A70-37380

Buckling equilibrium equations for thick rectangular block under compression loads, noting bifurcation points

19 p3536 A70-37683

Edge distribution of transverse reactive forces of rectangular plate with nonuniform flexural rigidity at buckling load

19 p3541 A70-38042

Clamped spherical shells under concentrated, distributed and ring loadings, analyzing large axisymmetric deflections for prebuckled and postbuckled states

19 p3545 A70-38336

Prebuckling deformations effect on buckling of clamped thin walled circular cylindrical shells under axial loading and internal pressure

19 p3546 A70-38346

Asymmetric snap-through buckling in cantilevered column restrained at tip by stiff wire, discussing ratio of flexural rigidity to extensional stiffness

19 p3549 A70-38670

Stiffened thin walled circular cylinders buckling and postbuckling behavior under axial compression or external hydrostatic pressure

20 p3719 A70-39621

Paraboloid of revolution, examining mixed axisymmetric buckling problem

20 p3727 A70-39892

Thermoelasticity of fiber reinforced materials, considering stress concentration in beams and reinforcing fibers buckling under thermal loading

20 p3730 A70-40037

Asymptotic buckling analyses of imperfect columns on nonlinear elastic foundations by perturbation expansions, equivalent linearization and truncated hierarchy approximations

21 p3934 A70-40777

Buckling analysis of stiffened noncircular cross section cylindrical shells constructed by circular arcs and straight line segments

21 p3934 A70-40922

Thin walled column buckling relation to plate element buckling, studying deformation, stress state, failure mechanism and ultimate load

22 p4116 A70-43214

Circular cylindrical orthotropic fiberglass-reinforced shell buckling under longitudinal impact, assuming initial surface imperfections

22 p4117 A70-43347

Fatigue strength of stiffened aircraft panels subjected to repeated buckling by compression loads

23 p4267 A70-44132

Axially compressed circular cylindrical shells subject to relaxed boundary conditions, calculating buckling loads as function of length to radius ratio

23 p4269 A70-44397

Gradient minimization and higher order discrete elements application to shell buckling and vibration eigenproblems, using 48 degree of freedom Bogner cylindrical panel element

23 p4271 A70-44705

Structural eigenvalue problems solved by sparsely populated matrices for structural vibrations and critical buckling, using finite element method

23 p4271 A70-44708

Second approximation for limit loads due to imperfection sensitivity of axisymmetric elastic shell structures with unique harmonic buckling modes

23 p4273 A70-44720

Stress, buckling and vibration analysis of shells of revolution by numerical integration and finite difference methods, summarizing computer programs

23 p4273 A70-44725

Axisymmetrically imperfect spherical thin shell stability analysis, comparing results with theory of initial postbuckling behavior

24 p4421 A70-45282

Truncated spherical shells nonlinear asymmetric buckling calculation from equilibrium equations

24 p4421 A70-45284

Thick isotropic rectangular laminates free vibration and buckling, applying three dimensional linear small deformation theory of elasticity

24 p4422 A70-45296

BUDGETING

Applied space research covering photovoltaic cells, electric propulsion, onboard data storage, vacuum lubrication and NASA-European organizations budgets

06 p1141 A70-17780

Long range army budget forecasting model based on research projects cost distributions and parameters, describing computer program

09 p1794 A70-23415

Product oriented cost data bank for satellite system cost prediction and negotiation designed for USAF communications satellite program

11 p2152 A70-25477

BUFFERS [CHEMISTRY]

Glutamine deamidation enhancement by N-acetyl-L-aspartic acid addition to mitochondrial preparations of rabbit brain incubated in Tris buffer

01 p0018 A70-10508

BUFFETING

F-8D aircraft transonic flight and wind tunnel tests for buffet onset prediction, considering effects of g level and fluctuation amplitude and frequency

09 p1611 A70-23020

Low speed buffet intensity under pressure fluctuations on slender wing aircraft at vortex breakdown, using wind tunnel model

10 p1963 A70-25067

Wind tunnel and flight test methods for determining transonic buffet characteristics on model F-4 aircraft

13 p2348 A70-29886

BUILDING MATERIALS

U CONSTRUCTION MATERIALS

BUILDING STRUCTURES

U BUILDINGS

BUILDINGS

Residential structures vibration response to aircraft flyover noise, discussing noise transmission, rattle phenomenon, spectra, etc

04 p0770 A70-14887

Physical methods in applied climatology, analyzing meteorological effects on human body and building thermal conditions and plant biomass growth

15 p2771 A70-32111

Sonic boom effects on building structures, using Concorde measurements and explosion simulation studies

24 p4289 A70-45151

BULGARIA

Mapping of normal distribution of geomagnetic elements in Bulgaria

08 p1490 A70-21433

Report to COSPAR on space research in Bulgaria, considering ionospheric physics, cosmic rays, satellite observations, meteorology and space communications

15 p2829 A70-31704

BULGING

Lateral pressure bulging of superplastic alloy sheet, considering flat circular sheet and bulging into V grooves

16 p2916 A70-32918

BULK MODULUS

Effective wave propagation velocities, bulk and shear moduli of elastic heterogeneous solids approximated by self consistent method

04 p0777 A70-15496

Adiabatic elastic stiffness of single crystals of Ni-Co alloys, determining bulk modulus dependence on chemical composition

10 p1904 A70-24699

BULKHEADS

Saturn 5 thru-bulkhead initiator for solid propellant rocket motor ignition, discussing transfer design, pressure output and postfire leakage

03 p0546 A70-14105

Design reliability of through-bulkhead initiator explosive train using parametric test program data, discussing shock transmission and acceptor charge sensitivity energy balance

03 p0549 A70-14124

BUMPERS

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence

07 p1310 A70-19713

BUNCHING

NT ELECTRON BUNCHING

Bunched ion bursts amplitude modulation effects on nonlinear ion acoustic waves in grid plasma system

23 p4229 A70-44989

BUNDLES

Ventricular preexcitation syndrome studied by catheter technique for heart electrical activity recording, noting His bundle bypass effects

10 p1819 A70-24934

BUOYANCY

Rapidly rotating solar interior damping by large scale convection analysis via maximum buoyancy force in water cylinder transition

02 p0373 A70-12391

Buoyancy effects in laminar forced convection on vertical flat plate, obtaining heat transfer coefficient

06 p1172 A70-17141

Plane Poiseuille flow with nonlinear temperature distribution, studying vortex type secondary flow onset due to buoyant forces

09 p1790 A70-23555

Growth rate and spatial distribution of solid deposit freezing onto vertical surface in presence of convective heat transfer at moving phase interface

12 p2331 A70-27696

Buoyancy effects on liquid nitrogen film boiling in vertical flow, using resistance heated test apparatus

17 p3195 A70-34745

Density diffusion and buoyancy effects on horizontal boundary layers in stratified flow

18 p3239 A70-36193

Buoyancy effects on transient free convection heat transfer in revolving tube for zero to 100 g centrifugal acceleration

[ASME PAPER 70-HT-10] 22 p4122 A70-42437

Spherical shape gas or liquid drop steady motion at large Reynolds numbers, examining buoyancy forces and velocity gradients

24 p4326 A70-45996

BURGER EQUATION

Inviscid Burger turbulence spectral equations for cumulant approximation, obtaining energy spectrum and transfer as initial value problems

05 p0832 A70-16147

Burger one dimensional model equation for homogeneous turbulence treated by Fourier transform in space and time, using Bogoliubov expansion method

05 p0833 A70-16331

Error resulting from elasticity modulus and linear thermal field coefficient removal from integral in Burger formula for turbine blade thermal stresses

05 p0954 A70-17061

Navier-Stokes equation approximation for non-homogeneous case obtained by relating Burgers equation to Riccati equation through similarity transformation

09 p1711 A70-22613

Burger turbulence model late decay statistical analysis using kernels of Cameron-Martin-Wiener expansion of random velocity field

13 p2386 A70-28820

Closed form solutions of boundary value problems for Burger equation within half plane from zero to infinity

14 p2598 A70-30492

Turbulent velocity correlation function computation in Burger fluid model, using functional integral expression

19 p3403 A70-37530

Energy spectrum function for Gaussian initial velocity field of inviscid turbulence Burger model, using Cameron-Martin-Wiener exact expansion

20 p3609 A70-39653

BURNERS

Combustion instability of solid propellants using response to pressure perturbations for T and L burners

02 p0352 A70-12013

Slot burner laminar flame front stability loss ascribed to increased slot dimensions and angles between velocity vector and flame front

08 p1598 A70-21208

Methane-air inverted flames blowoff at thin stabilization plates of twin slit inverted flame burner, determining critical values of Karlovitz flame stretch factor

14 p2666 A70-31092

Instantaneous burning rates prediction methods based on flame structure model and steady state burning rate data as pressure and initial temperature functions

[AIAA PAPER 70-667] 16 p2971 A70-33949

Secondary combustion products of air augmented boron loaded solid propellant rocket ramburner, measuring properties by spectroscopy

17 p3196 A70-35196

BURNING

U COMBUSTION

BURNING PROCESS

U COMBUSTION

BURNING RATE

Abnormal burning surface regression in rocket motor solid propellant detected with Flash X ray exposures

01 p0085 A70-10021

Flame propagation rate calculation methods, considering mass burning rate values

01 p0217 A70-11008

Flame propagation in gases with two chemical phases, studying phase interaction effects on burning rate

01 p0217 A70-11010

Gas ignition and burning processes calculation with allowance for hydrodynamics, discussing time saving finite difference solution of differential equations system

01 p0218 A70-11020

Pressure effects on burning rate of magnesium mixtures with solid oxygen containing organic compounds, determining charge density effect on mass velocity

01 p0218 A70-11021

Chemical additives effect on H-Cl-N mixtures burning velocity in air and nitrogen

02 p0398 A70-12031

Chlorine dioxide-methane mixture flame stabilized in low pressure burner, determining emission spectra, burning velocity, activation energy, etc

02 p0251 A70-12033

Ammonia/chlorine dioxide and ammonia/chlorine dioxide/methane flames burner stabilization and burst velocities

02 p0400 A70-12670

Mathematical model for burning rates of solid propellant rocket motors during pressure transients, coupling conservation equations with mass balance equation

03 p0543 A70-12912

Burning constants prediction for suspended hydrocarbon fuel droplets based on modified theoretical equation

03 p0544 A70-13916

Flat flames in stationary gas in tubes useful for flame speed measurements without correction procedure

03 p0607 A70-13917

Burning velocity of methane-air flames inhibited by methyl bromide, using schlieren cone-nozzle burner method involving unburnt gas velocity measurement

03 p0607 A70-13918

Aluminized composite solid propellants burning rates in acceleration fields noting time dependent increase

[AIAA PAPER 68-529] 04 p0709 A70-15581

Polyamide fabric burning rates in oxygen-inert gas mixtures, studying damping effects of density, thermal conductivity, molecular constants and mass flow

06 p1090 A70-17284

Combustion stability in air-liquid fuel zone of jet engine burner with burning rate controlled by droplet vaporization rate controlled mechanism

06 p1178 A70-17980

Gas phase reactions near solid-gas interface of deflagrating double base propellant causing abrupt changes in burning rate-pressure curve

06 p1179 A70-18046

Aluminized solid propellant transient burning rate augmentation during acceleration loads

06 p1129 A70-18047

Burning rates of monopropellant droplet evaluated by variable property models, discussing dimensionless mass flow rate

07 p1358 A70-18914

Polyurethane propellant binders burning rate, studying siloxane moiety effects

07 p1358 A70-19330

Burning rate for composite solid propellant, using model with specific gas phase combustion distribution

07 p1422 A70-19584

Mathematical model for calculating radiative heat transfer from turbulent diffusion buoyant flame and predicting liquid fuel burning rate

07 p1425 A70-20008

Ammonium perchlorate combustion catalysis, studying preflame heating and mixing effects on gas phase flame burning velocity

07 p1425 A70-20010

Condensed fuel mixtures and oxidizers combustion rates as function of pressure and particle size

09 p1786 A70-22104

Combustion rates and temperature distribution in condensed and gaseous phases of ammonium perchlorate sandwich with synthetic resin middle layer

09 p1741 A70-22105

Ammonium perchlorate-polymer mixtures combustion rates with/without cobalt oxide additions, studying ignition temperatures of stable flameless burning

09 p1787 A70-22108

Burning and degradation mechanism of polyester propellants correlated with mass regression rate dependent on surface temperature

11 p2099 A70-25990

Styrene-oxygen copolymer preparation methods, discussing burning rates for rocket solid propellants mixtures with ammonium perchlorate

11 p2100 A70-26146

Flame propagation in slowly combusting fuel-air mixtures using gas chromatography and flame speed

11 p2151 A70-26381

Perfluoropropene, -cyclobutene and -cyclobutane mixing with atmospheric pressure oxygen to determine burning velocities

11 p2100 A70-26383

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter

12 p2331 A70-27323

Mode transition characteristics of free burning argon electric arc with transpiration cooled anode, noting current blowing parameter

12 p2281 A70-27806

Low pressure burning rate of double base propellants at various initial temperatures in argon and in air

12 p2332 A70-27844

Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile

13 p2473 A70-29956

Evaporation and combustion kinetics of droplets and particles in hot air stream, observing luminous trace

14 p2664 A70-30392

Hyperbaric environment combustion, discussing burning rate data and fire resistance scale

14 p2665 A70-30626

Two dimensional transonic flows bounded by free surface and wall with interior heat release and external burning, indicating application to control or propulsion

14 p2665 A70-30947

Burning velocities for methane-air mixtures with water cooled porous metal flat flame burner, discussing surrounding ambient atmospheres effects

14 p2666 A70-31093

Internal ballistics equations solution on basis of pressure index law of burning taking into consideration density approximation

15 p2786 A70-31849

LF unsteady behavior of liquid propellant rockets from droplets evaporation and combustion rates

[AIAA PAPER 70-620] 16 p2968 A70-33589

Composite solid propellants burning rate and initial temperature relationship, investigating granular diffusion flame model

[AIAA PAPER 70-656] 16 p2963 A70-33618

Burning rate increase of nonmetallized composite propellants in acceleration field, assuming surface retention of ammonium perchlorate particles

16 p2963 A70-33861

Acceleration effects on burning rates of double base propellants with and without Al additive

16 p2963 A70-33883

Instantaneous burning rates prediction methods based on flame structure model and steady state burning rate data as pressure and initial temperature functions

[AIAA PAPER 70-667] 16 p2971 A70-33949

Solid propellant combustion, observing burning rate in spin acceleration environments

17 p3145 A70-35209

Combustion efficiency and rate in oxygen enriched spacecraft atmosphere

17 p3177 A70-35210

Chemical kinetics effect on combustion rates of fuel plate in turbulent oxidizer flow, deriving conservation equations in boundary layer and diffusion equation

18 p3346 A70-36245

Powdered metallic additions effect on combustion rates of ammonium perchlorate with bitumen and polymethyl methacrylate and potassium perchlorate with bitumen mixtures

18 p3299 A70-36247

Combustion rates acceleration of ammonium perchlorate mixtures with polystyrene and polymethyl methacrylate by KCl and LiF additions, forming molten layer on charge surface

18 p3299 A70-36248

Combustion rates and self ignition vs pressure and activity in ammonium perchlorate mixtures with Al and Mg powders compressed to maximum densities

18 p3299 A70-36249

Two layer model of burning in turbulent boundary layer on porous surface for carbon monoxide oxidation reaction

18 p3346 A70-36268

Burning rate theory applied to heat and mass transfer rates of monopropellant droplets in heat-up and steady burning at wet bulb temperature

18 p3348 A70-36696

Internal ballistics of composite propellant charge in first stage of burning

19 p3489 A70-38373

Air to air missile launch range maximization for plane trajectories and nonmaneuvering targets, discussing optimal fuel burning rate

[AIAA PAPER 70-980] 20 p3668 A70-39549

Ammonium perchlorate composite solid propellant pressure vs burning rate at various temperatures, discussing granular diffusion flame theory

20 p3694 A70-40266

Deflagration rate measurements by high speed cinematography of ammonium perchlorate single crystals under various ambient temperature and pressure conditions

20 p3688 A70-40468

Methane and hydrogen consumption rates during slow reactions in mixtures of molecular hydrogen, oxygen and nitrogen

21 p3772 A70-40879

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter

21 p3952 A70-42064

Combustion rate as function of oxidizer molecular refractivity in perchlorates and nitrates of aliphatic and aromatic mono- and polyamines explosives

21 p3783 A70-42241

Radiant energy flux effect on atmospheric pressure burning rate of composite solid propellant

23 p4232 A70-44552

Combustion velocity in high pressure chamber, determining fire mechanism in overpressure environment

24 p4393 A70-45447

BURNING TIME

Metal particle size relation to combustion time using statistical method applied to polydisperse Mg powder

07 p1419 A70-18756

BURNOUT

Composite programming of vertical ascending rocket with constant thrust phase followed by acceleration and coasting phases, discussing burnout altitude and fuel consumption

08 p1582 A70-21775

Pressure and grain size effect on burnout velocity and combustion capacity of ammonium perchlorate

17 p3145 A70-34639

BURNS [INJURIES]

Ophthalmological treatment of severe thermomechanical eye injuries investigated on radiant-energy burned rabbit eyelids

09 p1617 A70-22473

Nonflammable fibrous textile materials for injury and personnel loss prevention in fires by aircraft accidents

23 p4153 A70-44481

BURSTS

NT RADIO BURSTS
NT SOLAR RADIO BURSTS
NT TYPE 2 BURSTS
NT TYPE 3 BURSTS
NT TYPE 4 BURSTS
NT TYPE 5 BURSTS

X ray bursts rise and fall observed by spectrometer onboard OSO-4

15 p2792 A70-31670

BUSHINGS

Rotating parabolic mirror /antenna/ cantilever suspension rigidity with emphasis on rigidity of central bushing

08 p1586 A70-21056

Test stand based on Froude pendulum for measuring friction coefficients and oscillation parameters of porous bushings

16 p2924 A70-34298

BUTADIENE

Butadiene prepolymers containing carboxyl functional groups used in binder matrix for solid composite propellants

07 p1360 A70-19911

IR absorption spectra of high-cis forms of deuterated polyisoprenes

23 p4157 A70-44274

BUTANES

Photodecomposition of 1,4-dichlorobutane sensitized by n, pi singlet state of acetone as chemical process

04 p0646 A70-15319

Direct sensitized photolysis of various dichlorobutanes yielding HCl

16 p2855 A70-33089

BUTT JOINTS

Welded flat plate specimen to evaluate low cycle crack initiation and propagation of butt welds under compressive loading, discussing design, fabrication and testing

[ASME PAPER 69-SESA-7]

01 p0199 A70-10452

Residual stress distribution in butt joints during welding of sheet Nb measured by extensometer, noting annealing temperature effect on stress relieving

03 p0513 A70-14072

Unsteady heat conduction and thermal stresses in thin isotropic semibonded plates with butt joint possessing internal thermal resistance

04 p0766 A70-14479

Computer analysis of degree of constraint against butt joint transverse shrinkage, using finite element method for stress analysis

12 p2239 A70-26854

Transverse contraction during butt welding of plates of steel and Ti and Al alloys, showing dependence on joint thickness

16 p2916 A70-33053

Magnetic methods of flaw detection, discussing theory and application to welded butt joints

18 p3263 A70-36521

Solid state butt and lap joint welding of TD-nickel bar, evaluating performance by stress rupture and shear tests

21 p3832 A70-40790

Butt joined epoxy Al plates tensile strength, observing fracture strength dependence on stress concentration at bond edges below characteristic crack length

21 p3939 A70-42032

Bar butt current penetration welding, using HF continuous current seam welding process for joining finite length pieces

22 p4046 A70-43148

Thermomechanical contact and heat transfer on reinforced edge in plates butt joined by curvilinear closed rigidity rib

22 p4120 A70-43718

BUTYRIC ACID

Glutamic and aspartic acid concentrations in brain tissue and incubation medium after adding gamma-aminobutyric acid

01 p0018 A70-10507

Gamma-aminobutyric acid effect on oxidative phosphorylation of rabbit and rat brain mitochondria, noting dependence on ionic concentration, temperature and amount of additions

01 p0019 A70-10509

Gamma-aminobutyric acid influence on 5-hydroxytryptamine in rat brain after intraperitoneal administration

01 p0019 A70-10510

Prolonged REM sleep deprivation effect on gamma-aminobutyric acid concentration in mice

23 p4146 A70-44658

Amino acids L-glutamate and gamma-aminobutyric acid as communication agents in brain

23 p4148 A70-44864

BYPASSES

Net thrust determination for high bypass ratio engines in cruise, suggesting performance evaluation in actual flight tests

[SAE PAPER 690652] 05 p0895 A70-15841

Bypass door control system for SST axisymmetric intake operation in external compression mode, obtaining dynamic performance

[AIAA PAPER 70-695] 16 p2966 A70-33558

Kuznetsov NK 8-4 bypass turbojet air entry vanes, pressure compressors, gear case, combustion chamber and turbine drives

17 p3147 A70-34629

C

C BAND

Group delay characteristics of C band nondegenerative parametric amplifier determined by Nyquist method and compared to phase frequency derivative measurement

03 p0458 A70-14037

Spurious output from C band radar magnetrons, discussing measurement procedures and noise reduction by waffle-iron waveguide filters

12 p2201 A70-28141

C band latching ring-and-post ferrite waveguide circulator for radar transmitting-receiving functions, presenting performance and design parameters

12 p2202 A70-28166

C band radar antenna with pencil beam steered in plane by ferrite phase shifters

16 p2875 A70-33394

Steerable C band waveguide arrays design for forming monopulse cluster of sum and difference beams

16 p2875 A70-33395

C-5 AIRCRAFT

MADAR onboard maintenance system designed for C-5 aircraft monitoring line replaceable units in electrical, avionics, environmental, mechanical and propulsion systems

[AIAA PAPER 70-243] 07 p1195 A70-20375

C-5A aircraft testing program covering ground handling, towing, cargo handling, takeoff and landing, cold weather testing, etc

08 p1437 A70-21729

C-5 Galaxy airlifter design, delivery capacity, aerodynamics and flight test program

09 p1609 A70-22020

C-5 design features for entire environment assuring human integration as crew member or troop passenger

09 p1609 A70-22021

C-5 production engineering, discussing welding method for hydraulic stainless steel tubing, bonding of Al floor panels and painting preparation

10 p1893 A70-23853

C-5A airframe composite materials fabrication, tooling, processing, quality assurance and nondestructive test methods

11 p2058 A70-25572

C-5 aircraft electrointerference coupling minimization, applying classification plan for wire categorization and routing

12 p2201 A70-28131

C-5 aircraft failures and system safety program, noting landing gear, pressure equalization, visor nose, crosswind computer, nacelle separation and propulsion design

15 p2675 A70-32215

Aircraft accidents during descent, approach and landing, discussing B 747, C5A and SST

15 p2675 A70-32216

C-5A turbofan engine thrust determination using pressure and temperature values in exhaust nozzles

[AIAA PAPER 70-611] 16 p2969 A70-33606

C-5A propulsion system onboard monitoring for malfunction detection, analysis and subsystem recording

17 p3148 A70-35497

C-5A aircraft six wheel main landing gear bogie pitching control, emphasizing braking torque compensating mechanism design

[AIAA PAPER 70-914] 17 p3020 A70-35826

C-5 aircraft cargo loading system for terminals minimizing ground time

17 p3064 A70-35831

C-5 flight simulation program for design of basic aircraft, flight control and guidance subsystems

[AIAA PAPER 70-922] 17 p3064 A70-35833

C-5A engineering flight test /EFT/ computer controlled data processing system operation, illustrating capability, performance and limitations

19 p3355 A70-37917

Extraction parachute deployment for airdropping multiple loads from C-5A aircraft

[AIAA PAPER 70-1203] 21 p3752 A70-41814

Ultrasonic crack detection in fastener holes in C-5A wings

24 p4341 A70-45571

C5 Malfunction Detection Analysis and Recording /MADAR/ subsystem for onboard fault isolation including engines

[SAE PAPER 700820] 24 p4349 A70-45898

C-9 AIRCRAFT

Ground and ditching emergency evacuation tests of C-9A aeromedical aircraft under worst possible simulated crash conditions

01 p0035 A70-10716

C-47 AIRCRAFT

Airborne multispectral sensing based on modified AN/AAS-5/XE-2/ scanners mounted in C47 aircraft, discussing applications

03 p0491 A70-13669

C-135 AIRCRAFT

Laboratory tests to determine KC-135 air conditioning failure due to turbine wheel icing by flight condition simulation

01 p0005 A70-10694

C-141 AIRCRAFT

Isochronal maintenance inspection management of Military Airlift Command /MAC/, noting C-141 utilization rate

07 p1428 A70-19673

CABIN ATMOSPHERES

NT SPACECRAFT CABIN ATMOSPHERES
Atmosphere classification according to fire hazard based on heat capacity per mole of oxygen, noting exponential growth rate

03 p0607 A70-14054

Portable unit for collection and analysis of toxic gas contaminants in enclosed aircraft and spacecraft cabin atmospheres

07 p1224 A70-20222

Harrier fighter aircraft cabin air conditioning and pressurization system

12 p2166 A70-27890

Heat stress levels in cockpit of AH-1G Hueycobra helicopter parked in sunlight with closed canopy, using sweating copper mannikin

15 p2689 A70-31881

Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire

17 p3198 A70-35646

CABLES [ROPES]

Sheath-enclosed steel cable inspection using induction coil transducer in conical sleeve

02 p0301 A70-12490

Cable involving woven multiconductor arrangement and aromatic polyimide insulations to connect thermal moon probe with transmitter for temperature measurements on lunar surface

05 p0798 A70-16034

Dynamic control model of lift helicopters with two cable sling loads using multiple part motion equations

[AIAA PAPER 70-929] 17 p3020 A70-35839

Rotating cable-connected orbital space stations deployment dynamics, considering cable mass and motion equation

23 p4258 A70-44529

Rectangular cable networks covered by or embedded in membrane matrix, calculating vibration response under load by Galerkin method

24 p4421 A70-45279

Rope transverse oscillations due to impact taking bending rigidity into account

24 p4424 A70-45627

CADASTRAL MAPPING

Numerical photogrammetric techniques application to cadastral surveys and mapping, discussing standard errors

10 p1880 A70-24753

CADMIUM

Helium-cadmium laser operation, using DC cathodoresis to maintain spatially uniform optimal Cd vapor concentration

01 p0110 A70-10562

Solar Cd abundance, using spectrograph and synthetic spectral line computer program

06 p1143 A70-17995

Cadmium vapor density distribution by cathodoresis in He-Cd laser discharge tube determined by side light measurements

06 p1084 A70-18613

Radiative lifetime for atomic transitions in UV multiplets of zinc and cadmium atoms and ions measured using phase shift method

11 p2086 A70-25363

He-Cd laser with cathaphoretic transport and diffusion return path, noting condenser critical temperature for radiation noise reduction

15 p2751 A70-31987

CW Cd vapor laser oscillation achieved with slotted hollow cathode discharge containing He carrier gas at pressures of several Torr

15 p2751 A70-31988

He-Cd laser discharge, determining population densities and lifetimes for levels of Cd ion excited by He metastables

17 p3108 A70-35903

He-Cd pulsed laser mode locking at 4416 and 3250 A using intracavity acoustic loss modulator

18 p3266 A70-36314

Helium-like resonance, intercombination and forbidden transitions of Ca, Si and S lines during 3b solar flare decay

20 p3700 A70-40420

Ti embrittlement by liquid Cd, discussing ductile-brittle transition temperature dependence on strain rate

22 p4054 A70-42738

Positron annihilation in quenched Cd metal from radar backscatter intensities in aircraft model compared with anechoic chamber measurements

24 p4315 A70-46257

Radiochemical neutron activation analysis of In, Cd, Y and rare earth elements in rocks

24 p4310 A70-46375

CADMIUM ALLOYS

Binary CdSb-CdTe systems investigated by X ray and microstructural analyses, showing mechanical mixture constitution and p-type conductivity

07 p1355 A70-18701

Cd-Se and Cd-Te systems phase diagrams based on regular solutions theory, discussing molecular interaction energy dependence on composition

22 p4085 A70-42678

CADMIUM ANTIMONIDES

Electrical properties thermally induced irreversible changes in CdSb single crystals measured as function of current intensity and flow

03 p0542 A70-13751

CADMIUM COMPOUNDS

NT CADMIUM ANTIMONIDES

NT CADMIUM FLUORIDES

NT CADMIUM SELENIDES

NT CADMIUM SULFIDES

NT CADMIUM TELLURIDES

Gallium found suitable for doping cadmium/tin arsenide semiconductor, exhibiting hole-type conductivity

01 p0156 A70-10214

Hall effect and electric conductivity of cadmium arsenide at high temperatures as function of carrier concentration dependence on temperature and phase transformation

07 p1357 A70-20314

Optically pumped cadmium phosphide laser, obtaining IR coherent oscillation from Q switched Nd doped YAG laser excitation

15 p2751 A70-31985

CADMIUM FLUORIDES

Lithium-cadmium fluoride battery for aircrew survival beacon radio receivers, considering voltage loss elimination by doping

08 p1439 A70-20708

CADMIUM NICKEL BATTERIES

U NICKEL CADMIUM BATTERIES

CADMIUM SELENIDES

Adsorption influence on electrical and photoelectric properties of CdSse thin films

17 p3143 A70-35674

Heterogeneous solar cells based on polycrystalline cadmium sulfide and selenide, discussing preparation methods and photoelectric and electric properties

18 p3215 A70-36238

Thin optically pumped pulsed CdSe platelet lasers, detecting mode jumping and tuning effects by time-resolved spectroscopy

22 p4049 A70-42946

CADMIUM SULFIDES

Light induced modulation of optical absorption of CdS crystals by chopped laser excitation, noting use for fast recombination center detection

02 p0310 A70-11846

Solder mechanical contact strength to CdS insulating crystal platelets tested in liquid N, noting Ag epoxy

02 p0319 A70-12738

Photoconductivity growth and decay curves green edge emission and integral flux in optical flare of cadmium sulfide crystals due to hole trapping process

03 p0540 A70-13503

Performance degradation in cadmium sulfide solar cells, discussing cause identification technique, I-V curve parameter changes, etc

04 p0628 A70-15329

Vacuum deposited thin cadmium sulfide films semiconducting properties, discussing captured free carriers effects on temperature dependence of dark and photo current

05 p0893 A70-16543

Band extremum loops depth in CdS in electric and magnetic fields determined from calculating linear and nonlinear conductivity

06 p1126 A70-17819

Laser oscillation conditions for CdS crystal pumped by electron beam, using energy loss per unit length for calculations

07 p1298 A70-19681

Minority carriers lifetime following CdS and ZnTe spontaneous luminescence relaxation after electron beam excitation

07 p1302 A70-20318

Two photon photoconductivity of CdS crystals stimulated by ruby laser, showing emission self focusing during pumping

07 p1302 A70-20322

Thermal lens effect produced by photocurrent in CdS, using focused laser beam to generate photocurrent causing local heating changes of refractivity

10 p1898 A70-23980

Self focusing of ruby laser radiation in CdS single crystal, considering effect on crystal photoconductivity

12 p2248 A70-27540

RF-sputtered CdS thin films structural and electrical characteristics from X ray diffractometer tracings, reflection electron diffraction and X ray double crystal spectrometry

13 p2470 A70-29201

Minority carrier diffusion lengths on sides of copper sulfide-cadmium sulfide heterojunctions measured by light microprobes

13 p2471 A70-29709

Vaporization characteristics of solids for relationship between chemical bonding and sublimation mechanism emphasizing NaCl, CdS and GaAs

14 p2545 A70-30906

CdS high field domain modes generation for C parallel to E ascribed to interaction between drift carriers and off-axis shear wave

15 p2784 A70-31984

CdS and cdTe thin film solar cells R and D survey, describing construction and electrical properties

15 p2678 A70-32421

Low threshold electron beam pumped CdS lasers with improved Al coated Fabry-Perot mirrors in end-pumped configuration

16 p2928 A70-33642

Adsorption influence on electrical and photoelectric properties of CdSse thin films

17 p3143 A70-35674

Heterogeneous solar cells based on polycrystalline cadmium sulfide and selenide, discussing preparation methods and photoelectric and electric properties

18 p3215 A70-36238

Electrical conductivity, Hall constant and differential thermal emf n-type GaAs-CdS solid solutions

18 p3298 A70-36596

CdS crystals luminescence spectrum excitation by UV light of ruby laser, noting excitons and phonons recombination

19 p3444 A70-37368

CdS conversion by cation exchange to single crystal CuS, examining phases structural relationship

19 p3486 A70-37766

Cadmium sulfide photocell development, noting plastic support base, film deposition and interconnection

19 p3358 A70-38480

Copper disulfide-cadmium sulfide thin film solar cell degradation under simulated low orbit conditions, investigating thermal stress

21 p3759 A70-41313

Trap filling dependence on intensity, temperature and wavelength of photoexcitation in CdS crystals subjected to electron radiation damage and annealing

21 p3864 A70-42013

Cadmium sulfide pulsed laser spectrum analysis, discussing laser output stabilization by mode selection and electron beam scanning

22 p4049 A70-42405

CdS thin film solar cells, describing manufacture for increased degradation resistance

22 p3966 A70-43537

Electroreflectance at CdS-electrolyte interface, noting field strength effect on relaxation time

23 p4230 A70-43930

CADMIUM TELLURIDES

Current-voltage characteristics of p-n junctions in cadmium telluride, discussing spectral sensitivity bands

01 p0160 A70-11596

Mercury cadmium telluride alloy as photoconductive IR detector material noting properties, composition and temperature dependence of energy gap

03 p0543 A70-14196

Far IR second harmonic generation and frequency mixing in CdTe using pulsed water vapor laser

15 p2751 A70-31983

CdS and cdTe thin film solar cells R and D survey, describing construction and electrical properties

15 p2678 A70-32421

Mercury cadmium telluride photodetectors, analyzing gain, signal current and radiation limits

16 p2905 A70-33153

CdTe nonlinear electro-optical susceptibility predicted by mathematical model using two coupled anharmonic oscillators

19 p3485 A70-37668

Cadmium telluride photocells, discussing performance and mass production

19 p3358 A70-38481

Solid solutions of quasi-binary cross section CdP-CdTe and ZnP-CdTe, using X ray, thermal, microstructural and microhardness analyses

22 p4086 A70-43132

CAFFEINE

Mild temperature and dehydration effects on toxicity of caffeine and dextroamphetamine in mice

09 p1616 A70-22329

Amphetamine, caffeine and secunarine effects on hypodynamic syndrome in subjects during orthostatic tests and transverse G-forces under prolonged hypokinesia

10 p1817 A70-24690

CALCIFICATION

Calcium phosphate crystals precipitation from nutrient gel to determine role of gelatinous ground substance in calcification

10 p1832 A70-25075

Macroscopic architectural changes of cancellous and cortical bone in Rhesus monkey following long term immobilization and chemical removal of calcium

20 p3569 A70-38983

CALCIUM

NT CALCIUM ISOTOPES

Local contractures in K depolarized amphibian skeletal muscle fibers by intracellular injection or by microperfusion, discussing intracellular Ca ion concentration

02 p0234 A70-11728

Release-recovery and dynamic stiffness phenomenon in frog heart muscle at various Ca ion concentrations and temperatures

02 p0241 A70-12771

K line profiles of Ca II for two component chromosome, obtaining line source function and optical depth from steady state and radiative transfer equations

05 p0911 A70-16430

Solar activity centers life history in terms of radio emission and Ca plage intensity, noting radio emission decay faster than plage intensity

05 p0911 A70-16440

Ca II 7323 forbidden line in solar Fraunhofer spectrum, estimating center-limb variation of equivalent width of transition

06 p1143 A70-17994

Percentage changes in X ray calibration wedge mass equivalency to actual changes in bone Ca content

06 p0997 A70-18015

Calcium neutral and ionic lines broadening and shift by microfields measured by plasma flame observations

06 p1148 A70-18453

Solar protuberance radiation polarization in Ca I 4227 A line, discussing depolarization and electron-and photoexcitation

07 p1384 A70-19416

Electron and proton excitation of forbidden transition lines in Ca XV ground configuration determined for coronal densities and temperature

11 p2109 A70-25742

Violet K2 emission in H and K line cores of solar calcium ions using atmospheric model in state of motion

12 p2303 A70-27701

Calcium H and K lines core residual intensities in stars with quiet and active chromosome, suggesting activity due to thermal gradient

12 p2303 A70-27702

Solar IR triplet of singly ionized Ca, suggesting limb darkening caused by chromospheric inhomogeneities for source function inequality

12 p2303 A70-27703

Solar Ca II H and K lines formation, discussing double reversal, limb darkening, plage and spot lines and anomalous line ratios

13 p2494 A70-29481

Ca atom-graphite grain model for interstellar absorption at 4430 A, calculating resonant line shift and width as functions of atom-surface distance

14 p2639 A70-30729

Fine structure in Ca II K line core, determining reduced high dispersion spectra at solar disk center

15 p2804 A70-32618

Serum calcium-digitalis synergism effect on dogs heart excitability, noting hypoxia role in arrhythmia production

17 p3026 A70-35325

Calcium ion role in myocardial cell electrical and mechanical trace processes under normal content and manganese blocking

18 p3221 A70-36640

Ca ion reversible effects of hydrochloric acid and ammonia water on betacyanin leakage from beetroot sections

19 p3365 A70-38375

Spinning cylindrical spicule model with radial and axial gradients in electron number and temperature forming Ca II K line

21 p3879 A70-40955

Ultrasonic velocity in human bones measured for calcium content and density

22 p3979 A70-43522

Ca II chromospheric emission lines for deriving Mn in stellar luminosity, discussing calibration

23 p4242 A70-44293

IR observation of chromospheric Ca II K-line during total eclipse of 7 March 1970

24 p4401 A70-45314

CALCIUM COMPOUNDS

NT CALCIUM FLUORIDES

NT CALCIUM OXIDES

NT CALCIUM PHOSPHATES

NT CALCIUM SILICATES

NT CALCIUM TUNGSTATES

NT PEROVSKITES

Urinary calcium phosphate and carbonate precipitates reduction by protein and carbohydrate

diet change to casein and sucrose in *Macaca nemestrina* 09 p1621 A70-23456

Mineral saturation in calcaneal bone and hand finger phalanx in humans under prolonged hypodynamia by X-ray analysis, observing Ca salts reduction 10 p1815 A70-24676

Compositional variation effect on low silica glass formation based on calcium aluminates 16 p2934 A70-33273

Hydrous Cu-Ca silicate mineral /kinoite/ from Arizona occurring as single crystals and veinlets 24 p4329 A70-45459

Magnetic properties of lanthanum calcium manganate, making stoichiometric specimens by controlling oxygen partial pressure 24 p4390 A70-45602

CALCIUM FLUORIDES

Inorganic photochromic and cathodochromic recording materials, examining transition metal doped strontium titanates, rare earth doped calcium fluorides and Fe or S doped sodalite 22 p4088 A70-43601

CALCIUM ISOTOPES

Calcium isotopes tracer migration in caged rats in metabolism study 04 p0630 A70-14571

CALCIUM METABOLISM

Calcium isotopes tracer migration in caged rats in metabolism study 04 p0630 A70-14571

Autonomic drugs induced contractures of cardiac muscle of frogs, relating inotropic action with Ca influx during low membrane potential 15 p2686 A70-32837

Calcium metabolic balance reports discrepancies with radiologic indications of astronaut bone loss 23 p4148 A70-44838

Infused cortisol disappearance rates and distribution volumes in hyper-, hypo- and normocalcemic dogs 24 p4296 A70-45334

CALCIUM OXIDES

CaO reaction rate with ZrC in effusion cells as function of reactant ion diffusion through product layer 13 p2362 A70-29496

CALCIUM PHOSPHATES

Calcium phosphate crystals precipitation from nutrient gel to determine role of gelatinous ground substance in calcification 10 p1832 A70-25075

Apollo 11 lunar rock fluorapatite and trace minerals, examining pressure and oxidizing conditions of formation, grain and crystallization 21 p3898 A70-41527

CALCIUM SILICATES

Calcium-bearing iron silicate /pyroxferroite/ from Apollo 11 lunar Tranquility Base samples, discussing petrographic environment, physical and optical properties 21 p3895 A70-41504

CALCIUM TUNGSTATES

Absolute quantum efficiency of phosphor calcium tungstate-lead under monochromatic far UV illumination 15 p2729 A70-32017

Calcium tungstate crystals, investigating electron paramagnetic resonance centers produced by neutrons and gamma rays to obtain information on lattice vacancies, defects, etc 16 p2961 A70-33963

CALCIUM 45

U CALCIUM ISOTOPES

CALCULATION

U COMPUTATION

CALCULATORS

Integrated digital circuits for office type desk calculators based on machine concept 01 p0052 A70-11287

Slide rule for calculating electron number density, Debye length and Debye sphere particles in plasma parameters determination 05 p0852 A70-16847

CALCULUS

NT VECTOR ANALYSIS

NT VORTICITY

Analytic systems theory using Volterra calculus of functionals applied to nonlinear differential equations 10 p1908 A70-23845

CALCULUS OF VARIATIONS

Morse eigenfunctions for variational calculation of diatomic molecules vibrational-rotational energy level

analysis, showing better convergence than harmonic oscillator basis 02 p0344 A70-12519

Variational equation describing thermal diffusion in solid body undergoing deformation 03 p0589 A70-13348

Analytical approach to gradient method within framework of Bolza problem of variational calculus, using linearized differential and isoperimetric constraints 03 p0520 A70-14341

Conjugate points for simple integral problems in calculus of variations extended to multiple integral problems, using Jacobi equation 04 p0713 A70-14674

Calculus of variations used for determining optimum one dimensional MHD slider bearing with bounded control variables 04 p0698 A70-14771

[ASME PAPER 69-WA/LUB-2] Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required 04 p0682 A70-15735

Euler-Lagrange linear operators in variational embedding with one dependent function 05 p0881 A70-16058

Momentum-energy complex obtained for nonlocalized fields in variational mechanics, deriving integrodifferential identities for Euler equations quadratures 05 p0881 A70-16078

Variational problems of stationarization under constraints, using imbedding integrodifferential equations 05 p0882 A70-16085

Nonlocal variational mechanics with one field variable, developing algorithm for Euler-Lagrange operator calculation 05 p0882 A70-16137

Variational methods in semigeodesic projections of analytic surfaces on plane surface, determining projections impossible by classical cartography 05 p0839 A70-16368

Variational ray path calculation method for HF electromagnetic wave in anisotropic inhomogeneous lossless ionospheric plasma 06 p1055 A70-17592

Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc 06 p1093 A70-17650

Growth conditions used in existence theorem for calculus of variations in optimal control problems 06 p1027 A70-18506

Soviet collection of papers on boundary problems for differential equations covering variational problems in half space, polynomial behavior at infinity, function spaces, Fourier transformation, etc 07 p1322 A70-18851

Multiplier and gradient methods in computing variational and optimal control problems 07 p1325 A70-19267

Sufficient condition for calculus of variations problem, applying results to integrands without partial derivatives 07 p1327 A70-20022

Phase space variations method proved not applicable to optimal control problems 08 p1479 A70-20856

TWT model with slow wave structure and realized negative depression coefficient and Q factor described by variational method 09 p1644 A70-22410

Numerical solutions of variational problems concerning symmetrical wings with minimum drag and optimal aerodynamic efficiency in hypersonic flow 09 p1603 A70-22433

Temperature distributions in multidimensional transient conduction heat transfer, using variational method and Laplace transformation 09 p1788 A70-22705

Stability characteristics of near periodic orbits using variational equations, with results applied to phase space and stability problems 09 p1760 A70-22917

Kantorovich variational method extended to thermoelastic plane stress problem of rectangular plates 09 p1781 A70-23278

Soviet book on new methods of variational calculus in aerospace vehicle flight dynamics covering controlled processes optimization theory analysis 09 p1767 A70-23473

Discrete calculus of variations for optimal control involving use of discrete time sequence and functionals 10 p1910 A70-24702

Endpoint sufficiency test based on differential calculus method, considering Bolza problem of continuous state and piecewise control variables 11 p2073 A70-26233

Kantorovich theorem application as weak Newton method used in boundary value problems containing Euler-Lagrange equation for variational problems and ordinary differential equations 12 p2260 A70-27002

Variational equations from Herrick variation of parameters method for Icarus encounter with earth 13 p2488 A70-28823

Satellite time and position observations mean square error analysis using calculus of variations 13 p2367 A70-29528

Extremum criterion for singular solutions to optimal trajectory equations in calculus of variations 13 p2443 A70-29747

Boundary value problems reduction to variational problem by transversality conditions of calculus of variations 14 p2599 A70-30644

Variational equation describing thermal diffusion in solid body undergoing deformation 14 p2657 A70-30722

Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required 14 p2575 A70-30819

Variational equation of ballistic trajectory applied to two point boundary value guidance problems 15 p2812 A70-32504

Control theory and calculus of variations - Conference, University of California, Los Angeles, July 1968 17 p3129 A70-34866

Unified variational theory of quadratic forms, considering linear functional on real linear space and bilinear and quadratic functionals 17 p3129 A70-34867

Optimal filter problem related to tracking, discussing mathematical formulation and reduction to variational problem 17 p3056 A70-34869

Calculus of variations used for determining optimum one dimensional MHD slider bearing with bounded control variables 19 p3436 A70-37620

[ASME PAPER 69-WA/LUB-2] Variational formalism in mechanics of continuous media in four dimensional event space, considering model with local particle interactions 20 p3724 A70-39855

Soviet book on flight vehicle optimal design algorithms, covering mathematical theory of variational method, multistage spacecraft, etc 20 p3716 A70-39898

Optimal control problem for plant including dynamics and input constraints parameters treated by calculus of variations and Pontryagin maximum principle 21 p3801 A70-40899

Nonlocal variational mechanics, considering case of stationarity with unrestricted nonlocality 21 p3939 A70-42026

Seminormality and upper semicontinuity of variable sets in optimal control 22 p4061 A70-42461

Variational formulation for steady and transient heat conduction with variable thermal conductivity, applying to cylindrical element 22 p4123 A70-42546

Singular and nonsingular optimal control problems, deriving sufficient conditions for nonnegativity of second variation 23 p4213 A70-44908

Linear elasticity with constraint couples, establishing existence theorems by variational methods 24 p4420 A70-45267

Linear elasticity with constraint couples, establishing existence theorems by variational methods 24 p4420 A70-45267

CALIBRATING

NT WIND TUNNEL CALIBRATION

S/N fatigue life gage for nondestructive evaluation of cumulative damage, discussing calibration and two step, block and random tests 01 p0053 A70-10009

Absolute calibration method for daily solar flux density discrepancies measurements at UHF, describing equipment and error analysis 01 p0168 A70-10259

Radiometric method for calibrating loss of multimode antenna-feed components with linear or circular polarization, deriving calibration and error analysis equations 01 p0050 A70-10711

IR spectrum of Jupiter with calibrations from laboratory studies of methane and ammonia bands 02 p0378 A70-12559

Phase measuring scheme for large radio telescope array, describing constant-phase calibration signal production 02 p0269 A70-12583

Turbulence characteristics in liquids measured by hot film anemometry, discussing calibration methods selecting criteria as temperature control, drift influence and relative speed determination 02 p0303 A70-12687

Transient and steady state radiation heat flux sensors calibration by developing and evaluating heat flux source 03 p0606 A70-13558

Cryogenic temperature sensor calibration with automated data readout for spacecraft accuracy requirements, describing potentiometric system 03 p0486 A70-13561

- Surveyor TV camera conversion from qualitative viewing device into quantitative measuring instrument by calibration coupled with data processing program [JPL-TR-32-1374] 03 p0490 A70-13662
- Spectroscopic calibration of laser lines at simultaneous carbon dioxide and nitrous oxide transitions in gas flow, showing abnormal line intensity 03 p0501 A70-13685
- Prelaunch photometric calibration of Surveyor TV system for reconstruction of lunar terrain televised pictures permitting system lunar performance prediction [AIAA PAPER 68-1138] 04 p0692 A70-15405
- Piezoelectric sensing diaphragm for detection of micrometeorites in space, noting vibration mode and effect of small beads contact time on calibration errors 04 p0695 A70-15567
- In-flight radiometric calibration of low brightness OGO 4 airglow photometer 04 p0696 A70-15645
- Airborne system for calibrating remote precision clocks using two way radio transmitter, measuring error by system similar to radar beacon transponder system 05 p0844 A70-15773
- Neutron monitor calibration method to eliminate natural cosmic ray background, decreasing errors due to ray intensity variation 05 p0846 A70-15938
- Solar neutrino detectors calibration with artificial neutrino sources produced by reactors, electron and proton accelerators 05 p0846 A70-15953
- Lasers for optical inspection of components and calibration of machine tools 05 p0860 A70-16823
- Transition probability and Stark profile of H alpha standards for absolute intensity calibration of spectroscopic data from thermal shock tube plasma 05 p0853 A70-17083
- Calibration for five hole spherical pitot probe plotting data for velocity, inclination and static pressure factors 06 p1063 A70-17621
- Turbine flowmeter in-place calibration for measuring cryogenic propellant flow rates in rocket engine testing 06 p1071 A70-18448
- Liquid and slush hydrogen gravimetric flow calibration system for research in slush generation, slush fluid mechanics and flow instrumentation 06 p1031 A70-18449
- HR diagram calibration based on proper motions and radial velocities, deriving absolute magnitudes and statistical parallaxes 06 p1149 A70-18456
- Yawed hot wire measurements of turbulence fluctuations, discussing calibration and mutual interference of adjacent wire and wire supporting prongs in X-ray wire case 06 p1071 A70-18487
- Piezoelectric accelerometer transverse sensitivity calibration using reference accelerometer comparison technique 06 p1073 A70-18599
- Antenna calibration by measuring emission of absorbing black disk positioned in Fresnel region 07 p1239 A70-18759
- Calibrating rods design for vibrating components stress measurement gauges 07 p1400 A70-18822
- Optical density vs illumination amount characteristic curve determined for photometric calibration of astronomical photographs of celestial bodies 07 p1279 A70-19046
- Optical polygon calibration by interferometric method using He-Ne laser light source 07 p1297 A70-19227
- Mechanical shock accelerometer calibration by light frequency Doppler shift measurement using laser interferometer and single sideband carrier insertion circuit 08 p1493 A70-20602
- Sewage water flowmeter calibration, analyzing error propagation and tolerance 09 p1672 A70-22027
- Piezoelectric quartz and tourmaline pressure gages static calibration, evaluating errors 09 p1675 A70-22599
- Flashtube photostimulators for examining human physiological response, discussing design and calibration 09 p1624 A70-22673
- Calibration of shear sensitive cholesteric liquid crystals film, measuring shearing forces and scattering light intensity 09 p1656 A70-22992
- IR thermometers in situ calibration, analyzing maximum error due to reflection effect 09 p1684 A70-23536
- Abbot pyranometer as reference standard for calibration, reporting performance tests of time constant, cosine response and attitude 10 p1886 A70-23933
- Narrow band atmospheric noise peak field strength measurement, describing design and calibration of noise meter output unit 10 p1832 A70-23998
- Thermodynamic properties of periodically variable air volume in pneumatic pressure generator of pressure sensor calibration bench 10 p1863 A70-24027
- Vacuum chamber for adjusting and calibrating spaceborne optical instruments used in studying UV radiations 10 p1860 A70-24479
- Microwave waveguide insertion-loss calibrations, comparing cavity Q and direct measurement methods 10 p1854 A70-25315
- Atomic frequency standards for phase calibration of large aerial arrays applied to radioheliograph 11 p2019 A70-26300
- Precise sweep calibrations and simultaneous spectrum recording for high resolution nuclear magnetic resonance spectroscopy 11 p2052 A70-26375
- Solar magnetograph modified to simplify calibration, using polarimeter with special exit slit geometry 11 p2057 A70-26650
- Electron beam density probe calibration for earth atmospheric reentry vehicles communication 12 p2230 A70-26982
- Digital closed-loop inflight calibration system for spaceborne particle spectrometers, utilizing cesium iodide crystal and programmable photomultiplier dynode supply 12 p2232 A70-27405
- Intra- and extragalactic distance indicators and Hubble constant calibration 12 p2301 A70-27581
- Turbine flow meters dynamic calibration employing sinusoidally perturbed orifice flow 12 p2236 A70-28033
- Ballistic pulsed photometer calibration without etalon light pulse using radiation sensitivity, oscillation period and galvanometer damping 12 p2238 A70-28179
- Black body design for radiometry, discussing error sources in calibration 13 p2410 A70-29658
- Aircraft altimeter measurement for vertical separation based on atmospheric pressure unit changes /Cayleys/ compared with linear measurements in meters and feet 13 p2411 A70-29778
- Narrow band photometry calibration, using model stellar atmospheres and laboratory data for high resolution synthetic spectra of G and K giant stars 14 p2639 A70-30728
- Data flow in computerized automatic data acquisition systems, considering systems traceability of calibration to national standards 14 p2554 A70-31110
- Humidity calibration utilizing precision wide range optically controlled thermoelectrically cooled dew point hygrometer 14 p2587 A70-31165
- Radiometers calibration equipment maintaining radiation standards, investigating long and short waves by digital voltmeter coupled to paper tape punch 15 p2735 A70-31806
- Light sources design with variable uniform luminance for space exploration cameras calibration [JPL-TR-32-1470] 15 p2737 A70-32037
- Photometric calibration changes in EUV solar satellite instruments during orbital operation 15 p2737 A70-32045
- UHF ground communication dish antennas transmit and receive gains calibration by communication satellite repeater 16 p2872 A70-32967
- Simple harmonic scotch yoke mechanical oscillator for strain gauge accelerometer calibration in VLF range 16 p2900 A70-32995
- Admittance calibration of short HF through flow pneumatic lines, using hot-wire anemometer [ASME PAPER 70-FE-10] 16 p2891 A70-33628
- HF shaker for accelerometer calibration and resonance evaluation, discussing construction materials, accuracy and test results 16 p2889 A70-34021
- German monograph on artificially accelerated proton measurements for ionization calorimeter calibration and cosmic radiation energy spectrum analysis during balloon flight 17 p3081 A70-34572
- Laser interferometry for accelerometer and dynamic pressure transducer calibration and vibration measurement 17 p3089 A70-35124
- Humidity measurement and calibration systems, considering automatic optical dew point hygrometry 17 p3089 A70-35172
- Piezoelectric accelerometer reference systems calibration by function separation 17 p3089 A70-35173
- Exciter and instrumentation of vibration transducer calibration system 17 p3089 A70-35179
- Pressure transducers primary calibration to 10 kHz, using shock tube for step function excitation 17 p3093 A70-35486
- Adiabatic calorimeter for heat flux sensor contact calibration, describing operational principles and design 18 p3257 A70-36115
- Error sources in carbon black coating on thin foil heat flux sensors accounting for false altitude effects in vacuum calibration 18 p3262 A70-37100
- Antenna calibration by measuring emission of absorbing black disk positioned in Fresnel region 18 p3233 A70-37103
- Pressure sensors for large frequency and amplitude measurement, discussing calibration with square signal generator 18 p3262 A70-37210
- Ultrahigh vacuum gages absolute calibration by controllable conductance method, discussing accuracy 19 p3421 A70-37463
- Cryogenic temperature sensor with linear characteristics from 150 to minus 452 F, describing calibration and testing 19 p3425 A70-37883
- Dynamic pressure transducer calibration system using fluidic pressure generators 19 p3358 A70-37897
- Automatic calibration verification of subcarrier telemetry discriminators with selective channel readjustment 19 p3383 A70-37902
- ILS glide slope calibration using optically projected digital codes as reference 19 p3464 A70-37912
- Heat flowmeters calibration by conductive method, reducing error due to radiative, conductive and convective losses 19 p3430 A70-38522
- Orbital and physical parameters of calibration satellites launched into right circular cylinder and right circular cone 19 p3382 A70-38894
- Phytoactinometers and phytopyranometer graduating methods, discussing measurement of photosynthetically active radiation 20 p3626 A70-39035
- Short wave calibration system for net pyradiometers, using source with intensity and spectral distribution comparable to solar radiation 20 p3628 A70-39147
- Accelerometer calibration in low g range by mass attraction as equivalent acceleration input [AIAA PAPER 70-1030] 20 p3631 A70-39507
- Self calibrating TRIM gyromonitor inertial platform with gyroflex gyro, describing operation and performance [AIAA PAPER 70-1012] 20 p3667 A70-39521
- Precise sensing systems and instruments calibration with respect to inertial frame of reference for geokinetics [AIAA PAPER 70-958] 20 p3622 A70-39571
- Navigation instrument geometrical calibration by natural satellites and reference stars during interplanetary flight [AIAA PAPER 70-1023] 20 p3669 A70-39586
- Teleradiometer calibration in background radiation absence, using distant and finite point source method and collimator means 20 p3633 A70-39798
- Weighing systems electronic load cells calibration for tension and compression loading, attributing non-repeatability to bending moments [SAWE PAPER 816] 20 p3634 A70-40356
- Optimum calibration intervals determination for obtaining instrument maintenance quality level at low cost 20 p3634 A70-40452
- Installed system calibration thermocouples using temperature plateaus due to pure metals melting and freezing heat of fusion 21 p3823 A70-40857
- Calibration data correlation for constant temperature hot film anemometer for low speed nonisothermal laminar air flow, using modified King law 21 p3828 A70-41475
- Laser heterodyne system for nonisotonic vibration measurements, describing calibration and use 22 p4049 A70-42526
- Ultrahigh vacuum calibration system for vacuum gages and mass spectrometers based on pressure attenuation and molecular beam techniques 22 p4029 A70-42620
- Precision gimbaled sensor pointing system calibration data errors due to misalignments and inaccuracies in transducer readout 22 p4040 A70-43587
- Apparatus characteristics determination for ultrasonic inspection, recommending calibration block 22 p4041 A70-43622

Thermal calibration errors and sensitivity equations for hot-wire anemometers 23 p4195 A70-44288

Pressure sensor testing and calibrating at cryogenic temperatures, describing special test rig structural, insulation, fittings and materials requirements 23 p4178 A70-44846

Cryogenic thermocouples of various metal pairs for low temperature measurements, discussing performance tests and calibrations 24 p4378 A70-45385

CALIFORNIA

California future transport complex, considering STOL and ESTOL /extremely short takeoff landing aircraft/ design requirements 06 p0985 A70-17197

Ozone concentration in San Francisco Bay Area, discussing temperature inversion, air pollution, destruction rate and distribution patterns of oxidants 18 p3284 A70-35945

CALORIC REQUIREMENTS

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure 09 p1623 A70-22088

Space diets tests for mean DAR of proteins, carbohydrates, fats and water, considering body weight and required energy expenditure 15 p2693 A70-32684

Growth and caloric intake of rats exposed to high altitude dependence on high carbohydrate, protein and fat diets 22 p3967 A70-42458

Extreme environmental temperature effects on hepatic amino acid catabolism in rats attributed to caloric deficiency 23 p4148 A70-44790

CALORIC STIMULI

Norepinephrine-induced depolarization effects on brown fat thermogenesis in cold-acclimated rats determined from in vivo measurement of intracellular potentials 05 p0799 A70-16020

CALORIMETERS

Constant magnetic fields effects on blood coagulatory processes, describing microcalorimetric determination 01 p0015 A70-10372

Adiabatic calorimeter for exothermic chemical reactions determining heats of polymerization, curing rate and thermal decomposition rates as temperature function for high energy propellants 04 p0688 A70-14711

Unsteady calorimetric sensor for measurement of heat transfer between gas jets and solid targets 06 p1064 A70-17857

Wall roughness effects on model heat transfer in high Reynolds number shock tunnel milliseconds flow using thick film fast response calorimeter 06 p1070 A70-18446

Sea level testing of magnetic spectrograph and calorimeter apparatus for studying cosmic ray spectra at different atmospheric depths 08 p1560 A70-20474

Waveguide master short circuit devices reflection coefficient measurements by microcalorimeter 09 p1638 A70-23322

Constant temperature /phase transition/ calorimeter errors in measuring laser energy using ice as working medium 09 p1700 A70-23659

Cascade showers in horizontal flux of cosmic rays measured by ionization calorimeter 09 p1747 A70-23730

Guarded disk type emissometer for hemispherical emittance measurements of sample materials in 88 to 420 K range based on steady state calorimetry [AIAA PAPER 69-600] 13 p2404 A70-28524

Glass disk calorimeter for measuring free running and Q switched laser pulses 15 p2742 A70-32545

Thermal conductivity of gaseous and liquid hydrogen with guarded horizontal flat plate calorimeter, investigating temperature and density effects in critical region 16 p2996 A70-33011

German monograph on artificially accelerated proton measurements for ionization calorimeter calibration and cosmic radiation energy spectrum analysis during balloon flight 17 p3081 A70-34572

Laser energy parameters measurement by calorimetric methods based on radiant heating effect 17 p3106 A70-35099

Adiabatic calorimeter for heat flux sensor control calibration, describing operational principles and design 18 p3257 A70-36115

Liquid nitrogen boil off calorimeter for surface energy measurements, describing construction, calibration and instrument errors 18 p3261 A70-37089

Apollo 11 sample specific heats at 90-350 K, using adiabatic calorimeter 21 p3917 A70-41674

Isoperibol calorimetry for laser power and energy measurements, discussing boundary value problem for heat flow 21 p3838 A70-42021

Guarded electrical cylindrical calorimeter measuring multilayer insulation thermal conductivity, discussing construction, test and error 23 p4195 A70-44366

Differential scanning calorimetry and thermogravimetric analysis combination for thermochemical kinetic measurements, matching analytical and experimental curves for data accuracy 23 p4196 A70-44429

CALORIMETRY

U HEAT MEASUREMENT

CAMBER

NT CONICAL CAMBER

NT WING CAMBER

Casing and suction cone effects on fans with cambered forward curved blading 11 p1975 A70-25796

Numerical solutions of thick cambered jet flap in ground effect for flat plate and diamond shaped airfoil [AIAA PAPER 69-738] 12 p2155 A70-27199

CAMBERED WINGS

Camber and twist distributions for closed ground effect wing optimum design for zero induced drag, employing linearized theory 10 p1801 A70-24158

CAMERA SHUTTERS

Automatic exposure control system for airborne cameras, providing iris and shutter control through taking lens for sudden light changes 05 p0844 A70-15771

Microchannel electron multiplier and optical focusing output shutter tubes for high speed photography 14 p2589 A70-31403

Photographic still and high speed cameras, using Kerr effect electro-optical shutters with transmission line structure 14 p2589 A70-31404

High speed electron cameras with opening time below one nsec, discussing shutter types 14 p2589 A70-31405

Surveyor camera double acting rotary solenoid actuated focal plane shutter utilizing two blades in parallelogram linkage 16 p2914 A70-34148

Combination shutter and filter-changing mechanism for spacecraft vidicon cameras 16 p2914 A70-34150

Spaceborne narrow band TV system with image memory tube and electronic shutter, noting variable exposure time, motion compensation and multimode scanning 17 p3089 A70-35267

Event-triggered high speed spectrograph shutter, studying shock tube plasmas 20 p3630 A70-39484

Partial frame shutter for high speed rotating mirror camera, using explosively driven opaque dust cloud [SMPT PREPRINT 33] 22 p4033 A70-43044

Automatic shutter for recording holograms with laser light, controlling exposure time by photoconductor cell 23 p4197 A70-44472

He camera with reduced linear absorption coefficient for contact microradiography, relating exposure, X ray wavelength and atmosphere 01 p0084 A70-10013

Automatic four axle satellite tracking camera design and operational principle, examining lens aberration 02 p0294 A70-11771

Rb-75 adapted reconnaissance cameras error sources on basis of processed Echo 2 satellite photographs 02 p0294 A70-11772

Planetary film system /PFS/ camera-processor-scanner for scientific spaceborne applications, detailing design and performance 03 p0490 A70-13664

Multiband photographic system for automatic earth resources aerial sensing and lunar orbital mapping with manual override provisions [AAS PAPER 69-582] 04 p0687 A70-14657

Cameras photogrammetric parameters determined from stellar photographs, considering distortion components, reference points, etc 05 p0852 A70-16921

Aircraft mounting plate for 70-mm multispectral mapping quadricamera assembly to photograph wildland and agricultural resources 08 p1497 A70-21542

Stars photographic position determination errors with NAFA-3C/25 camera, comparing films and plates 09 p1673 A70-22164

Wide angle electronic camera for astronomical photometry designed to seek photometric standard stars remote from nebular regions 09 p1681 A70-23313

Airborne camera resolution degradations /window losses/ introduced by multilayering wedge, irregularity and structural deformation 09 p1687 A70-23767

Soviet cameras for photographic observation of artificial celestial bodies, noting equatorial platform mount, mirror lenses and installations 10 p1892 A70-25128

Three camera method for studying upper atmosphere winds via smoke trails providing wind velocity, earth coordinate data and error indication 14 p2607 A70-30572

Nimbus weather satellite as laboratory for sensors collecting data for global weather system, describing launching, attitude control systems and cameras 14 p2654 A70-31149

Cloud cover stationary pictures by spin-scan camera in synchronous orbit over Pacific converted into motion pictures showing cloud pattern changes and storm development 14 p2587 A70-31150

Light sources design with variable uniform luminance for space exploration cameras calibration [JPL-TR-32-1470] 15 p2737 A70-32037

Imaging type electro-optical detection systems design for passive night surveillance, building camera system and testing in helicopters and fixed wing aircraft 16 p2903 A70-33127

Aerospectrometric camera facilitating spectral brightness coefficients determination for object identification 16 p2908 A70-33227

Surface temperature changes measurement with thermovision camera, discussing calibration and recording 16 p2911 A70-33775

ATS spin scan cloud cameras mechanical design and operation 16 p2914 A70-34149

Astrophotograph optical center coordinates and camera focal length calculations 18 p3260 A70-36992

Cooled antimony-caesium film photoelectric effect for weak luminous flux, examining electronic camera reciprocity 19 p3427 A70-38175

Artificial satellites photographic observation by camera, describing sighting system, tracking adjustments and shutter controls 19 p3433 A70-38793

Aerial cameras for topographic mapping, emphasizing geometrical image accuracy, optical picture quality and shutter performance 21 p3826 A70-41268

Satellite tracking camera lens-distortion coefficient from comparison of standard stellar and measured X-Y coordinates 22 p4029 A70-42596

Apollo 11 and 12 close-up lunar surface photography, describing specially designed camera 23 p4194 A70-44255

Internal and external orientation elements of aerial cameras from star photographs on clear dark sky 24 p4333 A70-45198

Vibration transfer coefficient of aerial camera-photographic assembly system for shock absorption during surveys 24 p4333 A70-45200

Aerial survey cameras exposure time automatic control circuits for high quality photographs with constant integral density 24 p4334 A70-45497

CANADA

Cosmic ray latitude survey in Canada using airport sites, noting ground snow effect on neutron monitor counting rate 01 p0167 A70-10227

ARCOM earth terminal for Domestic Satellite Communication System bringing telephone, TV and data service to northern Canada 09 p1656 A70-22945

Canadian geostationary satellite communication system design and performance, discussing transponder with six RF channels [AIAA PAPER 70-429] 11 p1996 A70-25402

Canadian domestic satellite communications policy, discussing Telesat Canada for commercial telecommunications services [AIAA PAPER 70-428] 11 p2152 A70-25416

TV network distribution in Canada by communications satellite and terrestrial microwave links, discussing signal to noise ratios and picture quality [AIAA PAPER 70-430] 11 p1998 A70-25417

Report to COSPAR on space research in Canada, covering Alouette satellites, ISIS I, international cooperation, etc 15 p2829 A70-31708

Lake covered ancient meteorite impact crater in Canada, noting eroded rim and microscopic shock criteria
15 p2732 A70-32849

Canadian civil aircraft bird hazards problem and alleviating measures including airport surrounding lands control
18 p3212 A70-35989

CANADAIR AIRCRAFT
NT CL-84 AIRCRAFT
Digital data acquisition system for CF-5A flight test program, discussing recording system design
19 p3384 A70-38532

CANADAIR CF-104 AIRCRAFT
U CANADAIR AIRCRAFT
U F-104 AIRCRAFT
CANADAIR CL-84 AIRCRAFT
U CL-84 AIRCRAFT
CANADIAN SHIELD
Canadian Shield ridges and meteorite impact scars, discussing state of earth crust during meteoritic bombardment of earth and moon
08 p1563 A70-20500

CANARD CONFIGURATIONS
Canard and variable geometry aircraft designs noting SAAB 37 Viggen performance
10 p1805 A70-24764

CANCER
Hereditary UV luminescence of transplanted cancerous and lymphosarcomatous cells in mice and rats after ionizing radiation exposure
13 p2358 A70-29341

Lasers for surgical applications, cancerous tissue treatment, ophthalmology and comparison with RF diathermy
24 p4308 A70-45569

CANISTERS
U CANS
CANONICAL FORMS
Incomplete Airy functions application to wave diffraction problems as canonical functions
01 p0144 A70-11090

Canonic equations of motion of heavy solid body with fixed point
01 p0145 A70-11436

Symmetric Boolean function detection by method using potential concept, determining alpha numbers with potential values for canonical terms
02 p0324 A70-12188

Distribution of zeros of solutions of canonical fourth order linear differential equations
04 p0713 A70-14675

Hori canonical equations solved by eliminating short period terms in general planetary theory, noting reduction to systems of linear differential equations
05 p0907 A70-16160

Perturbation theory based on Lie transforms, reducing Deprit equation to generate general recursion formulas
05 p0908 A70-16336

Birkhoff normalizing canonical transformation built at elliptic type of equilibrium without internal resonance, using Lie transforms
05 p0909 A70-16340

Particles infinite systems equilibrium state by canonical ensemble theory, demonstrating existence and uniqueness of limiting distribution functions dependence on density
07 p1333 A70-18936

Hori canonical equations analytical solution generalization resulting from elimination of short period terms of first order planetary theory
08 p1575 A70-21239

Phase variable canonical form for time varying multivariable systems requiring less computational effort
08 p1463 A70-21645

Random process represented in canonical expansion form simulated by method of prognosis of reliability
11 p2022 A70-25344

Perturbation function of first order general planetary theory using Hori canonical variables, revealing mixed secular term of determining function
13 p2487 A70-28708

Energy and canonical momentum relationship in relativistic mechanics, discussing particle production and annihilation
13 p2453 A70-29721

Critical inclination problem, discussing canonical variables and Bohlin Zeipel technique
14 p2639 A70-30707

Canonical representation for nonlinear differential equations periodic solutions
14 p2658 A70-30846

Localized states reconstructed as superposition of canonical states, using hyperplane generalization
15 p2766 A70-31437

Scalar-tensor theory in canonical form, discussing neutral particle and electron self energy problem
15 p2773 A70-31439

Nonlinear higher order canonical time lag equations initial and boundary value problems solutions by approximate iterative two way integration
15 p2767 A70-32171

Optimal trajectories analysis by canonical transformation for obtaining solution to Hamilton-Jacobi equation without quadratures
16 p2943 A70-33899

First order difference equations for dynamical systems from Hamilton canonical equations
17 p3129 A70-34959

Existence and uniqueness theorem for boundary value problem solutions to nonlinear canonical ordinary differential equations
17 p3131 A70-35339

Canonical coordinates for numerical computation of free surface flows, considering steady motion and elliptic partial differential equations
19 p3457 A70-37679

Sampled data compensators hybrid realization for discrete controllers, selecting canonical representation with minimum number of delay elements
22 p4002 A70-42846

Perturbation theories based on canonical transformations, examining von Zeipel theory and Hamiltonian functions
22 p4109 A70-43749

Static spherically symmetric charged mass distribution exact solutions derived for electrons in scalar tensor theory of gravity by Hamilton-Jacobi method
23 p4222 A70-44403

CANOPES
Parawing canopy behavior during deployment in free flight at specific altitudes and dynamic pressures [AIAA PAPER 70-1189]
21 p3751 A70-41804

Hi-glide personnel canopy /Para-Foil, Parawing, Sailing, Volplane/ technology capability requirements identification from performance parameters tradeoffs [AIAA PAPER 70-1194]
21 p3753 A70-41822

Parachute canopy surfaces transient aerodynamic pressures during unsteady processes, using piston theory [AIAA PAPER 70-1175]
21 p3754 A70-41838

Snatch force during lines-first deployment of aerodynamic decelerator, including effects of canopy skirt acceleration and suspension wave propagation characteristics [AIAA PAPER 70-1171]
21 p3754 A70-41842

CANS
Canister for protecting DC motors in Isis 1 antenna unit, noting pressure monitoring device and shaft seal
17 p3100 A70-34753

CANT
U SLOPES
CANTILEVER BEAMS
Optimal dynamic design of system consisting of elastic cantilever rod with two concentrated masses subjected to harmonic vibrations under force at free end
02 p0384 A70-11739

Finite difference method applied to solving equations of motion for computing natural torsional vibration frequencies of pretwisted cantilever beams
03 p0595 A70-13811

Frequency equation for flexural vibration of simply supported beam, considering tabular procedure for cantilever beam
03 p0602 A70-14330

Dynamic torsion of anisotropic circular cantilever beams and small pitch diameter springs under linear time dependent moment calculated by Saint Venant method
06 p1037 A70-17862

Stress corrosion testing of vanadium alloys using precracked specimens in cantilever beam apparatus, discussing strain hardening exponent role and propagation rates
07 p1306 A70-19299

Saint Venant principle in cantilever sandwich beams under two statically equivalent load systems, considering Young moduli effects
07 p1406 A70-19328

Geometrical-mechanical properties in terms of interlaminar shear stress of composite cantilever beams under end load
07 p1412 A70-19965

Stresses and displacements in largely deflected cantilever beams subjected to gravity using photoelasticity
08 p1593 A70-21619

Rotating cantilever beams mounted on disk periphery, analyzing forced and free vibrations characteristics
09 p1781 A70-23283

Nomogram selecting dimensions of steel or Al alloy cantilever beams for transducer design using strain gages
10 p1890 A70-24593

Finite deflections of nonlinearly elastic cantilevered bar
11 p2140 A70-26481

Cantilevered column stability under constant follower load in presence of external damping
13 p2510 A70-28733

Fracture mechanics and stress analyses comparison for fatigue cracked steel cantilever beam stress corrosion specimens
15 p2755 A70-31473

Free oscillations of Euler-Bernoulli and Timoshenko cantilever beams of variable cross section, obtaining approximate modes and natural frequencies bounds
16 p2994 A70-34234

Time-average holographic interferometry applied to HF transverse vibrations of uniform cantilever beam, noting correlation with Timoshenko beam theory
17 p3083 A70-34961

Kinetic instability of elastic cantilever beam under excitation by rotating masses, relating bending and torsional vibrations to masses angular velocity
18 p3334 A70-35960

Damped linearly tapered cantilever beam elastically restrained against rotation at wall, analyzing displacement under general initial and distributed load conditions
19 p3539 A70-37802

Asymmetric snap-through buckling in cantilevered column restrained at tip by stiff wire, discussing ratio of flexural rigidity to extensional stiffness
19 p3549 A70-38670

Perforated cantilever beams and plates vibration damping capacity improvement by stress concentration introduction
21 p3933 A70-40729

Subminiature three directional cantilever beam accelerometer using semiconductor strain gages
21 p3824 A70-40861

Assumed vibration modes generation method in beams with arbitrary boundary conditions, applied to cantilevered beams, using modified Rayleigh-Ritz analysis
21 p3934 A70-40923

Cantilever bending under gradual contact with cylindrical supporting surface compared with solution by elasticity theory
21 p3934 A70-41251

Postbuckling of wire restrained elastic cantilever column with imperfection sensitivity
22 p4116 A70-43204

Cantilever beam transient response measurement by stored beam /real time/ holographic interferometry combined with high speed motion picture photography
22 p4039 A70-43452

Cantilever beam optimal stability under concentrated and uniformly distributed bending loads
23 p4268 A70-44171

Prismatic isotropic homogeneous cantilever beams flexure for case of power series conformal mapping function
23 p4275 A70-44944

CANTILEVER MEMBERS
NT CANTILEVER BEAMS
NT CANTILEVER PLATES
Cantilevered and doubly supported structures calculated for critical aeroelastic divergence speed resulting from lift and drag
01 p0200 A70-10551

Cantilever cylindrical shell stability under shearing stresses created by transverse force applied to free end
07 p1403 A70-19116

Rotating parabolic mirror /antenna/ cantilever suspension rigidity with emphasis on rigidity of central bushing
08 p1586 A70-21056

Natural vibration analysis of uniform cylindrical and cantilever rectangular tubes with cutouts
10 p1961 A70-25057

Flutter characteristics of uniform cantilever wing with concentrated inertias using Direct Matrix method
10 p1963 A70-25071

Natural frequencies of thin cantilever cylindrical shells, using Flugge equations of motion and Rayleigh-Ritz method
11 p2146 A70-26704

Lateral motions of vertical uniform tubular cantilever conveying fluid, considering oscillatory instability at high flow velocities
13 p2511 A70-28741

Natural vibrations frequency of tubular cantilever pipe with fluid flow, solving differential equation of motion by Ritz method
14 p2567 A70-31426

Cantilevered tube conveying fluid, calculating forced vibration under time dependent loading and arbitrary initial conditions
22 p4010 A70-42650

Undamped elastic cantilever column with concentrated masses, considering transition from stability to divergence under nonconservative forces
24 p4421 A70-45286

CANTILEVER PLATES
Vibration frequencies and modal shapes for square and rhombic cantilever plates with diamond cross section, including commercial resonance test system
01 p0199 A70-10122

Finite element bending stiffness matrices for deflections analysis of pretwisted cantilever plate subjected to static loads
02 p0384 A70-11858

Finite element method for calculating natural frequencies and mode shapes of pretwisted cantilever plates assembly of flat triangular elements
02 p0384 A70-11859

Nonsymmetric planform cantilever plate apparent mass, material properties and geometrical changes effect on vibration frequency

07 p1403 A70-19058
Flutter instability critical velocity and frequency for thin cantilevered plate with follower jet determined by Galerkin and computer simulation

12 p2316 A70-27106
Tapered cantilever Al plate load characteristics, determining elastic and plastic strain due to regular, reverse and second regular deflection sequence

15 p2821 A70-32307
Homogeneous orthotropic cantilevered rectangular plate with reinforcing ribs, calculating flutter in supersonic gas flow

18 p3336 A70-36140
Low aspect ratio cantilever plate wings supersonic bending torsion flutter speed calculation, using spanwise and chordwise variables and potential energy principle

22 p4112 A70-42276
Elastic bar attached to free edge of infinite length cantilever plate, calculating free flexural vibration for comparison with experiment

22 p4114 A70-42648
Cantilever plate random vibration response, calculating eigenvectors and natural frequencies by finite element method

23 p4270 A70-44591

CANTILEVER WINGS

U WINGS

CAPACITANCE

Equivalent circuit for trapped energy resonators and calculations of capacitance ratios for straight crested waves

01 p0088 A70-10777
Tracking method for simultaneously tuned transmitter and receiver with different maximum-to-minimum capacitance ratios in ganged variable capacitors

01 p0051 A70-10888
Shielded multiconductor transmission line capacitance calculated by integral equations with Green function kernel

05 p0820 A70-16383
Oscillatory discharge properties of capacitance power storage circuit used for pumping pulse lasers

06 p1081 A70-17768
DC capacitance measurement based on capacitor discharge using auto-oscillatory macrocharge system variant as transducer of measured capacitance, time constant and insulation resistance

11 p1982 A70-25576
Electron-hole transitions in GaAs obtained by sulfur diffusion, noting capacitance dependence on voltage at 293 and 77 K at various frequencies

12 p2287 A70-27481
Air-damped capacitance accelerometers and velocimeters in data acquisition systems using signal processing

13 p2405 A70-28813
Binary varactor diode microwave device, displaying two capacitance values in reverse bias operation for application in phased array systems and frequency control

14 p2556 A70-30919
Fluidic systems linear lumped components design with allowance for energy factor Q, investigating capacitance and inductance

15 p2678 A70-32675
MOS structures deep depletion capacitance/voltage characteristics by ramp response method

19 p3389 A70-37972
Nonlinear LC circuit with p-n junction capacitance, examining relaxation vibrations during automatic biasing

20 p3596 A70-38970
Degenerate p-n diode junction capacitance calculation, taking into account quantum and temperature effects

20 p3596 A70-39117
Pulsed coaxial plasma accelerator efficiency, examining high capacitance and axial propellant pressure gradients

20 p3693 A70-40250
Integrated directly coupled gyrator operating mode via comparison with switching elements, considering behavior under capacitance load and high pass filter application

21 p3797 A70-40793
Miniature avalanche MOS diode, investigating capacitance voltage characteristics of deep depletion regime

23 p4172 A70-44007

CAPACITIVE FUEL GAGES

Aircraft capacitive fuel gage improvement by integration with flowmeter system, DC torquer display and digital techniques, considering other measurement principles

21 p3821 A70-40619

CAPACITORS

Tracking method for simultaneously tuned transmitter and receiver with different maximum-to-minimum capacitance ratios in ganged variable capacitors

01 p0051 A70-10888

Ceramic capacitors selection considering ionization, third harmonic and HF heating control properties

09 p1642 A70-22003

Charged particle self oscillatory motion in plane condenser field, applying results to electrical measuring instruments theory

09 p1680 A70-23144

Thin film capacitive bolometer dependent on temperature sensitivity derived from electron trapping effects

09 p1683 A70-23509

DC capacitance measurement based on capacitor discharge using auto-oscillatory macrocharge system variant as transducer of measured capacitance, time constant and insulation resistance

11 p1982 A70-25576

RF admittance and electric field of plane grid capacitor in hot collision free magnetoplasma in parallel magnetic field dominated by Bernstein modes

13 p2467 A70-29910

Sawtooth waveform generator using linear discharge of capacitor

15 p2714 A70-32701

Ripple filters for DC power supplies using reliable small capacitance capacitors suitable for spacecraft applications

15 p2714 A70-32806

Matrix condenser for tuning hybrid thin film self excited quartz oscillator with common base transistor configuration, discussing electrical properties and fabrication

20 p3597 A70-39257

Electrolytic capacitor current pulse networks for quasi-steady MPD arc thrusters, determining series resistance effects on energy transfer

[AIAA PAPER 70-1082]

20 p3568 A70-40253

Sheaths effect on capacitance of plane grid capacitor in plasma, discussing satellite aerials admittance

21 p3792 A70-42046

CAPACITY

Capacity bounds in microwave filters computed for periodic cylindrical rods between parallel ground planes using variational principles

10 p1850 A70-24834

CAPE KENNEDY LAUNCH COMPLEX

Cape Kennedy vertical wind speed profiles measured by spectral analysis using fast Fourier transform method

02 p0325 A70-12285

Apollo/Saturn 5 Kennedy Launch Complex 39 /LC-39/ physical characteristics emphasizing high launch rate capability, economy of operation and superior flexibility

[SAE PAPER 690714]

05 p0825 A70-15853

Boundary layer atmospheric turbulence at Kennedy Space Center obtained for engineering spectral model, discussing energy balance

10 p1911 A70-23926

Cape Kennedy peak wind profile probabilities at 10-150 meters for various exposure times

14 p2607 A70-30581

CAPILLARIES

Vapor capillary /melt/ depth in electron beam welding, considering electron energy, radiative dissipation, etc

21 p3833 A70-41124

CAPILLARIES (ANATOMY)

Radial immunodiffusion for serum proteins quantitation adapted to capillary blood and compared with results for venous blood

07 p1214 A70-19932

Permeability disturbances in skin capillaries of rabbits and rats following exposure to Sr90-Y90 beta radiation

09 p1619 A70-22789

Critical oxygen supply of cerebral mitochondria and intercapillary oxygen transport

10 p1821 A70-25080

High altitude acclimatization effect on tissue capillarity, investigating physiological evidence in rats by tissue diffusing capacity measurement

10 p1823 A70-25220

Capillary details in lentiform nucleus region of human brains, measuring blood vessels diameters, lengths and densities

12 p2173 A70-28347

Peripheral vasculocapillary blood circulation by television UV capillaroscopy and electronic finger plethysmography

19 p3370 A70-38212

Lung alveolar and capillary wall structure in mammals under normal conditions, transverse acceleration and mechanically changed pulmonary circulation

20 p3575 A70-40190

CAPILLARY CIRCULATION

U CAPILLARY FLOW

CAPILLARY FLOW

Biomechanics of microcirculation, discussing rheological characteristics of blood, erythrocyte and vessel wall, hydrodynamics of erythrocyte-shaped bodies mathematical models, etc

01 p0039 A70-11160

Capillary blood flow, discussing red blood cells deformation, motion, pressure drop and plasma flow /bolus/ between red cells

02 p0238 A70-12545

Time varying blood flow in pulmonary capillaries affecting overall diffusing capacity and alveolar-arterial oxygen tension gradient

03 p0421 A70-15770

Laminar capillary jet of viscoelastic fluid, discussing breakup, nonNewtonian jet stability and elastic properties

03 p0468 A70-13782

Myocardial blood flow in patients with acute myocardial infarction determined from measuring effective capillary flow /ECF/ by direct counting of rubidium 86 uptake

04 p0636 A70-15468

Ultraminiature pressure sensor for continuous recording of hydrostatic pressure in renal tubules and blood capillaries

05 p0804 A70-15772

Capillary grooves effect on surface wetting and evaporation using heat transfer coefficients for grooves with triangular, semicircular and square cross sections

[ASME PAPER 69-HT-19]

09 p1790 A70-23559

Vertical liquid jets capillary instability under audio frequency disturbances, measuring disturbance growth rates for various wavelengths and fluid viscosities

09 p1664 A70-23678

Partial oxygen pressure in hyperemic earlobe capillary blood under hypoxic conditions, noting correlation with age and body weight

10 p1822 A70-25088

Human peripheral blood circulation during prolonged underwater activity, showing compensation for high humidity, noise levels, low water temperatures, isolation and confinement

10 p1822 A70-25178

Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers

[AIAA PAPER 69-529]

11 p2123 A70-26119

Meniscus curvature correlation to viscosity contrast in capillary during fluid displacement

13 p2390 A70-29633

Hybrid computer simulation of steady state oxygen transport and consumption in capillary-tissue system

15 p2694 A70-32845

Spacecraft propellant expulsion systems, comparing capillary with conventional techniques

[AIAA PAPER 70-685]

16 p2962 A70-33584

Capillary ball game phenomenon under weightlessness, showing photographs of mercury droplet reflection from fluid boundary

18 p3242 A70-36638

Viscous dielectric incompressible fluid cylinder capillary stability under small axisymmetric disturbances and axial electric field, deriving perturbed fluid flow equations

19 p3406 A70-38351

Narrow capillary supermolecular flow density relation to vapor molecule specular reflection, considering Knudsen flow conditions

24 p4381 A70-45491

Subminiature transistor photosensor for direct measurements of capillary blood cell motion

24 p4309 A70-46119

CAPILLARY TUBES

Thermally ionized cesium plasma viscosity at high temperatures in vacuum using capillary tube assembly

11 p2092 A70-26731

Electrocapillary transducers filled with mercury and electrolyte solution for vibration measurement, analyzing seismic operation character

12 p2235 A70-27684

Gas transfer through silicone elastomer capillaries wall in variable pressure chamber

14 p2541 A70-30386

Low noise He-Ne laser with capillary elements, measuring current threshold of noise free operation as function of design parameters

19 p3448 A70-38512

One-step closure sealing of pressurized stainless steel capillary tubes by resistance pinch welding

21 p3832 A70-40789

Capillary boiling and heat transfer for coolant fluids, using motion photography and visual observations

23 p4277 A70-44320

CAPILLARY WAVES

NT BAROCLINIC WAVES

NT GRAVITY WAVES

Stimulated light scattering by capillary waves on incompressible fluid surface or by Rayleigh waves on surface of isotropic solid body with small optoelectronic moduli

16 p2951 A70-33195

Liquid He surface layer thickness as function of temperature, considering capillary waves effect due to gravity

16 p2952 A70-33288

CAPSULES

Pressure and velocity ratios and energy requirements dependence on flow parameters of cylindrical capsule in horizontal pipeline

09 p1665 A70-23747

CAPSULES [SPACECRAFT]

U SPACE CAPSULES

CAPTIVE TESTS

NT STATIC FIRING

NT STATIC TESTS

Ground environmental simulation test for captive carrying cycling of air launched missiles

CAPTURE CROSS SECTIONS

U ABSORPTION CROSS SECTIONS

CAPTURE EFFECT

Sun-planet systems capture and catapult capacity for interstellar bodies under close flyby conditions

Jupiter capture of comets with parabolic orbits taking into account solar gravitational influence

Vacuum deposited thin cadmium sulfide films semiconducting properties, discussing captured free carriers effects on temperature dependence of dark and photo current

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit

Neutron formation multiplicity during capture of cosmic ray muons by Zn and Sb nuclei, noting agreement with one-third law

Saturation homogeneity ascribed to resonant photon capture in emission of neon laser

Neutron capture effects in Gd from Norton County meteorite by isotopic composition analysis

Gas laser active medium nonlinear polarizability calculations with allowance for resonance emission capture effect on atomic velocity and population distributions

Solar neutrino fluxes, calculating capture rates and primordial helium abundance

Semiconductor capture level parameter determination, using thermostimulated conductivity

Ion-molecule pair relative motion in capture collisions, using computer-made movies

Capture coefficients and reflected flux measurements for gaseous nitrogen molecular beams impinging on solid nitrogen cryodeposit surface

CAPTURED AIR BUBBLE VEHICLES

Heaving and pitching motion analysis of wave action-induced pressure gradients in captured air bubble /CAB/ ship bubble chamber, discussing fan system design

NT TUNGSTEN CARBIDES

NT VANADIUM CARBIDES

NT ZIRCONIUM CARBIDES

Tungsten effect on phase transformations and carbide reactions to attain equilibrium at 850 C in Ni-base superalloys

B-C alloys chemical composition effect on high temperature stability in pure oxygen

Carbide rupture energy in wear resistant alloys during abrasion, considering metallographic data and energy parameters

Neutron irradiation and annealing effects on lattice constants of titanium and chromium carbides analyzed for X ray diffractions

Single crystal carbides as high temperature structural materials, noting titanium carbide properties and strength-to-density ratio of B-doped crystals

Carbide layer formation on Ta and Ta-W alloys, discussing Ta-C phase diagram and phases

Microhardness of transition metals carbides measured after hot compression, suggesting dependence on statistical weight of C atoms with stable sp³ configurations

Zr, Ti, Nb and Ta carbides deposition from metal chloride, methane, hydrogen and argon mixture, studying gas concentration and temperature effects on deposition rate

Chemical compositions and structure of carbides in Fe-W-C and Co-W-C systems, clarifying eta phases

Carbide-strengthened Mo alloys dynamic strain aging processes

Methane and ethane released from Apollo 11 lunar samples by crushing or acid treatment, suggesting carbides hydrolysis as main source

Carbide precipitation in metastable beta-Ti alloys, noting precipitations confinement to grain boundaries in alloys containing 15 percent Mo

Portevin-Le Chatelier effect in carburized nickel and Ni-Co alloys, discussing carbide stability and carbon diffusion roles

Ablative composites containing in situ reaction formed refractory metal carbides

Vapor pressures and dissociation energy of yttrium dicarbide and tetracarbide over extended temperature, measured by Knudsen double focusing spectrometer

Metal matrix alloys with base of Co, Fe or Ni reinforced by transition metal carbide fibers, discussing deformation tests at various temperatures

Carbide precipitation and grain boundary migration in solution annealed duplex stainless steel as function of aging time

Mo alloying additions effects on carbide phases in Nb-C alloys

Si-carbide composites electrical conductivity from temperature and thickness dependence, obtaining volt-ampere characteristics via computer method

Pyrolytic carbide protective coating deposition from gaseous phase on spherical particles in boiling layer

CARBOHYDRATE METABOLISM

NT HYPOGLYCEMIA

Carbohydrate-phosphorus metabolites content in gophers brains under normal conditions during hypothermia and spontaneous warming at room temperature

Lipid and carbohydrate behavioral abnormalities in patients with angiographically documented coronary artery disease observed by glucose tolerance tests

Fructose metabolism in liver and extrahepatic tissues of sea level and high altitude natives, noting lactate and pyruvate accumulation in blood

Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O₂ content, noting neutrophil energy exchange disorder role

Quantitative and qualitative differences in enzyme levels of intermediate carbohydrate metabolism in obligate autotrophs *Thiobacillus thioautotrophicus* and *Thiobacillus neapolitanus*

Z axis acceleration and high temperature effects on guinea pig carbohydrate metabolism, discussing blood and muscle tissues composition

Sialic acids metabolic behavior in cerebrium, liver, myocardium and blood plasma of rats after X ray irradiation

Carbohydrate metabolism disorders in head injury cases, comparing incidence with EEG abnormalities

Anaerobic carbohydrate metabolism in aging individuals under physical loads

Glucose metabolism in chickens under chronic centrifugal acceleration, meeting increased energy requirements

NT SUGARS

Sweet potatoes productivity and nutritive value as carbohydrates source in manned space flights

Physicochemical methods of producing formaldehyde for carbohydrate synthesis in life support systems

Synthetic carbohydrates effects on *A* type clostridium perfringens, observing bacterial mass growth and protein elimination

Penicillium mutant chemical stress tolerance in boric acid and potassium chloride selective media, studying carbohydrate and inosine-5-phosphate effects on growth rate

Radial acceleration effects on tissue carbohydrate in starved female rats, observing blood glucose increase and muscle glycogen levels decrease

Physicochemical methods of producing formaldehyde for carbohydrate synthesis in life support systems

Synthetic carbohydrates effects on *A* type Clostridium perfringens, observing bacterial mass growth and protein elimination

CARBON

NT CARBON ISOTOPES

NT CARBON 12

NT CARBON 13

NT CARBON 14

NT CHARCOAL

Assimilation and metabolism of C atoms of pyruvate and acetate by strict autotrophs *Thiobacillus* cell, using radioactive substrates

Mechanical properties of carbon fiber reinforced Al, Cu and Ni, noting rope and wire applications

High strength high modulus carbon fibers for use in structural reinforced plastics, describing carbonizing and pyrolysis processes

B and C fiber unidirectionally reinforced plastic composites, discussing mechanical properties, fabrication and testing

IR spectra of four carbon stars and Sirius obtained with Michelson interferometer, indicating diatomic carbon and CO bands

Triggered spark source for multiply charged carbon ions applied to collision cross section measurements

Serrated plastic flow in stable austenitic stainless steels based on Fe/Ni, showing strength dependence on C and/or Cr presence

Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition

Carbon fiber reinforced plastics /CFRP/ uses in commercial aircraft structural component

Carbon materials manufacture, properties and applications in space technology, discussing carbon fibers, textiles, graphite, pyrolytic carbon, composites and vitreous carbon

Vacuum UV flash photolysis of carbon suboxide, noting pressure dependent reaction rates of carbon atoms with various gases

Porosity in graphitized polyacrylonitrile-based carbon fibers determined from surface area increase during heat treatment in vacuum

Activated carbons and ion exchange resins bactericidal action as function of silver coating techniques

Carbon atom RF recombination lines evaluated for conditions in H II regions and planetary nebulae

Ablation chars, carbon and graphite spectral emittance and reflectance as function of wavelength and temperature, noting applications to atmospheric entry heat shielding

Binary system Mo-C determined in temperature range 1250-2270 C, using microscopic and thermal analyses and microhardness testing

Diatom carbon swan band violet line absence from sunspot suggested in accordance with molecular equilibrium predictions

Stress distribution in restrained hyperelastic sphere based on elastomer reinforcement theory by carbon black

Carbon fiber-reinforced plastics fabrication, discussing leaky mold, prepeg and filament winding methods

C V lines measured near 1s-2p line of C VI, identifying lines belonging to various transitions

05 p0921 A70-16982

Carbon fiber structural model agreeing with experimental results

06 p1092 A70-18025

Quasi-steady radially symmetric theory of liquid drop vaporization and homogeneous combustion extended to burning of solid carbon spheres gasified by chemical attack

07 p1419 A70-18915

Carbon particles formation and growth model for cool variable carbon star atmosphere with sinusoidal carbon star atmosphere with sinusoidal temperature variations

07 p1380 A70-19260

Carbon particles formation and growth in Mira variables atmospheres, considering extinction effects on stellar structure and appearance

07 p1380 A70-19261

Fabrication and properties of carbon fibers and carbon fiber reinforced epoxy resins

07 p1318 A70-19772

Compatibility of single metal coated carbon fibers, discussing structural recrystallization in contact with Ni or Co matrix by dissociation/diffusion/precipitation mechanism

07 p1315 A70-20048

Stress wave propagation in particulate loaded carbonaceous materials induced by homogeneous laser beam

07 p1302 A70-20097

Carbon-bearing materials for modification of Mg-Al-Zn-Mn alloys filtration processes

08 p1505 A70-21132

Carbon fiber composite materials production technology, physical properties and potential applications in aerospace

08 p1527 A70-21520

Test methods for evaluating tensile, compressive, interlaminar shear and bearing strength properties of carbon yarns and flat and tubular composites

08 p1529 A70-21881

Mechanical properties characterization of unidirectional high modulus carbon fiber reinforced epoxy matrix composite

08 p1530 A70-21883

Carbon deposit formation in gas turbine engines with various fuels, studying thermal insulation properties

09 p1742 A70-22472

Combined solubility of group IVA metals and carbon in solid state molybdenum at various temperatures

09 p1704 A70-22754

Carbon fibers and fiber-reinforced composites fabrication, structural properties and uses

09 p1710 A70-22758

Oxygen reduction in sulfuric acid with phthalocyanine-carbon catalysts

10 p1829 A70-24456

Catalytic load carrying capacity of porous carbon electrodes impregnated with nickel salt and nickel boride in anodic fuel cell hydrazine oxidation

10 p1831 A70-24469

Carbon composition resistors investigated for cause of resistance dependence on thermal pulses, suggesting application as stabilization process

10 p1849 A70-24617

Vacuum condensed thin carbon films graphitization stages using electron diffraction

11 p2068 A70-25381

High strength glassy carbon fibers obtained by carbonizing extruded phenol hexamine polymers

11 p2071 A70-26672

Variable reproducible black radiator of resistance heated carbon tube designed for temperatures between carbon glowing and sublimation point

12 p2329 A70-27090

Rotational, vibrational and equilibrium molecular constants for Phillips system of diatomic carbon

12 p2275 A70-27174

Carbon in austenite derived from composition dependence of diffusivity using first order mixing statistics

12 p2256 A70-27611

Recrystallization effect on 3-D graphite orientation in carbon fibers under high temperature heat treatment

12 p2259 A70-27720

High modulus carbon fibers low angle X ray diffraction correlation to physical properties

12 p2259 A70-28050

Gas temperature effects on aerodynamic drag of carbon particles burning during nonisothermal motion

13 p2520 A70-28582

Wool felt based carbon and graphite composite materials for orthogonally isotropic high shear strength compared with rayon felt based composites

13 p2437 A70-28776

Synthetic foam material of hollow carbon microsphere fillers embedded in high compression strength epoxy resin matrix

13 p2437 A70-28780

First order statistical model for temperature dependence of carbon activity in austenite

13 p2436 A70-29605

Carbon and sulfur reactions with solar hydrogen atoms in Apollo 11 lunar samples accounting for isotopic composition of fine-grained basaltic rocks

14 p2545 A70-30791

Lattice resolution of layer planes in polyacrylonitrile based carbon fibers ground and dispersed by ultrasonic irradiation

14 p2598 A70-30793

Colloidal filler /carbon black/ reinforced rubber for various applications, noting fabrication into composite material

15 p2764 A70-31930

Carbon-graphite porous materials thermal conductivity at various temperatures

15 p2765 A70-32141

Carbon reinforcing fibers, discussing mechanical properties, production, cost reduction, etc

15 p2765 A70-32246

Air pollution by turbojets and gas turbines, discussing control of carbon particles and nitrogen oxides

16 p2963 A70-32922

Carbon ground state correlation energy calculation, emphasizing assessment of truncation error sources

16 p2954 A70-33277

Synthetic foams of high filler content, low density, high compression strength and hydrolytic stability using hollow carbon microspheres in epoxy resin matrix

16 p2936 A70-33365

Carbon fiber reinforced plastics potential as fatigue resistant materials

16 p2936 A70-33367

Venus upper atmosphere carbon atoms detection based on low resolution spectra analysis of solar illuminated atmosphere

16 p2979 A70-34036

Ultrahigh strength alpha-beta titanium alloys, examining carbon and oxygen effects on mechanical properties

17 p3121 A70-34429

UV stellar spectra absorption, considering silicon and carbon opacity effect on Balmer discontinuity and Paschen continuum

17 p3159 A70-34880

Solar C II resonance doublet profiles, discussing possible broadening mechanisms

17 p3174 A70-35862

Ultrasonic irradiation effects on steel hardenability and carbon diffusion rate during annealing, noting microstructure

18 p3273 A70-36049

Silicon-containing pyrocarbon, relating microhardness to microstructure

18 p3279 A70-37220

Ti and C effects on Fe-Cr-Ni alloys mechanical properties

19 p3449 A70-37271

Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition

19 p3453 A70-38470

Carbon composite technology - Conference, University of New Mexico, January 1970

20 p3652 A70-39201

Composite technology effects on engineering design, emphasizing carbon-carbon materials for aircraft structural weight reduction, performance improvement and high temperature applications

20 p3653 A70-39202

Unidirectional carbon fiber reinforced plastics /CFRP/ interlaminar shear strength measurements using short beam shear, notch overlap and solid rod torsion methods

20 p3653 A70-39203

Carbon/carbon composites constituent characteristics effects on thermal and mechanical properties, using polarized light and scanning electron microscopy

20 p3653 A70-39204

Chemical vapor deposition of carbon matrix material in fiber structure, investigating thermodynamic fundamentals in processes

20 p3654 A70-39207

Carbon fiber/carbon matrix composites fabrication by isotropic casting, flock and spray lay-up and pulp molding, describing physical and mechanical properties

20 p3636 A70-39208

Shaping methods for filament wound carbon structures, emphasizing matrix building by chemical vapor deposition

20 p3636 A70-39209

Unidirectional and multidirectional carbon/carbon composites quality and performance evaluation by NDT methods, including X ray radiography, ultrasonic test, pulse echo mapping, etc

20 p3654 A70-39211

Laser holography for nondestructive testing of C composite structures, reducing fringe patterns to radial deformation and surface strain for cylinders and cones

20 p3718 A70-39212

Carbon/carbon composites thermal and mechanical properties measurements by NDT including image transducer, IR scanning and ultrasonic methods

20 p3636 A70-39213

Carbons and graphites ablation tests for predicting performance under reentry conditions, considering microstructure effects

20 p3735 A70-39214

Carbon resistors negative magnetoresistance measurement near absolute zero temperature by helium cryostat, noting anisotropy

20 p3687 A70-40168

Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength

20 p3657 A70-40263

Boron vs carbon fiber reinforced plastics, discussing layer and panel structures, molded and mechanical sections, preimpregnation, cost and structural concepts

21 p3842 A70-41263

Apollo 11 lunar rocks and soil hydrogen, C and Si concentration and isotopic composition

21 p3774 A70-41568

Carbon and sulfur concentration and isotopic variations in Apollo 11 fines, breccias and fine-grained basalts

21 p3775 A70-41586

Carbon and nitrogen abundances in Apollo 11 rocks, basaltic achondrites and terrestrial basalts, using meteorite analytical techniques

21 p3776 A70-41592

Graphite and carbon fiber surfaces, correlating Raman spectrum and shear strength of composite

22 p4060 A70-43680

Mars atmospheric nitrogen abundance relative to carbon from spacecraft UV spectrometer data

23 p4238 A70-43805

Carbon ionization equilibrium in dense interstellar clouds, discussing grains and neutral atoms attenuation effects

24 p4402 A70-45387

Diffusive carbon redistribution in Mo during interaction with Ni and Cr protective coatings

24 p4364 A70-46334

CH and CD molecules UV absorption spectra, using flash photolysis of diazomethane

02 p0341 A70-11795

Vacuum UV flash photolysis of carbon suboxide, noting pressure dependent reaction rates of carbon atoms with various gases

04 p0645 A70-14391

Mars surface reddish color due to carbon suboxide suggested based on spectral reflectivity measurements and matching in laboratory

04 p0743 A70-14423

Venus clouds absorption spectra correlation with carbon suboxide frost reflection spectra, suggesting absence of carbon suboxide in atmosphere

08 p1571 A70-20911

Carbon compounds composition and origin in Apollo 11 lunar samples using pyrolytic chromatography and microscopy at elevated temperature

10 p1941 A70-24531

CH molecule line formation mechanism for 4300 Å transition in solar photosphere, noting collisions with hydrogen atoms

12 p2311 A70-28309

Pressure effects on quantum yields of carbon trioxide formation in gas phase ozone photolysis with carbon dioxide

16 p2856 A70-33653

Pressure dependence and efficiency of carbon trioxide formation in Mars and Venus atmospheres

21 p3887 A70-41107

Apollo 11 lunar fines carbon level, finding largest component carbon monoxide in complex form

21 p3778 A70-41621

Apollo 11 lunar samples organic carbon content analysis by pyrolysis hydrogen flame ionization detection

21 p3779 A70-41624

Apollo 11 lunar fines carbon compounds, examining chemical state of porphyrins, fatty and amino acids, purines, pyrimidines and carbohydrates, etc

21 p3779 A70-41625

Chemical etching for revealing structure of carbon-graphite materials subjected to different graphitization stages

23 p4209 A70-44045

CARBON DIOXIDE

- Venus upper atmosphere average rotational temperature determined from high dispersion spectroscopic observations of 7883 A carbon dioxide band
01 p0184 A70-10912
- Carbon dioxide refractivity measured under simulated Martian conditions and standard temperature and pressure, comparing results with radio occultation methods
01 p0186 A70-11085
- Vibrational relaxation times in carbon dioxide and carbon dioxide-argon mixtures at 360-3000 K, using shock tube and laser schlieren method
01 p0148 A70-11355
- Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity
01 p0069 A70-11623
- Be oxidation in carbon dioxide at high temperatures, explaining observed kinetic discontinuity in terms of oxide morphology
01 p0124 A70-11638
- Spinal cord blood flow response to carbon dioxide partial pressure in anesthetized goats
02 p0232 A70-11713
- Photoelectron energy spectra and partial photoionization cross sections for carbon dioxide determined with spectrometer at monochromatic incident radiation wavelengths
02 p0343 A70-11903
- Martian topographic contours determined from detected carbon dioxide abundances indicating large scale differences from previous data
02 p0373 A70-12390
- Temperature dependence of diffusion coefficient for carbon dioxide filled rigid polyurethane foam, using Fick law
02 p0321 A70-12524
- Atomic oxygen reaction with carbon dioxide and carbon dioxide dissociation in shock waves, using nitrous oxide decomposition for oxygen source
03 p0440 A70-13578
- Carbon dioxide supersonic flows, describing numerical integration procedure for chemical and vibrational relaxation
03 p0440 A70-13743
- Molecular hydrogen destruction by reaction with carbon dioxide ion in Martian ionosphere, discussing conversion into atomic hydrogen
03 p0575 A70-13997
- Xenon sensitized photolysis of carbon dioxide compared with direct photolysis at 1470 A resonance line
03 p0441 A70-14005
- Potential energy surface shapes for lowest states of temporary negative ions of nitrous oxide and carbon dioxide
03 p0441 A70-14008
- LF sound velocity measurement in carbon dioxide near critical point, noting existence of logarithmic divergence
04 p0718 A70-14685
- Ion-neutral reactions in carbon dioxide subjected to electron impact using mass spectrometry
04 p0646 A70-14698
- Integrated intensity measurements of carbon dioxide bands in micron regions, using self-broadening method
04 p0690 A70-15025
- Solid carbon dioxide measured for complex index of refraction at IR wavelengths
04 p0719 A70-15036
- Carbon dioxide electron impact cross sections, analyzing discrete excitation, autoionization, direct and dissociative ionization and use to aeronomy
04 p0722 A70-15121
- Time dependent transmission of carbon dioxide in air flowing through molecular sieve adsorber beds, developing and programming weighted least squares analysis
04 p0786 A70-15315
- Venus-earth carbon dioxide atomic parameters used to determine ionization and optical emission rates in Venus upper atmosphere resulting from solar cosmic rays
05 p0901 A70-16276
- High resolution Venus spectra, obtaining band spectra growth curve of C13O16O18 isotope of carbon dioxide, comparing data reduction methods
05 p0910 A70-16392
- Mariner 6 and 7 missions IR spectrometric records showing evidence of solid carbon dioxide in Martian upper atmosphere
06 p1137 A70-17194
- High fidelity simulations for environmental stress evaluations, describing carbon dioxide effects on pilots simulated ground target tracking and reentry vehicle landing
06 p0999 A70-17291
- Carbon dioxide effect on oxygen uptake during hyperventilation in normal man
07 p1205 A70-19294
- Hydrogen fluoride fundamental vibration rotation band spectral line shift and broadening due to carbon dioxide
07 p1337 A70-19365
- Spectral reflectance of carbon dioxide and water frosts at 0.8-3.2 microns, growing frosts in cold vacuum chamber from high purity gases
07 p1388 A70-19945
- Carbon dioxide adsorption and desorption in Martian bright areas, discussing assumptions relative to temperature, pressure and dust adsorption
08 p1579 A70-21566
- Relative rotational lines intensities of carbon dioxide, considering sigma-sigma transitions for abundant isotopes
08 p1549 A70-21575
- Carbon dioxide molecules dissociation along tube length, measuring temperature drop behind shock front at various pressures and 4300 K
09 p1730 A70-22172
- Temperature effects on IR absorption by water and carbon dioxide vapors measured in narrow spectral intervals
09 p1666 A70-22180
- Carbon dioxide photochemistry of Mars atmosphere, noting complications due to hydrogen compounds
09 p1763 A70-23483
- Blood carbon dioxide and oxygen content determined by respiration mass spectrometer using carrier gas
09 p1629 A70-23584
- Modified apparatus for volumetric determination of alveolar carbon dioxide as indicator of pilot hypernea
10 p1825 A70-24503
- Carbon dioxide dissociation effects on refractive index gradients and decay rates in pulsed carbon dioxide-nitrogen laser mixture
10 p1900 A70-24602
- Hydrogen, oxygen and carbon dioxide in off-gas stream from nuclear reactor experiment using on-line gas chromatography
11 p1994 A70-25615
- Real gas adiabatic lapse rate applied to Venus atmosphere assumed to consist of pure carbon dioxide
11 p2107 A70-25646
- Carbon dioxide fixation in hydrogenomonas eutropha determined from titrating liquid culture with carbon dioxide, showing dependence on oxygen content in gas mixture
11 p1991 A70-25940
- Radiative intensity calculations for carbon dioxide and carbon dioxide-nitrogen plasmas for various temperatures, densities and path lengths, computing UV and continuum spectra
12 p2275 A70-27170
- Spectral absorption characteristics for C atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere
12 p2275 A70-27317
- EHF microwave absorption in compressed carbon dioxide, measuring dielectric loss as function of gas density
12 p2273 A70-27571
- Graphite-carbon dioxide interaction at high temperatures in presence of solid phase diffusion from bulk to reacting surface
13 p2520 A70-28581
- IR spectroscopy, determining relative populations of carbon dioxide vibrational energy levels by comparing emission intensities
13 p2455 A70-29131
- Carbon dioxide molecular vibrational energy levels above carbon monoxide-oxygen premixed flame, discussing vibration modes leading to population inversion and relaxation time variance
13 p2455 A70-29132
- Carbon dioxide jet plumes condensation on model nozzle in vacuum chamber, noting particle size and growth rate
13 p2523 A70-29983
- Venus carbon dioxide absorption bands determining atmospheric scattering model suitability for all data
14 p2642 A70-30889
- Spacecraft measurements revealing hot dense Venusian and cold thin Martian carbon dioxide atmospheres
14 p2646 A70-31066
- Average rotational temperature of Venus atmosphere above cloud tops from carbon dioxide band spectroscopy
14 p2650 A70-31219
- Temperature dependence of laser emission line self broadened half widths in spectral band of carbon dioxide at constant pressure
15 p2752 A70-32056
- Power plant using carbon dioxide planetary atmosphere as working fluid, noting weight reduction
15 p2828 A70-32262
- Martian soil thermal conditions at south pole, considering polar cap annual variations and carbon dioxide sublimation
15 p2802 A70-32492
- Ventilatory response to carbon dioxide in goats during acute and chronic hypoxia
15 p2684 A70-32539
- High temperature reaction kinetics between oxygen difluoride and CO in shock tube, discussing carbon dioxide formation
16 p2855 A70-33010
- Carbon dioxide output monitoring from biosatellites for circadian system behavior in closed organism-environment systems
16 p2849 A70-33992
- Underexpanded carbon dioxide free jet expanding into vacuum from conical nozzles
17 p3070 A70-35246
- Carbon dioxide electric discharge dissociation producing oxygen molecules
17 p3138 A70-35588
- Flux emissivity tables for water vapor, carbon dioxide and ozone based on wavelength dependent absorption coefficients and flux transmissivities
17 p3081 A70-35927
- Positive atomic oxygen ion reactions with carbon dioxide detected using ion cyclotron and double resonance methods
18 p3225 A70-36189
- Carbon dioxide entropy and enthalpy computation covering critical region and wide temperature range [ASME PAPER 70-GT-5]
18 p3348 A70-36861
- Chloride ion shift of respiration occurring between plasma and erythrocytes as function of carbon dioxide, using rapid filtration method
19 p3364 A70-38366
- Reliability tests of blood carbon dioxide pressure measurement methods, indicating carbon dioxide-electrode method superiority
19 p3365 A70-38371
- Water vapor effect on carbon dioxide reaction with lithium hydroxide in dynamic isothermal system
20 p3582 A70-39227
- Carbon dioxide initial dissociation rates in glow discharges and gas mixtures at low pressures, using mass spectrometric sampling and plasma diagnostic methods
20 p3674 A70-39235
- Unicellular hot spring acidophilic alga Cyanidium cadarium cultured in pure carbon dioxide, examining packed cell volume, oxygen production and growth rate
20 p3572 A70-39492
- Satellite-borne conical IR scanner flight data hybrid simulation and error analysis, suggesting carbon dioxide horizon noise model
20 p3631 A70-39513
- Graphites erosion by water and carbon dioxide at high temperatures, using liquid rocket simulator for kinetics study
20 p3736 A70-39587
- Carbon dioxide and CO IR vibration-rotation spectral absorption coefficients, noting harmonic oscillator approximation
21 p3851 A70-40589
- Venusian atmosphere carbon dioxide, water, molecular oxygen and nitrogen contents from Venera 5 and 6 data
21 p3883 A70-40837
- Free and forced convection of supercritical carbon dioxide normal to heated cylinder at constant temperature, measuring heat transfer rates
21 p3945 A70-41034
- Carbon dioxide-atomic oxygen reaction rate constant to investigate Martian ionosphere, discussing reactions involving oxygen, nitrogen molecular ions and NO
21 p3886 A70-41067
- Carbon dioxide-He-nitrogen gas mixture pulsed discharge system afterglow gain measurements up to one atmosphere, using CW laser
21 p3837 A70-41719
- Spectral absorption characteristics for c atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere
21 p3854 A70-42058
- Heat transfer measurement from Pt wire to carbon dioxide near critical pressure, discussing film boiling and free convection flows
21 p3953 A70-42167
- Thermal blooming of 10.6 micron laser beam in carbon dioxide absorption cell
22 p4049 A70-42335
- Carbon dioxide and water cryodeposits refractive indices and densities, using thin film interference technique [ASME PAPER 70-HT-33]
22 p4122 A70-42434
- Interdiffusion coefficients for hydrogen-carbon dioxide and oxygen-carbon dioxide systems at low temperatures
22 p4076 A70-43393
- Martian soil thermal conditions, considering polar cap annual variations and carbon dioxide sublimation
23 p4240 A70-43914
- Vibrational relaxation measurements of specific carbon dioxide vibrational-rotational states from tunable carbon dioxide laser beam absorption
23 p4221 A70-44011
- Venus carbon dioxide band, deriving rotational temperatures at various phase angles
23 p4241 A70-44257

Blood oxygen, carbon dioxide and pN during hypothermia induced by He-oxygen mixture and cold exposure in hamsters, comparing with hibernation state

23 p4147 A70-44787

Zr-Cu alloys corrosion resistance in carbon dioxide at high temperatures, noting composition effect on behavior

23 p4208 A70-44875

Carbon dioxide molecular vibration excitation by Q switched carbon dioxide laser, obtaining accommodation and diffusion coefficients by relaxation measurements

24 p4351 A70-45369

Vasodilating carbon dioxide effect on brain circulation in occipital cortical area in cats and rabbits using thermoelectric method

24 p4300 A70-45842

Transverse flow deuterium fluoride-carbon dioxide chemical laser for CW output without external energy source

24 p4355 A70-46084

CARBON DIOXIDE CONCENTRATION

Martian carbon dioxide band observations using multislit spectrophotometer, indicating surface height variations near Syrtis Major

01 p0182 A70-10723

Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity

01 p0069 A70-11623

Endtidal oxygen and carbon dioxide partial pressures, oxygen uptake and carbon dioxide after apnea and during apneic diving

02 p0235 A70-12089

Oxygen and carbon dioxide partial pressures bloodless determination in mixed venous blood, using platinum electrode and IR carbon dioxide meter

02 p0236 A70-12091

Vagotomy and carbon dioxide concentration effect on quiet and forced respiration rate, pleural pressure, tidal volume and lung ventilation in cats

03 p0422 A70-13694

Vigilance time degradation, studying effects of breathing gas mixtures with varying oxygen and carbon dioxide content

06 p1000 A70-17293

Respiration behavior of men during inhalation of various gas mixtures, observing spontaneous changes in breathing rates

07 p1206 A70-19471

Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance

09 p1614 A70-22082

Balloon-borne device for analyzing atmospheric carbon dioxide, moisture and methane, using cyclic analysis by gas chromatography

11 p2052 A70-26371

Rhesus monkeys tolerance to graded increase in closed environment carbon dioxide, examining heart rate and cardiac rhythm

11 p1988 A70-26517

Earth atmosphere formation and oxygen-carbon dioxide balance mechanisms, including water vapor photodissociation, photosynthesis, fossil fuel burning, etc

14 p2572 A70-30350

Mars carbon dioxide abundance and surface pressure from growth curve based on high resolution spectra

14 p2650 A70-31218

Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance

15 p2685 A70-32678

Venus atmosphere and surface conditions, describing temperature, accumulation of carbon dioxide and runaway greenhouse effect

15 p2806 A70-32771

Sheep cardiac rate, respiration rate, hematocrit, erythrocytes per cubic mm and hemoglobin concentration responses to elevated ambient carbon dioxide

17 p3030 A70-35421

Carbon dioxide content of dialyzed human hemoglobin measured at specific pressure and varying pH values as function of 2,3 diphosphoglycerate

19 p3364 A70-38367

Spectroscopic detection of sulfur dioxide and carbon dioxide molecules and concentrations in polluted atmosphere by laser-Raman radar technique

20 p3640 A70-39389

NASA aircrew oxygen system, describing carbon dioxide control and oxygen generation subsystems

21 p3768 A70-40990

Low carbon dioxide concentration breathing effects on exercise tolerance, discussing aerobic capacity decrement and hypercapnia occurrence

22 p3973 A70-43637

Carbon dioxide exposure limits of rhesus monkeys, examining body temperature, respiratory rate and pressure effects

22 p3973 A70-43642

Venus vegetative life suggested from algae growth under pure carbon dioxide in hot acid media at high pressures

23 p4253 A70-44836

CARBON DIOXIDE LASERS

Mathematical model for saturable absorbers consisting of molecular gases for use in IR applied to carbon dioxide laser radiation absorption by sulfur hexafluoride

01 p0109 A70-10429

Chirped pulses observation by heterodyning single frequency Q switched carbon dioxide laser with stable CW local oscillator and beat signal display on oscilloscope

01 p0109 A70-10433

Carbon dioxide lasers passive Q switching by gaseous methyl fluoride and phosphorus pentafluoride, presenting absorption coefficients

01 p0110 A70-10561

Nitrogen and helium collisional effect on rotational relaxation rate of carbon dioxide upper laser level, noting thermalization

01 p0110 A70-10567

IR CW sum-frequency up-conversion of carbon dioxide laser radiation using phase matched proustite as nonlinear crystal

01 p0111 A70-10786

Carbon dioxide laser with incorporated grating for measuring line strength to width ratio for various rotational lines

01 p0112 A70-10916

IR radiation absorption from carbon dioxide laser in supersonic gas jet, applying results to nitrogen-carbon dioxide gas dynamic laser action

01 p0148 A70-11123

Thermionic emission characteristics of W and Mo subjected to focused CW carbon dioxide laser radiation, discussing direct energy conversion

02 p0312 A70-12068

Carbon dioxide laser welding equipment and procedures, describing mechanical-electronic control system, target material-laser beam interactions, etc

02 p0310 A70-12752

Vibrational relaxation and optimum population inversion of carbon dioxide molecules under unsteady conditions during pulsed electron excitation, discussing laser output increase

03 p0528 A70-13408

Carbon dioxide laser radar system for studying radar techniques application to IR, discussing automatic tracking capability provision

03 p0450 A70-13676

Chlorotrifluoroethylene and difluorodichloromethane saturable absorbers for wavelength extensions of passively Q switched carbon dioxide lasers

03 p0502 A70-13816

Power stabilization of single mode monochromatic carbon dioxide laser, using grating in cavity

03 p0503 A70-14076

Laser cavity structure for homogeneous transverse discharge in carbon dioxide-nitrogen-helium mixtures, discussing energy and power increase per unit volume

03 p0503 A70-14357

Admixtures effect of chloroform, diethyl ether and acetone vapors on carbon dioxide laser output power

04 p0702 A70-15202

Wavelength selection in Q switched carbon dioxide laser by intracavity gas cell providing selective absorption

04 p0702 A70-15362

Continuous wave chemical laser operation in carbon dioxide pumped by vibrational energy released from DF and HF molecular formation

04 p0704 A70-15686

Power distribution in carbon dioxide laser resonator with external and internal mirror at different power levels

05 p0857 A70-15796

Phase lock technique study of 10.6 micron radiation effect in carbon dioxide laser plasmas on 2.4 micron spontaneous emissions and plasma impedance

05 p0857 A70-16071

Carbon dioxide laser resonator design and operation, discussing performance with dish reflector made of leucosapphire

05 p0859 A70-16272

Center dip formation in curve relating output power and frequency of carbon dioxide laser line operating in single mode on single wavelength

05 p0860 A70-16667

Properties of unstable confocal resonator used with carbon dioxide-nitrogen-helium laser, using geometric models and measurements

06 p1079 A70-17188

Steady state thermal defocusing of carbon dioxide laser radiation in gases as function of beam power, gas absorption coefficient and pathlength

06 p1079 A70-17190

Continuous passive mode locking of carbon dioxide laser cavity using long optical delay line

06 p1080 A70-17446

Electron energy distribution function for carbon dioxide laser plasmas in gas mixtures, discussing dissociation products role in electron energy exchange

06 p1080 A70-17447

Carbon dioxide laser beam modulation by molecular Stark effect

06 p1080 A70-17448

Carbon dioxide and monoxide molecules IR emission in laser noting CO contribution to population of higher laser level

06 p1082 A70-17772

Carbon dioxide-nitrogen laser emission absorption in atmospheric surface layer by wings of distant strong lines investigated statistically

06 p1082 A70-17807

Transverse mode locking for carbon dioxide laser achieved with nonlinear boron chloride absorber, observing emission spatial buildup

06 p1083 A70-18425

Frequency calculation and measurement for acoustic waves produced by carbon dioxide Q switched lasers

06 p1084 A70-18620

Self mode locked pulses with rotating mirror Q switched carbon dioxide laser, attributing pulse shortness to saturation broadening of spectrum

07 p1301 A70-20018

Carbon dioxide gas dynamic laser in shock tube facility, measuring shape, time, output energy, beam diameter, etc

07 p1301 A70-20021

Time variations of reflectance measured for carbon dioxide laser beam splitters

07 p1302 A70-20095

Carbon dioxide laser emission spectrum, considering working mixture emission power and rotational relaxation characteristics

08 p1511 A70-20539

Tunable Q switched pulsed discharge carbon dioxide laser intensity dependence on time delay investigated for various vibrational/rotational lines and gas mixtures

08 p1512 A70-20618

Power output of sealed carbon dioxide-nitrogen-helium laser as function of gas composition and pressure

08 p1514 A70-21751

Refractory oxide submillimeter spherical particle preparation by focused emission from carbon dioxide laser

09 p1697 A70-22984

Nonresonant multipath carbon dioxide laser amplifier small signal gain of 39 dB utilizing White optical reflector design

09 p1699 A70-23365

Scanning spherical mirror interferometer for carbon dioxide lasers radiation spectrum analysis, discussing instrument errors in mode and wavenumber studies

09 p1683 A70-23519

IR holograms real time visual reconstruction by frequency stabilized carbon dioxide lasers

09 p1684 A70-23534

Pulse repetition rate control and stabilization in passively Q switched carbon dioxide laser

09 p1699 A70-23537

Amplifier properties and oscillator mode structure of multipath carbon dioxide laser

09 p1699 A70-23538

Single-pass multimode carbon dioxide laser amplifier power gain optimization

10 p1897 A70-23815

High power CW carbon dioxide laser design and operation for use as heat source in metal fusing, welding and cutting

10 p1897 A70-23816

Ge-Cu IR detector photoconducting characteristics and application to carbon dioxide laser mode pattern measurement

10 p1898 A70-23922

Carbon dioxide-neon-helium flowing lasers gain characteristics determined by transverse-discharge configuration

10 p1901 A70-24944

Carbon dioxide laser frequency stabilization, using plasma tube impedance variations generating error signal

10 p1901 A70-24946

Corneal thermal response model for carbon dioxide laser radiation, computing temperature rise from power distribution and conducting air-cornea interface

11 p2062 A70-25635

Carbon dioxide dissociation in flowing carbon dioxide nitrogen helium laser and effects of carbon monoxide on discharge properties

11 p2063 A70-26068

CW carbon dioxide laser absolute frequency measurements at 28 THz by beating lines with water vapor laser and klystron in tungsten on nickel point contact diode

11 p2063 A70-26070

Saturation of self induced thermal lens resulting from thermal distortion of carbon dioxide laser radiation in wind

11 p2063 A70-26401

Luminescence and destruction of gaseous boron trichloride by carbon dioxide laser radiation

11 p2064 A70-26818

Molecular beam carbon dioxide laser Q switching by ethylene as saturating filter, reducing pulse duration by varying ethylene pressure and active mixture composition

12 p2248 A70-27509

Carbon dioxide CW laser-Doppler velocimeter for detecting aircraft wing tip trailing vortices by measuring atmospheric aerosols backscatter

12 p2249 A70-27630

Carbon dioxide laser gain saturation measurements by intracavity Fresnel loss-plate technique, observing dependence on discharge current

12 p2249 A70-27715

Sum and difference frequency signals generated and propagated by mixing carbon dioxide laser and millimeter wave klystron outputs in GaAs loaded waveguide

12 p2250 A70-28098

Carbon dioxide laser electrical discharge stabilization against transverse gas flow by cross magnetic field

12 p2250 A70-28099

Pulsed CO₂ laser calculating upper level lifetime of carbon dioxide molecule with allowance for gas heating at relaxation

12 p2251 A70-28296

Energy resonances between laser levels of carbon dioxide and diatomic and triatomic molecular impurity species, discussing population inversion due to superelastic collisions

13 p2425 A70-28622

Carbon dioxide laser saturated gain constant calculated for low and high electron densities based on thermodynamic approach

13 p2425 A70-28793

Electron radiation temperature measurements in sealed-off carbon dioxide laser, determining gas mixture effect on discharge properties

13 p2426 A70-28808

Kinetic changes in spectral lines and bands intensity of individual molecular gases and mixtures for carbon dioxide lasers

13 p2428 A70-29361

Giant pulses composed of shorter pulse trains obtained in Q switched carbon dioxide laser with transverse modes

13 p2429 A70-29412

Nitrous oxide and carbon dioxide laser Q switching by ammonia Stark effect

13 p2431 A70-29835

Short term influences on sealed carbon dioxide laser action and lifetime, using mass spectrometry

15 p2750 A70-31752

Linear power scaling-mass flow relationship in multi-Joule pulsed carbon dioxide-nitrogen-helium laser, noting thermal effects role

15 p2751 A70-31977

Laminar to turbulent flow transition observation in laser induced vertical convection, using carbon dioxide-nitrogen laser

15 p2751 A70-31980

Thermal degradation of anhydride-cured epoxy resin by carbon dioxide laser heating through platinum crucible

15 p2695 A70-32828

Pulsed carbon dioxide laser production with electron beam pumping, ascertaining beam effect on discharge parameters and output power

15 p2754 A70-32864

Laser design for production tool applications, noting use of Nd-YAG and carbon dioxide laser [ASME PAPER 70-DE-1]

16 p2917 A70-33418

Carbon dioxide laser action at 10.6 micrometers at pressures up to atmospheric by transverse electrical discharges

16 p2928 A70-33643

Gas breakdown produced by long wave IR pulsed radiation of carbon dioxide laser

16 p2928 A70-33655

Ablative materials performance in high radiative heat flux environments produced by CW carbon dioxide laser

16 p2939 A70-33907

Lasing action and reduced output without beam distortion from misaligned carbon dioxide lasers by DC-Tesla coil pumping

16 p2929 A70-33986

Carbon dioxide laser producing nearly 100 percent amplitude modulation of output by intracavity polarization modulation technique

18 p3270 A70-36747

Modulation of carbon dioxide laser with Stark cell internal to cavity, using methyl chloride electrooptical gas

18 p3270 A70-36748

Carbon dioxide laser passive Q switching, using ethylene and methanol as saturable absorbers

18 p3270 A70-36749

Sealed-off carbon dioxide laser discharge deposits analyzed by mass spectrometry

19 p3445 A70-37670

Folded path transversely excited atmospheric pressure carbon dioxide laser using shower or brush discharges, measuring output pulse characteristics

19 p3445 A70-37674

Carbon dioxide IR laser applications to manufacturing technology, discussing absorption, reflection and heat conduction characteristics of materials

19 p3447 A70-38452

Spatial gain variations transverse to discharge in axially flowing carbon dioxide laser amplifier, noting relationship to flow velocity

20 p3640 A70-39391

Transversely excited atmospheric pressure /TEA/ carbon dioxide laser, noting power output and cost

20 p3641 A70-39424

Carbon dioxide-helium laser hollow cathode negative glow discharge amplifier, discussing construction and advantages compared to other excitation media and discharge structures

21 p3834 A70-40568

Carbon dioxide laser pulse shape, duration and power dependence on repetition rate during continuous pumping

21 p3835 A70-40634

Carbon dioxide laser systems for various space communication links between ground, satellites and Mars probe

21 p3787 A70-41338

Helium and nitrogen role in carbon dioxide laser excitation, discussing optimum gas mixture

21 p3837 A70-41919

Acoustic waves in carbon dioxide at 2-25 torr initial pressures induced by heat from incident carbon dioxide laser pulses

21 p3837 A70-42003

Mass spectroscopy analysis of neutral and ionic population of plasma in carbon dioxide laser gas mixture, discussing collision processes

21 p3838 A70-42006

High output CW carbon dioxide laser design, using gas pressure variation and fast axial flow

22 p4048 A70-42322

Passive Q switching and mode locking of carbon dioxide laser with saturable absorbers and buffer gases, using electric pulse excitation

22 p4050 A70-43023

Wavelength selective carbon dioxide laser using stationary grating to correlate pulses for high J values and line number

22 p4050 A70-43153

Diffusion effect on carbon dioxide Gaussian laser beam amplification, measuring gain saturation via pinhole method

22 p4051 A70-43335

Carbon dioxide laser vibrational temperature measurement, determining ground state vibration level populations in various molecular gases

22 p4051 A70-43391

Carbon dioxide amplification coefficient measurement for lines in laser transition range, determining rotational temperature and upspin levels populations

23 p4201 A70-44204

Carbon dioxide laser adapted for high speed drilling of fine holes in thin rubber sheeting

23 p4201 A70-44474

Narrow resonances in saturated absorption at molecular vibrational-rotational transitions in carbon dioxide laser

23 p4202 A70-45059

Luminescence and destruction of gaseous boron trichloride by carbon dioxide laser radiation

24 p4351 A70-45190

Flow-through carbon dioxide lasers population inversion relation to individual gas components and electron velocity distribution functions

24 p4352 A70-45458

Argon matrix isolated ammonia, examining IR spectra by carbon dioxide laser irradiation

24 p4354 A70-45648

Basalt heating with IR carbon dioxide laser, investigating vapor fractionation for inert atmospheres, very high temperatures and silicon dioxide poor materials

24 p4409 A70-45673

Gas ionization with Q switched carbon dioxide laser radiation, determining breakdown threshold or minimum power density requirement

24 p4355 A70-46261

CARBON DIOXIDE REMOVAL

Granular amine used as regenerable absorbent in cycling two bed system for carbon dioxide removal

01 p0038 A70-10972

Molecular sieve mixed gas adsorption and vacuum desorption of carbon dioxide in Apollo spacecraft cabin

01 p0040 A70-11450

Photolysis of 3-phenyl-oxadiazol-5-one by UV irradiation, eliminating carbon dioxide

17 p3041 A70-34772

Carbon dioxide absorption from gas streams by weak base ion exchange resins

18 p3226 A70-36767

CARBON DIOXIDE TENSION

NT HYPERCAPNIA
NT HYPOCAPNIA

Dogs respiratory response to arterial hydrogen ions at different carbon dioxide pressure levels during hypoxia or hyperoxia, discussing acid-base balance effects

11 p1986 A70-25674

Oxygen and carbon dioxide effects on airway smooth muscle following pulmonary vascular occlusion in dogs

13 p2356 A70-29943

Inspired carbon dioxide pressure effects on human response to physical exercise, noting dyspnea and intercostal muscle pain

13 p2360 A70-29949

Arterial blood carbon dioxide tension effects on rhythmic volley activity of respiratory medulla oblongata neurons in cats

17 p3030 A70-35354

Hyperbaric oxygen exposure produced hypertension and pulmonary edema, discussing carbon dioxide transport mechanism in blood

20 p3572 A70-39430

Rhesus monkeys PCO₂ tolerance in low pressure environments, observing hypothermia and heart and respiratory rates depression

21 p3765 A70-41486

Vagus nerve blockage effect on arterial carbon dioxide tension and breathing regulation in dogs

24 p4303 A70-46112

CARBON DISULFIDE

Optically trapped filaments in liquid carbon disulfide by side illumination and crossed polarizers using glass laser, noting birefringence and duration time

04 p0703 A70-15619

Chemical laser action in spark excited CS₂-O₂ mixtures, attributing emission to combustion product CO

06 p1080 A70-17445

Self phase modulation of stimulated Raman light in carbon disulfide, discussing Stokes and anti-Stokes spectrum regions

18 p3266 A70-36422

Carbon monoxide vibrational population inversion in product molecule produced in free burning carbon disulfide/oxygen flame

21 p3950 A70-41708

CARBON ISOTOPES

NT CARBON 12
NT CARBON 13
NT CARBON 14

Carbon isotopic composition in primary cosmic radiation by nuclear emulsions exposure in balloon flights

19 p3507 A70-38129

Carbon-nitrogen-oxygen isotope bi-cycle function in solar evolution, noting first cycle role in solar energy release and neutrino production

20 p3698 A70-39306

High energy alpha particle beam exposed to plastic scintillators, determining spallation cross section for C12/alpha, alpha n/C11

21 p3852 A70-41138

CARBON MONOXIDE

Sulfur compound effects on carbon monoxide-nitrogen laser emission stability, obtaining continuous operation independently of tube quality

01 p0111 A70-10660

IR spectra of four carbon stars and Sirius obtained with Michelson interferometer, indicating diatomic carbon and CO bands

02 p0372 A70-12252

Low energy electron diffraction structures due to Re crystal surface interaction with CO and molecular oxygen at high temperatures

03 p0440 A70-13098

Opacity-probability distributions for CO, computing theoretical spectra of line absorption coefficient, discussing effects of temperature and/or turbulent velocity

05 p0919 A70-16938

Self broadened semihalf widths measurement in pure rotational spectrum of carbon monoxide compared with vibration-rotation calculation

05 p0886 A70-17086

Pulmonary CO diffusing capacity in young men during muscular exercise

06 p0993 A70-17432

Carbon dioxide and monoxide molecules IR emission in laser noting CO contribution to population of higher laser level

06 p1082 A70-17772

CO vertical distribution near tropopause from photochemical atmospheric model with CO recombination with OH for stratospheric sink

07 p1265 A70-19282

Wave numbers, intensity and half width of lines of vibration-rotation relative to carbon monoxide transition, noting band center displacement dependence on pressure

07 p1338 A70-19380

Kinetics of homogeneous nitrogen dioxide-carbon monoxide atom transfer reaction in single pulse shock tube, carrying out product analysis by vapor phase chromatography

08 p1455 A70-21263

UV absorption cross sections of CO, HCl and ICN, analyzing reactions causing various spectral features

08 p1455 A70-21340

Perturbation rotational levels in triplet states of CO emission spectra attributed to resonance fluorescence process involving optically forbidden transitions

09 p1731 A70-22282

Chemically formed carbon monoxide lasing in fast flow system, discussing reaction and excitation mechanisms

09 p1697 A70-22922

Wave number, intensity and half width of vibrational-rotational lines pertaining to transition of carbon monoxide perturbed by argon

09 p1733 A70-23316

Mars biological activity suggested from metabolic energy cycle based on oxidation of carbon monoxide [NGL-07-004-043]

09 p1765 A70-23798

CO electrochemical oxidation at porous solid electrolyte fuel cell anodes under high temperature, noting current density role

10 p1830 A70-24462

API state lifetime of CO measured using molecular level crossing spectroscopy

10 p1920 A70-24629

Carbon dioxide dissociation in flowing carbon dioxide nitrogen helium laser and effects of carbon monoxide on discharge properties

11 p1063 A70-26068

Effusion steady state pressures time dependence of carbon monoxide and calcium vapors generated during calcium oxide-graphite interaction

11 p1995 A70-26602

CO dissociation kinetics in Ar and mixtures of O in Ar by shock tube study using vacuum UV absorption

12 p180 A70-26857

CO vibration-rotation bands, calculating high resolution and temperature steradiance and spectral absorption coefficient

12 p2275 A70-27171

Carbon monoxide adsorption on rhodium and ruthenium HCP metals emphasizing surface migration, work function increments and desorption

12 p181 A70-27676

CO adsorption on smooth polycrystalline platinum and rhodium electrodes at various potentials

12 p182 A70-27761

High power CO lasers, discussing UV and visible sidelight, gas mixtures, spectral output, gas pressure, etc

13 p2426 A70-28807

Carbon dioxide molecular vibrational energy levels above carbon monoxide-oxygen premixed flame, discussing vibration modes leading to population inversion and relaxation time variance

13 p2455 A70-29132

CW oscillation in carbon monoxide chemical laser

15 p2748 A70-31432

High power CW CO laser operation at room temperature by introducing mercury vapor into discharge

15 p2751 A70-31979

High temperature reaction kinetics between oxygen difluoride and CO in shock tube, discussing carbon dioxide formation

16 p2855 A70-33010

Lung diffusing capacity for CO in Caucasians native to 3100 m noting membrane diffusing capacity, lung capillary volume and age effects

17 p3031 A70-35427

Transverse flow CO chemical laser using atomic oxygen reaction with carbon disulfide, comparing output with longitudinal flow devices

18 p3266 A70-36313

Comet Morehouse CO ions lifetime and density from photometric analysis

18 p3313 A70-36324

Arcturus Co bands, examining equivalent widths, rotational lines and 12C/13C ratio

18 p3318 A70-37015

Solar photosphere temperature constancy in thin CO layer from equivalent spectral line width determination

18 p3322 A70-37134

Carbon monoxide oxidation by molecular oxygen in incident shock waves, accounting for chain branching in shock tubes

19 p3374 A70-38271

Heme catabolism in untreated rats and in animals treated with phenobarbital or porphyrogenic drug, comparing bilirubin and CO production

20 p3583 A70-40450

Carbon monoxide laser efficiency increase through addition of Xe, noting change in laser output spectral intensity distribution

21 p3835 A70-40572

Carbon dioxide and CO IR vibration-rotation spectral absorption coefficients, noting harmonic oscillator approximation

21 p3851 A70-40589

Apollo 11 lunar fines carbon level, finding largest component carbon monoxide in complex form

21 p3778 A70-41621

Carbon monoxide vibrational population inversion in product molecule produced in free burning carbon disulfide/oxygen flame

21 p3950 A70-41708

Carbon monoxide-nitrogen laser mechanism vibrational populations, discussing operational characteristics and walls condition and nature

21 p3837 A70-41716

Carbon monoxide-nitrogen laser luminescent phenomena by electronic spectroscopy

21 p3837 A70-41717

Carbon monoxide-nitrogen system vibrational distribution of populations and kinetics in fundamental and harmonic regions, investigating vibroluminescence

21 p3837 A70-41718

CO vibrational relaxation measurements in shock tube expansion wave generated in argon heat bath

23 p4180 A70-44009

Cryogenic fluids nitrogen, argon and carbon monoxide nucleate boiling from atmospheric to near critical pressure

23 p4279 A70-44359

CARBON MONOXIDE POISONING

Humans and dogs breathing CO in closed system, discussing distribution on blood, body stores and oxygen metabolism

02 p0234 A70-11727

CARBON STEELS

Carbide phase in Cr-Mn heat resistant steels at annealing temperatures, isolating gamma, chromium carbide and niobium carbide phases

03 p0509 A70-13279

Intermediate aging influence on Bauschinger effect in low carbon steel at 270 C and 2 hr holding time

04 p0776 A70-15266

Mechanical properties of nickel steels with carbon after suitable heat treatment found similar to high strength nickel steels properties without carbon

05 p0865 A70-16875

X ray elastic constants measured in cementite phase in high carbon tool steel following plastic deformation at tension, noting residual stresses increase and balance

06 p1084 A70-17126

Loading frequency effect on carbon steel energy dissipation at large stress amplitudes, deriving strain rate relations

08 p1516 A70-20980

Low temperature effects on deformability of middle C steel under complex stress state, showing invalid stress-strain relation and deviator similarity

08 p1516 A70-20983

Multiaxial thermal fatigue cracking in carbon steels predicted by elastoplastic stress-strain analysis using finite element method

09 p1773 A70-22578

Alloying Ni, Cu and Nb effects on grain and strengthening of low carbon precipitation-hardenable ferritic steels

09 p1705 A70-22804

Pure iron and low carbon steel macroscopic stress measurements, determining correlation between residual stress, fatigue damage and fatigue life

15 p2759 A70-32322

Titanizing Armco iron and carbon steels, examining diffusion layer structure and phase composition

19 p3451 A70-37460

Recrystallization kinetics and microstructure of low carbon Ti stabilized steel cold rolled and annealed in 800-1750 F range

22 p4053 A70-42730

Defect effects on welds fatigue properties in low carbon steel plates estimated, using radiographs

24 p4347 A70-45733

Longitudinal phenomena and two phase structures effect on ductility of low carbon steel-chromium subjected to high temperature torsion

24 p4361 A70-46173

Carbon steel diffusion saturation with Ti and B, investigating layer depth, weight gain and microhardness dependence on powdered mixture composition

24 p4364 A70-46336

CARBON TETRACHLORIDE

Upper atmospheric atomic nitrogen reaction with carbon tetrachloride, estimating radiation intensity and brightness of artificial luminescent cloud

18 p3252 A70-36989

Emission spectral distribution of atomic nitrogen reaction with carbon tetrachloride for artificial luminescent clouds

18 p3293 A70-36990

CARBON 12

He to carbon fusion reaction rate enhancement in dense matter by inelastic scattering processes, discussing C 12 deexcitation to ground state

05 p0885 A70-16934

C13/C12 component composition from carbonaceous chondrites and terrestrial samples, showing similar fractional patterns but isotope variations

13 p2497 A70-29860

Carbon isotopes abundance in primary cosmic radiation by nuclear emulsion stack exposure in high altitude balloon flight

17 p3151 A70-34914

Arcturus Co bands, examining equivalent widths, rotational lines and 12C/13C ratio

18 p3318 A70-37015

CARBON 13

Carbonaceous chondrites composition by gas chromatography for light hydrocarbons and carbon, discussing origin of organic matter

10 p1949 A70-25327

C13/C12 component composition from carbonaceous chondrites and terrestrial samples, showing similar fractional patterns but isotope variations

13 p2497 A70-29860

Carbon isotopes abundance in primary cosmic radiation by nuclear emulsion stack exposure in high altitude balloon flight

17 p3151 A70-34914

Arcturus Co bands, examining equivalent widths, rotational lines and 12C/13C ratio

18 p3318 A70-37015

CARBON 14

Cosmic ray flux modulation in earth atmosphere produced by solar wind and geomagnetic variations, considering effects on atmospheric carbon 14 variations

04 p0680 A70-15114

Pinel C14-indoles synthesis in rats noting no direct effect of morphine

11 p1988 A70-26299

Acute hypoxia effects on C14-tagged glycine absorption, distribution and discharge in rats organs and tissues

17 p3030 A70-35360

CARBONACEOUS METEORITES

NT ORGUEIL METEORITE

Allende carbonaceous chondrite radionuclide composition and concentration determined by nondestructive gamma ray spectrometry

04 p0754 A70-15275

Rb 87-Sr 87 age determination of carbonaceous chondrites, showing agreement among petrological classification types

06 p1150 A70-18480

Bismuth concentrations in various carbonaceous and equilibrated chondrites determination by neutron activation technique

07 p1388 A70-20036

Carbonaceous chondrites primordial He and Ne isotopes variations

07 p1388 A70-20037

Micrococcus radiodurans and *Sarcina flava* radiation resistance from proton irradiation tests in carbonaceous chondrite Migei

08 p1441 A70-20550

Carbonaceous material genesis in Tieschitz meteorite from electron microprobe analysis, discussing chondrule formation process residue likelihood

08 p1578 A70-21561

Allende meteorite showing presence of Ca-Al-rich glasses associated with other crystalline phases

08 p1579 A70-21562

Carbonaceous meteorites analyzed for soluble organic compounds, carbonate and residual carbon, showing endogenous nature

10 p1935 A70-23812

Ureilite structures and relationship to carbonaceous chondrites, considering chemical composition, diamond content, age, size, etc

10 p1941 A70-24552

Carbonaceous chondrites composition by gas chromatography for light hydrocarbons and carbon, discussing origin of organic matter

10 p1949 A70-25327

C13/C12 component composition from carbonaceous chondrites and terrestrial samples, showing similar fractional patterns but isotope variations

13 p2497 A70-29860

Ionization potentials of elemental abundances in lunar rocks compared with earth crust and class I carbonaceous chondrites, showing lunar materials differentiation

15 p2801 A70-32463

Chromatographic analysis of organic matter in Pueblito de Allende meteorite

17 p3173 A70-35754

Allende Type III carbonaceous chondrite, examining rare earth and other elemental abundances

19 p3519 A70-38028

Carbonaceous chondrites noble gases measurement by mass spectroscopy, discussing compositional trends and origins

20 p3703 A70-39323

Type 1 carbonaceous chondrites contribution to lunar soil, comparing mineralogical and trace element evidence

21 p3899 A70-41533

Carbonaceous chondrites isomeric alkanes identification by mass spectrometry and gas chromatography

24 p4402 A70-45378

CARBONACEOUS ROCKS

Carbonaceous complex use as indicators of geothermal history and high temperature organic geochemistry

17 p3042 A70-35331

Lunar carbonaceous, organic and organogenic materials analysis by mass spectroscopy, gas chromatography and various other methods

21 p3780 A70-41633

CARBONATES

NT POLYCARBONATES

Thermodynamics of electrochemical cells consisting of Li with lithium chloride or bromide and thallium amalgam with thallium chloride or bromide in propylene carbonate

01 p0042 A70-11107

Fuel cells phase equilibria between carbonate melt and Li, Na and K solid aluminate electrolytes, analyzing thermal and electrical conductances
10 p1830 A70-24458

Propylene carbonate applications in nonaqueous electrolyte batteries, describing impurities identification by gas-liquid chromatographic analysis
12 p2164 A70-27069

Sealed Ni-Cd cells, investigating carbonate effect on performance
22 p3965 A70-43535

CARBONIC ANHYDRASE
Artificial pulmonary ventilation effects on carbonic anhydrase activity in human blood during hypoventilation and hyperventilation
01 p0025 A70-11029

Serologic comparisons of carbonic anhydases in human and other primate erythrocytes
13 p2355 A70-29805

CARBONIZATION
Carbon fabrics and filaments, resin carbonizing and carbon-carbon composites, discussing processing parameters, initial carbonizing resin binder and reinforcement effects on laminate properties
07 p1316 A70-18932

Processing temperature effects on breaking strength-modulus relation for carbonized acrylic fibers
10 p1907 A70-24533

High strength glassy carbon fibers obtained by carbonizing extruded phenol hexamine polymers
11 p2071 A70-26672

CARBONYL COMPOUNDS
Chemical kinetics of carbonyl fluoride thermal decomposition in argon and nitrogen diluent behind shock waves, using IR monitoring method
11 p1995 A70-25824

Polyimideazopyrrolone films relative thermophysical properties, noting polymers thermal stability dependence on carbonyl groups percentage
21 p3783 A70-42132

CARBORANE
Heavy atom skeletal molecular structure of asymmetric close-2,3-dicarbahexaborane from microwave rotational spectra
21 p3773 A70-41392

CARBOXYHEMOGLOBIN
Humans and dogs breathing CO in closed system, discussing distribution on blood, body stores and oxygen metabolism
02 p0234 A70-11727

CARBOXYHEMOGLOBIN TEST
Carboxyhemoglobin saturation in post mortem examination of aircraft accident victims, discussing errors in methodology
17 p3033 A70-35568

CARBOXYLIC ACIDS
NT ACETIC ACID
NT ASPARTIC ACID
NT CITRIC ACID
NT FOLIC ACID
NT HEXOGENES (TRADEMARK)
NT LACTIC ACID
NT LYSINE
NT OLEIC ACID
NT TRYPTOPHAN

CARBURIZING
High chromium stainless steels nitriding and carburizing processes stabilized by nickel galvanic coating, enhancing nitrogen or carbon diffusion into steel
07 p1291 A70-18832

Graphite molds compaction pressure effect on Ti castings nonporosity and surface layers carburization
08 p1506 A70-21143

Carburization resistance of refractory steels, emphasizing chemical composition effect on corrosion rate
08 p1519 A70-21434

Regeneratively cooled stainless steel thrust chamber failure related to internal carburization by fuel decomposition and propellant combustion
12 p2290 A70-27111

Portevin-Le Chatelier effect in carburized nickel and Ni-Co alloys, discussing carbide stability and carbon diffusion roles
15 p2756 A70-31562

Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C
17 p3102 A70-35409

Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data
17 p3125 A70-35410

Molybdenum carburization in methane-based plasma glow discharge, considering possible pyrocarbon layer formation and temperature effects
19 p3434 A70-37456

Carburization and grain size of tungsten carbide powder from W powder as function of temperature, using optical and electron micrographs
21 p3839 A70-41412

CARCINOMA
U CANCER

CARDIAC AURICLES
Frequency and postextrasystolic potentiations in guinea pig isolated auricles and dog heart in vitro and in situ, noting myocardial diagnostic use
02 p0235 A70-12088

CARDIAC VENTRICLES
Computer analysis and comparison of ST segment on Frank and bipolar lead electrocardiograms of healthy persons and cardiac patients during exercise, noting physiological responses
01 p0013 A70-10270

Reciprocal rhythm occurring with impulses of atrial or atrioventricular [A-V/ nodal or ventricular origin, noting role of A-V nodal pathways
01 p0016 A70-10442

Physiological significance of myocardial fibers curvature in left ventricle wall determined by numerical solutions based on mathematical description
01 p0039 A70-11368

Left ventricular muscle time varying elastic properties, using dynamic model and Fourier series representations
01 p0040 A70-11371

Aortic distensibility and instantaneous left ventricular volume estimation in living man based on elastic reservoir theory and circulatory system model
01 p0040 A70-11372

Left ventricle confocal prolapse spheroid model taking into account physiologic variations of thickness
01 p0040 A70-11373

Hyperbaric oxygenation /OHP/ effect on left ventricular function evaluated by measurement on anesthetized dogs of myocardial contractility
02 p0230 A70-11701

Left ventricular function during paired pulse and single pulse stimulation in dogs, sheep, goats and calves before and after induced heart failure
02 p0233 A70-11719

Left ventricle wall forces and dimensional measurements during cardiac cycle based on stress-strain terms, including results for mitral, aortic and myocardial disease
02 p0238 A70-12512

Posture effect on ballistocardiograms, considering ventricular ejection flow changes
02 p0248 A70-12684

Controlled premature atrial stimulation effects on atrioventricular conduction in man, using electrode catheter technique to record electrical activity of specialized conducting fibers
03 p0415 A70-12886

Atrioventricular conduction in atrial fibrillation and flutter in man, using His bundle recordings
03 p0415 A70-12887

Electrocardiographic criteria for left ventricular hypertrophy diagnosis, using chamber dissection technique
03 p0432 A70-12890

Dogs left ventricle areas supplied by coronary arterial branches visualized utilizing scintillation photography and radioactive Xe
03 p0432 A70-12892

Mathematical model for ejection fraction of human left ventricle incorporated with fiber orientation and ventricular geometry, showing consistent results with biplane angiocardiacographic films
03 p0433 A70-12975

Arterial counterpulsation effect on mechanics of left ventricular contraction and myocardial oxygen consumption in normal and abnormal animals
03 p0416 A70-13009

Stress differential equations of equilibrium for thick prolapse spheroid /left ventricle/, yielding practical values for mean stresses in thick walled ventricles
03 p0434 A70-13571

Computer evaluation of photographic imagery of left ventricle volume obtained by cineangiography, including densitometric measurements
03 p0434 A70-13678

Evidence supporting concept of His bundle and not A-V node as pacemaker site in nodal rhythms using electrode catheter technique
03 p0424 A70-13774

Pathologic findings of left ventricular papillary muscle related to electrocardiogram, discussing papillary muscle dysfunction syndrome
03 p0426 A70-13942

Production mechanism of abnormal Q waves in obstructive cardiomyopathy
03 p0427 A70-13943

Automatic photo-optical technique for processing of cineangiograms to find time-course history of left ventricular volume
04 p0641 A70-14559

QRS and ST-T areas in multiple bipolar chest leads during normal and abnormal activation in patient measured for checking ventricular gradient concept
04 p0632 A70-15307

Ventricular performance as function of infarcting myocardium, discussing dynamic characteristics
04 p0637 A70-15470

Ventricular ectopic beats and bradyarrhythmia associated with myocardial infarction, discussing enhanced automaticity, reentry activity, drugs and heart pacing
06 p0998 A70-18407

Left ventricular wall motion in normal man at rest and after exercise using echocardiogram
07 p1210 A70-19573

Phasic aortic blood flow and left ventricular pressure measured at constant heart rates during pulsus alternans, discussing ejection duration and peak flow rate
07 p1210 A70-19588

Left ventricular function myocardial infarction induced acute depression and subsequent recovery in intact conscious dogs
07 p1211 A70-19615

Cardiovascular control system mathematical model incorporating fundamental properties of heart muscle for digital simulation using FORTRAN program
08 p1453 A70-21513

Various phases of human isometric left ventricle contraction, comparing results with previously published data
09 p1620 A70-23111

Left ventricle pressure rise rate as function of heart contractility and hemodynamics
09 p1623 A70-23587

Vectorcardiographic diagnosis of left ventricular hypertrophy based on changes in MQV magnitude and other QRS vectors
09 p1629 A70-23626

Ventricular preexcitation syndrome studied by catheter technique for heart electrical activity recording, noting His bundle bypass effects
10 p1819 A70-24934

Human head-up tilt circulatory stress effects on left ventricular systolic time intervals
10 p1820 A70-24937

Ultrasonic echography for ventricular size determination, calculating stroke volume and valvular regurgitation severity
10 p1820 A70-24938

Left ventricular volumes, pressure and heart rate in patients and dogs after diagnostic coronary arteriography
10 p1820 A70-24939

Cyclic strain energy method determining oxygen consumption rate of intact working human left ventricle by closed chest measurements
12 p2167 A70-27018

Myocardial individual fibers length calculation based on ellipsoidal model of left ventricle and fibers helicoidal course, noting distension nonuniform effect
12 p2174 A70-27020

Left ventricle zone as principal reflexogenic zone of heart participating in greater circulation vessel tonus control
13 p2353 A70-29356

Cardiac structure-functional relations, discussing muscle strand continuum, basal fibrous skeleton, epicardial, endocardial and myocardial layers
15 p2685 A70-32834

Primary myocardial disease, describing hemodynamic and angiocardiacographic observation of left ventricular volume and wall changes
16 p2848 A70-33110

Human phasic right ventricular blood velocity, examining respiration, rhythm disturbances and Valsalva maneuver influence by radiotelemetry
16 p2850 A70-33111

Involuntary vectorcardiographic signs of right ventricular hypertrophy
17 p3025 A70-34859

Single ventricle and hypoplastic left and right heart syndromes, investigating with reflected ultrasound
17 p3032 A70-35472

Left ventricle pumping function self regulation mathematical model, obtaining transfer function
18 p3217 A70-36080

Left ventricular dynamics ultrasonic visualization, involving catheter-borne transducers array and computer for data acquisition and display
18 p3225 A70-36750

Cardiac ventricular function in compression pump terms, relating mechanical activity to end-diastolic fiber length
20 p3571 A70-39364

Determinants of human ventricular dimensions and myocardial free velocity relations during maximum and submaximum exercise levels
20 p3571 A70-39365

First derivative of ventricular pressure recorded by conventional cardiac catheters, analyzing in terms of Fourier series
21 p3767 A70-40578

Acceleration Bcg dependence on left ventricular ejection flow and properties of vascular system
21 p3763 A70-41237

Left ventricular surface electrocardiogram T-wave amplitude and circumflex coronary artery blood flow during headward acceleration in unanesthetized dogs, observing velocity decrease
21 p3764 A70-41481

Atioventricular conduction in the human heart, analyzing electrocardiogram response patterns recorded by electrode catheter in unanesthetized man
22 p3970 A70-42942

Indirect serial determination of left ventricular systolic ejection time changes in human patients with acute transmural and nontransmural myocardial infarctions
23 p4144 A70-43946

Human left ventricle shape and movements during systolic contraction, using cineangiography and cineradiography of epicardial markers
24 p4302 A70-46076

CARDIOGRAPHY

NT BALLISTOCARDIOGRAPHY

NT ELECTROCARDIOGRAPHY

Cardiac output and coronary blood flow during steady state hypoxia, considering room air and different oxygen concentration breathings
01 p0014 A70-10360

Atrial high gain and HF recordings on three plane vector cardiograms for magnitude and direction for normal and heart diseased patients
01 p0015 A70-10436

Peripheral arterial pizography for cardiological screening tests and checkups of flying personnel
05 p0807 A70-16495

Visual recordings of cardiac rhythm obtained from flashes of miniature indicator tube, describing circuit filter function
08 p1452 A70-21439

Cardiac and respiratory cycles phase coincidence detection device, making photographic plates under physiological conditions
14 p2541 A70-30381

Comparative cardiac output measurements in dogs using left/right heart dye injections and pulmonary/aortic electromagnetic flow probes
15 p2688 A70-31434

Data system obtaining sampling rate for cardiac volume measurement via fast biplane cineangiography
15 p2691 A70-31922

Primary myocardial disease, describing hemodynamic and angiocardigraphic observation of left ventricular volume and wall changes
16 p2848 A70-33110

Bioradiotelemetry of human cardiac activity during professional activities, using ultrasonic searchless Doppler cardiography
17 p3038 A70-35365

Minnesota Impedance Cardiograph method evaluated by applying to cardiac output measurements in postural stress studies
17 p3031 A70-35431

Single ventricle and hypoplastic left and right heart syndromes, investigating with reflected ultrasound
17 p3032 A70-35472

Pressure recording site localization in esophagus, discussing cardiac artifacts morphology and localization over esophagus length
21 p3765 A70-42152

High fidelity microelectrode recording of phase zero cardiac transmembrane action potentials, utilizing memory oscilloscope
21 p3772 A70-42163

Aortic regurgitated flow estimation by dye injection technique, noting correlation with cineangiocardiology method
22 p3977 A70-42301

Human left ventricle shape and movements during systolic contraction, using cineangiography and cineradiography of epicardial markers
24 p4302 A70-46076

CARDIOLOGY

Cardiac activity temperature coefficients in dogs, specifying physical and chemical cardiac functions
01 p0012 A70-10052

Autoimmunity to heart tissues in cardiac diseases, reviewing immune mechanisms in rheumatic fever, postcardiotomy and postinfarction syndromes
01 p0016 A70-10438

Cardiac relaxation mechanics from isolated preparation of cat papillary muscle, noting inotropic influences role
02 p0231 A70-11709

Model for simulating normal/abnormal depolarization and repolarization of heart and to reproduce electrocardiograms, describing design and programming
03 p0432 A70-12889

Electrocardiac events observed in cardiac transplant recipient emphasizing unique finding
03 p0433 A70-12893

Airline stewards cardiovascular and ischaemic heart disease statistics compared with civilian pilots and general population
03 p0438 A70-14070

Cardiac echography applied to diagnosis and therapy evaluation in idiopathic hypertrophic subaortic stenosis
05 p0800 A70-16103

Cardiology role in aviation medicine, evaluating jumbo jet and SST flight stress effects on pilots and passengers in age factor study of arteriosclerosis
05 p0803 A70-16721

Alpha-methyl-DOPA inhibitor effect on catecholamines and cardiac spontaneous activity in pacemaker fibers in rabbits
06 p0992 A70-17422

Acute myocardial ischemic injury and infarction in dogs related to changes in man using oxygraph tracings
06 p0997 A70-18405

Geometrical model of human cardiac excitation stages based on normal heart anatomy, discussing application to study of QRS loop in vectorcardiogram
07 p1211 A70-19592

On-line computer for heart rate, isovolumetric contraction time, ejection time, stroke volume and cardiac output using vibrophonocardiogram signals
07 p1224 A70-20196

Vectorcardiogram variations of clinically normal individuals over forty compared with young adults
08 p1452 A70-21264

Human mitral valve morphology, distinguishing chordae tendineae types by insertion mode
10 p1819 A70-24935

Human mitral valve morphology, studying posterior and anterior leaflets partitioned by chordae tendineae
10 p1819 A70-24936

Stochastic processes for physiological analysis of cardiac rhythm dynamics during work
15 p2680 A70-31609

Electronic simulation of indicator-dilution curves for comparative evaluation of cardiac output computers
24 p4309 A70-46120

CARDIOTACHOMETERS

Cardiac output and coronary blood flow during steady state recumbent exercise, discussing CO and Rb 84 measurements in human subjects
08 p1453 A70-21936

CARDIOVASCULAR SYSTEM

NT AORTA

NT ARTERIES

Intermittent left anterior hemiblock as natural experiments for changes induced by conduction disturbance on human electrocardiograms
01 p0015 A70-10435

Physiological signals of cardiovascular system transducing methods applied to vector ECG, heart sounds, peripheral pulse waves, chest microphone and plethysmography
02 p0243 A70-12095

Ballistocardiography and cardiovascular performance - Conference, Atlantic City, May 1968
02 p0240 A70-12675

Display devices for ballistocardiographic test data obtained from professional pilots free of cardiovascular disease subjected to displacement and acceleration
02 p0247 A70-12676

Electrical analog simulation of cardiovascular system, determining blood flow rate and pressure in aorta and peripheral vessels
03 p0420 A70-13490

Dielectrocardiograph for studying cardiovascular and respiratory activities by recording hyperemia-evoked permittivity variations in localized body areas
03 p0435 A70-13714

Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement
03 p0425 A70-13895

Civil aviation personnel cardiovascular rehabilitation using single-lead electrocardiographic telemetry for monitoring and assessing cardiovascular status during supervised exercise
03 p0438 A70-14069

Airline stewards cardiovascular and ischaemic heart disease statistics compared with civilian pilots and general population
03 p0438 A70-14070

Analog computer model of human cardiovascular control system to reproduce subject response to submaximal workload
03 p0438 A70-14081

Cardiovascular responses to sustained high skin temperature in resting men noting dizziness, impaired vision and extracutaneous vasodilatation
03 p0429 A70-14162

High altitude acclimatization effects on cardiovascular system, external respiration, blood com-

position, optical and vestibular analyzers in human subjected to various stresses
04 p0630 A70-14576

Analog computer cardiovascular system model to simulate pressure and flow events in veins including effects of gravity, collapse, breathing and venous valves action
04 p0641 A70-14632

Catecholine excretion, cardiovascular functions and subjective effort in healthy male subjects under various physical work loads
05 p0801 A70-16141

Hypothalamic stimulation effects on cardiac and vascular efferent components of baroreceptor reflexes in spinal cats
07 p1202 A70-18866

Physical training effects on factors in cardiovascular system influenced by age
07 p1212 A70-19691

Electromechanical graph digital reader for records of cardiovascular studies
07 p1224 A70-20197

German monograph on determination of blood velocity, pressure, pulse rate and vascular structure parameters using Doppler effect
08 p1452 A70-21297

Nervous control of unconditioned cardiovascular reflexes during ontogenesis in children, observing sympathetic and vagal tonicity
08 p1446 A70-21449

Cardiovascular control system mathematical model incorporating fundamental properties of heart muscle for digital simulation using FORTRAN program
08 p1453 A70-21513

Cardiovascular aging and aeromedical maintenance programs for selecting test pilots
08 p1453 A70-21739

Thoracic cage, heart and extirpated lung dimensions measurement for dogs before and after explosive decompression and after ground level recompression
08 p1448 A70-21793

Beta-adrenergic blockade effect on abnormal R-ST segment and T-wave changes, showing propranolol use in stress catecholamine and organic cardiovascular diagnosis
08 p1449 A70-21945

Cardiac output in humans by analog computer program using mass spectrometer analysis of expired air
08 p1454 A70-21948

Hypothalamus stimulus effects on sympathetic nerve activity to heart, spleen, kidney and leg skeletal muscle in anesthetized cats
09 p1614 A70-22001

Soviet book on nervous stress and cardiac activity covering hypothalamus and cardiovascular reactions and cardiac component of complex conditioned reflexes and emotional reactions
10 p1809 A70-23873

Prolonged hypodynamia effects on hemodynamics using dye dilution method, noting adaptability in cardiovascular system
10 p1814 A70-24671

Occlusion training during hypodynamia with inflatable thigh cuffs to prevent unfavorable effects on cardiovascular system
10 p1816 A70-24689

Cardiovascular reactions and orthostatic stability during hypodynamia determined from ECG, seismocardiograms, phonocardiograms, sphygmograms and tachy-oscillograms
10 p1817 A70-24694

Human cardiovascular system function during adaptation at various high altitudes using simultaneous EKG and phono-KG recordings
10 p1823 A70-25179

Dielectrocardiograph for studying cardiovascular and respiratory activities by recording hyperemia-evoked permittivity variations in localized body areas
11 p1990 A70-25514

Cardiovascular model for closed loop analog simulation of congenital heart defects hemodynamics
11 p1990 A70-25705

Pneumatic compression effects on canine cardiovascular dynamics after hemorrhage tested in G-suit inflation
11 p1988 A70-26516

Indicator dispersion model for cardio-pulmonary system based on continuity past sampling site, observing diffusion coefficient nonlinear increase with blood speed
12 p2174 A70-27019

Rats cardiac aerobic and anaerobic pathways response to hyperbaric oxygen exposure
13 p2349 A70-28833

Human proprioceptive reflexes fluctuations correlation with spontaneous respiration and cardiovascular rhythms
13 p2350 A70-29323

Position dependent variations in intrapericardial, pleural and esophageal pressures and cardiac output in thorax of dogs
13 p2356 A70-29946

Cardiovascular and circulatory phenomena fluid mechanical aspects emphasizing pulsatile blood flow
15 p2720 A70-31789

Air bubble breaking in blood and water flow passage of simulated cardiopulmonary bypass system with flow constriction 15 p2692 A70-32312

Heart rate elicitation and blood pressure increase, considering parasympathetic and sympathetic nervous outflows adjustments of initial cardiovascular response to muscular contraction 15 p2684 A70-32535

Long term weightlessness effects on cardiovascular system of rats using miniaturized pump oxygenator 16 p2854 A70-33999

Multistage electrocardiographic exercise tests for cardiovascular performance measurement 17 p3034 A70-35878

Human cardiac flow during acceleration as function of time with and without anti-g suit, using electric plethysmograph 17 p3040 A70-35915

Intact femoral artery pressure-diameter relationship in man, discussing noradrenaline infusions effects 18 p3222 A70-37222

Hemodynamic effect of lidocaine given by infusion and bolus injections in myocardial infarction, examining cardiac output, heart rate, systolic left ventricular and aortic pressures 19 p3366 A70-38575

Cardiovascular stress testing using posterior bipolar lead for radiotelemetry monitoring 20 p3578 A70-39199

Visceral blood flow during exercise in sled dogs, testing hypothetical compensatory decrease as cardiovascular reserve for skeletal muscle by biotelemetry 20 p3571 A70-39366

Hemodynamic changes in Andean native after two years at sea level, measuring intravascular pressures, cardiac output, heart rate and stroke index 20 p3571 A70-39427

Cardiovascular blood circulation system dynamic characteristics analysis by linear statistical correlation methods, describing test for determining weighting function 20 p3581 A70-39905

Ship engineers cardiovascular system functional changes during HF internal combustion engine noise, investigating EKG recordings and arterial pressure 20 p3582 A70-40292

Ballistocardiography and cardiovascular therapy - Conference, Oporto, Portugal, March-April 1969 21 p3762 A70-41226

Algorithm for cardiovascular force computation from phase regional blood flow and mass motion, interpreting Bcg 21 p3763 A70-41238

Bcg interpretation, discussing degrees of freedom, blood mass displacement, cardiovascular system, etc 21 p3770 A70-41239

Adaptation of cardiovascular system in aging and old individuals under muscular activity 22 p3968 A70-42896

Occupational and age composition of working population of U.S.S.R., comparing cardiovascular and respiratory systems 22 p3969 A70-42904

Decompression sickness pathophysiology, discussing cardiovascular system, altitude effects, therapy and prevention 22 p3975 A70-43700

Computer photokymographic recording of gravitational-inertial force environment effects on cardiovascular and respiratory systems on centrifuge 22 p3976 A70-43709

Optimum bed rest time schedules for cardiovascular patients from neurological, dynamometric, electromyographic and myogenic-tonus tests 23 p4149 A70-45077

Hypodynamic effects on human external respiratory function and cardiovascular state under various microclimatic conditions 23 p4149 A70-45078

Human cardiovascular compensatory responses to environmental cold stress, relating heart stroke to increased oxygen consumption 24 p4302 A70-46103

Cardiovascular dimensions changes and heart volume in physically trained young men, comparing with response in old age 24 p4303 A70-46109

CARDS

NT PUNCHED CARDS

CARET WINGS

Energy supply for supersonic flight air suction propellant systems using external supersonic combustion, discussing Caret wing and pressure effect 04 p0785 A70-15160

Shock patterns for simple caret wings generating specific flow patterns 13 p2509 A70-28542

CARGO

NT AIR CARGO

NT BAGGAGE

CARGO AIRCRAFT

NT C-5 AIRCRAFT

NT C-9 AIRCRAFT

NT C-47 AIRCRAFT

NT C-135 AIRCRAFT

NT C-141 AIRCRAFT

Cargo transport aircraft design and operation, discussing costs, cargo density, runway strength, gear design, customer service, etc 02 p0225 A70-12262

Mil-10 Soviet giant helicopter cargo and altitude record, VTOL and STOL capability and weight design 03 p0414 A70-14286

Fiat G-222 aircraft featuring high wing twin engine retractable landing gear for military cargo transport 10 p1805 A70-24381

Onboard cargo loader to make aircraft independent of specialized ground equipment 10 p1862 A70-25330

Book on Polish air cargo transport covering transport volumes, aircraft, preparation and loading operations 13 p2524 A70-29453

Pilots energy expenditure during jet, propeller and helicopter cargo aircraft flight, using expired air samples 15 p2689 A70-31876

Design modifications for BAC Vanguard 953 aircraft conversion to palletized all-cargo service, discussing interior layout, cargo door, air conditioning and weight 16 p2842 A70-34049

Extensible wing flap system for cargo aircraft, discussing structural design details and advantages [AIAA PAPER 70-911] 17 p3020 A70-35823

Swing tail cargo aircraft fuselage section stress analysis by finite element method, discussing displacement models, deformation modes and economics 21 p3935 A70-41260

CARGO SPACECRAFT

Space station-logistics vehicle docking and men-material transfer problem 01 p0193 A70-10612

Orbital space station operations requirements and interactions, considering experimentation, support vehicles, ground support and follow-on growth [AIAA PAPER 69-1062] 01 p0195 A70-10636

Development models for post-Apollo lunar cargo delivery system utilizing Saturn 1B and Centaur stages [DGLR-69-9] 04 p0763 A70-15187

CAROTID SINUS REFLEX

Atrioventricular conduction in atrial fibrillation and flutter in man, using His bundle recordings 03 p0415 A70-12887

Sinocarotid pressor reflexes effects on coronary circulation in anesthetized dogs noting changes in blood pressure, peripheral resistance and cavity pressure 03 p0422 A70-13693

Hypothalamic stimulation effects on cardiac and vascular efferent components of baroreceptor reflexes in spinal cats 07 p1202 A70-18866

Posthypoxic vasodilation in extremities of anesthetized dogs preserved after carotid and aortic reflexogenic zones exclusion 07 p1204 A70-19139

Atmospheric pressure-diameter relationship of common carotid artery in head and neck region of conscious men 08 p1447 A70-21508

Left ventricle zone as principal reflexogenic zone of heart participating in greater circulation vessel tonus control 13 p2353 A70-29356

Sinus and diaphragmatic nerves impulse activity during hypoxia compared with normal respiration in cats 23 p4145 A70-44312

CARRIER FREQUENCIES

Modulation type eddy current flow detector with striding converter, considering envelope shape of carrier frequency oscillations 06 p1079 A70-18631

Digital transmission techniques optimal utilization of assigned frequency spectrum for phase modulation of frequency carriers 10 p1839 A70-24365

Frequency stability characteristics and control in SSB-FDMA/PbM multiple access system tested by ATS [AIAA PAPER 70-411] 11 p2000 A70-25460

Phase lock loop acquisition and tracking of carrier frequency modulated by single sinusoid, obtaining parameter values through mathematical model and digital simulation 15 p2703 A70-32578

Optimum carrier phase delay estimation for one way ranging aircraft navigation, investigating receiver signal processing 16 p2947 A70-33449

Heisenberg uncertainty principle in communications technology, discussing variance products deficiencies and limits in carrier frequency pulses application 20 p3584 A70-39160

Carrier frequency transfer of amplitude modulated signal at two coupled transitions in traveling wave gas laser 23 p4202 A70-45055

CARRIER INJECTION

Double injection in semiconductors at high current densities, discussing procedure yielding space charge and field distribution and voltage drop 01 p0154 A70-10123

Dielectric layers electrical conductivity in ceramics containing Ti during aging, observing different characteristics ascribed to nonequilibrium current carriers injection 01 p0156 A70-10221

Space charge injection-impulse voltage separation technique for nonuniform field breakdown phenomena 01 p0110 A70-10560

Microwave circuit for increasing Gunn oscillators injection locking capabilities and reducing FM resulting from bias-voltage fluctuations 01 p0050 A70-10783

Generation-recombination noise theory extension to nonlinear devices applied to double injection diode in various operation modes 03 p0458 A70-14028

P-n-n structure dynamic I-V characteristics at high injection levels mathematically determined, showing rectifying capability decrease with increasing harmonic signal frequency 05 p0892 A70-16196

Carrier injection luminescence properties useful for display medium applications, discussing group II-VI compounds as injection host crystal materials 08 p1557 A70-21681

Fabrication effects on current instability during injection and breakdown of p-n junctions in GaAs oscillators 09 p1740 A70-23351

Recombination radiation intensity current dependence and I-V characteristics p-n-n diode operating in double injection mode and electrons trapping 14 p2625 A70-30163

CW injection laser frequency stability, noting injection current influence on lasing frequency 15 p2750 A70-31629

Nonequilibrium charge carriers transient accumulation in p-i-n diode at superhigh injection levels 15 p2714 A70-32908

Turbulent charge diffusion during unipolar injection in nitrobenzene between plane-parallel electrodes, discussing liquid motion at high voltages 22 p4080 A70-42719

Carrier injection-limited Gunn diode wideband performance, deriving expression for admittance 24 p4319 A70-46081

CARRIER MOBILITY

NT ELECTRON MOBILITY

NT HOLE MOBILITY

Current carrier mobility in n-InSb calculated by Schwinger variational method over temperature range 01 p0154 A70-10098

Current carrier motion and diffusion capacity in p-i-n junctions with highly doped regions under large variable signal 05 p0892 A70-16197

Activated carrier mobility confirmed in organic solids 06 p1004 A70-17325

Avalanche diodes properties, establishing equivalent circuit accounting for static electricity, carriers transit time and thermal effects 10 p1850 A70-24625

Hall constant and carrier mobility in semiconductor diamond films doped by boron ion injection, observing temperature dependence of mobility 12 p2287 A70-27480

N-type GaAs carrier mobility and concentrations increased slow cooling after heat treatment 12 p2289 A70-28343

Carrier drift due to electromagnetic impulse, deriving expressions for photo emf generated in transverse magnetic field manifesting monopolar photomagnetic effect 13 p2452 A70-29282

Gunn diodes I-V characteristics width as function of carrier concentration/mobility and diode length, noting role of impact ionization in strong electric field 13 p2378 A70-29408

InAs thin films electrical properties and IR reflectance, determining thickness and substrate temperature effects on carrier concentration and mobility 15 p2783 A70-31965

Carrier diffusion effect in large signal analysis of semiconductor avalanches in quasi-static approximation 19 p3387 A70-37768

Current carrier mobility under dynamic regime in p-n junctions by computerized method, emphasizing transitory phase 19 p3487 A70-38169

Photovoltaic effects in semiconductors, considering excess load carrier transport and I-V characteristics 19 p3488 A70-38477

Surface density, charge and field effect mobilities for electrons and holes on MIS insulator-semiconductor structure on narrow bandgap HgCdTe 22 p4086 A70-43018

Intraband absorption in p-type GaAs associated with carrier transitions between heavy and light hole in valence band 23 p4232 A70-45066

Conducting state propagation in p-n-p-n structure involving minority carrier diffusion between regions 23 p4232 A70-45068

CARRIER MODULATION

U MODULATION

CARRIER ROCKETS

U LAUNCH VEHICLES

CARRIER SYSTEMS

U WIRELESS COMMUNICATIONS

CARRIER WAVES

Transient Faraday rotation of S-band telemetry carrier observed during Pioneer 6 occultation by solar corona, correlating with decametric radio radio bursts 02 p0369 A70-12059

Envelope delay and amplitude characteristics measurement of modulated carrier wave channel in radio relay link 02 p0258 A70-12475

Digital controlled phase-locked loop in burst mode operation, comparing recovery characteristics with carrier and bit-timing recovery techniques based on statistical analysis 10 p1835 A70-24333

Power spectral density and autocorrelation functions of sinusoidal carrier amplitude modulated by split phase PCM and PSK 11 p2008 A70-26203

Noise effect on single band modulation receiver using phase automatic frequency control for carrier wave at arbitrary SNR 13 p2370 A70-29739

Demodulators threshold performance for satisfying carrier to noise ratios requirement of Intelsat 4 system 14 p2552 A70-31352

Carrier synchronization system for PSK signals, using direct regenerative repeater and phase locked loop/DR-PLL/ 15 p2697 A70-31826

Automatic calibration verification of subcarrier telemetry discriminators with selective channel readjustment 19 p3383 A70-37902

PCM data transmission, considering baseband code and modulated carrier formats and spectral distributions 19 p3379 A70-37905

Communications satellite carrier instrumentation, using computer controlled frequency shift radiometer for power monitoring 21 p3826 A70-41345

Phase recovery in vestigial sideband (VSB) data transmission, deriving carrier acquisition time required to achieve satisfactory error rate for coherent demodulation of PAM 21 p3793 A70-42178

CARRIERS

Natural vibrations of free autonomous system of carried and carrier solid bodies connected by elastic couplings 18 p3342 A70-36594

CARTESIAN COORDINATES

Initial quaternion for Cartesian time varying transformation matrix based on self alignment method of inertial analytic platform 11 p2072 A70-26150

Military pilots visual estimation of point location coordinates within rectangular area 13 p2357 A70-29121

Heat conductivity equations transformation for Cartesian and cylindrical coordinates and various boundary conditions using static electrointegrator 15 p2827 A70-32172

Curvilinear orthogonal coordinates for gravimetric deduction related to Cartesian coordinates as solvability condition for Molodenskii problem 20 p3617 A70-39071

CARTILAGE

Squid head cartilage properties in terms of light and electron microscopic appearance, amino acid composition and X ray diffraction 24 p4305 A70-46348

CARTOGRAPHY

U MAPPING

CARTRIDGE ACTUATED DEVICES

U ACTUATORS

U EXPLOSIVE DEVICES

CARTRIDGES

Swinging gear drive, breather cartridge and hypocycloid timer mechanisms for reliable aerospace applications 16 p2921 A70-34104

CASCADE CONTROL

Transistorized amplifiers synthesis with multiloop feedback 15 p2707 A70-31518

CASCADE FLOW

Cascade tests to investigate nature of flow in rotor blade channels of axial flow turbines with partial admission 01 p0162 A70-10329

Optimal lift-drag ratio of cascades dependence on optimal pitch of cascades calculated for axial flow turbomachinery 02 p0356 A70-12750

Two dimensional cascade tests of turbine blade airfoil plotted by Legendre hodograph method, discussing pressure distribution measurements 03 p0410 A70-14272

Von Karman transonic similarity law applied to flow through plane turbine blade cascades [DGLR-69-24] 04 p0616 A70-15183

Flow field calculation for axisymmetrical gas flow in axial compressor cascade applicable to optimal blade design 04 p0617 A70-15191

Turbine cascade designs with constant reactivity over blade vertical profiles contributing to effective manufacturing of short and long blades 04 p0617 A70-15192

Flexible blades cascade design compared with various correlation criteria, describing cascade and profiles geometry and loss coefficient 05 p0790 A70-16029

Flow separation angle and loss coefficient in cascades with small aspect ratio blades under secondary vortex pair expansion over channel 06 p1130 A70-17858

Inviscid flow through staggered airfoil cascades in oscillatory and distorted flow simulating axial flow compressor [AIAA PAPER 70-131] 06 p0969 A70-18049

Airfoil cascade flow deflection angle using linearized jet flap theory 08 p1433 A70-21323

Shock wave configurations across compression cascades in transonic approach flow 09 p1604 A70-22657

Secondary losses in axial turbine cascades without end clearance noting correlation with blade loading 09 p1743 A70-22980

Stepwise averaged parameters of nonuniform three dimensional flow through turbine blade cascade determined from conservation conditions 09 p1606 A70-23611

Blade inter-row distances upstream and downstream related to potential flow velocity disturbances created by cascade in turbomachines 09 p1607 A70-23734

Subsonic compressible or incompressible inviscid flow field through turbomachine blade row determined by matrix and streamline curvature methods 09 p1608 A70-23745

Streamwise perturbations in flow downstream of self excited blades cascade calculated by two dimensional theory, discussing periodic circulation shedding 09 p1608 A70-23746

Wake-boundary layer interaction in wind tunnel tandem cascades, discussing end wall suction 09 p1609 A70-23750

Cascade theory of turbulence, applying cascade decomposition resulting from Navier-Stokes application to hydrodynamic turbulence to Riemann equation for atmospheric and plasma turbulence 10 p1868 A70-24167

Singularity carrier auxiliary curves for design calculation of airfoil cascades, discussing existence theorems and case of thin profiles 11 p1974 A70-25783

Singularity carrier auxiliary curves for design calculation of airfoil cascades, discussing profiles with small and large arcs 11 p1974 A70-25784

Velocity distribution of plane airfoil cascade given by geometry, using method of least squares 11 p1974 A70-25785

Circular cascade design from rectangular cascade flow data using conformal transformation, considering aerodynamic properties 11 p1974 A70-25786

Shear flow near walls through cascade of untwisted blades, observing variation in lift coefficient across span 11 p1975 A70-25788

Flow characteristics of airfoil rotating cascades in variable width channel in incompressible liquid 11 p1975 A70-25789

Airfoil cascades flow for given profile shape by singularity method, obtaining velocities 11 p1975 A70-25790

Flow pattern of axial flow of turbine stage calculated from cascade characteristics 11 p1975 A70-25794

Acoustic wave transmission and reflection through blade row in axial flow compressor analysis based on semiautuator disk theory and acceleration potential method 11 p2103 A70-26705

Compressor cascade flutter phenomenon, investigating factors affecting aerodynamic damping force on annular cascade blades 13 p2341 A70-29447

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cam-

bered multibodies in cascade, noting slotted compressor blade performance 14 p2529 A70-31023

Radial flow impellers design for maximum machine performance, using straight cascade characteristics 15 p2672 A70-31825

Aerodynamic forces exerted by compressible fluid on airfoil cascade in subsonic potential flow 16 p2833 A70-33075

Gas-particle mixture cascade flow over turbine blades, considering momentum/heat transfer and particle trajectories [AIAA PAPER 70-712] 16 p2835 A70-33569

Off-design performance characteristics of supercavitating hydrofoils in cascade for various arrangements, flap angles and flap chord ratios [ASME PAPER 70-FE-24] 16 p2892 A70-33633

Circular blade cascade design for superonic vane diffuser of radial flow centrifugal compressor 16 p2837 A70-33764

German monograph on planar straight cascades in incompressible frictionless potential flow, basing method on singularity method integral equation reversal 16 p2839 A70-34081

Two dimensional compressor cascades of double circular arc and wedge shape blades testing performance in transonic and supersonic wind tunnels [ASME PAPER 70-GT-7] 18 p3302 A70-36829

Plane and annular cascade facilities data application to aerodynamic design of axial flow compressors [ASME PAPER 70-GT-106] 18 p3303 A70-36845

Axial flow compressor cascades, predicting total pressure losses for inlet relative Mach number greater than unity [ASME PAPER 70-GT-57] 18 p3209 A70-36872

Transonic high turning low aspect ratio stator cascades flow field performance prediction, reducing secondary flows by partial slots [ASME PAPER 70-GT-63] 18 p3209 A70-36875

Two dimensional cascades for incompressible plane potential flows with given velocity distribution [ASME PAPER 70-GT-87] 18 p3209 A70-36880

Quasi-two dimensional supersonic cascade flow, taking into account transverse stream contraction effect 18 p3210 A70-37206

Low drag supersonic compressors for aircraft engines, calculating start and cruise conditions of quasi-isentropic flow cascades 21 p3745 A70-41405

Low aspect ratio compressor blade cascade performance at blade span center, discussing pressure loss, angle of attack and staggering 22 p3957 A70-42272

Viscous transonic flow past cascades by semiempirical approach, discussing pressure distribution, boundary layer parameters and compression shock 22 p4088 A70-42343

Two dimensional turbine cascade air flow, examining boundary layer regime, thickness, velocity and pressure coefficient at any point by Mach-Zehnder interferometer 24 p4026 A70-42344

Transonic turbine cascades exit flow parameters taking into account blade profile 22 p4088 A70-42346

Two dimensional transonic cascade flow, using Von Karman similarity law 22 p4089 A70-42347

Cascade flow field analysis from given blade geometry, deriving expressions for numerical solution of inverse turbine design problem 24 p4288 A70-45501

Turbine blades aerodynamic forces theoretical and experimental investigation, noting cascade series interaction induced pressure pulsations 24 p4288 A70-45504

CASCADE WIND TUNNELS

Supersonic cascade wind tunnel performance evaluation, using compressor blades of simple geometric shapes [ASME PAPER 70-GT-110] 18 p3238 A70-36848

Cascade tunnel testing role in designing supersonic compressor rotor blading for lower jet engine weight and fuel consumption [ASME PAPER 70-GT-79] 18 p3305 A70-36885

Airfoil cascade blade design by iteration method equating normal velocity distribution about contour with imposed tangential velocity 01 p0001 A70-10263

Monograph on stochastic theory and cascade processes, discussing branching phenomena, point processes, electromagnetic cascades, extensive air showers, polarization, population growth, etc 01 p0134 A70-11327

Theoretical and experimental cascade curves comparison for heavy materials used for particle absorption in tracking experiments, discussing Coulomb scattering 03 p0527 A70-13051

Longitudinal nuclear-electromagnetic cascade in ionization spectrometer simulated by Monte Carlo

method, noting energy relationship to particle sum recording
08 p1500 A70-21743

Low noise nonreciprocal microwave parametric amplifier with up-and-down converter and idlers in cascade
09 p1647 A70-22850

Circular cascade design from rectangular cascade flow data using conformal transformation, considering aerodynamic properties
11 p1974 A70-25786

Plasma turbulence spectral theory, considering cascade processes in collisional and collisionless dissipation
11 p2095 A70-26756

Atom excited state mean lifetime measurement, using correlated cascade photons method
14 p2620 A70-31378

Three dimensional nucleon-pion cascade equations solution for cosmic ray extensive air showers by pion-links method
17 p3150 A70-34597

Nuclear-electromagnetic cascades longitudinal development in glass, Fe and W absorbers, presenting Monte Carlo simulation
18 p3293 A70-36895

Image intensifier apparatus photographing nuclear electromagnetic cascades in ionization spectrometer
18 p3261 A70-37091

Heavy elements critical energy calculation, taking into account low energy electrons effects on losses in electromagnetic cascade
20 p3674 A70-39303

German monograph on supersonic strongly deflecting retardation cascades covering flow geometry and application to axial flow compressor stage
24 p4287 A70-45095

CASCADES (FLUID DYNAMICS)
U FLUID DYNAMICS

CASE BONDED PROPELLANTS

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation
03 p0480 A70-12882

Case bonded solid propellant rocket motors stresses under transverse body force loading as function of load orientation, case stiffness and support method [SESA PAPER 1502]
03 p0579 A70-12961

Two dimensional plane stress photoelastic models of star configurations in elastic case bonded solid propellant rocket motors under transverse body force loading
03 p0582 A70-14312

Cast double base technique for free-standing and case-bonded propellant charges, discussing manufacturing and mathematical model of casting and curing
07 p1360 A70-19906

Adhesive debonding in case-bonded solid propellant rocket motors, describing stress analysis and interfacial surface energy measurement
17 p3146 A70-35222

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation
20 p3718 A70-39158

CASE HISTORIES

Long air voyage after exteriorization of Wallenberg syndrome, discussing case history of subject with cerebral vascular accident
12 p2172 A70-28044

Welding failure case histories, discussing design, materials and processes, fabrication and quality control integration
21 p3832 A70-40787

CASES (CONTAINERS)
NT ROCKET ENGINE CASES

Structural design of boron/epoxy front housing for T-56 turboprop reduction gear case achieving reduced weight and increased stiffness
05 p0853 A70-15837

Air cargo transportation systems in 1970s, discussing market expansion, payload capacity and fleet growth, containerization, etc
07 p1250 A70-19875

CASING

Casing and suction cone effects on fans with cambered forward curved blading
11 p1975 A70-25796

CASSEGRAIN ANTENNAS

Shaped-reflector Cassegrainian antenna characteristics calculation, using current distribution method to derive subreflector radiation pattern
02 p0270 A70-12617

Phase center position of field scattered from hyperboloid subreflector in asymmetric Cassegrain antenna feed system
06 p1019 A70-17557

Beam switching Cassegrain antenna for millimeter wave radio astronomical measurements, describing RF and electronic systems
11 p2019 A70-26374

Far field radiation patterns of Cassegrain, offset paraboloid and horn reflector antennas by stationary phase approximation method
11 p2019 A70-26659

Cassegrain antenna feed system for satellite communication earth stations, noting low noise characteristics
11 p2011 A70-26716

Cassegrain antenna with parabolic mirror and switch designed for broadband transhorizon radio relays, using antenna scale model to determine parameters and electrical properties
11 p2020 A70-26823

Field correlation theorem for deducing Cassegrain antennas performance from internal field distributions, considering two reflector diffraction problems
15 p2698 A70-31953

Illumination efficiency in shaped two reflector Cassegrain antenna system related to feed pattern deviation
16 p2861 A70-32968

Cassegrain antennas design parameters using graphs for minimum blockage condition
19 p3376 A70-37690

Millimeter wave high gain Cassegrain antenna for wide bandwidth data link between communications satellites, obtaining accurate parabolic contours
21 p3799 A70-41359

CASSEGRAIN OPTICS

Cassegrain telescopes lens corrector systems, critically examining various published articles
02 p0297 A70-11927

Lund astronomical observatory, describing Cassegrain-Nasmyth reflector and attached electrophotometer for stellar measurements
02 p0275 A70-12061

Optical systems for coude focus spectroscopic telescopes, discussing advantages over Newtonian and Cassegrain foci
04 p0685 A70-14522

Cassegrainian liquid He cooled IR telescope for rocket-borne IR astronomy, discussing optical, cryogenic and electronic designs
04 p0689 A70-15017

CASSIOPEIA A

Cassiopeia A high resolution map at UHF revealing main source physical characteristics and enhanced emission compact components
12 p2309 A70-27976

X ray spectrum analysis for Crab, Cas A and SN 1572 supernova remnants
17 p3156 A70-34830

CASSIOPEIA CONSTELLATION

Supernovae and remnants, data concerning radio brightness distribution of Tycho supernova remnant and Cassiopeia and Crab Nebula origin
09 p1748 A70-21989

VX Cas brightness determination from color plates, giving values in tabular form
11 p2115 A70-26583

Coordinates and brightness characteristics of variable observed during photographic studies of VX Cas
11 p2116 A70-26584

Sounding rocket X ray survey of Cassiopeia region for supernova remnants and galactic source distribution
17 p3153 A70-34528

Gamma Cas star time and spectra observations, examining emission line profile variations and envelope and stellar model
24 p4404 A70-45415

CASTING
NT INVESTMENT CASTING
NT PROPELLANT CASTING

Filamentary casting technique for nonequilibrium alloy structures to produce continuous specimens by rapid solidification
04 p0698 A70-15135

Soviet papers on casting of aluminum, magnesium and titanium alloys
08 p1504 A70-21126

Al-Cr-Zr alloy ingots macrostructural inhomogeneities, studying roles of casting rate and additives in intermetallics primary crystallization
08 p1517 A70-21128

Molten Al alloys flow rate and behavior in various casting systems, considering gate geometry and casting temperature effects
08 p1505 A70-21133

Mold canting effects on nonporosity of Al alloys flat castings noting decreased metal losses
08 p1517 A70-21134

Porosity formation in Al ingots made by semicontinuous casting, considering metal grade and purity, gas content and homogenization conditions
08 p1505 A70-21136

Optimum composition of sand-bentonite materials for aluminum alloy casting in molds compacted by high pressure
08 p1506 A70-21137

Mutual thermal influence zone between parts of die casting during solidification established as function of time
08 p1506 A70-21138

Thermal interaction between casting and mold at beginning of cooling using mathematical model for temperature field
08 p1506 A70-21139

Solidification thermal conditions during Ti casting by melting out patterns in graphite molds, investigating heat accumulation coefficients in molds
08 p1506 A70-21142

Heat resistant cast alloys creep strength reporting criteria, comparing U.S. and European practices [ASM PAPER P9-15.2]
09 p1702 A70-22558

Mono Graf casting process for Ti alloy aerospace applications, utilizing high strength/weight ratio and corrosion resistance
17 p3097 A70-34361

Ti precision casting methods, emphasizing alloys peculiarities
17 p3097 A70-34362

High temperature Ni base superalloy stress-rupture life dependence on casting variables and section size
20 p3648 A70-39413

Creep resistant Ni-base superalloys ductility and thermal shock resistance improvement by precision casting technique, producing columnar grain and single crystal structures
20 p3648 A70-39415

CASTINGS
NT INGOTS
NT PROPELLANT CASTING

Effects of solidification conditions and gas content in melt on continuously cast Al ingots as-cast structure
02 p0316 A70-12297

Al solidification in direct chilling molds effect on as-cast structure, analyzing heat removal, casting rate and application of water to outgoing ingot
02 p0316 A70-12298

Grain refining of continuously cast Al by additions of B and Ti
02 p0309 A70-12299

Electrical resistivity, contact resistance and weldability of cast Cu and Ag contact materials reinforced unidirectionally by W wire compounded to powder composition
04 p0711 A70-14465

Mechanical properties of cast light alloys at low temperatures, showing satisfactory plasticity and insensitivity to stress raisers
05 p0864 A70-16868

Al casting design considering alloy materials selection and casting methods
06 p1076 A70-17602

Heat transfer effects during solidification on mechanical properties of Al alloy castings compared with sand castings [ASM PAPER W9-7.2]
07 p1293 A70-18998

Rare earth elements effects on microstructures and mechanical properties of cast Al, Al-Si and Al-Si-Mg alloys
08 p1516 A70-21127

Graphite shell molds for Al castings mass production
08 p1505 A70-21135

Heat exchange during solidification of castings in molds, studying thermal properties effect for achieving constant mold surface temperature
08 p1506 A70-21141

Graphite molds compaction pressure effect on Ti castings nonporosity and surface layers carburization
08 p1506 A70-21143

Silicon organic binding materials properties, assessing ethyl silicate-50 perspectives in fabrication of precision castings
08 p1506 A70-21144

Foundry facilities for high strength nodular, pearlitic malleable and Cr-Mo gray iron and Al castings
13 p2420 A70-29250

Cellular precipitation in laminar eutectic and cast Ni-Cr alloys
15 p2761 A70-32383

Freckles origin in unidirectionally solidified castings, noting convective jets role
20 p3646 A70-39102

CASUALTIES

Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation [AIAA PAPER 69-461]
06 p1154 A70-17169

CATABOLISM

Heme catabolism in untreated rats and in animals treated with phenobarbital or porphyrogenic drug, comparing bilirubin and Co production
20 p3583 A70-40450

Protein catabolism increase during high altitude exposure to hypoxia in rats, noting amino acid incorporation into tissue proteins
22 p3967 A70-42459

Extreme environmental temperature effects on hepatic amino acid catabolism in rats attributed to caloric deficiency
23 p4148 A70-44790

Energy yield measurements of catabolic and anabolic activity in autotrophically growing *Hydrogenomonas eutropha*
23 p4149 A70-44997

CATALOGS

Catalog systems orientation based on major and minor planets observation, discussing zero points corrections

08 p1574 A70-21152

Catalog in tabular form of discrete celestial X ray sources in energy region above 2 keV

13 p2489 A70-28903

CATALOGS [PUBLICATIONS]

NT ASTRONOMICAL CATALOGS

Fourth Cambridge catalogue radio sources observed for right ascensions using east-west arm of Molonglo radio telescope, presenting data analysis procedures

01 p0191 A70-11362

Catalog of faint Ob stars between Carina and Centaurus

02 p0370 A70-12075

Aerospace ground air conditioning design, discussing ground support equipment, manuals, manufacturer catalogs, etc

07 p1248 A70-18808

Catalog of solar radio bursts recorded at 208 MHz during IGY and IQSY

08 p1570 A70-20843

Position determination for compact radio sources in 3C catalog

08 p1577 A70-21490

Weather situation persistency, using 500 mb contour chart catalog

16 p2945 A70-32950

CATALYSIS

Surface catalysis and variable transport properties effects on chemically frozen dissociated hypersonic air flow boundary layers enveloping flat plates and slender wedges

01 p0067 A70-11179

Ammonium perchlorate combustion catalysis, studying preflame heating and mixing effects on gas phase flame burning velocity

07 p1425 A70-20010

Composite propellant catalysts (copper chromate and chromite) thermal decomposition using simultaneous thermogravimetric and differential thermal analysis

11 p2100 A70-26382

CATALYSTS

NT ELECTROCATALYSTS

IR spectra of N isotopes adsorbed on nickel-on-Aerosil catalysts, investigating effects of intermolecular interaction and isotopic substitution

03 p0440 A70-13099

Silane coupling agents glass-catalyzed hydrolysis without presence of acid, discussing reaction kinetics

06 p1091 A70-17599

Raney alloy catalyst activity and stability in fuel cell anodes, noting properties of ternary phases of nickel, aluminum and iron, molybdenum or titanium

10 p1831 A70-24466

Raney catalyst preparation and continuous operation in molecular hydrogen and oxygen electrodes noting improved voltage, manipulation and energy yield

10 p1831 A70-24467

Electrochemically optimal structure for Raney alloy catalysts based on molecular hydrogen polarization temperature, noting beta and gamma phases and particle size influence

10 p1831 A70-24468

Low temperature fuel cell materials impurity effects on catalyst poisoning, stressing sulfur elimination from rubber molding

10 p1832 A70-25043

Temperature, solvent, catalyst and formaldehyde concentration effects on monosaccharide synthesis from formaldehyde condensation

13 p2362 A70-29327

Ignition delay-reducing catalyst for furfuryl alcohol-red fuming nitric acid hypergolic bipropellant

13 p2473 A70-29992

Liquid hydrazine decomposition by Shell 405 catalyst, determining gaseous products by gas chromatography and titrimetric analysis

16 p2856 A70-33603

Cellulose ion exchanger palladium catalysts preparation and applications in asymmetric hydrogenation reactions

17 p3042 A70-35125

Metal phthalocyanin catalyzed oxidation by oxygen of vanadium and iron couples in externally regenerated redox fuel cell cathode

22 p3966 A70-43536

Catalytic combustion fuel tank inerting techniques for fire protection in military and civilian aircraft

23 p4141 A70-44485

CATALYTIC ACTIVITY

Copper chromite catalyst effects on sublimated ammonium perchlorate dissociation products, noting applications to solid propellants

03 p0544 A70-13923

Ribonucleic acid polymerase bound with initiating purine triphosphate binding to product terminus site and pyrimidine triphosphate engaging in exchange binds to substrate site

03 p0442 A70-14046

Purification and properties of diphosphopyridine nucleotide-linked glycerol 3-phosphate dehydrogenases from chicken breast muscle and liver

03 p0442 A70-14047

Potassium permanganate catalytic effects on ammonium perchlorate deflagration, studying catalyst dispersion degree role

07 p1358 A70-19329

Molten carbonate fuel cells power source for military applications, considering catalytic recycle reformer

08 p1439 A70-20703

Kinetic model for acid catalyzed Delrin decomposition, testing for Delrin-citric acid system and predicting thermograms with nonlinear regression analysis

09 p1630 A70-22896

Oxygen reduction reaction mechanism and catalysis, considering metal electrode surfaces and substrates, hydrogen peroxide role, adsorption, metal-oxygen bonds, etc

10 p1829 A70-24452

Oxygen reduction in sulfuric acid with phthalocyanine-carbon catalysts

10 p1829 A70-24456

Raney alloy catalyst activity and stability in fuel cell anodes, noting properties of ternary phases of nickel, aluminum and iron, molybdenum or titanium

10 p1831 A70-24466

Catalytic load carrying capacity of porous carbon electrodes impregnated with nickel salt and nickel boride in anodic fuel cell hydrazine oxidation

10 p1831 A70-24469

Electrocatalytic activity of oxides in redox reactions without adsorption, noting application to hydrogen oxidation in acid medium

10 p1831 A70-24470

Refutation of Sylven-Snellman report of catalysis of benzoylarginine beta-naphthylamide and leucine beta-naphthylamide hydrolysis by beef spleen cathepsin B

10 p1812 A70-24534

Stannic oxide-chromium oxide catalyst effects on thermal decomposition and ignition of ammonium perchlorate (AP), calculating activation energy

11 p2100 A70-26281

Gold alloys electrocatalytic activity in cathodic reduction of oxygen in potassium hydroxide

12 p2182 A70-27760

Membrane-like properties of synthetic proteinoid microparticle systems, considering catalytic activities, size and ultrastructure

16 p2847 A70-33029

Spacecraft attitude control microthrusters utilizing catalytically reactive gas mixtures during pulse mode and steady state operation

16 p2969 A70-33611

Optically active organic compounds origin on primordial earth, emphasizing role of asymmetric catalyst

17 p3024 A70-34700

ADP-ATP catalyzed exchange reaction in turtle bladder microsomes, using chromatographic measurements of conversion rates

17 p3034 A70-35900

Laminar boundary layer equations on plate with arbitrary catalytic properties in diatomic gas flow undergoing vibrational dissociative relaxation

20 p3611 A70-39802

Thermally prepared poly-alpha-amino acids catalytic activity after long term dry state storage, suggesting enzyme activity role in biological evolution

21 p3772 A70-40713

Oxygen atom catalytic recombination and flame inhibition mechanism literature survey

23 p4157 A70-44002

Catalytic activities of thermal polyanhydro-alpha-amino acids for modeling enzymes and prebiotic protein

24 p4310 A70-45346

CATAPULTS

NT ROCKET CATAPULTS

Sun-planet systems capture and catapult capacity for interstellar bodies under close flyby conditions

04 p0753 A70-15144

Missile and rail launching structure combined dynamic response determined by discrete element dynamic analysis

12 p2312 A70-27116

Portable catapult and arresting gear analog instrumentation data acquisition system testing aboard aircraft carriers and at land-based facilities

19 p3384 A70-38533

CATARACTS

Laser radiation effects on lens lipid content in adult Rana temporaria frogs during cataract development

22 p3978 A70-43139

Safety standards and biological effects of microwave radiation, investigating cataractogenesis and heart rate in rabbits

23 p4144 A70-43790

CATECHOLAMINE

Catecholamines biosynthesis, distribution, combining, uptake, deposition, release and metabolism in physiological and pathological reactions of organism

01 p0019 A70-10512

Rats sympathoadrenomedullary response to increased oxygen tensions, measuring catecholamines, norepinephrine and epinephrine in adrenal gland, hypothalamus, serum and urine

01 p0024 A70-10979

Blood pH effects on adrenomedullary response to hemorrhage, studying catecholamines release in anesthetized dogs

02 p0235 A70-11733

Catechozamine excretion, cardiovascular functions and subjective effort in healthy male subjects under various physical work loads

05 p0801 A70-16141

Alpha-methyl-DOPA inhibitor effect on catecholamines and cardiac spontaneous activity in pacemaker fibers in rabbits

06 p0992 A70-17422

Beta-adrenergic blockade effect on abnormal R-ST segment and T-wave changes, showing propranolol use in stress catecholamine and organic cardiovascular diagnosis

08 p1449 A70-21945

Total body X irradiation effect on tyrosine hydroxylase and catecholamine levels in rats

09 p1616 A70-22318

Hypoxia biphasic effect on adrenal catecholamine content of guinea pigs and rats during short and prolonged periods

11 p1989 A70-26665

Standard urinary excretion by healthy adult for free adrenaline, noradrenaline, creatinine and hydroxymethoxy mandelic acid, making catecholamine determinations

12 p2168 A70-27622

Sympathoadrenals activity in pilots during supersonic flight, investigating urinary catecholamine output

15 p2690 A70-31891

Daily rhythm in accumulation of rat brain catecholamines synthesized from circulating tritiated tyrosine

16 p2848 A70-33096

Positive pressure breathing effects on cerebral blood pressure and catecholamine content of hypothalamus and adrenal glands in dogs

16 p2849 A70-33997

Hemodynamic response to dopamine before and after myocardial infarction in dogs

17 p2026 A70-35200

CATEGORIES

Research problems resulting from observational methods in social-psychological studies, discussing categorization systems and coding reliability

05 p0802 A70-16668

CATENARIES

Stress-strain state of catenoid, cylindrical and spherical shells of revolution, emphasizing catenoid shell bending problem

15 p2815 A70-31648

Single-frequency oscillations mode in nonlinear catenary systems, considering factors promoting stabilization and uniformity

23 p4218 A70-44344

CATENARY CURTAINS

U CURTAINS

CATHETERIZATION

Blood flow velocity and pressure measurements on conscious man with catheter-tip velocity probe

04 p0645 A70-15439

Miniaturized electromagnetic catheter flowmeter for measuring volume flow rate by potential difference between electrodes

15 p2689 A70-31747

First derivative of ventricular pressure recorded by conventional cardiac catheters, analyzing in terms of Fourier series

21 p3767 A70-40578

Atrioventricular conduction in the human heart, analyzing electrocardiogram response patterns recorded by electrode catheter in unanesthetized man

22 p3970 A70-42942

CATHETEROMETERS

Doppler flowmeter-catheter system to record aortic flow velocity in man during cardiac arrhythmias, considering atrial fibrillation, heart block, etc

02 p0241 A70-12697

CATHODE RAY TUBES

Hardware CRT display system based on digital computer for dynamic flight simulation of moving spatial objects

01 p0089 A70-10818

CRT resolution measurements by double slit method, relating light spot response to slit width

01 p0093 A70-11278

Numeric keyboard CRT display for weather data acquisition from ships at sea, utilizing ATS-3 satellite as transmission medium

01 p0048 A70-11279

Display console characteristics for meeting increasing applications, predicting price reduction trends, color emphasis and CRT competition as primary display component

01 p0221 A70-11286

Projected and head-up flight information displays using cathode ray tubes, discussing optical system, lens design and landing aid application
02 p0330 A70-11843

Broad bandwidth electronic analysis of high resolution photographic film using flying spot CRT or rotating mirror devices
02 p0302 A70-12613

Scanned CRT display optimum spot size in relation to raster pitch, assuming Gaussian luminance distribution
04 p0691 A70-15136

Display storage tubes /DST/ for radar systems, describing operating principles and characteristics
04 p0660 A70-15525

CRT display design for command and control with digital symbol and vector generation
05 p0817 A70-16184

Color CRT system to display engineering data based on real time analysis, discussing performance requirements
06 p1061 A70-17349

Alphanumeric and graphic computer driven CRT displays, discussing systems and component selection
08 p1465 A70-20672

Pulse characteristics of scintillator- photomultiplier-cathode ray tube channel for oscillographic recording of nanosecond pulses from neutron, gamma or X ray sources
08 p1496 A70-21218

Computer managed display system using CRT and appropriate solid state displays providing flight crew with automatically sequenced time varying information
08 p1498 A70-21677

CRT display devices and R and D, discussing electron generation, luminescent materials, resolution, brightness, etc
08 p1498 A70-21680

Thermochromic materials feasibility for applications in CRT display devices, observing reversible color changes during electron beam irradiation
08 p1499 A70-21682

Resolution, contrast and gray scale performance of CRT displays compared to dot matrix displays
08 p1500 A70-21763

CRT color displays advantages and limiting factors, considering beam-penetration tube with high voltage switching
09 p1673 A70-22031

Projection CRT with liquid-cooled phosphor faceplate, showing linear relationship between brightness and beam current
09 p1673 A70-22034

Hidden-line determination for computer-drawn polyhedra using edge classification scheme for CRT display applications
09 p1641 A70-22966

CRT laser with gallium arsenide crystal excited by electron gun, describing output characteristics
09 p1698 A70-23161

Temperature limitation on CRT tube performance in high brightness displays imposed by glass breakage danger, discussing liquid cooling of phosphor substrate
09 p1686 A70-23759

CRT displays for business aircraft emphasizing EADI/electronic attitude director indicator/
[SAE PAPER 700210]
11 p2079 A70-25882

Current-sensitive single gun color CRT with phosphor screen for display systems
12 p2195 A70-27373

Virtual infinity CRT display systems testing, discussing effects of large apertures, operational modes and observer physiological requirements on measurements
13 p2411 A70-29790

Dual raster high brightness-high resolution TV display using time sharing with conventional CRT
16 p2903 A70-33131

On-line optical data processing using CRT with electro-optic target crystal
16 p2903 A70-33132

CRT symbol generators design for high speed computer data display as function of electro- optical and human operator constraints
16 p2850 A70-33133

Computer driven on-line CRT graphics displays for data acquisition and reduction
17 p3063 A70-35513

Four dimensional matrix type CRT decoder characterized by large storage capacity and high resolution
18 p3256 A70-36105

Sodalites color centers creation by electron beam, discussing application in dark trace cathode ray storage display tubes
19 p3379 A70-38048

Air traffic control CRT plan position indicators, considering alphanumeric symbols strokes design
19 p3469 A70-38645

Flickerless regeneration rates for CRT displays as function of scan order and phosphor persistence, using computer experiment
24 p4298 A70-45511

CATHODES

NT CELL CATHODES

NT COLD CATHODE TUBES

NT COLD CATHODES

NT HOT CATHODES

NT PHOTOCATHODES

NT PHOTOMULTIPLIER TUBES

NT THERMIONIC CATHODES

NT TUBE CATHODES

NT TUNNEL CATHODES

Spectroscopic determination of radial temperature distribution at various currents in negative glow of hollow cathode discharge, analyzing influence of gas pressure
05 p0888 A70-16358

Optical spectra of discharge chambers of electron bombardment mercury ion thrusters with hollow and oxide cathodes
[AIAA PAPER 70-176]
06 p1132 A70-18157

SERT 2 thruster hollow cathode durability tested in bell jar
[AIAA PAPER 69-304]
07 p1364 A70-19703

Cylindrical magnetrons steady state characteristics with thick and infinitely thin cathodes for full space charge and inclined magnetic field
09 p1651 A70-23641

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements
13 p2473 A70-28505

Microwave harmonic generation by nonlinear plasma- metal junctions noting calcium, gallium, molybdenum, gold, copper and platinum cathodes
14 p2549 A70-30438

Penning pump argon stability, noting influence of pressure and ion incidence angle on cathode surface
15 p2744 A70-31847

Liquid mercury /LM/ cathode thruster characteristics, power conditioning and control requirements
[AIAA PAPER 70-646]
16 p2965 A70-33536

High resistance space charge region formation near crystal cathode in GaAs due to limited contact emissive capacity
18 p3297 A70-36417

Arc luminosity in cathode region of quasi-steady MPD arc jet, using high speed photography and electric and magnetic field probes
[AIAA PAPER 70-1094]
20 p3683 A70-40242

Small-orifice hollow cathode discharge properties in electron bombardment ion thrusters, using vaporized mercury propellant
[AIAA PAPER 70-1087]
20 p3693 A70-40248

Cathode geometry effect on performance of radiation cooled MPD arc thruster in continuous mode
[AIAA PAPER 70-1083]
20 p3693 A70-40252

Cathode spaces electron concentration, time dependence and axial distribution by laser beams interferometric method, noting accuracy and resolution
21 p3836 A70-40796

CATIONS

NT MANGANESE IONS

NT METAL IONS

Flame positive ion concentration measurements with Langmuir probes with mean free path smaller than probe diameter
02 p0397 A70-12019

Direct interaction between hydrogen atom and positive ion with one electron, using Born and two and four state impact parameter treatments
02 p0344 A70-12703

Cross sections determined for formation of secondary positive molecular and atomic hydrogen ions during 1.4-46 kev positive molecular hydrogen passing through hydrogen
02 p0344 A70-12704

Synthesis of 1-oxacyclopent-1-enyl cations from cyclopropyl ketones on heating in strong acids noting rearrangement rates
04 p0646 A70-15088

Bivalent cations effect on crystallization and viscosity of glazed glass
05 p0871 A70-16592

Heavy positive ions pulse counting by spiral-type continuous channel electron multiplier, noting long pulse rise time composed of numerous after pulsing
07 p1286 A70-19970

Secondary electron emission coefficients and energy distributions to investigate interaction between positive ions and Cu/Be dynodes of electron multiplier
07 p1344 A70-20127

Initial deceleration of solar wind positive ions upstream of earth bow shock determined from OGO 5 high time resolution plasma measurements
08 p1562 A70-21377

Cross sections for electron impact excitation of positive helium and hydrogen ions, using non-relativistic Coulomb-Born-Oppenheimer reactance matrices
13 p2455 A70-28988

Plasmapause irregular structure and position indicated by measured distributions of hydrogen and helium thermal positive ions in duskside magnetosphere
13 p2397 A70-29185

Spectrophotometry of comet Honda 1968c, showing free cation and radical emissions and head asymmetry
14 p2635 A70-30304

Semiclassical collision theory for computing fine structure proton impact excitation rates and cross sections for positive ions, presenting excitation rate tables
14 p2652 A70-31383

Positive ion composition in Cs plasma as function of normalized pressure
15 p2779 A70-31978

Triatomic hydrogen positive ion-yielding reactions, using EVA ion-molecule beam apparatus
16 p2855 A70-33012

Gas phase stabilities of bicyclic cations, establishing heats of formation limits by ion- molecule reactions identification
16 p2848 A70-33091

Positive atomic oxygen ion reactions with carbon dioxide detected using ion cyclotron and double resonance methods
18 p3225 A70-36189

D region positive ion density during solar proton event by Arcas rocket-borne cylindrical electrostatic probe
19 p3411 A70-37512

Pi sub u states of positive ionized diatomic oxygen by photoelectron spectrometry
19 p3474 A70-38488

Positive ions energy dispersion effused from RF plasma, presenting ion extraction model for plasma sheath system and equivalent circuit
20 p3678 A70-39608

Positive ionospheric ion species concentration measurements using magnetic deflection mass spectrometer on Explorer 31 satellite
21 p3815 A70-40999

Fe 57 nuclear hyperfine splittings in clinopyroxenes from lunar igneous rocks, determining temperature dependent cation distribution
21 p3915 A70-41659

Atmospheric positive ion composition measurements in D region by rocket-borne mass spectrometers, considering water cluster ions formation
22 p4017 A70-42796

Monovalent cations active transport model in mitochondria, noting membrane potential as driving force and ion pump omission
24 p4304 A70-46230

CATS

Cortex functional interrelationships with hypothalamus and formatio reticularis, studying role of corticofugal effects in anesthetized cats
01 p0012 A70-10051

Corticofugal effects of various cortical regions on neuron activity in hypothalamus posterior lateral sections in cats
01 p0012 A70-10053

Reversible cold induced deactivation of cat neocortex bioelectric activity in chronic experiment, noting cooling system
01 p0031 A70-10056

Microelectrophysiological study of cerebellar neuron responses to stimulation of vestibular apparatus by vertical rocking performed on anesthetized adult cats
01 p0012 A70-10124

Termination mode of primary and secondary vestibular fibers in cerebellar cortex of frog and cat, measuring evoked field and unitary potentials
01 p0014 A70-10353

Integrated static discharge frequencies of cat lingual cold receptors measured as function of constant temperature
01 p0017 A70-10472

Artificially induced heart rate changes effect on atrial circumference and pressure in anesthetized cats, showing increase with tachycardia and bradycardia
01 p0017 A70-10473

Flash blinding of cats using Q switched laser beam, discussing ERG response and retina changes
01 p0113 A70-10920

Morphological analysis of connections between auditory cortex zone and claustrum in anesthetized cats, establishing efferent nerve fibers presence
01 p0025 A70-11039

Human and cat visual neuron properties, discussing encoding orientation and dimensions of retinal images
01 p0028 A70-11360

Vasomotor activity of neurons located in spinal cord lateral crescent in curarized decerebrated and intact cats
01 p0030 A70-11471

Muscle force and electromyogram behavior with alteration in blood flow and composition in anesthetized cats
02 p0231 A70-11708

Cardiac relaxation mechanics from isolated preparation of cat papillary muscle, noting inotropic influences role
02 p0231 A70-11709

Blood flow changes in portal vein and hepatic artery of anesthetized cats following intraportal and in-

trahepatic arterial administration of isoproterenol, epinephrine and norepinephrine

02 p0232 A70-11718

Polarographic method for determining cat papillary muscle oxygen consumption used to investigate Fenn effect involving afterloaded and isometric contractions

02 p0234 A70-11726

Spinal cord and skin temperature effects on tension-extension diagrams in cats red and pale muscles

02 p0236 A70-12092

Skin sensitivity representation in cats cerebellar cortex during electrocutaneous stimulation in chronic experiment, providing information on afferent system

03 p0417 A70-13216

Cats cerebral cortex background electrical activity measured during development of conditioned reflexes, noting shift toward higher frequencies

03 p0418 A70-13217

Somatosensory cortex removal effect on blocking action of skin stimulation on associative response to light flash in cats

03 p0420 A70-13430

Early and late response component of associative cortical area in cerebral hemispheres of cats connected with mono and polysensory neuron activity

03 p0421 A70-13688

Origin and functional designation of associative evoked potentials in orbital cortex of cats, showing phases connected with neuron activity and excitation

03 p0422 A70-13689

Vascular electrical activity in cats and rats by inserting glass microelectrode into blood vessel, showing blood flow conditioning effect on activity

03 p0422 A70-13691

Vagotomy and carbon dioxide concentration effect on quiet and forced respiration rate, pleural pressure, tidal volume and lung ventilation in cats

03 p0422 A70-13694

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats

04 p0629 A70-14570

Small amplitude discharges and neuron activity in dorsal hippocampus of cats recorded simultaneously with pyramidal cell activity

04 p0632 A70-15221

Cats trained for visual form discrimination tested for retention and reversal performance, studying oxygen deprivation influence

04 p0633 A70-15443

Rod and cone contributions to S potentials from cat retina using spectral sensitivity observation

05 p0801 A70-16379

Rod-cone interaction in cat S potentials, analyzing effect of wavelength and intensity upon dark adapted responses

05 p0801 A70-16380

Rod aftereffect relationship to percent rhodopsin bleached in S potentials from cat retina

05 p0801 A70-16381

Vasomotor center neuron responses to vertical rocking movement stimulus of vestibular apparatus in cats

06 p0995 A70-17805

Cats visual analyzer functional rearrangement mechanisms under prolonged light stimulation, considering evoked potential dependence on pulse duration and intensity

07 p1198 A70-18699

Involvement reactions in dying and reanimated cats with nucleus reticularis hypothalamus stimulated by rectangular electric pulses

07 p1209 A70-19522

Hypothalamus stimulation effect on electrical activity of hippocampus at threshold and super-threshold levels in cats

08 p1446 A70-21448

Body vibration effects in cats on myocardial ECG recordings, discussing electrodes implantation and tracings

10 p1810 A70-24007

Feline hypersexuality, aggression and perceptual disorientation resulting from p-chlorophenylalanine administration

12 p2167 A70-27271

Noise bursts response of positive and inhibitory conditioned eyelid reflexes in cats brain, discussing auditory system function

15 p2687 A70-32871

Spinal reflex activity in normal and altitude exposed cats before, during and after acute hypoxia

17 p3031 A70-35430

Cat lens motion in response to ciliary ganglion step and sinusoidal stimulation, indicating damped accommodative system

19 p3366 A70-38925

Desynchronized sleep phase in cats, discussing activation and hippocampal theta and hippocampal delta rhythm predominance stages

20 p3574 A70-40171

Ganglione and quaterone cholinolytic agents effects on arterial blood acid-base balance indicators in cats

24 p4298 A70-45633

CATTLE

Physicochemical properties of hypothalamic secretions responsible for coronary dilatation in rats, cattle and pigs, using analytical techniques

03 p0417 A70-13215

Enzyme beta-hydroxybutyrate dehydrogenase concentration in mitochondria from bovine and sheep liver

03 p0430 A70-14198

CAUCHY INTEGRAL FORMULA

Cauchy integrals extension to axisymmetric elasticity problems, obtaining numerical results for stressed circularly symmetrical state of hollow cylinder under uniform load

03 p0586 A70-13080

Numerical differentiation of analytic functions involving Cauchy formula and error estimation

18 p3282 A70-36362

CAUCHY PROBLEM

Fourier transform applied to Riemann boundary value solution to biharmonic equation governing elastic theory for half plane with circular protrusion or indentation

01 p0199 A70-10155

Cauchy problem solution asymptotic behavior for linearized system of rotating compressible fluid at time approaching infinity

01 p0064 A70-11031

Cauchy problem of differential equation describing asymptotic nature of conservative system motion resulting from nonperiodic perturbing force

03 p0524 A70-13342

Approximate solutions to Cauchy problem describing controlled pursuit using approximate method of integrating Bellman equation

04 p0713 A70-14602

Mixed nozzle flows solution complex boundary value problem reducible to Cauchy problem for hyperbolic system with three dependent variables by applying flow stabilization method

04 p0617 A70-15236

Right weak solution of Cauchy problem for first order quasi-linear equation

06 p1093 A70-17531

Existence results for Cauchy problem for linear variable coefficient hyperbolic operators with multiple characteristics

06 p1094 A70-17898

Optimal control problem converted Cauchy problem for obtaining numerical solutions through invariant imbedding

06 p1027 A70-18508

Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas

07 p1252 A70-18671

Nonuniqueness of Cauchy problem for parabolic equation of order 2b with rapidly increasing coefficients at infinity

07 p1322 A70-18855

Power series solution of Cauchy problem for axisymmetric state of ideally plastic body

07 p1405 A70-19288

Infinite order differential operator in S type spaces for Cauchy problem solution uniqueness

08 p1533 A70-20722

Cauchy-Dirichlet problem for linear inhomogeneous polycaloric / polyparabolic / equation with constant coefficients under certain boundary conditions

08 p1597 A70-21006

Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem

08 p1484 A70-21403

Cauchy problem solution for linearized Navier-Stokes equations of incompressible rotating viscous fluid, discussing velocity and angular momentum effect on asymptotic behavior

09 p1659 A70-22326

Cauchy problem solution for heat conduction equation stabilization, deriving necessary conditions

09 p1789 A70-23167

Point boundary value problem solution for differential equations with parameters in form of power series, considering Cauchy problem

09 p1712 A70-23383

Algorithm developed for constructing first approximation system from Cauchy matrix for Liapunov stability problem solution

10 p1917 A70-25302

Local uniqueness and instability theorem for Einstein-Liouville equations using energy inequalities, noting relevance to Cauchy problem

11 p2084 A70-26458

Sonic surface and Cauchy problem of Monge-Ampere equations in plane unsteady transonic channel flow solved by hodographic analysis

12 p2156 A70-27299

Asymptotic properties of Cauchy problem solution for heat conduction equation

12 p2331 A70-27300

Cauchy problem for relativistic heat equation for unbounded domain generated by streamlines of future oriented vector field

13 p2451 A70-28709

Rotating stellar configurations structure consisting of degenerate matter or density dependent temperature describing boundary value problem reduction for Cauchy problem

13 p2494 A70-29518

Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas

15 p2718 A70-31463

Cauchy spatial problem of Laplace equation, obtaining approximate solution based on initial conditions

15 p2767 A70-31584

Nonrigorous hyperbolic systems, discussing existence and uniqueness theorems contradiction in linear equations and proof of Cauchy problem

19 p3478 A70-37582

Cauchy problem for linearized relativistic Boltzmann equation near equilibrium, using functional analysis

19 p3403 A70-37585

Initial boundary value problems for hyperbolic partial differential equations, including Cauchy problem

19 p3457 A70-37678

Polynomial approximation process for scalar nonlinear equation solution, applying to Cauchy problem

22 p4064 A70-43482

Cauchy-Dirichlet type mixed problems for hyperbolic equations in cylindrical domain, using Zygmund-Calderon approximate calculus

23 p4210 A70-43978

Cauchy problem solution for parabolic equation with variable coefficients, using differential invariant method and Volterra integral equation

23 p4210 A70-43979

Ordinary differential equations boundary value problems solution based on continuation and reduction to Cauchy problems

23 p4211 A70-44309

Approximate method for solving thermal conductivity first boundary value problem via reduction to auxiliary Cauchy problem solved by Laplace transform and power series

23 p4277 A70-44339

Cauchy problem for singular parabolic equation, establishing existence, uniqueness and representation theorem by integral operator techniques in conjunction with function-theoretic methods

23 p4212 A70-44895

CAUCHY-RIEMANN EQUATIONS

Error estimation during application of Cauchy approximate integral formulas to numerical differentiation of analytic functions by quadrature

01 p0131 A70-10543

Stress-strain state equations of shallow spherical shells in rectangular and polar coordinates, discussing reduction to plate and Cauchy-Riemann equations

03 p0591 A70-13427

Boundary value problems of Cauchy-Riemann differential equations using solution to derive integral equation for stationary infrasonic flow

04 p0671 A70-15094

CAUSTICS

U ALKALIES

CAVITATION

U CAVITATION FLOW

CAVITATION CORROSION

Liquid oxygen and water cavitation effects on lead, copper, nickel, iron and zinc

01 p0115 A70-10071

Damage data comparison for vibratory cavitation and liquid impact on aluminum alloy, stainless steels and pure nickel

23 p4203 A70-43870

CAVITATION FLOW

Cavitation initial phase flow model, analyzing flow past stepped obstacle in plane channel

01 p0064 A70-11002

Two dimensional plane and axisymmetric free streamline flow problems solved by finite difference methods for supercavitating wedge in potential flows

01 p0065 A70-11127

Cavitating flow in converging channels of hydraulic system, calculating energy distribution at gas-vapor phase using Borda-Carnot theorem

03 p0466 A70-13513

Jet pump cavitation prediction and elimination using limiting-flow equation based on selected index [ASME PAPER 69-WA/FE-29]

04 p0666 A70-14773

Penetration depth calculation of high speed non-deformable sphere into massive body, approximating force on sphere by ideal incompressible fluid cavitating flow

04 p0776 A70-15269

Flow distribution inside triangular shaped cavities of variable depth resembling liquid propellant rocket motor baffle cavities, simulating radial and tangential oscillation modes

04 p0674 A70-15566

Axial flow pump impellers suction performance and cavitation conditions

06 p1075 A70-17137

Sweep angle relationship to cavitation inception on hydrofoils and to hydrofoil performance deterioration due to cavitation

06 p1032 A70-17211

Heat transfer from impinging gas jets on enclosed concave surface, noting self recirculation currents within cavity

07 p1425 A70-20413

Stability and potential cavitation of centrifugal pump operating with four working wheels with different geometric parameters

08 p1558 A70-21196

Flow structure in rectangular cavity in lower wall of two dimensional channel for various aspect ratios and Reynolds numbers

08 p1484 A70-21313

Nonlinear equations for large fluid oscillations in axisymmetric rotating cavities with radial partitions

09 p1660 A70-22438

Boundary value problem for cavitating flow around thin wing reduced to two dimensional singular integral equations from acceleration potential

09 p1663 A70-23393

Cavitational symmetric flow around wedge taking into account gravity and surface tension

10 p1868 A70-24162

Steady two dimensional cavity flow past sharp-edged airfoil and blunt nosed obstacle, using linearization hypothesis

10 p1801 A70-24193

Swirl velocity and cavity stability in rotating container filled radially through porous cylindrical wall at constant and applied pressure

10 p1868 A70-24195

Two dimensional unsteady fluid flow in square cavity numerically analyzed from continuity and Navier-Stokes equations and recorded as computer-generated motion picture

11 p2035 A70-25971

Tribonucleation emphasizing viscosity-velocity product in gas nuclei formation and cavitation

12 p2170 A70-27661

Ideal weightless fluid jet flow past supercavitating plate at incidence using Tulin scheme

12 p2214 A70-28241

Film cavitation between flat annular surfaces in face seal resulting from hydrodynamic pressure generated by misalignment and surface waviness

13 p2417 A70-28613

Longitudinal gravitational field effect on cavitation wedge flow, investigating characteristics by Zhukovskii-Roshko method

13 p2390 A70-29646

Bubbles, steady streaming and surface instability in vibrated liquid columns

14 p2663 A70-30255

Liquid metals pump with cylindrical hydraulic coupling for actuating axial wheel, investigating cavitation and pumping effects on performance

14 p2535 A70-31012

Cavitation in centrifugal pumps, predicting breakdown and inception points variation with temperature and speed

15 p2744 A70-32097

Centrifugal pump performance correlation parameter under cavitation conditions for handling different liquids based on bubble growth theory

15 p2720 A70-32098

Soviet book on hydrodynamics of flows with free boundaries, covering fluids penetration by solid body, hydrofoil motion, cavitation flow, etc

16 p2890 A70-32912

Hydrodynamic internal streamline flow analysis for turboprop inducer blades under cavitating and non-cavitating conditions

16 p2964 A70-33528

[AIAA PAPER 70-629]

Cavitation nuclei in liquids, discussing sources, stability and gas bubble growth

16 p2891 A70-33632

[ASME PAPER 70-FE-23]

External magnetic field effect on cavitation zone behind circular cylinder, proving existence of electric charges

18 p3242 A70-36645

Rotational stability of heavy horizontal shaft supported on plain lubricated bearings with cavitation in lubricant

19 p3438 A70-38669

Nucleation role in boiling and cavitation - ASME Conference, Detroit, May 1970

21 p3948 A70-41201

Self similar flow instability behind collapsing cavity boundary, examining perfect gas adiabatic equation of state

21 p3808 A70-41500

Plunger pump for aircraft hydraulic systems, measuring working fluid temperature effect on cavitation

22 p3965 A70-42817

Cavitation characteristics of jet nozzles, formulating relationship between pressure differential and fluid flow rate

22 p3965 A70-43369

German monograph on flow phenomena in gas containing fluids, covering pressure and ultrasonic induced cavitation in steady and unsteady flow

24 p4324 A70-45098

Partially cavitating flow past plate, calculating characteristics by Riabushinskii scheme

24 p4325 A70-45642

CAVITIES

High temperature solar energy converter cavity absorbers geometry, considering absorption parameters of radiation reflected by concentrator

01 p0010 A70-10761

Boundary value problems of elasticity theory in space perforated by cylindrical cavities with parallel axes solved by infinite algebraic equations

01 p0202 A70-11033

Integral equation for emissivity inside uniform gray isothermal Lambertian cavity solved using successive approximations

02 p0323 A70-11889

Approximate method of boundary perturbation to solve elasticity and viscoelasticity problems for non-canonical bodies of revolution applied to stress concentration at ellipsoidal cavity

03 p0591 A70-13439

Soviet book on boundary value problems involving motion of ideal fluids in unsteady cavities of various geometries, determining attached fluid masses and oscillation frequencies

04 p0666 A70-14678

Stress concentration effects around spherical cavity under uniaxial tension calculated by constitutive equations of micropolar elasticity

05 p0927 A70-15994

Prestrain effect on cavity formation at grain boundaries causing creep strength decrease

07 p1307 A70-19392

Elastic harmonic waves propagation in cylinder with longitudinal cavities and in space with cylindrical cavities solved using series method

09 p1783 A70-23387

Nonlinear plane deformation of elastic medium with cylindrical cavity under uniform axial tension using successive approximations

09 p1784 A70-23591

Stress concentration near ellipsoidal cavity in transversely isotropic body using solutions for transversely isotropic ellipsoid of revolution

11 p2129 A70-25564

Solar energy exchange with radiator surface recessed within specular axisymmetric cylindrical spinning cavity, using deterministic ray tracing scheme

11 p2150 A70-26353

Motion stability of variable mass solid body with ideal liquid filled cavities about stationary point using Liapunov theorem

13 p2452 A70-29310

Plane cavity geometry behind plate in incompressible potential flow, deriving geometrical functions to obtain desirable shapes

13 p2390 A70-29645

Stress and deformations three dimensional solution in semiinfinite elastic body with spherical cavity based on Boussinesq stress function

14 p2661 A70-31328

Perturbed motion of body with partially filled cylindrical cavity with damping ribs, discussing vibrations boundary value problems of liquid filling

15 p2775 A70-32157

Circular cylindrical cavity in elastic space, calculating stresses due to incident plane harmonic compression wave

15 p2819 A70-32204

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity

16 p2988 A70-33251

Acoustic cavities use in suppressing acoustic modes of combustion instability demonstrated on LM ascent engine

16 p2998 A70-33614

[AIAA PAPER 70-618]

Combustion instability due to narrow cavities in solid propellant engines

17 p3198 A70-35739

Cumulative jets during shock induced collapse of air cavities in thin fluid layers, using high speed motion picture photography

17 p3074 A70-35742

Reflectance measurements of directional spectral emittance of black body cavities with specific geometries, using laser source and integrating hemi-ellipsoid

20 p3627 A70-39091

Radiative transfer among surfaces forming long cavity exposed to collimated incident energy

21 p3944 A70-41022

Cylindrical cavity uniform expansion in compressible elastic plastic solid, calculating pressure by similarity solution

22 p4114 A70-42634

Spherical cavity nonuniform expansion in compressible elastic plastic solid, calculating velocity field and pressure by approximate similarity solution

22 p4114 A70-42635

Cavity radar cross section estimation by simplified models compared to semiempirical prediction with ray tracing procedure

22 p3992 A70-43583

Isotropic nonlinear elasticity problems of stress concentration near spherical cavity in field of triaxial tension, using small parameter method

22 p4120 A70-43714

Elasticity theory for circular cylinder weakened by cavities, discussing boundary conditions on butt ends and Galerkin solutions

23 p4265 A70-43983

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity

23 p4268 A70-44287

One-dimensional propagation of elastic spherical waves in inhomogeneous unbounded medium under normal stress on cavity surface

24 p4424 A70-45631

CAVITY RESONATORS

Resonant cavity method for measuring varactor diodes cut-off frequency, avoiding errors from circuit losses and parasitic effects

01 p0048 A70-10049

Confocal parameters, spot sizes, waist positions and stability conditions of astigmatic Gaussian beams formed by spherical mirror laser cavity resonators

01 p0108 A70-10426

Laser mode locking due to saturable absorbers taking into account dispersive property of active material, expanding electric field within cavity

01 p0109 A70-10428

Raman effect liquid laser power as function of cavity length, using Q switched ruby laser beam focused by cylindrical lens for optical pump

01 p0111 A70-10674

Unstable laser resonator mode patterns and losses with finite rectangular reflectors of spherical curvature, basing analysis on Cornu spiral

01 p0112 A70-10917

Polarization level dependence of dye lasers emission on angles between direction of forced radiation and pumping laser resonator axis

01 p0113 A70-11037

CW visible ring cavity parametric oscillator, discussing pump depletion, conversion efficiency and improved stability resulting from optical isolation

01 p0052 A70-11173

Thermal resonator effects on YAG-Nd laser rods with dielectric covered ends, using resonant model to study continuous or half wave operation

02 p0311 A70-11850

Mode selection in Ar ion laser by plane resonator mirror with hole, plotting output power vs L/R parameters

03 p0500 A70-13458

Frequency spectrum, Q factor and single mode selectivity of two mirror laser resonator with absorbing thin metallic films, showing agreement for Ag and Ni

03 p0500 A70-13459

Cavity resonator linear excitation by Gunn diode, considering external circuit effects on oscillation conditions and GaAs single crystal parameters

03 p0457 A70-13965

Microwave cavity perturbation measurements of electron densities at electroacoustic resonances excited in afterglow plasma

04 p0728 A70-15004

Rate equation analysis of steady state behavior of double cavity GaAs diode laser, noting solution stability by perturbation method

04 p0703 A70-15618

Microwave spherical resonator and reentrant cavity as diagnostic tools to obtain discrete point data along plasma column compared with cylindrical cavity

04 p0696 A70-15650

Power distribution in carbon dioxide laser resonator with external and internal mirror at different power levels

05 p0857 A70-15796

Power output of gas laser pumped by laser contained in single resonator

05 p0858 A70-16259

Carbon dioxide laser resonator design and operation, discussing performance with dish reflector made of leucosapphire

05 p0859 A70-16272

Wobblator measurement of Q factor of microwave resonator cavities using double modulated klystron signal

05 p0822 A70-16528

Optimal electron bunching in two cavity klystron by varying parameters and nonlinear one dimensional approximation

05 p0823 A70-16888

Convection currents calculation in multicavity klystron allowing for space charge forces influence

05 p0823 A70-16889

Bistable optical resonators with saturable absorbers, discussing hysteresis characteristics and Q switching applications

06 p1105 A70-17449

Weinstein approximation and iteration by digital computer for calculating disturbed Fabry-Perot laser resonator modes

06 p1081 A70-17546

Klystron amplifier output circuit large signal frequency response, showing dependence on distance between cavities

06 p1021 A70-17672

Polarization interference filter as laser resonator frequency selector, showing Q factor measurable within spontaneous emission line

06 p1082 A70-17771

Helmholtz resonator associated flow field analysis in nonlinear regime, considering external pressure, mean flow, velocity fluctuations and orifice flow [AIAA PAPER 70-128]

06 p1038 A70-18065

Apparent resonance frequencies of earth-ionosphere cavity excited by single dipole source, noting dependence on source-observer separation

06 p1058 A70-18414

GaAs lasers fabrication, discussing p-n junctions formation, laser die mounting, low resistance electrical contacts, optical cavities, etc

07 p1298 A70-19398

Resonator aberrations and active element imperfections effect on formation of spatial and angular structures of solid state laser modes

07 p1299 A70-19854

Variable coupler for liquid helium X band EPR cavity during immersion in coolant

07 p1286 A70-19976

Solid state lasers thermal resonator bucking time dependence and compensation, graphing results of resonator field analysis

07 p1303 A70-20359

Laser resonator with concave mirrors and ring aperture as radiation outlet, calculating natural oscillations by wave equation

08 p1510 A70-20508

Stokes components generation in presence of stimulated combination radiation in optical cavity, considering interaction between components and effect of material dispersion on interaction

08 p1510 A70-20511

Polarization anisotropy effect of laser cavity on neodymium glass laser output power

08 p1510 A70-20513

Stokes components simultaneous generation in presence of stimulated combination radiation in optical cavity, noting effects of incident monochromatic beam intensity

08 p1511 A70-20520

Retunable lasers with organic dye dispersive resonators, studying space-angular, spectral and energy emission characteristics

08 p1511 A70-20538

Dispersive resonator for near IR frequency control of neodymium-silicate glass laser

08 p1512 A70-20850

Photodissociation of perfluoroalkyl iodides filler of pulsed laser operating cavity, discussing thermal molecular dissociation and unexcited iodine atoms formation

08 p1513 A70-21418

Double resonator ruby maser dynamic and static characteristics for centimeter band improved by pumping frequency modulation

09 p1695 A70-22188

Natural frequencies and electromagnetic field distributions in rectilinear and cylindrical dielectric resonators used in microwave circuits

09 p1644 A70-22280

Microwave in-cavity modulation of helium-neon laser, obtaining frequency dependence of modulation depth

09 p1696 A70-22628

Amplifier properties and oscillator mode structure of multipath carbon dioxide laser

09 p1699 A70-23538

He-Ne laser emission electro-optical modulation by three mirror optical cavity, considering structural and thermal stability and coupled resonators geometry effects

10 p1899 A70-24260

Microwave pencil triodes and cavities of miniature design for Air Traffic Control Beacon Systems

10 p1852 A70-24886

Microwave IC-compatible resonators for communication systems filters, comparing microstrips, disks, waveguide cavities and dielectric-loaded cavities

10 p1852 A70-24892

Microwave power absorption in plasma investigated by transmission cavity excited in TE mode, determining electron density and collision frequency

11 p2089 A70-25841

Tapered resonance tubes matching supersonic air jet geometries considered for explosion hazards created by pneumatic system seals failure

11 p2035 A70-25981

Optical resonator with active medium and lenses, determining caustic surface, radiation characteristics, transverse modes, focusing conditions, etc

12 p2246 A70-27309

Operator representing anisotropic element in gas laser resonator, considering phase crystalline and rotating plates

13 p2424 A70-28593

Power output dependence on cavity configuration of He-Ne laser in TEM mode operation

13 p2425 A70-28625

Laser cavity modal volume-output power relationship, deriving expression for interaction region

13 p2427 A70-29359

Steady state laser emission of resonator with two crystals with different optical orientation

13 p2428 A70-29371

Self excited cavity oscillators with tunnel and parametric diodes and nonequilibrium medium, noting single and multimodes, energy capabilities and frequency interactions

13 p2366 A70-29405

Laser acoustooptic quartz modulators inserted inside He-Ne and argon cavities for internal power extraction

13 p2430 A70-29705

Transient excitation of Schumann earth-ionosphere cavity resonances by large ELF atmospheric, using propagation model

15 p2726 A70-31865

Equivalent circuits and general formulas for small hole coupling of resonant cavities and waveguides

15 p2714 A70-32817

Instrument for visualization of EM field in open resonators in mm range

16 p2908 A70-33213

Gunn oscillator external negative differential/END/conductance broadband measurement noting effect of cavity control

16 p2875 A70-33398

Laser cavity design with total internal reflection quartz prisms, calculating prism angles tolerances

16 p2915 A70-34219

Solid state laser polarization mechanism, considering isotropic and anisotropic cavities

17 p3106 A70-35103

Microwave self modulating GaAs diode laser, showing coupled external cavity resonator influence on intrinsic resonance frequency

18 p3269 A70-36733

Regular relaxation oscillations of ruby laser by moving resonator mirrors

18 p3271 A70-36954

RF communication signal to noise improvement by time variant tracking filter with high Q superconductive resonant cavity

19 p3391 A70-38892

Microwave apparatus for resonant frequency change and loaded resonator Q measurement during DC discharge afterglow electron removal studies

20 p3679 A70-39715

Cavity mode mixing effects in internally scanned lasers, considering various geometries and coupling parameters for continuous transverse aperture velocity

21 p3835 A70-40720

Optical properties of off-axis multibeam resonators with spherical mirrors, discussing application to He-Ne lasers

21 p3836 A70-40914

Optimum tube diameter for maximum radiation output of single and multimode He-Ne lasers

21 p3836 A70-40916

Circular and nearly rectangular irises for resonant cavities in transmission line for microwave band stop filters, discussing design based on merit factor

21 p3792 A70-41992

Laser oscillator and amplifier characteristics based on ionic Nd dissolved in aprotic solvents, discussing solution loss

21 p3838 A70-42009

Optical waveguides and resonators propagation modes detection and discrimination techniques evaluated for circular cylinder dielectrics/optical fibers

22 p4030 A70-42949

LF cavity loss modulations of homogeneous four-level CW Nd-YAG laser, including relaxation-oscillation regime

22 p4050 A70-43005

High Q frequency stabilized cavity controlled microwave oscillator using Super Invar resonator

23 p4169 A70-43792

Optical transmission and reflection gratings formed by standing light waves evaporation of thin metallic films in ruby laser cavity

23 p4200 A70-43817

Book on guided EM wave theory covering mathematical methods transmission lines cavity resonators, perturbation theory, electrostatics, electric and magnetic fields, propagation, etc

23 p4172 A70-44242

CEILINGS [METEOROLOGY]

Runway low visibility and ceilings frequency and duration at German airports, using 1949-1967 statistical data

19 p3462 A70-37925

CEILOMETERS

Differential correction procedures, using residuals

to obtain celestial body orbital elements by linear programming

04 p0751 A70-14943

Mass density estimated in solar vicinity for distribution among celestial bodies

05 p0914 A70-16647

Gaseous spheres gravitational stability in proper field, considering convection and radial perturbations effects

07 p1383 A70-19408

Soviet book on celestial bodies radiation transfer and spectra covering light scattering, radiation fields, absorption, etc

08 p1568 A70-20768

Celestial emission bodies forbidden line analysis for physical conditions determination using formulas and graphs

08 p1569 A70-20831

- Celestial X ray sources resolved against diffuse nearly isotropic background radiation by rocket and balloon experiments, noting brightness
09 p1745 A70-22895
- Weak phase objects detection based on interferential and streak photography methods, noting fringe deformation role
10 p1916 A70-24587
- X ray astronomy, discussing emission processes, radiation classification for intensity plot against energy, cosmic sources distribution, etc
11 p2111 A70-26035
- Celestial object position determination, computing local errors for coordinate improvement
11 p2113 A70-26189
- Cosmic IR radiation sources, discussing galactic and stellar masses
14 p2632 A70-30882
- Solar system Eotvos experiments for measuring gravitational to inertial mass ratio of celestial bodies
16 p2978 A70-34033
- Human and divine aspects of space law, discussing ownership and sovereignty problems connected with space and celestial body exploration and utilization
16 p3004 A70-34344
- Multispectral UV sky mapping and heavenly body intensity measurement onboard OAO 2 satellite
17 p3179 A70-35264
- Legal status of natural resources of celestial bodies, discussing limitations of Space Treaty of 27 January 1967
17 p3203 A70-35796
- Regulations existence and application to exploitation of resources in celestial bodies
17 p3203 A70-35798
- Radio direction finding of celestial bodies from moving platform, determining plane rotation effects on angle measurements
18 p3333 A70-36164
- Spherical celestial bodies anomalous rotation problem, noting sunspots zonal character
22 p4106 A70-43261
- OAO 2 for UV telescope sky mapping and spectrophotometric measurements of celestial bodies
23 p4261 A70-44666
- CELESTIAL MECHANICS**
- Stellar systems models numerical construction, using data on star cluster density distribution, centroid velocity, potential distribution, etc
01 p0174 A70-10200
- Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems
01 p0146 A70-11561
- Galactic satellite interpretation for high velocity hydrogen clouds at high latitudes
02 p0363 A70-11780
- Soviet collection of articles on structure and dynamics of stellar systems, Part 2
02 p0375 A70-12442
- Statistical analysis of position angles of Berenice cluster galaxies, estimating mass, expansion, rotation period and age
02 p0376 A70-12448
- Gravitational finite propagation velocity effects in celestial mechanics, describing binary star motion studies
02 p0380 A70-12783
- Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud
03 p0565 A70-13235
- Interplanetary trajectory selection, discussing transfer orbits, energy considerations, launch window computation, hyperbolic encounters and capture maneuvers
03 p0577 A70-14149
- Envelope stars evaporation effects on star cluster contraction, discussing energy inflow from envelope to nucleus
04 p0745 A70-14475
- Stellar systems dynamics, discussing dynamic interactions of point masses, forces in gravitational field, galactic model construction, etc
04 p0754 A70-15353
- Hori canonical equations solved by eliminating short period terms in general planetary theory, noting reduction to systems of linear differential equations
05 p0907 A70-16160
- Disproof of Wintner analytical foundations of celestial mechanics regarding binary collision in three body problem
05 p0909 A70-16338
- Dynamical systems with three degrees of freedom, presenting slice cutting and stereoscopic views graphical techniques for restricted three body problem with perturbations
06 p1149 A70-18462
- Faye comet motion and secular orbital evolution of short period comets
07 p1379 A70-19048
- Approximate method for celestial mechanics problems, considering particle motion under gravitation from central body in cylindrical coordinate system
07 p1387 A70-19266
- Historical survey of celestial mechanics including three body problem and solar system dynamic model construction
08 p1565 A70-20561
- Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption
08 p1565 A70-20562
- Pulsar formation effect on orbits of preexisting planets and postformation planets effects on pulsar period and phase residuals
08 p1570 A70-20898
- Hori canonical equations analytical solution generalization resulting from elimination of short period terms of first order planetary theory
08 p1575 A70-21239
- Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud
08 p1580 A70-21668
- Nongravitational effects, systematic residuals and close Jupiter approach problems in motions of comets
09 p1759 A70-22913
- Mechanized Algebraic Operations software package for manipulation on computer Poisson series, noting application to celestial and nonlinear mechanics and astrodynamics
10 p1845 A70-24179
- Hydrodynamic analogy in restricted three body problem of celestial mechanics, discussing mass and momentum conservation and physical properties uniqueness
10 p1938 A70-24180
- Heliometric lunar libration series joined to obtain uniform equation
13 p2490 A70-28949
- Bipolar moment integral in celestial mechanics formed by product of particle kinetic moments for n body problem order reduction
13 p2494 A70-29399
- Book on celestial mechanics covering perturbation methods, two body problems, astronomical coordinates, orbital mechanics, satellite rotation, gravitational effects, etc
15 p2799 A70-31998
- Historical survey of celestial mechanics including three body problem and solar system dynamic model construction
15 p2805 A70-32716
- Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption
15 p2805 A70-32717
- Celestial mechanics experiment for Mariner Mars 1971 to test general relativity theory and improve Martian ephemeris
16 p2978 A70-34031
- Gravitational variable constant in celestial mechanics, considering theories based on vacuum Jordan Lagrangian
18 p3320 A70-37066
- Spiral structure definition in external galaxies, discussing optical form types, Messier 33 outer and inner parts and differences in arms
18 p3326 A70-37153
- Kinematics of M 33, M 51 and large Magellanic cloud /LMC/
18 p3326 A70-37157
- Milky Way galaxy spiral structure analysis, using neutral H Hat Creek survey with southern observations
18 p3327 A70-37164
- Large scale galactic oscillations, discussing observational evidence and theoretical modal calculations
18 p3330 A70-37191
- Stellar isolated disks spiral structure, examining large numbers of point masses self consistent motion in galactic plane
18 p3331 A70-37195
- Large scale spiral galaxy structure interpretation, examining density wave theory, Milky Way System and spiral form origin
18 p3331 A70-37196
- Planetary theory construction to second order of disturbing masses, applying to motions of any set of two or three planets in solar system
19 p3523 A70-38687
- Stars and stellar gas motions interaction equations, analyzing plasma and gravitation problems
19 p3525 A70-38771
- Rotating stellar systems cooperative phenomena, estimating star-star collisions effect on perturbation rate and damping
19 p3525 A70-38772
- Comet shapes mechanical theory inverse problem approximate solution
19 p3525 A70-38773
- N body numerical integrator using virtual mass technique for computing trajectories with speed and accuracy suitable for spacecraft onboard computer applications
19 p3528 A70-38872
- Spherical celestial bodies anomalous rotation problem, noting sunspots zonal character
22 p4106 A70-43261
- Celestial mechanics covering two body problem, orbital improvement, perturbation theory and dynamics, planetary and satellite theory, lunar motion, etc
23 p4255 A70-45032
- Lunar theory literal solution for average node and perigee movements compared with Delaunay results, using Lie transforms for Hamiltonian function
24 p4399 A70-45141
- Short period hypothetical and real comets in Jupiter sphere of influence distributed according to orbital elements
24 p4409 A70-45637
- CELESTIAL NAVIGATION**
- NT ASTRONAVIGATION**
- Coupled control of space vehicle orientation with reference to three celestial bodies, reducing plane vibrations to dynamic third order system
10 p1914 A70-24307
- Three axis star pointing attitude control system for stabilized Skylark sounding rocket program
13 p2447 A70-28687
- Astronomical navigation on lunar surface with equations for selenographic latitude and longitude
13 p2449 A70-29272
- Celestial methods for lunar navigation, considering terrestrial and selenographic differences
14 p2613 A70-30459
- Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites
[AIAA PAPER 69-902] 20 p3669 A70-39681
- CELESTIAL OBSERVATION**
- U ASTRONOMY**
- CELESTIAL SPHERE**
- Diurnal and seasonal variations of parameter s of meteor showers on celestial sphere, using radio echo amplitude distribution from radar observations
14 p2635 A70-30307
- Geometrical appearances at relativistic speeds for celestial sphere with multiple constellations, spherical surface features at observer proximity and rectangular box train
19 p3520 A70-38273
- Celestial sphere scanning by spinning symmetric satellite with open loop magnetic control of precession
23 p4216 A70-44524
- CELL ANODES**
- Refuelable Mg-air battery anode, electrolyte and packaging materials selection from standpoint of cell voltage, metal consumption and sludge formation
02 p0253 A70-12721
- Electrochemical cells with lithium anode and nonaqueous electrolyte, discussing research role in designing high specific energy primary batteries
08 p1440 A70-20709
- CO electrochemical oxidation at porous solid electrolyte fuel cell anodes under high temperature, noting current density role
10 p1830 A70-24462
- Electrodes oxidation processes involving fuel cell molecules or derived adsorbed intermediates reacting with anodically generated surface oxide, considering Pt electrochemical reduction
10 p1830 A70-24465
- Raney alloy catalyst activity and stability in fuel cell anodes, noting properties of ternary phases of nickel, aluminum and iron, molybdenum or titanium
10 p1831 A70-24466
- Catalytic load carrying capacity of porous carbon electrodes impregnated with nickel salt and nickel boride in anodic fuel cell hydrazine oxidation
10 p1831 A70-24469
- Anodic breakdown characteristics of Ti alloys as function of metal surface condition
17 p3113 A70-34366
- CELL CATHODES**
- Silver/polytetrafluoroethylene water-repellant air-breathing cathodes for fuel cells with alkaline electrolytes, discussing pressure compatibility
10 p1829 A70-24454
- Silver cathodes and plasma-sprayed anodes for cost effective hydrogen/oxygen fuel cells with solid zirconium dioxide electrolyte, considering carbon precipitation avoidance
10 p1830 A70-24459
- Hydrogen peroxide fuel cell performance in acid and alkaline electrolytes, investigating cathodic reduction of oxygen on platinum
10 p1808 A70-25037
- Hydrogen oxygen fuel cell investigated for oxygen transfer to Pt cathode surface
12 p2166 A70-27848
- CELL DIVISION**
- Growth rate effect on glucose utilization rate using sporogenic strain of *Bacillus subtilis* during N and L-tryptophan limitation
01 p0021 A70-10790
- Temperature-synchronized semicontinuous culture and monitoring system for autotrophically growing *Euglenas*
04 p0633 A70-15453
- Hydrostatic pressure effects on DNA, RNA and protein synthesis and division in *Escherichia coli* cultures
04 p0637 A70-15475

- Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, noting increase in number of antibody producing cells
05 p0803 A70-17114
- Escherichia coli cell division patterns, discussing generation times spread, gamma ray irradiation in nutrient broth, DNA damage and growing points, etc.
08 p1441 A70-20681
- Chromosome of temperature-sensitive mutant of bacillus subtilis 168, observing multiforked replication at normal temperature and transfer of DNA
09 p1615 A70-22206
- Chlorella reproduction rates at steady and variable illumination intensity levels, determining productivity autocorrelation function by statistical analysis
17 p3030 A70-35355
- Circadian rhythms in single cell animals, examining cell division, temperature and light effects
19 p3365 A70-38410
- CELLS**
- Giant cell regular structures in solar atmosphere, using magnetic synoptic charts of solar activity
24 p4400 A70-45305

CELLS [BIOLOGY]

- NT AXONS**
- NT CARBOXYHEMOGLOBIN**
- NT CHROMOSOMES**
- NT EOSINOPHILS**
- NT ERYTHROCYTES**
- NT HEMATOPOIESIS**
- NT HEMOGLOBIN**
- NT LEUKOCYTES**
- NT LYMPHOCYTES**
- NT MITOCHONDRIA**
- NT NEURONS**
- NT OXYHEMOGLOBIN**
- Spore and vegetative cell adenylate kinases of *Bacillus subtilis* proved indistinguishable by polyacrylamide gel electrophoresis DEAE cellulose chromatography
01 p0021 A70-10789
- Biochemical characteristics, nitrogenase activity and nitrogen fixation in heterocysts of blue green algae
01 p0024 A70-10894
- Gnotobiotic techniques for human hematopoietic cell culture establishment and maintenance, considering culture transfer
01 p0027 A70-11311
- Probabilities for cell survival after exposure to ionizing radiation obtained by two compartment model
01 p0028 A70-11370
- High speed fluorescent cell sorting system for sorting mouse spleen cells from Chinese hamster ovarian tumor cells
02 p0240 A70-12695
- DNA penetration into normal and fast neutron irradiated yeast cells, using immunofluorescent microscopy
03 p0417 A70-13072
- Postirradiation free radical processes in cellular organelles of rat liver exposed to gamma irradiation detected by graft copolymerization method
03 p0418 A70-13302
- Radioprotective action of pyridine derivatives in monkey heart and human epithelium cells exposed to gamma radiation evaluated by dioxyphenyl alpha-alanine oxidation
03 p0418 A70-13303
- Ultraweak luminescence intensity, radiation damage kinetics and spectral properties of cellular organelles of rat liver exposed to gamma radiation
03 p0419 A70-13304
- Photodynamic damage in biological cells, discussing free radical originators and protective action of thiourea, mono and polyvinylpyrrolidone, cysteine and antibiotics
03 p0419 A70-13306
- Multiple optical properties measurement instrumentation for cellular specimens to classify biological cells, analyzing and displaying data by on-line computer
04 p0644 A70-15361
- Cortical cells fatigue and performance in subjects doing mental work, using motion picture signal perception method
04 p0639 A70-15509
- Norepinephrine-induced depolarization effects on brown fat thermogenesis in cold-acclimated rats determined in vivo measurement of intracellular potentials
05 p0799 A70-16020
- Hyperbaric oxygenation effects on cellular membrane permeability, analyzing rat plasma behavior of transaminases GOT and GPT and K and Na cations electrolytes
05 p0802 A70-16493
- Biological fluorescent substances passage in rabbit central nervous system as indicators of blood supply to cells
07 p1197 A70-18657
- Vacuum and radiation effects on *Escherichia coli*, noting role of cells water desorption in vacuum damage
07 p1203 A70-18962

- Macaque monkey stereoscopic vision, obtaining behavioral evidence by random dot stereoscopic patterns and finding cells sensitive to binocular depth in cortex
07 p1205 A70-19276
- Density gradient sedimentation of *Escherichia coli* populations irradiated with Co 60 gamma rays, showing correlation between DNA degradation and cell death
08 p1441 A70-20680
- Oxygen enhancement ratio and relative biological effectiveness of accelerated helium nuclei on mouse tumor cells, discussing applicability in radiation therapy
09 p1617 A70-22336
- Cardiac muscle intercellular junctions ultrastructural appearance, considering macula adherens, fascia adherens and nexus junctional specializations
09 p1620 A70-23061
- Orbital space flight effects on dry barley seeds, noting increased intracellular rearrangements
10 p1811 A70-24324
- Aerobic metabolism of heart muscle cells and oxygen utilization of coronary artery blood
10 p1821 A70-25081
- Cytoplasm, nucleus and membrane combination techniques for reassembly to form viable amoebae
11 p1986 A70-25849
- Energy deposition in cells by charged particles during ionizing radiation exposure, discussing RBE/relative biological effectiveness/and dose-effect relation for neutrons
11 p1989 A70-26597
- Field cotton leaves reflectance and transmittance measurement, predicting linear dimension related to cellular structure
12 p2273 A70-28122
- Active and passive ion transport mechanisms in excitable animal cell maintaining constant membrane polarization
13 p2352 A70-29351
- Pure oxygen effect on amino acids uptake and metabolism of *Pseudomonas saccharophila* stationary cells
14 p2536 A70-30343
- Linear density gradients in isopycnic centrifugation technique for selecting synchronous daughter cells from asynchronous *Chlorella* cultures
14 p2546 A70-30985
- Wheat seedlings cellular response to weightlessness during NASA Biosatellite II flight compared with simulated weightlessness effects
15 p2688 A70-31662
- Molecular structural relationship between cellular membranes and photoreceptors in plants and animals
16 p2847 A70-33028
- Lemniscus neurons in switching nucleus of thalamus, showing switching cells with direct cortical projections into somatosensory cortical zones
16 p2848 A70-33262
- Combined ultrasonic and ionizing radiation effects on electrophoretic mobility of tumor cells from albino mice
17 p3034 A70-35762
- Calcium ion role in myocardial cell electrical and mechanical trace processes under normal content and manganese blocking
18 p3221 A70-36640
- Protein solutions and cell cultures changes by ruby and Nd lasers radiation, noting threshold energy
20 p3579 A70-39419
- Simulated space flight radiation effects on dogs DNA synthesis and bone marrow cell differentiation
20 p3575 A70-40191
- Biochemistry of blood group antigens involved in agglutination reactions, discussing effect of proteolytic enzymes on cell membrane structure
21 p3764 A70-41447
- Mammalian cells after X ray irradiation, showing two forms of DNA repair process
21 p3765 A70-42024
- Cellular irradiation sensitivity in tissue culture modified by propyl gallate as radical reactions inhibitor
21 p3767 A70-42242
- Lethal and sublethal radiation dosage effects on cellular Na and K distribution in rat brain, liver, kidneys and muscular tissues
23 p4145 A70-44314
- Mice intestinal epithelium, investigating high energy protons irradiation effect on cells
23 p4149 A70-45028
- Nitrogen deficient algae nitrification, showing cellular N compounds oxidized to nitrate and nitrite followed by nitrate reductase
24 p4297 A70-45407

CELLULOSE

- Cellulose ion exchanger palladium catalysts preparation and applications in asymmetric hydrogenation reactions
17 p3042 A70-35125

CELLULOSE NITRATE

- Slurry-cast filled nitrocellulose plastisols as solid propellants, discussing compositions, performance and applicability to beryllium fuel
07 p1360 A70-19907

**CELSIUS TEMPERATURE SCALE
U TEMPERATURE SCALES
CEMENTITE**

- X ray elastic constants measured in cementite phase in high carbon tool steel following plastic deformation at tension, noting residual stresses increase and balance
06 p1084 A70-17126

CENTAUR LAUNCH VEHICLE

- NT ATLAS CENTAUR LAUNCH VEHICLE**
- Atlas /Centaur and Titan/Centaur launching of Intelsat 4 communication satellites, discussing booster, stage characteristics and payload
[AIAA PAPER 70-483] 11 p2127 A70-26605
- Thermoelectric outer planet spacecraft /TOPS/ flight environment, systems design and Titan 3D/Centaur launch vehicle with Burner II upper stage
21 p3930 A70-41795

CENTAUR PROJECT

- Centaur space guidance equipment design, development, parts control and reliability
14 p2612 A70-30452

CENTAUR VEHICLE**U CENTAUR LAUNCH VEHICLE****CENTAURUS CONSTELLATION**

- Balloon observations of Cen XR-2 X ray emission decrease
10 p1948 A70-24999
- Centaurus A radio galaxy X ray survey, implying upper limit of background radiation temperature
18 p3308 A70-36516
- Extragalactic objects 3C 273 NGC 5128 and M87 X ray emission detection, using proportional counters on Aerobee 150 rocket
18 p3310 A70-37016
- Hydrogen line absorption at 21 cm from Centaurus A /NGC 5128/ radio galaxy
18 p3318 A70-37017

CENTER OF GRAVITY

- Geocentric coordinate system definition by earth mass center and rotation axis and Greenwich meridian plane
01 p0082 A70-11456
- Symmetrical body rotational motion with asymmetrical mass distribution about center of mass, determining minimum initial value of angular velocity
01 p0192 A70-11482
- Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle
01 p0134 A70-11483
- Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction
01 p0198 A70-11577
- Satellite positions from simultaneous measurement by laser along geocentric arc usable for determining earth mass center position
02 p0253 A70-11752
- Geodetic coordinate system referred to center of mass and earth rotation axis constructible from satellite observations
03 p0472 A70-13186
- Satellite observations used to construct coordinate system referred to earth center of mass and axis of rotation
03 p0474 A70-13733
- Translational-rotational motion of long dumbbell in Newtonian central force field, analyzing plane center of mass trajectory with perpendicular kinetic moment vector
04 p0744 A70-14427
- Randomly oriented vibration effect on noncompensated three degree of freedom gyroscope with displaced center of gravity
04 p0692 A70-15278
- Optical position estimation model based on defining photon density profile center of gravity in noise, using photon Poisson process theory
04 p0652 A70-15337
- Motion equations of rigid vehicle derived in terms of body axes noncoinciding with mass center applied to ships and aircraft
05 p0881 A70-15883
- Automatically controlled rendezvous and docking for orbital assembly of spacecraft, deriving motion equations for mass centers
07 p1393 A70-19481
- Selenocentric coordinate system originating at center of mass, determining lunar figure center from photographs with reference stars
08 p1572 A70-20942
- Center of mass small displacement effects on satellite orbits by solving variational equations for scalar potential function employing matrix formalism
09 p1761 A70-22938
- Ecliptic obliquity secular change rate apparent discrepancy possibly due to earth-moon barycenter motion
10 p1945 A70-24962

Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates 11 p2128 A70-26782

Proton 2 satellite orientation and motion about center of mass determined from telemetric data analysis under aerodynamic moment 11 p2128 A70-26783

Aerodynamic moment on satellite with asymmetrically positioned solar cell platforms, analyzing motion around center of mass for diffuse scattering flow 12 p2314 A70-28254

Translational-rotational motion of long dumbbell in Newtonian central force field, analyzing plane center of mass trajectory with perpendicular kinetic moment vector 13 p2485 A70-28452

Earth satellite motion about center of mass, examining effects of random variations in atmospheric density, geomagnetic intensity and solar radiation 15 p2809 A70-31650

Automatically controlled rendezvous and docking for orbital assembly of spacecraft, deriving motion equations for mass centers 15 p2813 A70-32726

Selenocentric coordinate system originating at center of mass, determining lunar figure center from photographs with reference stars 15 p2806 A70-32754

Stable equilibrium positions for satellite consisting of many rigid bodies in circular orbit about center of gravity, using numerical method 18 p3332 A70-35963

Solar radio radiation effective gravity center shift determination, considering directivity diagram scanning phase for radio transit instrument adjustment 19 p3522 A70-35862

L-1011 onboard system for gross weight and center of gravity determination, describing transducers placement, computer design and display panel [SAWE PAPER 837] 20 p3562 A70-40359

Weight, moments and mass centers computer calculation by surface integral method, using FORTRAN language [SAWE PAPER 852] 20 p3660 A70-40373

CENTERBODIES

Turbofanjet powered hypersonic aircraft axisymmetric inlet systems using forward translating cowl and centerbody for various air flow characteristics [AIAA PAPER 70-687] 16 p2835 A70-33586

CENTERS

Geomagnetic center position determined by coordinate system referred to dipole approximating geomagnetic field 06 p1057 A70-17844

Collection of articles on chimpanzee central nervous system and behavior 01 p0028 A70-11375

EEG investigation of cerebral bio currents during polar night-day cycle, studying central nervous system nonspecific automatic control mechanism dependence on ecological factors 01 p0030 A70-11466

Plethysmographic investigation of myogenic load influencing sportsmen central nervous systems state, tabulating short and long distance running results 03 p0420 A70-13403

Quantitative characteristics of central compensatory process, investigating nystagmus responses in guinea pigs subjected to bilateral labyrinthectomy 06 p0995 A70-17806

Biological fluorescent substances passage in rabbit central nervous system as indicators of blood supply to cells 07 p1197 A70-18657

Phase correlation of conditioned and electrophysiological post radiation disturbances in central nervous system of monkeys 08 p1446 A70-21447

Reticular formation of central nervous system in vertebrates described as behavior controlling circuit of interconnected modules, proposing hybrid computer method for operational scheme 08 p1447 A70-21461

Central nervous system activity of white rats during hypokinesia, observing organism shifts and long time effects on functions 09 p1615 A70-22093

X ray effects on central nervous system noting mutations in rats, guinea pigs, chickens, dogs and rabbits 09 p1620 A70-22821

Human central nervous system changes during hypodynamia, noting unidirectional shifts in brain

hemodynamics, rheographic wave propagation time reduction, etc 10 p1815 A70-24680

Mechanisms responsible for sleep-wakefulness rhythm, investigating effect of lesions in CNS, electrical excitation of brain, neurons activity, etc 15 p2680 A70-31744

Sleep-wakefulness cycle regulation role of serotonin, noradrenalin and acetylcholine in CNS of animals 15 p2680 A70-31745

Central nervous system activity of white rats during hypokinesia, observing organism shifts and long time effects on functions 15 p2685 A70-32689

Habituation and dishabituation in semitact Aplysia preparation with central nervous system removed 18 p3217 A70-36517

Plasma tocopherol concentrations and vitamin E deficiency in dogs, noting pathologic changes in smooth muscle, central nervous system, skeletal muscle and retina 20 p3569 A70-38991

Vestibular message flow regulation by central nervous system, describing afference, inhibition and copy formation 22 p3976 A70-43705

Biocybernetics of human central nervous system, discussing electronic computers analogy to human brain 23 p4145 A70-44222

CENTRAL NERVOUS SYSTEM DEPRESSANTS

Reactions to visual emergency signals in humans after administering adrenalin, aminazin, melipramine or andaxine to change control systems functional state of cerebrum 01 p0030 A70-11467

CENTRAL NERVOUS SYSTEM STIMULANTS

Reactions to visual emergency signals in humans after administering adrenalin, aminazin, melipramine or andaxine to change control systems functional state of cerebrum 01 p0030 A70-11467

CENTRAL PROCESSING UNITS

Cosmic ray intensity variations recording device adaptable to computer forming centralized data processing system 05 p0845 A70-15932

CENTRIFUGAL COMPRESSORS

Impeller elastic and elastoplastic strength of centrifugal supercharger with curved disks and radial blades, using variational method 01 p0211 A70-11417

High hub/tip ratio centrifugal compressor with pipe and vane cascade diffusers for turbofan engines, determining impeller performance [ASME PAPER 69-WA/FE-28] 04 p0733 A70-14774

Bladed wheels stability in centrifugal compressors, calculating natural vibration frequencies of rotors 07 p1364 A70-19634

Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method [ASME PAPER 69-GT-35] 14 p2529 A70-31024

Rolls-Royce RB 211 three shaft turbofan engine, discussing centrifugal compressor, tubular combustion chambers and single stage turbine 15 p2787 A70-31949

Circular blade cascade design for supersonic vane diffuser of radial flow centrifugal compressor 16 p2837 A70-33764

Radial compressor diffusers design and technology [ASME PAPER 70-GT-116] 18 p3304 A70-36850

Pressure balanced rotor flow path design for mixed flow centrifugal compressors, calculating losses in rotor and diffuser section [ASME PAPER 70-GT-12] 18 p3209 A70-36863

Centrifugal compressor losses as function of suction chamber exit nonuniform flow field delivered to impeller 21 p3747 A70-41954

Turbofan, turbojet and turboprop engine development in aircraft gas turbine evolution, discussing VTOL propulsion, centrifugal and axial compressor engines 24 p4396 A70-46251

CENTRIFUGAL FORCE

Squeeze film investigation between rotating plane annuli, considering inertia due to centrifugal effect [ASME PAPER 69-LUB-6] 01 p0102 A70-10396

Elastic stability of Coriolis-coupled oscillations of thin rotating disk under influence of centrifugal forces 02 p0389 A70-12650

Ultraharmonic resonance excited by centrifugal force in system with Duffing restoring force characteristic using Ritz method 05 p0925 A70-15886

Load distribution in Christmas tree turbine attachments due to centrifugal force on blades, showing strain diagrams 05 p0939 A70-16488

Centrifugal force induced stressed state in gas turbine blades using photoelastic analysis, emphasizing stress distribution at shroud holes 07 p1403 A70-19118

Elastoplastic stressed state of variable thickness disk under combined effects of nonuniform heating, repeated centrifugal and surface tensile loads 09 p1778 A70-23091

Elastoplastic stress state of variable thickness disk under combined effect of nonuniform heating and centrifugal forces, applying flow theory to stress component determination 09 p1779 A70-23095

Centrifugal forces and nonuniform heating effect on natural vibration frequencies of circular plates using lumped parameter method 09 p1784 A70-23588

Stress-strain state of epoxy resin cylinder situated in centrifugal force field using three dimensional photoelastic method 12 p2323 A70-27340

Differential equations for coupled bending and torsional vibrations of slender beam in centrifugal force field 14 p2661 A70-31226

Disk elements perpendicular mounting by rotation on vibrating shaft, obtaining orientation by centrifugal force 15 p2733 A70-31580

Unanesthetized dogs renal hemodynamic response to negative centrifugal acceleration 15 p2681 A70-31883

Centrifugal atomizer mean drop size dependence on geometry, fluid properties and discharge velocity 18 p3300 A70-36274

Squeeze film investigation between rotating plane annuli, considering inertia due to centrifugal effect [ASME PAPER 69-LUB-6] 19 p3435 A70-37608

Curvilinear motion centrifugal force compared with barometric gradient force in symmetrical cyclone, establishing clockwise direction motion possibility 20 p3663 A70-39275

Gas core nuclear rocket engine light and heavy species centrifugal separation by MHD-driven rotating flow, discussing fluid dynamic simulation results 20 p3671 A70-40256

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope 21 p3931 A70-41854

Glucose metabolism in chickens under chronic centrifugal acceleration, meeting increased energy requirements 23 p4147 A70-44786

Turbine blades deformation by centrifugal and aerodynamic forces, discussing theory for bending stress free blade design 24 p4288 A70-45505

Altered gravitational field effects on frog eggs centrifuged under various conditions after fertilization, noting time dependence of induced abnormalities 24 p4298 A70-45619

CENTRIFUGAL PUMPS

Stability and potential cavitation of centrifugal pump operating with four working wheels with different geometric parameters 08 p1558 A70-21196

Stability region of hydraulic system containing centrifugal pump calculated from pressure head dependence on pump inlet pressure 09 p1607 A70-23622

Centrifugal pump design optimization, assuming one dimensional throughflow of viscous fluid as driving force 13 p2391 A70-29748

Centrifugal pumps of various metals for liquid oxygen, describing fire and explosion tests 14 p2617 A70-31020

Inducer tip clearance effect on centrifugal pump suction performance with velocity and total head distributions at outlet 14 p2592 A70-31332

Cavitation in centrifugal pumps, predicting breakdown and inception points variation with temperature and speed 15 p2744 A70-32097

Centrifugal pump performance correlation parameter under cavitation conditions for handling different liquids based on bubble growth theory 15 p2720 A70-32098

Centrifugal impellers primary and secondary flows velocity distributions, determining vorticity generation 18 p3243 A70-36871

Power loss reduction from disk friction and gas leakage through rotor seals of low speed centrifugal pumps in aircraft hydraulic systems and liquid propellant rocket engines 22 p4091 A70-42806

CENTRIFUGES

NT HUMAN CENTRIFUGES

Design parameter importance in centrifugal axial flow particle separator tubes performance from separator tube development program data 01 p0163 A70-10680

Optimal data filtering techniques and hardware for centrifuge testing of missile inertial platforms [AIAA PAPER 70-405] 10 p1861 A70-24901

CENTRIFUGING

Powered centrifugal separator for inlet filtering of rotary wing aircraft turbine engines, discussing efficiency and feasibility

01 p0164 A70-10683

Static and centrifugal filters merits for turbine engine lubrication systems, considering mechanical reliability, efficiency, dirt capacity and maintenance

01 p0164 A70-10686

Tolerance level to z axis acceleration from centrifuge techniques, noting irreplacability of intermittent stepwise increasing accelerations tests

07 p1201 A70-18790

Centrifuging as therapeutic device tested on male assault victim with bullet fragment floating freely in brain ventricular system

11 p1993 A70-26523

Linear density gradients in isopycnic centrifugation technique for selecting synchronous daughter cells from asynchronous *Chlorella* cultures

14 p2546 A70-30985

Binary gas mixture separation effects by centrifugation in cylindrical tube, calculating maximum radial concentration difference between wall and axis by numerical integration

23 p4181 A70-44206

CENTRIFUGING STRESS

Rat water intake and urine output during chronic centrifugation at resultant inertial fields of 1.7 and 3.0 g

02 p0231 A70-11705

Circulatory system tests during linear, intermittent and continuous accelerations on centrifuge, noting lack of statistical correlation between centrifuge tests and functional tests

07 p1201 A70-18789

Centrifuging acceleration tolerance of various animals, relating physiological and morphological effects

12 p2174 A70-28361

Red cell deformability and flow resistance and blood electrical resistance under low g centrifugation

15 p2680 A70-31700

Centrifugation effects on human peripheral arterial pulse behavior

17 p3037 A70-35126

Centrophenoxine effects on rabbits centrifugal acceleration resistance

17 p3025 A70-35131

Nystagmic response to directional inert shift of endolymph in semicircular canals in frontal plane head subject rotation

18 p3220 A70-36635

Spatial disorientation of human subjects in centrifuge, examining otolith role in reorientation and eye sensory mechanisms

22 p3976 A70-43707

Computer photokymographic recording of gravitational-inertial force environment effects on cardiovascular and respiratory systems on centrifuge

22 p3976 A70-43709

CENTRIPETAL FORCE

Centripetal acceleration tolerance level correlated with circulatory system functional tests and physical exercises, discussing strength and speed endurance

07 p1201 A70-18787

Rat body fluids displacement during positive centripetal accelerations by radioisotope tracer compounds, freezing rats in liquid nitrogen to fix hemodynamic changes

07 p1202 A70-18796

Pitch illusion in flight personnel under centripetal acceleration

24 p4306 A70-45330

CEPHALAGIA

U HEADACHE

CEPHALOPODS

NT MOLLUSKS

Squid head cartilage properties in terms of light and electron microscopic appearance, amino acid composition and X ray diffraction

24 p4305 A70-46348

CEPHEID VARIABLES

BV photometry of Population I Cepheids in Magellanic Clouds, Galaxy and M31

03 p0578 A70-14287

Cepheid variable 1 Carinae light curve from photoelectric observations, calculating periodicities from best fitting Fourier series

04 p0759 A70-15708

Magellanic Cloud cepheids two color light curves obtained by photoelectric photometry, discussing reddening

07 p1380 A70-19259

Zero-point of period-luminosity-relation of Cepheids based on proper motions, radial velocities and photometric data, applying secular parallax method

10 p1945 A70-24964

Bright southern Cepheids UVB observations, discussing blue companion effect on two color plot

14 p2639 A70-30726

Cepheids distance scale from proper motions data, using maximum likelihood method for period-luminosity relation

14 p2652 A70-31387

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction

15 p2802 A70-32483

Initial horizontal branch metal poor star models, examining opacities, luminosity and cluster ages of RR Lyrae stars

18 p3317 A70-37006

Young cepheids galactic distribution determined by photometric method, showing correlation with spiral arms

18 p3330 A70-37184

Light curves bumps properties of Population I cepheids in Magellanic Clouds, Milky Way galaxy and M31 as function of period

19 p3523 A70-38691

Cepheids in Galaxy spherical component, determining periodic variations by distribution function technique

19 p3525 A70-38768

Cepheids periodic variations photographic analysis

19 p3525 A70-38769

Intermediate band photometry of companions to RR Lyrae variables, identifying AP Ser K line excess subdwarf

21 p3892 A70-41187

Early B stars photometric examination of variable spectral lines, discussing beta Cephei stars possibility

21 p3922 A70-41981

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction

23 p4240 A70-43907

CEPHEUS CONSTELLATION

Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density

05 p0918 A70-16915

Beta Cephei star discovery criteria, examining mechanism theory by He and N overabundances, far UV flux, spectral line width and binary character

21 p3890 A70-41159

CERAMAL PROTECTIVE COATINGS

U CERMETS

U PROTECTIVE COATINGS

CERAMALS

U CERMETS

CERAMIC BONDING

Ceramic adhesives with glassy matrix for metal bonding, describing chemical reactions in interface, adhesive processing and application

08 p1526 A70-20883

Bonds strength involving metallic, organic and ceramic adhesives at various temperatures, considering metallic additives effect

08 p1504 A70-20891

CERAMIC COATINGS

Ceramic, cermet and metallic high temperature coatings development and applications, discussing time and cost saving procedures

[SAE PAPER 690478] 03 p0515 A70-13267

Portable megohmmeter for measuring insulation resistance of strain gauge ceramic installations

05 p0848 A70-16378

Optical parameters effect on directional emittance near edge of two dimensional ceramic coating, using Monte Carlo techniques

[AIAA PAPER 70-67] 06 p1106 A70-18138

CERAMICS

NT PYROCERAM [TRADEMARK]

Dielectric layers electrical conductivity in ceramics containing Ti during aging, observing different characteristics ascribed to nonequilibrium current carriers injection

01 p0156 A70-10221

Technical ceramic products physical properties compared with metals, discussing manufacturing methods and industrial and engineering applications

02 p0322 A70-12714

Ceramic plasma containers construction by soldered seal technique for ion lasers, noting moly-manganese process

02 p0314 A70-12746

Raman spectra of lead titanate, sodium tantalate/potassium tantalate and potassium tantalate/potassium niobate solid solutions at various temperatures

03 p0542 A70-13824

Pyroelectric coefficient extrema measurement at constant stress in barium titanate ceramic at various temperature ranges for various transition points

03 p0513 A70-14205

Thermal stability of turbine sealant mica-ceramic materials containing boron nitride

04 p0712 A70-14467

Fracture mechanical theory for crack propagation in brittle ceramics subjected to thermal shock, deriving crack stability criteria

04 p0767 A70-14505

Induction furnace for thermal treatments and melting of solid and liquid metals, alloys and sintering and degassing ceramic and metallic systems in vacuum

04 p0664 A70-15371

Ceramic fibers formation by particles mechanical deformation by extrusion in W matrix, describing grain structure of various extruded metal oxides

04 p0699 A70-15643

Barium titanate ceramics with nonlinear electrical conduction, noting I-V relationship dependence on temperature, impurities and electrodes

05 p0891 A70-15990

Test stand for endurance and creep testing of plastics, glazed ceramics and other brittle materials

06 p1028 A70-17665

Excess titanium dioxide effect on electric resistance of semiconductive barium titanate ceramics suitable for posistors

07 p1355 A70-18654

Turbulence measurement by piezoceramic acoustic sensors, considering capacitance

07 p1284 A70-19829

Ceramic capacitors selection considering ionization, third harmonic and HF heating control properties

09 p1642 A70-22003

Inorganic ceramic materials in design and fabrication of microwave antennas, filters and stable resonators, discussing density and dielectric constant variability by ceramics foaming

09 p1689 A70-22007

Electro-optic effects in ferroelectric ceramics with electrically variable coefficients of piezoelectricity and birefringence, discussing applications

09 p1739 A70-22633

Alkoxy-derived strontium zirconate and titanate preparation and characterization, considering purity control, crystallite size and ceramics synthesis

09 p1740 A70-22981

Acoustic emission monitoring methods to detect crack formation and growth in ceramics

10 p1894 A70-24174

Sputtering method used for applying metallizing layer to ceramics in producing ceramic to metal seals

10 p1895 A70-24555

Piezoelectric effects in ferroelectric ceramics using equivalent circuits and admittance matrices

12 p2283 A70-27005

Supersonic flight simulation in hypersonic wind tunnels for developing hypersonic air breathing propulsion, describing ceramic storage heaters

13 p2384 A70-28666

Book on high temperature, transition and hydrated ceramics covering nomenclature, natural occurrence, mechanical, thermal, sonic, electrical, magnetic and chemical properties

13 p2436 A70-29781

Ceramics microcrack propagation control through small slab with simultaneous microscopic observation of path and force changes, considering grain boundary effects

15 p2741 A70-32434

Ceramic material ranking, using thermal stress crack initiation method

16 p2934 A70-33274

Sapphire and ruby plastic deformation and fracture properties at room temperature, discussing sapphire base ceramics

18 p3278 A70-36046

Spaceborne lightweight mirror blanks made from ceramics fabricated from glass crystallization

18 p3263 A70-36559

Ceramic materials for low cost high inlet temperature gas turbine engine components

[ASME PAPER 70-GT-105] 18 p3279 A70-36889

Strontium titanates ceramics containing various trivalent rare earth ions, observing dielectric relaxation

19 p3486 A70-37755

Transparent ceramic armor fabrication using dense polycrystalline magnesia

19 p3437 A70-38422

Ceramic whisker and continuous filaments reinforced metals, discussing processing, properties, matrices selection of reinforced composites, etc

20 p3650 A70-39948

Hot pressed zirconia-zirconia ceramic fiber reinforced ceramic matrix composites, discussing mechanical properties and failure modes

22 p4057 A70-42285

Ceramic fiber technology, forming processes and matrix composites fabrication, discussing chemical and physical compatibility factors, plastic forming, slip casting, cold pressing, etc

22 p4045 A70-42477

Temperature stable homogeneous single phase zirconate solid solution ceramics for microwave dielectric resonators and microstrip substrates

22 p3996 A70-42922

Reentry protection for radioisotope heat sources, using thermal switch of composite ceramic foam with metal impregnants

22 p4054 A70-42958

Full-swing and incremental Charpy impact and Izod tests for ceramic intrinsic impact strength

23 p4209 A70-43872

- Ceramic composite materials structural application, improving brittleness and thermal shock resistance via reinforcing refractory fibers
[ICAS PAPER 70-40] 23 p4267 A70-44138
- High temperature specific heat terms for refractory metals and ceramics from room temperature to near-melting point 23 p4207 A70-44440
- Refractory materials surface behavior under friction, discussing microscopic nature of wear and surface deterioration due to thermal fatigue, fusion and material transfer, etc 24 p4342 A70-45595
- CEREBELLUM**
- Microelectrophysiological study of cerebellar neuron responses to stimulation of vestibular apparatus by vertical rocking performed on anesthetized adult cats 01 p0012 A70-10124
- Relationships between frog vestibular afferents, cerebellum and efferent vestibular system, using electron microscopy and Nauta degeneration technique 01 p0014 A70-10351
- Cerebello-otolith system represented by axons of Purkinje cells, studying inhibitory vestibular efferent system relation to cerebellum in frog 01 p0014 A70-10352
- Tegmental nucleus neurons of cats cerebellum, considering responses to acceleration changes and natural stimulation of vestibular apparatus 03 p0421 A70-13510
- Evoked cerebellar potentials time characteristics during spinal cord stimulation in cats, investigating cerebellar intercentral connections effect 13 p2353 A70-29357
- CEREBRAL CORTEX**
- Cortex functional interrelationships with hypothalamus and formatio reticularis, studying role of corticofugal effects in anesthetized cats 01 p0012 A70-10051
- Corticofugal effects of various cortical regions on neuron activity in hypothalamus posterior lateral sections in cats 01 p0012 A70-10053
- Reversible cold induced deactivation of cat neocortex bioelectric activity in chronic experiment, noting cooling system 01 p0031 A70-10056
- Termination mode of primary and secondary vestibular fibers in cerebellar cortex of frog and cat, measuring evoked field and unitary potentials 01 p0014 A70-10353
- Soviet book on higher cortical functions of man and disorders due to local brain injuries, describing methods for neuropsychological studies of motor functions 01 p0017 A70-10503
- Neurons and perineuronal glial cells quantitative relations in visual cortex from anesthetized dogs 01 p0025 A70-11030
- Morphological analysis of connections between auditory cortex zone and claustrum in anesthetized cats, establishing efferent nerve fibers presence 01 p0025 A70-11039
- Corticovisceral interrelations concept, summarizing contributions in form of diagram showing interactions between cortical and nervous activity of organs 01 p0029 A70-11463
- Neurons tracing activity and cellular memory mechanisms in cortical projection region of cutaneous analyzer of immobilized rats following electric acoustic stimuli 01 p0030 A70-11468
- Rabbits and cats cortical neurons responses to light and acoustic signals, using microelectrodes inserted at different depths into cortex 01 p0030 A70-11469
- Neuron activity in somatosensory cortex region of guinea pigs and rats with intracortical connections severed by circular incision 01 p0030 A70-11470
- Evoked potentials arising in entorhinal cortex of rabbits in response to stimulation of somatic nerves, light and sound 03 p0417 A70-13070
- Direct links existence between rabbit temporal cortex neurons and neurons in each division of hippocampus, discussing topographic arrangement and axons quantity 03 p0417 A70-13071
- Skin sensitivity representation in cats cerebellar cortex during electrocutaneous stimulation in chronic experiment, providing information on afferent system 03 p0417 A70-13216
- Cats cerebral cortex background electrical activity measured during development of conditioned reflexes, noting shift toward higher frequencies 03 p0418 A70-13217
- Conditioned fear reaction produced by electric stimulation of cat anterior hypothalamus, discussing effect of neocortex removal 03 p0420 A70-13425
- Somatosensory cortex removal effect on blocking action of skin stimulation on associative response to light flash in cats 03 p0420 A70-13430
- Autocorrelation and cross correlation analysis of slow EEG potentials in rhythm of movement as cortical activity pattern of cerebral hemispheres during work 03 p0421 A70-13687
- Early and late response component of associative cortical area in cerebral hemispheres of cats connected with mono and polysensory neuron activity 03 p0421 A70-13688
- Origin and functional designation of associative evoked potentials in orbital cortex of cats, showing phases connected with neuron activity and excitation 03 p0422 A70-13689
- Unrestrained chimpanzees cortical and subcortical electrical activity during sleep recorded by telemetry and compared with human beings and other mammals 03 p0432 A70-14347
- Efferent model to test inhibitory influence of inferotemporal cortex lesions on visual discrimination of monkeys, using paired flashes of light 04 p0629 A70-14449
- Temporary suppression of cortical associative responses in cats with electrocoagulated thalamic relay nuclei lesions 04 p0632 A70-15220
- EEG patterns of functional state effect on evoked cortical potentials in response to DC pulses in dogs after nembutal administration 04 p0638 A70-15503
- Cortical cells fatigue and performance in subjects doing mental work, using motion picture signal perception method 04 p0639 A70-15509
- Tetrodotoxin /TTX/ effects on mammalian brain studied by introducing TTX into cat lateral geniculate body /LGB/, causing flash evoked potentials and visual cortex decrease 05 p0799 A70-16049
- Nonspecific influences on rabbits neurons reaction to nonvisual stimuli in central visual pathway using microelectrodes implantation in visual cortex 05 p0802 A70-16624
- Rhesus monkeys impaired discrimination in recognizing tachistoscopically presented objects following cortical polarization 05 p0802 A70-16625
- Cerebellar cortex reactions to sciatic nerve stimulation in rats under transverse accelerations in centrifuge 05 p0804 A70-17116
- Visually evoked cortical responses to checkerboard patterns, correlating amplitude to visual acuity 06 p0992 A70-17311
- Acetylcholine concentration, esterase activity and synthesis in cerebral tissue of rats under repeated mechanical vibrations combined with noise 06 p0993 A70-17425
- Pavlovian conditioned reflexes theory reappraisal, discussing cortex-subcortical formations interrelations models 07 p1197 A70-18694
- Rabbits sensorimotor and visual cortical responses during defensive conditioning to rhythmic light 07 p1197 A70-18695
- Electrocorticograms frequency spectra from different visual cortex layers of rabbits during exposure to rhythmic light pulses 07 p1198 A70-18698
- Rabbits visual cortex evoked potential changes due to light flashes under different conditions 07 p1198 A70-18716
- Bioelectrical reactions in anesthetized cats cortical zones in response to stimulation of contralateral sciatic nerve 07 p1199 A70-18722
- Thalamic N. VPL role in distributing afferent flux in anesthetized cats cortex, using stimulating contralateral sciatic nerve 07 p1199 A70-18723
- Anticerebral cytotoxic serum effect on white rats conditioned reflex activity 07 p1199 A70-18727
- Cerebral biopotentials of rabbits exposed to RF weak electromagnetic field indicating cortex inhibition in EEGs 07 p1199 A70-18728
- Canines conditioned reflex activity as function of cortex sections following head exposure to X ray irradiation 07 p1199 A70-18729
- Macaque monkey stereoscopic vision, obtaining behavioral evidence by random dot stereoscopic patterns and finding cells sensitive to binocular depth in cortex 07 p1205 A70-19276
- Guinea pigs visual analyzer during stimulations by diffuse light, nonspecific thalamic nuclei and microelectrodes polarization, determining A- neuron activity 07 p1213 A70-19788
- Midbrain reticular neurons activity in cats during response to individual and coincident cortical and hypothalamic stimulations 07 p1213 A70-19789
- Binocular fusion and rivalry effects on cortically evoked human potential, obtaining pattern characteristic responses to monocular stimulation 07 p1215 A70-20214
- Cortical induction phases estimated by retinal mobility index concerning activity of acoustic, olfactory and cutaneous analysors 08 p1443 A70-20735
- Visually evoked cortical potentials /VECP/ to different probe stimuli to suppressed human eye in binocular rivalry experiments, discussing eye dominance problems 09 p1618 A70-22674
- Ionizing radiation effects on tissues of developing cerebellar cortex of rats 09 p1619 A70-22815
- Brain cerebral tissues electrical impedance measurement by electrodes and bridge circuit, discussing chemical and metabolic properties 09 p1620 A70-22897
- Glycogen accumulation in astroglia following brain trauma caused by partial transection of cerebral hemisphere in rats 09 p1620 A70-22898
- Cholinergic nervous mechanism of autoregulatory dilatation of pial arteries under decreased blood supply to cerebral cortex in rabbits 09 p1622 A70-23583
- Cerebral circulatory reactions of smokers and non-smokers exposed to altitude, measuring vasomotor, blood flow and cardiac frequency indexes using scalp electrodes 12 p2172 A70-28042
- Electrical activity of visual cortex, subcortical structures and reticular formations in cats during conditioned reflex stimulation by light 12 p2173 A70-28351
- Neuron activity of cortical motor and visual regions and corpus geniculatum laterale in cats during diffuse thalamic electrostimulation combined with light signals 12 p2173 A70-28355
- Sleep-wakefulness cycle electroencephalogram of auditory and visual portions of neocortex and hippocampus activity in cats, using spectral analysis and integration 14 p2536 A70-30185
- Ionizing X radiation influence in lethal and sublethal doses on cerebral hyaluronic acid in mice and guinea pigs 14 p2536 A70-30186
- Electroencephalographic responses comparison with electroencephalographic record during prolonged torsion swing vestibular tests under cortical and subcortical factors influence 14 p2539 A70-30917
- Human cerebral cortex intercentral relations during repose and afferent stimulation, using electroencephalogram cross correlation 15 p2687 A70-32868
- Thyroxine stimuli transmission from posterior hypothalamus to cerebral cortex ascribed to dorsomedial nucleus of thalamus 16 p2848 A70-33261
- Cortical evoked potentials in human motor conditioning to photic stimulus 18 p3221 A70-37212
- Evoked potentials in dogs sensorimotor cortex during defensive instrumental conditioning 18 p3221 A70-37213
- Visual cortical anomalous response to paired photic stimulus in rabbits with ablations in rostral part of brain stem 18 p3221 A70-37214
- Visual attention and temporal cortex stimulation effects on evoked electrical activity in monkey brain 19 p3360 A70-37812
- Bilateral cortical cerebellar hemispheric ablations effect on feline light-dark discrimination learning 21 p3762 A70-41142
- Orientation detectors in human visual cortex, suggesting mutual lateral inhibition 23 p4144 A70-43813
- Regional cerebral cortical blood flow measurement, using heat clearance thermistor probe 23 p4157 A70-45082
- Auditory cortex projections to caudate nucleus and functions of associative subcortical area in cats 24 p4300 A70-45838
- Mesencephalic reticular formation influence on threshold stimulation of cortex, hippocampus, amygdala, thalamic nuclei and caudatum in rabbits 24 p4300 A70-45839
- Bilateral oligosynaptic interaction between posterior lateral thalamic nucleus and afferent systems in visual and acoustic cortical areas in cats 24 p4300 A70-45840
- Vasodilating carbon dioxide effect on brain circulation in occipital cortical area in cats and rabbits using thermoelectric method 24 p4300 A70-45842
- Brain cortex protein metabolism alterations induced by anticipation stress and ACTH in rats 24 p4301 A70-45999

CEREBRAL VASCULAR ACCIDENTS

Long air voyage after exteriorization of Wallenberg syndrome, discussing case history of subject with cerebral vascular accident 12 p2172 A70-28044

CEREBROSPINAL FLUID

Respiratory waves formation of intracranial pressure in anesthetized cats and dogs, studying various contributing factors 07 p1213 A70-19792

Acceleration effects on Na, K, and pH in rabbits cerebrospinal fluid and cerebral blood 13 p2352 A70-29347

Blood-brain and blood-cerebrospinal fluid barriers alterations under various physical environments in manned orbital laboratory 22 p3973 A70-43647

CEREBRUM

Phospholipid metabolism intensity in brains of adrenalectomized and pseudo operated rats under hypoxia 01 p0012 A70-10054

Glutamic and aspartic acid concentrations in brain tissue and incubation medium after adding gamma-aminobutyric acid 01 p0018 A70-10507

Thyroidin influence on RNA content and nucleotide composition in hypothalamus, cortex and phenolic fractions of cerebral hemispheres resulting in accelerated protein biosynthesis 01 p0019 A70-10511

Reactions to visual emergency signals in humans after administering adrenalin, aminazin, melipramine or andaxine to change control systems functional state of cerebrum 01 p0030 A70-11467

Synchronizing and desynchronizing systems for cerebral electrical activity, noting roles in sleep and wakefulness mechanisms 03 p0417 A70-13073

Increased oxygen partial pressure effects on cerebral bioelectric activity from EEG recordings on unanesthetized dogs 03 p0422 A70-13690

Pilots temporal lobe epilepsy case history and diagnosis 06 p1000 A70-17301

Acute hypoxia effect on mono-, di- and triphosphoinositides metabolism and content in white rats cerebral tissues, using chromatographic analysis 07 p1199 A70-18721

Cranio-cerebral hypothermia effects on phase structure of cardiac thrust in dogs 07 p1204 A70-19140

Cerebrum hyperemia of dogs subjected to cranio-cerebral hypothermia, recording rheoencephalograms by occipitofrontal needle electrodes 07 p1207 A70-19473

Succinic dehydrogenase activity in white rats cerebrum and liver under hypothermia and after warming 07 p1207 A70-19475

Vegetative cardiovascular, motor and electrophysiological reactions to electrical stimulation of limbic and reticular formations in cerebrum after adrenalin and aminazine injections 13 p2352 A70-29352

Cerebrum electrical activity and myogenic tonus relation in subjects performing tasks in response to visual and acoustic stimuli 18 p3221 A70-37216

Hypoxia effects on cerebral blood flow in anesthetized dogs, considering acidosis and vasodilation 20 p3577 A70-40330

CERENKOV COUNTERS

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum 01 p0172 A70-11509

High energy gamma rays detection from pulsars by fast night sky Cerenkov counter 19 p3500 A70-38083

Periodic high energy gamma rays from pulsars, using night sky Cerenkov light receiver for proton showers 19 p3500 A70-38084

High energy primary electron flux measurements by Cerenkov counter onboard ESO 2 satellite 19 p3504 A70-38107

Rigidity spectra of primary cosmic ray nuclei groups from satellite-borne Cerenkov spectrometer 19 p3508 A70-38135

CERENKOV EFFECT

U CERENKOV RADIATION

CERENKOV RADIATION

Cerenkov radiation from electrons in magnetosphere and ionosphere, analyzing radiated power relationship with frequencies and latitudes 01 p0080 A70-11226

Cerenkov radiation of electron-positron pair as moving radiating dipole in EAS, discussing emission effects of primary energy, production height and inclination angle 03 p0561 A70-14186

Pulsed gamma radiation from pulsars searched for by Cerenkov air shower detection method 04 p0738 A70-14518

Cerenkov light in extensive air shower observed at mountain altitude showing mixed primary cosmic rays in chemical composition 06 p1134 A70-17184

Cerenkov radiation in infinite anisotropic electron plasma linearly polarized in magnetic field having linear electron distribution moving with uniform velocity 06 p1120 A70-17538

VLF and LF auroral or polar hiss as generated by incoherent Cerenkov radiation from high energy electrons 07 p1264 A70-19190

Cerenkov generation of VLF waves in inner magnetosphere at low latitudes 07 p1265 A70-19281

Cosmic rays induced Cerenkov light pulses effect on stellar intensity interferometer from measuring correlated pulses 08 p1497 A70-21492

Non-Cerenkov radiation region produced by passage of oscillating electric dipole at uniform velocity 09 p1728 A70-22958

High energy pulsed gamma rays detection method for pulsars based on search for nanosecond duration Cerenkov light signals 09 p1748 A70-23795

Cerenkov radiation field in infinite parallel dielectric layer by sinusoidally bunched beam of electric charges moving with constant velocity along surface 10 p1916 A70-24408

Electron collision frequency effects on Cerenkov radiation from magnetoplasma, applying results to magnetosphere and ionosphere 13 p2465 A70-29546

Measurable VLF electromagnetic fluxes from Cerenkov effect in ionosphere produced by artificial electron beams 14 p2579 A70-31249

Cerenkov plasma waves generation by fast electron streams in solar corona and conversion into EM waves 17 p1373 A70-35768

Periodic cosmic gamma radiation from pulsars, using reflector detection of shower generated Cerenkov light 19 p3501 A70-38090

Cosmic gamma ray sources detection in 100-1000 GeV range by atmospheric Cerenkov radiation from energetic particle showers 19 p3501 A70-38091

Pc-1 pulsation production by Cerenkov emission of proton beam oscillating along magnetic field line 19 p3417 A70-38590

Spontaneous and induced Cerenkov emission by charged particle in turbulent medium, discussing random fluctuations effect on radiation spectra 21 p3879 A70-40928

Far field power of coherent Cerenkov radio emission from cosmic ray showers in turbulent atmosphere, using radio telescopes 23 p4247 A70-44791

Light flashes observed by Apollo astronauts, proposing Cerenkov radiation or direct excitation of eye retina by cosmic rays 24 p4307 A70-45403

Cerenkov light longitudinal distribution from extensive air showers, using near UV receivers 24 p4398 A70-46225

CERUM

Ce-Ni-Si system X ray and microstructural analysis, constructing phase diagram for Ce contents of 0-33.3 wt percent 08 p1555 A70-21115

CERMETS

Defects development in cermet materials sealing elements in high O content gas flows of turbo-prop and turbojet engines 01 p0161 A70-10160

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance 01 p0124 A70-11621

Ceramic, cermet and metallic high temperature coatings development and applications, discussing time and cost saving procedures [SAE PAPER 690478] 03 p0515 A70-13267

Titanium carbide based cermets with steel matrices, studying heat treatment effects on hardness 04 p0696 A70-14462

Fillers effect on thermal conductivity in porous cermet elements, investigating powdered Ti plates with air replaced by Hg, benzene, ethanol, ether and water vapor 05 p0957 A70-16291

Fission gases trapped in fuel pellets, cladding and matrix of irradiated refractory metal-uranium oxide cermets determined by gamma counting 07 p1332 A70-19851

Solid lubricant crystallographic orientation selection for antifriction cermet material silver-molybdenum disulfide 12 p2254 A70-27286

Ti-Mo cermet alloys properties and production technology, testing corrosion resistance 16 p2931 A70-33220

Wear resistant titanium carbide based cermet material production by impregnation techniques, discussing grain size and heat treatment effects 19 p3450 A70-37453

Copper based cermets production by electrochemical deposition in lieu of powder metallurgy, discussing merits 19 p3450 A70-37455

Aluminum oxide growth rate in molybdenum cermet after high temperature annealing 24 p4359 A70-45478

CERTIFICATION

FAA engineering approach to SST certification involving airworthiness standards development and coordination with industry and foreign governments 03 p4347 A70-14060

Aircraft noise reduction certifications program by tripartite draft plan 07 p1426 A70-18876

Aircraft certification of supersonic and jumbo jet transports assuring acceptable safety level 09 p1610 A70-22948

Certification process for supersonic transports taking into account safety and economic considerations 09 p1610 A70-22949

Apollo Spacecraft Certification Test Program at replaceable hardware assembly level noting future manned spacecraft applications [AIAA PAPER 70-375] 10 p1952 A70-24928

Licensing aspects of Edwards Report, criticizing Air Transport Licensing Board (ATLB) organization 11 p1153 A70-25856

STOL aircraft noise level certification based on aircraft type, landing and takeoff paths and airports [SAE PAPER 700325] 12 p2161 A70-27459

Meteorological problems associated with proposed tests for aircraft noise certification, discussing airport near-surface environments 14 p2610 A70-30612

Charpy impact test accuracy for model machine certification, discussing erroneously high test values 15 p2820 A70-32236

Boeing 747 flight test certification program, describing methods, data systems, inertial navigation, engines, flutter, etc [SAE PAPER 700828] 24 p4290 A70-45891

STOL aircraft FAA airworthiness standards and certification rules, examining noise, control systems, all weather operation, fire protection, handling qualities and performance [AIAA PAPER 70-1331] 24 p4291 A70-45937

CESIUM

NT CESIUM VAPOR

Temperature effect on work function minimum of cesiated W surfaces 01 p0154 A70-10108

Cesium clocks at fixed locations compared for precision and accuracy, noting influence of radio frequency diurnal variations 06 p1139 A70-17474

Phase comparisons between commercial cesium beam frequency standards and NASA experimental hydrogen maser NX-1 08 p1513 A70-21592

Quadratic Stark shifts of absorption lines hyperfine components in cesium atom beam measured using optical spectroscopy 10 p1887 A70-24033

Cs atomic spectral line broadening under simultaneous electric and magnetic fields, observing Zeeman and Stark splitting 13 p2460 A70-28711

Ce atom collision with excited Hg atom, measuring ionization cross section 18 p3292 A70-36154

Critique of paper on electron diffraction study of Ce adsorption on W surface, discussing electron work function changes and data discrepancies 19 p3473 A70-37548

Cesium films structure and work function on W /011/ face, discussing order-disorder transition 19 p3487 A70-37817

Cesium beam velocity attenuation by He, Kr and Xe, determining scattering cross sections from gas pressure and density measurements 20 p3675 A70-39618

Preionization in Cs seeded Ar nonequilibrium plasma for MHD generators, examining discharge characteristics, recombination reactions, etc 20 p3680 A70-39991

Diatom C_s 7667 A band vibrational spectrum analysis 20 p3676 A70-40349

Cesium high temperature saturated liquid and vapor phase density and critical temperature and pressure 23 p4281 A70-44450

Two-bulb switchable pulsed spectral lamp with Cs and Xe for optical pumping studies 23 p4197 A70-44478

CESIUM ALLOYS
Cooled antimony-cesium film photoelectric effect for weak luminous flux, examining electronic camera reciprocity 19 p3427 A70-38175

CESIUM ANTIMONIDES
Photoemitting cesium antimonide thin films for IR detectors 19 p3488 A70-38202

CESIUM COMPOUNDS
NT Cesium Antimonides

CESIUM DIODES
Cs atoms excitation and ionization in Cs diode interelectrode space under Knudsen conditions, considering luminescence and electron energy distribution 10 p1926 A70-25116

CESIUM ENGINES
Thrust vectoring of multiaperture Ce electron bombardment ion engines, determining thrust deflection limit by accelerator current rise 11 p2102 A70-26124
One millipound cesium ion thruster for synchronous ATS-F satellite, describing power conditioning and control logic subsystems [AIAA PAPER 70-1149] 20 p3690 A70-40205
Composite accelerator electrodes on Cs bombardment microthrusters, testing various designs and electrode coatings [AIAA PAPER 70-1089] 20 p3693 A70-40246
Cs and Hg electrostatic thruster effluents effects on spacecraft materials, describing chemical, metallurgical and thermophysical experiments [AIAA PAPER 70-1144] 20 p3652 A70-40519

CESIUM ION
Cs atomic and molecular ions mobilities and drift velocities in Cs vapor at different pressures in low electric fields 04 p0722 A70-14715
Satellite spin stabilization by Cs contact ion microthrusters with beam deflection, investigating performance obtained by optimal and suboptimal laws 13 p2506 A70-29143
Plasma space potential measurement with heavy ion beam probe using cesium gun and electrostatic energy analyzer 16 p2960 A70-34339
Effective collision cross section for reaction resulting in Cs ions neutralization in thermal Cs plasma calculated from measured ion currents 22 p4082 A70-43374

CESIUM PLASMA
Longitudinal and transverse temperature distribution measurement of electrons in electrostatic field and ion current density in ionized Cs plasma beam, determining energy spectra 01 p0149 A70-10170
Negative resistance I-V characteristics of low voltage arc discharge in Cs plasma 01 p0150 A70-10172
Cs seeding effect on bound-free UV photoabsorption of Cs-H plasma at constant electron density and energies below H ionization 02 p0343 A70-11904
Nonequilibrium cesium plasma of low voltage arc discharge, measuring electron temperature and distribution function and diffuse-series excited level populations 03 p0532 A70-13740
Cs plasma research, discussing Q-machines, plasma confinement, magnetic field experiments, LF and HF wave propagation, etc 03 p0533 A70-14015
Plasma instabilities of Ce filled auxiliary discharge thermionic energy converter compared with Langmuir theory 03 p0415 A70-14367
Nonequilibrium Cs plasma electron density, temperature and sustaining field using theoretical analysis and probe measurements 05 p0887 A70-16108
Visible light emission from nonequilibrium Cs plasma measured for spectral intensity distribution, suggesting excitation mechanism in terms of collision-radiation model 05 p0887 A70-16109
Cesium plasma composition as equilibrium mixture of ideal gases assuming chemical equilibrium attainable by specified reactions 07 p1349 A70-19660
Upper cesium levels population inversion during cesium discharge plasma decay 08 p1550 A70-20848
Molecular cesium ion production by arc discharge in inhomogeneous cesium plasma, describing probable reaction mechanism 08 p1551 A70-20849
Longitudinal and transverse temperature distribution measurement of electrons in electrostatic field and ion current density in ionized Cs plasma beam, determining energy spectra 10 p1925 A70-25016
Hg and Cd seeded Ce plasma wide-spaced diode without external light source investigated for Penning effect on diode performance 10 p1808 A70-25038

Thermally ionized cesium plasma viscosity at high temperatures in vacuum using capillary tube assembly 11 p2092 A70-26731
Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory 12 p2278 A70-27327
Positive ion composition in Cs plasma as function of normalized pressure 15 p2779 A70-31978
Cesium plasma composition as equilibrium mixture of ideal gases, assuming chemical equilibrium attainable by specified reactions 15 p2781 A70-32697
Probe measurements in Cs plasma formed by contact ionization with hot wire for density, electron temperature and space potential 16 p2958 A70-33624
Photoresonant cesium plasma ionization, discussing pumping spectra, electron gas, molecular-atomic ion ratio and dynamics 19 p3474 A70-37440
Electron and ion transport in cesium plasma for thermionic and MHD energy converters 21 p3859 A70-41912
Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory 21 p3860 A70-42068
Cs seeded Ar discharges electron energy distribution, discussing drift velocities, electrons elastic and inelastic collisions with ions and molecules, etc 22 p4081 A70-43198
Effective collision cross section for reaction resulting in Cs ions neutralization in thermal Cs plasma calculated from measured ion currents 22 p4082 A70-43374
Cs ion beam space charge and current neutralization by electron capture for partially ionized plasma formation, investigating longitudinal electrostatic wave excitation 24 p4385 A70-45465

CESIUM VAPOR
Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization 01 p0150 A70-10173
Threshold laser power density-atom density relation in cesium vapor optical breakdown, suggesting two photon ionization process 01 p0110 A70-10569
Cs atomic and molecular ions mobilities and drift velocities in Cs vapor at different pressures in low electric fields 04 p0722 A70-14715
Cs jet device eliminating wall influence in nonlinear radiation-atom interaction phenomena 07 p1342 A70-20109
Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization 10 p1925 A70-25018
Nuclear converter with porous metal adsorption reservoir working with or without liquid cesium 10 p1915 A70-25039
Servo type Cs vapor magnetometer performance including sensitivity, orientation effect, dynamic characteristics and operational temperature range 13 p2414 A70-30038
Electron energy loss per collision in Cs vapor discharge, measuring electric field and electron temperature by Langmuir probes 16 p2954 A70-33281
Microwave characteristics in plasma of short discharges in low pressure cesium and mercury vapors, noting spectral and spatial distribution of microwave power and intensities 22 p4083 A70-43392
Cs high temperature vapor and critical pressure and temperature determination for predicting thermodynamic and transport properties, liquid phase nature and state relations 23 p4281 A70-44449

CESSNA AIRCRAFT
Cessna single engine aircraft tubular and flat steel landing gear springs, describing quality control through nondestructive testing 01 p0098 A70-10018
Cessna CITATION aircraft design, considering engineering, marketing and corporate cooperation [SAE PAPER 700241] 11 p1981 A70-25910

CESSNA MILITARY AIRCRAFT
U CESSNA AIRCRAFT
U MILITARY AIRCRAFT

CETYL COMPOUNDS
Cetyl alcohol and water vapor growth by absorption and condensation on hygroscopic nuclei population in atmosphere under cooling 20 p3664 A70-40066

CF-104 AIRCRAFT
U CANADAIIR AIRCRAFT
U F-104 AIRCRAFT

CH-3 HELICOPTER
Flight tests conducted in artificial and natural icing conditions, using CH-3C helicopter with rotor blades equipped with polyethylene anticing tape 01 p0006 A70-10695

CH-46 HELICOPTER
Flight recorder survey to determine combat operating environments of instrumented CH-46D Sea Knight helicopters 01 p0006 A70-10702
Analog/digital system for full scale airframe fatigue amplitude and phase signature measurements on CH-46D tandem rotor helicopter 15 p2739 A70-32323
Fluidics in naval avionics, discussing CH-46A helicopter stability augmentation and approach power compensator for carrier-based aircraft 24 p4293 A70-45428

CH-47 HELICOPTER
Personnel/cargo lowering and retrieval system requirements, design approach and effects on performance for CH-47 helicopter, discussing fabrication and testing on mockup 06 p0985 A70-17711
CH-47C helicopter fiberglass main rotor blade, discussing composite materials impact on design 17 p3013 A70-34702
CH-47 cruise guide indicator for displaying fatigue loading to pilots, discussing design and operation 17 p3082 A70-34705

CH-54 HELICOPTER
CH-54A engine air particle separator /EAPS/ field experience, discussing engine removal times due to erosion, environment evaluation and design improvements 01 p0164 A70-10684
CH-54 engine air inlet antice system design, manufacture and testing, solving heat balance equations describing tapered gap heat exchanger 01 p0165 A70-10693
Crane helicopters characteristics, history and projected applications to petrochemical, shipping, construction and power transmission industries [SAE PAPER 700284] 12 p2160 A70-27427
CH-54A helicopter gas turbine engine air particle separator /EAPS/ field service in Vietnam, noting time before engine removal for erosion [ASME PAPER 70-GT-97] 18 p3303 A70-36844

CH-113 HELICOPTER
U CH-46 HELICOPTER

CHAFF
Rocket-borne radar chaff wind sensor synoptic application above 65 km, describing low fall velocity 07 p1237 A70-20258
Free atmosphere turbulent diffusion coefficient determination, releasing dipole reflectors from helicopter for radio echo observation 19 p3461 A70-37423
Smoke, chaff and flare distress signals design and operation for search and rescue operations 23 p4143 A70-44494

Glass formation region of chalcogenide semiconductor arsenic triselenide-antimony triselenide system and vitreous-crystalline transformation, investigating electrical and optical properties
 01 p0153 A70-10085

Optical, electrical and structural properties of transition metal dichalcogenides
 05 p0890 A70-15755

Chalcogenide glass based film face threshold switches I-V characteristics, presenting oscillogram and diagrams
 05 p0892 A70-16542

Literature on IV-VI semiconducting Pb compounds PbTe, PbSe, PbS and PbO, discussing PbTe-SnTe and PbSe-SnSe solid solutions
 08 p1555 A70-20584

PbTe-based Sn, Se and Ge alloys lattice constant, thermal EMF and resistance, fusibility and microstructure
 08 p1555 A70-21117

Current-voltage characteristics and lifetime of thin film diodes on chalcogenide glass substrate with symmetrical and asymmetrical electrodes
 09 p1647 A70-22751

Electronic switching effects in amorphous semiconductors emphasizing mass memory for computers based on thin films of chalcogenides
 11 p2017 A70-25524

Superconductive memory type chalcogenide tellurium germanium arsenide, measuring AC magnetic susceptibility and DC electrical resistivity
 23 p4231 A70-44892

CHANCE-VOUGHT MILITARY AIRCRAFT
U MILITARY AIRCRAFT
CHANDRASEKHAR EQUATION
 Solutions of Ambarzumian-chandrasekhar H-equation for radiative transfer
 02 p0340 A70-12661

Nonlinear integral equations for inhomogeneous atmospheres derived from radiative transfer equations global form, noting relations to Ueno and Chandrasekhar equations
 07 p1336 A70-20059

Chandrasekhar polarization upper limit in early type stars noting effects of thermal absorption, wavelengths and effective temperature
 12 p2303 A70-27675

Chandrasekhar H function approximation for isotropic scattering, calculating absorption line contours
 22 p4109 A70-43750

CHANNEL CAPACITY
 Intelsat 4 communication system design and international cooperation, considering satellite design, TV and telephone channels capacity, etc
 01 p0196 A70-10883

Channel constraints on multiple access systems obtained from airborne propagation tests via satellites, studying disparities in received signal strength
 02 p0260 A70-12569

Rate distortion function for class of sources, proving positive and negative sides of Shannon encoding theorem for noisy channels
 02 p0266 A70-12611

Multistop time-to-pulse-height conversion unit to extend capability of pulse height analyzer for multichannel time analysis with narrow channel widths
 02 p0271 A70-12749

Incoherent reception of wideband signals transmitted through multibeam channel with changing random parameters
 05 p0812 A70-16248

Algorithm applied to specific classes of random processes for calculating minimum channel capacity required by transmission system for sources in each class
 06 p1012 A70-18621

Capacity and error bounds derived for nonsynchronized channel, discussing binary coding strategy
 06 p1012 A70-18623

Capacity calculation of N identical discrete memoryless nonsingular channels cascade, discussing dependence on eigenvalues and eigenvectors of subchannel transition matrices
 06 p1013 A70-18628

Digital data transmission over discrete time Gaussian channel with noisy feedback, investigating error-exponent/reliability/and finite SNR
 07 p1235 A70-19362

High attenuation quantum communication channel capacity based on mathematical model
 07 p1335 A70-19864

Millimeter guided wave communication systems information transmission capacity increase, using quaternary and higher order modulation techniques
 08 p1462 A70-21506

Crosstalk in multiple-beam waveguides due to scattering and distortion caused by surface irregularities of focusers, discussing power profile of Gaussian beam
 08 p1462 A70-21507

Digital satellite communication system using multiphase modulation optimized for phase positions number to maximize transmission capacity
 10 p1835 A70-24334

Geostationary orbit capacity based on multichannel telephony, comparing digital and analog modulation techniques
 10 p1836 A70-24343

Communication commercial satellite systems capacity in terms of telephone channels, using frequency modulation and digital methods
 10 p1836 A70-24344

Physical formula for information content in communication signals based on receiver observation concept, noting role of channel properties and encoding
 10 p1844 A70-25223

Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number
 11 p1995 A70-25345

Satellite capacity utilization for mixed earth stations network using SPADE concept/digital satellite communication system employing demand-assignment and voice-activated carrier techniques
 11 p1996 A70-25404

Geostationary satellite communication bandwidth increase by reusing same frequency band in multiple independent earthward beams, discussing modulation and interference noise allocation effects
 11 p1996 A70-25405

Multiple channel communication satellite interference including preamplifier intermodulation, direct interference, multipath amplification, crosstalk and multiplexer reflections considered for capacity maximization
 11 p2002 A70-25483

Meteorological radar station reception equipment for increased radio telemetry channel reliability in complex radio sounding of atmosphere
 11 p2075 A70-25920

Mariner-type spacecraft telemetry system optimization, considering channel capacity
 11 p2008 A70-26239

Pattern recognition with time interval modulation information coding/TIMIC/, considering channel capacity of switching device, similarity with nervous system, etc
 11 p2010 A70-26267

Memoryless input discrete noisy channels essential equivalence to white Gaussian channel for rates above capacity using extreme value theory
 11 p2010 A70-26326

Quantum mechanical communication system with thermal noise disturbance, analyzing reliability function and channel capacity
 14 p2551 A70-31120

Flexible channel multiplier for particle counting with electron conductive polymer composition, discussing secondary electron emission, gain distribution and degradation
 17 p3054 A70-35279

Asymptotic transmitting capacity of continuous channel with intense independent and additive noise
 18 p3228 A70-36598

Pulse ratio modulation analysis based on information theory, emphasizing magnetic tape channel capacity optimal utilization in signal transmission
 20 p3586 A70-39708

Satellite communications system optimal parameters and efficiency dependence on working capacity,

discussing economic aspects of HF sets increased number
 20 p3589 A70-40457

Earth resources technology satellite data link tradeoff between channel capacity and transmitter power
 22 p4038 A70-43091

High speed PCM Codec with maximum 600 channel capacity applied to Time Division Multiple Access (TDMA)/system for satellite communication
 23 p4166 A70-43774

Communication channel modeling with feedback for small error probability compared to unfolding capacity
 24 p4313 A70-46056

Single-error nongroup binary codes with maximum codewords, including quadratic residue, Reed-Muller and tripple-error constructions
 24 p4313 A70-46057

CHANNEL FLOW

Multiple pulsations mechanism during detonation spherical wavefront propagation in channels with various cross sections, noting volume effect
 01 p0060 A70-10135

Two phase flow in cylindrical channel, formulating maximum momentum flow variational principle for laminated adiabatic vapor- and gas-liquid flows
 01 p0213 A70-10216

Dipolar fluid effect on back flow between parallel plates, considering generalized Couette flow
 01 p0062 A70-10545

Viscous fluid flow due to long flat plate moving rectilinearly inside cylinder, assuming zero pressure gradient
 01 p0062 A70-10801

Power output, Joule dissociation and generator efficiency determined for rectangular MHD channel, considering transverse and longitudinal edge effects
 01 p0152 A70-10992

Cavitation initial phase flow model, analyzing flow past stepped obstacle in plane channel
 01 p0064 A70-11002

Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics or fluid jet amplifiers
 01 p0011 A70-11569

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas
 01 p0068 A70-11579

Mixing length relationship in Prandtl theory for turbulent channel and pipe flow, deriving universal velocity distribution law
 02 p0277 A70-11911

Turbulent boundary layer of incompressible fluid flow in axisymmetric channels with swirl at inlet, considering components interaction, velocity, circulation profiles and resistance
 03 p0466 A70-13389

Boundary layer approximation for natural convection in flat vertical symmetrically heated channel with stabilized laminar flow for local and mean Nusselt numbers
 03 p0605 A70-13395

Pulsation frequency affecting boundary layer separation from channel wall in incompressible fluid flow calculated by equation
 03 p0466 A70-13399

Fluid flow visualization in closed channels, using spherules of pulverized fusible materials prepared in swirl injector
 03 p0485 A70-13473

Cavitating flow in converging channels of hydraulic system, calculating energy distribution at gas-vapor phase using Borda-Carnot theorem
 03 p0466 A70-13513

Viscous compressible heat conducting laminar perfect gas flow in slender axisymmetric channels with adiabatic walls, using equations of motion
 03 p0471 A70-14383

Volumetric flow rate of rare gases, hydrogen and deuterium between parallel plates at various pressures and Knudsen numbers
 04 p0665 A70-14414

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection
 04 p0671 A70-15013

Viscous gas self similar channel flow with heat transfer at wall corresponding to fixed Mach number profile in all channel cross sections
 04 p0673 A70-15231

Flow stability of plane channel formed by incompressible viscous fluid injection through porous parallel walls
 04 p0673 A70-15238

Model flow studied for viscous flow near trailing edge of semiinfinite flat plate in middle of moving channel, noting Couette flow tendencies
 05 p0831 A70-15879

Entrance length and pressure drop in MHD parallel plate channel flow using one parameter Pohlhausen method
 05 p0887 A70-15978

- Plane Poiseuille flow stability as function of periodic disturbances of finite amplitude in channel axis direction
05 p0832 A70-16018
- Rarefied H, He, air, carbon dioxide and water vapor flow rates between parallel optically flat glass surfaces measured, giving flow equation describing channel flow
05 p0813 A70-16525
- Steady gravitational waves produced by variable pressure in fluid channel flow assuming small perturbed flow velocity components
05 p0836 A70-16969
- Laminar steady radial flow of simple fluid of short memory between two parallel disks, demonstrating relation to Newtonian fluid
06 p1037 A70-17915
- Velocity profile at entrance of two dimensional channel immersed in rarefied slow moving uniform flow with slip at walls
06 p1052 A70-18384
- Temperature distribution in heated horizontal layer of high Prandtl number silicone fluids at high Rayleigh numbers confined between rigid parallel conducting plates
07 p1418 A70-18647
- Laminar flow of compressible gas in axisymmetrical channel in absence of wall insulation using velocity profiles, heat transfer, etc
07 p1253 A70-19062
- Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall
07 p1420 A70-19066
- Electrical conductivity variations effects in subsonic Hartmann plasma flow under transverse magnetic field in channel with cooled walls
07 p1352 A70-19986
- Laminar radial flow between parallel disks, estimating static wall pressure distribution perturbation caused by characteristic time
08 p1484 A70-21237
- Flow structure in rectangular cavity in lower wall of two dimensional channel for various aspect ratios and Reynolds numbers
08 p1484 A70-21313
- Forced convection heat transfer between two parallel plates analyzed numerically for effect of constant heat transfer coefficient boundary condition
08 p1598 A70-21425
- Laminarization parameter magnitude determination for turbulent boundary layer in convergent channel flow
08 p1484 A70-21518
- Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity
08 p1485 A70-21639
- Transient temperature distribution in flow through channel with arbitrary cross section, taking into account internal heat generation and viscous dissipation
08 p1599 A70-21767
- Heat transfer in MHD channel flow of viscous incompressible rarefied gas with slip flow and temperature jump boundary conditions
08 p1554 A70-21769
- Tensor conductivity, magnetic field and electric field effect on heat transfer in MHD channel flow, solving for temperature and Nusselt number
08 p1554 A70-21773
- MHD flow between two parallel plates, noting pressure gradient and skin friction coefficient
08 p1554 A70-21774
- Turbulent MHD channel flow velocity profiles and hydraulic resistance relations for various Reynolds numbers, using two layer model
09 p1658 A70-22175
- Steady turbulent perfect compressible gas flow in axisymmetrical or plane channel, using equations governing channel height and static pressure variations
09 p1659 A70-22429
- Poiseuille and Couette fluid flow with internal rotation in flat channel
09 p1660 A70-22436
- Macroscopic properties of thermal molecular flow between coaxial cylinders and concentric spheres, using transpiration theory in Knudsen gas
09 p1788 A70-22906
- Vapor bubble separation diameter and flow in channel boiling applied to supercooled boiling zone determination
09 p1789 A70-23379
- Local Nusselt numbers beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid
09 p1790 A70-23554
- Asymmetry and vorticity effects on linear instability of channel flow with one parameter velocities and inflection points, proving wave speed theorem
10 p1862 A70-23951
- Plane steady flows characteristics of incompressible viscous fluids in rigid walled rectangular channels found asymptotic to Poiseuille and Couette flows
10 p1866 A70-24112
- Optimal MHD generator with constant channel area, assuming small Reynolds numbers and ideal inviscid gas with arbitrary electrical conductivity
10 p1807 A70-24570
- Laminar flow into channel with symmetrical jets along walls, considering velocity profiles and flow establishment lengths
10 p1870 A70-24790
- MHD generator with generator channel consisting of two coaxial cylinders with smooth annular space, discussing internal impedance sensitivity
10 p1807 A70-24855
- Laminar flow of compressible gas in axisymmetrical channel in absence of wall insulation using velocity profiles, heat transfer, etc
10 p1871 A70-25213
- Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall
10 p1970 A70-25217
- Flow characteristics of airfoil rotating cascades in variable width channel in incompressible liquid
11 p1975 A70-25789
- Velocity profile and volume flow rate for rarefied gas flowing isothermal parallel plates, solving linearized Boltzmann equation by BGK model
11 p2037 A70-26168
- Plane wave disturbances introduced in turbulent channel flow by vibrating ribbons near each wall, obtaining amplitude and relative phase
11 p2039 A70-26537
- Turbulent three dimensional Poiseuille channel flow at large Reynolds numbers, investigating eddy shapes and energy balance
11 p2041 A70-26546
- Electric arc column properties in channel gas flow, including electric fields distribution of potential and heat conduction function
11 p2092 A70-26729
- Electric arc in cylindrical channel gas flow described by boundary layer equations, assuming equilibrium and quasi-neutral media
11 p2151 A70-26730
- Insulator wall temperature effect on supersonic two temperature MHD generator channel flow at open and short circuit conditions
12 p2163 A70-27067
- Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point
12 p2209 A70-27289
- Sonic surface and Cauchy problem of Monge-Ampere equations in plane unsteady transonic channel flow solved by hodographic analysis
12 p2156 A70-27299
- Transverse flow convective instability spectrum in vertical channel with porous walls, noting Peclet number effects
12 p2333 A70-28199
- Hydrodynamic entrance length in channels and tubes of varying cross section with arbitrary initial velocity profile
12 p2212 A70-28210
- Two dimensional irrotational incompressible fluid motion bounded by flexible stretched and unstretched film, noting hydrodynamic shock for closed film
12 p2213 A70-28238
- River bed channel flow instantaneous velocities described by logarithmic law, determining turbulent energy dissipation
12 p2265 A70-28336
- Electric field in rectangular MHD channel with ideally conducting electrodes in uniform magnetic field, considering conditions for maximum channel effectiveness
13 p2461 A70-28966
- Oscillatory flow in porous channel with suction and injection, using Laplace transform technique
13 p2389 A70-29538
- MHD pressure head variations in Hg flow in square channel with conducting and insulating walls under transverse magnetic field
13 p2465 A70-29838
- Laminar or turbulent flow in parallel plate channels with combined forced convective and radiative heat transfer, determining gas temperature field and Nusselt numbers
14 p2663 A70-30253
- Helical vortex generation in rotating flow in straight tube having angular momentum flux sufficiently large relative to linear momentum flux
14 p2565 A70-30277
- Radiation effects on heat transfer in turbulent channel flow for small optical depths and optically thin limit
14 p2665 A70-30548
- Karman vortex shedding phenomenon for flow rate measurement in channel or pipe
14 p2588 A70-31333
- Uniform electric and magnetic fields effects on flow of conducting compressible fluid in channel, using multiple scales method
15 p2779 A70-31914
- Heat transfer between incompressible fluid flow and insulated walls with time varying temperature at channel inlet, applying Laplace transforms
15 p2827 A70-32175
- Stationary hydrodynamic equations of gas channel and nozzle flow with inlet tangential discontinuities
16 p2833 A70-33247
- Turbulent shear flow asymptotic theory, discussing channel, pipe and two dimensional boundary layers
16 p2895 A70-34244
- Hydrodynamic entry length for laminar flow between parallel porous plates, using finite difference theory for flow equations
17 p3069 A70-34983
- Thermal choking of channel flow by radiative transfer from upstream and application to shock waves generation
17 p3195 A70-35039
- Turbulent gas flows shear turbulence structure at various Reynolds numbers in nonconducting channels with and without heat transfer under transverse magnetic field
17 p3141 A70-35245
- Supersonic electrically conducting gas flow in flat channel with dielectric walls in inhomogeneous magnetic field
17 p3141 A70-35334
- Critical heat flux density during annular channel internal heating, examining transfer crisis under forced motion of unheated water
18 p3345 A70-36111
- Critical height phenomenon for vertical jet exhausting into horizontal parallel plates channel simulating aircraft surfaces
18 p3243 A70-36709
- Boundary layer momentum thickness growth in channels with adverse pressure gradients by stepwise integration of Truckenbrodt equation and extending Gruschwitz-Schmidbauer separation criterion [ASME PAPER 70-GT-12]
18 p3243 A70-36864
- Heat transfer characteristics of flows between high speed rotating disk and parallel stationary shroud, discussing experimental facility and procedures [ASME PAPER 70-GT-20]
18 p3349 A70-36865
- Electrically conducting perfect compressible fluid flow in semiinfinite channel under electromagnetic field, using multiple scales method
19 p3479 A70-37595
- Conducting gas channel and jet flow in electric and magnetic fields, using linearizing equations of motion under assumption of small magnetic Reynolds number
19 p3479 A70-37598
- Unsteady laminar incompressible fluid flow in parallel plate channels and circular tubes, solving Navier-Stokes equations for prescribed discharge
19 p3405 A70-38347
- Liquid He 4.2 K in narrow channels with laminar and turbulent flow, measuring boiling heat transfer as function of temperature difference
20 p3735 A70-39155
- MHD flow in channel of arbitrary cross section, deriving velocity and electric potential distribution by variational principle
20 p3677 A70-39360
- One dimensional channel flow theory for ram wings, deriving lift and drag laws for comparison with wind tunnel and free flight tests results [AIAA PAPER 70-971]
20 p3558 A70-39558
- Flow velocity and pressure profiles due to vortex ring confined in cylindrical channel, using electromagnetic analogy
20 p3609 A70-39651
- Unsteady viscous flow of incompressible fluid through porous straight channel under time varying pressure gradient, determining suction and injection effects
20 p3609 A70-39670
- Divergent channel with porous walls, calculating effect of suction on laminar incompressible boundary layer by Runge-Kutta method
20 p3609 A70-39671
- Insulator wall temperature effect on supersonic nonequilibrium MHD generator channel under open and short circuit conditions
20 p3681 A70-39994
- Large MHD generator channel aerodynamics, discussing pressure distributions to stall and stagnation pressure loss
20 p3612 A70-40002
- Conducting wall MHD generator channel current distribution, examining computer program for anode and cathode currents
20 p3566 A70-40013
- Integral transforms applied to convective heat transfer during nonNewtonian fluid flow with power rheology in pipes and channels
20 p3613 A70-40177
- Compressible plasma axisymmetric channel flow under electromagnetic forces and ohmic heating, noting velocity profiles and current density [AIAA PAPER 70-1098]
20 p3683 A70-40239
- Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point
20 p3613 A70-40339

Longitudinal averaged and pulsating turbulent flow velocities in rectangular channel with one-sided air injection through porous wall

20 p3614 A70-40346

Steady plane conducting gas flow across magnetic field in channel, calculating flow rate effect on current density distribution

20 p3684 A70-40386

Transient and steady state free convection heat transfer with mercury in vertical rectangular channel, measuring temperature distributions

21 p3941 A70-40773

Wall heat transfer for partially ionized argon laminar flow within square channel conducting walls with and without transverse magnetic field

21 p3856 A70-41032

Incompressible MHD flow in entrance region of channel with electrically conducting walls, calculating interacted laminar heat transfer by integral method

21 p3856 A70-41038

Traveling thermal wave induced channel flow, examining velocity profile thermal boundary conditions and shear stress

21 p3948 A70-41247

Heat transfer in laminar channel flow with random velocity variations, using Monte Carlo technique

21 p3949 A70-41312

Unsteady convective heat transfer and hydrodynamics of laminar and turbulent channel flows

21 p3808 A70-41374

Irrational incompressible flow through two dimensional channel with asymmetric contraction

21 p3809 A70-41757

Single phase flow problem in heated vertical prismatic channel, using dimensional analysis from conservation equations with boundary layer approximation

21 p3954 A70-42170

Decelerated channel flow dynamics of ideal gas with supersonic velocity closed by compression shock, using finite difference method

21 p3747 A70-42203

Subsonic channel incompressible gas flow past semiinfinite flat plate base, using flow pattern for cavitation flow

21 p3748 A70-42213

Nonparallel viscous incompressible fluid flows in channel between parallel porous plates with suction and blowing respectively, calculating stability by numerical solution

21 p3811 A70-42216

One dimensional supersonic flow of ideal conducting gas in linear channel under transverse magnetic field

21 p3861 A70-42228

Jeffery-Hamel flows in symmetric divergent channels with small wall curvature, calculating eigenvalues and nonlinear stability limits

22 p4010 A70-42638

MHD channel flow of suspension for prescribed wall heat flux and temperature, determining flow and heat transfer characteristics

22 p4080 A70-42670

Magnetoacoustic waves in MHD channels, investigating excitation, damping and effects on mean current density and Hall field strength

22 p4081 A70-42822

Ionization waves excitation and damping in MHD channels, investigating effects on electric conductivity, Hall parameter and electron temperature

22 p4081 A70-42823

Shock wave damping by perforated walls in gas channel, visualizing curved fronts with 24-spark HF camera

22 p4032 A70-43031

Isentropic gas two dimensional unsteady flow through channel contraction, using hydraulic analogy

22 p4012 A70-43438

Rotational two dimensional steady shear flows of perfect incompressible fluid, considering channel flow characteristics for various wave modes

23 p4181 A70-44202

Heat transfer by laminar forced convection of viscous fluid in noncircular cylindrical channel with internal heat source and varying wall temperature

23 p4276 A70-44236

Channel vs deflection flow in boundary layer theory, considering Navier-Stokes equations

23 p4183 A70-44736

Turbulent nonadiabatic flow of compressible gas at inlet and main sections of variable cross section plane channel

23 p4183 A70-44739

Optimal load circuits number for maximum power extraction from Hall MHD generator with nonuniform gas flow along channel

23 p4143 A70-44900

Compressible plasma flow in axisymmetric channels under EM body forces and Joule heating

23 p4228 A70-44934

Oscillating viscous conducting fluid laminar flow between parallel nonconducting infinite porous flat plates under suction in transverse magnetic field

24 p4383 A70-45146

Velocity profile in viscous sublayer at wall based on maximum stability principle applied to Karman constant for turbulent channel flow

24 p4325 A70-45495

Local or surface boiling phenomenon under triangular channel laminar flow conditions, investigating heat transfer with and without phase change

24 p4429 A70-46089

CHANNELS

Book on communication and information theories application to fading dispersive communication channels, discussing tropospheric scatter, HF ionospheric links, moon bounds, etc

02 p0253 A70-11700

Conduction liquid metal MHD machine channels design with baffles installed to decrease shunting effect of end zones, calculating segments by circuit theory methods

21 p3760 A70-42233

CHANNELS [DATA TRANSMISSION]

Envelope delay and amplitude characteristics measurement of modulated carrier wave channel in radio relay link

02 p0258 A70-12475

Recognition problem in multipositional symmetrical channel solved by special separation of observational space with preference to signal arriving at reception point

03 p0446 A70-13197

Bandwidth reduction for interlacing two voice and three additional teletype subchannels in standard phone frequency range for use in VHF/UHF satellite link

03 p0450 A70-13623

Coherent and incoherent interference effects on direction finding information derivation, using linear two channel principle

03 p0452 A70-14024

Channels demand assignment between earth terminals of international satellite communication systems, examining multiple access problems

03 p0453 A70-14323

Optimal strategies for observation system subject to recognition using data transmission along symmetrical channel

04 p0647 A70-14401

Soviet book on pulse code telemetry systems covering analog-digital conversion, data transmission in communication channels, noise problem, code selection, etc

04 p0648 A70-14953

Transmission channel nonlinearity effect on signal detector performance for signal received by synthesized antenna indicating SNR change

04 p0659 A70-15287

Multichannel ionization calorimeter data readout into electronic computer using short circuit coil magnetic storage

05 p0816 A70-15947

Adaptive frequency selection of optimum channels for radio communication on noninterference basis, discussing implementation and compatibility problems with nonadaptive systems

05 p0814 A70-16347

Binary decoding extension to achieve unquantized demodulation performance for nonfading phase shift keyed coherent channel with white Gaussian noise

06 p1008 A70-17525

Capacity and error bounds derived for nonsynchronized channel, discussing binary coding strategy

06 p1012 A70-18623

Capacity calculation of N identical discrete memoryless nonsingular channels cascade, discussing dependence on eigenvalues and eigenvectors of subchannel transition matrices

06 p1013 A70-18628

Phase and amplitude modulated signals transmission over band limited channel disturbed by additive white Gaussian noise

07 p1237 A70-20195

Communication channel average binary error and stationary Markov chain state probabilities relationship, using mathematical model and HF ionospheric FSK error sequence measurement

08 p1458 A70-20793

Time-frequency correlation function for fading communication channel between transmitter and receiver sites, using AM transmissions as probing signals

08 p1458 A70-20796

Error statistics recording for digital communications channel performance by extreme value technique

08 p1459 A70-20801

Compatible single sideband transmission realized using iterative signal processing method and ideal band limited channels

08 p1464 A70-21781

Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data channel efficiency, etc

09 p1668 A70-22878

Coding and decoding efficiency in data transmission over Gaussian channels, comparing error probability, power, bandwidth and equipment complexity

09 p1637 A70-23320

Optimum coding of information for symmetric channel described by code word transformation probability

09 p1639 A70-23694

PCM-TDMA satellite communication system for maximum time slot utility without guard time slots

10 p1834 A70-24330

TDMA system burst synchronizer with periodic channel slots reallocation feature

10 p1835 A70-24331

SNR and system error rate prediction for coherent nonlinear satellite channels based on bounding techniques

10 p1836 A70-24341

Signaling system for communication satellites demand assignment, considering error control, unit negative acknowledgement, system parameters selection, control signals, etc

10 p1837 A70-24347

Traffic simulation in telephone network via communication satellite with presassigned and demand assigned circuits

10 p1838 A70-24356

FM telemetry channel noise effects on digital and analog accelerometer outputs accuracy, suggesting mean square error reduction methods

10 p1893 A70-25318

Channel separation in RF transponder for communication satellite achieved with RF multiplexers consisting of microwave filters and combiners with superior electrical performance

11 p2016 A70-25457

Fixed information bit rate approach to coding over space channel introducing redundancy and check digits for error probability

11 p2014 A70-26223

High speed sequential decoding machine design and performance test for deep space channels

11 p2014 A70-26245

Switched self balancing comparison radiometer with coupling between channels, showing measurement errors due to coupling correctable by phase switching

11 p2018 A70-26269

Channel assignment, considering low cost solution and co-channel interference

11 p2010 A70-26310

Signal selection for phase coherent and incoherent additive noise channels to maximize receiver correct decision probability

11 p2010 A70-26327

Fourier and Hadamard transformation codings for multidimensional data channel noise immunity and bandwidth reduction

11 p2011 A70-26329

Polarization properties of radar channel with random parameters, relating observation range with transmitting-receiving antennas and target fluctuations

11 p2012 A70-26815

Broadband 2 GHz transhorizon radio relay system design and performance for transmission on four channel pairs

11 p2034 A70-26820

Inclined backscatter sounding of ionosphere in individual channels of multichannel radio link, analyzing data during minimum solar activity

14 p2547 A70-30149

Amplitude-frequency characteristics selection for minimum phase channel allowing for intersymbol interference and smooth noise during data transmission, calculating mean error probability

14 p2547 A70-30150

Microwave channelizing filters input ports interconnection techniques for signals sorting into contiguous frequency bands

14 p2558 A70-31319

Noise rejection and spurious reception probability in optimal channel for continuous sequenced signal with undetermined arrival and overlapping spectra

15 p2696 A70-31509

Digital sampled data demodulation, discussing methods of obtaining quadrature channels from single signal

15 p2703 A70-32579

Multimode and dispersive distortion of short quasinonochromatic pulses in earth-ionosphere VLF channel

16 p2858 A70-32930

Data transmission from information sources over communication channels with limit imposed on attainable reliability, discussing coding theorem of information theory

16 p2871 A70-34259

Asymptotic transmitting capacity of continuous channel with intense independent and additive noise

18 p3228 A70-36598

Lower reliability estimates for block codes of binary channels with feedback noise

18 p3235 A70-36599

Range channel width effect on radar signal digital detector function and parameters optimal value

19 p3380 A70-38068

- Apollo digital Range Safety Command System for signal-crowded communications channels
20 p3605 A70-39497
- Signal modulation by pulse ratio variation in magnetic tape channel, discussing SNR characteristics
20 p3586 A70-39707
- Asynchronous delta modulation channels with RLC integrators in feedback circuit, measuring articulation in presence and absence of noise
20 p3587 A70-40144
- Frequency synchronization channel pulse fluctuations effect on noise stability of binary signal reception
20 p3587 A70-40145
- Fluctuating data transmission, using measurement channel with digital logarithmic conversion
20 p3635 A70-40534
- Satellite communications performance improvement by use of multipath signal for channel models including noncoherent FSK
21 p3787 A70-41329
- Single channel per carrier PCM FDMA demand assignment satellite communication system, discussing digital encoding, quadrature PSK modulation, etc
21 p3791 A70-41367
- Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data, channel efficiency, etc [AIAA PAPER 70-309]
21 p3829 A70-41851
- Optical communication in turbulent media, investigating error rate for binary single path fading channels by photocount detection
21 p3837 A70-41935
- Wideband detection of FSK transmissions in three component two path channel, obtaining channel bit error probability
21 p3792 A70-42176
- Optimal binary and ternary signal system synthesis by information divergence procedure for communication channels with colored Gaussian noise
22 p3985 A70-42491
- Adaptive channel equalization approach leading to adaptive detector for slowly time varying channel
22 p3989 A70-43172
- Binary data transmission via radio channel, discussing phase and frequency modulation and error probability as SNR function
23 p4159 A70-43756
- Multibeam communication channel identification from output signal autocorrelation function analysis
23 p4159 A70-43761
- Polarization properties of radar channel with random parameters, relating observation range with transmitting-receiving antennas and target fluctuations
24 p4311 A70-45187
- Optimal noiseless linear information feedback estimation for additive white Gaussian noise channels, applicable to digital transmission
24 p4313 A70-46064
- Digital PCM telemetry link coding techniques, discussing encoding-decoding complexity, and concatenated block scheme for channel
24 p4315 A70-46258
- CHAPLYGIN EQUATION**
Chaplygin equation algebraic classification with respect to ring admitted by equation, extending results to include lambda function tolerating second order symmetry operators
04 p0613 A70-14412
- Compressible flows with circular sector hodographs, discussing Chaplygin equation for simple wedge flow and theorem on sonic jets
04 p0613 A70-14612
- Chaplygin equation solution for wedge flows applied to Rethy flows, evaluating drag coefficient and approximate hodograph equations for subsonic and transonic regimes
04 p0614 A70-14613
- Chaplygin theorem proof for partial differential equation, using piecewise smooth manifold with unilateral conductivity
08 p1534 A70-21008
- Chaplygin function approximation in subsonic steady gas flow analysis
10 p1909 A70-24293
- Chaplygin approximate hodograph method variants diagrams and tables with numerical values for proper application
13 p2442 A70-29486
- Perfect gas acyclic and cyclic, steady and irrotational motions in subsonic regime around convex profile with constant curvature variation by Chaplygin method
21 p3846 A70-42259
- CHAPMAN SHEAR LAYER**
U SHEAR LAYERS
- CHAPMAN-ENSKOG THEORY**
Chapman-Enskog expansion for Boltzmann equation solution, using PLK method to obtain higher approximations for shock wave structure
01 p0063 A70-10923
- Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities
01 p0068 A70-11568
- Shock structure in binary gas mixture, discussing governing equations and Chapman-Enskog procedure
06 p1051 A70-18344
- Kinetic theory of gas composed of identical particles with discrete velocity distribution, using Chapman-Enskog method
12 p2213 A70-28211
- Enskog theory extended to three particle collisions for gas transport properties
23 p4222 A70-44427
- CHAPMAN-FERRARO PROBLEM**
Charge separation effects in boundary layer between cold streaming plasma and perpendicular magnetic field with relativistic electrons
04 p0727 A70-14997
- Chapman-Ferraro two dimensional problem with neutral sheet, investigating magnetospheric flows and time dependence
04 p0679 A70-15109
- CHAPMAN-JOUGET FLAME**
U CHEMICAL EQUILIBRIUM
U DETONATION
U FLAME PROPAGATION
- CHARACTER RECOGNITION**
Recognition problem in multipositional symmetrical channel solved by special separation of observational space with preference to signal arriving at reception point
03 p0446 A70-13197
- Physical identity and name sameness matchings efficiency noting role of interpolated activity
07 p1203 A70-18942
- Algorithms based on continuous-group pattern recognition, distinguishing human faces, speech and handwritten characters
09 p1640 A70-22143
- Machine design similar to human brain for recognition and classification of information
09 p1641 A70-22708
- Character recognition methods applied to reading machines transforming printed material into forms acceptable to blind
13 p2360 A70-29809
- Optical spatial phase modulator array using membrane light modulator for coherent optical processing and character recognition
16 p2904 A70-33147
- Automatic alphabetic characters classification model based on cross correlation and discrete Walsh-Fourier transforms, using computerized simulation
16 p2851 A70-33460
- Holography, discussing light propagation, basic principles, skew reference wave, diffused illumination interferometry, character recognition, microscopy, high density information storage, etc
19 p3427 A70-38449
- CHARACTERISTIC EQUATIONS**
U EIGENVALUES
U EIGENVECTORS
- CHARACTERISTIC FUNCTIONS**
U EIGENVALUES
U EIGENVECTORS
- CHARACTERISTIC METHOD**
U METHOD OF CHARACTERISTICS
- CHARACTERIZATION**
Ti alloys failure-safe design developing procedures for incorporation of stress-corrosion cracking characterizations into ratio analysis diagram system
08 p1519 A70-21456
- Uniaxial and multiaxial stiffness and property characterization of anisotropic composite materials formed as thin walled cylinders
08 p1529 A70-21880
- Mechanical properties characterization of unidirectional high modulus carbon fiber reinforced epoxy matrix composite
08 p1530 A70-21883
- Pattern recognition involving machine extraction of characteristic features and classification based on associated values, discussing design and decision rules for optimal recognition
13 p2373 A70-29577
- Gradient algorithm for sequential identification of features in dynamic linear systems
13 p2383 A70-29582
- CHARACTERS**
U SYMBOLS
- CHARCOAL**
Breakthrough curve shape prediction during adsorption from gas stream in fixed bed adsorbers for trace contaminant control applied to activated charcoal
04 p0786 A70-15317
- CHARGE CARRIERS**
NT FREE ELECTRONS
NT HOLES [ELECTRON DEFICIENCIES]
NT MAJORITY CARRIERS
NT MINORITY CARRIERS
- Hot photoelectrons in semiconductors assuming short lived photoexcited current carriers, deriving expressions for energy distribution function of semiconductor current carriers
01 p0153 A70-10066
- Frequency dependence of intraband absorption of electromagnetic waves by free current carriers in doped semiconductors
01 p0153 A70-10067
- Dielectric layers electrical conductivity in ceramics containing Ti during aging, observing different characteristics ascribed to nonequilibrium current carriers injection
01 p0156 A70-10221
- Metal-nitride-oxide semiconductor [MNOS]/ FET load devices by changing from enhancement to depletion through polarizing voltage
01 p0051 A70-10785
- Voltage-power sensitivity, response time, frequency limit and minimum registered power of hot carrier thermoelectric detectors calculated from characteristic semiconductor parameters
03 p0540 A70-13436
- Magnetic field effect on recombination radiation intensity under pinch effect in semiconductor non-degenerate electron hole plasma with recombination time exceeding carrier lifetime
03 p0540 A70-13508
- Onset conditions for galvanothermal current instability of Ge semiconductors as function of electric field oscillations, carrier concentration and carrier-lattice temperature
03 p0541 A70-13724
- Optical inhomogeneity of GaAs associated with current carrier distribution analyzed quantitatively using magneto-optical Faraday effect and transmittance method
03 p0541 A70-13726
- Competition mechanism for free carriers in junction isolated transistor collector suggested by current dependence of photocurrent
04 p0657 A70-14732
- Heat transmission by current carriers to cryogenic region, ascribing heat flux to Joule effect in conductor
05 p0881 A70-16025
- Energy losses in conductors carrying intense currents to cryogenic regions linked with heat transfer due to high temperature gradients
05 p0881 A70-16026
- Charge carriers recombination and diffusion coefficients for confined gas discharge plasma obtained from data on radial particle distribution profile
05 p0888 A70-16330
- Vacuum deposited thin cadmium sulfide films semiconducting properties, discussing captured free carriers effects on temperature dependence of dark and photo current
05 p0893 A70-16543
- Cascade capture of carriers in semiconductors with negatively charged dislocation explained by diffusion-type equation
06 p1126 A70-17818
- Pulse indicators using thermoelectric effect of hot carriers caused by nonuniform heating of electron gas in HF field
09 p1643 A70-22127
- Semiconductor injection laser, analyzing light absorption by free carriers and gain characteristics
09 p1694 A70-22133
- Carrier recovery circuits synchronization for PSK demodulators used in TDMA satellite communication
10 p1835 A70-24338
- Thermoelectric power and Hall effect quantum resonances in pressure annealed pyrolytic graphite crystals for carrier locations evidence
11 p2097 A70-25616
- Microwave conductance tensor in crystals with non-parabolic carrier energy dissipation under crossed constant electric and magnetic fields
12 p2288 A70-28326
- Electromagnetic waves propagation in semiconductors, allowing for nonlinear effects from field heating of carriers
13 p2469 A70-28877
- Hysteresis in MOS transistors attributed to trapped charge carriers on oxide near silicon oxide interface
14 p2555 A70-30338
- Container wall-collision plasma sheath model for charge carrier investigation using velocity distribution [DFVLR-SONDDR-51]
14 p2622 A70-30662
- CDs high field domain modes generation for C parallel to E ascribed to interaction between drift carriers and off-axis shear wave
15 p2784 A70-31984
- Nonequilibrium charge carriers transient accumulation in p-i-n diode at superhigh injection levels
15 p2714 A70-32908
- Kinetic equation in strong electric fields, describing current carrier behavior in semiconductors
19 p3483 A70-37293
- Stationary DC discharge positive column in helium, determining production balance and loss of charge carriers
19 p3476 A70-37560
- Carrier diffusion effect in large signal analysis of semiconductor avalanches in quasi-static approximation
19 p3387 A70-37768
- Current carrier mobility under dynamic regime in p-n junctions by computerized method, emphasizing transitory phase
19 p3487 A70-38169

High purity surface-free GaAs epitaxial layer carrier lifetime measurement by optical transmission and excitation technique

22 p4086 A70-43017

Coherent reference for demodulating double sideband suppressed carrier (DSB-SC) signals in presence of frequency detuning, using squaring or Costas loop

22 p3990 A70-43326

Frequency multipliers with charge controlled junction diode model, predicting operational behavior

22 p3998 A70-43421

Spectral and threshold emission from optically pumped semiconductor lasers as function of carrier type and concentration in GaAs single crystals

23 p4203 A70-45069

Czochralski thermal probe for current carrier concentration in strip shaped area of n-type GaAs single crystals active growth

24 p4389 A70-45481

CHARGE DISTRIBUTION

Thunderstorm lightning discharge formation mechanism, investigating electric charge concentration and motion of free electrons

01 p0134 A70-10169

Potential distribution outside ideally reflecting charged sphere immersed in resting plasma described by nonlinear integral equation, allowing for polarization

08 p1432 A70-21090

Electrostatic energy converter load current analysis, deriving expression for space charge electric field with axially varying or constant charge distribution

10 p1808 A70-25036

Junction FET potential field and carrier distribution in channel investigated for current saturation mechanism

15 p2708 A70-31841

Alloy junction transistors with emitter larger than collector, analyzing minority carrier distribution in base region and effect on current amplification

15 p2714 A70-32703

Nonequilibrium charge carriers transient accumulation in p-i-n diode at superhigh injection levels

15 p2714 A70-32908

Supersonic plasma flows charge density levels and spatial and temporal variation, discussing theory and use of electrostatic probes

16 p2912 A70-33862

Thin long dipole antenna, determining input admittances, current and charge distributions and field patterns by Wiener Hopf technique

17 p3051 A70-35060

Charge spectrum of heavy relativistic cosmic ray nuclei, using tracks from balloon-borne photographic emulsions

18 p3308 A70-36781

CHARGE EXCHANGE

NT RESONANCE CHARGE EXCHANGE

Ion production cross sections determined for alkali atoms and bromine molecules collisions, noting charge transfer

07 p1345 A70-20138

Charge exchange and electron loss measurements in steam target exposed to high energy hydrogen ions beam, using equilibrium fractions method

07 p1345 A70-20142

Electric field effects on electrification of colliding ice spheres, discussing relaxation time of sphere charges and charge exchange

08 p1538 A70-21114

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions

08 p1549 A70-21817

Charge exchange cross section of hydrogen position ion-negative ion collisions

09 p1733 A70-23269

Charge exchange probability in proton-hydrogen atom collisions computed with two state atomic orbital expansion

09 p1733 A70-23270

Ion mobility estimates for air constituents, considering ion-neutral elastic and resonant charge exchange collisions

10 p1919 A70-24427

Optical charge exchange and thermal stimulation effects in Fe doped GaAs crystals, determining iron content role by EPR method

13 p2469 A70-28880

Passive corpuscular diagnostics of high temperature plasma based on charge exchange neutrals, calibrating stripping chamber

20 p3685 A70-40398

Electron exchange coupling of Gd and Gd-Y alloy dihydrides from ESR indicating negative hydrogen ion entry

21 p3862 A70-41703

Charge separated and quasi-neutral solutions of electron heat transfer to spherical body in quiescent nonequilibrium plasma, noting diagnostic applications

21 p3860 A70-42080

CHARGE SEPARATION

U POLARIZATION [CHARGE SEPARATION]

CHARGE TRANSFER

Dissociative charge-transfer reactions of positive He ions with molecular N and O measured in drift tube-mass spectrometer

06 p1109 A70-17490

Plasma charge transfer in unstable beam plasma in magnetic fields system allowing for electron discharge pump operation

09 p1737 A70-23334

Charge transfer reactions of negative ions with oxygen investigated for energy dependence, yielding evidence on oxygen electron affinity

10 p1919 A70-24402

Avalanche diodes in presence of microwave instabilities related to field emission and charge transfer across depleted zone, discussing positive and negative resistance

10 p1850 A70-24621

Charge, hydrogen atom and ion transfer in collisions involving deuterium-labeled methanol- acetaldehyde system and molecular ions

14 p2543 A70-30110

Hydrogen oxygen fuel cells, demonstrating matching of power source and load, charge transfer, porosity, Nernst equation and electrochemical water synthesis

14 p2533 A70-30533

Optical charge transfer transitions in N-alkyl iodide salts, examining transient absorptions due to flash photolysis

18 p3226 A70-36765

He/plus-/H/minus/ collisional charge exchange cross sections, using modulated inclined ion beams technique

21 p3852 A70-40599

Turbulent charge diffusion during unipolar injection in nitrobenzene between plane-parallel electrodes, discussing liquid motion at high voltages

22 p4080 A70-42719

Charge transfer of protons at electron capture in excited states, using proton beam and various target gases

23 p4221 A70-44209

CHARGED PARTICLES

NT ALPHA PARTICLES

NT ANIONS

NT ARTIFICIAL RADIATION BELTS

NT PHOTOELECTRONS

NT PI-ELECTRONS

NT POSITRONS

NT PROTON BELTS

NT PROTONS

NT RADIATION BELTS

NT SOLAR PROTONS

NT STELLAR WINDS

NT TRITONS

Density distributions of electrically charged trace components in axisymmetric jets, considering space charge effect and ambipolar diffusion

01 p0066 A70-11135

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum

01 p0172 A70-11509

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes

01 p0172 A70-11545

Polar ionic exosphere electric field polarization, considering positive and negative charges escape fluxes, electric potential, mean ion velocity, etc

02 p0289 A70-12108

Charged particle self resonant motion in field of plane electromagnetic wave, showing trapped particles existence in whistlers

02 p0256 A70-12116

Adiabatic invariance of action integral for motion in nonregular fields, explaining charged particles motion through magnetic shock front in interplanetary space

02 p0359 A70-12788

Charged aerosol charge/mass ratio measurement and colloidal propulsion system thrust, efficiency and exhaust velocity determinations

03 p0551 A70-12936

Charged particles distribution according to multiplicity during pion-nucleon and nucleon-nucleon interactions at high energies

03 p0555 A70-13033

Neutrinos line patterns in Muscovite mica, refuting Russell assumption by analysis of multiple Coulomb scattering of charged particles and track comparison

03 p0556 A70-13047

Charged particles motion in isotropic weakly ionized plasma acoustic wave associated with difference in electrons and ions entrainment by neutral particles

03 p0530 A70-13087

Charged particle distribution in heterogeneous medium using dispersion model to describe quasi-charged particles interaction with internal surfaces

03 p0536 A70-14370

Whistler mode instability due to anisotropic charged particle velocity distribution, establishing general onset conditions for variable density cold plasma containing hot electrons

03 p0537 A70-14378

Circularly polarized synchrotron radiation from distribution of electrically charged particle in magnetic dipole calculated for estimating Jupiter magnetic field

04 p0746 A70-14511

Charged primary cosmic rays sidereal anisotropy generated diurnal/semi-diurnal variations phase characteristics, using energy meson telescopes

04 p0738 A70-14513

High energy dopant ion implants into silicon, discussing implantation profiles and electrical conductivity for use in type conversion and electrical junctions

04 p0730 A70-14727

Optimal outlet velocities of charged particles for spacecraft electrostatic thrusters [DFVLR-SONDDR-28]

04 p0735 A70-15173

Formula for energy radiated from particles system applied to electromagnetic and gravitational radiation and illustrated by charged particle motion in magnetic field

05 p0882 A70-16309

Charged particle concentration emitted by inhomogeneous plasma determinable from emission spectral lines broadening, suggesting error correction procedure

05 p0889 A70-16541

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field

05 p0903 A70-16726

Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity

05 p0915 A70-16754

Horizontal electric fields relations to charged particle fluxes in polar auroral ionosphere

05 p0842 A70-16756

Charged particles motion in field of whistler mode wave packet, discussing trajectories

06 p1118 A70-17377

Relativity theory and quantum mechanics relation concerning point charge velocity and motion at light speed, deriving elementary particle mass formula

06 p1106 A70-17833

Individual extensive air showers axes localized by measurement of charged particle densities, assuming age parameter

07 p1365 A70-18777

Electromagnetic acceleration and energy losses of charged chromospheric-coronal plasma electrons and protons in unsteady magnetic fields of sunspots

07 p1384 A70-19417

Charged particle replacement by external plasma particles in ionized inhomogeneities moving in ionosphere, considering magnetic field role

07 p1266 A70-19435

Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite

07 p1367 A70-19490

Diener kinetic theory for charged particles in EM field with Coulomb interactions taking into account transverse plasma waves

08 p1550 A70-20616

Magnetosphere model for quasi-circular precipitation zones of energetic particles based on geomagnetic activity distribution patterns

08 p1489 A70-21385

Iron peak nuclei synthesis by charged particles under supernova mechanism conditions predicted by hydrodynamic conditions

09 p1749 A70-21994

Excitation cross sections for bound-bound transitions in optical levels in hydrogenlike atoms induced by fast charged particles

09 p1730 A70-22230

Charged particle interaction influence on photoionization cross section of negative hydrogen ion, considering initial state polarization leading to free s wave electron

09 p1732 A70-22826

Charged particle self oscillatory motion in plane condenser field, applying results to electrical measuring instruments theory

09 p1680 A70-23144

- Optimal outlet velocities of charged particles for spacecraft electrostatic thrusters 09 p1744 A70-23428
- Charged particle albedo latitude dependence estimated from balloon-borne Geiger telescopes 09 p1746 A70-23481
- Charged particles velocity profile across shock determined by induction velometry, considering eddy currents effects on induced potential gradient 09 p1738 A70-23677
- Spectrometer design for Helios solar probe using semiconductor detectors to identify particles separated by magnetic field 10 p1888 A70-24487
- Rotating plasma in nonuniform magnetic field analyzed for interchange instability based on MHD fluid and charged particle treatments 10 p1924 A70-24800
- Electrohydrodynamics of charged water drop pairs disintegration in electric field concerning warm cloud electrification 10 p1912 A70-24806
- Ionospheric reaction rate coefficients based on electron concentration curves, discussing maximum number and accuracy obtainable 11 p2043 A70-25538
- Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model 11 p2104 A70-25546
- Energy deposition in cells by charged particles during ionizing radiation exposure, discussing RBE (relative biological effectiveness/ and dose-effect relation for neutrons 11 p1989 A70-26597
- Adiabatic drawing of quasi-captured charged particles by geomagnetic trap field during phase recovery period of magnetic storm 12 p2295 A70-28258
- Plasma turbulence in Van Allen belts, examining weak turbulent electromagnetic wave properties, with emphasis on trapped energetic particles radiation 13 p2486 A70-28555
- Energy spectrum and equatorial pitch angle distribution of charged particles trapped in magnetosphere resulting from inward diffusion due to third adiabatic invariant violation 13 p2476 A70-28942
- Electric field sense and magnitude determination from lunar particle shadows in solar electron fluxes 13 p2492 A70-29196
- Witness particle electric field as function of non-linear conductivity of weekly turbulent anisotropic plasma by perturbation method 13 p2465 A70-29638
- Serra de Mage meteorite impact history from charge particle track analysis, noting feldspar content 13 p2497 A70-29854
- Magnetospheric convection models and effects on charged particle populations 13 p2402 A70-30064
- Energetic particles measurements in geomagnetic tail by Explorer 33/35 for determining gross magnetic topology of distant tail and electric fields 13 p2481 A70-30070
- Magnetospheric charged particle distributions in plasma sheet, pseudo- and stable-trapping regions by satellite observation 13 p2483 A70-30088
- Low energy charged particle distribution within earth magnetosphere and environs, suggesting solar origin for storm time ring current protons 13 p2483 A70-30089
- Book on space physics covering charged particles in magnetic, electric and dipole fields, cosmic rays, magnetically trapped radiation and interplanetary plasma 14 p2633 A70-30099
- Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations 14 p2630 A70-30220
- Primary cosmic rays balloon-borne charge composition detector in 3-30 Z range 14 p2587 A70-31002
- Hall, polarization and Pedersen charged particle drift velocities in static magnetic and time dependent electric field 14 p2624 A70-31046
- Charged particles focusing and sorting in bispiral systems, deriving differential equations for relativistic trajectories 15 p2707 A70-31520
- Rocket and satellite data on upper atmospheric neutral/charged particles, short wave solar radiation, temperature and photochemical reactions 15 p2730 A70-32089
- Radial distributions and escape of charged particles across magnetic field in hot cathode Penning discharge plasma with LF oscillations 15 p2780 A70-32191
- Electrostatic analyzer without fringe field effects for measuring low energy particles on spacecraft 15 p2740 A70-32432
- Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite 15 p2795 A70-32735
- Book on electrical aspects of combustion processes covering formation, behavior in fields, diagnostics, uses of ions, electrons and charged particles, flame ionization, etc 16 p2996 A70-33030
- Gravitational instability and collapse of thin spherical shell of charged fluid, using energy conservation law 16 p2952 A70-33787
- Miniature multigrad probes for measuring energy spectra of charged particles and absolute plasma densities, comparing results to microwave measurements 18 p3294 A70-36150
- Elongation characteristics of modulation type charged particle traps and analyzers, discussing ions and electrons trapping 18 p3307 A70-36171
- Charge source density during interaction between atmosphere and electron/proton fluxes at prescribed boundary parameters 18 p3307 A70-36178
- Near earth motion equations for electrically charged dust particles in gravitating dipole magnetic fields, using zero-relative-velocity surfaces and energy integral 18 p3315 A70-36606
- Charged particle replacement by external plasma particles in ionized inhomogeneities moving in ionosphere, considering magnetic field role 18 p3249 A70-36909
- Ion composition and charged particle vertical distribution in F region and protonosphere from satellite and ground based observations 18 p3254 A70-37028
- Charged particle balance equations for stratosphere and mesosphere, noting particle composition investigation and formation and annihilation processes 19 p3491 A70-37311
- Solar energetic charged particles interaction with earth bow shock and magnetopause 19 p3494 A70-37482
- Solar particle observations over polar caps, considering spatial and angular distribution measurements 19 p3494 A70-37484
- High energy charged particle observations on OSO 3 at various rigidities 19 p3505 A70-38117
- Primary cosmic radiation singly charged component energy spectra by balloon-borne Cerenkov scintillation counter telescope 19 p3506 A70-38120
- Traversed matter thickness and charge composition for high energy galactic cosmic rays with various propagation modes 19 p3506 A70-38123
- Cosmic ray nuclei charge composition of elements Ne to Ni, using emulsion stacks exposure in balloon flights 19 p3506 A70-38126
- Low energy galactic cosmic radiation energy spectra and charge composition in 2-14 Z range by OGO-5, suggesting two component model for origin 19 p3507 A70-38127
- Charge spectrum of high and low energy heavy cosmic ray nuclei, using balloon-borne nuclear emulsions 19 p3507 A70-38130
- Primary cosmic rays above 4.5 GV, measuring charge composition from balloon flight 19 p3507 A70-38133
- Cosmic ray heavy nuclei charge composition from satellite-borne emulsion stacks exposure 19 p3507 A70-38134
- Highly charged cosmic ray heavy nuclei primaries, examining charge spectra and solar elements abundances 19 p3508 A70-38136
- Super heavy cosmic ray nuclei charge composition and track identification, using LEXAN polycarbonate, cellulose triacetate (CTA) and nuclear emulsion 19 p3508 A70-38137
- Very heavy primary cosmic ray particles propagation calculation, using fragmentation parameters 19 p3508 A70-38139
- High energy charged particles equations of motion in quiet interplanetary magnetic field for primary cosmic ray distribution, calculating diurnal and semidiurnal variations 20 p3698 A70-39297
- High transmission device for quark detection in primary cosmic rays 20 p3629 A70-39315
- Charged particle interaction with fluctuation fields in nonequilibrium magnetoactive plasma 20 p3678 A70-39596
- Charged particle collisions, discussing electron impact ionization of positive ions, detachment from negative ions, ion collisions, etc 20 p3676 A70-40154
- Spontaneous and induced Cerenkov emission by charged particle in turbulent medium, discussing random fluctuations effect on radiation spectra 21 p3879 A70-40928
- Energy losses frequency distributions for fast charged particles in small pathlengths in equimolar He-carbon dioxide mixture 21 p3852 A70-40973
- Ionospheric reaction rate coefficients based on electron concentration curves, discussing maximum number and accuracy obtainable 21 p3819 A70-41288
- Charged particle motion in steady and perturbed dipole fields using laboratory earth magnetosphere plasma model 21 p3882 A70-41296
- Laser light scattering in plasma for charged particle correlation function 23 p4225 A70-44187
- Transition radiation due to charged particle moving in periodically stratified cold isotropic plasma 24 p4384 A70-45254
- Plasma with oriented charged particle fluxes macroscopic parameter measurement by multigrad probes facing and reversed to drift, noting graphical data processing 24 p4385 A70-45454
- Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations 24 p4399 A70-46295
- CHARPY IMPACT TEST**
- Charpy V notch and dynamic tear tests compared for fracture toughness characterization of Ni-Cr-Mo-V steel 14 p2596 A70-30931
- Impact loaded Griffith-Irwin, Charpy and drop weight tear tests of fracture toughness for design, screening and materials acceptance 15 p2819 A70-32233
- Strength and thickness effects on energy absorption criteria for transition temperatures in Charpy V-notch impact tests 15 p2819 A70-32234
- Charpy impact test evaluation on hot rolled metal plates for low temperature welded structures 15 p2819 A70-32235
- Charpy impact test accuracy for model machine certification, discussing erroneously high test values 15 p2820 A70-32236
- Dynamic fracture toughness measurement of low strength steels via instrumented Charpy impact test with correction factor for inertia loading effects 15 p2820 A70-32237
- Precrack Charpy slow rate straining sensitivity of high strength steel at increased temperatures, comparing fracture energy of impact tests 15 p2758 A70-32328
- Instrumented Charpy impact test evaluating strain rate, alloying and irradiation effects on ductile-brittle transition temperature and fracture of pressure vessel steels 15 p2820 A70-32239
- Plane strain stress intensity factor-Charpy V notch impact test correlations in transition temperature range under slow bend and dynamic loading 15 p2759 A70-32244
- Fracture behavior and tempered martensite embrittlement relationship in steel, using V-notched and fatigue precracked Charpy specimens 22 p4054 A70-42736
- Full-swing and incremental Charpy impact and Izod tests for ceramic intrinsic impact strength 23 p4209 A70-43872
- CHARRING**
- Nonsteady thermal decomposition of plastics subjected to large heat flows, introducing equations governing char layers and pyrolysis zones 02 p0397 A70-12021
- Ablation chars, carbon and graphite spectral emittance and reflectance as function of wavelength and temperature, noting applications to atmospheric entry heat shielding 04 p0787 A70-15590
- Thermal conductivity determination for charring materials by dynamic technique, with application to carbon, graphite and silica cloth phenolics 11 p2068 A70-25766
- Charring ablative plastic thermal properties simultaneous measurement using modified heat transfer model and nonlinear regression analysis 12 p2333 A70-28111
- Gas phase chemical reactions effects on heat transfer to charring ablator, deriving numerical solution for multicomponent stagnation point flow [AIAA PAPER 70-869] 16 p2999 A70-33912
- Charring ablators transient heat transfer model, calculating surface temperature and recession and pyrolysis mass loss [AIAA PAPER 70-1143] 20 p3738 A70-40280
- Charring ablative composites pyrolysis products composition determination, comparing chemical analysis techniques 23 p4158 A70-44519

- NT GRAPHS [CHARTS]
 NT METEOROLOGICAL CHARTS
 NT PATTERSON MAP
 Orbital charts development for space navigation, discussing cartography and orbital navigation
 01 p0138 A70-11251
 Secular variations distribution on earth surface, plotting isopore charts from mean annual values of magnetic elements [1960-1965]
 01 p0083 A70-11540
 Statistical control charts for evaluating instrumentation performance during ordnance devices testing, discussing evolution, interpretation and application
 03 p0494 A70-14126
 Variables control charts based on sample means for determining in-control probability properties
 09 p1691 A70-22575
 Refractive index chart for scattered electromagnetic fields from sphere, evaluating modal coefficient for lossy materials
 09 p1633 A70-22697
 Area navigation system charting, discussing effect on flight information publications
 19 p3465 A70-38231
- CHEBYSHEV APPROXIMATION**
 Transverse nonrecursive digital filters for Hilbert transformation, investigating ideal quadrature filters with Chebyshev approximation errors
 05 p0822 A70-16772
 Chebyshev quadrature formula weighting functions, presenting accuracy estimation method
 07 p1321 A70-18659
 Mathematical programming and conditional extremum problems solution in analytic functions based on Chebyshev function systems and Stieltjes moments
 08 p1534 A70-21451
 Mixed system of simultaneous linear differential equations under general boundary conditions, deriving numerical solution in Chebyshev series
 09 p1711 A70-22288
 Stress concentration analysis using Chebyshev polynomial curve fitting
 09 p1784 A70-23450
 Axisymmetric or two dimensional incompressible laminar boundary layer flow field numerical analysis using quasi-linearization and Chebyshev series
 11 p2072 A70-25965
 Optimum low thrust ion propelled interplanetary trajectory design using two step Chebyshev method
 17 p3167 A70-35232
 Chebyshev method for Banach spaces, discussing location theorem for reducing error bounds
 18 p3282 A70-36359
 Soviet book on numerical methods of Chebyshev approximation covering minimax problems, computer methods, linear programming, etc
 19 p3456 A70-37232
 Consistent dependence of best rational Chebyshev L_p approximator on given function
 23 p4210 A70-44025
 Algorithm for moment problems in Chebyshev system with applications to numerical integration, series summation and function approximation
 23 p4211 A70-44244
 Algorithm for Chebyshev solution of a plus 1 inconsistent linear equations in n unknowns, using minimax technique
 24 p4370 A70-46241
- CHECKOUT**
 Turbine engine checkout techniques, describing oil, sonic-vibration, X ray, gas path and hot section analysis methods
 [AIAA PAPER 69-581] 02 p0356 A70-12526
 Control program debugging for experimental automatic surveillance and tracking radar, noting use for on-line systems
 04 p0654 A70-15449
 Onboard and ground checkout systems for space station and space shuttle operations
 [AIAA PAPER 70-245] 07 p1251 A70-20373
 Aerospace digital computers automatic checkout, considering computers functional and mechanical properties and test equipment configuration and operation
 08 p1469 A70-20653
 Aircraft maintenance, discussing trend toward increased use of quantified methods, failures reclassification, control techniques and check frequencies
 09 p1693 A70-23371
 Tolerance limits for equipment periodic field checkout, considering performance failure effects on system accuracy, costs and availability
 [AIAA PAPER 70-394] 10 p1896 A70-24911
 Automatic Malfunction Analysis /AMA/ digital computer software system supporting checkout and testing, defining normal system status by computer simulation
 [AIAA PAPER 70-383] 10 p1861 A70-24922
 Apollo Applications Program command and service module test requirements to achieve reliable hardware for extended missions
 [AIAA PAPER 70-378] 10 p1952 A70-24925
 Common high order programming language and program debugging in aerospace software
 16 p2868 A70-33430
 Apollo telescope mount postmanufacturing checkout under simulated mission environment, ensuring flight readiness
 16 p2889 A70-33723
 Airline pitot and static altimeter systems and undercarriage maintenance and checkup, discussing water in systems, case leaks, trash, dirt, inoperative heaters, etc
 16 p2842 A70-33823
 Systems operation hybrid simulator for computer checkout of Saturn S-IC stage
 17 p3061 A70-35489
 Electromagnetic, mechanical and chemical methods for automatic checkout of nonelectronic aerospace propulsion systems
 17 p3095 A70-35525
 Test selecting and sequencing for adaptive checkout processes, determining malfunctions
 20 p3659 A70-40106
 Low cost and weight reliable microminiaturized IC automatic cockpit checklist systems for aircraft pilots
 22 p3977 A70-42298
- CHECKOUT EQUIPMENT**
U TEST EQUIPMENT
CHELATE COMPOUNDS
U CHELATES
CHELATES
 Low threshold laser action of Nd-containing chelate in host media consisting of polymethyl methacrylate and organic liquid
 23 p4201 A70-44869
- CHEMICAL ANALYSIS**
NT ELECTROPHOTOMETRY
NT GAS ANALYSIS
NT GAS SPECTROSCOPY
NT MICROANALYSIS
NT NEUTRON ACTIVATION ANALYSIS
NT OZONOMETRY
NT POTENTIOMETRIC ANALYSIS
NT QUANTITATIVE ANALYSIS
NT SPECTROSCOPIC ANALYSIS
NT URINALYSIS
NT VOLUMETRIC ANALYSIS
 Petrological, X ray and chemical analyses of Muz-zaffarpur Ni-rich ataxite, showing kamacite, taenite and minor schreibersite composition
 01 p0177 A70-10328
 Secondary halo in spark source mass spectrography, determining corrections
 02 p0298 A70-12211
 Isolation and structural characterization of adduct formed from propionaldehyde, sym-trinitrobenzene and triethylamine
 02 p0251 A70-12275
 Steranes and triterpanes identification from Green River shale by capillary gas liquid chromatography and mass spectrometry
 02 p0252 A70-12514
 Collection of Soviet papers on chemical properties and analytical methods of refractory compounds
 03 p0504 A70-12977
 Complexonometric analysis of alloys containing Mo without component separation, treating molybdenum aluminides, zirconium boride-molybdenum silicide, molybdenum carbide in Ti, etc
 03 p0504 A70-12980
 Mo separation from W during chemical analysis of W in binary Mo-W alloys, using organic reagents for precipitation and extraction
 03 p0504 A70-12982
 Phase content determination in borides and borocarbides mixtures based on compounds different chemical stabilities during hydrolysis and reaction with acids
 03 p0514 A70-12984
 Chemical analysis of Australasian tektites inferring extraterrestrial igneous origin, noting similarity to preimpact parent rock
 05 p0916 A70-16832
 Microtektites chemical analysis data providing appraisal of strewn field boundaries, implying lunar origin
 05 p0916 A70-16835
 Platelet aggregation in whole blood, basing measurement method on filtration pressure with added adenosine diphosphate /ADP/
 07 p1210 A70-19591
 Gas-liquid chromatographic separation applied in derivatization chemistry of protein amino acids as N-trimethylsilyl /TMS/ esters
 09 p1629 A70-22337
 Solar system objects /earth, moon, planets, meteorites, etc/ chemical composition data and analysis techniques
 10 p1942 A70-24609
 Lunar and planetary surface chemical composition analysis using neutron inelastic scattering as optimum for unmanned missions
 10 p1942 A70-24613
 High energy neutron activation method for remote extraterrestrial in situ rock surface constituents analysis
 10 p1932 A70-24614
- Recovered extraterrestrial material, considering activation analysis, mass spectroscopy, emission spectroscopy, flame photometry, etc
 10 p1942 A70-24615
 Raman and IR spectrum analysis of polywater indicating impurities role in anomalous properties
 11 p1994 A70-25655
 Thermal Analysis - Conference Worcester, Mass., August 1968, Volume 1, Instrumentation, organic materials and polymers
 11 p2069 A70-25801
 Disproportionation to combination ratio of hydrazyl radicals generated in absence of hydrazine direct decomposition
 14 p2544 A70-30120
 Radio astronomical observations of lunar surface material EM properties compared with Surveyor 7 chemical analysis
 14 p2645 A70-31059
 Mobile geochemical laboratory for in situ radiation measurement and elemental analyses in lunar exploration
 15 p2717 A70-31801
 Semiremote laser Raman spectroscopy application in pipes, reactors, hot cells, jet and rocket engines and air pollution studies, discussing LIDAR model for chemical analysis
 16 p2926 A70-33161
 Radioisotopic and complementary surface chemical analysis of coupling agent films on glass surfaces
 16 p2917 A70-33375
 Assay procedures for extraction and determination of N-acetylglucosamine in soil
 18 p3226 A70-36959
 Chemical analysis methods for Apollo 11 lunar rocks, discussing calibration standards, spectral lines and Apollo 12 data
 21 p3777 A70-41610
 Apollo 11 crystalline rocks chemical analysis by argon 40/argon 39 dating techniques
 21 p3778 A70-41613
 Amino acids analysis of Apollo 11 lunar fines by hydrolysis of aqueous extracts
 21 p3778 A70-41623
 Apollo 11 lunar fines chemical analysis for alkanes of 15-30 carbon atom length, obtaining negative results
 21 p3779 A70-41630
 Apollo 11 fines and rocks analysis by chromatography, mass spectrometry and light and scanning electron microscopy
 21 p3779 A70-41631
 Lunar carbonaceous, organic and organogenic materials analysis by mass spectroscopy, gas chromatography and various other methods
 21 p3780 A70-41633
- CHEMICAL ATTACK**
NT INTERGRANULAR CORROSION
 Hot corrosion reactions in Ni, Co and NiAl-base alloys exposed to salt-sulfur containing simulated gas turbine combustion atmospheres
 01 p0118 A70-10728
 Atomic oxygen and chlorine attack on refractory materials studied for kinetics of chemical reactions of free radicals and atoms
 07 p1313 A70-19903
 Corrosion shapes from iodine action on metals in methylic medium, discussing morphology dependence on purity, surface state and reaction products diffusion velocity
 08 p1518 A70-21241
 Zr and stainless steel pitting in acidic and near neutral chloride media, comparing controlled potential and conventional chemical corrosion tests results
 09 p1706 A70-22939
 Chemically active surface decomposition in dissociated gas flow with turbulent boundary layer, determining diffusion fluxes in laminar sublayer
 20 p3612 A70-39812
- CHEMICAL AUXILIARY POWER UNITS**
 Fuel cell development, discussing consumable electrode, hydrogen/oxygen, hydrazine/hydrogen superoxide, hydrazine/air and methanol/air cells
 19 p3359 A70-38497
- CHEMICAL BONDS**
NT HYDROGEN BONDS
 Tungsten metal oxidation retardation by W-F bonds
 02 p0249 A70-11651
 Hydroxy fatty acid methyl esters gas chromatography and mass spectrometry, noting trimethylsilylation usefulness for locating double bond
 02 p0252 A70-12515
 Chemically coupled glass-reinforced polypropylene, studying short term physical properties, creep rupture and deformation, dynamic failure, etc
 02 p0322 A70-12605
 Bimolecular transfer reactions activation energies for multivalent gaseous compounds estimated by bond energy method avoiding use of adjustable parameters
 03 p0441 A70-14045
 Ribonucleic acid polymerase model with initiating purine triphosphate binding to product terminus site and pyrimidine triphosphate engaging in exchange binds to substrate site
 03 p0442 A70-14046

- Chemical bonding of high temperature molecular species, discussing ab initio calculations for diatomic atoms 07 p1225 A70-19882
- Group 4A difluorides vaporization thermodynamics and bond dissociation energies, tabulating mass spectra, vapor composition, reaction enthalpies, heats of polymerization and thermodynamic functions 07 p1319 A70-19889
- Bonding scheme of C-O in ketene described by localized orbital technique 08 p1455 A70-20682
- Adhesives chemistry, discussing ionic, covalent and intermolecular bonds allowing for chemical and physical properties 08 p1455 A70-20880
- Atomic bond rupture rate in rubber subjected to uniaxial tensile strain in ozone environment monitored by electron paramagnetic resonance measurements 08 p1527 A70-21454
- Mechanical properties and fracture behavior of chemically bonded glass matrix-metal composites 08 p1521 A70-21699
- Inductive effect in C-Cl chemical bonds in chloroalkenes, using nuclear quadrupole resonance frequencies shifts 09 p1630 A70-22903
- Isomeric 1-phenylheptenes mass spectra, investigating electron impact induced rearrangements of double bond 09 p1631 A70-23401
- Vaporization characteristics of solids for relationship between chemical bonding and sublimation mechanism emphasizing NaCl, CdS and GaAs 14 p2545 A70-30906
- Gaseous Al oxide bond bending frequency in Ne and Ar matrices at liquid He temperatures, investigating IR spectrum 15 p2695 A70-32830
- Transition probabilities for Markov chain describing bond breaking and molecular energy transfer in vibrational relaxation and dissociation 16 p2953 A70-33009
- Reinforced plastics adhesion to hydrophilic mineral surfaces by using silane coupling agents 16 p2937 A70-33374
- Radioisotopic and complementary surface chemical analysis of coupling agent films on glass surfaces 16 p2917 A70-33375
- Interfacial chemistry of glass fiber reinforced thermoplastics, discussing matrix resin- reinforcement bond 16 p2937 A70-33378
- Reaction kinetics of gas phase pyrolysis of polydifluoroaminomethanes in various reactors, obtaining C-N bond cleavage as rate determining step 16 p2856 A70-33652
- Addition and hydrogenation reactions of azomethines in chemistry of carbon-nitrogen bond, emphasizing Schiff bases 20 p3582 A70-38978
- Barrier heights for hydrogen-iodine reaction from semiempirical four-electron valence bond calculation 21 p3780 A70-41709
- Solid solutions properties in Nb-oxygen system, examining atomic bond nature by elastic modulus measurement 22 p4056 A70-43345
- CHEMICAL CLEANING**
- Chemically treated rolled hair properties following long term use in hair hygrometers 24 p4333 A70-45138
- CHEMICAL COMPOSITION**
- NT CARBON DIOXIDE CONCENTRATION**
- Lubricating oil chemical composition changes influence on combustion engine internal friction, considering surface active Zn, armo-iron and Al 01 p0099 A70-10077
- Chemistry variations effects on mechanical properties, phase stability and microstructure of alloy Unitemp 718 /Ni-Fe-Cr alloy/ via microscopy and X ray analysis 01 p0116 A70-10092
- Nerve cell response to change in chemical constitution of surroundings used to investigate animal periphery sensory mechanisms 01 p0033 A70-10497
- Jupiter chemical composition and atmosphere, considering space probe experiments 01 p0185 A70-11047
- Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance 01 p0124 A70-11621
- Laminar counterflow diffusion flame chemical structure and blow-off mechanism established in forward stagnation region of porous cylinder at atmospheric pressure 02 p0398 A70-12032
- B-C alloys chemical composition effect on high temperature stability in pure oxygen 03 p0514 A70-12978
- Phase content determination in borides and borocarbides mixtures based on compounds different chemical stabilities during hydrolysis and reaction with acids 03 p0514 A70-12984
- Major and trace element concentration in contact zones of Precambrian diabase dikes from Wyoming ranges, showing dikes as continental tholeiites 03 p0472 A70-13148
- Abundance levels of K, Rb, Sr and Ba in pyroxenes, olivines and garnets of ultramafic rocks for upper mantle composition 03 p0472 A70-13149
- Heat resistant alloys densities calculated from chemical composition, estimating error 03 p0512 A70-13778
- Aerosols size distribution and chemical composition and carbon monoxide, nitrous oxide and sulfur dioxide concentrations measured in pure atmosphere 03 p0521 A70-14289
- Surveyor 7 alpha scattering experiment and TV image data revealing lunar surface chemical composition, rocks and fragments, etc 04 p0752 A70-15060
- Surveyor 5, 6, 7 missions alpha-scattering experiments, lunar rocks chemical composition compared with earth rocks and chondritic meteorites 04 p0752 A70-15062
- Proton-proton cycle in star interior, calculating isotope concentrations, reaction duration and energy release as function of temperature and chemical composition 05 p0900 A70-15972
- Chemical compositional evidence of Needles /California/ iron meteorite, suggesting distinct fall nature 05 p0912 A70-16465
- Alpha and beta solid solutions chemical composition in two phase alloys of Ti-Al-Mo and Ti-Al-V determined by electron microprobe analyzer 05 p0864 A70-16549
- Correlation between O isotope ratios and composition of tektites investigated for origin of tektites 05 p0917 A70-16840
- Metal content effects on evolution tracks of five solar mass stars with different chemical composition, discussing Magellanic Clouds composition 05 p0919 A70-16936
- Cerenkov light in extensive air shower observed at mountain altitude showing mixed primary cosmic rays in chemical composition 06 p1134 A70-17184
- Chemical abundance data of lunar surface rocks, suggesting basaltic achondrites and eucrites origin from moon 06 p1137 A70-17196
- Amino acid composition and terminal sequences of ferredoxins from photosynthetic green bacteria 06 p0994 A70-17616
- Diffusion layer and protective oxide composition changed to increase chrome plated Mo heat resistance 06 p1089 A70-17742
- Structure, phase composition and heat resistance of diffusion layers obtained by surface alloying of Nb alloy with Cr, Ti and Si 06 p1089 A70-17744
- Sinus Medii lunar surface material chemical composition from alpha scattering experiment on Surveyor 6 06 p1151 A70-18483
- Meteoroids structure, composition and fragmentation, summarizing existing evidence for photographic and radio meteors and meteor luminous and ionizing efficiency 06 p1153 A70-18551
- Chemical composition of scale formation in jet engine injectors for various fuel types tabulated, noting buildup levels in transport aircraft and subsonic jets 07 p1362 A70-18651
- Chemical composition effects on Zr-Ti, Zr-Si, Ni-Al and Ni-Ti alloy aerosols combustion temperature 07 p1419 A70-18755
- Lunar surface samples characteristics correlation with terrestrial igneous rocks /basalts/ and eucrite meteorites based on alpha scattering analysis 07 p1380 A70-19203
- Chemical composition and heat treatment effects on deformation resistance of nonaging aluminum alloys during hot working, noting quenching effect on recrystallization 07 p1294 A70-19388
- Data on Jupiter chemical composition, internal structure and energy sources, discussing Jovian planets origin and role played by gas 07 p1386 A70-19487
- Lunar surface chemical composition determination by radio astronomy, considering SHF electrical properties of silicate earth rocks 08 p1572 A70-20940
- Ti-based alloys with Al and Mo investigated for chemical composition and heat treatment effects on mechanical properties 08 p1518 A70-21200
- Carburization resistance of refractory steels, emphasizing chemical composition effect on corrosion rate 08 p1519 A70-21434
- Apollo 11 lunar material X ray diffraction and microscope studies, noting chemical composition agreement with Surveyor 7 data 09 p1752 A70-22245
- Melting diagram for five element Mo-W-Nb-Ta-V system constructed by optimal projections from known composition-property relations for corresponding ternary systems with common components 09 p1702 A70-22561
- Diffusion layer correspondence to phase diagram in terms of constituent phases and composition 09 p1702 A70-22563
- Twelvelfold solar mass star evolution computed using chemically homogeneous model showing faster evolution rate 09 p1758 A70-22746
- Interstellar dust, discussing effective particle size, composition, formation and effects on astronomical observations 09 p1763 A70-23374
- Solar system objects /earth, moon, planets, meteorites, etc/ chemical composition data and analysis techniques 10 p1942 A70-24609
- Oceanic ridge volcanic rocks alkali metal, alkaline earth, rare earth, nickel and major element content, observing partial melting 10 p1877 A70-24648
- Zero age intermediate and low mass stellar models and evaluation of physical parameters for population I and II chemical compositions 10 p1944 A70-24955
- Radio wave reflection spectra from plane surfaces, determining physical properties and composition 10 p1843 A70-25154
- Gas mixture composition effect on bacteria growth oxidizing methane and propane, establishing proportional biomass concentration to hydrogen and oxygen in mixture 11 p1991 A70-25938
- Temperature distribution in opposed jet diffusion flames, discussing mass fluxes and fuel and oxygen concentrations effect 11 p2151 A70-26385
- Icarus asteroid positions, UVB magnitude, brightness, colors, light curves and polarization, noting stony-iron composition 11 p2113 A70-26470
- Normal and unconstrained vacuum-deposited Permalloy films composition dependence of magnetization-induced uniaxial anisotropy, noting agreement with magnetostrictive constraint theory 12 p2284 A70-27244
- Chemical compositions and structure of carbides in Fe-W-C and Co-W-C systems, clarifying eta phases 12 p2255 A70-27601
- ETA oxides compositions in Hf-Ni-O, Ta-Ni-O and W-Ni-O systems determined by studying 1000 C isothermal sections with X ray diffraction 12 p2255 A70-27607
- Carbon in austenite derived for composition dependence of diffusivity using first order mixing statistics 12 p2256 A70-27611
- Lunar rocks isotopic composition for Gd and variations due to low energy neutron capture produced by cosmic ray interactions 13 p2485 A70-28473
- Mountain climbing and prolonged stays at high altitudes effects on blood composition 13 p2352 A70-29355
- Thick plate titanium alloy welds using filler wire to regulate chemical composition and plate phase constitution 13 p2435 A70-29456
- Weekeroo Station iron meteorite silicate inclusions chemical composition compared to chondrites 13 p2497 A70-29858
- Hydromagnetic fluid model of solar wind for interpreting discontinuities in plasma and magnetic field, interaction with atmosphere, heating mechanism and chemical composition 13 p2481 A70-30067
- Moon rocks nature and mineralogical constitution, describing methods for age determination 14 p2634 A70-30275
- Soviet monograph on V and V alloys covering phase diagrams, mechanical, chemical and physical properties, compounds and chemical composition 14 p2595 A70-30627
- Balloon-borne midinfrared observations of lunar surface composition from interpreting peak emissivity differences 14 p2645 A70-31058
- Radio astronomical observations of lunar surface material EM properties compared with Surveyor 7 chemical analysis 14 p2645 A70-31059
- Lunar surface optical properties differences for lunar and planetary nature and evolution determination 14 p2645 A70-31063

Relativistic cosmic rays primordial chemical composition above atmosphere from abundance data obtained with satellite-borne nuclear emulsion detector 15 p2793 A70-31735

Planetary gamma and X radiation by remote sensing and passive observation for gross chemical composition 15 p2793 A70-31749

Lunar, meteoritic and terrestrial silicate rock chemical individuality based on atomic ratios 15 p2799 A70-31896

Data on Jupiter chemical composition, internal structure and energy sources, discussing Jovian planets origin and role played by gas 15 p2805 A70-32732

Lunar surface chemical composition determination by radio astronomy, considering SHF electrical properties of silicate earth rocks 15 p2805 A70-32752

Composition and heat treatment effects on Fe-Ni alloys structure, using micrographic, autoradiographic and potentiokinetic methods 16 p2916 A70-33080

Chemical structure and room temperature tensile, flexural and compressive properties of metaphenylenediamine cured castings for graphite fiber reinforced epoxy resin matrices 16 p2936 A70-33358

Galactic composition differences, considering stellar and galactic nucleosynthesis 16 p2976 A70-33791

Ti alloy ingot chemical macroinhomogeneity, investigating elimination by vacuum arc melting 17 p3112 A70-34355

Heat treatment and composition effect on mechanical properties of alpha Ti-base alloy, discussing creep resistance, tensile strength, etc 17 p3122 A70-34439

Solar atmosphere structure and chemical composition by UV spectrum analysis 17 p3161 A70-34892

Nonhydrogen spectral lines in interstellar gas, discussing Ca/Na abundance anomaly 17 p3162 A70-34900

Chemical composition selection for Ti alloys with low susceptibility to hydrogen induced brittleness 18 p3274 A70-36121

X ray fluorescence determination of thickness and composition of Permalloy films deposited on wire surface 18 p3258 A70-36466

Heat resistance of cast, forged and annealed Ti-Cu alloys, discussing forged alloys mechanical properties as function of chemical composition and temperature 19 p3449 A70-37273

Simultaneous primary energy spectrum, chemical composition and sidereal daily variation analysis for cosmic ray origin, using Proton measurements 19 p3500 A70-38080

Low energy galactic cosmic radiation energy spectra and charge composition in 2-14 Z range by OGO-5, suggesting two component model for origin 19 p3507 A70-38127

Cosmic ray nuclei chemical composition and energy spectra in 3-30 Z range by balloon flight and Pioneer 8 space probe, noting propagation models 19 p3507 A70-38131

Cosmic ray elements abundance at sources relative to carbon, comparing near-earth composition and solar photosphere 19 p3509 A70-38147

Microstructure and composition of hafnium dioxide stabilized with Ca, Y and Mg oxides using metallographic, X ray and microprobe 20 p3654 A70-39242

Lunar soil from Apollo 12, identifying chemical composition of orthopyroxene-calcic plagioclase rock fragments for origin 20 p3709 A70-39980

Lunar rocks almandine-rich garnet chemical composition and crystallography, noting cell edge and refractive index 21 p3883 A70-40711

Mineralogy and chemistry of Apollo 11 lunar soil samples, using three-channel electron microprobe analyzer 21 p3896 A70-41509

Apollo 11 lunar rock mineralogy, examining petrographic and chemical features by light microscopy, electron microprobe microanalysis and detector system 21 p3898 A70-41525

Bulk chemical compositions, mineral and glass analyses, X ray data and physical properties of Apollo 11 lunar fines and rocks 21 p3898 A70-41526

Apollo 11 lunar rocks, breccias and fines age and chemistry, major element, trace element and rare earth abundances, texture, crystallization and meteoritic effects 21 p3906 A70-41563

Apollo 11 lunar basalt chemical composition and petrogenesis, using stable isotope dilution method 21 p3907 A70-41573

Apollo 11 lunar rocks and soil chemical composition, examining major, minor and trace elements 21 p3776 A70-41591

Apollo 11 lunar rock and soil elemental abundances, discussing composition, volatile element depletion, rare earths, basalt and geochemical processes 21 p3909 A70-41593

Elemental abundances of Apollo 11 lunar rocks and soils, using activation analysis or mass spectrometric isotope dilution 21 p3909 A70-41606

Chemical analysis for Li, Na, K, Rb, Cs, Ca, Sr and Ba in achondrites and Apollo 11 lunar rocks, breccia and soil samples 21 p3910 A70-41611

Oxides compounds heats of formation isocomponent and primary product composition relationship in binary systems 22 p3982 A70-42679

Phase analysis for individual multicomponent alloys, discussing chemical composition in case of invariant equilibria and electron beam microprobe 22 p4053 A70-42734

Computerized calculation of gas turbine cycles thermal efficiency, using hydrocarbon fuel, considering fuel composition and heat of combustion changes 22 p4125 A70-43439

Time constant loci and theoretical luminosity functions for various compositions and ages of metal poor globular clusters 22 p4108 A70-43735

Charring ablative composites pyrolysis products composition determination, comparing chemical analysis techniques 23 p4158 A70-44519

Murchison and Lost City chondrites element abundance analysis by thermal neutron activation and wet chemical techniques, noting low oxygen content 24 p4411 A70-45790

Borgo San Donino chondrite petrology and mineralogical and chemical composition, considering texture and recrystallization features 24 p4411 A70-45791

Chemical composition effects on heat resistance, elastic properties and density of Ti-Ta alloys 24 p4360 A70-45830

Stainless steel oxide films structures and chemical compositions, examining oxidation time, polishing conditions, vapor humidity and temperature effects 24 p4362 A70-46191

X ray powder and chemical data on monoclinic secondary mineral guildite from mine fire at Jerome site 24 p4330 A70-46274

Biochemical heterogeneity of corneal mucopolysaccharides / glycosaminoglycans/, using extraction without proteolytic enzymes 24 p4304 A70-46344

CHEMICAL COMPOUNDS

Morphological box for extracting chemical elements and compounds from lunar materials for manned operations on moon 14 p2634 A70-30200

Magnetically ordered ferroelectric materials properties for various compounds and solid solutions 15 p2785 A70-32749

CHEMICAL EFFECTS

Ni-Cr alloy oxidation resistance dependence on small amount of Al at high temperatures, noting role of protective oxide layer 03 p0514 A70-14315

Aircraft Ti alloys failure due to stress-induced pseudocorrosion caused by trichloroethylene and Freon noting microstructure, heat treatment and welding effects 04 p0710 A70-15679

Mechanical methods locking studs, discussing chemical locking based on hardening of resins by polymerization 06 p1076 A70-17437

Thermal emittance of Cu measured in vacuum in spherical enclosure by calorimetric method to investigate oxidation effect [AIAA PAPER 70-66] 06 p1180 A70-18139

Austenitic stainless steel hydrogen damage noting role of martensite plastic deformation 08 p1525 A70-21965

Molybdenum disulfide dry film lubricant wear life as film sintering process dependent on binder, additive or atmosphere chemical effects 11 p2058 A70-25571

PdH system electrical resistivity, studying hydrogen concentration role 12 p2282 A70-26900

Protein synthesis, dialysis and Mg ion concentration effects on chemical condensation of mixed amino acid adenylates 17 p3042 A70-35146

Ammonium perchlorate filler fraction effect on viscoelastic behavior, relaxation modulus and failure mechanisms of solid composite propellants 17 p3145 A70-35216

Iron cyanide surface additives effect on photodamage to ZnO powder, using ESR method 19 p3372 A70-37543

Sealed Ni-Cd cells, investigating carbonate effect on performance 22 p3965 A70-43535

Chemically treated rolled hair properties following long term use in hair hygrometers 24 p4333 A70-45138

Ternary chemical element additions /O, Sn, Zr, Cb, Mo, V/ effects on solubility range of primary alpha region of Ti-Al base alloys 01 p0122 A70-11239
Secondary halo in spark source mass spectrography, determining corrections 02 p0298 A70-12211
Excretion and balance of K, Ca, Mg, P, S and N during prolonged use of dehydrated food diets 03 p0435 A70-13713
Mass and radius relations for zero temperature spheres of chemical elements, using equation of state and numerical integration 04 p0749 A70-14599
Semiconductor compounds application as partial vapor pressure sensors of chemical elements, discussing electrical properties dependence 07 p1356 A70-19554
Excretion and balance of K, Ca, Mg, P, S and N during prolonged use of dehydrated food diets 11 p1989 A70-25513
Thermal diffusivity of elements over wide temperature ranges based on TPRC recommended thermal conductivity and specific heat 11 p2065 A70-25770
Morphological box for extracting chemical elements and compounds from lunar materials for manned operations on moon 14 p2634 A70-30200
Ionization potentials of elemental abundances in lunar rocks compared with earth crust and class I carbonaceous chondrites, showing lunar materials differentiation 15 p2801 A70-32463
Type I carbonaceous chondrites contribution to lunar soil, comparing mineralogical and trace element evidence 21 p3899 A70-41533
Apollo 11 lunar rocks and soil chemical elements analysis by neutron activation scheme 21 p3777 A70-41612
Apollo 11 lunar rocks, soil and core samples major, minor and trace elements abundance by radiochemical and instrumental activation analyses 21 p3910 A70-41614
Alloying elements effects on corrosion resistance of Mg ingot in NaCl aqueous solution 24 p4363 A70-46198
CHEMICAL ENERGY
NT ENERGY OF FORMATION
Anoxia effects on biochemical processes in human body, comparing chemical energy balances under aerobic and anaerobic conditions 10 p1821 A70-25082
Reagent translational energy effect on dynamics of ionic and atomic reactions, using nuclear recoil and chemical accelerator methods 11 p1995 A70-26005

Book on energy conversion statics covering state functions, quasi-static processes, internal energy, chemical energy storage and conversion, dynamics and postulates and laws 12 p2165 A70-27670
Solar, nuclear, chemical and thermal energy sources for short and long duration exploration on moon 14 p2634 A70-30195
Ammonia gas phase IR intensity measurements for hydrogen bonding energy and related parameters 23 p4158 A70-44783
CHEMICAL ENGINEERING
Chemical engineering application to solid propellant rocket motors optimization for specific operations, discussing fuel properties, formulation and additives, mixing and casting [AICHE PAPER 28A] 01 p0166 A70-10971
Chemical engineering problems of resistojets, pulsed plasma, ion bombardment and colloid thrusters 01 p0166 A70-10974
Liquid rocket technology for chemical engineers, discussing insulating tanks, flexible lines, turbopumps and combustion chamber 05 p0896 A70-16168
Liquid rocket technology for chemical engineers, discussing propellant tanks, lines and valves, tank pressurization, turbopumps and combustion chamber problems 12 p2291 A70-27664
Parabolic solar furnace for chemical manufacture of impurity sensitive materials in orbiting spacecraft 21 p3804 A70-41001
CHEMICAL EQUILIBRIUM
NT ACID BASE EQUILIBRIUM
Internal structure of ideal explosive waves at Chapman-Jouguet point, discussing coupling between flow and chemical reactions 02 p0279 A70-12103
Computerized stepwise construction of Hugoniot curve for detonation waves and Chapman-Jouguet detonation and deflagration points 03 p0607 A70-13920
Synthetic and conversion reactions results showing phenylserine and DHEA equilibrium systems in Erlenmeyer reaction 04 p0646 A70-15087
Cesium plasma composition as equilibrium mixture of ideal gases assuming chemical equilibrium attainable by specified reactions 07 p1349 A70-19660
Transport properties of high temperature gases compared with room temperature differences, considering chemical equilibria, heat conduction and atom-free radical forces 07 p1424 A70-19880
Stainless steel corrosion rates in flowing liquid Na from mechanism based on thermodynamic partitioning of oxygen 09 p1706 A70-22942
Fixed low pressures of nitrogen generated by chemical dissociation in system at equilibrium at constant temperature, applying results to vacuum measurement device calibration 09 p1630 A70-22954
Partition functions and equilibrium constants for ScO, YO and LaO computed for 1000-8000 K, assuming doublet ground electronic state 10 p1946 A70-24970
Jet engine pollution reduction for airport areas, discussing chemical equilibrium failure in exhaust gases and combustor design 12 p2291 A70-27993
Cesium plasma composition as equilibrium mixture of ideal gases, assuming chemical equilibrium attainable by specified reactions 15 p2781 A70-32697
Gaseous substances thermodynamic functions and chemical equilibrium constants logarithms dependence on temperature and pressure, deriving internally self consistent formulas 22 p4124 A70-42682
Chemical equilibrium premixed flame composition at given temperature, pressure and mixture strength, using Newton-Raphson iteration technique for simultaneous nonlinear equations 23 p4157 A70-43892
CHEMICAL EXPLOSIONS
NT GAS EXPLOSIONS
Critical detonation diameter as function of concentration and dimensions of inhomogeneities in explosive, assuming chemical reaction generated behind detonation front 01 p0217 A70-11005
Fire and explosion suppression technology for aircraft and hypobaric and hyperbaric oxygen-rich atmospheres, discussing time available for suppression action 03 p0437 A70-14056
Solid rocket motors potential hazards explosive reactions and temperature and blast effects 14 p2629 A70-30782
Centrifugal pumps of various metals for liquid oxygen, describing fire and explosion tests 14 p2617 A70-31020

High energy chemical systems for postcrash emergency evacuation of commercial passenger aircraft, discussing exit opening via explosive methods 15 p2675 A70-32221

CHEMICAL LASERS
Continuous wave chemical laser operation in carbon dioxide pumped by vibrational energy released from DF and HF molecular formation 04 p0704 A70-15686
Chemical laser action in spark excited CS₂-O₂ mixtures, attributing emission to combustion product CO 06 p1080 A70-17445
Chemical laser CW operation achieved by mixing gases, obtaining pumping energy from chemical reactions 06 p1080 A70-17492
Supersonic mixing CU chemical lasers, discussing lasing action time duration 06 p1083 A70-17945
Kinetic model developed for Cl-HBr reaction pulsed chemical laser 08 p1513 A70-21337
Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules 08 p1513 A70-21412
CW laser operation at 10.6 microns in DF-carbon dioxide and HF-carbon dioxide molecular systems achieved by purely chemical means 08 p1513 A70-21539
Chemically formed carbon monoxide lasing in fast flow system, discussing reaction and excitation mechanisms 09 p1697 A70-22922
Continuous wave chemical laser operation at 10.6 micron in carbon dioxide pumped by vibrational energy from hydrogen atoms and bromine molecules reaction 10 p1901 A70-25149
CW chemical laser performance using molecular hydrogen diffused into supersonic fluorine atoms streams 11 p2063 A70-26067
Pulsed chemical laser output, considering increase in radiation energy 12 p2251 A70-28292
HF and DF continuous chemical lasers output power, obtaining population inversion by deuterium molecules diffusion into F atoms supersonic free jet 14 p2593 A70-30273
HF and DF continuous chemical lasers vibrational and rotational spectra, comparing lines and relative intensities 14 p2593 A70-30274
CW oscillation in carbon monoxide chemical laser 15 p2748 A70-31432
Chemical energy conversion in lasers, discussing vibrational inversions in diatomic and multiautomic molecules and chain reactions 16 p2927 A70-33233
Transverse flow CO chemical laser using atomic oxygen reaction with carbon disulfide, comparing output with longitudinal flow devices 18 p3266 A70-36313
CW HCl chemical laser action via chlorine atoms reaction with hydrogen iodide in fast flowing mixing device 19 p3444 A70-37542
CW chemical lasers operation from partially inverted transitions of HCl, HF and DF molecules in subsonic flow 22 p4050 A70-43008
Laser kinetics based on exothermal chemical reactions for electron transition stimulation, emphasizing single mode operation 24 p4354 A70-45656
HF chemical laser emission in fluorine-containing organic compounds via arc discharges, noting molecular hydrogen effect on p sub 10 and p sub 21 transitions 24 p4355 A70-46046
Transverse flow deuterium fluoride-carbon dioxide chemical laser for CW output without external energy source 24 p4355 A70-46084
CHEMICAL MACHINING
NT ELECTROCHEMICAL MACHINING
Chemical milling characteristics, development and applications, outlining performance capabilities with Al, Ti, Fe and Mg alloys 12 p2240 A70-26991

Polyurethane swelling in liquid media, measuring surface orientation effects during chemical machining on stress strain state 20 p3654 A70-39249

Asymmetric closed and cylindrical shells variable surface machining for desired wall thickness profile by chemical milling with digital computer numerical control 20 p3637 A70-39942

Chemical etching for revealing structure of carbon-graphite materials subjected to different graphitization stages 23 p4209 A70-44045

Collection of Soviet papers on chemical properties and analytical methods of refractory compounds 03 p0504 A70-12977

Physicochemical properties of hypothalamic secretions responsible for coronary dilatation in rats, cattle and pigs, using analytical techniques 03 p0417 A70-13215

Peroxides, superoxides and ozonides applications in industrial chemistry, semiconductors and rocket motor fuels, discussing chemical structure and properties and nomenclature 05 p0810 A70-15768

Aluminosilicate glass physical properties and chemical stability in water, alkaline and acidic agents, studying titanium oxides additives effect 05 p0871 A70-16596

Stoichiometric compositions of niobium dioxide to pentoxide range, investigating X ray characteristics and thermal stability 07 p1315 A70-20312

Adhesives chemistry, discussing ionic, covalent and intermolecular bonds allowing for chemical and physical properties 08 p1455 A70-20880

Brain cerebral tissues electrical impedance measurement by electrodes and bridge circuit, discussing chemical and metabolic properties 09 p1620 A70-22897

Chimkurgan reservoir algae life and physicochemical characteristics 09 p1627 A70-23148

Structural materials chemical and metallurgical factors controlling mechanical properties, machinability and finished part productivity [ASTME PAPER MR-69-731] 12 p2240 A70-26992

Visualized multicomponent systems subsolidus structures, studying physicochemical characteristics 13 p2470 A70-28885

Titanium alloys powder metallurgy, considering manufacturing methods and physical, chemical and mechanical properties 13 p2435 A70-29214

Soviet monograph on V and V alloys covering phase diagrams, mechanical, chemical and physical properties, compounds and chemical composition 14 p2595 A70-30627

Boron, silicon carbide and graphite fibers surface properties 16 p2937 A70-33376

Chemical and moisture resistance, electrical and mechanical properties of engineering thermosetting plastics made of HYSTL resins 16 p2938 A70-33380

Soviet reference book on highly refractory elements and compounds covering crystalline, chemical, thermodynamic, thermophysical, electrical, optical and nuclear properties 19 p3451 A70-37470

Organic liquid scintillators with high transparency, describing optical and chemical properties 20 p3629 A70-39319

Fugacities of HCl and HF compared with abundance in volcanic fumarolic emanations, indicating magma undersaturation 20 p3619 A70-39321

Chemical and physical factors effect on smoke evolution from polymers 20 p3736 A70-39405

CHEMICAL PROPULSION

NT HYBRID PROPULSION

Interagency chemical rocket propulsion group method of treating measurement error for liquid rocket engine performance parameters, using uncertainty model [AIAA PAPER 69-734] 07 p1365 A70-19723

Oxygen and fluorine-based liquid fuels and oxidizers development, considering chemical rocket propulsion reaction principles 07 p1361 A70-19917

Book on spaceflight propulsion covering jet thrust, energy release, chemical, nuclear and electric propulsion, transportable and environmental systems 09 p1742 A70-22202

Chemical rocket propulsion systems approximate calculation for characteristic velocity dependence on mixture ratio and pressure in combustion chamber [DFVLR-SONDDR-24] 10 p1929 A70-23842

Chemical high energy rocket propellants, discussing metal combustion, hybrid and tribrid engines, combustion chambers, etc 11 p2100 A70-26282

Book on chemical propellants performance covering properties and parameters effects, rocket performance, chemical thermodynamics, flame temperature, etc 12 p2289 A70-27350

Space vehicles chemical propulsion limitations and potential applications 15 p2786 A70-32268

Chemical rocket propellant research covering composite liquid monopropellants, lateral thrust in solid propellant rockets, ELDO third stage, friction losses, etc 17 p3148 A70-35211

Primer vector theory applied to interplanetary trajectory optimization for high thrust chemically propelled spacecraft, considering 1973 Mars opportunity [AIAA PAPER 70-1039] 19 p3527 A70-38854

Optimal control of composite spacecraft propulsion system incorporating high thrust-weight ratio chemical engine and low thrust ion engine 21 p3865 A70-40831

Electric field control of oscillatory acetylene flame combustion for chemical rocket engines 21 p3942 A70-40885

Acetylferrocene preparation by reacting ferrocene with acetic anhydride in phosphoric acid and reducing acetylferrocene to alpha-hydroxyethyl ferrocene by potassium borohydride in methanol 02 p0249 A70-11678

Book on gas kinetics, treating experimental methods, reaction theories, transition state theories, complex processes, etc 02 p0251 A70-12058

Red bicyclic condensation product from reaction of acetone with sym-trinitrobenzene and diethylamine 02 p0251 A70-12278

Statistical model of turbulent chemically reacting shear flows, analyzing wave number fluctuations effect and Couette flow 03 p0464 A70-12928

Aluminum oxide solid state reaction with Ta at high temperatures using chemical analysis 03 p0511 A70-13487

Atomic oxygen reaction with carbon dioxide and carbon dioxide dissociation in shock waves, using nitrous oxide decomposition for oxygen source 03 p0440 A70-13578

Bimolecular transfer reactions activation energies for multivalent gaseous compounds estimated by bond energy method avoiding use of adjustable parameters 03 p0441 A70-14045

Thermodynamics second law application to pyrotechnic systems, discussing solid-solid and reversible reactions 03 p0547 A70-14114

Numerical integration of differential equations governing one dimensional flow of reactive gas, discussing flows of converging-diverging nozzle and normal shock waves 04 p0671 A70-14992

Synthetic and conversion reactions results showing phenylserine and DHEA equilibrium systems in Erlenmeyer reaction 04 p0646 A70-15087

Chemical heat source combined with metals ignition properties considered for spacecraft heating during Mars nighttime landing 04 p0628 A70-15426

Flow fields construction for normal shock waves with nonequilibrium chemical reactions reflected from shock tube end wall [AIAA PAPER 68-732] 04 p0674 A70-15537

Alpha- and beta-styryl azides catalyzed reactions in ethanolic sulfuric acid 05 p0810 A70-16053

Limits of self ignition in reaction of F with H detected photoelectrically 05 p0956 A70-16156

Polyamides chemical welding using HF heating to obtain optimum temperature distribution and to activate polymer reaction with crosslinking agents 06 p1091 A70-17316

Quasi-equilibrium treatment of heterogeneous reactions applied to evaporation rate/desorption/computation for volatile species formed in oxygen reactions with W, Mo and graphite 06 p1004 A70-17330

Quasi-equilibrium treatment of heterogeneous reactions applied to flash desorption data for oxygen reaction with tungsten surface, discussing species desorption dependence on adsorption temperature 06 p1004 A70-17331

Chemical laser CW operation achieved by mixing gases, obtaining pumping energy from chemical reactions 06 p1080 A70-17492

Energy and mass transfer during elastic and inelastic molecular collisions in reacting gas mixtures, using Enskog and variational methods in solving Boltzmann equations 06 p1110 A70-17760

Maxwellian distribution perturbation in chemically reacting gas mixtures with lower inelastic collision frequency than elastic 06 p1110 A70-17761

Gas phase reactions near solid-gas interface of deflagrating double base propellant causing abrupt changes in burning rate-pressure curve [AIAA PAPER 70-124] 06 p1179 A70-18046

Analytical method for design of supersonic flow and maximum thrust nozzles for chemically reacting gases, noting surface geometry [AIAA PAPER 70-129] 06 p0971 A70-18108

Gas dynamic effects of reaction center in explosive gas mixture analyzed by model and numerical computation [AIAA PAPER 70-147] 06 p1181 A70-18144

Thermal conductivity calculation for chemically reacting multicomponent gas mixture, comparing results from Brokaw method and simplified formula 06 p1184 A70-18554

Chemical reaction rates corresponding to initial molecules fixed internal energy levels determinable for multitemperature Maxwell-Boltzmann distribution as function of reagent temperatures 07 p1224 A70-18769

Quasi-steady radially symmetric theory of liquid drop vaporization and homogeneous combustion extended to burning of solid carbon spheres gasified by chemical attack 07 p1419 A70-18915

Inviscid hypersonic flow analysis for chemically relaxing air about wedges and pointed circular cones using Dorodnitsyn integral method [DGLR-69-037] 07 p1188 A70-18986

Chemical synthesis in streaming thermal plasmas including HCN from cold methane and N plasma discharge chemistry 07 p1351 A70-19879

Crossed molecular beam study of reactive asymmetry of oriented methyl iodide molecules reacting with Rb, accounting for observations with hard sphere model 07 p1225 A70-20051

Atomic F reaction with hydrogen studied for vibrational, rotational and translational energy distribution, using IR chemiluminescence method 07 p1225 A70-20055

Ceramic adhesives with glassy matrix for metal bonding, describing chemical reactions in interface, adhesive processing and application 08 p1526 A70-20883

Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules 08 p1513 A70-21412

Physicochemical methods of producing formaldehyde for carbohydrate synthesis in life support systems

09 p1623 A70-22080

Steady flame propagation attainment for chemical reaction initiation in gaseous fuel by heated surface with various wall temperatures

09 p1787 A70-22115

Oxide spinel formation kinetics and reaction mechanisms with emphasis on Ni and Co chromites, discussing cation diffusion

09 p1739 A70-22307

Chemically formed carbon monoxide lasing in fast flow system, discussing reaction and excitation mechanisms

09 p1697 A70-22922

Boundary layer equations for multicomponent flow with finite chemical reactions solved by finite difference method

09 p1605 A70-23201

Peptide formation during glycine reaction with linear polyphosphates and cyclic metaphosphates, considering prebiotic synthesis

09 p1630 A70-23395

Electric discharge reactions in mixtures of phosphine with methane, ammonia and water, obtaining biologically significant inorganic and organic phosphorus compounds

09 p1630 A70-23396

Near equilibrium transonic flows of reacting gas mixtures based on linearization of the thermodynamic and kinetic quantities

10 p1867 A70-24133

Flowing afterglow system below 300 K for rate constants of certain gases association with helium third body, investigating oxygen cluster ions formation and reactions

10 p1920 A70-25144

Deuterium atom reaction with hydrogen molecule yielding HD and H using modulated crossed beams, plotting angular distributions and reaction velocities

10 p1920 A70-25148

Oxygen difluoride-diborane reaction measured for pressure-temperature relationships and gas composition dependence on time, noting possible applications as hypergolic rocket propellants

11 p1995 A70-26138

Recombination in hydrogen-oxygen reaction studied by monitoring IR emission from water vapor formed by shock initiated combustion

11 p1995 A70-26377

Turbulent reacting wakes properties prediction models validity, discussing Lagrangian formulations and eddy diffusivity and mixing models

11 p1978 A70-26772

Compressibility transformation theory extended for turbulent boundary layer, involving mass transfer with/without chemical reactions

12 p2211 A70-27825

Vibrational dissociation relaxation effects on chemical reactions, molecular energy and thermal quanta in air flow behind direct shock wave

12 p2213 A70-28232

Hard sphere model for reactive molecular collisions based on energy and momentum of reactants and products

13 p2361 A70-28497

Graphite-carbon dioxide interaction at high temperatures in presence of solid phase diffusion from bulk to reacting surface

13 p2520 A70-28581

Thermodynamic data for chemical reactions of Ti alloys formation with Al obtained by measuring galvanic cells emf with solid electrolytes at elevated temperatures

13 p2434 A70-28889

Molar growth yields from chemostat cultures of *Hydrogenomonas eutropha* on succinate and on fumarate, noting equivalence to ATP via oxidation

13 p2350 A70-29113

Free jet expansions in molecular beam sampling systems, using Sherman equations and chemical kinetic equations

13 p2389 A70-29608

Oxygen difluoride-diborane reaction kinetics and boron fluoride formation rate

13 p2362 A70-29611

Chemically reacting stagnation point boundary layers with wall injection of gas, comparing multicomponent solution with binary approximation and chemical simplifications

14 p2565 A70-30265

Structural and functional properties of phosphates in biochemical reactions, discussing linkages

14 p2544 A70-30346

Chemically reacting ideal substance model, describing thermodynamic properties and application to energy conversion processes

14 p2533 A70-30529

Statistical transport, energy and chemical reaction rate in turbulent flow field with uniform velocity gradient, using Brownian motion theory

14 p2566 A70-31029

Turbulent chemical reactions invariance preservation for zero diffusivity

14 p2546 A70-31044

Third body coefficients of water and heavy water reactions in KCl coated and aged boric acid coated vessels with vibrational-vibrational exchanges

14 p2546 A70-31091

Gas phase chemical synthesis via AC diffuse discharge superimposed on propane-air flame seeded with potassium carbonate in electrically augmented flame burner

14 p2546 A70-31097

Physicochemical methods of producing formaldehyde for carbohydrate synthesis in life support systems

15 p2693 A70-32676

Triatomic hydrogen positive ion-yielding reactions, using EVA ion-molecule beam apparatus

16 p2855 A70-33012

Formose sugars production from formaldehyde, discussing economic conversion by catalytic reactions

16 p2855 A70-33063

Epoxide ring reactivity and crosslinking related to adjacent electrophilic and electronegative groups, considering epoxy resin technology

16 p2936 A70-33357

Shear flow turbulence effect on chemical reactions, considering two dimensional low speed turbulent mixing layer between high velocity cold gas and air at rest

[AIAA PAPER 70-721] 16 p2855 A70-33493

Turbulent and reacting flows temperature and mixing rates determination, using gaseous HF tracer spectroscopy

[AIAA PAPER 70-726] 16 p2856 A70-33497

Spacecraft attitude control microthrusters utilizing catalytically reactive gas mixtures during pulse mode and steady state operation

[AIAA PAPER 70-614] 16 p2969 A70-33611

Gas phase chemical reactions effect on heat transfer to charring ablator, deriving numerical solution for multicomponent stagnation point flow

[AIAA PAPER 70-869] 16 p2999 A70-33912

Ethylene and ethylene-acetylene mixtures ion-molecule reaction product distributions calculation using quasi-equilibrium theory of unimolecular reactions

16 p2858 A70-34012

Ti interaction with elements of periodic systems, considering binary system phase diagrams

17 p3115 A70-34384

Nonreacting and chemically reacting laminar flows, calculating equilibrium, nonequilibrium and ideal gas laminar boundary and viscous shock layers over hyperboloid

[AIAA PAPER 70-808] 17 p3005 A70-34456

Hypersonic flow of chemically reacting binary mixture of oxygen atoms and molecules past blunt body, presenting viscous shock layer equations and slip boundary conditions

[AIAA PAPER 70-805] 17 p3005 A70-34458

Time dependent solution for inviscid hypersonic flow of chemically reacting gas mixture about blunt bodies

[AIAA PAPER 70-771] 17 p3009 A70-34502

Chemical kinetic and turbulent transport coefficients effects on afterburning rocket exhaust plumes and sea level transverse radar attenuations

[AIAA PAPER 70-733] 17 p3194 A70-34513

Agents for deoxygenation of nitro and nitroso groups

17 p3042 A70-35329

Relaxation gas dynamics with chemical reactions, emphasizing differences and similarities with classical gas dynamics behavior

17 p3071 A70-35467

Nonequilibrium nozzle flows involving molecular vibrational energy relaxation and composition changes from gas phase chemical reactions respectively

17 p3071 A70-35469

Onsager reciprocal relations experimental validity in irreversible processes application to metals, electrokinetics, isothermal diffusion, heat conduction, chemical reactions, etc

17 p3197 A70-35538

Transport processes in chemical reactions and biological functions of living systems, using nonequilibrium thermodynamics approach

17 p3032 A70-35539

Detonation in nonuniformly heated gas capable of chemical reaction, obtaining numerical solution

17 p3198 A70-35737

Gas dynamics of explosions and reacting systems - Conference, Novosibirsk, U.S.S.R., August 1969

17 p3074 A70-35882

ADP-ATP catalyzed exchange reaction in turtle bladder microsomes, using chromatographic measurements of conversion rates

17 p3034 A70-35900

NO in earth atmosphere, describing theory of formation for explaining observed density distribution

18 p3245 A70-36019

Reacting gas relaxation with particle sink removing products from system calculating relaxation processes during equilibrium state approach

18 p3292 A70-36291

Space vehicle reentry hypersonic boundary layer characteristics, considering air components chemical reactions due to excessive heat

18 p3346 A70-36384

Emission spectral distribution of atomic nitrogen reaction with carbon tetrachloride for artificial luminescent clouds

18 p3293 A70-36990

Chemical reactions neutralizing electron-ion gas in F region

18 p3255 A70-37044

Heat transfer coefficient of chemically reacting gas mixture as function of Lewis-Semenov number, discussing nitrogen dioxide decomposition

19 p3550 A70-37251

Multicomponent chemically unstable nonequilibrium gas flow past body, taking into account boundary layer behavior

19 p3373 A70-38182

Chemical reactions of ions and neutral particles in D region, discussing photochemistry of atomic oxygen and ozone and reaction rate constants

19 p3418 A70-38905

Addition and hydrogenation reactions of azomethines in chemistry of carbon-nitrogen bond, emphasizing Schiff bases

20 p3582 A70-38978

Water vapor effect on carbon dioxide reaction with lithium hydroxide in dynamic isothermal system

20 p3582 A70-39227

Hydrogen-oxygen flames recombination rates measurements analysis, taking into account reverse reaction rates

20 p3583 A70-40470

Methane and hydrogen consumption rates during slow reactions in mixtures of molecular hydrogen, oxygen and nitrogen

21 p3772 A70-40879

Carbon dioxide-atomic oxygen reaction rate constant to investigate Martian ionosphere, discussing reactions involving oxygen, nitrogen molecular ions and NO

21 p3886 A70-41067

Shock tube measurements of bimolecular reaction rates in branched chain hydrogen-carbon monoxide-oxygen system, monitoring flame band emission

21 p3773 A70-41314

Adiabatic-transition state theory of chemical reactions in dilute gases with separate binary collisions, considering Morokuma, Eu and Karplus results

21 p3773 A70-41396

Solid phosphorus triamide derivatives as ignition aids in hypergolic propellant systems, testing characteristics in interaction with oxidizers

21 p3865 A70-41404

Barrier heights for hydrogen-iodine reaction from semiempirical four-electron valence bond calculation

21 p3780 A70-41709

Combustion rate as function of oxidizer molecular refractivity in perchlorates and nitrates of aliphatic and aromatic mono- and polyamines explosives

21 p3783 A70-42241

Equilibrium sonic velocity in reacting gas mixture in nozzle flow for unlimited species and independent chemical reactions

22 p4074 A70-42753

Equilibrium performance of closed Stirling cycle with chemically reactive gas as working fluid, discussing power density and thermal efficiency

22 p3982 A70-42756

Nonequilibrium gasdynamic and thermodynamic properties of chemically reacting gas mixtures in high expansion subsonic and supersonic nozzles for selected rocket propellants

22 p3982 A70-42761

Thermosphere, stratosphere and mesosphere reactions involving water, hydrogen, methane, ozone, nitric oxide and nitrogen peroxide

22 p4023 A70-43298

Chemical reaction product fluctuations in reacting and nonreacting turbulent wake of sphere in water tunnel detected by injected salts conductimetric titration

[AIAA PAPER 68-686] 23 p4134 A70-44570

Reacting gas supersonic flow over two dimensional base, examining reaction rate effects on base pressure

23 p4135 A70-44626

Heat transfer in chemically reacting gases boundary layers, obtaining approximate solution by film theory

24 p4428 A70-45101

Air revitalization chemicals reactions with water vapor and gaseous carbon dioxide, describing apparatus for kinetic studies

24 p4307 A70-45348

Al purification by subhalide reaction, discussing contamination sources and thermodynamics

24 p4349 A70-46187

CHEMICAL REACTORS

Mass action law-polynomial optimization analogy, illustrating optimal temperature determination in chemical reactors in series

01 p0143 A70-10925

Reactor surface and propylene role during vapor phase partial oxidation of propane in continuous flow tubular reactors

02 p0250 A70-12017

- Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios
[AIAA PAPER 69-420] 13 p2473 A70-28507
- Chemical reactor using successive rapid multiple electrical explosions of metal wires 15 p2717 A70-32436
- Optimal startup control of jacketed tubular reactor with first order reversible exothermic reaction, presenting distributed maximum principle for diffusional parameter system 16 p2885 A70-33330
- CHEMICAL RELAXATION**
U MOLECULAR RELAXATION
CHEMICAL SHIFT

Photodecomposition of 1,4-dichlorobutane sensitized by n, pi singlet state of acetone as chemical process 04 p0646 A70-15319

Block diagrams of three stage device for extracting radioactive Ar from perchloroethylene considered for solar nucleus studies 05 p0845 A70-15933

Synthesis of alpha-dichloro-seco-A-norcholestanol from diol monoacetate reaction with triphenylphosphine followed by hydrolysis and repeated chlorination 06 p1005 A70-17975

Inductive effect in C-Cl chemical bonds in chloroalkenes, using nuclear quadrupole resonance frequencies shifts 09 p1630 A70-22903

Flame-resistant trichloromethyl-containing polyester-styrene system, describing curing characteristics at room and higher temperatures 10 p1907 A70-24066

Direct sensitized photolysis of various dichlorobutanes yielding HCl 16 p2855 A70-33089

Dichlorodifluoromethane ionization and attachment coefficients for wide pressure range 22 p4076 A70-42373

CHLORINE FLUORIDES

Materials static tested for compatibility with pure and moisture contaminated chlorine pentafluoride at 160 F and ambient temperatures 09 p1742 A70-23250

Thermal dissociation kinetics in chlorine pentafluoride over high temperature range 11 p1994 A70-25823

CHLORINE OXIDES

Chlorine dioxide-methane mixture flame stabilized in low pressure burner, determining emission spectra, burning velocity, activation energy, etc 02 p0251 A70-12033

Ammonia/chlorine dioxide and ammonia/chlorine dioxide/methane flames burner stabilization and burst velocities 02 p0400 A70-12670

Premixed flames of methane with chlorine dioxide and perchloric acid, comparing properties with methane-oxygen flames, suggesting unified reaction mechanism 07 p1425 A70-20007

Ammonia-chlorine dioxide flame stabilization for simulating ammonium perchlorate combustion at high pressures 11 p2099 A70-25994

CHLOROPHYLLS

Ruby laser Q switching by chlorophyll d and derivatives, discussing peak output power 01 p0114 A70-11391

Backscattered sun and skylight spectra from sea obtained from low flying aircraft as measure of chlorophyll concentration 09 p1666 A70-22250

Remote sensing from aircraft and satellites of chlorophyll concentrations for monitoring of biological productivity of sea 12 p2217 A70-26915

Ruby laser Q switching by chlorophyll thin film, discussing characteristics and mechanics 13 p2429 A70-29670

Cotton plant leaves from high saline soil area, observing chlorophyll content on color photographs 14 p2576 A70-30977

Manganese deficiency effect on chlorophyll fluorescence in algae adapted to hydrogen, determining electron transport mechanism 16 p2848 A70-33291

Visible and near IR radiation reflectance from vegetation, discussing incident solar radiation plant structures, leaf areas shadows and absorption by chlorophylls 22 p4014 A70-42767

CHLOROPLASTS

Electron paramagnetic property in chlorophyll molecules of spinach subchloroplast determined using pulsed ruby laser 03 p0421 A70-13551

UV radiation effects on pea plant chloroplasts photosynthesis at high altitudes, noting disruption of electron-transport chain reactions and cyclic phosphorylation 08 p1445 A70-21216

Streptomycin effects on *euglena gracilis* chloroplasts, comparing effects on chloroplastic ribosomal system to cytoplasmic ribosomal system 09 p1616 A70-22302

Hill reaction color sensitivity in red and blue light during chloroplast disintegration, considering oxygen evolution capacity 15 p2684 A70-32548

CHLOROPRENE RESINS

Radio Influence Voltage (RIV) nondestructive test method for detecting voids in neoprene-steel structures or other elastomers bonded to metal 13 p2420 A70-29245

CHOICE

U SELECTION

CHOLESTEROL

NN dimethylguanidine for prevention of arterial lesions induced by cholesterol in rabbits 01 p0020 A70-10707

Electric field effects on dielectric properties and molecular arrangements of cholesteric liquid crystals with temperature dependent helical pitch 01 p0160 A70-11352

Hypercholesterolemia chemotherapy experimental results with five hypocholesterolemic drugs /nicotinic acid, triparanol, aluminum nicotinate, Atromid and nonfeminizing estrogen/ 03 p0426 A70-13937

Statistical data to demonstrate atherosclerotic diseases affected by cholesterol and saturated fatty acids in foods 03 p0430 A70-14277

Plasma lipids and lipoprotein changes following myocardial infarction, discussing rise and normal return times of free fatty acids, cholesterol and beta lipoproteins 04 p0636 A70-15464

Helical twisting power of steroidal solutes in cholesteric mesophases, discussing nematic temperature shift dependence on ester chain 08 p1455 A70-21524

Room temperature cholesteric liquid crystals retention of information on past electric field excitation by changes in optical transmission properties 09 p1740 A70-22924

Calibration of shear sensitive cholesteric liquid crystals film, measuring shearing forces and scattering light intensity 09 p1656 A70-22992

Liquid crystal of cholesteryl chloride and myristate measured for complex dielectric constant, noting role of molecular rotation modes in dipole relaxation 12 p2180 A70-26859

Coronary heart disease prediction based on clinical suspicion, age, total cholesterol and triglyceride, using relationships established by cinearteriographic studies 23 p4145 A70-43947

Cinecoronary arteriographic investigation of chest pain patients, establishing correlations of clinical symptoms, coronary artery narrowing, arterial lesions, serum cholesterol levels, etc 23 p4145 A70-43948

CHOLINE

Acetylcholine concentration, esterase activity and synthesis in cerebral tissue of rats under repeated mechanical vibrations combined with noise 06 p0993 A70-17425

Sleep-wakefulness cycle regulation role of serotonin, noradrenalin and acetylcholine in CNS of animals 15 p2680 A70-31745

Ganglione and quaterone cholinolytic agents effects on arterial blood acid-base balance indicators in cats 24 p4298 A70-45633

CHOLINERGICS

Cholinergic muscarine-mechanism participation in radioprotective effect after cholinomimetics administration, reducing protective reactions against tissue irradiation and increasing mice survival rate 09 p1624 A70-22820

Cholinergic nervous mechanism of autoregulatory dilatation of pial arteries under decreased blood supply to cerebral cortex in rabbits 09 p1622 A70-23583

CHOLINESTERASE

Acetylcholine concentration, esterase activity and synthesis in cerebral tissue of rats under repeated mechanical vibrations combined with noise 06 p0993 A70-17425

CHONDRITES

NT CARBONACEOUS METEORITES

NT ORGUEIL METEORITE

Chondrite-normalized lanthanide pattern of silicate inclusion of Woodbine iron meteorite, showing differences from mesosiderite phase and chondrite 01 p0177 A70-10340

Nitrogen abundances measured in enstatite chondrites by inert carrier gas fusion extraction technique, noting agglomeration of chondrules

01 p0179 A70-10475

Gray hypersthene Ramsdorf chondrite with thermal and mechanical alterations, discussing shock heating, metal plus troilite melt redistribution, collision and rapid cooling effects

03 p0563 A70-13147

Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation

03 p0569 A70-13357

Age and initial strontium for Guarena chondrite, determining differential evolution of Rb/Sr systems involving simple metamorphism of closed systems or multistage processes

03 p0576 A70-14088

Bronzite, hypersthene and amphoteric chondrites examined by X ray diffraction for inert gas retention ages relationship to shock and reheating

05 p0912 A70-16448

X ray diffraction analysis for composition and structure of meteorites found in Kansas, classifying as hypersthene and bronzite chondrites

05 p0912 A70-16466

I-Xe dating of Abee enstatite chondrite by combined neutron activation and mass spectrometric analysis

05 p0915 A70-16829

Pueblo de Allemande chondrite unextractable carbon content using meteorite pyrolysis, obtaining aromatic hydrocarbons

07 p1380 A70-19204

Bismuth concentrations in various carbonaceous and equilibrated chondrites determination by neutron activation technique

07 p1388 A70-20036

Ti demonstrated as predominantly chalcophilic in highly reduced enstatite chondrites and achondrites

07 p1391 A70-20352

Shock wave compression of single olivine crystals and specimens from chondritic meteorites, observing planar deformation microstructures

07 p1391 A70-20353

Uranium abundance in hypersthene chondrites determined by homogenized fission track analysis, comparing age estimation with iron meteorite event occurrence

07 p1391 A70-20354

Micrococcus radiodurans and *Sarcina flava* radiation resistance from proton irradiation tests in carbonaceous chondrite Migé

08 p1441 A70-20550

Rare gases abundance patterns on earth and in chondrites, proposing chemical adsorption mechanism at planetesimal stage during accretion

09 p1764 A70-23610

Enstatite chondrites and achondrites electron microprobe analysis for Si, P and Ni in metal grains and associated schreibersite and perrite

10 p1935 A70-23849

Ureilite structures and relationship to carbonaceous chondrites, considering chemical composition, diamond content, age, size, etc

10 p1941 A70-24552

Chondrites elements fractionation in solar nebula starting from carbonaceous material

10 p1949 A70-25329

Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation

11 p2118 A70-26722

Microchondrules from chondritic meteorites, investigating morphology, composition and structure

13 p2487 A70-28696

Holbrook chondrite specimen, discussing effects of weathering, leaching and trace elements enrichment over period of time before recovery

13 p2487 A70-28698

Enstatite chondrites K, Rb and Sr concentrations, measuring ages from Sr87/Sr86 ratios

16 p2974 A70-33649

Chondritic and achondritic meteorites Zr and Hf abundances, distributions and ratios, using thermal and neutron activation analyses

18 p3310 A70-35968

Kingfisher meteorite metal particles microstructures, discussing phase transformation during reheating by shock

18 p3310 A70-35970

Meteorite I-Xe 129, demonstrating cold assembly of unequilibrated chondrite

19 p3519 A70-38036

Chondrites and terrestrial rocks trace elements by neutron activation analysis, discussing radiochemical separation and computer analysis of gamma ray spectra

20 p3582 A70-38980

Allende meteorite age determination, probing K, U and rare gases in whole rock and chondrule samples

21 p3920 A70-41939

Chondrites Ti content by neutron activation analysis

21 p3921 A70-41941

Chondritic meteorites electron and nuclear magnetic resonance spectra at various frequencies

23 p4239 A70-43897

Terrestrial and chondritic vanadium isotopic ratios indicating irradiation histories difference

24 p4402 A70-45381

V and Cu emission spectrographic analyses in chondrite types, noting distribution patterns between groups based on meteorite chemical fractionation mechanisms

24 p4411 A70-45789

Murchison and Lost City chondrites element abundance analysis by thermal neutron activation and wet chemical techniques, noting low oxygen content

24 p4411 A70-45790

Borgo San Donino chondrite petrology and mineralogical and chemical composition, considering texture and recrystallization features

24 p4411 A70-45791

Chemical composition and degree of thermodynamic equilibrium reflected in ferromagnesian silicates of chondrites

24 p4411 A70-45793

CHONDRULE

Carbonaceous material genesis in Tieschitz meteorite from electron microprobe analysis, discussing chondrule formation process residue likelihood

08 p1578 A70-21561

Microchondrules from chondritic meteorites, investigating morphology, composition and structure

13 p2487 A70-28696

Allende meteorite age determination, probing K, U and rare gases in whole rock and chondrule samples

21 p3920 A70-41939

CHOPPERS [ELECTRIC]

U ELECTRIC CHOPPERS

CHOROID MEMBRANES

Ox, calf, pig, rabbit, guinea pig and human eye measurements, determining wet and dry weight of iris, ciliary body and choroid

24 p4305 A70-46346

CHORUS [DAWN PHENOMENON]

U DAWN CHORUS

CHORUS PHENOMENON

U DAWN CHORUS

CHROMATOGRAPHY

Gas-liquid chromatographic separation applied in derivatization chemistry of protein amino acids as N-trimethylsilyl (TMS) esters

09 p1629 A70-22337

Dispersion/peak broadening in gel chromatography measured with nonporous and porous column packings, suggesting diffusion controlled separation with linear permeation isotherm

12 p2181 A70-27474

Time resolving X ray grating polychromator, discussing photoelectric attachment with surface barrier semiconductor detectors

22 p4037 A70-43069

Gel permeation chromatography peak broadening, discussing liquid dispersion factors and column efficiency

24 p4310 A70-46349

CHROME

U CHROMIUM

CHROMITES

Oxide spinel formation kinetics and reaction mechanisms with emphasis on Ni and Co chromites, discussing cation diffusion

09 p1739 A70-22307

Nickel chromite structural changes, thermal conductivity and dilatation during tetragonal-cubic transition, noting phonon-lattice effect

13 p2437 A70-28855

Chromite, zircon and quartz crystals in Muong Nong type tektites by X ray diffraction, discussing possible impact origin

20 p3709 A70-40088

Titanian and aluminian chromites and chromian ulvospinel in Apollo 11 fines, microbreccias and basaltic type igneous rocks

21 p3895 A70-41505

CHROMIUM

NT CHROMIUM ISOTOPES

Thermal diffusivity coefficient and conductivity of Cr at high temperatures determined by plane temperature wave method

01 p0117 A70-10190

Excitation, reemission and absorption spectra of Cr activated powdery Mg titanate prepared, using MgO and Ti dioxide with LiCl as flux

02 p0350 A70-11848

Cr diffusion coating influence on fatigue life of Fe and steel, discussing residual stress measurement technique

02 p0320 A70-12848

Serrated plastic flow in stable austenitic stainless steels based on Fe/Ni, showing strength dependence on C and/or Cr presence

03 p0506 A70-13134

Nonuniformity of dislocation structure and stress distribution in deformation of Cr samples longitudinal sections subjected to upsetting

03 p0511 A70-13488

V and Cr single crystals microhardness anisotropy and causes, noting similarity with W, Nb and silicon ferrite

06 p1088 A70-17613

Chromized molybdenum thermal stability under cyclic induction heating and subsequent air cooling

07 p1304 A70-18743

Chromium films obtained on tungsten by sputtering, studying structure and work function at various temperatures

08 p1516 A70-21123

Transition kinetics during linear to parabolic oxidation of Cr in water-hydrogen gas mixture measured thermogravimetrically

08 p1521 A70-21558

Chromium structural dislocation and cell formation during deformation as function of temperature, impurities and strain rate

10 p1902 A70-23861

Cellular structure and grain size effects on mechanical properties of strained and recrystallized chromium

10 p1902 A70-23862

Diamond burnishing effects on wear and contact endurance of chromium coatings, investigating surface hardening and residual stresses

13 p2419 A70-28868

Diffusion layer microprobe analysis during chromaluminization of Inconel turbine blade

14 p2595 A70-30293

Chromium lattice vibrational properties based on fourth-nearest-neighbor tensor force model, obtaining agreement with inelastic neutron diffraction data and elastic constants

14 p2626 A70-30480

Hydrostatic pressurization effect on ductile-brittle transition temperature of polycrystalline chromium

18 p3274 A70-36053

Fe and Al impurities in bis-ethylene chromium (BEC)/Cr and in chromium films obtained by thermally induced decomposition of metal organic compound

18 p3297 A70-36463

Valent state of chromium doped barium titanate from EPR spectra and magnetic susceptibility measurements

22 p4086 A70-43133

Longitudinal phenomena and two phase structures effect on ductility of low carbon steel-chromium subjected to high temperature torsion

24 p4361 A70-46173

Chromium ions isothermal annealing kinetics in X ray irradiated ruby crystals, using EPR method

24 p4382 A70-46253

CHROMIUM ALLOYS

NT CHROMIUM STEELS

NT RENE 41

Silicide, aluminide and boride coatings transition temperature holdability, considering nitridation/oxidation protection for Cr alloys

01 p0122 A70-11241

Semicoherent interface dislocations in directionally solidified Ni-Al-Cr eutectic, discussing lattice mismatch

01 p0123 A70-11247

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition

01 p0124 A70-11600

Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness

01 p0124 A70-11617

Chromium refractory alloys, discussing production difficulties, mechanical properties, engineering applications, etc

02 p0320 A70-12760

Mechanical properties of ordered Ni-Cr alloys, establishing hardening effect of annealing

03 p0505 A70-13105

Solid thoria yttria electrolyte applications in EMF measurements for Cr thermodynamic properties in Fe-Cr and Ni-Cr alloys

03 p0483 A70-13140

Cr alloys applications in high temperature environments, describing alloying elements effects on strength and ductility

03 p0511 A70-13566

Ni-Cr alloy oxidation resistance dependence on small amount of Al at high temperatures, noting role of protective oxide layer

03 p0514 A70-14315

Chromoaluminizing process protecting alloys for gas turbines against oxidation at high temperatures by diffusion mechanism

04 p0711 A70-15683

Ni-Cr alloys oxidation dependence on temperature and Cr concentration

06 p1087 A70-17609

Ni-Cr alloys effects of grain size and surface deformation on oxidation properties at high temperature

06 p1088 A70-17610

Aluminosilicate coatings for increased Ni-Cr alloys heat resistance due to silicon properties

06 p1089 A70-17743

Quadratic precipitate transformation into orthorhombic phase with conservation of maximal atomic density planes in Ni-Cr-Nb and Ni-Cr-Ta alloys during prolonged reheating
08 p1518 A70-21240

Matrix stiffened nickel-chromium welding products featuring high tensile strength at room and elevated temperatures and high impact strength at cryogenic temperatures
08 p1508 A70-21488

Ni-Cr superalloys hot corrosion, studying sulfidation-oxidation in various synthetic controlled gas mixtures
09 p1706 A70-22944

Order-disorder transition temperatures for Ni-Cr alloys determined by neutron diffraction, discussing homogeneous ordering of atoms
09 p1707 A70-23196

Phase diagram of Ti-Ta-Cr system, plotting isothermal and polythermal sections by microstructural and X ray analysis
09 p1709 A70-23787

Ni-Cr alloys hardened by complex alloying with Ti-Al or Ti-Zr-C additions, improving strength at elevated temperatures in oxidizing atmosphere
10 p1904 A70-24836

Binary Ni-Cr alloys tensile mechanical properties at 25 C after water quenching and heat treatments
10 p1905 A70-25172

Resistivity anomalies of nickel-chromium alloy with Al additions subjected to deformation and heating, studying K-state
12 p2254 A70-27496

Dispersion strengthened Ni-Cr alloys elastic and plastic properties at room temperature, studying preferred crystallographic orientation effect
12 p2255 A70-27609

X ray K spectra of Ti-Cr alloy for electron structure in titanium chromide phase region, discussing spectral intensities
13 p2435 A70-29375

Cellular precipitation in lamellar eutectic and cast Ni-Cr alloys
15 p2761 A70-32383

Beta-Ti and Ti-Cr single crystals elastic moduli, determining A ratio temperature dependence
17 p3115 A70-34380

Physical properties and structure of Cr-Ni austenitic stainless steels with high Mn and N content as function of temperature
17 p3125 A70-35143

Binary Co-Cr alloy open circuit potential and microstructure, examining effects of composition, heat treatment, allotropic transformation and precipitation
18 p3271 A70-35966

Microstructural changes of Ni-Cr lamellar eutectic alloy during creep deformation at 625 and 760 C
18 p3272 A70-36034

Cr-Ni system activities and phase boundaries determined by solid electrolyte technique
18 p3273 A70-36040

Sulfidation kinetics and scale morphology of Cr and Cr-Mo alloys at high temperatures in hydrogen/hydrogen sulfide atmosphere
19 p3452 A70-37827

Isothermal section at 1150 C of V-Zr-Cr cast and annealed alloys investigated by X ray and metallographic analyses, establishing various phase regions
19 p3453 A70-38711

Dispersion strengthened Ni-Cr alloys creep properties, investigating temperature, applied stress and thorium dioxide particles effects
20 p3644 A70-38984

Unidirectionally solidified carbide reinforced Co-Cr eutectic alloy, examining tensile strength and creep behavior
24 p4358 A70-45236

Eutectic NiAl-Cr alloys, investigating quaternary additions effect on rod-plate transition to faceted microstructure
24 p4359 A70-45244

Prestraining effect on cellular precipitation in Ni-Cr lamellar eutectic during creep testing
24 p4359 A70-45247

Phase regions and lattice parameters of isothermal section of Mo-Zr-Cr system at 1100 C from microstructural and X ray analyses
24 p4361 A70-45832

High purity Cr-Ni heat resisting steels, investigating phase transformations with microhardness measurements magnetic analysis, X ray diffraction and microstructure examination
24 p4362 A70-46181

Fe-Cr and Fe-Cr-V system miscibility gap, using differential thermal analysis and Mossbauer effect measurements
24 p4362 A70-46190

Fe-Cr alloy powders obtained with thermodynamic saturation from point sources, determining optimal mixture compositions and parameters
24 p4350 A70-46338

CHROMIUM CARBIDES
Quantitative separation of metastable and cubic chromium carbides in alloyed Cr steels utilizing hydrogen peroxide
03 p0504 A70-12981

Boron effects in austenitic stainless steels, considering chromium carbide formation, high temperature strength, ductility, etc
16 p2916 A70-33079

Dissociation energy of vanadium and chromium dicarbide and vanadium tetracarbide, using Knudsen effusion mass spectrometric method
16 p2857 A70-33654

CHROMIUM COMPOUNDS
NT CHROMITES
NT CHROMIUM CARBIDES
NT CHROMIUM OXIDES

CHROMIUM ISOTOPES
Cr 51 osteotropic properties for osseous system studies, discussing binding to bones, experiments on rats and rabbits, applications for human osseous system diagnosis, etc
01 p0029 A70-11403

CHROMIUM OXIDES
NT CHROMITES
Phase diagram of dysprosium oxide-chromium oxide system constructed by microstructural analysis in 1600-2400 C range in argon atmosphere
08 p1556 A70-21118

Stannic oxide-chromium oxide catalyst effects on thermal decomposition and ignition of ammonium perchlorate /AP/, calculating activation energy
11 p2100 A70-26281

CHROMIUM STEELS
Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects
02 p0383 A70-11653

Quantitative separation of metastable and cubic chromium carbides in alloyed Cr steels utilizing hydrogen peroxide
03 p0504 A70-12981

Intergranular corrosion mechanisms in ferritic stainless steels observed by electronmicroscopic examination on Cr Fe-base alloys vacuum-melt with C and N
03 p0506 A70-13131

Austenitic fcc Cr-Mn-N stainless steels ductile-to-brittle transition behavior noting role of deformation faulting
03 p0506 A70-13133

Microstructure and impact strength of welds of Cr-Mn steel containing nitrogen, observing grain growth dependence on nitrogen content
03 p0509 A70-13277

Fe-Cr-Mn-Ni system studied to obtain high Mn austenite and establish boundaries in quaternary system
03 p0509 A70-13278

Carbaboride phase in Cr-Mn heat resistant steels at annealing temperatures, isolating gamma, chromium carboboride and niobium carbide phases
03 p0509 A70-13279

Initial oxide film on Cr-Ni steel at high temperatures observed by electron microscope, noting Ni role
04 p0708 A70-15311

Crack formation and propagation kinetics in flat and cylindrical Cr-Mo-V steels under tension compression loading cycles
06 p1162 A70-17393

Chromium stainless steels nitrided cases formation and phase composition, studying temperature effects
07 p1304 A70-18744

High chromium stainless steels nitriding and carburizing processes stabilized by nickel galvanic coating, enhancing nitrogen or carbon diffusion into steel
07 p1291 A70-18832

Reverse-bend and tension-tension fatigue properties of high strength Cr-Mn-N stainless steel sheet in notched and unnotched conditions
07 p1305 A70-18993

Cr-Mo steel strength and structural stability during tubular stress-rupture testing with high pressure hydrogen, discussing welding effect on strengths
08 p1519 A70-21455

Structural stability of friction welded joint between high temperature low alloy weld metal from CrMoV electrode and high temperature Cr steel
12 p2244 A70-28349

Structure and chemical composition of high Cr diffusion coating on Cr-Ni austenitic steels
15 p2756 A70-31634

Corrosion and mechanical properties of Cr-Ni-Mn-N austenitic stainless steels
17 p3125 A70-35144

Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects
19 p3547 A70-38426

Crack propagation resistance-cyclic fracture strength relation for Mn-Cr-V steels, considering thermomechanical working effects
23 p4204 A70-43935

CHROMOSPHERE

CHROMOSOMES
Local gamma irradiation effect on number of chromosome aberrations in lymphocytes of human blood of oncological patients after hysterectomy
01 p0013 A70-10137

Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration
03 p0426 A70-13903

Differential melting for partial purification of chemically distinct region of chromosome mycoplasma sp. /KId/
04 p0647 A70-15448

Whole body microwave irradiation effect on chromosomes and protein synthesis in Chinese hamsters
06 p0998 A70-17203

Hepatic polysome profiles and tyrosine transaminase activity daily rhythms in rats, studying dietary protein role
06 p0997 A70-18402

Soviet book on radiation genetics problems covering radiation damage of chromosomes, sexual and somatic cells, postirradiation cell recovery, etc
08 p1445 A70-20761

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs
09 p1614 A70-22083

Chromosome of temperature-sensitive mutant of bacillus subtilis 168, observing multiforked replication at normal temperature and transfer of DNA
09 p1615 A70-22206

Thymidine tracer distribution in bone marrow chromosomes of rats and mice treated with radioprotectors, noting cell metabolic activity reduction by sulfhydryl-type radioprotectors
09 p1619 A70-22818

Spaceflight effects on dry crepis capillaris seeds in five day orbit, showing chromosome rearrangements and increased mutagenic sensitivity
10 p1811 A70-24323

Computer program for flying spot scanner pattern recognition, analyzing human chromosome contour
12 p2170 A70-27938

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs
15 p2685 A70-32679

Radiation dose estimates by biological and physical methods after radiation accident, discussing chromosome aberration counting
17 p3034 A70-35761

CHROMOSPHERE
Coronal gas pressure boundary conditions on model upper chromosphere, determining temperature and hydrogen density assuming hydrostatic equilibrium
01 p0175 A70-10243

Chromospheric slitless spectrograms at 1962 eclipse, discussing Balmer-Paschen line intensities, continuum data, reduction and source error
01 p0175 A70-10244

Slitless spectrograms of chromosphere obtained during 1962 eclipse to determine H level populations decrements, self absorption in Balmer lines and chromosphere model
01 p0175 A70-10245

Chromospheric structural parameters determined from XUV spectroheliograms, discussing He 2 emission, O 4 and O 5 emission distribution, etc
01 p0175 A70-10246

Chromospheric average velocity field near sunspots determined from M alpha line absorption elements wavelength shifts
01 p0176 A70-10247

Chromospheric flares, loop prominences and filament activation and dissipation attributed to decelerated annihilation of prominence field in upper active region
03 p0557 A70-13218

UV Ceti type flare stars observational and theoretical results related to nebular or chromospheric flare models
03 p0566 A70-13316

One dimensional magnetograph scans studying photospheric velocity oscillations and supergranulation, noting downward flows coincident with chromospheric network
03 p0570 A70-13593

Chromospheric fine structure photographed at H alpha line center, discussing size, lifetimes and relationship between dark and bright mottles
05 p0910 A70-16428

High resolution observations of low chromosphere beyond limb at H-alpha line center revealing fine structures, identifying chromospheric spicules with dark mottles
05 p0910 A70-16429

K line profiles of Ca II for two component chromosphere, obtaining line source function and optical depth from steady state and radiative transfer equations
05 p0911 A70-16430

Monte Carlo radiative transfer techniques applied to develop height dependent spicule model, computing

contrast curves of model against chromospheric background

05 p0911 A70-16431

Flare radiation influence on high photospheric and low chromospheric lines in H alpha, H and K regions

05 p0902 A70-16439

MHD equations including energy dissipation terms applied to irreversible processes occurring in fast hydromagnetic shock waves in solar chromosphere

06 p1143 A70-17999

Strong explosion model for analyzing shock wave propagation after chromospheric flare allowing for quasi-radial motion of unperturbed solar wind

07 p1367 A70-19489

Radiative relaxations of chromospheric oscillations generated by granule, assuming isothermal atmosphere and linearizing equations of motion

08 p1576 A70-21395

Chromospheric flares, loop prominences and filament activation and dissipation attributed to decelerated annihilation of prominence field in upper active region

08 p1562 A70-21651

Solar chromosphere-corona transition region properties, discussing temperature increase within very thin layer and inferring temperature-density structure from emission line intensities

09 p1752 A70-22246

Small scale motions in solar photosphere and chromosphere using solar spectrograms

09 p1757 A70-22729

Solar chromosphere dark and bright mottles mean lifetime from photographs, identifying with spicules

09 p1757 A70-22733

Supergranules /convective cells/ development shown in quiet sun filtergrams of H alpha chromospheric network taken above Arctic Circle

11 p2109 A70-25741

Calcium H and K lines core residual intensities in stars with quiet and active chromosphere, suggesting activity due to thermal gradient

12 p2303 A70-27702

Solar IR triplet of singly ionized Ca, suggesting limb darkening caused by chromospheric inhomogeneities for source function inequality

12 p2303 A70-27703

Solar active regions in chromosphere and corona observed by EUV spectrophotometer aboard OSO-4 spacecraft, discussing ion formation and temperatures

12 p2303 A70-27705

Dark band in H alpha solar chromosphere above photospheric limb, outlining approaches to obtain spectrally pure observational results

13 p2486 A70-28627

Radiative energy transport effect on temperature distribution in conduction heated plane layer applied to solar chromosphere

13 p2488 A70-28716

Solar cosmic rays interaction with interplanetary shock waves, discussing chromospheric eruptions

13 p2476 A70-28959

Chromospheric flares electron concentration and structure from half widths and Balmer lines numbers

13 p2493 A70-29394

Solar chromospheric fine structure from high resolution photographs

13 p2497 A70-29849

Strong explosion model for analyzing shock wave propagation after chromospheric flare allowing for quasi-radial motion of unperturbed solar wind

15 p2795 A70-32734

Coronal structures relationship to chromospheric features in H alpha and Ca II K

16 p2977 A70-33843

Radio observations of chromospheric brightness temperature distribution during solar eclipse of March 1970

16 p2977 A70-33846

Hyades stars between F4 and K5, measuring chromospheric H and K emission lines dependence on bolometric luminosity

17 p3157 A70-34832

Red giant star chromospheric activity, discussing Balmer absorption lines and emission lines

17 p3161 A70-34889

Solar chromosphere resonance lines, observing H and K line profiles of Mg ions

17 p3161 A70-34893

Solar chromosphere model evaluation using sensitivity of flux emission in Lyman continuum

17 p3170 A70-35386

Chromospheric spicules fine structure recorded on H alpha spectrograms and filtergrams from high altitude coronagraph

17 p3174 A70-35863

Chromospheric photoelectric magnetograms with high resolution H alpha pictures for deriving magnetic field directly from filtergrams

17 p3096 A70-35864

Solar atmosphere shock waves frequency and strength, computing radiative energy losses of chromospheric models

17 p3174 A70-35865

Periodic cosmic ray variations near Southern magnetic pole related to chromospheric flares

18 p3307 A70-36102

Ba II emission lines in solar chromosphere, examining excitation and ionization equilibrium and resonance line intensities by eclipse observations

18 p3317 A70-37010

Solar chromospheric Fe abundance, considering f-value effects

19 p3524 A70-38697

Solar eclipse measurements in 1-30 mm range, examining chromosphere, flares and radio emission

19 p3531 A70-38911

Particle ejections in solar atmosphere and chromosphere structure, discussing dark halo exhibited by H alpha line in active region

20 p3699 A70-39464

H alpha chromospheric network lifetime from time lapse photographs

20 p3711 A70-40409

Ratio between mechanical energy flux in nonmagnetic region and magnetic region associated with solar chromospheric mottles

20 p3712 A70-40414

Chromosphere-corona transition region - Conference, Boulder, Colorado, August 1969

21 p3924 A70-42182

Transition region structure between chromosphere and corona, discussing temperature, theoretical models, energy balance and magnetic fields from far UV data

21 p3924 A70-42183

Chromosphere-corona transition region model from limb-disk optically thin line intensities

21 p3924 A70-42184

Oso-4 far UV observations of solar chromosphere and corona active regions

21 p3925 A70-42187

Heating and extension of solar chromosphere and corona via shock waves generated by piston below convection zone surface

21 p3925 A70-42189

Solar chromosphere spicules acceleration via supersonic jet formed by magnetic field under gravity and Melon seed effect

21 p3925 A70-42192

Solar chromosphere elements abundances methods, suggesting Fe differences origin in Fe I and Fe II inconsistencies

21 p3925 A70-42194

Vertical oscillations in solar temperature minimum suggested as acoustic-gravity waves modes dependent on height at chromosphere-corona interface

21 p3926 A70-42196

Transition zone height in corona-chromosphere interface from high resolution disk spectra near limb

21 p3926 A70-42198

Lower chromosphere shock wave heating, analyzing density scale height effects

22 p4105 A70-43001

Spectroscopic differential photosphere and chromosphere rotation with height in solar envelope

23 p4252 A70-44831

Solar chromosphere model convective instability, considering temperature and magnetic field effects

24 p4399 A70-45303

Chromospheric heating in magnetic field above supergranular cell boundaries, using geometric optics method for energy transport by hydromagnetic shock waves

24 p4400 A70-45304

IR observation of chromospheric Ca II K-line during total eclipse of 7 March 1970

24 p4401 A70-45314

CHRONIC CONDITIONS

Glucose metabolism in chickens under chronic centrifugal acceleration, meeting increased energy requirements

23 p4147 A70-44786

CHRONOGRAPHS

U CHRONOMETERS

CHRONOLOGY

Coronary thromboses age estimation based on comparison of blood cells, fibrin, collagenous tissue and neocapillaries quantitative changes

03 p0426 A70-13938

Bronzite, hypersthene and amphibole chondrites examined by X ray diffraction for inert gas retention ages relationship to shock and reheating

05 p0912 A70-16448

Moon rocks nature and mineralogical constitution, describing methods for age determination

14 p2634 A70-30275

Lunar maria absolute age from lunar craters rim height changes via isostatic settling and small craters quantity

14 p2649 A70-31213

CHRONOMETERS

Analog and digital electronically counting chronometers for extremely short times measurements

02 p0295 A70-11868

Multichronometer for multiple time intervals measurement with picosecond resolution, using mixed analog and digital methods

[SMPT PREPRINT 112] 22 p4031 A70-43029

CHRONOPHOTOGRAPHY

Time lapse photographic recording and scoring in-flight performance of helicopter aviator trainees during hypothetical tactical instrument mission

09 p1624 A70-22900

SFR high speed photochronograph for visible and UV raster, stereoscopic and spectral photography

24 p4335 A70-45652

CHRONOTRONS

U PULSE RATE

U TIME LAG

CHUGGING

U COMBUSTION STABILITY

CHUTES

Concorde aircraft design for emergency passenger evacuation, emphasizing overwing inflatable escape slides and kinetic heating effects

15 p2675 A70-32222

CINEFLUOROGRAPHY

U MOTION PICTURES

U RADIOGRAPHY

CINEMATOGRAPHY

Optimum procedure for high speed cinematography of holographic interferograms permitting microsecond exposures while retaining picture quality

02 p0298 A70-12213

Cine recording ophthalmoscope with TV monitoring for retinal photography during centrifugation

06 p1061 A70-17286

Polarization-optical kinematographic method for study of mechanical stresses during dynamic loading

09 p1680 A70-23174

Rapid exposure scanning camera for high speed cinematography, discussing optical system and operation principles

20 p3632 A70-39748

High speed cinematographic recording of wake behind hypervelocity projectiles

[SMPT PREPRINT 102] 22 p4032 A70-43033

Phase locked solid state laser with picosecond pulses applied to high speed cinematography

[SMPT PREPRINT 22] 22 p4034 A70-43051

Cantilever beam transient response measurement by stored beam /real time/ holographic interferometry combined with high speed motion picture photography

22 p4039 A70-43452

CINERADIOGRAPHY

U MOTION PICTURES

U RADIOGRAPHY

CINETHEODOLITES

Real time opto-triangulation by cinetheodolites for data acquisition used in rocket impact prediction

09 p1640 A70-23779

CIRCADIAN RHYTHMS

Photoperiod variation effects on ambulatory primate Cebus albifrons deep body temperature /DBT/, locomotor activity /LMA/ phase relationships and DBT waveform

01 p0011 A70-10035

Male rats locomotor activity responses to altered photoperiods during exposure to varied-light artificial days

01 p0015 A70-10367

Light synchronization of deep body temperature rhythms in Macaca nemestrina, investigating efficiency

03 p0416 A70-13013

Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness schedule on healthy pilots subjected to solitary confinement

03 p0423 A70-13711

Diurnal periodicity of physiological functions of flight crews flying through several time zones found to correspond to time zone of permanent residence

03 p0425 A70-13894

Circadian rhythms characteristics in humans, animals and plants, noting possible effects of rhythm disturbances on astronauts

04 p0629 A70-14567

Biological rhythm perturbations effect on astronauts, emphasizing waking-sleeping rhythm during space flights

04 p0630 A70-14610

Temperature variations in organs of man and animals performing physical work as physiological base of metabolic processes and for daily activity timetable development

04 p0638 A70-15502

Wake-sleep rhythm of spacecrews for operational capacity to maintain constant watch of spacecraft, suggesting recreation of terrestrial time cycle in space

05 p0799 A70-15766

Hepatic polysome profiles and tyrosine transaminase activity daily rhythms in rats, studying dietary protein role

06 p0997 A70-18402

Circadian rhythm of pilot efficiency and multiple time zone travel effects

[DFVLR-SONDR-29] 08 p1453 A70-21935

Dietary intake and adrenal cortex effects on diurnal rhythm of hepatic tyrosine transaminase activity and adrenal corticosterone content in rats

Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness schedule on healthy pilots subjected to solitary confinement

Drosophila brain Circadian oscillation as gating device restricting emergence behavior of adult

Daily electrolyte excretion dynamics of subjects with shifted work-rest schedule, noting disagreement with Sharp results

Rats under constant environmental conditions exhibiting circadian rhythmicity in rate of bar pressing with hypothalamic and septal reinforcing brain electrical stimulation

Circadian variation of pituitary-adrenal steroid levels, noting light role

Circadian rhythmic changes in biological organisms by earth rotation, emphasizing diurnal variations role in sleep-wakefulness rhythm

Airline pilots sleep patterns during worldwide east-west routes, considering modification by irregular duty periods and time zone adaptation

Daily rhythm in accumulation of rat brain catecholamines synthesized from circulating tritiated tyrosine

Human circadian coronary circulatory rhythms during space flight weightlessness or bedrest with and without exercise

Carbon dioxide output monitoring from biosatellites for circadian system behavior in closed organism-environment systems

Circadian oscillations and photoperiodic time measurement in *Pectinophora gossypiella*

Circadian and seasonal adaptive function rhythms in animals, discussing terrestrial environment and thermoregulation

Circadian rhythms in single cell animals, examining cell division, temperature and light effects

Tyrosine content and utilization in mouse liver, showing daily rhythm in composite metabolism rate

Human sleep pattern changes due to acute sleep-waking cycle reversal

Circadian rhythms from electrocardiogram and cardiachogram of patient with human heart transplant, noting P waves relationship between donor and recipient tissues

Circadian rhythm in human body temperature by Cosinor method, showing inapplicability for narrow time span

CIRCLES (GEOMETRY)

NT GREAT CIRCLES
Green function of region near circle approximation by matrix method, considering Laplace differential equation solution, conjugate harmonic function and conformal transformation

Autocollimation technique for determining fluxure of tube of Wanschaff vertical circle

Curve arc approximation by circular arc using Chebyshev modulus-minimax principle

Angle of attack for nearly circular reentry motion, deriving expression for lateral rates frequencies

Stellar ring 373, comparing color-magnitude and color-color diagrams to adjacent star fields

CIRCUIT BOARDS

Printed circuit board connector selection techniques based on miniaturization reliability, cost and compatibility with intended application

Monolithic linear IC building blocks for radar systems circuit design

Printed circuit boards vibration control in dynamic environment, noting viscoelastic damping technique

CIRCUIT BREAKERS

Power reduction consumed in vacuum by direct-direct voltage converter by introducing delay into breaker transistor control at output stage

Fluidics for aircraft high pressure hydraulic systems, discussing circuit breaker, feel computer and landing gear sequencing circuit

CIRCUIT DIAGRAMS

Circuit parameter equations for effective circuit synthesis taking into account ratios between coefficients of polynomials in numerator and denominator

Inductive sensor design and circuitry for measuring rapidly rotating shaft bending deflections at various vibration frequencies

Equivalent transformations method for minimizing electronic equipment sensitivity to circuit components value variations during operation

Multipole coupling circuits for wideband radio amplifiers

Circuit allowing direct combining of power from several avalanche diodes, discussing CW power output, single and multiple diode oscillators, etc

Optimal directed circuit and cycle elimination in weighted diagrams by edge reversal orientation

Walsh functions electrical generation with small orthogonality error based on multiplication theory, presenting circuit diagram for 32 channel analyzer

Topology and component values in computerized design of distributed lumped active networks

Fiber optics in functional electronic circuits, considering multichannel optical communication

High speed PCM Codec with maximum 600 channel capacity applied to Time Division Multiple Access (TDMA) system for satellite communication

CIRCUIT PROTECTION

Broadband RF filter/attenuator plug to replace plastic type plugs for protecting wire bridge electroexplosive devices against RF energy

Electroexplosive devices protection from electrostatic discharge by creation of preferential discharge path, considering use of high intensity neon lamp

Philosophical, design, hardware or static sensitivity type myths refutation concerning electroexplosive devices

CIRCUIT RELIABILITY

IR microscope and digitally programmed mirror system for printed circuit inspection, allowing two dimensional scanning and magnetic tape reference

Commercial transport aircraft landing gear electrical circuitry dispatch reliability improvement, considering components causing flight delays due to maintenance problems

Open circuit development in microcircuits metallization and processing to eliminate nonuniformity, voids and microcracks

Digital network reliability with redundancy to mask logic modules failure for asymmetric failure modes

Multichannel spectrometer electronic circuitry for ionization colorimeter providing data on low energy particle interactions, emphasizing reliability and accuracy

Radio and automatic control electronic equipment reliability estimation by vibration testing, determining test stand simulation accuracy

Integrated circuit failure analysis with scanning electron microscopy taking into account ball bond contamination and open metallization at contact windows

Electronic circuits automated endurance tests by follow-up scanning method, describing error sources in proper operation region cross section determination

Solid state proximity switches, sensors, logic and self test circuits for aircraft electrical applications to improve reliability and maintainability over mechanical switches

Onboard computers automatic reliability control with implementation of self repair, modeling by Markov processes nonhomogeneous in time

SCAMP 3 program for calculation of electronic circuit DC performances statistical distribution as function of component parameters variation

Redundant amplifier /RAMP/ for reliability improvement

Circuit design characteristics and reliability relationship in electronic power supplies for performance requirements

Integrated circuits failures due to electromigration in thin films, discussing hole formation and circuit reliability prediction

High usage military system integrated circuit failure modes analysis for reliability improvement

Ripple filters for DC power supplies using reliable small capacitance capacitors suitable for spacecraft applications

Logic circuits reliability with series and parallel connected elements during random malfunctions, obtaining failure formulas for trigger

Microelectronics in space environment, discussing circuit reliability, radiation effects, etc

LSI circuits in space electronics, discussing packaging, reliability, applications, etc

Multichip hybrid microcircuits design and construction, emphasizing reliability and cost reduction

Contact-relay circuits failure free operation probability, taking into account coil winding breakage

Integrated microcircuits reliability prediction models based on failure mode and mechanism knowledge

Digital systems reliability improvement by redundancy at circuit and system levels

DC transistorized Nor logic gates design based on graphic analytic method permitting influence of circuit parameters variations for reliability improvement

Axial propellant density gradients and circuit capacitance correlated with pulsed coaxial plasma gun efficiency

One dimensional cellular logic arrays fault circumvention by bypass switching out defective cells in cascade

Algorithm for communication network synthesis from limited elements selection, considering fixed reliability requirements

RF power transistors failure analysis, describing IR radiometer technique

Integrated circuits failure analysis techniques, including electrical diagnostics, visual inspection, surface examination, shorts location, etc

Commercial satellite system circuit quality and reliability in digital communications, considering Automatic Digital Network Trans-Pac cable cut incident

Cumulative reference list of published books on microelectronics and reliability

Reliability characteristics of standby redundant electronic equipment with imperfect switching and sensing

- Resistance, capacitance and inductance in passive hydraulic circuits considered in analogy with electric circuits to determine dynamic characteristics
 03 p0415 A70-13931
- Electric current pulses peak values measurement during aperiodic capacitor discharges, describing circuit with Rogowski coil, diode, capacitor and VTM
 19 p3426 A70-37938
- Conjunctions and traditors circuit realizations, discussing resistive and dynamic nonlinear networks
 22 p3996 A70-42919
- Optimal load circuits number for maximum power extraction from Hall MHD generator with nonuniform gas flow along channel
 23 p4143 A70-44900
- CIRCULAR CONES**
- Elastic bending of thin circular conical shell subject to arbitrary variation of edge loads
 01 p0209 A70-11385
- Hypersonic flow characteristics on yawed circular cone surface at moderate angle of attack, applying results to inviscid and boundary layer flow computations
 03 p0406 A70-12944
- Pressure distribution at circular slender cone with 10 deg semiapex angle in hypersonic vacuum wind tunnel
 06 p0966 A70-17251
- Axial profile characteristics of hypersonic near wake of slender circular cone based on pitot pressure, static pressure and stagnation temperature measurements
 06 p0968 A70-17916
- Hypersonic aerodynamic measurements on cone, investigating effects of oscillatory mass addition on stability
 [AIAA PAPER 70-217] 06 p0974 A70-18171
- Inviscid hypersonic flow analysis for chemically relaxing air about wedges and pointed circular cones using Dorodnitsyn integral method
 [DGLR 69-037] 07 p1188 A70-18986
- Numerical solution for steady supersonic inviscid flow around smooth conical bodies by solving elliptic partial differential equations for conical flow
 12 p2155 A70-27202
- Supersonic and hypersonic motion past circular cone at angle of attack, analyzing for velocity and pressure distributions by linearizing conical motion equations
 12 p2158 A70-28213
- Vortex layer and entropy of supersonic gas flow past circular cones at incidence using surface velocity corrections
 12 p2159 A70-28230
- Equations of supersonic and hypersonic motion past circular cone by linearized method based on small perturbations with respect to nearly incompressible flow
 16 p2835 A70-33746
- Perfect gas three dimensional boundary layer separation on circular cone at incidence, comparing numerical calculation and experimental results
 23 p4133 A70-44207
- CIRCULAR CYLINDERS**
- Transversely isotropic circular cylinder acted upon by transient shearing force at one end, noting forced torsional oscillation using cylindrical coordinates
 01 p0200 A70-10550
- Turbulent heat transfer on heated horizontal circular cylinder rotating freely in space, discussing dimensionless numbers relations and frictional heating
 01 p0215 A70-10926
- MHD wave propagation in electrically conducting fluid contained in finite length circular cylinder subject to axial magnetic field and nonelectromagnetic forces
 01 p0152 A70-10944
- Transient temperature profiles and thermal stress distribution in circular plates and cylinders with eccentric hole determined by conformal mapping
 01 p0207 A70-11153
- Flexural wave propagation in infinitely long circular bimaterial cylinders based on equations of linear elasticity, noting dispersion characteristics different from homogeneous cylinders
 01 p0208 A70-11188
- Horizontal and vertical sound fields local effects on natural convection from heated horizontal circular cylinder, using shadowgraphy
 01 p0219 A70-11198
- Shock wave shapes in hypersonic flow past blunt conical nosed circular cylinders, using analogy with Savic perturbed hypersonic blast wave theory
 02 p0277 A70-11862
- Hypervelocity impact of small different diameter right circular cylinders, describing launching method using light gas gun
 03 p0583 A70-12918
- Gram-Charlier method generalization for curve fitting analytic forms to velocity covariances measured in turbulent wake of circular cylinder
 03 p0480 A70-12950
- Free stream turbulence effect on heat transfer in circular cylinder stagnation region
 03 p0469 A70-14216
- Magnetic boundary layer equations applied to flow past stationary circular cylinder and sphere, showing graphical variation of slip velocity with angle
 03 p0471 A70-14334
- Transverse magnetic fields effects on velocity perturbations and vortices behind circular cylinder in electrolyte flow at various Reynolds and Stewart numbers
 04 p0726 A70-14543
- Long thin cylindrical tube with circumferential restraint analyzed for thermal expansions, obtaining maximum strains, bending moments, shear forces and plastic zone extent
 [ASME PAPER 69-WA/NE-7] 04 p0768 A70-14756
- Stationary and vibrating circular cylinders for boundary layer separation point, determining vortex excited oscillation range
 04 p0670 A70-14988
- Circular cylinder drag in hypersonic transverse flows between continuum and free molecular flow, measuring drag and pressure distribution
 04 p0615 A70-15089
- Hydroelastic sloshing of liquid in partially filled circular cylinder with rigid or elastic walls, including surface tension effect
 04 p0671 A70-15092
- Thermal stresses in transversely isotropic hollow circular cylinder, applying formulas derived to reentry vehicles aerodynamic heating
 04 p0779 A70-15608
- Low Reynolds number flow of variable property gas past infinite heated circular cylinder at large temperature differences, measuring drag on cylinder
 05 p0789 A70-16014
- Perturbation effects on elastic material deformation due to nonorthogonality of curves defining curvilinear aeolotropy, with application to circular cylindrical tube
 05 p0929 A70-16065
- Thermoelastic stresses in rotating circular cylinder, analyzing temperature effect on angular velocity for neo-Hookean material using finite deformation theory
 05 p0930 A70-16080
- Adhesive rocking and parallel translation contact for circular cylindrical punch indenting elastic half space solved using simultaneous equations
 05 p0932 A70-16139
- Secondary vortex generation in near wake of circular cylinders under forced oscillation, analyzing motion dependent transition regimes using hydrogen bubbles flow visualization
 [AIAA PAPER 69-755] 06 p1032 A70-17212
- Mechanical behavior of cylinders with alternating layers of reinforcing and matrix materials derived from governing equations, including equations of motion
 [AIAA PAPER 70-134] 06 p1169 A70-18051
- Rotational and vibrational temperatures measured in hypersonic nonequilibrium rarefied gas flow field of cooled circular cylinder by electron beam technique
 06 p1123 A70-18304
- Circular cylinders drag and pressure distribution in hypersonic range between continuum and free molecular flow
 06 p0983 A70-18376
- Elastic behavior of joint formed by normally intersecting circular cylindrical shells under external bending moment, noting applicability to pipelines and pressure vessels
 [ASME PAPER 68-WA/PVP-1] 07 p1400 A70-18710
- Unsteady boundary layer flow with suction, deriving equations for circular cylinder impulsive motion
 07 p1253 A70-18862
- Plane acoustic wave steady state scattering at circular cylinder in semibounded region
 07 p1334 A70-19089
- Radial heat conduction in infinite hollow cylinder with circular cross section and periodic heat transfer coefficient at inner and outer cylinder surfaces
 07 p1423 A70-19816
- Laminar to turbulent boundary layer transition and separation on circular cylinder measured by heated end-window film sensor applicable to water flow
 07 p1259 A70-19831
- Circular cylindrical shells buckling under lateral and hydrostatic pressure using Donnell and Flugge equations, assuming membrane stress state for prebuckling deformation
 07 p1414 A70-20168
- Unsteady flow behind circular cylinder by flow visualization, determining vortices length variations with time at various Reynolds numbers and dimensionless accelerations
 07 p1261 A70-20236
- Transverse curvature effects on turbulent boundary layer thickness and velocity profiles on circular cylinders in water and air
 07 p1261 A70-20301
- External and internal three dimensional dynamic problems in elasticity theory for multiply connected region with circular cylinder boundaries
 08 p1584 A70-20537
- Multiple scattering of plane time harmonic compressional elastic wave impinged on parallel circular cylindrical inclusions in finite domain, analyzing stress field
 08 p1592 A70-21469
- Free vibration of rib stiffened freely supported circular cylindrical shells, verifying rib eccentricity importance to natural frequencies by numerical solutions
 09 p1780 A70-23211
- Plane electromagnetic wave diffraction on circular cylinder
 09 p1638 A70-23339
- Plane electromagnetic wave scattering by conducting circular cylinder/wire in air/vacuum/, computing scattering cross sections by Wiener-Hopf method
 09 p1638 A70-23347
- Heat transfer from circular cylinder in rarefied gas flow at low Mach number, using B-G-K model of Boltzmann equation
 09 p1791 A70-23582
- Forced inertial oscillations in rotating processing fluid-filled circular cylinder
 09 p1664 A70-23682
- Potential flow resistance theory, deriving monoparameter wake formula for circular cylinder moving through viscous fluid
 10 p1870 A70-24788
- Transient creep analysis of pressurized circular cylindrical shells based on strain and time hardening theories
 10 p1963 A70-25089
- Natural vibrations of truss systems of four circular cylinders hinged along walls, using linear group representation
 11 p1312 A70-25605
- Transient bending and shear stresses at clamped support of orthotropic circular cylindrical shells
 11 p1315 A70-25985
- Spatial correlation effect of unsteady sectional loads in axial direction on average or apparent loads over finite region of circular cylinder immersed in moving fluid
 11 p2036 A70-26148
- Uniform asymptotic theory of diffraction by edge of three dimensional body, obtained boundary layer solution applied to scattering by circular cylinder
 11 p2084 A70-26422
- Coupled effects of transverse curvature and pseudoplasticity on skin friction characteristics of slender circular cylinder in laminar power law fluids
 11 p2038 A70-26493
- Longitudinal vibrations of circular elastic homogeneous cylinders with end restraints
 12 p2321 A70-27152
- Flexural vibrations of homogeneous elastic circular cylinder supported at both ends, imposing zero stress conditions on skirt
 12 p2321 A70-27154
- Thin circular cylindrical polyvinyl chloride plastic shells tested under axial compression and end-shortening conditions for buckling
 12 p2324 A70-27473
- Circular cylinders torsion and plain strain analysis, completing statics by asymmetric shear and moment stresses according to Cosserat theory for plastic flow
 13 p2508 A70-28492
- Hydroelastic oscillations natural frequencies in incompressible and nonviscous liquid in circular cylinder with free surface, demonstrating wall elasticity effects
 13 p2512 A70-28832
- Unsteady fluid flow around circular cylinder with sudden acceleration using flow pattern photographs
 13 p2387 A70-29056
- Two dimensional circular cylinder vortex excitation in uniform flow using linear binary system for flutter analysis
 13 p2341 A70-29057
- Basic flow convergence or divergence effect on steady flow pattern around circular cylinder using fluid motion visualization
 13 p2387 A70-29058
- Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer
 [AIAA PAPER 69-67] 13 p2343 A70-29951
- Magnetoaerodynamic boundary layer of incompressible conducting fluid over right circular cylinder under magnetic field, showing flow separation
 14 p2621 A70-30550

Circular cylindrical membrane axially symmetric deformations, determining axial and circumferential stresses

14 p2657 A70-30844

Unsteady aerodynamic forces on oscillating circular cylinder, using wind tunnel two dimensional dynamic model

14 p2529 A70-31050

Shell homogeneity theory, considering uniform states, spheres and circular cylinders

14 p2600 A70-31280

Heat transfer coefficient from circular cylinder subjected to uniform surface heat flux and cooled by ring of holes

14 p2667 A70-31427

Heat transfer through axially symmetric boundary layer on moving circular fiber at uniform temperature

15 p2825 A70-31819

Electromagnetic waves scattering at circular cylinders in semibounded region, showing boundary influence on radiation pattern

15 p2698 A70-32174

Circular cylindrical cavity in elastic space, calculating stresses due to incident plane harmonic compression wave

15 p2819 A70-32204

Wave scattering from circular cylindrical body, considering plane wave primary source, line source, point and dipole source

15 p2700 A70-32403

Initial thermally stressed state of solid bounded by concentric circular cylinders, applying Cauchy thermoelastic stress theory

16 p2987 A70-32993

Far wake linear stability behind circular cylinders at hypersonic speed, comparing experiments and predictions

16 p2838 A70-33898

Asymptotic analysis of wave propagation modes in circular solid elastic cylinder, obtaining displacement components and frequencies as dimensionless wave number power series

16 p2993 A70-34085

Sound wave phase fluctuations from ultrasonic waves traveling through turbulent wakes of circular cylinders and plates, using multichannel pulse height analysis

16 p2839 A70-34086

Free vibration of thin circular cylindrical shells, comparing experimental results to Egle-Sewall analysis

17 p3181 A70-34520

Stress concentration around small elastic spherical inhomogeneous inclusion on circular cylinder in torsion

17 p3183 A70-34631

Analog simulation of elastic wave propagation in thick walled hollow circular cylinders to determine safe impact speed

17 p3185 A70-34964

Supersonic panel flutter of circular cylindrical shells at critical dynamic pressure

17 p3188 A70-35227

Hypersonic rarefied gas flow around flat plate with sharp leading edge and circular cylinder in transition region

17 p3011 A70-35241

German monograph on thermal stresses due to thermal shocks on front surface of infinitely long circular solid cylinder

17 p3189 A70-35371

Natural convection heat transfer from vertical cylinder outer surface to liquids, discussing apparatus design and measurements

17 p3197 A70-35540

Elastic layer with circular cylindrical cavity under axial tension /Kirsch problem/, determining stress concentration from boundary value problem

18 p3335 A70-36130

Circular cylindrical shell with round holes along generatrix subjected to internal pressure, determining stress concentration with aid of computer

18 p3335 A70-36131

Steady incompressible flow past circular cylinder at Reynolds numbers up to 100, using finite difference solutions of motion equations

18 p3238 A70-36191

Two dimensional time dependent solution for impulsive motion of circular cylinder involving viscous cross flow at moderate angles of attack

18 p3207 A70-36454

Stability of circular cylindrical shell reinforced by elastic rings at edges under longitudinal compression

18 p3341 A70-36581

External magnetic field effect on cavitation zone behind circular cylinder, proving existence of electric charges

18 p3242 A70-36645

Shallow circular cylindrical shell with rigid collar on lateral surface, calculating stress under axial tension and internal pressure loading

19 p3534 A70-37245

Torsional and longitudinal vibrations of circular cylinders of micropolar elastic solids in terms of Laplace and Helmholtz equations solutions

19 p3537 A70-37789

Long orthotropic pressurized circular cylindrical shell under radial line loads along equally spaced generators, analyzing stresses and deflections by linearization

19 p3545 A70-38338

Stiffened thin walled circular cylinders buckling and postbuckling behavior under axial compression or external hydrostatic pressure

Three dimensional photoelastic analysis of stresses and strains in hollow circular cylinders with conical ends bonded to shell and shrunk

20 p3719 A70-39621

Liquid fuel behavior in right circular cylindrical tank inclined to earth gravitational field, computing fundamental sloshing frequency

20 p3720 A70-39686

Mechanical behavior of cylinders with alternating layers of reinforcing and matrix materials derived from governing equations, including equations of motion

20 p3610 A70-39694

Perturbation method for stress-strain state of circular cylindrical shell with large curvilinear hole

20 p3732 A70-40267

Local heat transfer between heated circular cylinder and air in transverse slip flow at low Reynolds and Mach numbers

20 p3734 A70-40442

Circular cylindrical hole in uniaxial tension field of elastic media, solving plane strain problem for stress concentration factors

21 p3945 A70-41035

Circular cylindrical shell supersonic panel flutter nonlinear analysis, using averaging and numerical integration methods

21 p3941 A70-42107

Rigid circular cylindrical inclusion elastic bedding dynamic loading, calculating stresses in interface

22 p4112 A70-42275

Nonlinear flexural vibration of thin circular cylindrical shells with clamped ends, using method of averaging for stability

22 p4112 A70-42345

Thin circular cylindrical panels in supersonic gas current parallel to generatrices, calculating heterogeneity effect on flutter

22 p4112 A70-42517

Cylindrical cavity uniform expansion in compressible elastic plastic solid, calculating pressure by similarity solution

22 p4113 A70-42603

Circular cylindrical orthotropic fiberglass-reinforced shell buckling under longitudinal impact, assuming initial surface imperfections

22 p4114 A70-42634

Circular cylindrical shell with varying thickness under circumferential load and radial pressure, calculating critical load

22 p4117 A70-43347

Vortex induced vibration problems, deriving mathematical model for periodic lift on circular cylinder

22 p4117 A70-43347

Circular cylindrical shell under longitudinal line load, deriving closed form solution in Fourier series

22 p4118 A70-43547

Drag estimation for circular cylinders at subcritical Reynolds numbers and subsonic speeds, using Karman vortex street theory for wake

23 p4131 A70-43894

Elasticity theory for circular cylinder weakened by cavities, discussing boundary conditions on butt ends and Galerkin solutions

23 p4265 A70-43983

Thin circular cylindrical shells with clamped-clamped and fixed-fixed edges, calculating natural frequencies of nonsymmetrical free vibrations

23 p4266 A70-43997

Axially compressed circular cylindrical shells subject to relaxed boundary conditions, calculating buckling loads as function of length to radius ratio

23 p4269 A70-44397

Aceroelastic stability for circular cylindrical structures under periodic Karman vortex excitation

23 p4274 A70-44764

Low Reynolds number gas flow past heated circular cylinder, considering Stokes region transport properties

23 p4284 A70-44978

Microwave propagation in circular waveguide with axially magnetized gas or solid state plasma /Faraday configuration/, calculating twist modes

24 p4318 A70-45213

Circular waveguide with axially magnetized plasma, investigating twist mode propagation in InSb at 70 GHz

24 p4311 A70-45214

Two spherical particles rotation and slow motion about axis of circular cylinder in direction perpendicular to line of centers, considering fluid flow characteristics

Two dimensional boundary layer growth with suction for oscillating circular cylinder, considering stream functions and phase angles

24 p4325 A70-45781

Two dimensional incompressible air flow past circular cylindrical body, investigating separation point control by suction and jet injection

24 p4326 A70-46002

Jet momentum for flow separation control of air past circular cylindrical surface

24 p4288 A70-46010

Long wave approximation for peristaltic transport in circular cylindrical tube, noting inertia and wavelength effects on backward flow

24 p4288 A70-46011

Viscous flow stability between two concentric rotating porous cylinders, calculating critical Taylor numbers for wave numbers and velocity ratios

24 p4309 A70-46224

Optimal rendezvous maneuver of two spacecraft in circular orbits with minimum fuel consumption, taking into account propelled vehicle control program and flight path

24 p4328 A70-46366

CIRCULAR ORBITS

NT STATIONARY ORBITS

Optimal rendezvous maneuver of two spacecraft in circular orbits with minimum fuel consumption, taking into account propelled vehicle control program and flight path

01 p0193 A70-10424

Minimum propellant rendezvous maneuver of space vehicles in neighboring circular orbits

01 p0193 A70-10555

Optimal rendezvous between satellite and spacecraft, determining power and time optimal coplanar rendezvous in circular orbit

01 p0139 A70-11479

Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient

01 p0197 A70-11481

Continuous and pulsed parameter stabilization for circular orbits of navigation and communication satellites under perturbing effects of oblateness and atmospheric drag

02 p0374 A70-12402

Gyrost motion stabilization with respect to unperturbed circular orbit vector radius, considering gravitational, aerodynamic, perturbation moments action and zero dry friction moment

03 p0484 A70-13370

Medium duration optimal rendezvous between near circular noncoplanar orbits with close orbital planes, analyzing six impulse solutions

03 p0571 A70-13639

Navy navigation satellite passes predicted by equations for rise and set times, elevation and azimuth in plane circular polar orbit about spherical earth

04 p0764 A70-15431

Hybrid system for allocating domestic synchronous communication satellites in concentric circles within inclined elliptical synchronous orbits

05 p0906 A70-15801

Large spacecraft in circular earth orbit calculated for internal gravitational field

05 p0924 A70-16637

Second order secular perturbations formulas of distant earth satellite motion valid for nearly circular orbits with small inclination to ecliptic plane

06 p1141 A70-17823

Vehicles optimal flights with controlled or boundary level thrust in circular orbit neighborhood, using linearized equations of motion

06 p1142 A70-17876

Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass

06 p1155 A70-17880

Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit

07 p1386 A70-19484

Parameter estimates effectiveness from independent discrete and continuous navigation measurements of circular orbital plane

10 p1914 A70-24303

Optimal pulsed orbital transfer between close nearly circular orbits in central field of gravity realized by geometrical solution

11 p2118 A70-26778

Librational motion of damped gravity oriented satellite in circular orbit

12 p2313 A70-27201

Accelerated gradient projection method applied to rocket trajectory optimization for minimizing fuel required for placing payload in circular orbits

13 p2485 A70-28395

Circular orbit gravitationally stabilized satellite oscillation damping by changes of moments of inertia

13 p2501 A70-28420

Minimum time control for placing circular orbit satellite in gravitationally stable position

13 p2502 A70-28440

Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit

15 p2805 A70-32729

Equations of motion for circular periodic orbits extended to elliptic restricted three body problem

15 p2806 A70-32803

Stable equilibrium positions for satellite consisting of many rigid bodies in circular orbit about center of gravity, using numerical method

18 p3332 A70-35963

Minimum-fuel multiple impulse orbital fixed time rendezvous in circular orbit vicinity

18 p3289 A70-36682

Circular orbit stability in stationary axisymmetric space-times dependence on angular momentum per unit mass increases outward from symmetry axis

18 p3317 A70-37004

Nonspinning symmetrical satellite in circular orbit, analyzing laterally oriented rotor effect on attitude stability

19 p3533 A70-38340

Minimum impulse transfer between circular orbit and hyperbolic trajectory velocity vector, assuming fixed transfer times

[AIAA PAPER 70-1038]

19 p3527 A70-38853

Position and velocity of geodetic drag free satellite in near circular orbit, including lunar-solar gravitational effects and zonal and tesseral harmonics

[AIAA PAPER 70-1054]

19 p3528 A70-38869

Aircraft flying at constant speed in circular orbits, calculating flight path under effect of uniform velocity wind

21 p3750 A70-40920

Optimal low thrust transfer between coplanar circular orbits, examining thrust direction and steering as Mayer problem

22 p4097 A70-42489

Nautical loci of constant azimuth of artificial satellite at corridor height in circular orbit at arbitrary inclination, using gyroscope and radio sextant

22 p4068 A70-42664

Orbital eccentricity effects on solutions of eclipsing binary light curves, comparing circular orbits solutions

23 p4242 A70-44290

Moderately elliptic reference orbit perturbed motion, applying linearized perturbation equations for circular orbit

23 p4244 A70-44590

Optimal moments of inertia of rigid satellite in circular orbit by generalization of Beletskij concept, discussing libration boundaries

23 p4261 A70-44677

Relativistic two body system in circular orbits, examining quantum theory with massless and massive scalar fields and energy and angular momentum for bound system

24 p4379 A70-45521

CIRCULAR PLATES

Elastic support effect on bending of clamped circular, elliptical, rectangular and skewed plates, using variational method and small perturbation technique

01 p0205 A70-11144

Circular plate nonlinear analysis under load and uniform midplane temperatures, using stationary potential energy principle

01 p0205 A70-11145

Transient temperature profiles and thermal stress distribution in circular plates and cylinders with eccentric hole determined by conformal mapping

01 p0207 A70-11153

Thin simply supported circular rigid ideally plastic plate subjected to dynamic transverse load uniformly distributed over central circular region

02 p0389 A70-12668

Vibrational response of simply supported and clamped circular plates subjected to gyroscopically induced inertia loads, using equations of motion

03 p0583 A70-12920

Centrally clamped spinning circular disk free transverse vibration analysis within accuracy of numerical computations

03 p0584 A70-12931

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering Lure theory and variational principle for uniform compression load

03 p0589 A70-13336

Converging series solutions for conducting circular disk in radiation field of vertical and horizontal magnetic dipoles to determine reemitted field

03 p0448 A70-13432

Impulsive and transient load disturbances in thin elastic finite circular plate on Pasternak type viscoelastic foundation

03 p0595 A70-13905

Transient temperature distribution, thermal stresses and deformations in thin finite circular disk due to continuous point heat source, using linear thermoelasticity

[ASME PAPER 69-WA/PVP-6]

04 p0768 A70-14789

Circular sandwich plates fundamental natural frequencies, considering face members membrane characteristics and thickness, face and core isotropy, etc

04 p0778 A70-15559

Reinforced openings effect on burst strength of ductile circular plates subjected to pressure loads

05 p0943 A70-16810

Stress-strain state of drawn and bent circular plate made of rigid viscoplastic work hardened material

05 p0946 A70-16958

Backscattered field determination at edge on incidence from thin circular plates illuminated by plane waves

06 p1008 A70-17563

Numerical analysis of axisymmetric elastoplastic deformation of circular plates under combined lateral load and membrane force

07 p1402 A70-18977

Circular plates dynamic response to axisymmetric time dependent loads, analyzing transverse restraint effects on response maxima by plate theory

07 p1404 A70-19251

Circular plates with optimal natural frequency of transverse vibrations, discussing boundary conditions

07 p1405 A70-19256

Stress-strain state of flexible circular plates as function of thickness distribution using finite difference theory

08 p1583 A70-20529

Aerodynamic forces acting on circular plates in rarefied gases, calculating coefficients as functions of angle of attack

08 p1433 A70-21093

Finite bending elements for static deflections of annular and circular plates loaded by concentrated forces, calculating free vibrations

08 p1588 A70-21243

Biharmonic equation in polar coordinates solved for circular plates and plate sectors with various boundary conditions, using finite difference approximations

08 p1589 A70-21246

Yield criterion for plastic bending of transversely anisotropic circular plates under plane stress

08 p1589 A70-21250

Rotating circular disk under angular acceleration, analyzing stress and deformation distributions

08 p1596 A70-21980

Elasticity theory two dimensional problem solution for circular segment in polar coordinates, applying Lure symbolic notation and Prokopov minimum potential energy principle

09 p1782 A70-23291

Natural bending vibrations of circular plates with allowance for stress tensor asymmetry, deriving transcendental frequency equation

09 p1782 A70-23292

Centrifugal forces and nonuniform heating effect on natural vibration frequencies of circular plates using lumped parameter method

09 p1784 A70-23588

Large amplitude free vibration of heated circular plates, analyzing energy equations by successive approximation method and elliptic integrals

10 p1957 A70-24480

Dynamic postbuckling response of thin elastic circular plates under axisymmetric time dependent radial thrust, discussing response to step loading

10 p1964 A70-25206

Clamped thin circular plate bending under various loadings due to action of rigid square column on center

11 p2139 A70-26404

Vibrations of combination of cylindrical shells and circular plates, giving bending moment distribution

11 p2139 A70-26415

Axisymmetrical stress tensor singularity convergence of rigidly clamped circular plate, showing identity of plane stressed state transcendental equations

12 p2325 A70-27558

Beam-bending and circular plate testing rigs for creep with constant and variable loading, discussing tests repeatability and accuracy

12 p2207 A70-27618

Deflection surface and edge moment prediction for uniformly edge loaded point-supported circular plates, comparing with optical method

13 p2509 A70-28534

Large deflections in impulsively loaded clamped circular Al alloy and steel viscoplastic plates

13 p2511 A70-28736

Elastic isotropic circular perforated plate stress-strain state, proving quasi-regularity of infinite linear algebraic equations

13 p2515 A70-29317

Thermoelastic equations for circular sandwich plates bending due to asymmetric temperature distribution

13 p2518 A70-29976

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering Lure theory and variational principle for uniform compression load

14 p2657 A70-30714

Liapunov type analysis of linear structural dynamic system excited by stochastic parametric load, discussing radially loaded thin circular plates

14 p2657 A70-30763

Natural frequencies and corresponding mode shapes for free flexural vibrations of circular plates, extending to elastic support cases

17 p3186 A70-34980

Anisotropic disk compressed by isotropic ring of smaller radius, considering elastic equilibrium

18 p3336 A70-36134

Diffraction of EM waves emitted by vertical electric dipole on conducting thin circular disk, using algorithm for integral equation

19 p3375 A70-37432

Rib stiffened elliptical and circular plate vibrations, determining fundamental frequencies by variational techniques

19 p3536 A70-37693

Nodal patterns on thin elastic circular plate vibrating in flexure, considering natural and compounded modes

19 p3543 A70-38245

Disk equations to determine tensions around arbitrary hole or stiffening contours

20 p3720 A70-39623

Elastoplastic deformation of thin circular plates under uniformly distributed transverse loads, using mixed type variational equation

20 p3721 A70-39776

Thin circular plate clamped along edge, calculating large displacements and elastoplastic strains for comparison with measurement

21 p3935 A70-41406

Time average holographic interferometry of circular plate vibrating simultaneously in rationally related modes

21 p3829 A70-41927

Circular plates dynamic stability under variable periodic loads, using differential equations of vibrational motion for median surface

22 p4114 A70-42613

Axisymmetric potential problem of plane circular electrified disk in coplanar gap formulated in triple integral equation, obtaining Wiener-Hopf solution

22 p4080 A70-42632

Forced harmonic vibrations of clamped circular plate in inviscid fluid, calculating radiation pressure and power distributions

22 p4073 A70-42646

Axisymmetric vibrations of cylindrical shell with concentric circular plates at each end, obtaining Lagrangian of combined system

22 p4115 A70-42843

Carrying capacities of simply supported and clamped circular plates under combined lateral pressure and edge compression loads

22 p4118 A70-43548

Flexural vibrations of clamped circular plate with nonlinear elasticity for small strains and displacements, using variational principle

22 p4120 A70-43719

Approximation method for large deflection analysis of impulsively loaded rigid plastic circular plates and symmetric shells

23 p4275 A70-44943

Tempering stress in circular plates and cylinders in casting of solid propellants

24 p4427 A70-46147

CIRCULAR POLARIZATION

MHD model for microwave solar circular polarization bursts interpretation, suggesting Alfvén wave disturbances in solar atmosphere

01 p0168 A70-10254

Circularly polarized synchrotron radiation from distribution of electrically charged particle in magnetic dipole calculated for estimating Jupiter magnetic field

04 p0746 A70-14511

Telescopic circular polarization observations of Jupiter at 9.26 cm related to Jovicentric declination of earth

05 p0906 A70-15896

Circular polarization measurements of Jovian decimeter radiation by 210-ft radio telescope at Goldstone, California

05 p0921 A70-16986

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics

08 p1554 A70-21812

Antenna array circular polarization adjustment using reflections from horn radiator and mirror

09 p1650 A70-23633

Rectangular waveguide with cross shaped slot as polarizer ensuring circular polarization over wide frequency range

09 p1652 A70-23649

Antenna with 3-db slotted waveguide bridge to produce near circular polarization emission field

09 p1652 A70-23651

Waveguide slot antenna with electrical control of field polarization from linear to circular and beam scanning over wide sector

09 p1652 A70-23652

Solar magnetic field measurement emphasizing circular and total polarization characteristics

10 p1939 A70-24275

Circular polarization time dependent reversals during simultaneous microwave solar bursts at different phases, considering relations to coincident flares

10 p1932 A70-24626

Solar radio types I and III sources spatial distribution of circular polarization and coronal magnetic field configurations in active regions

12 p2294 A70-27710

Circularly polarized waves in waveguide loaded with high density magnetoplasma, discussing propagation mode and plasma boundary

13 p2379 A70-29617

Circularly polarized emission from types I and 4 bursts and noise storms, considering mode coupling in warm plasma, gyroradiation and Cerenkov radiation

13 p2479 A70-29851

Antenna gain, efficiency, half power bandwidth, sidelobe level and focal length for circularly polarized metallic lens antenna at X band frequencies

16 p2872 A70-32969

Thin window for circularly polarizing antennas, measuring circularity and VSWR performance on S and X band test sections

16 p2877 A70-33410

Magnetic field effects on Compton scattering and radiative opacity, considering longitudinal and transverse propagation with circular polarization

17 p3154 A70-34538

Sunspot spectrograms analysis, observing wavelength shift in Zeeman triplet circular components and magnetic splitting inequality under different circular polarizations

18 p3322 A70-37136

Impedance measurements on microwave tripole antenna for circular polarization, including expressions for radiation pattern

19 p3388 A70-37868

Quasars and radio galaxies circular polarization at 49 cm wavelength, using radio telescope interferometer

19 p3523 A70-38606

White dwarf star circular polarized light, indicating strong magnetic field

20 p3701 A70-39001

Time and power dependent Lamb shift resonance shapes measurement with circular polarized RF field in beam foil excited H atoms

20 p3675 A70-39498

Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A

20 p3589 A70-40323

Solar type 4 event flux density and circular polarization radiopolarimetric recording, showing peculiar phases of short duration

22 p4095 A70-43263

Octave bandwidth unidirectional circularly polarized reflector antenna, using crossed conical dipoles near second resonance

23 p4176 A70-44970

Circular polarization time evolution during solar microwave impulsive bursts

24 p4401 A70-45319

White dwarf stars continuum circular polarization as function of time and wavelength, emphasizing magnetic star search

24 p4410 A70-45776

Dual channel circularly polarized feed of monopulse tracking antenna system, noting axial ratio and gain and open loop mode autotracking

24 p4321 A70-46259

CIRCULAR SHELLS

Interior shell equations compared with classical shell theory, considering helicoidal, spherical and circular cylindrical geometry

01 p0200 A70-10542

Natural oscillation frequencies of closed circular orthotropic cylindrical shells having freely supported end faces, particularly with stringers

01 p0210 A70-11413

Circular cylindrical shell stressed state with rectangular opening under compressed torsion, noting opening effect on loads nonuniform distribution

03 p0593 A70-13501

Donnell shallow circular cylindrical shell equation, obtaining approximate solution for stresses in infinitely long circular cylindrical shell with circular hole subjected to edge loading

03 p0601 A70-14320

Finite strain in bending rectangular block into right circular cylindrical shell for transversely isotropic medium along radius vector, using Saint Venant stress-strain relations

03 p0602 A70-14329

Circular cylindrical shells with axisymmetric imperfections tested under axial compressive load, studying imperfection amplitude and wavelength effects on minimum buckling load

04 p0778 A70-15588

Stress-strain state of circular orthotropic shells under bending, considering distributed loads applied to shell center

05 p0934 A70-16217

Stability of clamped, hinged and elastically supported circular cylindrical shells under critical combined torsional and transverse pressure

05 p0934 A70-16227

Stress concentration of circular cylindrical shell weakened by elliptic hole under torsion

05 p0947 A70-16965

Local axisymmetric dimple imperfection effects on buckling load of circular cylindrical shell under axial compression

[AIAA PAPER 70-103] 06 p1170 A70-18167

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solutions convergence

08 p1585 A70-20963

Circular cylindrical shell supported along generator under arbitrary forces using finite Fourier transform, simplifying results by Euler sum formula

08 p1589 A70-21312

Three dimensional deformation of finite circular cylindrical shell under plane shock wave solved in linear form

09 p1785 A70-23618

Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state

11 p2129 A70-25396

Characteristic equation roots for circular cylindrical shells deformation under edge load

11 p2135 A70-25960

Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings

11 p2135 A70-25993

Free vibration characteristics of circular cylindrical shells of finite length, utilizing Flugge equations

11 p2135 A70-25997

Axisymmetric imperfection distributions effect on buckling of circular cylindrical shells under axial compression, constructing test models from photoelastic liquid epoxy

12 p2319 A70-27140

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells

13 p2517 A70-29758

Circular elastic shell response to moving and simultaneous loads, using impulse simulation method

13 p2518 A70-29986

Thin concentric circular cylindrical shells joined at ends by rigid diaphragms, describing free and forced torsional motion

16 p2992 A70-34019

Thin circular cylindrical shell stability subjected to axisymmetric thermal pulse, describing buckling process by mathematical model

18 p3342 A70-36641

Prebuckling deformations effect on buckling of clamped thin walled circular cylindrical shells under axial loading and internal pressure

19 p3546 A70-38346

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells

19 p3547 A70-38396

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solution convergence

20 p3719 A70-39385

Thin walled circular cylindrical steel shells dynamic stability partly filled with liquid and subjected to longitudinal excitation

20 p3723 A70-39852

Long thin circular cylindrical shell resonance velocities in steady response to fluid motion

20 p3727 A70-39884

Structurally closed orthotropic circular cylindrical reinforced shell stability, developing approximate method to obtain various boundary conditions

20 p3727 A70-39886

Circular cylindrical shells theory based on Novozhilov equation, deriving auxiliary formulas for strain and displacement characteristics in terms of stress function

20 p3727 A70-39888

Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state

20 p3732 A70-40100

Closed circular cylindrical shell nonlinear problem solvability extended to anisotropic sandwich shell, using mean deflection theory

21 p3933 A70-40601

CIRCULAR TUBES

Nonaxisymmetric mass transfer in turbulent flow in plain circular tube, considering diametral line and discontinuous ring sources

01 p0065 A70-11093

Flow patterns in circular ducts with circumferential roughness variation, determining axial turbulence, Reynolds number effect and applications as two phase flow analog

01 p0066 A70-11132

Structural similarity hypothesis for fully developed turbulence in smooth circular tubes, using intensity correction procedure

04 p0665 A70-14453

Circular tube entrance upstream and downstream velocity profiles at small axial distances measured by laser Doppler flowmeter

[ASME PAPER 69-WA/FE-13] 04 p0667 A70-14780

Shear modulus of sandwich structure tubular core derived by virtual work principle and matrix approach, comparing results with honeycomb core

[DGLR-69-64] 04 p0774 A70-15156

Three dimensional electromagnetic scattering from thin walled conducting circular tube of finite length normally incident with E or H polarized plane wave

05 p0816 A70-16987

Free molecular flow through long circular tube rotating with constant angular velocity about axis, discussing rotation speed effect on mass flow

05 p0836 A70-16994

Steady laminar flow with frictionless central core surrounded by boundary layer in circular curved pipe, discussing friction factor and flowmeter discharge coefficient

05 p0836 A70-17107

Core length of water jet from circular tube, considering wall roughness, tube diameter and water viscosity and surface tension

06 p1031 A70-17135

Approximate solution for heat transfer in incompressible fluid laminar flow in circular tube

07 p1253 A70-19060

Torsional vibrations of nonhomogeneous anisotropic finite circular tube, computing natural frequencies for various parameters

07 p1414 A70-20173

Single fluid theory for plasma laminar flow in field-free region of circular tube, obtaining friction factor and Nusselt number correlations

08 p1552 A70-21585

Film heat transfer coefficients and thicknesses for condensation and evaporation and two phase flow inside circular tubes

08 p1599 A70-21827

Local heat transfer coefficients determination for unilaterally heated rectangular coolant duct by approximation and experiment applicable to circular tubes

09 p1787 A70-22170

Steady and unsteady viscous incompressible one dimensional flows parameters in deformable cylindrical tube determined, solving continuity and motion equations by Galerkin method

09 p1664 A70-23715

Approximate solution for heat transfer in incompressible fluid laminar flow in circular tube

10 p1871 A70-25211

Rate-sensitive perfectly plastic linear strain hardened rings and tubes, calculating response to impulsive loads

17 p3184 A70-34907

Laminar heat transfer in circular tube under solar radiation in space

18 p3347 A70-36503

Propagation constants in laminar plasma circular waveguides filled with anisotropic linear medium, using Galerkin-Ritz method

19 p3474 A70-37428

Radiation theory circular waveguide in dominant TE mode and flush mounted to infinite conducting flat ground plane covered by plasma or dielectric sheath

20 p3586 A70-39500

High velocity isothermal viscous compressible steam flow in circular tubes, measuring pressure drops

22 p4011 A70-42845

Sound radiation from unflanged circular waveguide duct with flow, calculating reflection coefficients, directivity pattern and power for comparison with approximate methods

23 p4219 A70-44392

Long wave approximation for peristaltic transport in circular cylindrical tube, noting inertia and wavelength effects on backward flow

24 p4309 A70-46224

Microwave transmission in partially dielectric filled circular waveguide, deriving cutoff wavelength and phase velocity vs frequency

24 p4315 A70-46260

CIRCULATION

NT ATMOSPHERIC CIRCULATION

NT BLOOD CIRCULATION

NT BRAIN CIRCULATION

NT CARBOXYHEMOGLOBIN

NT CONGESTION

NT CORONARY CIRCULATION

NT INTERCRANIAL CIRCULATION

NT INTRAVASCULAR SYSTEM

NT ISCHEMIA

NT OCULAR CIRCULATION

NT PERIPHERAL CIRCULATION

NT PULMONARY CIRCULATION

Velocity circulation in laminar motion of fluid in cylindrical tube, assuming equilibrium under dissipative forces

14 p2564 A70-30164

Circulation meter using parallel yawmeters linked to manometer, showing sensitivity in lateral velocity

14 p2589 A70-31397

CIRCULATORS [PHASE SHIFT CIRCUITS]

Magnetron amplifiers with ferrite circulators for synchronizing natural frequency, obtaining I-V characteristics and gain vs bandwidth curves

05 p0823 A70-16886

Lumped element microwave Y circulator, describing device performance and ALGOL program for potentials calculation

07 p1241 A70-19751

Parasitic effects due to coupling of wideband regenerative amplifier with nonideal ferrite circulators to antenna feeder duct

08 p1468 A70-20575

UHF and VHF stacked ferrite loaded junction circulators construction, improving cost to power performance

08 p1476 A70-21292

Photolithographically produced thin film lumped element circulator, assuring physical and electrical symmetry by interweaving junction conductors

08 p1476 A70-21293

Lossless three-port H-plane waveguide junction circulator performance evaluation using computerized design

09 p1646 A70-22710

Ferrite Y-circulator, studying effects of attenuation in ferrite on mean frequency, admittance, forward and reverse losses, etc

09 p1648 A70-23157

C band latching ring-and-post ferrite waveguide circulator for radar transmitting-receiving functions, presenting performance and design parameters

12 p2202 A70-28166

Circular shielded three layer dielectric waveguide critical parameters, estimating passbands for phase circulators with ferrite inserts

13 p2364 A70-28873

Microwave parametric amplifiers with nonideal circulators, deriving gain via scattering matrix theory and signal flow graphs

16 p2874 A70-33389

Signal and noise properties of degenerate and quasi-degenerate nonreciprocal parametric amplifiers without circulators

22 p3990 A70-43423

Stripline and microstrip junction circulators analysis for microwave integrated circuits, based on clockwise and counterclockwise rotation modes

23 p4169 A70-43787

Ferrite junction microwave circulator bibliography /1956-1969/ covering stripline and waveguide versions theory, designs, constructions and applications

24 p4318 A70-45210

CIRCULATORY SYSTEM

NT AORTA

NT ARTERIES

NT BLOOD VESSELS

NT CAPILLARIES [ANATOMY]

NT VASCULAR SYSTEM

NT VEINS

Effect of immersion in thermoindifferent water on circulatory control and work capacity in trained and untrained subjects

02 p0241 A70-12770

Heart rate and circulatory load as ergonomic criteria based on muscular work, environment temperature, mental stress, etc

06 p0997 A70-18017

Centripetal acceleration tolerance level correlated with circulatory system functional tests and physical exercises, discussing strength and speed endurance

07 p1201 A70-18787

Circulatory system tests during linear, intermittent and continuous accelerations on centrifuge, noting lack of statistical correlation between centrifuge tests and functional tests

07 p1201 A70-18789

Orthostatic tilt tolerances in young men and women noting heart rates and blood pressure

09 p1627 A70-23454

Ballistographic psychological evaluation of heart and circulatory system by recording displacement, velocity, acceleration and total forces imparted during each beat

10 p1810 A70-24039

Cyclogometer with powder type electromagnetic brake for respiratory and circulatory measurements and functional rehabilitation

14 p2541 A70-30379

Circulatory phenomenon and deep thoracic impedance changes of ventilatory origin

14 p2537 A70-30385

Cardiovascular and circulatory phenomena fluid mechanical aspects emphasizing pulsatile blood flow

15 p2720 A70-31789

Mountain climbing effects on urinary excretion of vanillylmandelic and homovanillic acids, discussing circulatory system acclimatization

17 p3039 A70-35425

Blood circulatory system and hemodynamic interdependencies simulation by analog computer, using Warner model

23 p4155 A70-44862

CIRCUMLUNAR TRAJECTORIES

Reentry trajectories from lunar surface and orbit obtained by computer with allowance for initial data spread

01 p0191 A70-11476

Earth-moon-earth flight characteristics, discussing spacecraft trajectory, velocity and corrections for close distance placement and return for soft landing

03 p0569 A70-13483

Long wave cosmic radio background emission in circumlunar space by Luna 11 and 12 satellites, observing increase in earth magnetosphere tail

12 p2295 A70-28262

Circumlunar trajectories with return to earth atmosphere, comparing various methods

18 p3312 A70-36165

Multiconic method space flight trajectories analysis, discussing computation time and circumlunar flight altitude and velocity errors

19 p3529 A70-38876

CIRRUS CLOUDS

Cirrus clouds signature analysis, discussing light scattering pertinent to lidar equation

01 p0076 A70-10913

Photographic detection of thin cirrus clouds effect on earth heat budget

04 p0696 A70-15575

IR reflectance of cirrostratus and cirrus clouds and jet contrail measured by spectrometer on high altitude aircraft

11 p2045 A70-25626

Stratospheric water vapor measurement by submillimeter wave sounding, considering signal fluctuations due to scattering by high cirrus clouds

11 p2077 A70-26619

Aircraft ice crystal counter for real-time measurement in cirriform clouds, using contact electrification detection

12 p2264 A70-28091

Clouds upper height boundary relation with radiation temperature field from satellite data, noting cirrus clouds influence

13 p2444 A70-28589

CISLUNAR SPACE

Near parabolic trajectories between moon and cislunar libration point, considering earth perturbative influence

19 p3529 A70-38874

Geolunar space development with transportation based on shuttle stations, describing communication, orbits, logistics, etc

22 p4108 A70-43628

CITIES

Interurban air transportation network structure contribution to airport and airways congestion, considering addition of nonstop links

01 p0005 A70-10647

STOL ports in city environments, discussing elevated building design, assisted takeoff and landing equipment and Navy operational safety potential

01 p0057 A70-10715

CITRATES

Purification and reversible inactivation of isocitrate dehydrogenase /ICDH/ of Halobacterium cutirubrum, overcoming difficulties in purifying halophilic enzymes

01 p0021 A70-10792

CITRIC ACID

Kinetic model for acid catalyzed Delrin decomposition, testing for Delrin-citric acid system and predicting thermograms with nonlinear regression analysis

09 p1630 A70-22896

CIVIL AVIATION

Military inertial navigation technology applied to civil air transport aircraft

01 p0137 A70-10311

Juridical measures against air piracy, discussing civil aviation legislation, unlawful acts aboard aircraft and international agreements

01 p0220 A70-10374

Soviet book on operational maintenance of flight vehicles /civilian/, emphasizing maintenance under various climatic conditions

01 p0004 A70-10502

Military aeronautical R and D contributions to civil aviation since 1905, discussing jet engine and supersonic aircraft introduction, air traffic control, etc

01 p0005 A70-10614

National air traffic control system modernization based on Department of Defense military experience to achieve safe and efficient air space utilization

01 p0137 A70-10616

Air traffic control methods for transport aircraft delay elimination

01 p0139 A70-11367

Civil aviation electronics - Conference, London, September 1969, Part 1, Electronics in flight control

02 p0329 A70-11831

Automatic flight control and instrumentation in civil helicopters, examining military developments and Ferranti automatic stabilization system

02 p0329 A70-11834

Electrical signaling civil aircraft systems, discussing design and integrated maneuver demand controls

02 p0224 A70-11835

Built-in, airborne and ground based automatic test equipment /ATE/ for fault finding and serviceability of aircraft electronic systems in civil aviation

02 p0295 A70-11845

Civil aviation electronics - Conferences, London, September 1969, Part 3, Air traffic control

02 p0330 A70-11956

Civil aviation electronics - Conference, London, September 1969, Part 2

02 p0333 A70-11979

Air traffic congestion alleviation by applying general purpose computers for navigation in civil transport aircraft

02 p0334 A70-11985

Great Britain air transport industry manpower recruitment and training, technology changes effects and costs

02 p0402 A70-12307

Air traffic problems connected with Boeing 747 introduction, discussing cargo/passenger handling, fueling and maintenance procedures

02 p0227 A70-12620

SAS pilot selection system, discussing assessment variables, physiological examinations, psychological tests, recruiting procedure, etc

03 p0433 A70-13262

Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects

03 p0522 A70-13610

FAA engineering approach to SST certification involving airworthiness standards development and coordination with industry and foreign governments

03 p0437 A70-14060

Soviet book on air navigation covering civil navigator training, geographic concepts, navigation means, flight and meteorological conditions, instrument errors, etc

06 p1103 A70-17642

Economic flight conditions for civil aviation VTOL aircraft selected by graph-analytical method concerning phases of ascent, cruising and descent

06 p0987 A70-17875

Twinjet helicopter design for business transport, emphasizing redundant systems for safety and bad weather flight capability

07 p1191 A70-18844

Physiological pilot training program of FAA, discussing slides on Aeronautical Center and Civil Aeronautical Institute

07 p1218 A70-19012

Psychiatric disorder in civil aircrew leading to suspension or loss of licence, discussing physicians role and complications of treatments

07 p1223 A70-19940

V/STOL concepts for short haul commercial aircraft compared for gross weight, operating cost, gust sensitivity and noise levels

07 p1195 A70-20409

U.S. Civil Aeronautics Board policy in cooperative agreements involving foreign airlines, highlighting significant cases

08 p1600 A70-20578

V/STOL transport aircraft design in Germany, analyzing demands in military and civil sectors

08 p1435 A70-20639

Civil avionics systems engineering for safety, regularity, weather independence, flight patterns and airport utilization

08 p1468 A70-20649

General aviation urban airport capacity problem, suggesting diversion of training portion of peak-hour traffic

08 p1481 A70-21306

Civil air transportation in India, using mathematical models to estimate optimal development and efficiency of future air traffic potential

08 p1601 A70-21544

Workload relieving displays and controls for general aviation, discussing feasibility of digital computer driven integrated displays

08 p1601 A70-21679

Helicopter utilization in emergency transportation of civilian patients, discussing questionnaire results from medical and police agencies

08 p1454 A70-21937

World air transport system in 1970s, analyzing industry economic performance, discussing fares, rates, technological developments, passenger and air freight increases, etc

09 p1792 A70-22332

Commercial aircraft inertial navigation, examining gyroscope, accelerometer and electronic computer and gyroscopic stabilization

10 p1914 A70-23848

Compound helicopter in civil aviation to alleviate air traffic congestion, discussing design and operative capacities of S-65-200

10 p1804 A70-24046

Commercial aviation safety on basis of aircraft accidents relationship to distance covered, considering clear air turbulence and cosmic radiation dangers

10 p1804 A70-24050

Civil jet VTOL transportation based on Do 31, discussing market, passenger requirements, noise, flight safety and economic factors
[AIAA PAPER 70-001] 10 p1805 A70-24051

Boeing 747 aircraft impact on air transportation passenger and freight rates and traffic congestion reduction
10 p1806 A70-24765

Civil aviation satellites for aircraft communication, navigation and traffic control, discussing technical, political and administrative problems
10 p1842 A70-24974

Edwards Inquiry Report into British Civil Air Transport based on cost effective economic study, involving airlines and regulatory system
11 p2153 A70-25855

Licensing aspects of Edwards Report, criticizing Air Transport Licensing Board /ATLB/ organization
11 p2153 A70-25856

Criticism of public administration aspect of Edwards Report, noting parliamentary and constitutional difficulties in some proposals
11 p2153 A70-25857

Edwards Committee visualization of insurance as air safety aid, discussing insurer specifications and policy conditions
11 p2153 A70-25858

Edwards Report consideration of economic and investment opportunities in civil aviation, discussing denationalizing airways corporations
11 p2153 A70-25859

Commercial aviation gasolines inspection data tabulated and compared for 1969 and 1964
[SAE PAPER 700228] 11 p2099 A70-25897

FAA recommendations on general aviation airports and heliport design standards, explaining standards establishment or modification procedures
[SAE PAPER 700231] 11 p2031 A70-25900

Aircraft interior design styling and material selection, discussing industrial design department function and organization, styling as marketing tool, etc
[SAE PAPER 700233] 11 p1980 A70-25902

Short distance VHF omnirange navigation and distance measuring equipment considered for performance improvements feasibility to meet civil air traffic demands through 1980
12 p2268 A70-27643

VORTAC system providing navigation service to civil and military air traffic on worldwide basis
12 p2269 A70-27919

Civil aircraft weather radar for ground collision hazard warning
13 p2447 A70-28548

Medical wastage of professional aviators in military and civil aviation, discussing reasons for preventing flying license revalidation
13 p2359 A70-29440

Civil aircraft altitude display design, anticipating application to supersonic transport
14 p2582 A70-30287

Economic factors in aviation - RAS Conference, London, May 1970
14 p2668 A70-30935

Commercial aircraft manufacturing industry in UK, discussing SST, wide cabin aircraft, turboprop replacement, engine influence on airframe industry, etc
14 p2668 A70-30936

International airline collaboration in engineering and maintenance for savings in initial and operational costs of aircraft fleets
14 p2669 A70-30940

Commercial aircraft design evolution and trends concerning performance and operating cost reduction
14 p2532 A70-31370

British light aircraft designs, engines and costs, considering business, agricultural, gliding, private, school and club flying
14 p2532 A70-31394

Automatic flight control and instrumentation in civil helicopters, examining military developments and Ferranti automatic stabilization system
15 p2772 A70-31771

High speed civil and commercial transport aircraft, discussing jet-orbital flight
18 p3333 A70-36664

Concorde design limitations for commercial success in civil airlines
18 p3350 A70-36665

International civil aviation, discussing ICAO functions, airports and terminal facilities problems
19 p3553 A70-37748

Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects
21 p3848 A70-41131

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts
[AIAA PAPER 69-766] 22 p3961 A70-42703

FAA airport and airway capacity improvement program, considering runway-taxiway configurations,

surface guidance and control, terminal design, takeoff, approach and landing systems, etc
[AIAA PAPER 70-1315] 24 p4431 A70-45946

CL-84 AIRCRAFT
CL-84 tilt wing V/STOL program to develop best configuration for ground support operations
01 p0007 A70-11317

Canadair CL-84 V/STOL aircraft flight characteristics and structural design
23 p4137 A70-44017

CLADDING
Automatic cladding method for submerged arc stainless steel welding, discussing delta ferrite to sigma phase transformation for surfacing with low ferrite stainless steel
08 p1508 A70-21489

Ti explosive bonding and forming, examining peel and shear strengths on Ti clad steel plate
17 p3098 A70-34446

Multicomponent composite materials, discussing fiber reinforced structures, clad metals and bulk materials
20 p3650 A70-39947

Clad glass fibers axial stress measurement by photoelastic techniques
22 p4060 A70-43415

CLARK Y AIRFOIL
U AIRFOIL PROFILES
CLASSICAL MECHANICS
NT ASTRODYNAMICS
NT CELESTIAL MECHANICS
NT KEPLER LAWS
NT ORBITAL MECHANICS
NT SPACE MECHANICS
Mass point motion in inertial reference system of special relativity, finding motion equations analogous to relative motion equations in classical mechanics
01 p0145 A70-11442

Classical mechanics and thermodynamics principles restated using functions of sets, material sets and reciprocal actions between material sets
02 p0339 A70-11896

Lagrangian nonenergetic and unconstrained systems introduced in describing Birkhoff classical dynamics, considering space of motions states as connected analytic manifold
10 p1909 A70-24190

Nonlocal variational mechanics, considering case of stationarity with unrestricted nonlocality
21 p3939 A70-42026

Classical calculations for energy transfer to diatomic molecules with rotational and vibrational degrees of freedom in atom-diatom-molecule collisions
23 p4221 A70-44010

CLASSIFICATIONS
NT DICHOTOMIES
NT HIERARCHIES
NT INDEXES [DOCUMENTATION]
Late stars spectral characteristics, verifying criteria for spectral classification and anomalous spectra determination
03 p0569 A70-13424

Graphic method for classifying EM waves directed by open waveguides, obtaining wave numbers from dispersion equation
05 p0812 A70-16245

Classification and maximal lengths of cometary tails, investigating correlation to type, perihelion distances, absolute magnitudes and spectra
07 p1378 A70-19032

ICAO Juridical Council criteria for nonnational aircraft registration, discussing international airlines recourse to Article 77 of Chicago Convention
07 p1428 A70-19105

Electromagnetic and gravitational fields classification methods using spinor techniques, introducing five dimensional complex linear space with Weyl tensors elements
07 p1337 A70-20302

Small planets observation methods, classification and designation, discussing asteroid belt origin
08 p1572 A70-20939

Spectroscopic instruments for atmospheric temperature measurements classified in terms of filtering, modulating and multiplexing systems
10 p1873 A70-23828

Gadolinium II solar lines classification from photographic IR observations
10 p1947 A70-24990

Systems instabilities classification criterion determination, showing absolute instability conversion into convective by introducing damping
10 p1969 A70-25104

Generalized control theory, discussing optimization and table classifying control theory fields
10 p1856 A70-25238

Statistical classifier for analyzing tape recorded transients
11 p2056 A70-26457

Spectral classification of stars from unbroadened spectra recordings possible when comparing optical depths of lines
11 p2116 A70-26589

Automatic image interpretation and classification using two dimensional digital Fourier transforms
12 p2193 A70-28106

Methodology for machine processing for identification of individual crop types, discussing discriminant photoanalysis
12 p2227 A70-28108

Synoptic processes and meteorological fields computerized automatic classification for weather forecasting applications
12 p2265 A70-28332

Meteorological situations and fields quantitative classification and regional grouping by statistical main components application
12 p2265 A70-28333

Land use classification system of photointerpretation from remote sensor imagery
14 p2576 A70-30976

Remote sensors applied to classification of aerial data concerning housing quality at different scales, using variables observation
14 p2577 A70-31234

Two dimensional quantitative spectral classification of F-G5 stars, using meniscus telescope with preobjective prism at Abastuman observatory
15 p2797 A70-31613

Spectral classification of relatively bright stars in near UV based on moderate and low dispersion spectra including F, G and K stars
15 p2797 A70-31614

Spectral classification and continuous spectrum photometry of weak late stars in visual and near UV regions, noting anomalous C star in CH Cyg
15 p2797 A70-31615

Solar coronal streamers, considering disk locations, evolution, classification and morphological model
15 p2804 A70-32621

Small planets observation methods, classification and designation, discussing asteroid belt origin
15 p2805 A70-32751

G and K stars spectral classification using narrow band photometry
17 p3169 A70-35380

Solar particle events forecasting based on classification scheme, discussing proton active regions
19 p3493 A70-37476

Solar proton events classification system based on solar flux logarithm
19 p3493 A70-37477

Short graphite fiber classification and orientation control in matrix by electrostatic methods
20 p3654 A70-39215

CLASSIFYING
High speed fluorescent cell sorting system for sorting mouse spleen cells from Chinese hamster ovarian tumor cells
02 p0240 A70-12695

Rotary machine for classifying reinforcing fibers and whiskers with respect to length
05 p0855 A70-16583

Classification analysis methods application to plant identification for case with incomplete initial statistical information
06 p1014 A70-17632

International quiet and disturbed magnetic days classification and significance
10 p1873 A70-23833

G and K stars classification /spectral type and luminosity class/ by narrow band photometry
10 p1937 A70-23945

Grain configurations classification for solid propellant rockets by relative web thickness and mean vector direction of burning surface into topological continuum
11 p2100 A70-26288

C-5 aircraft electrointerference coupling minimization, applying classification plan for wire categorization and routing
12 p2201 A70-28131

Pattern recognition involving machine extraction of characteristic features and classification based on associated values, discussing design and decision rules for optimal recognition
13 p2373 A70-29577

Statistical methods for feature selection and ordering, mode estimation and pattern classification in pattern recognition, describing sequential decision model
13 p2374 A70-29578

Error correcting algorithms for pattern classification, finding optimal approximation to unknown optimal decision function
13 p2374 A70-29579

Stochastic approximation methods applied to pattern classification, estimation and control
13 p2442 A70-29586

Pattern recognition procedure for electronic systems data classification
15 p2706 A70-32566

Field classifications for southern extragalactic radio sources with available optical observations, identifying 21 objects
16 p2980 A70-34194

CLATHRATES

Thermodynamic stability of methane clathrate hydrate, building up ice grains halo within comets inner coma 14 p2650 A70-31243

CLAYS

Amino acids asymmetric polymerization on clay minerals, discussing aspartic acid and kaolinite experiments 19 p3455 A70-38030

CLEAN ROOMS

Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 05 p0808 A70-16703

Clean room design problems concerning dampers, high pressure blowers, humidifiers, filters, etc 05 p0808 A70-16709

Clean room complex consisting of quality control analysis laboratory, main and pre-clean rooms and air-lock 05 p0808 A70-16710

Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 09 p1623 A70-22340

Ultraclean technology to eliminate pollution traces present in laboratories, discussing turbulent flow and horizontal and vertical laminar flow rooms 10 p1828 A70-25240

CLEANERS

NT AIR FILTERS

CLEANING

Spacecraft window cleaning with methyl alcohol and low pressure nitrogen providing filming control for Apollo optical experiments 11 p2051 A70-26143

CLEANLINESS

Hydraulic fluid cleanliness requirements for aircraft systems, filtering, servovalve life, solid particles effects on friction, etc 03 p0414 A70-12999

Accommodation coefficients ratio of He 4 to He 3 measured on W and K clean surfaces 06 p1183 A70-18257

Electromagnetic torsion balance measurement of forces exerted on clean Au surfaces by monoenergetic steady state Ar and Kr beams, calculating thermal accommodation coefficients 06 p1066 A70-18258

Particulate contamination in compliance with military standard cleanliness level, using zoom microscope, charts and tables 12 p2174 A70-27010

Ultrasonics for steel cleanliness rating, considering advantages and fatigue life 15 p2743 A70-31768

Cleanliness levels for missile guidance package as function of component design complexity 24 p4349 A70-46250

CLEAR AIR TURBULENCE

High altitude clear air turbulence /HICAT/ occurrence frequency, showing effects of altitude, wind and temperature fields, terrain features, etc 01 p0006 A70-10696

CAT remote sensing for advance aircraft warning, using IR instrument to detect turbulence-associated temperature preceding aircraft 01 p0087 A70-10697

Forward sounding sensors /weather radar/ development for aiding human eye in detecting flight hazards /storms and CAT/ 02 p0297 A70-11989

Aerohydrodynamic model of relief waves in baroclinic atmosphere based on convection theory, analyzing strong turbulent vortex regime responsible for CAT [ONERA-TP-727] 03 p0408 A70-13638

Clear air turbulence and mesoscale structure subsynoptic air motion experiments for numerical weather prediction 04 p0714 A70-14394

Shear generated atmospheric clear air turbulence growth and dependence on atmospheric instabilities calculated numerically by invariant model [AIAA PAPER 70-55] 06 p1098 A70-18031

Depolarization factor measurements of clear atmospheric air by lidar techniques and laser light scattering 06 p1083 A70-18244

Stratospheric clear air turbulence over squall line, discussing turbulence over thunderstorms 06 p1102 A70-18588

Clear air turbulence significance in aviation and atmospheric science, noting Kelvin-Helmholtz model 08 p1539 A70-21559

Free atmosphere clear air turbulence, discussing velocity and temperature spectra, Kelvin-Helmholtz instability, isentropic cross sections, energy budget, etc 09 p1714 A70-22354

Stratospheric CAT layer energy budget analysis, considering energy shear feeding, buoyant extraction and frictional dissipation 09 p1715 A70-22357

Atmospheric structure and turbulence relations to radar backscattering from clear air refractive index irregularities 09 p1715 A70-22361

Potential refractive index mean vertical gradients role in turbulent mixing, noting applications to radar detection of CAT 09 p1716 A70-22365

Radar backscattering relationship to refractive index microstructure in turbulent clear atmosphere 09 p1716 A70-22366

Turbulent energy budgets in atmospheric boundary layer near ground scalar fluctuations and CAT 09 p1717 A70-22380

Clear air turbulence effect on supersonic aircraft safety and comfort, noting shallow zones and effects of topography and thunderstorms 10 p1912 A70-24506

IR sensor for detecting clear air turbulence, discussing design, installation, supporting equipment and inflight test results 12 p2229 A70-26946

IR remote temperature gradient sensor as clear air turbulence detector, presenting inflight test results 12 p2229 A70-26947

Remote measurement of CAT associated temperature gradients, comparing monochromatic and finite bandpass models 12 p2262 A70-26949

Clear air turbulence detection by radar equipped aircraft, considering reflection from refractive inhomogeneities 12 p2262 A70-26952

Statistical analysis of atmospheric wind and temperature variables relationships to high altitude clear air turbulence observed by U-2 flights 12 p2264 A70-28092

Stratospheric clear air turbulence /CAT/ vertical extent above thunderstorm graphically represented 12 p2265 A70-28095

Radar meteorology, discussing convection in lower atmosphere and clear air turbulence observations 13 p2443 A70-28475

CAT parameters sensitivity to horizontal wind and temperature distribution 13 p2444 A70-28587

Wind shear production rate by dynamical processes and relationship to clear air turbulence occurrence 14 p2609 A70-30601

CAT and small scale atmospheric motions in relation to supersonic transport and space shuttle design and operation 14 p2609 A70-30602

Stratospheric CAT-internal wave relationship, using aircraft and radiosonde HICAT measurements 14 p2609 A70-30603

CAT relationship to cyclogenesis and anticyclogenesis, considering synoptic situation and Jacobian values for forecasts 14 p2609 A70-30604

CAT shear spectra above ground frictional layer in jet stream flight conditions, using aircraft measurements 16 p2946 A70-33825

Clear air turbulence /CAT/ remote sensing feasibility by optical signal covariance measurement, taking into account refractive index fluctuations 17 p3132 A70-35723

CAT at subsidence inversion in presence of strong wind shear, noting radar echo pattern as Kelvin-Helmholtz instability indicator 17 p3133 A70-35933

High altitude clear air turbulence structure and evolution examined by high power radar and wind and temperature vertical soundings 18 p3228 A70-36483

Highly localized clear air turbulence at aircraft flight level over Mediterranean, noting simultaneous temperature rise 19 p3463 A70-38948

CAT detection by IR radiation, remotely detecting atmospheric horizontal temperature gradients 20 p3626 A70-39080

CAT as mechanism relieving wind and temperature discontinuities, maintaining Richardson number at limiting value by turbulent energy dissipation 20 p3663 A70-39373

Stratospheric clear air turbulence probability based on vertical temperature gradients and rawinsonde ascensional rates 22 p4064 A70-42619

CAT origin in unstable atmospheric shear and gravity waves, using ultrahigh resolution radar for observation of transition process 23 p4214 A70-44032

Limiting effects of topographic quasi-optical radar propagation above 100 MHz in radar aircraft navigation, clear air disturbances detection and IR warning technique 23 p4163 A70-44230

Clear air turbulence detection by IR radiometry of thermal gradients, using staggered receivers for panoramic visualization 24 p4314 A70-46093

CLEARANCES

Tip clearance effects in axial flow turbomachinery, predicting blade-to-blade variation in outlet angles and stagnation pressure losses 04 p0733 A70-14775

Tip clearance contactless measurement in jet engine turbine based on radioactive isotopes properties 11 p2055 A70-26446

Axial flow compressor clearance control coatings at blade tip paths for efficiency [SAE PAPER 700330] 12 p2291 A70-27462

Aerodynamic characteristics of wing with tip clearance within uniform flow, investigating main stream flow pattern effect 14 p2529 A70-31331

Inducer tip clearance effect on centrifugal pump suction performance with velocity and total head distributions at outlet 14 p2592 A70-31332

Aircraft turbine engines durability estimated from rotor blade minimum tip clearance measurements 22 p4092 A70-43529

CLEARING

Computerized air cargo clearing, discussing London Airport Cargo Electronic-data-processing Scheme 22 p4007 A70-43272

CLEFTAGE

Vacuum cleavage device for producing small area evaporated metal semiconductor contacts free from oxygen or other contamination 02 p0304 A70-12748

Cleavage fracture of Ta-Mo bcc alloys, investigating short range ordering and size effects by X ray diffraction 09 p1708 A70-23573

Cleavage cracks initiation and propagation in basal plane of Be single crystals, determining propagation energy as function of temperature, purity and alloying 12 p2256 A70-27614

CLIMATE

Earth climatic control by reflecting satellites producing artificial solar irradiation 03 p0581 A70-13835

Phenological network observations comparison for phase behavior of trees and plants in open landscapes and in populated areas 15 p2732 A70-32460

CLIMATOLOGY

NT BIOCLIMATOLOGY

NT MICROCLIMATOLOGY

Noctilucent cloud observation stations and international cooperation in exchanging climatological data concerning annual variations, height distribution and latitude dependence 01 p0072 A70-10579

Earth surface hydrology effect incorporated into atmospheric circulation mathematical model for climate, considering ocean as atmospheric moisture reservoir 04 p0680 A70-15296

Two level model for planetary atmospheres adapted to simulate atmospheric circulation and climate of Mars 04 p0756 A70-15515

Aircraft icing effects on conventional and jet aircraft and helicopters, discussing seasonal variations for main climatic regions 07 p1329 A70-18926

Upper atmosphere climatology including latitudinal and longitudinal variations in wind, temperature, density and zonal momentum 07 p1275 A70-20279

Solar radiation variations effect on earth climate, noting atmospheric transparency role in glaciation on thermal regime 08 p1539 A70-21919

Climate variations and earth orbital elements secular perturbations, noting solar radiation and celestial mechanics roles 09 p1666 A70-22177

Lebedev nomogram determination of climatic parameters dependability, considering underlying theory and temperature sums 09 p1718 A70-23171

Management planning for global atmospheric research program /GARP/ applied to climatology and weather forecasting 09 p1795 A70-23545

Climatic phenomena cyclic behavior from forecasting viewpoint, considering geomagnetic, upper atmospheric and solar activity effects 12 p2265 A70-28268

Earth radiation balance climatological characteristics based on satellite and published data, analyzing earth-atmosphere albedo on global scale 14 p2603 A70-30402

Climatology of safe threshold Mach number and airplane ground speed for boomless supersonic cruise, considering San Francisco-New York route 14 p2530 A70-30606

Physical methods in applied climatology, analyzing meteorological effects on human body and building thermal conditions and plant biomass growth 15 p2771 A70-32111

Air mass climatology in terms of pressure temperature and moisture content

15 p2772 A70-32457

Soviet book on statistical analysis of meteorological elements based on expanding natural orthogonal functions covering horizontal, vertical and time distributions including applications

15 p2772 A70-32842

Oceanographic phenomena inference from satellite cloud photographs, developing seasonal cloud climatology for Peru Current area

16 p2897 A70-33713

Shooting star shower and solar eclipse frequencies correlation with long term climatic changes

17 p3168 A70-35310

Climatological maps of earth mean annual radiation balance compared with satellite data

18 p3286 A70-36966

Twenty two year solar activity cycle effect on earth climate, plotting odd and even 11 year cycle curves for pressure and temperature

20 p3662 A70-39189

Soil science and climatology in Central Europe archaeological site location by aerial photography

21 p3826 A70-41402

January climatology simulation experiment based on two layer version of global circulation model, comparing computed and observed results

21 p3847 A70-42120

Global solar radiation climatology of earth including direct and diffusive radiation

22 p4013 A70-42600

Convective heat transport role in determining rotating planets climatic temperature zones

22 p4099 A70-42626

Earth atmospheric boundary layer wind velocity, temperature gradients and specific humidity differences, calculating climatic correlations from mathematical circulation model

23 p4214 A70-44264

CLIMBING FLIGHT

Optimal fuel consumption for climbing, cruising and landing flight conditions for medium range subsonic, high supersonic and hypersonic aircraft

02 p0227 A70-12404

Optimum rocket climbing regime in dense atmospheric layers, including gravitational acceleration investigation in outside layers

06 p1155 A70-17626

Asymptotic expansions and energy methods applied to three dimensional aircraft maneuvers involving energy climbs and turns

07 p1190 A70-20416

CLINICAL MEDICINE

Biophysical symptoms and clinical treatment of ailments resulting from pressure drop, considering exposures to higher and lower pressure changes

01 p0011 A70-10036

Cliniconosographic criteria of flight phobia and differentiation from other psychopathologic syndromes, noting sociofamilial and operative factors

01 p0031 A70-10235

Prospective epidemiological recognition of clinical coronary heart disease, discussing effects of habitual physical inactivity, excessive dietary fat, socioeconomic stresses, etc

01 p0023 A70-10865

Simplified laboratory test program yielding serviceable information for possible direct laboratory diagnosis of risk factors affecting atherosclerosis

03 p0431 A70-14279

Clinicopathological studies of coronary artery occlusion and acute myocardial infarction, discussing coronary thrombosis

04 p0635 A70-15459

Acute myocardial infarction clinical features, discussing gallop rhythm, ventricular arrhythmias, ventricular tachycardia, bradycardia, etc

04 p0637 A70-15471

Asymptomatic pilot with idiopathic paralysis of hemidiaphragm, discussing clinical picture and aeromedical significance

07 p1215 A70-19942

Aeromedical significance and pathophysiological mechanisms of clinical entities mimicking vasovagal syncope

08 p1454 A70-21946

Physiological mechanism and differentiation of alternobaric vertigo in flyers

08 p1449 A70-21947

Hypoxia fundamentals and clinical treatment - Conference, Mainz, Germany, October 1967

10 p1820 A70-25076

Permissible radiation exposure levels during prolonged space flights based on clinical data

13 p2351 A70-29336

Aerospace Medical Association Conference, St. Louis, April 1970

17 p3026 A70-35326

Multiple choice rotation chair for clinical experimental research and pilot vestibular tests

20 p3580 A70-39438

G suit application to clinical therapeutics, noting intraabdominal bleeding control

21 p3767 A70-40737

Automatic diagnosis of clinical electroencephalogram with digital computer, showing maximum and minimum points, basic pattern and paroxysmal wave

22 p3977 A70-42869

Coronary heart disease risk factors and prevention, discussing blood pressure, cholesterol, body weight, smoking, etc

22 p3975 A70-43693

Human retinal detachment treatment by centrifugation

22 p3975 A70-43699

Coronary heart disease prediction based on clinical suspicion, age, total cholesterol and triglyceride, using relationships established by cinearteriographic studies

23 p4145 A70-43947

CLIPPER CIRCUITS

Detection efficiency compared for system containing clipper circuit and quasi-optimal linear system for video pulse signal with additive noise background

03 p0446 A70-13201

Delay locked closed loop system with and without signal clipping in noisy /Gaussian/ environment applied to radar, sonar and seismic propagation

07 p1242 A70-19997

CLOCK PARADOX

Einstein theory of length contraction and time dilation relative to ether regarding slowness of clocks in motion

21 p3849 A70-40550

CLOCKS

NT ATOMIC CLOCKS

NT CHRONOMETERS

Astronomical clock pendulum oscillations isosynchronization noting effects of suspension elastic moment, fabrication, calibration errors and rotation center displacement

03 p0484 A70-13367

Synchronization of ground stations clocks by time scale comparison with overflying aircraft

03 p0487 A70-13642

Semidiurnal lunar tidal wave influence on clock corrections obtained by observations of stellar meridian passages at four localities

04 p0756 A70-15479

Tsl catalog of right ascensions of stars based on photoelectric observations, including clock corrections

04 p0756 A70-15480

Correlation function procedure applied to quartz clock rate analysis, noting operating temperature control

04 p0693 A70-15487

Airborne system for calibrating remote precision clocks using two way radio transmitter, measuring error by system similar to radar beacon transponder system

05 p0844 A70-15773

Clock synchronization system design and test results for PCM time division multiple access satellite communication system

06 p1011 A70-18411

Clock corrections smoothing by linear transformation operator, calculating operator transfer function and averaged errors deviations

08 p1574 A70-21155

Time determination precision dependence on thermal deformations of clock, humidity of atmosphere and most probable value of instrument azimuth

09 p1673 A70-22163

Loran in range-range mode for computing user position based on remote clock synchronization, evaluating accuracy

09 p1719 A70-22192

Clock synchronization system using lunar radar reflections for Deep Space Network needs, discussing remote clock receiver and antenna

09 p1656 A70-23037

Tracking station clock synchronization error measurement using Deep Space Network Mark I ranging system, discussing system theory, design, operation, economy and versatility

09 p1656 A70-23038

Synchronous satellite communication system clock synchronization loop design taking into account delay time

10 p1835 A70-24335

Energy concept in cosmology based on relativistic considerations, indicating universal time by synchronous clocks system

11 p2109 A70-25870

Science of time considered with reference to quantum physics, special theory of relativity, directivity and symmetry and conditional probability, discussing clock designs

12 p2271 A70-27276

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface

12 p2272 A70-27357

Clock corrections determinations by stars pairs situated symmetrically around zenith, obtaining formulas by various methods

18 p3324 A70-37146

CLOSED ECOLOGICAL SYSTEMS

Digital orbital clock and telemetry adapter for TD1A satellite attitude stabilization, describing mechanical structure

21 p3798 A70-41272

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface

22 p4075 A70-43598

CLOSE PACKED LATTICES

Surface energy data calculated for bcc and hcp metals and high melting point compounds

06 p1090 A70-17845

Stacking faults developed in double hexagonal closed-packed phase of Ni-Ti alloy in cold worked and annealed conditions, using X ray line broadening

10 p1906 A70-25228

Superconductivity in noble metal rich hexagonal close packed phases and fcc solid solutions ascribed to Fermi surface-Brillouin zone interaction

15 p2785 A70-32398

CLOSED CIRCUIT TELEVISION

Color closed circuit TV visual cues in flight simulation during flare and touchdown, including ATA requirements and acuity limits

10 p1857 A70-24201

CLOSED CYCLES

Electrothermal instability and critical Hall parameter growth rates in closed cycle linear plasma generators with variable electron mobility, discussing perturbation effects

01 p0151 A70-10655

Closed circuit respiration studies on subjects at rest and work, demonstrating potassium superoxide as oxygen source in breathing apparatus

15 p2688 A70-31500

Space acquired hydrological cycle data relating to water occurrence and movement in atmosphere and earth surface mantle

20 p3616 A70-39063

Equilibrium performance of closed Stirling cycle with chemically reactive gas as working fluid, discussing power density and thermal efficiency

22 p3982 A70-42756

Effective pressure ratio nomographs for mechanical energy conversion and heat transfer of closed regenerative Stirling engines, using isothermal theory

22 p4091 A70-42757

NERVA reactor technology applied to closed Brayton cycle MHD power system

24 p4377 A70-45956

CLOSED ECOLOGICAL SYSTEMS

Medico-engineering experiment in partially closed ecological system for long term manned space missions

01 p0032 A70-10363

Phytotron design and operation, discussing closed air conditioned plant growing system at Stockholm including greenhouse, light controlled rooms, darkrooms, etc

03 p0435 A70-13716

Closed life support systems tests, describing effects of long term /one year/ confinement of three human subjects

04 p0641 A70-14565

Mathematical model of optimal partially closed life support system consisting of man, recycling unit, storage unit and waste disposal outlet

05 p0809 A70-17110

C-5 design features for entire environment assuring human integration as crew member or troop passenger

09 p1605 A70-22021

Phytotron design and operation, discussing closed air conditioned plant growing system at Stockholm including greenhouse, light controlled rooms, darkrooms, etc

11 p1990 A70-25516

Rhesus monkeys tolerance to graded increase in closed environment carbon dioxide, examining heart rate and cardiac rhythm

11 p1988 A70-26517

Plant cultivation in closed biological cycles by hydroponic method using keramsit /alumoferrisilicate/ substrate

13 p2358 A70-29328

Biogeocenosis applicability to artificial closed ecological systems consisting of plants creating organic matter and heterotrophic organisms

13 p2353 A70-29501

Microbial flora in human subjects confined to long term Tektite I underwater habitat

15 p2681 A70-31879

Airborne bacteria and fungi in atmosphere of Tektite I underwater habitat

15 p2681 A70-31880

Carbon dioxide output monitoring from biosatellites for circadian system behavior in closed organism-environment systems

16 p2849 A70-33992

Manned planetary spacecraft and space stations as ecological systems, considering common features

17 p3176 A70-34799

- Systemic bacterial infection resistance in white mice exposed to simulated hypobaric normoxic space cabin environment 20 p3572 A70-39431
- Optimal temperature control for confined spaces and life support systems, using mathematical models of environmental control systems 24 p4295 A70-46373

CLOSED LOOP SYSTEMS U FEEDBACK CONTROL CLOSING

- Cone crack closure in brittle solids, discussing optical and X ray studies on glass and silicon during unloading 17 p3183 A70-34621

CLOSTRIDIUM BOTULINUM

- Thermal stability of glycolytic enzymes from thermophilic clostridia 17 p3042 A70-35327

CLOSURES

- Cascade mechanism of closure associated with non-linear wave interactions between modes in turbulent plasmas, using hydrodynamical model 11 p2087 A70-25358

CLOTH

U FABRICS

CLOTHING

- NT COTTON FIBERS
NT FLIGHT CLOTHING
NT GOGGLES
NT HELMETS
NT PRESSURE SUITS
NT PROTECTIVE CLOTHING
NT SPACE SUITS

- Static electricity generation and discharge in human beings due to clothing layers, analyzing body capacitance, resistance and inductance for ordnance and fuels safety 03 p0439 A70-14133

- Static electricity suppression for textile materials by blending conducting metal fibers into yarn 05 p0870 A70-16299

CLOTTING

- Blood clotting and fibrinolysis under short term physical work in healthy men measured using thrombelastograms 06 p0992 A70-17423

CLOUD CHAMBERS

- Cloud chamber investigation of artificial cloud of water droplets in electrostatic field, discussing cloud precipitation, collection efficiency and fog dissipation 05 p0879 A70-16689
- Critical review of paper on evidence of quarks in air shower cores from cloud chamber tracks, explaining data by statistical fluctuations in particle fluxes 08 p1562 A70-21272
- Fog droplet size growth time dependence and spectral variations during simulated cloud formation by water vapor condensation in chamber 14 p2601 A70-30128

CLOUD COVER

- Automatic picture transmission /APT/ ground station design for reception of weather satellite cloud cover photographs, discussing SNR 01 p0059 A70-11451
- Methane and ammonia absorption bands and possible structure of Jupiter and Saturn cloud layers by spectrophotometric observations 02 p0366 A70-11807
- Two layer model of Jovian clouds including clear space, showing computed and measured equivalent widths of H quadrupole lines 02 p0367 A70-11813
- Decay times for thermal disturbances near cloud tops in Jupiter atmosphere, discussing hydrogen absorption 02 p0368 A70-11827
- Venusian atmosphere low reflectivity reinterpretation based on spectrophotometric data indicating constituents of yellow and upper UV haze layers 02 p0377 A70-12555
- Linear regression equations to relate atmospheric precipitable water to surface dew point, sky cover and weather 03 p0520 A70-13163
- Cloud cover recurrence estimators from set of unconditional probabilities tested against sample of Northern Hemisphere diurnal variation data 03 p0521 A70-13164
- Venusian cloud layer radius, discussing error in determination of occultation level height of regulus by venus 03 p0574 A70-13881
- Cloud layer multiple scattering in Jovian atmosphere, discussing influence on Lorentzian contour of planetary absorption lines 03 p0574 A70-13882
- Global cloud cover and earth atmosphere heat budget measured from weather satellites, discussing Tiros pictures, radiation charts and albedo 03 p0479 A70-14348
- Cloud cover consequence on earth photographing space missions simulated by Monte Carlo method using worldwide statistics [AAS PAPER 69-577] 04 p0676 A70-14636

- Radiometric investigation of energy brightness distribution over clear, cloudy and variable sky at micron wavelengths 06 p1056 A70-17835

- Cloudy sky IR background radiation model for designing simulator of IR background for studying noise rejection characteristics of electro-optical automatic control systems 07 p1246 A70-19527

- Vertical short wave albedo profiles in lower troposphere under cloudiness and clear sky using actinometric sounding 08 p1537 A70-21105

- Cloud layer vertical displacement effects on upper boundary and temperature changes in st-sc using aircraft sounding data 08 p1537 A70-21107

- Side-looking radar used to produce high resolution imagery of Panamanian province under persistent cloud cover 10 p1882 A70-25045

- Communication satellite repeater design requirements to achieve adequate SNR for varying rain and cloud attenuation [AIAA PAPER 70-498] 11 p1998 A70-25425

- Cloud cover effect on earth photographing space missions by Monte Carlo computer simulation, using worldwide cloud statistics 11 p2075 A70-25600

- IR reflectance of cirrostratus and cirrus clouds and jet contrail measured by spectrometer on high altitude aircraft 11 p2045 A70-25626

- Computer plotting of flow patterns and orographic cloud over/in lee wave flow, including rotors, blocking and high level turbulence 12 p2264 A70-27722

- Energy distribution in dark and light details on Venus spectrograms, considering relation to clouds in upper atmosphere 12 p2311 A70-28304

- Spectrographic measurements of Jovian Red Spot and Southern Tropical Zone molecular absorption bands related to cloud cover density and depth 12 p2311 A70-28305

- Cloud cover photographs in deep occluded cyclone by Soyuz 4 spacecraft 14 p2602 A70-30139

- Integral radiation fluxes incident on sloping and horizontal surfaces compared under cloud covers of various intensities 14 p2603 A70-30408

- Cloud size clear area spacing statistics development for satellite mission and simulation analyses 14 p2609 A70-30598

- Venus atmosphere-lithosphere interactions, predicting electrically conducting cloud masses presence 14 p2646 A70-31070

- Cloud cover stationary pictures by spin-scan camera in synchronous orbit over Pacific converted into motion pictures showing cloud pattern changes and storm development 14 p2587 A70-31150

- Retrograde rotation of equatorial spots of Venus cloud exterior layer, using UV photographic and spectroscopic observations 14 p2649 A70-31215

- Geochemistry of venus volatile elements identifying cloud forming species as Hg compounds 14 p2650 A70-31217

- Average rotational temperature of Venus atmosphere above cloud tops from carbon dioxide band spectroscopy 14 p2650 A70-31219

- Cloud cover statistical data applied to planning remote satellite-borne sensing missions, using Monte Carlo method 14 p2611 A70-31232

- Cloud formation and structure determination using aircraft-borne IR stereo imagery 15 p2769 A70-31687

- Temperature profiles and wind velocities during convective cloud banks formation from meteorological satellite data 15 p2770 A70-32065

- Wind field reduction from satellite cloud structure data 15 p2770 A70-32066

- Cloud distribution and optimal satellite picture foreshortening for global meteorological analysis of atmosphere, using Zond 7 photograph 15 p2771 A70-32110

- Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds 15 p2803 A70-32499

- Edson layer theory explaining phase anomaly of inner planets in terms of light scattering by thin layer above Venus cloud cover 16 p2973 A70-33113

- Cloud-free earth areas determined via reflected radiance measurements from ATS 3 cloud camera 17 p3133 A70-35930

- Geometric methods for processing TV images of earth cloud cover 18 p3286 A70-36964

- Underlying surface inhomogeneity effect on radiation in presence of solid cloud cover 18 p3287 A70-36975

- Atmospheric scattering indicatrices from daytime sky brightness balloon measurements in presence of cloud cover 19 p3460 A70-37420

- Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds 23 p4240 A70-43920

- Venus atmospheric speculations compared to Soviet and American probe findings, discussing composition, evolution cloud layer and ionosphere 23 p4253 A70-44863

CLOUD GLACIATION

- Cloud particles growth and interactions, discussing water vapor condensation, ice phase nucleation, rain droplet growth rate, etc 07 p1262 A70-18897

- Criticism and reply to Venus cloud water drop HCl concentration preventing ice cloud formation 11 p2108 A70-25653

- Aircraft ice crystal counter for real-time measurement in cirriform clouds, using contact electrification detection 12 p2264 A70-28091

CLOUD HEIGHT INDICATORS

- Radiation scattering during upper cloud altitude determination by satellite 06 p1097 A70-17790

- Layered cloud amounts, cloud bases and tops heights analyses based on satellite TV and IR data 10 p1912 A70-23936

- Radiation scattering during upper cloud altitude determination by satellite 10 p1913 A70-25022

- Clouds upper height boundary relation with radiation temperature field from satellite data, noting cirrus clouds influence 13 p2444 A70-28589

- Lidar for cloud height measurements from ground and meteorological satellites 14 p2611 A70-31155

CLOUD PHOTOGRAPHS

- Automatic picture transmission /APT/ ground station design for reception of weather satellite cloud cover photographs, discussing SNR 01 p0059 A70-11451

- Satellite photographs interpretation for cloud types and patterns with allowance for transmission characteristics, image cut-off at corners and sun angle and glint 13 p2394 A70-28786

- Cloud cover photographs in deep occluded cyclone by Soyuz 4 spacecraft 14 p2602 A70-30139

- Cloud cover stationary pictures by spin-scan camera in synchronous orbit over Pacific converted into motion pictures showing cloud pattern changes and storm development 14 p2587 A70-31150

- Oceanographic phenomena inference from satellite cloud photographs, developing seasonal cloud climatology for Peru Current area 16 p2897 A70-33713

- Wind velocity and direction determination from artificial luminescent clouds photographs, calculating topocentric coordinates 18 p3252 A70-36991

- Satellite TV cloud picture digital representation, deriving algorithms for statistical analysis of geometrical features 19 p3463 A70-38755

- Vertical motion determination from satellite cloud pictures based on canonical correlation of initial fields 20 p3664 A70-39401

- Atmospheric global observation for long term weather forecasts, obtaining cloud photographs and radiation data from satellites 21 p3847 A70-42255

CLOUD PHOTOGRAPHY

- Noctilucent clouds morphological and kinematic characteristics based on photographs 03 p0476 A70-13885

- Photographic detection of thin cirrus clouds effect on earth heat budget 04 p0696 A70-15575

- Intertropical convergence zone /ITCZ/ movements, analyzing data obtained by ship and ESSA satellite cloud photography 10 p1912 A70-23939

- Onboard IR receiver and ground photorecorder for Meteor satellite cloud tracking, using computer processed data 15 p2738 A70-32112

- ATS spin scan cloud cameras mechanical design and operation 16 p2914 A70-34149

- Gemini spacecraft photograph patterns revealing relationship between cloud formation and topography 18 p3258 A70-36298

- Geometric methods for processing TV images of earth cloud cover 18 p3286 A70-36964

Electronic data handling and CRT display of ATS satellite cloud pictures
24 p4371 A70-46048

CLOUD PHYSICS

Structure and composition of clouds of ammonia and water bearing condensates, investigating compositional models of Jupiter atmosphere, considering ammonium hydrosulfide cloud layer
01 p0179 A70-10527

Noctilucent cloud observation stations and international cooperation in exchanging climatological data concerning annual variations, height distribution and latitude dependence
01 p0072 A70-10579

Jupiter upper atmosphere cloud bands zonal motion velocities, examining barotropic stability criterion and geostrophic balance hypothesis
02 p0368 A70-11828

Visible radiation reflection, transmission and inside intensities of terrestrial clouds calculated by Monte Carlo program utilizing scattering phase function
02 p0326 A70-12286

Night airglow variations observed during Cosmos satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies
05 p0841 A70-16728

Stratified cloud transport and evolution, solving kinetic equations by numerical method
06 p1053 A70-17210

Supersaturation during droplet-liquid phase formation in clouds estimated from trough formed on curve of distribution function
06 p1097 A70-17796

One dimensional cumulus convection model modified by incorporating rain evaporation rate and temperature changes from downdrafts
06 p1099 A70-18568

Cloud base updraft field, three dimensional reflectivity pattern and rain and hailfall pattern for thunderstorms in Alberta, discussing shear
06 p1099 A70-18569

Momentum considerations in thunderstorm dissipation by disrupting organized cloud base updraft structure
06 p1100 A70-18570

Air flow in updraft through and around cloud region containing precipitation particles using numerical model, computing horizontal divergence
06 p1100 A70-18572

Dry regions in cumulus cloud near environment interpreted as evidence of compensating motion in environment
06 p1101 A70-18577

Atmospheric electricity phenomena connected with micro, macro and global processes, discussing electrical generation by convective clouds and earth-atmosphere system electrical balance
07 p1262 A70-18896

Cloud particles growth and interactions, discussing water vapor condensation, ice phase nucleation, rain droplet growth rate, etc
07 p1262 A70-18897

Barium ion artificial clouds motions and striations due to cloud-ionosphere coupling, studying electron density variations below cloud in E layer
07 p1271 A70-20155

Nacreous and noctilucent cloud physics, discussing earth-impacting meteor dust accumulation and mesopause water vapor
07 p1273 A70-20265

Rocket-borne sampler for collecting noctilucent cloud particles in mesopause, describing collection and analysis methods and protection against tropospheric contamination
07 p1273 A70-20266

Noctilucent clouds in mesopause over North America, discussing ground stations network, intensity variations, structure and time distribution
07 p1273 A70-20267

Soviet collection of papers on physics of clouds and cloud modifications, covering droplet fusion, radar precipitate measurements, cellular meteorology, ice forming aerosols, stochastic condensation
08 p1535 A70-20770

Soviet collection of papers on cloud physics and modifications covering precipitation agents, droplet growth laws, electrical properties, etc
08 p1535 A70-20876

Vertical plane and axis symmetrical numerical models for cumulus convection of moist atmosphere, discussing initial conditions
08 p1536 A70-21025

Soviet collection of articles on physics of clouds modifications covering precipitations microstructure remote measurements, microwave scattering, etc
08 p1536 A70-21094

Radar model of shower and hail clouds as two phase system of independently scattering spherical particles, stressing radar properties dependence on particle properties
08 p1536 A70-21097

Soviet collection of papers on cloud physics covering stratus variation, radiation, albedo profiles, st-sc

clouds, supercooling, crystallization, condensation nuclei, etc
08 p1536 A70-21101

Time dependent height of lower boundary of subinversion stratus clouds using atmospheric moisture and heat transport equations
08 p1537 A70-21102

Horizontal turbulent diffusion model of cloud, determining particles dispersion as function of time
08 p1538 A70-21111

Optimal atmospheric transmittance windows for underlying surface and cloud temperature determination from satellites
08 p1538 A70-21426

Layered cloud amounts, cloud bases and tops heights analyses based on satellite TV and IR data
10 p1912 A70-23936

Electrohydrodynamics of charged water drop pairs disintegration in electric field concerning warm cloud electrification
10 p1912 A70-24806

Warm clouds electrification calculated for electromagnetic field growth by inductive mechanism, noting role of water drop pair interaction
10 p1913 A70-24807

Pulsed Doppler radar technique for monitoring and diagnosing severe storms, obtaining wind velocity and direction within cloud
10 p1844 A70-25242

Cumulus convection one dimensional time dependent numerical model, considering horizontal mixing, evaporation, precipitation generation and freezing and thermodynamic processes
11 p2075 A70-25648

Initial cloud formation model, computing drop concentration and supersaturation
11 p2075 A70-25917

Scattering particle distribution relation to halo formation in polydisperse clouds, using Kirchhoff approximation for halos theory construction
12 p2264 A70-27522

Model for droplet size spectrum in cloud with spatial inhomogeneity of nuclei concentration, determining characteristic size dependence on altitude
14 p2601 A70-30129

Cloud droplets coagulation growth, calculating aerosols inertial capture coefficient by fine jet method
14 p2602 A70-30390

Time constant equations for hair and film radiosonde hygrometers, allowing for inertial errors in humidity and cloud boundary measurements
14 p2603 A70-30412

Dissection techniques for measuring dynamic parameters of debris clouds expanding from energetic events
14 p2584 A70-30510

Spacecraft design requirements for scientific zero G cloud physics experiments concerning colloidal modification processes
14 p2584 A70-30552

Cloud model development and computer simulation uses, noting applications to aerospace experiment design
14 p2608 A70-30597

Electromagnetic ELF radiation model for multiple return strokes of cloud to ground lightning discharges, considering channel length
15 p2726 A70-31864

Cloud droplet agglomeration by weak shock waves, discussing growth mechanism
17 p3067 A70-34549

Upper atmosphere temperatures from vapor cloud diffusion, eliminating errors from bright sky background at twilight
17 p3076 A70-34940

IR radiation diffuse reflection, transmission and emission in water clouds
18 p3244 A70-35950

Cloud brightness as function of illumination and underlying surface conditions, relating macrooptical parameters and microstructure
18 p3284 A70-36628

Photolytic model of Jupiter belt excess temperatures and coloration compared to solid ammonia clouds, using IR and visual observations
19 p3513 A70-37410

Spectral radiative capacity of lower level clouds in specific transmittance window, using airborne diffraction spectrometer measurements
19 p3461 A70-37424

Isolated cumulus clouds formation numerical simulation, determining movement rates relationship to external wind speed
19 p3463 A70-38756

Prototype cloud physics laser nephelometer design and performance, determining droplet concentration and size from scattered light pulse count and amplitudes
20 p3626 A70-39081

Pulsed laser lidar measurements of atmospheric turbidity, diffusion, pollution, visibility and cloud physics
20 p3584 A70-39127

Noctilucent cloud kinematics, examining wave structure and lengths, velocities and general motion
20 p3622 A70-39403

Cloud motions from IR measurements within overlap region of adjacent Nimbus II orbits compared with wind vectors from constant pressure charts
20 p3665 A70-40068

Cloud structure, atmospheric water vapor and liquid water contents from passive ground based microwave spectrum measurements
21 p3846 A70-40906

Thunderstorm development processes investigated by aircraft measurements of electrical structure in cumulonimbus clouds, noting lightning probability dependence on turbulence within cloud
22 p4064 A70-42775

Cloud droplet growth rapid computation using number density mean value for integrating stochastic coalescence equation into differential equation
22 p4064 A70-42910

Stratus cloud dissipation process in descending vertical currents, using thermohydrodynamic and kinetic equations for cloud droplet distribution function
22 p4066 A70-43377

Noctilucent clouds blue color and rocket sounding results explained by ozone model of mesospheric clouds formation
23 p4188 A70-44048

Computerized simulation of raindrop effects on initiation of cloud-to-ground lightning strokes
24 p4371 A70-45978

CLOUD SEEDING

Visibility improvement in fog at airports, discussing fog-seeding and warm fog modification operations
01 p0135 A70-11320

Satellite surveillance in cloud and weather modification, considering area selection for cloud seeding, atmospheric energy redistribution, etc
04 p0677 A70-14645

[AAS PAPER 69-621]

Seeding effects on isolated cumulus clouds, using numerical model of microphysics and dynamics factors, measuring rainfall amounts and duration
06 p1098 A70-18243

Soviet collection of papers on cloud physics and modifications covering precipitation agents, droplet growth laws, electrical properties, etc
08 p1535 A70-20876

Soviet collection of articles on physics of clouds modifications covering precipitations microstructure remote measurements, microwave scattering, etc
08 p1536 A70-21094

Artificial crystallization theory for supercooled dry-ice seeded stratus clouds, taking into account condensation growth and turbulent diffusion of crystals
08 p1538 A70-21108

Vertical and horizontal expansion rate of crystallization of dry-ice seeded internal stratus clouds
08 p1538 A70-21109

Artificial crystallization zones width measurement error during time intervals after cloud seeding by aircraft and solar reflection methods
08 p1538 A70-21110

Airborne pyrotechnic cloud seeding system development, testing and application, comparing rainfall from test and control clouds
10 p1886 A70-23931

Warm fog clearing effectiveness by seeding with hygroscopic nuclei as function of fog droplet and seeding nuclei distribution
17 p3132 A70-35928

Weather modification by jet aircraft contrails, discussing cloud seeding observations in Alaska
24 p4371 A70-45421

NT STRATOCUMULUS CLOUDS

NT STRATUS CLOUDS

Galactic satellite interpretation for high velocity hydrogen clouds at high latitudes
02 p0363 A70-11780

Radiative heat transfer through dust clouds in radiative equilibrium and isothermal clouds between parallel plates measured with heat flowmeter
04 p0781 A70-14802

[ASME PAPER 69-WA/HT-41]

Spin angular momentum of planets based on particle accretion, discussing particles cloud condensation
08 p1576 A70-21400

Venus clouds self consistent radiative-convective model with sun as heat source
11 p2107 A70-25647

Radar target optimal detection algorithms in cloud of passive reflectors, noting space surveillance regularities
15 p2696 A70-31516

Aerodynamic drag coefficients of micron size particle clouds in compressible transonic flow, using light extinction method

16 p2894 A70-33882

Interstellar cloud collisions, examining gas and dust particles separation by size

18 p3313 A70-36323

Venus cloud displacement, measuring formations longitudes and latitudes for evidence of cytherean upper atmosphere rapid bulk motion

19 p3518 A70-38027

Venus atmospheric visible clouds circulation, determining zonal flow induced by moving heat sources

19 p3519 A70-38252

Collisions in one, two and three dimensional plasmas of finite sized particles and clouds, obtaining scattering cross sections and Fokker-Planck coefficients

20 p3679 A70-39663

NT CUMULUS CLOUDS

NT NIMBOSTRATUS CLOUDS

NT NOCTILUCENT CLOUDS

NT STRATOCUMULUS CLOUDS

NT STRATUS CLOUDS

Satellite surveillance in cloud and weather modification, considering area selection for cloud seeding, atmospheric energy redistribution, etc

04 p0677 A70-14645

Depth and shape of 0.94 micron water vapor absorption band for clear and cloudy skies, noting radiation distortion for dark dense clouds

04 p0690 A70-15024

Satellite multispectral photometry data in airglow bands correlated with cloud characteristics and surface albedo variations

04 p0715 A70-15522

Spiral cloud vortex model in occluded extratropical cyclone constructed using atmospheric dynamics equations and satellite photographs

05 p0879 A70-16642

Climatological cloud type statistics for simulating earth sensing mission data output as function of sensor field of view and spatial resolution

06 p1065 A70-18098

Ground based radar surveillance for SST to avoid convective clouds and thunderstorm activity during transonic acceleration phase ensuring minimum demands on maneuverability

09 p1610 A70-22242

Reflection patterns of solar radiation from cloud, water and land surfaces measured by airborne radiometer, observing anisotropy

09 p1671 A70-23523

Glider pilots flight above cloudstreets in clear sky, discussing situation for wave soaring over flat ground

10 p1805 A70-24583

Terrestrial clouds near IR light scattering compared to reflectivity of water and ice particles, discussing Mie and multiple scattering

11 p2045 A70-25649

Vertical air velocity in convective clouds by pulsed Doppler radar observations of thunderstorm

11 p2004 A70-25650

Cyclone cloud vortex evolution from satellite photographs, examining reasons for onset and disintegration

13 p2444 A70-28588

Atmospheric moisture balance solution for altitude dependent vertical velocity and turbulence coefficient, considering cloud water content and boundaries height calculation

14 p2601 A70-30137

Clouds and precipitations radio brightness temperature contrasts taking into account underlying surface humidity

15 p2771 A70-32070

Cloud brightness as function of illumination and underlying surface conditions, relating macrooptical parameters and microstructure

18 p3284 A70-36628

Relative effectiveness of radar and visual cloud observations

18 p3287 A70-36999

Steady symmetric flow model for Jupiter cloud banded structure, representing variable concentration of condensing constituents with latitude

19 p3519 A70-38254

Ice crystals growth rate in natural clouds over minus 2-minus 32 C range based on characteristic axial ratio

19 p3462 A70-38261

Soviet book on aircraft electrification in clouds and precipitation during subsonic flight covering atmospheric electrical properties, flight dynamics modification, communications interference, etc

19 p3356 A70-38800

Venus atmosphere and water vapor, finding ice clouds by spectrum analysis

20 p3708 A70-39961

Cloudy planetary atmospheres model, assessing nonlocal thermodynamic equilibrium role

21 p3813 A70-40903

Large scale axisymmetric atmospheric vortex wind velocity determination, using statistical cloud data from meteorological satellites

22 p4065 A70-43376

CLUTCHES

Impact problems of slip clutch and beam scales dynamic characteristics simulation by 1130 CSMP /Continuous System Modeling Program/

10 p1860 A70-24653

Rotary relay for solar array space power transfer using clutch of low moment of inertia capable of recycling once each orbit

17 p3101 A70-34765

CLUTTER

Air traffic control radar velocity resolution for eliminating ground, rain and angel clutter by optimizing wavelengths, pulse length and beam width

02 p0332 A70-11969

Radar system for air traffic control using twin beam antenna to improve performance with respect to ground and angel clutter

02 p0332 A70-11970

Ground clutter characteristics from moving receiver in bistatic radar system, developing method for performance prediction and problem analysis

03 p0449 A70-13586

X band radar with horizontally and vertically polarized antennas to compare sea clutter suppression by decorrelation and constant alarm rate receivers

03 p0451 A70-13935

Nonadaptive processor to detect coherent radar pulse trains with uniform amplitude in clutter-plus-noise environment

04 p0651 A70-15334

Clutter symmetry as indication of matching optimum signal filter pair, comparing mismatched and matched systems

06 p1013 A70-18626

Distributed ground clutter effects computation in airborne pulse Doppler radars, describing high PRF radar

07 p1236 A70-20063

Two frequency moving target indicator system overcoming clutter motion relative to radar

11 p2004 A70-25737

Subclutter visibility /SCV/, resolution and interclutter of MTI or Doppler search radars in land, sea and weather clutter

12 p2188 A70-27940

Radar cross section sea clutter model based on slightly rough surface superposition on swell structure

13 p2366 A70-29215

Clutter signals in radar receiver antenna, determining autocorrelation function and spectral power density

15 p2701 A70-32466

Antenna array system for surface target detection in receiver noise and heavy clutter by space-time decision theory

16 p2860 A70-32954

Recent radar developments covering ground and shipborne systems, clutter suppression and computer techniques

18 p3228 A70-36658

Sea clutter tolerance comparison for frequency agile and fixed frequency radar

20 p3584 A70-39200

Optimum pulse radar signal-receiver design, considering implementation errors for maximum target detectability in clutter

24 p4313 A70-46055

COAGULATION

NT BLOOD COAGULATION

Cloud droplets coagulation growth, calculating aerosols inertial capture coefficient by fine jet method

14 p2602 A70-30390

COALESCENCE

U COALESCING

COALESCING

Physical and chemical phenomena and critical factors underlying, furthering or impeding water droplets coalescence in glass-fiber bed of filter-separator

04 p0625 A70-14709

Electromagnetic theory of forces for coalescence in granular layers during thermal evaporation of thin films, calculating interaction between instantaneous dipoles

13 p2471 A70-29640

COANDA EFFECT

Aircraft development for subsonic and transonic flight dependent on methods using blowing and boundary layer control and Coanda and Magnus effect

09 p1610 A70-22220

Coanda effect in bistable fluid amplifier, using finite difference method for computer programmed solution of flow equations

[ASME PAPER 70-FLCS-12] 22 p4008 A70-42415

COASTAL ECOLOGY

U.S. Coast Guard air delivered antipollution transfer system for oil, discussing deployment method, trajectory analysis, rigging techniques and full scale testing

[AIAA PAPER 70-1205] 21 p3752 A70-41813

COASTING FLIGHT

Constant thrust electric propulsion systems performance with coast trajectories presented for 100 AU extracryptic missions

[AIAA PAPER 68-546] 06 p1137 A70-17160

COASTS

Coastal areas remote sensing instrumentation and techniques, discussing data handling and analysis and ground verification of color and multispectral imagery

[AIAA PAPER 70-299] 09 p1669 A70-22885

Coastal erosion survey by aerial photography, measuring change in beach locations over period of time lapse by corresponding reference points on photograph

10 p1879 A70-24748

Communications satellites for offshore systems, noting development of small earth station

22 p3991 A70-43576

COATING

NT ANODIZING

NT ELECTROPLATING

NT ENCAPSULATING

NT METALLIZING

Glass fiber-reinforcing techniques of polymers, discussing coating and compounding processes

01 p0104 A70-10775

Surface coating optical and thermal properties investigated in preparation for HELIOS solar probe

04 p0762 A70-15163

COATINGS

NT ALUMINUM COATINGS

NT ANODIC COATINGS

NT BIREFRINGENT COATINGS

NT CERAMIC COATINGS

NT PROTECTIVE COATINGS

NT RUBBER COATINGS

NT SPRAYED COATINGS

NT ZINC COATINGS

Contact thermographic materials application to non-destructive materials testing based on heat capacity, costs, removal time, equipment, personnel skill and training, etc

01 p0097 A70-10007

Stannic or cobalt oxide film coated glasses optical and energy characteristics determined for potential use in solar energy engineering

01 p0159 A70-10766

Thickness measurement of nonmagnetic coatings on magnetic substrates taking into account surface roughness effect

02 p0302 A70-12672

Solid lubricant films adhesion to metallic surfaces measured using pivot-twist technique

03 p0485 A70-13485

Plane electromagnetic wave backscattering from dielectric-coated metallic cylinder calculated as functions of incidence angle and coating external radius

09 p1636 A70-23075

Solar radiation heated boilers efficiency and operational temperature range improved by application of coatings, noting surface absorption properties

11 p2148 A70-25930

Selective optical coatings of alternate Ni and silicon dioxide layers, describing optical and spectral characteristics of black mirror

12 p2272 A70-27307

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions

[AIAA PAPER 69-1023] 13 p3384 A70-28530

Coating thickness measurement and analysis by radioisotope techniques including beta-particle, X and gamma ray backscatter and X ray fluorescence and absorption

15 p2742 A70-32780

Dynamic compensation of thermal pumping-induced deformation of laser active elements via thermal bending of resonator mirrors achieved by coatings

20 p3642 A70-39744

Solar wind effects on thermal control coatings reflectance and absorbance, noting simulation and thermophysical measurement requirements

[AIAA PAPER 70-833] 20 p3653 A70-39825

Polyvinyl chloride sheet steel manufacture, properties and welding methods

22 p4045 A70-42479

Boron and boron-carbide coatings formation by vapor deposition, determining optimum thermodynamic parameters from experiment

24 p3466 A70-45241

Steel surface diffusive saturation with elements of chlorides, noting role of iron chloride phase in promoting coating uniformity

24 p4350 A70-46332

COAXIAL CABLES

Electromagnetic wave diffraction effects on matching plasma waveguide to coaxial power extraction line

03 p0531 A70-13334

Physical model to study coaxial or triaxial cable systems interaction with ionizing radiation fields, emphasizing effects governing induced signals

04 p0658 A70-14746

Backward and complex waves propagation in circular waveguide with coaxial dielectric rod, discussing arbitrary angular dependences

05 p0812 A70-16145

Impedance in coaxial line generated by tee-fed waveguide slot antenna, using equivalent circuit

12 p2198 A70-27966

Frequency sampling adjustable equalizer design and operation, describing coaxial cable system tests

14 p2547 A70-30282

Electromagnetic wave diffraction effects on matching plasma waveguide to coaxial power extraction line

14 p2623 A70-30713

Lossless pulse-shaping active line for unipolar transmission, considering construction by loading two terminal Esaki diode to coaxial cable

15 p2697 A70-13827

Triboelectric noise in mechanically flexed low level signal cables for piezoelectric transducers with high gain amplifiers

21 p3825 A70-40866

Maxwell equations for hybrid modes of shielded ring line with axial and coaxial region at cut-off and near cut-off conductivity

21 p3793 A70-42269

Dielectric filled tubular monopole antenna driven by coaxial line with TEM mode, calculating current distribution from integral equation

23 p4175 A70-44953

Annular aperture /slot/ antenna driven by coaxial line, calculating input admittance and complete near field radiation distribution

23 p4176 A70-44954

COAXIAL FLOW

Dissimilar coaxial axisymmetric jets confined laminar mixing obtained from numerical solution of boundary layer equations, considering binary, isothermal and nonreacting system

04 p0621 A70-15579

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system

06 p1130 A70-17171

Interacting coaxial supersonic jet flows noise reduction based on noise distribution characteristics measurement in anechoic chamber

06 p1040 A70-18112

Viscous compressible fluid steady laminar flow between coaxial cylinders, studying flow characteristics for uniform inner cylinder velocity

10 p1870 A70-24792

MHD generator with generator channel consisting of two coaxial cylinders with smooth annular space, discussing internal impedance sensitivity

10 p1807 A70-24855

Coaxially flowing jets axisymmetric turbulent mixing between inner and outer streams

12 p2211 A70-27837

Ablation test facilities capability extension by surrounding high enthalpy flow with coaxial cold air jet

13 p2522 A70-29883

Nuclear light bulb reactor and coaxial flow reactor for gas core nuclear rocket engines

16 p2949 A70-33532

Turbulent coaxial flow analysis predicting fuel volume fraction in gas core nuclear rocket reactor cavity, using free-jet computer code and eddy viscosity equation

18 p3290 A70-36560

Extinction condition for diffusion flame formed from opposing coaxial gas jets

20 p3739 A70-40399

Turbulence measurements in ducted coaxial air flow with faster outer stream pertinent to gas core nuclear rocket feasibility

21 p3809 A70-41748

COAXIAL PLASMA ACCELERATORS

Pulsed plasma transfer systems weight analysis, studying propellant density gradients effects on coaxial plasma gun performance

06 p1133 A70-18231

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing

09 p1736 A70-23202

Current sheet speed in coaxial plasma accelerator computed as function of time, comparing results with velocity measurements

12 p2281 A70-27833

Coaxial electrode arc discharge plasma accelerators at reduced pressure under crossed fields, employing Hall effect

15 p2779 A70-32104

Pulsed coaxial plasma accelerator efficiency, examining high capacitance and axial propellant pressure gradients

[AIAA PAPER 70-1085] 20 p3693 A70-40250

Deuterium plasma three dimensional flow in coaxial accelerators, examining magnetic structure of filaments /field lines bundles/

21 p3856 A70-41321

Axial propellant density gradients and circuit capacitance correlated with pulsed coaxial plasma gun efficiency

21 p3858 A70-41726

Current distribution of accelerating electrodes of coaxial injector, using differential magnetic probe

22 p3965 A70-42805

Coaxial plasma deflagration gun for accelerating particles to high velocities at low thermal energy for plasma injection experiments

24 p4383 A70-45120

COAXIAL TRANSMISSION

U COAXIAL CABLES

U TRANSMISSION

COBALT

NT COBALT ISOTOPES

Polycrystalline Co strength and plastic properties tested at various temperatures and strain rates

03 p0510 A70-13352

Ionization energies and oscillator strengths for Fe XVI, Co XVII and Ni XVIII by frozen core approximation, noting applications to solar corona

06 p1150 A70-18465

Tensile properties variations of Co whiskers grown by reducing cobaltous bromide in hydrogen-argon mixture

07 p1306 A70-19071

Internal friction and shear modulus of Co under dynamic and steady state conditions, discussing peak at alpha-epsilon transformation

07 p1306 A70-19073

Co role in magnetic materials, discussing high magnetic moments in iron combinations, orbital angular momentum, quantum mechanics explanations, etc

07 p1306 A70-19074

Cobalt modified Ti-6Al-4V plate and billet, testing effects on heat treatment response, microstructure, tensile and fatigue properties, fracture toughness, etc

08 p1523 A70-21852

Cobalt surface X ray analysis after spark erosion treatment, revealing phase with high temperature stability

14 p2596 A70-30840

Cobalt addition to Ti-Al-V alloys, examining yield strength, heat treatment, ductility and microstructure

18 p3271 A70-35964

Dispersion hardened Co strength and plasticity temperature dependence, determining Ti and Nb carbides additives effects

19 p3450 A70-37350

Rotating Ti disk in liquid Co flow, investigating titanium carbide dissolution kinetics

20 p3648 A70-39245

Spark erosion or plasma jet treatment effects on Co surface structure, describing allotropic delta phase

24 p4364 A70-46221

COBALT ALLOYS

NT RENE 41

Hot corrosion reactions in Ni, Co and NiAl- base alloys exposed to salt-sulfur containing simulated gas turbine combustion atmospheres

01 p0118 A70-10728

Vapor pressures of cobalt over pure cobalt and over Ni-Co alloys determined as function of temperature by isotope exchange method

01 p0121 A70-11233

FeCo V plastic deformation and fracture, noting temperature and grain size effects on yield and flow stresses, ductile to brittle transition, etc

01 p0123 A70-11244

Ti-Al-Co alloys melting points and cast structures, discussing reactions with melt

01 p0125 A70-11644

Co-base hardfacing alloys mechanical properties and applications, discussing mechanical and chemical wear processes in cast and wrought types

02 p0319 A70-12712

Co-Cr alloy oxidation behavior at high temperatures and various oxygen pressures

02 p0319 A70-12720

WC-Co alloys noting polishing and grinding effects on residual stress and crack resistance

03 p0508 A70-13145

Co and Fe base alloys corrosion in Hg tested in reflux capsules and forced flow loops

04 p0710 A70-15631

Cobalt alloys physical properties and heat treatment, discussing service conditions and critical problems

04 p0711 A70-15684

Cobalt effects on Ni-W alloys mechanical and metallurgical properties including thermal stability,

fabrication response, weldability and impact resistance

07 p1306 A70-19070

Yield strength of cold worked MP Co-Ni alloys during aging at elevated temperatures, noting behavior in overaged condition

08 p1525 A70-21960

Co-based alloy mechanical properties and physical parameters at high temperatures, discussing oxidation and hot corrosion resistance

09 p1700 A70-22025

Work strengthening and microstructure of Co-Ni base alloys containing Cr and Mo, discussing deformation induced martensitic transformation

09 p1705 A70-22806

Electrical resistivity of TiNi and TiCo compounds and alloys measured at various temperatures after quenching or annealing

09 p1707 A70-23194

Adiabatic elastic stiffness of single crystals of Ni-Co alloys, determining bulk modulus dependence on chemical composition

10 p1904 A70-24699

Residual stresses effect on strength and hardness of tungsten carbide-cobalt alloy by application of small plastic deformations, observing crack formation anisotropy

10 p1904 A70-25168

Co-Fe core ability to adjust roll spacing in model rolling mill determined from magnetostrictive properties

10 p1905 A70-25175

Concentrated Fe-Co alloys, effects of local atomic configurational changes on hyperfine interaction using Mossbauer spectroscopy

12 p2284 A70-27245

Commercial Co base superalloys oxidation and hot corrosion resistance under controlled environments, examining role of various alloying elements

12 p2256 A70-27974

Vacuum annealing treatments effect on oxidation rate of Co-Cr alloy at high temperatures

12 p2257 A70-28007

Binary Co-In system thermal analysis, X ray diffraction and microscopy, discussing phase diagram

14 p2595 A70-30838

Portevin-Le Chatelier effect in carburized nickel and Ni-Co alloys, discussing carbide stability and carbon diffusion roles

15 p2756 A70-31562

Gamma phase particle distribution changes in homogeneous segregation in Co-Ti alloy attributed to elastic interaction during aging temperature changes

16 p2931 A70-33208

Co base superalloys for aircraft structures and parts, discussing temperature stability, corrosion resistance, creep, fatigue and strength

16 p2932 A70-33705

Convective diffusion and liquid velocity in Co and Fe based alloys corrosion in Hg at high temperature, using reflux capsules and forced flow loops

16 p2933 A70-34207

Iron, Ni, Cr and Co corrosion and mass transfer in high temperature Na, examining properties of stainless steels and cobalt base alloys

16 p2933 A70-34209

Binary Co-Cr alloy open circuit potential and microstructure, examining effects of composition, heat treatment, allotropic transformation and precipitation

18 p3271 A70-35966

Cobalt binary alloys allotropic transformation and thermal expansion at various temperatures

18 p3271 A70-35967

Automatic dilatometers for volume variations in steel and Co-W alloy during aging and heat treatment, noting microstructural changes

18 p3257 A70-36202

Electron microscopic investigation of alpha-epsilon phase transformations in Co-Ni alloys above and under phase equilibrium temperature

18 p3276 A70-36205

Fe diffusion in equiatomic Ni-Co alloy, using thin radioactive deposit method with tagged element Fe 59

18 p3277 A70-36440

Ultrahigh vacuum metal bonding by twist compression technique, reporting adhesion and friction coefficients for atomically ordered Pt-Co alloy

21 p3833 A70-41446

Allotropic transformation points and linear thermal expansion coefficients of Co-base binary alloy terminal solutions, using dilatometric method

23 p4203 A70-43864

Ternary Co-Cr-C alloys unidirectional solidification with metal matrix and carbide simultaneous freezing at eutectic liquidus line

24 p4358 A70-45235

Unidirectionally solidified carbide reinforced Co-Cr eutectic alloy, examining tensile strength and creep behavior

24 p4358 A70-45236

Fe-Ni-Co martensitic alloys isothermal age hardening, comparing bcc phase energy parameters of binary systems

24 p4362 A70-46182

COBALT ISOTOPES

- Solar flare proton induced radioactivity in Apollo 11 lunar surface material compared with stony meteorite data, noting cobalt 56 concentration
13 p2489 A70-28910
- Polarized Co59 target using He3-He4 dilution refrigerator, analyzing fast neutron scattering
14 p2584 A70-30508
- Low energy cosmic ray positrons arising from Co decay in Ni 56-Co 56-Fe 56 reaction chain in supernova Si burning shells
21 p3879 A70-40927
- Low temperature anharmonicity in thorium dioxide with Co 57 impurities, using Mossbauer effect of Fe 57
21 p3862 A70-40975

COBALT OXIDES

- Stannic or cobalt oxide film coated glasses optical and energy characteristics determined for potential use in solar energy engineering
01 p0159 A70-10766
- Grain boundary grooves growth kinetics in pure CoO at high temperatures, determining diffusion species and mechanisms
12 p2255 A70-27603

COCHLEA

- Guinea pig cochlear hair cell damage after exposure to impulse noise
02 p0236 A70-12322
- Traveling wave velocity in human cochlea determined by equally loud tonal pairs, comparing results to psychophysical and electrophysiological findings
02 p0237 A70-12323
- Cochlear microphonics in guinea pigs using analog equivalent electrical circuit
11 p1992 A70-26494
- Electrical polarization effects on discharges in individual auditory nerve fibers following current application to cochlear partition
17 p3033 A70-35609
- Intense white pulsed jet engine noise effects on cochlea biocurrents in cats
23 p4157 A70-45076

COCKPIT SIMULATORS

- Flying qualities criteria and piloted simulator studies during development and flight testing of stability augmentation system for B-52 aircraft
[AIAA PAPER 68-1066] 04 p0624 A70-15380
- Dual cockpit wide angle visual cue simulator design, discussing sky-earth-sun projector with four axis gimbal drive
[AIAA PAPER 70-360] 10 p1857 A70-24204
- V/STOL cockpit three degree of freedom multicrew research simulator, utilizing visual display and digital computer
[AIAA PAPER 70-356] 10 p1858 A70-24207
- Landing performance of BLEU static cockpit simulator compared with flight data for night conditions in clear and limited visibility
[AIAA PAPER 70-344] 10 p1859 A70-24215

COCKPITS

- Cockpit information transfer between pilot and flight control information displays improved by on-board data processing system
03 p0436 A70-14021
- Cockpit display system to reduce aircraft pilot workload and aid judgment making during critical operations
[ASME PAPER 69-WA/BHF-12] 04 p0642 A70-14854
- Sound levels and frequency spectra of noises measured in AN-24 and IL-18 turboprop aircraft cockpits
05 p0796 A70-16925
- Flight deck controls and instrument disposition in business aircraft emphasizing size
06 p1061 A70-17318
- Flight deck displays based on digital computer providing signals for CRT and instrumentation
06 p1061 A70-17319
- Collision avoidance system /CAS/ cockpit display equipment design and operation
08 p1492 A70-20480
- Attack aircraft cockpit displays, discussing design requirements and pilot ability as controller
08 p1435 A70-20674
- Thermal tolerance and comfort graph for air conditioned spaces with low air velocity, considering fighter plane cockpits
08 p1454 A70-21949
- V/STOL transport aircraft cockpit design in terms of size, geometry and equipment accommodation
10 p1804 A70-24048
- VFW 614 nose-contoured cockpit panes, discussing structural weight and strength, vision and window frame fabrication
10 p1806 A70-24866
- Inflight aircraft cockpit noise levels effect on pilot hearing sensitivity
11 p1990 A70-25875
- General aviation aircraft fixed-base engineering flight simulator involving use of analog computer, discussing equations of motion and aircraft cockpit
[SAE PAPER 700235] 11 p2031 A70-25904
- Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and interpolator speech interference
11 p1991 A70-26275

Harrier short takeoff fighter aircraft cockpit design, describing layout, lighting, warning and escape systems, etc
12 p2162 A70-27888

- Cockpit data monitor allowing pilot selection of instrumentation parameter readout
13 p2345 A70-28970
- Heat stress levels in cockpit of AH-1G Hueycobra helicopter parked in sunlight with closed canopy, using sweating copper mannikin
15 p2689 A70-31881
- Flight deck design since 1920, discussing ergonomics and avionic aspects
16 p2913 A70-34048
- Heavy lift helicopters cockpit display problems, describing photographic flight research program for data acquisition
17 p3082 A70-34731

- Commercial aircraft flight deck systems controls and time sharing displays, emphasizing crew management
[AIAA PAPER 70-938] 17 p3021 A70-35847
- Low cost and weight reliable microminiaturized IC automatic cockpit checklist systems for aircraft pilots
22 p3977 A70-42298
- U.S. SST flight deck instrumentation and cockpit displays during flight, discussing economic analysis of operations
[ICAS PAPER 70-59] 23 p4139 A70-44155

CODERS

- Pulse width modulation command coder for German research satellite Azur control
04 p0653 A70-15662
- Shaft misalignment effect on accuracy of precision digital shaft angle encoders, using test fixture and optical methods
05 p0844 A70-15769
- Quantizing noise measured for single integration delta modulation coders using unequal positive and negative integrator step sizes
09 p1638 A70-23368
- High speed PCM terminal with 600 channel capacity, evaluating feasibility for high speed PCM codec, examining STN degradation factors
10 p1835 A70-24337
- Coding device for computer storage of graphical information, describing construction and operation
19 p3385 A70-38576
- High speed PCM Codec with maximum 600 channel capacity applied to Time Division Multiple Access /TDMA/ system for satellite communication
23 p4166 A70-43774

CODES

- Binary, ternary and multilevel digital signals transmission codes emphasizing PCM signals
09 p1631 A70-22038
- Beacon identification-friend-foe/selective-identification-feature code-validation schemes for ATC, deriving expression for cumulative probability of validation on or within N interrogations
10 p1914 A70-24446
- Cyclic codes for error correction noting connection with exponential sum theorems
11 p2074 A70-26312
- Graphical data conversion into code for storage in computer memory
15 p2705 A70-31576
- Practical codes in digital space communication systems, reviewing Shannon information theory theorems
15 p2698 A70-31963
- Hypervelocity impact theory, discussing Euler hydrodynamic codes, projectile cratering dimensional analysis, self similar solutions, etc
15 p2823 A70-32785
- Magnetohydrodynamic calculations, discussing various models, difference methods, codes, boundary conditions, etc
18 p3296 A70-36794
- PCM data transmission, considering baseband code and modulated carrier formats and spectral distributions
19 p3379 A70-37905
- Natural language a priori description and linguistic algorithms construction, using statistical phrase contraction with Hoffman codes
22 p3993 A70-42492
- Digital computer codes for production finite element structural analysis, discussing input, output and engineering details
23 p4270 A70-44701
- Cyclic q-ary codes invariant under linear group substitutions using polynomial method
24 p4313 A70-46062

CODING

- NT DECODING
NT REDUNDANCY ENCODING
NT SIGNAL ENCODING
Color coding effects in compatible and noncompatible display control arrangements
02 p0247 A70-12381
- Rate distortion function for class of sources, proving positive and negative sides of Shannon encoding theorem for noisy channels
02 p0266 A70-12611

Technique for coding data on cosmic ray variations based on packing digital information in computer storage, proposing selective statistical control for tape recording phase
05 p0898 A70-15929

- Diagram compression by spatiotemporal coding of antenna array fitted with phase shifters
05 p0811 A70-15989
- Ternary data transmission systems characteristics for modulated codes with known parameters or random initial phases
05 p0816 A70-17006
- Binary cyclic coding schemes for multiplex spectrometry in terms of linear least mean square unbiased estimate
06 p1013 A70-17217
- Radiation Shielding Information Center computer code library for radiation transport or shielding calculations, listing programs available
07 p1239 A70-20364
- Arithmetic codes rate upper bound derived by combinatorial analysis, discussing decoding method for multiple error correction
08 p1465 A70-20792
- Viterbi decoding error probability for convolutional codes using finite Markov chain modeling
08 p1458 A70-20794
- Noise variance extreme value estimator for biorthogonally block coded high rate telemetry system for Mariner missions
08 p1459 A70-20799
- Gigahertz rate circuits requirements for high speed digital data communication from component and system viewpoint, emphasizing coding and multiplexing techniques
09 p1633 A70-22605
- Three dimensional flow field codes for spheres at nonzero angles of attack, comparing numerical and experimental results
09 p1606 A70-23254
- Coding and decoding efficiency in data transmission over Gaussian channels, comparing error probability, power, bandwidth and equipment complexity
09 p1637 A70-23320
- Optimum coding of information for symmetric channel described by code word transformation probability
09 p1639 A70-23694
- Review of 1969 London International Conference on Digital Satellite Communication session covering modulation, synchronization and coding
[AIAA PAPER 70-464] 11 p1997 A70-25409
- Error probability bounds for systematic convolutional codes
12 p2192 A70-27422
- Regular and irregular line-drawing data processing, discussing quantization and encoding methods
12 p2193 A70-28104
- Three phase code transformation task for human subjects, determining memory aid role in problem solving phase from factor analysis
13 p2361 A70-30019
- Digital coding systems operational capabilities, discussing arithmetic procedures and equipment types
14 p2554 A70-30678
- Physical signals continuous to discrete transformation by analog to digital conversion, considering coding process and transfer functions
14 p2554 A70-30679
- Data compression techniques, considering two dimensional image coding problem
15 p2705 A70-32558
- Radiometer employing frequency domain coding of noise-like signal spectrum, comparing with Dicke system
16 p2871 A70-32926
- Coding procedure for Air Force maintenance technicians to record and describe equipment malfunctions compared to experimental codes
16 p2853 A70-33666
- Communication satellite UHF link with FSK or PSK modulation, considering coded digital transmissions
16 p2867 A70-34331
- Majority logic decodability of product of two majority logic decodable cyclic codes
17 p3049 A70-34853
- Inner code concatenation with outer code to yield error probability uniform bound with exponential decrease
17 p3049 A70-34858
- Small digital computer arithmetic unit design, discussing number representation, addition and subtraction methods for performance and cost
21 p3793 A70-40757
- Two dimensional data array contour tracing algorithm for reduction of image coding bits number
21 p3786 A70-41327
- Information transmission and coding theory - Conference, Tashkent, September-October 1969, Section 2, Statistical theory of signals and noise, Optimal reception methods
22 p3986 A70-42551

Selective stimulus encoding and overlearning in paired associate learning

22 p3971 A70-43401

Single-error nongroup binary codes with maximum codewords, including quadratic residue, Reed-Muller and tripple-error constructions

24 p4313 A70-46057

Algebraic structure convolutional codes using minimal encoders with feedback-free delay-free inverses

24 p4313 A70-46058

Codeword weight enumerator for second order Reed-Muller codes, using matrix approach

24 p4313 A70-46060

Weight structure enumerators for codewords of Reed-Muller codes

24 p4313 A70-46061

Digital PCM telemetry link coding techniques, discussing encoding-decoding complexity, and concatenated block scheme for channel

24 p4315 A70-46258

COEFFICIENT OF FRICTION

Surface roughness effects on dry friction between two metals, considering conical asperities and friction coefficients

[ASME PAPER 69-LUB-10] 01 p0102 A70-10394

Friction and wear tests on solid lubricant graphite fluoride compared with molybdenum disulfide at specific temperatures, considering friction coefficient

[ASLE PREPRINT 69-LC-9] 02 p0321 A70-12536

Carrying capacity and moment of friction calculated for cylindrical MHD bearing for small magnitude of radial clearance

03 p0497 A70-13877

Time history of spin and forward motion accuracy of rocket launched from smoothbore, using analytical model and motion coupling through dynamic friction coefficient

03 p0582 A70-14311

Viscous frictional torque on inner cylinder of eccentrically rotating concentric cylinders measured from laminar to turbulent flow

06 p1074 A70-17134

Skin friction law for compressible boundary layer allowing calculation of coefficient of friction for isothermal walls with heat transfer

06 p1033 A70-17232

Metal probes friction coefficient and impact temperature during impingement onto rotating chromium steel disk related to speed under various atmospheres

09 p1708 A70-23425

Synthetic molybdenum disulfide crystal properties compared to natural crystals, discussing friction coefficient, adherence to metal surfaces, etc

10 p1907 A70-24787

Service life and friction coefficient of molybdenum disulfide-silicon lubricating coating as function of load, sliding rate and vacuum level

11 p2060 A70-25943

Die surface composition effects on lubricant efficiency in metal working judged by friction coefficient and surface damage

13 p2418 A70-28830

Transformations on surfaces of molybdenum disulfide-steel system during friction in air, noting Mo oxides formation and friction coefficient increase

13 p2421 A70-29427

Oxide film and liquid effects on friction coefficient, surface relief and dislocation density along depth related to plastic deformation

15 p2743 A70-31638

Lubrication system components behavior in vacuum environment, investigating evaporation, friction, adhesion, wear, etc

16 p2923 A70-34156

Rolamite low friction suspension system, describing components, force generation and applications

16 p2923 A70-34165

Test stand based on Froude pendulum for measuring friction coefficients and oscillation parameters of porous bushings

16 p2924 A70-34298

Friction coefficient theory and measurement, considering definition and measuring equipment

16 p2924 A70-34332

Solid film lubricants deposited by DC and RF sputtering on metal and glass surfaces, determining friction characteristics by electron microscopy

17 p3099 A70-34516

Friction coefficient dependence on hardness of softer element of friction pair determined at constant values of shear strength, using external friction concepts

17 p3102 A70-35672

Turbulent air flow in vertical square duct, investigating local heat transfer and friction coefficients

18 p3347 A70-36506

Turbulent boundary layer on cone in supersonic flow in presence of inflowing foreign substance, considering local surface friction coefficient

20 p3559 A70-39814

Temperature effect on friction coefficient of boron and silicon carbides, using similar wear pairs in vacuum

23 p4205 A70-44044

Pressure gradient effect on skin friction coefficients taking into account Mach, Reynolds and Stanton numbers

23 p4183 A70-44629

Viscous compressible gas flows in pipe initial section, calculating friction and heat transfer coefficients

23 p4135 A70-44734

COEFFICIENTS

NT ACCOMMODATION COEFFICIENT

NT AERODYNAMIC COEFFICIENTS

NT ATTENUATION COEFFICIENTS

NT COEFFICIENT OF FRICTION

NT COHERENCE COEFFICIENT

NT CORRELATION COEFFICIENTS

NT COUPLING COEFFICIENTS

NT DIFFUSION COEFFICIENT

NT DISCHARGE COEFFICIENT

NT FLOW COEFFICIENTS

NT HEAT TRANSFER COEFFICIENTS

NT INFLUENCE COEFFICIENT

NT IONIZATION COEFFICIENTS

NT NOZZLE THRUST COEFFICIENTS

NT RECOMBINATION COEFFICIENT

NT REGRESSION COEFFICIENTS

NT SCATTERING COEFFICIENTS

NT STRUCTURAL INFLUENCE COEFFICIENTS

Mathematical model coefficients determination for planar diffused transistor, obtaining admittance parameters

01 p0048 A70-10050

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution

03 p0474 A70-13344

Digital computers for calculating coefficients of electronic circuit functions polynomials, developing algorithm

04 p0659 A70-15205

Alternating direction implicit method for solving parabolic equation with variable coefficients in two space dimensions with mixed derivative

09 p1711 A70-22284

Thermomagnetic transport coefficients in anisotropic metals based on theory for galvanometric properties, producing closed form expression for conductivity tensor

11 p2097 A70-25618

Coefficients for linear and nonlinear limb darkening in early type stars

11 p2113 A70-26469

Coefficients for finite difference methods of numerical integration of products of Fourier and ordinary polynomials

11 p2074 A70-26848

Bits quantity required to represent coefficient within digital controller with high sampling rate

12 p2203 A70-27410

Viscosity coefficient for isotropic turbulence using quasi-self-similar solution

13 p2391 A70-29777

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution

14 p2573 A70-30719

Exact and normal solutions of Boltzmann equation linearized around total equilibrium, yielding Navier-Stokes and Burnett transport coefficients

17 p3128 A70-34628

Liquid Fe-Cr-C, Fe-P-C and Fe-Cr-P systems, evaluating interaction coefficients

18 p3272 A70-36032

COENZYMES

Coenzyme A and acetyl CoA in tissue extracts determined for concentrations by recycling CoA through coupled enzyme system

04 p0640 A70-15754

COERCIVITY

Optimal coercive force selection of residual inductance and energy of magnets for generators with star shaped rotors

01 p0008 A70-10192

Ferroprobe coercimeter with attached electromagnetic for nondestructive hardness testing, describing components and mounting

02 p0301 A70-12489

COGNITION

Heuristic principles for self organization algorithm of cognitive automation system with active learning strategy

08 p1466 A70-20874

Acute mountain sickness symptomatology and cognitive performance, using standardized General High Altitude Questionnaire

20 p3581 A70-40025

COHERENCE

He-Ne laser emission in transverse oscillation mode, analyzing spatial and temporal coherence characteristics

09 p1694 A70-22135

Image coherence of object by laser illumination through moving diffuser related to diffuser autocorrelation

14 p2588 A70-31208

Partial coherence theory in holography with photogrammetry applications, reconstructing images with fringes representing constant range contours

17 p3087 A70-35023

SHF and EHF waves simultaneous propagation over slant line-of-sight overwater path, comparing phase variations and fading for signal coherence

20 p3588 A70-40301

Holographic measurement of general forms of motion based on reconstructed images dependence on coherence

21 p3822 A70-40810

COHERENCE COEFFICIENT

Coherent and incoherent interference effects on direction finding information derivation, using linear two channel principle

03 p0452 A70-14024

Recording of inhomogeneous mutual coherence functions in one hologram by combining image with Fourier /Fresnel/ holography

22 p4038 A70-43151

COHERENT ACOUSTIC RADIATION

Signal processor with ratio-squared predetection combining for adaptive antenna array, discussing radiation patterns for coherent and incoherent signal and noise sources

07 p1242 A70-20066

Brillouin effect lines shape dependence on analogous acoustical waves temporal and spatial coherence

21 p3839 A70-42100

COHERENT ELECTROMAGNETIC RADIATION

NT COHERENT LIGHT

Coherent microwave generation mechanism in indium antimonide at high electric fields, formulating thin plasma layer double stream interaction theory

03 p0534 A70-14214

Maser coherent amplification possibility in comet atmospheres at various frequencies assuming thermodynamic nonequilibrium and nonBoltzmann populations

07 p1378 A70-19034

Laser amplifier effect on autocorrelation function of laser radiation intensity fluctuations, determining emission coherence time

07 p1300 A70-19870

Optical coherence theory functional formalism developed in radiation field probability functional terms, noting role of P representation of density operator

08 p1545 A70-21254

Linear theory of cyclotron resonance maser with TEM standing wave field, considering coherent emission for nonrelativistic electrons oscillating in magnetic field

11 p2061 A70-25392

Mirror adjustment effect on transverse structure, time dependence and spatial coherence of pulsed UV molecular nitrogen laser emission

11 p2062 A70-25394

COHERENT LIGHT

Laser processing applied to optical nondestructive materials tests for surface flaws

01 p0086 A70-10416

Book on coherent optics and holography covering image restoration, holographic interferometry, lensless Fourier transform holography, etc

01 p0144 A70-11074

Coherent light scattering disturbance in level-crossing signals of Rb 85 and Rb 87 second excited state by noble gas atoms

02 p0311 A70-11851

Error probability, signal to noise ratio and average signal level for coherent heterodyne and photon limited laser communication systems, using Poisson distributions

02 p0255 A70-11914

Signal to noise ratio for optical heterodyne with inhomogeneous partially coherent signal and local oscillator fields, using phase-quadrature description

02 p0255 A70-11915

Speckle pattern in image plane of laser illuminated diffuse object, calculating pattern intensity and contrast

02 p0312 A70-12106

Image formation with partially coherent light, summarizing basic properties and diffraction theory of image formation

02 p0315 A70-12831

Surface roughness measurements by coherent optics and interferometry, including theory and experimental verification

04 p0689 A70-15015

Wave front reconstruction for perfectly bleached holograms not achievable by simple coherent illumination due to remaining amplitude variation

04 p0691 A70-15033

Multiple beam interferometer coherence analyzer for temporal and spatial study of laser beams, emphasizing application to pulsed lasers, holography and nonlinear optics

07 p1297 A70-19145

Book on lasers and holography covering coherence, wave diffraction, zone plates, etc

07 p1282 A70-19598

Book on holography principles and applications, discussing imaging properties, coherence, photographic emulsions, optical analog computers, etc
07 p1283 A70-19739

Coherence improvement of ruby laser emission in free mode using corrective holograms in resonator
07 p1303 A70-20323

Coherent light beams scanning and propagation direction control by acoustooptical method for laser applications
09 p1695 A70-22315

Fluorescence produced by resonant coherent light pulse passing through medium assuming infinite relaxation times and negligible pulse attenuation
09 p1726 A70-22321

Coherent optical beam propagation measurement of fine scale turbulent atmosphere structure, inferring microscale size and permittivity spectra
09 p1635 A70-22963

Two beam Fraunhofer holography noting effect of spatially coherent source
09 p1678 A70-22968

Rig using holographic techniques for vibration testing and aircraft engine components inspection
09 p1680 A70-23069

Optical coherence and light fluctuations, determining statistical distributions of light from photoelectric counting experiments
09 p1728 A70-23372

Single and clad glass fibers radii and refractive indices measurements on basis of laser light scattering
09 p1699 A70-23444

Object contrast effects on straight edge images in partially coherent illumination
10 p1898 A70-23910

Instrument localizing-resolving powers relationship as function of luminous source coherence
10 p1898 A70-23911

Granularity spectrum of diffusing screen uniformly illuminated by normally incident coherent light, basing study on long and short distance visual observations
10 p1899 A70-24031

Laser light propagation along strongly inhomogeneous turbulent path, measuring intensity fluctuations dispersion and light amplitude
10 p1844 A70-25161

Semiquantitative study showing variations in degree of laser beam coherence due to turbulence
12 p2245 A70-26980

Holograms formation without reference beam by illuminating transparency with coherent laser light
12 p2233 A70-27505

Strong short coherent light pulses with diffractive divergence generated by ruby lasers in series, showing pulse, emission and far field interferograms
13 p2430 A70-29762

Radiation coherent enhancement of single frequency emission fields in Q modulated coupled ruby lasers
14 p2593 A70-30152

Coherent or spatially incoherent light recordings of Fourier transform holograms, investigating resolution cells film grain and signal to noise ratio
14 p2588 A70-31207

Autocorrelation of coherence characteristics of polarized components of light scattered at curved rough surface, showing nonadequate Kirchhoff approximation
15 p2749 A70-31555

Laser devices design, emission characteristics, coherent light, etc
16 p2926 A70-33071

Optical spatial phase modulator array using membrane light modulator for coherent optical processing and character recognition
16 p2904 A70-33147

Book on holography covering principles, applications, spatial and temporal coherence, interference and diffraction theory and optical filtering
16 p2908 A70-33266

Coherent light pulses propagation through resonant medium, discussing energy loss
16 p2928 A70-33278

Coherent light propagation through turbulent atmosphere observed by applying He-Ne lasers to simultaneous measurements of scintillation effects over homogeneous optical paths
17 p3108 A70-35721

Coherent light communication system quasi-optical lens line output field examination, using laser assembly to study parasitic, radiative and overall power losses
19 p3443 A70-37288

Raman line coherence degree and polarization rate measurement, applying Wolf matrix
19 p3443 A70-37359

Pulsed ruby laser holography with coherent light, discussing applications
19 p3425 A70-37886

Bandlimiting in coherent optical matched filtering for pattern recognition, eliminating confusion between cross correlations and autocorrelations
19 p3446 A70-37889

Strong short coherent light pulses with diffractive divergence generated by ruby lasers in series, showing pulse, emission and far field interferograms
19 p3447 A70-38394

Coherent light beam characteristics with Gaussian radial intensity variation during propagation along optical system axis, determining radius from diffraction theory
20 p3639 A70-39086

Hologram line scattering function dependence on light source spatial coherence, presenting quantitative evaluation, theoretical and experimental data
20 p3633 A70-39760

Short light pulse coherent absorption in homogeneously broadened resonant medium, discussing influence of input pulse area and atomic coherence on propagation properties
21 p3784 A70-40565

Diffraction theory relationship to ray optics for coherent light propagation through lens systems
21 p3829 A70-41929

Radiation coherent enhancement of single frequency emission fields in Q modulated coupled ruby lasers
21 p3839 A70-42076

Photon occurrence moments probability distribution in partially coherent light signals
22 p3988 A70-42563

Laser application to nondestructive testing via holography and hologram interferometry
22 p4028 A70-42587

Ruby laser mode excitation, spatial coherence and free emission kinetics investigated by high speed camera scanning
22 p4051 A70-43461

Solid state high energy light detector for pulsed ruby and glass lasers in long pulse mode
22 p4052 A70-43614

Thermal energy conversion into coherent laser light, examining various thermodynamic limitations
22 p4076 A70-43674

Light source spatial coherence measurement, verifying laser heterodyne interferometer theory
24 p4354 A70-45665

Pb-Sn-Te junction diodes prepared by Sb diffusion, investigating spontaneous and laserlike emission
24 p4355 A70-46086

COHERENT RADAR

Holographic relationship of coherent optical processing applications to coherent or side-looking radar, discussing seismic holography concept
01 p0086 A70-10414

Microwave holography, discussing zone plate lens design, coherent side-looking radar, large antennas, three dimensional radar display applications
01 p0086 A70-10415

Synthetic aperture airborne side-looking radar using coherent optical data processor, discussing system configuration and operation
02 p0263 A70-12632

Nonadaptive processor to detect coherent radar pulse trains with uniform amplitude in clutter-plus-noise environment
04 p0651 A70-15334

Wind velocity measurements by coherent radar pulse method of meteor trail observations
06 p1141 A70-17739

Coherent instrumentation radar for White Sands Missile Range, discussing system design emphasizing pulse Doppler capability
10 p1842 A70-24881

Monostatic and multistatic coherent radar techniques for target mapping, discussing measurements and inverse scattering
14 p2552 A70-31184

Signal processing antennas, discussing synthetic and multiplicative arrays for coherent radar airborne mapping
17 p3052 A70-35078

Passive and cooperative active hologram radar extended from stationary coherent radar, considering use in airport surveillance of aircraft
21 p3792 A70-42119

Coherent radar backscatter, calculating autocorrelation and power spectrum of spuri noise from periodic random phase injections for filter design to eliminate noise
22 p3992 A70-43591

Microwave holography coherent radar with improved focusing, applying to side-looking, bistatic, passive and pulse compression radars
23 p4161 A70-43874

COHERENT RADIATION

NT COHERENT ACOUSTIC RADIATION
NT COHERENT ELECTROMAGNETIC RADIATION

NT COHERENT LIGHT

CW laser perturbation by coupled optical transition at strong pumping with incoherent and coherent perturbing radiation, considering disappearance of laser effect
01 p0108 A70-10231

Coherent short wave and UV radiation generation using continuous ion gas laser, discussing efficiency, stability and feedback effects
01 p0108 A70-10356

Laser radiation coherence origin explainable by mechanism consisting of many photon emission process by many atoms
05 p0883 A70-16500

Spatiotemporal correlation functions of random intensity field during diffuse scattering of coherent radiation by moving reflector
06 p1009 A70-17810

Coherent synchrotron emission in Crab Nebula associated with electron gyromotion, discussing models for high energy particle acceleration
07 p1375 A70-18848

Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves
07 p1276 A70-20422

Coherent and incoherent radio emission from extensive air showers simultaneously detected by radio telescope in VHF-UHF range
08 p1563 A70-20475

Coherent radiation amplification factor for 0.63 micron wavelength in He-Ne mixture, noting dependence on discharge current for various pressures
09 p1698 A70-23304

Coherent wave reflection from random half space, solving scalar Dyson equation in bilocal approximation for oblique incidence
12 p2189 A70-27972

Mutual coherence functions for quasi-monochromatic illumination measured by image holography
12 p2237 A70-28124

Coherence degradation of collimated and focused Gaussian beams in turbulent atmosphere, using small perturbation method
13 p2453 A70-29824

Gas flow velocity measurement by coherent detection of scattered laser radiation from small particles suspended in fluid, using Doppler effect
15 p2751 A70-32030

Coherent pulse propagation in inhomogeneously broadened attenuator, examining degeneracy influence and connection with self induced transparency/SIT in nondegenerate system
15 p2699 A70-32395

Coherent wave propagation in warm turbulent plasma, using perturbation method for wave dispersion
16 p2860 A70-32945

Small angle of rotation measurement of coherent radiation polarization plane, discussing technique for increasing sensitivity and accuracy
20 p3643 A70-39759

Coherent beam propagation through turbulent atmosphere, discussing limiting resolving power due to random fluctuations of refractive index
22 p4072 A70-42290

Optimal detectors for two signals with fluctuating amplitudes and arbitrary mutual coherence, discussing distribution function processing
22 p3987 A70-42556

Coherent reflection waves produced by radio wave propagating through entire earth atmosphere
23 p4159 A70-43757

Multiphoton gas ionization by coherent radiation, showing electron transitions role with gas ionization model
23 p4201 A70-44205

COHERENT SCATTERING

Partial coherence in spontaneous Raman effect, using He-Ne laser source
02 p0313 A70-12465

Spatiotemporal correlation functions of random intensity field during diffuse scattering of coherent radiation by moving reflector
06 p1009 A70-17810

Statistical properties of random intensity field during coherent laser radiation scattering by moving diffuse surface
11 p2064 A70-26812

Three level molecular coherence effects in stimulated Raman scattering, considering molecular relaxation and field inhomogeneity
15 p2752 A70-32350

Mutual coherence function of light scattered by plasma turbulent electron density fluctuations, taking into account refractive index changes
17 p3137 A70-35722

Statistical properties of random intensity field during coherent laser radiation scattering by moving diffuse surface
24 p4351 A70-45184

Partially space coherent diffraction by slit aperture with apodizing filter, calculating tolerance and apodization coefficients for correlation interval numbers
24 p4354 A70-45814

COHERENT SOUND

U COHERENT ACOUSTIC RADIATION

U SOUND WAVES

COHERENT SOURCES

U COHERENT RADIATION

U RADIATION SOURCES

COHERENT TRANSMISSION

U COHERENT RADIATION

COHESION

Nimonic Ni-Cr based alloys fracture characteristics used to determine temperature and time effects on equicohesive points positions
01 p0116 A70-10073

- Elasticity theory two dimensional contact problems, examining cohesion or friction in contact area
17 p3192 A70-35693
- COHOMOLOGY**
U HOMOLOGY
- COILS**
NT MAGNETIC COILS
- COIN AIRCRAFT**
NT F-5 AIRCRAFT
NT OV-10 AIRCRAFT
- COINCIDENCE CIRCUITS**
Statistics and coincidences of Argonne-Maryland gravitational radiation detector array with and without time delays
08 p1545 A70-21271
- COKE**
Structural orientation and defects in graphitized coke crystallites, establishing relation between thermal expansion coefficient and macrostructure
03 p0514 A70-12868
- COLD ACCLIMATIZATION**
Man and animals physiological adaptation and behavior under conditions of polar regions, highland and arid areas
01 p0030 A70-11465
Cross adaptations of physiological functions, discussing results for heat, altitude and cold adapted animals
02 p0242 A70-12824
Plasma free fatty acid level relationship to acute and chronic exposure to cold in rabbits, rats and humans
04 p0631 A70-14983
Ergonomic and medicomilitary aspects of human adaptation to cold environments, discussing metabolic and physical protective reactions, clothing and personnel selection
16 p2850 A70-34346
Soviet papers on physiological adaptation to heat and cold covering thermoregulatory reflexes, bionics, temperature gradients, hypothalamus, gas exchange, heat generation, etc
18 p3217 A70-36526
Physiological mechanisms of cold adaptation in terms of individual, type and population categories, examining thermoregulatory muscular reflex
18 p3218 A70-36527
Human muscular function in conditioned and unconditioned thermoregulatory reflex changes of gaseous metabolism during repeated cooling
18 p3218 A70-36528
Gas exchange, body temperature and electrical activity of neck and back muscles of cold-acclimated white rats subjected to various temperatures
18 p3219 A70-36540
Repeated local spine cooling effect on gas exchange and electrical activity of white rats skeletal muscles
18 p3219 A70-36541
Thermoregulation of hedgehogs during muscular activity in cold environment, recording electrical activity, oxygen consumption and body temperature during work-rest cycles
18 p3219 A70-36542
Prolonged cold adaptation effect on heat transfer during recovery period after hypothermia in white rats
18 p3220 A70-36543
Respiratory activity of internal organs and skeletal muscles in rats exposed to long term heat and cold
18 p3220 A70-36546
Respiratory gas metabolism, tissue respiration and enzyme distribution in white rats skeletal muscles following long term cold acclimatization
18 p3220 A70-36548
Low ambient temperature exposure effect on hamster intestinal absorption capacity, using glucose test compound
19 p3360 A70-37772
Human cardiovascular compensatory responses to environmental cold stress, relating heart stroke to increased oxygen consumption
24 p4302 A70-46103
Hibernation and glycerol production in wasps *Ichneumonidea*, discussing possible physiological cryoprotective function
24 p4304 A70-46140
- COLD CATHODE TUBES**
NT PHOTOMULTIPLIER TUBES
Ionization measurements by OV-3-6 satellite cold cathode ionization gage of Redhead inverted magnetron type in near circular polar orbit
15 p2723 A70-31660
- COLD CATHODES**
Cold cathode soft X ray source with discharge controlled by automatic pressure controller (APC) or metering valve, noting applicability to radiography, luminescence, etc
02 p0271 A70-12743
He-Ne laser using K-activated alumina cold cathode and coaxial construction, discussing output, low noise applications, construction and testing
03 p0501 A70-13583
Steady state plasma generation in metallic waveguide without dielectric container by cold cathode discharge in He
05 p0819 A70-15803
- COLD FLOW TESTS**
Emulsified jet fuels cold flow, combustion and corrosion characteristics in gas turbine combustor compared with JP-4 fuel
[ASME PAPER 69-WA/GT-3] 04 p0732 A70-14892
Ablation test facilities capability extension by surrounding high enthalpy flow with coaxial cold jet
[AIAA PAPER 70-588] 13 p2522 A70-29883
- COLD FORMING**
U COLD WORKING
- COLD GAS**
Protogalaxy formation and molecular processes in primeval hydrogen gas, discussing cold gas cloud cooling mechanism and contraction
03 p0577 A70-14153
Viscosity of nitrogen, hydrogen, Ar and He at high pressures measured by capillary flow viscometer with range extended to minus 100 C
04 p0718 A70-14697
Cool gas inflation systems for evacuation equipment on large aircraft with size and weight fitting into aircraft doors
06 p0986 A70-17721
Acoustic characteristics of high subsonic model cold jet using imaging technique and measurements of energy flux of flow, calculating energy flux from flow-field measurements
[AIAA PAPER 70-234] 06 p1040 A70-18125
Numerical model of thunderstorm cold air outflow, providing horizontal flow as function of height from computer program using vertical velocity and storm motion
06 p1100 A70-18574
Thunderstorm cold air outflow leading edge structure recorded by NASA meteorological tower at Kennedy Space Center
06 p1100 A70-18575
Helium low temperature applications to fuel tank pressurization, superconducting magnet cooling and cryopumping of solar space simulators
11 p2083 A70-25620
MHD generators nonequilibrium ionization improvement by blowing low work function particles into cold working gas to obtain required conductivity
21 p3855 A70-40794
Space vehicle attitude control by cold gas jets, examining principles of operation, optimal conditions for gas consumption and gravitational and gyroscopic effects
[MBB-UR-37-70-0] 23 p4261 A70-44662
Cold boundary layer effect on chemical kinetic parameters behind reflected shocks in single-pulse shock tube
24 p4323 A70-46044
- COLD HARDENING**
Light alloys cold hardening effect and fatigue strength estimation, considering residual stress variability with time
03 p0587 A70-13239
Light alloys cold hardening effect and fatigue strength estimation, considering residual stress variability with time
19 p3548 A70-38457
Structural Ti, investigating effect of surface strain hardening by cold rolling on fatigue strength
20 p3648 A70-39250
- COLD MOLDING**
U COLD PRESSING
- COLD PLASMAS**
Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions
01 p0153 A70-11598
Probe impedance loss in cold magnetoplasma related to distribution of point charge potentials
02 p0346 A70-12124
LF electromagnetic waves interaction propagating in stream-magnetized cold plasma, discussing waves temporal growth and instability
02 p0262 A70-12603
Acoustic wave excitation and damping in cryogenic He plasma produced by HF pulse discharge, considering nonadiabatic heating and dissipation during reflection
03 p0529 A70-13056
Adsorption properties of pulverized silica gel, quartz, C and graphite under electron bombardment from low temperature plasma, showing surface and physicochemical influence
03 p0516 A70-13468
Whistler mode instability due to anisotropic charged particle velocity distribution, establishing general onset conditions for variable density cold plasma containing hot electrons
03 p0537 A70-14378
Vibrational relaxation and continuous spectrum transition during dissociation of diatomic low temperature plasma
04 p0721 A70-14539
Charge separation effects in boundary layer between cold streaming plasma and perpendicular magnetic field with relativistic electrons
04 p0727 A70-14997
- High density nonlinear and linear growth rates of flute modes instabilities in cold plasma coexisting with low density of energetic electrons
04 p0728 A70-14998
Nonlinear propagation of electron plasma wave in cylindrical waveguide, discussing linear theory of electrostatic waves in cold plasma
04 p0728 A70-15000
Wave dispersion across magnetic field in cold and warm collisionless Maxwellian plasma, discussing electromagnetic and electrostatic Bernstein modes
06 p1116 A70-17364
Transmission and emission of radiation from dense inhomogeneous finite laboratory plasma column in magnetic field with interpretation by cold plasma theory
06 p1116 A70-17367
Electrostatic oscillations in cylindrical column of laboratory plasmas excited by electromagnetic waves, investigating resonances by cold plasma theory
06 p1116 A70-17368
Satellite wake in ionosphere simulated in cold ion plasma without magnetic field, observing complex far wake structure and peculiar electrostatic probes response
06 p1147 A70-18297
Homogenous monoenergetic cylindrical electron beam interaction with homogeneous cold plasma, investigating system stability
06 p1125 A70-18615
Stellar configurations of cold static neutral plasma consisting of nuclei and degenerate electron gas, calculating integral parameters by Newton gravitation theory
07 p1376 A70-18912
Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations
07 p1276 A70-20425
Flute instabilities of cold magnetoactive plasma with radially dependent density and strong azimuthal particle streams, discussing nonzero perpendicular temperature effects on oscillations
08 p1552 A70-21504
Weakly nonlinear dispersive cold plasma waves propagation by two time scale expansion, taking into account amplitude dispersion and coupling
08 p1553 A70-21613
Asymptotic behavior in cold plasma model of magnetopause, describing boundary layer between plasma stream and vacuum magnetic field
10 p1921 A70-23835
Relativistic nonlinear coupled longitudinal-transverse propagation of intense laser beams in cold over-dense plasma
10 p1921 A70-23968
Surface waves stability in cold bounded plasma against background of steady state electron oscillations, using nonlinear approximation
11 p2089 A70-25716
Surface waves excited by oscillating current in cold plasma surrounded by metallic sheath of infinite conductivity, deriving frequencies and growth rates
11 p2089 A70-25717
Population densities of levels of excited atoms and ions in nonthermal plasma including hydrogen-like ion partition function
11 p2086 A70-25835
Ionization equilibrium of atoms and hydrogen-like ions in nonthermal plasma, transforming into Saha formula for high electron densities
11 p2086 A70-25836
Inhomogeneous interatomic magnetic field effects on spectral line widening and shifts of emitting atoms in low temperature plasma
12 p2278 A70-27318
Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory
12 p2278 A70-27327
Excitation of surface waves on impedance plane in collisionless cold anisotropic plasma with external magnetic field coinciding with source direction
12 p2278 A70-27538
Linearized dispersion relation for plane wave propagation in uniform unbounded cold plasma permeated by DC magnetic field, considering two stream instability
12 p2281 A70-27881
HF electromagnetic forces on collisionless cold magnetoactive plasma-vacuum boundary using time-averaged stress tensor
13 p2462 A70-29127
Magnetopause model, discussing equilibrium layer between magnetic field and cold plasma field-free stream
13 p2396 A70-29181
Interference holograms of low temperature nitrogen plasma jet using fundamental and second harmonic ruby laser emissions
13 p2464 A70-29384

- Whistler instability examined on gyrating electron beam interaction with cold background plasma propagating parallel to magnetic field
13 p2468 A70-29932
- Gyrosynchrotron from accelerated electron, discussing effects of cold and collisionless magnetoplasma on far field and frequency spectra
15 p2728 A70-31989
- VLF radiation resistance of short filamentary electric dipole at arbitrary angle to magnetic field in cold uniform plasma, using full wave theory
16 p2859 A70-32935
- Refractive index and group velocity in moving dispersive half space /cold plasma or dielectric/ under incident wave from vacuum
16 p2859 A70-32936
- Cylindrical and helical antennas impedance in cold magnetoplasma, using three dimensional integral involving Fourier transform and Green function
16 p2859 A70-32943
- Collisionless damping of electromagnetic waves in regions with strong homogeneity of cold plasma
16 p2957 A70-33199
- Low temperature plasma flow velocity measurements using transit-time technique and high speed filming
17 p3141 A70-35345
- Energy loss of fast protons in cold Li plasma confined by magnetic field, using precession around axis to develop large interaction length
19 p3474 A70-37364
- Soviet papers on transfer phenomena in low temperature plasmas
19 p3480 A70-38180
- Low temperature underexpanded supersonic gas plasma jets behind shock wave, analyzing rarefaction and viscosity effects on parameters distribution
19 p3352 A70-38185
- Permittivity tensor of weakly turbulent magnetoactive cold electron plasma, calculating nonlinear currents
20 p3677 A70-39296
- Cold electron plasma nonlinear oscillations in magnetic field, using mathematical model
20 p3678 A70-39591
- Cold nonuniform plasma slab model for afterglow echoes at upper hybrid resonance in uniform magnetic field
20 p3679 A70-39664
- Ionization stability in low temperature magnetized plasma, using physical plasma model and numerical solution
20 p3679 A70-39983
- Energetic electron precipitation enhancement by cold plasma injection, discussing whistler mode turbulence, particle density and magnetosphere
21 p3818 A70-41105
- Electromagnetic wave propagation through cold slowly varying plasma layers in absence of external magnetic field
21 p3860 A70-42000
- Inhomogeneous interatomic magnetic field effects on spectral line widening and shifts of emitting atoms in low temperature plasma
21 p3860 A70-42059
- Optimal conditions for obtaining dense low temperature cesium plasma in shock tube with heating calculated by Debye theory
21 p3860 A70-42068
- Magnetoplasma interaction with axially slotted delay line, examining coil behavior physical mechanisms by cold plasma model
22 p4079 A70-42365
- Plane plasma waves in homogeneous conducting fluid with magnetic field, considering oscillations of two-fluid, cold and hot plasmas
23 p4224 A70-44179
- Transition radiation due to charged particle moving in periodically stratified cold isotropic plasma
24 p4384 A70-45254
- COLD PLATES**
U **COLD SURFACES**
COLD PRESSING
Relieving microstrains in Ni powders by cold compaction at room temperature using X ray analysis, discussing polygonization process
01 p0117 A70-10161
- COLD ROLLING**
Mechanical responses and residual defect structures in brass and stainless steel following explosive shock loading and cold reduction by rolling
03 p0507 A70-13139
- Al-Ni intermetallic whisker-reinforced Al microstructure and mechanical properties, studying effects of cold rolling
03 p0508 A70-13142
- Cold rolling characteristics of unidirectionally reinforced Al-B fiber composites, measuring hardness and tensile properties
08 p1524 A70-21957
- Cubic texture components preferred orientation shares into rolling texture during cold rolling of aluminum sheets determined quantitatively
09 p1690 A70-22255

- Lubricant ingredients and additives properties effect on surface quality of cold rolled semifinished Al products
14 p2590 A70-30837
- Structural Ti, investigating effect of surface strain hardening by cold rolling on fatigue strength
20 p3648 A70-39250
- Cold form rolling of various metal-shape combinations to close tolerance net shapes without machining
20 p3637 A70-39940
- Hydrodynamic lubrication film breakdown in cold strip rolling, showing thickness consistency with critical value of modified Sommerfeld number
21 p3833 A70-41256
- COLD SURFACES**
Space cold simulation installations, discussing cold wall design
19 p3398 A70-38281
- Pin fin coldplate heat exchanger for cooling Apollo spacecraft electronic equipment, calculating forced convection heat transfer and fluid pressure drop
21 p3797 A70-41025
- Cold plate immersed in warm flowing liquid, calculating two dimensional transient and steady state solidification by conformal mapping
21 p3949 A70-41319
- COLD TOLERANCE**
Thin, fat and average men responses to cold during one year period in Antarctica, measuring metabolic rates, skin and rectal temperatures
03 p0429 A70-14163
- Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance
09 p1614 A70-22082
- Cold air inhalation effect on vital physiological functions of dogs, describing heat exchange simulator of upper respiratory tract
11 p1985 A70-25672
- Atmospheric carbon dioxide and oxygen concentrations effects on white mice low temperature tolerance
15 p2685 A70-32678
- Blood oxygen, carbon dioxide and pN during hypothermia induced by He-oxygen mixture and cold exposure in hamsters, comparing with hibernation state
23 p4147 A70-44787
- COLD WALLS**
U **COLD SURFACES**
U **WALLS**
COLD WATER
Book on survival in cold water covering physiology and treatment of immersion hypothermia and drowning, thermoregulation, etc
19 p3360 A70-37977
- COLD WEATHER**
Upper frontal waves behind quasi-stationary surface cold front using mathematical model
08 p1540 A70-21924
- COLD WEATHER TESTS**
Human peripheral blood flow rewarming in cold ambient temperature, examining skin, rectal and tympanic membrane and oxygen uptake
20 p3576 A70-40327
- COLD WORKING**
NT **COLD ROLLING**
NT **ELECTROHYDRAULIC FORMING**
NT **EXPLOSIVE FORMING**
Beta III Ti alloy cold formability, mechanical properties and heat treatment noting use for fasteners, sheet metal parts, honeycomb sandwich sections and metal matrix composites
03 p0512 A70-13776
- Cold working with subsequent heat treatment increased creep rupture and creep behavior of V alloys
04 p0708 A70-15372
- Cold reduction effects on press formability of pure Al sheet with allowance for tensile properties and crystallographic orientation
06 p1075 A70-17145
- Cold reduction and annealing temperature effects on Al sheet ductility noting roles of hardness, crystallographic orientation and microscopic structure
06 p1075 A70-17146
- Recrystallization behavior of Al alloy containing Mg and Si subjected to maximum aging before cold working
06 p1085 A70-17418
- Strain rate effects in cold metal working processes involving rolling and drawing
08 p1590 A70-21327
- Softening of cold worked alloy by high speed electrical heating, noting supersaturation before natural aging
08 p1520 A70-21496
- Yield strength of cold worked MP Co-Ni alloys during aging at elevated temperatures, noting behavior in overaged condition
08 p1525 A70-21960
- Cold and hot work deformation of aluminum alloys, discussing flow-stress dependence on strain rate, temperature and composition
09 p1692 A70-22642

- Cylindrical coil springs cold winding loading processes, considering initial tension or compression of wire and combined stresses
10 p1894 A70-24297
- Cr-Ni cold worked austenitic steel dislocation structure in tensile tests at different strains
14 p2596 A70-30874
- Pure Mo recrystallization deformed by cold rolling using transmission electron microscopy
14 p2597 A70-31284
- Cold worked metal, estimating lattice imperfections mol fractions based on reversible cell thermodynamics
15 p2676 A70-31564
- Ti alloy suitability for fastener applications noting cold workability, high strength and stress corrosion resistance
15 p2760 A70-32338
- [ASM PAPER W70-17.3]
Glass bead blast induced residual stress and surface cold work effects on Ni base superalloy fatigue crack initiation and propagation
15 p2761 A70-32381
- Cold forming of thermoset-thermoplastic laminate consisting of reinforced epoxy core sandwiched between thermoplastic face sheets
16 p2916 A70-33362
- Ti-Cu alloy sheet material age hardening, considering cold and warm work effects at various stages in aging cycle
17 p3121 A70-34430
- Cold working effects on Zircaloy tubes mechanical properties and hydride orientation, discussing tubes use in nuclear power stations
17 p3123 A70-34645
- Cold metal working techniques, describing electromagnetic, explosive, ultrasonic, high velocity hammering, stretch forming, deep drawing and superalloy shaping
20 p3639 A70-40445
- Dislocation network recovery kinetics of cold worked undoped powder metallurgical W wires by electrical resistivity measurements, determining activation energy
21 p3839 A70-40797
- Space shuttle structural technology for booster and orbiter, discussing hot and cold structure concepts, reentry bodies, military payloads, radiating protective coatings, refractory materials, etc
22 p4111 A70-43516
- Heat treatable beta Ti alloys cold workability, fracture toughness, tensile ductility and applications [SAE PAPER 700856]
24 p4361 A70-45880
- Al and Al alloys cold extrusion, discussing die entry angle, lubrication control, ingot preparation, etc
24 p4349 A70-46217
- Cold reduction, refrigeration and annealing effects on stress corrosion cracking of austenitic stainless steels
24 p4365 A70-46389
- COLLAPSE**
Computer calculation in elastoplastic range of statically indeterminate structure of bars, considering collapse load, stress and hinge rotation
01 p0200 A70-10524
- PreHayashi phase of stellar evolution, discussing protostellar disks /stellisks/ formation from flattened fragments of collapsed interstellar cloud under turbulent viscosity
01 p0190 A70-11346
- Blood flow through veins and collapsible tubes simulated by physical model, downstream pressure effect and importance of collapse phenomena
04 p0641 A70-14631
- Venous pressure of man in space, investigating return to heart in absence of gravity and distention by hydraulic pressure
08 p1448 A70-21943
- COLLECTORS**
U **ACCUMULATORS**
COLLEGES
U **UNIVERSITIES**
COLLIMATION
Time variations and angular collimation of radiation emitted by source with relativistic streaming
06 p1134 A70-17281
- Autocollimation technique for determining fluxure of tube of Wanschaff vertical circle
08 p1496 A70-21158
- Geodesic Luneberg lens Q band antenna design, construction and evaluation, noting point feeding and energy collimation
16 p2876 A70-33408
- Reflecting prism standards rotations effect on autocollimated images positions of optical instruments, investigating focusing method
16 p2915 A70-34214
- Backscattering of collimated light beam emitted by pulsed point source into opaque medium
19 p3461 A70-37421
- Two-component optical system for laser radiation collimation, calculating tolerances for fabrication and assembly
22 p4051 A70-43560

COLLIMATORS

Millimeter and nanosecond resolution of fast neutrons in pulse dense high temperature deuterium plasma discharge with polyethylene collimators and photomultipliers 02 p0303 A70-12739

Autocollimation method for variable profile antenna adjustment and control, describing antenna-mirror array 09 p1648 A70-23155

Electro-optical autocollimating focus sensor for optical systems of high angular resolution, analyzing defocus detection and errors 09 p1687 A70-23764

Bicylindrical microwave lenses, discussing collimating, virtual line source and point fed scanning lenses design 16 p2876 A70-33405

Ballistic photography system for luminous models in gas medium, using collimator for velocity measurement 20 p3632 A70-39746

Teleradiometer calibration in background radiation absence, using distant and finite point source method and collimator means 20 p3633 A70-39798

Large collimator objectives lenses focal lengths measurement in vibrations and temperature gradients 22 p4073 A70-42511

Soft X ray astronomical instrumentation for space experiments, discussing Geiger tubes, gas counters, modulation collimators, telescopes, etc 23 p4196 A70-44416

COLLISION AVOIDANCE

Atomic clock reproducibility short and long term stability, weight and power consumption characteristics, noting Rb gas cell for collision avoidance systems 04 p0688 A70-14724

Air traffic control problems in avoiding midair collisions, satellite utilization in transatlantic flight control and anticollision devices and procedures 04 p0623 A70-15350

Collision safety standards in helicopter services for shore-to-ship transportation of pilots, stores and spares 06 p1103 A70-17639

Pilot limitations role in USAF midair collisions, discussing information systems for collision avoidance 07 p1192 A70-19022

Encounter statistics and operational environment of aircraft collision-hazard warning systems in terminal area 07 p1331 A70-20060

Collision avoidance system /CAS/ cockpit display equipment design and operation 08 p1492 A70-20480

Visual aspects of collision avoidance, describing prudent mid-air maneuvers 08 p1449 A70-20481

Radio air navigation systems by time separation signals with reference to anticollisional methods and ATC 08 p1541 A70-21019

Airborne EROS collision avoidance system, discussing flight performance, range and closing rate measurements 09 p1720 A70-22241

Human psychophysiological inability to avoid mid-air collisions investigated for aviation safety 09 p1611 A70-23465

Optimal two level air traffic control avoiding conflict on runway and in flight and minimizing landing time deviations 11 p2077 A70-25603

Short range aircraft collision pilot warning indicator for low altitude and closure speeds 11 p2078 A70-25706

Light aircraft-airliner collision avoidance, discussing Time-Frequency Collision Avoidance System cost restriction, Pilot Warning Instruments, etc 11 p2079 A70-25872

Collision and missed approach risks in high capacity airport landing operations, discussing parallel runways spacing and aircraft longitudinal separation 12 p2207 A70-27629

Visual aircraft-to-aircraft detection effectiveness in collision avoidance as function of pilot performance and closing speed 12 p2267 A70-27633

Intermittent positive control system for issuing commands to normally uncontrolled aircraft for midair collision avoidance, discussing aircraft and conflict detection 12 p2267 A70-27634

Aircraft separation standards in air traffic control system design regarding collision hazards, noting beacon system role 12 p2267 A70-27635

Pilot midair collision warning instrument based on optical radar MTI, discussing target cross section enhancement by passive retroreflector 12 p2234 A70-27646

Optical IR system as low cost pilot warning indicator providing audible and visual collision warnings to general aviation aircraft 12 p2234 A70-27647

Intermittent positive control /IPC/ role in midair collision avoidance, using mathematical model to determine command frequency and implementation 12 p2269 A70-27913

Civil aircraft weather radar for ground collision hazard warning 13 p2447 A70-28548

General aviation demands on Pilot Warning Indicator systems for collision avoidance 14 p2615 A70-31176

Automatic ground based aircraft collision avoidance using combined associative processor- sequential computers 16 p2948 A70-33468

General aviation growth forecast during next decade, considering economic importance, air traffic control, collision avoidance, etc 16 p3003 A70-33469

Time ordered system for air traffic control providing data link, collision avoidance and navigation data through single channel 16 p2948 A70-33476

Time frequency concept application to air traffic control and collision avoidance systems 16 p2948 A70-33477

Air traffic control, discussing precision instrument landing, approach lighting, collision avoidance, navigation aids, etc 17 p3133 A70-35185

West German aircraft bird hazards problems, discussing research activities and recommendations for strike avoidance 18 p3349 A70-35980

Bird dispersal techniques in use or under study in Britain, including neurophysiological and bioacoustic systems to minimize hazards on airfields 18 p3222 A70-35992

ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft 19 p3466 A70-38239

Collision avoidance system flight test and evaluation program for airline industry CAS specification 19 p3466 A70-38240

ATC airborne surveillance, communication and control system functioning as CAS after error or failure, discussing minimum parallel runway separation 19 p3466 A70-38241

Ground and cockpit initiated collision avoidance commands system based on satellites surveillance of aircraft position and velocity data 19 p3466 A70-38242

Airborne electronic equipment, collision avoidance systems, displays, instrumentation, human response and ground based control in air traffic control 20 p3665 A70-39198

Airborne three dimensional area navigation equipment for reducing mid-air collision exposure and for raising landing safety in terminal areas 22 p4066 A70-42296

Automatic conflict detection and resolution in ATC planning, discussing flight paths, zones of protection, etc 23 p4215 A70-44154

Collision Avoidance System /CAS/ and Proximity Warning Indicator /PWI/ for preventing midair aircraft collisions 23 p4194 A70-44175

Soviet civil aircraft-bird collisions, stressing hazard forecast and prevention by bird identification and migration patterns 24 p4289 A70-45644

COLLISION PARAMETERS
NT COLLISION RATES

Multistate impact parameter treatment of hydrogen-helium excitation collisions, considering distortion, back- and rotational-coupling and virtual transition sequence 01 p0147 A70-10285

Cross section calculation for spin change in H atoms pair collision, discussing wave number and temperature effects 02 p0341 A70-11796

Energy spectrum of cosmic radiation primary nuclei calculated from collisions against stellar light photons and 3 K black body radiation 03 p0561 A70-14185

Approximate solution to Boltzmann gas kinetics equation, using moment relations of collision integral and reverse collision operator 06 p1036 A70-17758

Discrete ordinate technique for nonlinear Boltzmann equation tuned for computing collision integrals to instantaneous nature of distribution function 06 p1047 A70-18319

Monte Carlo method applied to Boltzmann collision integral in solving heat transfer between plates at different temperatures in elastic spheres gas 06 p1183 A70-18324

Hydrogen atoms collisional excitation cross section expressed in terms of quantum numbers of levels and ratio of colliding electron energy to transition energy 07 p1338 A70-19410

Meteorites explosive fragmentation under aerodynamic loads simulated by steel balls shot into increasing-density target, discussing parameters 08 p1572 A70-20947

Electron impact excitation cross section of /0,0/ first negative band of nitrogen ion from threshold to 3 keV, using photon counting techniques 12 p2276 A70-27880

Heavy particle spectroscopy, deducing collision parameters from empirical observations 13 p2456 A70-29810

Meteorites explosive fragmentation under aerodynamic loads simulated by steel balls shot into increasing-density target, discussing parameters 15 p2806 A70-32759

High velocity center to center collision of two absolutely elastic rods in acoustic medium in terms of Einstein nonclassical mechanics 15 p2775 A70-32890

Meteoroids origin and distribution, examining collisional and radiative processes effects 16 p2974 A70-33650

Multistate impact parameter treatment of heavy particle collisions modified to include higher state couplings for electronic wave functions 16 p2956 A70-34309

Collisions effects on ion collection by Langmuir probes, determining plasma density [AIAA PAPER 70-757] 17 p3139 A70-34494

Coulomb interaction Fermi gas mixture collision integral, obtaining formula from Boltzmann equations and Taylor series expansion 17 p3070 A70-35043

Interstellar cloud collisions, examining gas and dust particles separation by size 18 p3313 A70-36323

Near collisions approximation in Stark broadening of hydrogen Lyman alpha line 18 p3296 A70-37227

Collisional effects on second order spatial ion wave echo, evaluating velocity integral 19 p3475 A70-37539

Periodic collision orbits in plane elliptic three body problem of infinitesimal mass under gravitational field of two finite masses 20 p3705 A70-39603

Elastic bodies collision, determining temperature field variations and contact pressure 20 p3725 A70-39869

Molecular and noble gas rotational collision numbers from thermal transpiration measurements 20 p3738 A70-39995

Electron-neutral interaction parameters for Ohm law coefficients in multicomponent nonisothermal plasmas tabulated as function of electron temperature 22 p4081 A70-43015

Optically thin plasma population and ionization equilibrium, taking into account heavy particle collisions 22 p4082 A70-43219

Collision integral model for multicomponent mixture, investigating partially ionized plasma longitudinal vibrations 22 p4083 A70-43382

Low energy proton-hydrogen collisions, computing differential cross sections for direct elastic scattering, resonant charge exchange and direct and exchange excitation 24 p4382 A70-46226

Plane parallel collision between two solid bodies of similar shape, discussing kinetic energy losses and motion after impact 24 p4427 A70-46376

Plane parallel collision of two solid spherical bodies with mass centers coincident with geometrical centers 24 p4427 A70-46377

COLLISION RATES

Ionospheric reflection coefficients calculations by two full wave theory, using related monoenergetic and collisional frequency profiles and 10-100 kHz frequencies 01 p0076 A70-10870

Molecular reaction rates and ion/electron vertical profile and concentrations in equatorial ionosphere, applying computer simulation to numerical solution of continuity equations 01 p0083 A70-11549

Electron flux parameters determination from ionograms and reflected signal amplitudes between 120-130 km, considering electron collision frequencies 01 p0084 A70-11551

Resonance scattering and drift motion of electrons in gases under pressure, determining ion state lifetime and mean electron-molecule collision frequency for trapping collisions 02 p0342 A70-11883

Collisions effects on cylindrical antenna impedance near plasma frequency of isotropic nonMaxwellian plasma, allowing for collision frequency dependence on electron energy 06 p1020 A70-17567

Ionospheric radio transmission field strength calculation for given electron density and collision frequency profiles, considering electron variations along transmission path

07 p1230 A70-19165

Ionospheric F and E layers collision frequency estimates, comparing pulse absorption and cosmic radio noise measurements

10 p1880 A70-24804

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux

11 p2107 A70-25526

Electrical conductivity of impact-ionized nitrogen across magnetic field, deriving electron collision frequency

11 p2091 A70-26461

Midair collision frequency under VFR as function of aircraft density derived, noting ATC role in safe separation

12 p2267 A70-27636

Ionospheric D region radio wave probing by cross modulation technique, obtaining electron densities and collision frequencies

12 p2224 A70-27733

Midair collisions incidence correlated with traffic factor proportional to square of number of operations

12 p2269 A70-27912

Collision coefficients of reaction and inverse reaction for nonequilibrium processes with variable distribution functions and cross sections

13 p2461 A70-28920

Electron collision frequency effects on Cerenkov radiation from magnetoplasma, applying results to magnetosphere and ionosphere

13 p2465 A70-29546

D region electron concentration and collision frequency in slowly varying plasma, using rocket-borne probe for ground emitted wave detection

15 p2778 A70-31673

Weakly turbulent plasma dielectric constant nonlinear tensor for frequent Coulomb collisions, using hydrodynamic equations

15 p2781 A70-32824

Electromagnetic field transmission through plasma slab with specified electron density-collision frequency profiles, using integral derived from transmission and reflection coefficients

16 p2957 A70-32979

Microwave diagnostic method for amplitude variations of electron density and collision frequency in weakly ionized plasma

17 p3140 A70-34871

Statistical measurement of bird hazards to aircraft in terms of strike rates at airports, considering international strike rate standard

18 p3211 A70-35981

Vertical profile of electron collisions effective frequencies in auroral ionosphere E region

19 p3409 A70-37330

Absorptivity, transition probability and collision broadening frequency of dimethylether at 3.51 micron He-Xe laser wavelength, noting pressure dependence, transition lifetime and saturation intensity

21 p3835 A70-40573

Electron collision frequency profile for energy loss rate in ionospheric G factor for air, considering rotational excitations of molecular oxygen and nitrogen

21 p3812 A70-40618

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux

21 p3892 A70-41276

Adiabatic-transition state theory of chemical reactions in dilute gases with separate binary collisions, considering Morokuma, Eu and Karplus results

21 p3773 A70-41396

Plasma concentration and heavy particle-electron collision frequency in open cylindrical cutoff resonator based on frequency shift and passband broadening data

24 p3485 A70-45455

Electron density and collision frequency distributions in lower ionosphere, deriving error limits from VLF and LF sounder data

24 p4314 A70-46127

COLLISION WARNING DEVICES U COLLISION AVOIDANCE U WARNING SYSTEMS COLLISIONLESS PLASMAS

Solar wind-induced drag resulting from collisionless plasma shock on sunward-side of large magnetic comet, using similarity with earth magnetosphere

01 p0168 A70-10258

Mesothermal flow of collisionless plasma around conducting cylinder, calculating densities, velocities, temperatures and electrical potential

02 p0346 A70-12102

Electric potential fluctuations beyond long collisionless plasma cylinder in uniform magnetic field, noting thermal noise intensity

03 p0530 A70-13086

Anomalous H wave absorption in circular waveguide by dense collisionless plasma, connecting to instability excitation with subsequent plasma heating

03 p0537 A70-14379

Neutral particle flux measurements in plasma wind tunnel using BeCu detector, discussing role in collisionless flow dissipation processes

04 p0727 A70-14994

Mixture Mach number defined for collisionless plasma flow about solid body by extending cold-ion theory

[AIAA PAPER 69-78] 04 p0729 A70-15582

Neutral sheet instabilities in magnetotail from collisionless plasma instabilities from shear magnetic field

05 p0887 A70-15911

Whistler mode wave propagation in collisionless Vlasov plasma along nonuniform magnetic field

05 p0889 A70-16533

Wave dispersion across magnetic field in cold and warm collisionless Maxwellian plasma, discussing electromagnetic and electrostatic Bernstein modes

06 p1116 A70-17364

Numerical solution of nonlinear Vlasov equation for collisionless plasma problems, discussing initial value problems, external electric fields, magnetic fields, etc

06 p1108 A70-17419

Collisionless ions trajectories in plasma flowing about cylindrical probe calculated to determine probe ion current, ion density distribution in field and potential distribution

06 p1122 A70-18294

Current collected by cylindrical Langmuir probe immersed in rarefied collisionless plasma streaming with high velocity

06 p1124 A70-18307

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

07 p1385 A70-19447

Electrical conductivity of collisionless magnetoplasma in weakly turbulent magnetic field, using quasi-linear approach for diffusion equation for distribution function describing test particles

07 p1352 A70-19987

Selective harmonic excitation in one dimensional collisionless plasma conforming to Vlasov equation by counterstreaming electron beams, noting velocity distribution conditions

07 p1353 A70-20202

Asymptotic method for Vlasov equation formulated for weakly Landau damped monochromatic plasma wave in collisionless electron plasma

07 p1353 A70-20231

Electron density calculation for collisionless plasma flow around conducting cylindrical body, accounting for surface absorption and mean electron velocity

08 p1550 A70-20595

Spontaneous echoes amplitude resulting from damped electronic plasma plane wave excitation in collisionless plasma

09 p1735 A70-22843

Oblique E-mode electromagnetic wave in plane stratified collisionless plasma taking into account plasma temperature

09 p1639 A70-23674

Two-stream and cross-stream effects on nonlinear wave stability with shock in collisionless plasma

10 p1921 A70-23967

Stationary collisionless shock waves in hot initial plasma produced by theta pinch discharge, discussing magnetic field, density and electron temperature profiles

10 p1924 A70-24697

Stationary and nonstationary nonlinear waves propagation in multicomponent collisionless plasma, considering dispersion relations for acoustic oscillations

10 p1844 A70-25166

Wakes of cylinder in collision-free plasma wind tunnel simulating ionospheric satellite conditions, noting decaying oscillation

11 p1976 A70-26018

Plasma experiments in space including electric fields measurement, collisionless plasma studies and artificial Ba cloud generation

12 p2214 A70-26868

Excitation of surface waves on impedance plane in collisionless cold anisotropic plasma with external magnetic field coinciding with source direction

12 p2278 A70-27538

Density gradient drift waves stabilization in collisionless plasma by stellarator type windings, observing oscillations amplitude reduction in shear magnetic field

12 p2280 A70-27785

Incoherent scattering of radiation from collisionless plasma in quasi-stationary state, analyzing wave energy from spectral decomposition for given background distribution function

13 p2457 A70-28558

Collisionless plasmas strong turbulence in terms of mixing length and Hamilton-Jacobi theories

13 p2458 A70-28562

Plane electrostatic shock waves propagation in plasma with electrons in potential equilibrium and collision free ions

13 p2461 A70-28730

Collisionless electrostatic shock generation conditions, simulating homogeneous counterstreaming plasmas by computer

13 p2462 A70-29110

HF electromagnetic forces on collisionless cold magnetoactive plasma-vacuum boundary using time-averaged stress tensor

13 p2462 A70-29127

Whistler mode wave packets propagation in hot inhomogeneous collisionless plasma immersed in nonuniform ambient magnetic field

13 p2468 A70-29931

Collisionless alkali plasma diode with two electrodes emitting electrons and ions with half-Maxwellian velocities, analyzing potential distribution

14 p2622 A70-30660

Temporal wave echoes and Landau damping in collisionless plasma using signal averaging and time delay techniques

14 p2622 A70-30687

Ion temperature sensitive end effect in long cylindrical Langmuir probe response in high speed collisionless plasma flow at ionospheric satellite conditions

14 p2577 A70-31038

Sideband instability and trapped particle charge density response of large periodic Bernstein-Green-Kruskal waves in collisionless plasma

14 p2623 A70-31039

Low density collisionless plasma sheath in planar and cylindrical geometry under weak magnetic field, considering ion-electron pair generation

14 p2624 A70-31040

Collisionless plasma confinement using spatially uniform time varying magnetic field

14 p2624 A70-31100

Gyrosynchrotron from accelerated electron, discussing effects of cold and collisionless magnetoplasma on far field and frequency spectra

15 p2728 A70-31989

Low amplitude waves and substantial frequencies interaction by averaging method for hydrodynamics of waves in collisionless plasmas

15 p2720 A70-32114

Solar wind models based on exospheric theory assuming collisionless particles

15 p2794 A70-32613

Collisionless shocks structure in turbulent wave-particle interactions, obtaining ion distribution function

16 p2959 A70-33970

Collisionless plasma theory modification to include effects of finite Larmor radius of ion and electron on perturbation flow mixing

17 p3141 A70-34935

Finite difference methods for collisionless plasma models, taking into account Eulerian form of Vlasov equation in phase space

18 p3296 A70-36792

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

18 p3316 A70-36921

Hydrodynamic model analogy to water bag/incompressible homogeneous fluid in phase space/, investigating nonlinear collisionless plasma oscillations

19 p3474 A70-37365

Higher order magnetic field-free temporal and spatial plasma wave echoes, solving collisionless Boltzmann equation by method of characteristics

19 p3476 A70-37557

Coulombian drag on body from hybrid calculus of collisionless plasma flow around cylinder

19 p3481 A70-38382

Collisionless plasmas fluid dynamical equations in presence of strong magnetic field, discussing Larmor and electron plasma frequencies

20 p3678 A70-39609

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties

20 p3684 A70-40258

Current driven ion wave plasma turbulence in collisionless shock, measuring frequency and wave number spectra by shock front light scattering

20 p3685 A70-40497

HF electromagnetic field effect on nonhomogeneous collisionless magnetized plasma stability, deriving dispersion equation for drift cyclotron oscillations

21 p3854 A70-40622

Anomalous electromagnetic wave absorption in collisionless plasma attributed to instability excitation causing ion density fluctuations

21 p3855 A70-40754

Collisionless shock wave geometry, determining dispersion relation for ion acoustic waves propagating in plasma

21 p3856 A70-41082

Jump relations for shocks in anisotropic collisionless magnetized plasma

21 p3856 A70-41267

Collisionless nitrogen plasma drift velocity measurement by ion acoustic wave method

21 p3859 A70-41760

Collisionless plasma shock wave instability, discussing resonance and energy dissipation through ion Landau damping 22 p4077 A70-42292

Hot electrons bunch spread deceleration in collisionless plasma, discussing stationary moving jump formation similar to shock wave 22 p4077 A70-42299

Collisionless magnetospheric plasma turbulent conductivities for weak and strong electric fields parallel to magnetic field 22 p4016 A70-42787

Impulse length effect on space echo electric field in collisionless plasma 22 p4082 A70-43237

Collisionless plasma weak turbulence theory derivation from Vlasov equations, considering interactions between oscillation modes 23 p4225 A70-44182

Turbulent collisionless plasma shocks formation, wave front steepness and explanation for earth bow shock 23 p4225 A70-44183

Collisionless plasma shock wave structures from geophysical and astrophysical phenomena standpoint, describing tarantula experiment 23 p4225 A70-44184

One dimensional collisionless electron-proton plasma, obtaining exact electrostatic shock solution to Vlasov and Poisson equations 24 p4382 A70-45107

Ion acoustic wave propagation in collisionless gravity-supported plasma in static magnetic field calculated from linearized Vlasov equation 24 p4382 A70-45109

Collisionless plasma, calculating effects of energy dissipation due to weak firehose instability on steady planar flow, based on quasi-linear fluid equations 24 p4382 A70-45110

Steady state frequency spectra for Alfvén waves and MHD turbulence in collisionless plasma with non-linear interaction by particle scattering 24 p4383 A70-45114

Pressure gradient induced drift waves in collisionless hydrogen plasma in homogeneous magnetic field 24 p4388 A70-46209

COLLISIONS

NT ATOMIC COLLISIONS

NT COULOMB COLLISIONS

NT INELASTIC COLLISIONS

NT IONIC COLLISIONS

NT METEORITE COLLISIONS

NT MOLECULAR COLLISIONS

NT PARTICLE COLLISIONS

Container fluid viscosity effect on container-obstacle interaction solved in Fourier series form 07 p1252 A70-18676

Transition of stress distribution on collision surface of semiinfinite elastic plane with rigid beam, using Fredholm integral equation 10 p1954 A70-23950

Jet collisions solutions for impact of pin at obstacle, solid body impact at surface, cylindrical shells longitudinal impact and jets interactions 13 p2453 A70-29771

Container fluid viscosity effect on container-obstacle interaction solved in Fourier series form 15 p2719 A70-31468

COLLOCATION

Dispersion curves for wave propagation in infinite elastic bars of elliptic cross section obtained by method of collocation 04 p0773 A70-15080

COLLOIDAL GENERATORS

Colloid engine efficiency operating with pulsed positive voltages and square wave and sinusoidal voltages [AIAA PAPER 70-178] 06 p1132 A70-18158

Ground test reactor design based on colloid fueled reactor concept [AIAA PAPER 70-688] 16 p2950 A70-33587

COLLOIDAL PROPELLANTS

Chemical engineering problems of resistojets, pulsed plasma, ion bombardment and colloid thrusters 01 p0166 A70-10974

Charged aerosol charge/mass ratio measurement and colloidal propulsion system thrust, efficiency and exhaust velocity determinations 03 p0551 A70-12936

Dual bellows ball seat valve design for colloid thruster coupled to pressurized feed system, demonstrating thrust decay and flow regulation [AIAA PAPER 70-615] 16 p2919 A70-33610

Electrostatic colloid thrusters operation and technology, including propellants, needle modules and test results 17 p3148 A70-35218

Time-of-flight mass flow rate and thrust stand data comparison for two 100 micropound colloid thrusters [AIAA PAPER 70-1114] 20 p3691 A70-40229

Colloid annular thruster performance, using low mass flow rate data and space charge formulas [AIAA PAPER 70-1113] 20 p3692 A70-40230

Colloid annular thrusters performance tests in vacuum chamber with LN cooled liner, using high speed analog to digital system to acquire time of flight /TOF/ data [AIAA PAPER 70-1112] 20 p3692 A70-40231

Colloid microthruster system life test, discussing design and steady state performance [AIAA PAPER 70-1110] 20 p3692 A70-40233

Colloid engine propellant mass flow distribution, determining beam current and specific charge effects on thrust, efficiency and specific impulse [AIAA PAPER 70-1109] 20 p3692 A70-40234

COLLOIDING

X ray structural and electrophoretic investigation of donor and fibrinolytic blood protein components, observing crystalline to amorphous transition in blood serum and plasma lyophilization 09 p1621 A70-23149

Spacecraft design requirements for scientific zero G cloud physics experiments concerning colloidal modification processes 14 p2584 A70-30552

COLLOIDS

NT AEROSOLS

NT COLLOIDAL PROPELLANTS

NT FOG

Simulator for testing colloid microthruster, discussing spacecraft interfaces and time of flight thrust data [AIAA PAPER 69-314] 01 p0058 A70-10834

Stable colloidal dispersions of subdomain magnetite particles correlated for magnetic properties in terms of size distribution and volumetric concentration by superparamagnetic theory 12 p2284 A70-27241

Colloidal filler /carbon black/ reinforced rubber for various applications, noting fabrication into composite material 15 p2764 A70-31930

Colloidal alumina nonNewtonian suspension in propylene glycol, examining thixotropic behavior at various structural levels 24 p4310 A70-45625

Aeromechanical characteristics of colloidal fuel core nuclear reactor in relation to cavity geometry and propellant gas injection [AIAA PAPER 70-1222] 24 p4377 A70-45958

COLOR

Scattering functions from sky light spectra measurements on high mountain for various sun altitudes, obtaining color value functions 02 p0359 A70-12776

Combining color response in cholesteric liquid crystals generated by trace contaminants applicable to detection of vapors trace amounts 07 p1222 A70-19930

Meteors spectral intensity variations along flight path noting color dependence on brightness 08 p1572 A70-20946

Electroluminescent displays design capable of generating all primary colors in single compact element 08 p1499 A70-21689

CRT color displays advantages and limiting factors, considering beam-penetration tube with high voltage switching 09 p1673 A70-22031

Semiconductor alphanumeric multicolored displays, discussing phosphor coating of GaAs diodes 13 p2408 A70-29217

H II region stellar color anomaly attributed to interstellar extinction 14 p2641 A70-30879

Hill reaction color sensitivity in red and blue light during chloroplast disintegration, considering oxygen evolution capacity 15 p2684 A70-32548

Meteors spectral intensity variations along flight path noting color dependence on brightness 15 p2806 A70-32758

Electric temperature sensors accuracy and stability, considering thermocouples, resistance thermometry, radiation and color pyrometry 15 p2743 A70-32798

Zodiacal light observations at elongation angles from sun, examining surface brightness, color index and polarization degree by balloon-borne instruments 18 p3318 A70-37012

Dispersed stellar clusters color excesses and distance moduli from color-magnitude diagram, considering evolutionary deviation from main sequence 18 p3323 A70-37138

H 2 region galactic clusters and exciting stars, reevaluating distances by color magnitude diagrams 18 p3329 A70-37178

Spectral energy distribution curves and color indices of specific meteor trails observed on 12 August 1959 and 25 July 1963 19 p3526 A70-38780

Magnitude-color relation for Cygnus X-2 and WX Centauri, indicating opposite correlation to Sco X-1 fluctuations 21 p3873 A70-40672

B-V and U-B colors and B and V polarization calculation in single scattering for slab model reflection nebulae with dielectric or graphite grains 22 p4103 A70-42984

Optimal color hierarchy for pyrotechnic markers and signals indicating red, violet and amber hues on top 23 p4146 A70-44459

COLOR BLINDNESS

U COLOR VISION

COLOR CENTERS

KCI F centers isothermal annealing kinetics using EPR, considering electron irradiation levels effects 02 p0350 A70-12719

Emission kinetics variations of ruby laser due to aging attributed to inhomogeneity of active medium developing simultaneously with color centers 07 p1300 A70-19872

Current-sensitive single gun color CRT with phosphor screen for display systems 12 p2195 A70-27373

Defect F centers formation in MgO, discussing optical absorption bands, oscillator strengths, luminescence band, impurity centers, etc [AIAA PAPER 70-828] 16 p2940 A70-33938

Sodalites color centers creation by electron beam, discussing application in dark trace cathode ray storage display tubes 19 p3379 A70-38048

COLOR PERCEPTION

U COLOR VISION

COLOR PHOTOGRAPHY

Holographic color schlieren flow visualization system for three dimensional photography, variable focus shadowgraph, knife edge schlieren, etc 01 p0091 A70-10908

Multicolor Venus photography, discussing anomalous markings association with anomalous UV polarization 02 p0378 A70-12557

Black and white roentgenograms conversion to full color and three dimensional CRT radiograph displays, incorporating electronic data processing circuitry 04 p0641 A70-14560

Semifocusing color schlieren systems for quantitative investigations of flows in fluid mechanics and heat transfer, including photographs of boundary layers 04 p0690 A70-15029

Aerial color IR photography for crop disease identification by tonal and geographic patterns, discussing cameras, films, filters and exposure procedures 05 p0837 A70-16144

Projection display methods using scanned and modulated multicolor laser beams, discussing beam generation, modulation and scanning 05 p0858 A70-16188

Schlieren system modification using diffraction grating to produce color applied to airfoil flowfield analysis [AIAA PAPER 70-223] 06 p1029 A70-18165

Remote sensors for measurement and mapping of ocean color variations, discussing Wierdinger Image Spectrophotometer and Water Color Spectrometer 06 p1073 A70-18592

Barred galaxies colorimetric data to study relative intensities and mean surface brightnesses as function of color 07 p1376 A70-18905

Minimum altitudes for illumination levels of aerial color photographic film calculated for different landscapes 07 p1283 A70-19633

Aerial color photography, considering lens types, exposure, filters, films, etc 08 p1498 A70-21543

Photochromism of dihydroquinoline compounds and absorption spectra of color forms, noting color development upon UV light irradiation and thermal eradication 09 p1629 A70-22334

Color schlieren photography with complete spectrum displayed in single photograph, discussing filter matrix 10 p1857 A70-23913

Color radiography with photographic negative film exposed to X rays, obtaining same thickness latitude with improved detail sensitivity on single emulsion line 10 p1887 A70-24168

Orthophoto Attachment for A8 autograph to produce black and white and color aerial photographs on negative film 10 p1891 A70-24739

Color and color IR aerial photography, discussing effects of solar spectrum, films, filters, etc, in connection with terrain analysis 10 p1880 A70-24751

Faint violet stars in southern galactic latitudes found during scanning of two color plates including halo stars, subdwarfs, white dwarfs and quasi-stellar galaxies 10 p1949 A70-25248

VX Cas brightness determination from color plates, giving values in tabular form 11 p2115 A70-26583

Spaceborne photography for detecting and identifying road networks, using color separation plates and photograph enlargement 12 p2216 A70-26910

Multispectral color aerial photography, describing instrumentation, oceanographic and agricultural applications, atmospheric effects on images, etc 12 p2220 A70-26937

Aerial reconnaissance of soils, rocks, vegetation and streams, comparing color, IR color, and black-and-white photography 12 p2236 A70-27873

Earth colorimetry data improvement by separating signals of each bandwidth on one photographic emulsion or TV tube 13 p2406 A70-28987

Backward facing separated step boundary layer flow at Mach 2.25 investigated by diffraction grating interferometer and color schlieren technique [AIAA PAPER 70-571] 13 p2343 A70-29898

Evaporography at room temperature, showing necessity of recording images on color films 14 p2583 A70-30362

Cotton plant leaves from high saline soil area, observing chlorophyll content on color photographs 14 p2576 A70-30977

Soil characteristics determination from black and white, color and IR aerial photographs 14 p2577 A70-30980

Auxiliary minus-visual filters in high altitude IR aerial color photography, suggesting tests for film sensitometric properties 14 p2588 A70-31235

Lunar color differentiation by computer image processing compared to earth based photoelectric photometry [JPL-TR-32-1472] 16 p2900 A70-33097

Digital color printer with opaque IBM card as filter for sea surface temperature and cloud vortex patterns display 16 p2907 A70-33180

Reactive stream separation high speed color photography for impinging streams of nitrogen tetroxide and hydrazine [AIAA PAPER 70-608] 16 p2998 A70-33605

Large scale aerial color photography over spruce fir stands during 10 year period for assessing damage caused by budworm epidemic 17 p3078 A70-35614

Remote sensing experiment demonstrating utility of multispectral color aerial photography for detection of differences among vegetative species 17 p3095 A70-35615

Color film /XRC/ application in Mexico during solar eclipse of 7 March 1970, showing little color and tone distortion 19 p3423 A70-37751

Aerial terrain analysis by color and color IR photography, analyzing physical factors affecting final image 22 p4018 A70-42963

Color filter schlieren photography for visualization of wind tunnel shock and pressures, liquid mixing and convection currents [SMPTRE PREPRINT 86] 22 p4036 A70-43065

Astronomical color photography, discussing films and filters for exact reproduction 23 p4198 A70-44903

Diazo compounds purity effect on photosensitive photographic film quality, determining color image reproduction density 24 p4334 A70-45498

COLOR TELEVISION

Secondary electron conduction TV camera tube with three color filter wheel for Apollo missions 03 p0493 A70-14025

Color closed circuit TV visual cues in flight simulation during flare and touchdown, including ATA requirements and acuity limits [AIAA PAPER 70-347] 10 p1857 A70-24201

Low cost earth station and antenna for Canadian domestic satellite, bringing color TV to northern territories [AIAA PAPER 70-432] 11 p2000 A70-25458

Ground frequency converters for reception of NTSC color TV transmission from synchronous communication satellites, tabulating cost estimates [AIAA PAPER 70-440] 11 p2002 A70-25490

Color TV tubes white field balancing by spectroradiometer, colorimeter and colorlog meter 12 p2195 A70-27372

Earth colorimetry data improvement by separating signals of each bandwidth on one photographic emulsion or TV tube 13 p2406 A70-28987

Laser color TV display acousto-optic deflectors equalization using prisms 15 p2751 A70-32043

Apollo 10 color TV camera for real time scenes, describing configuration performance and total system operation 16 p2907 A70-33187

SECAM video and audio color TV transmission over Molniia satellite relay path 23 p4162 A70-44091

COLOR VISION

Human foveal color vision in terms of tetrachromatic hypothesis, citing supporting evidence 01 p0026 A70-11054

Color coding effects in compatible and noncompatible display control arrangements 02 p0247 A70-12381

Threshold visibility of uniformly moving colored gratings, noting chromaticity discrimination dependence on spatial and temporal frequencies 02 p0237 A70-12460

Color vision mechanisms spectral sensitivities measured by increment threshold technique for normal and deutan observers 03 p0427 A70-13947

Bleached eye pressure blinding at bleaching light termination during wavelength settings, discussing effect on interocular hue shifts 03 p0427 A70-13951

Color CRT system to display engineering data based on real time analysis, discussing performance requirements 06 p1061 A70-17349

Optimal colors for target and rescue markers, discussing influence on signal detection, response and identification 06 p1002 A70-17713

Human color vision simulation by mathematical and electronic analogs for photoelectric color measurement and eye resolution 08 p1450 A70-20727

Psychophysiological regularities of nonlinear human color vision model, analyzing sensitivity curves, achromatic tints and hyperbolic position in perception space 08 p1443 A70-20728

Deductive model of vision statics formulated for Grassman laws without using operation of color composition 08 p1450 A70-20729

Color vision forms, investigating sensitivity of human retinal receptors and combinations of spectral functions 08 p1443 A70-20731

Binocular achromatic and color thresholds of constant and flickering lights determined from background of different brightness 08 p1443 A70-20732

Microinterval analysis of phased development of human visual color perception in presence of short stimuli 08 p1443 A70-20733

Weightlessness effects on human vision, studying color perception, field of vision and light sensitivity 08 p1444 A70-20743

Dark adaptation correlated with in vivo visual pigments regeneration as function of bleaching during monomolecular time course 08 p1447 A70-21722

Flight personnel color perception requirements and hereditary and acquired anomalies detection 09 p1627 A70-23115

Real time wide angle multicolor scanned laser display for visual flight simulators, utilizing flying-spot camera and rotating optical polygons [AIAA PAPER 70-361] 10 p1857 A70-24203

Visual acuity and light detection after preadaptation to red and orange lights, discussing photopic and scotopic vision 11 p1986 A70-25828

Psychophysical and evoked potential correlates of changes in stimulus color and intensity compared with minimum subjective flicker conditions 12 p2171 A70-28035

Twilight sky color visual estimation from Soyuz 5 spacecraft noting cloudiness effects 15 p2723 A70-31597

Hypoxia and acetazolamide effects on color sensitivity zones in visual field 15 p2684 A70-32533

Exposure duration effect on luminance requirements for hue perception and identification 17 p3040 A70-35724

Lighting and background effects on human binocular color vision of signal lights in industry 19 p3366 A70-38923

Color attributes by subjective estimation of surface colors, discussing correlation with other methods 22 p3972 A70-43409

Central fovea dichromacy tests, using color naming technique 22 p3972 A70-43410

Isochromic change in bleaching of rhodopsin, showing additional intermediate without detectable color change 23 p4147 A70-44776

Monochrome radiography for contrast strengthening to increase color images detectability by human eye 24 p4337 A70-45708

COLORADO

Nitrogenous compounds from Colorado Green River Formation oil shale using high resolution mass spectrometry 11 p2047 A70-26620

COLORATION

U COLOR

COLORIMETRY

Multichannel ionization calorimeter data readout into electronic computer using short circuit coil magnetic storage 05 p0816 A70-15947

Multichannel spectrometer electronic circuitry for ionization colorimeter providing data on low energy particle interactions, emphasizing reliability and accuracy 05 p0846 A70-15948

Barred galaxies colorimetric data to study relative intensities and mean surface brightnesses as function of color 07 p1376 A70-18905

Color TV tubes white field balancing by spectroradiometer, colorimeter and colorlog meter 12 p2195 A70-27372

Integral color indices relation to spectral type on NGC 3077 and M82 galaxies 12 p2308 A70-27871

Earth colorimetry data improvement by separating signals of each bandwidth on one photographic emulsion or TV tube 13 p2406 A70-28987

Twilight colorimetry from horizon spectra obtained by Soyuz 5, computing chromaticity coefficients for purely scattering molecular atmosphere 16 p2896 A70-33260

COLUMBIUM

U NIOBIUM

COLUMNS [PROCESS ENGINEERING]

Thermal conductivity of nitrogen in 350-1500 K range using hot-wire diffusion columns 11 p2147 A70-25756

COLUMNS [SUPPORTS]

NT TAPERED COLUMNS

Dynamic stability of simply supported column of linear viscoelastic materials under sinusoidal loading 01 p0206 A70-11148

Tangential force applied to column end by jet reaction from nozzle clamped to column end, obtaining critical load and oscillation frequency 02 p0389 A70-12644

Visco-elastic column analysis based on mechanical model, investigating relationships between solid viscosities, loading velocities, initial deflections and dynamic buckling loads 03 p0596 A70-14146

Local buckling and failure of thin walled compression column with supported flanges, analyzing strength reduction by eccentricity 03 p0600 A70-14254

Elastic post stability under longitudinal impact on rigid support, considering loading/unloading phases for calculating shock half wave length and critical rate 08 p1591 A70-21443

Clamped thin circular plate bending under various loadings due to action of rigid square column on center 11 p2139 A70-26404

Classical eigenvalue problem transformation by invariant imbedding into initial value problem suited for numerical integration, noting applications to columns elastic buckling 12 p2261 A70-27424

Column end fixity using Euler load and maximum flexibility coefficient for span point lateral load 17 p3188 A70-35226

Postbuckled integrally stiffened wide column weight optimization, developing stress equation 18 p3339 A70-36447

Asymptotic buckling analyses of imperfect columns on nonlinear elastic foundations by perturbation expansions, equivalent linearization and truncated hierarchy approximations 21 p3934 A70-40777

Postbuckling of wire restrained elastic cantilever column with imperfection sensitivity 22 p4116 A70-43204

Thin walled column buckling relation to plate element buckling, studying deformation, stress state, failure mechanism and ultimate load 22 p4116 A70-43214

Undamped elastic cantilever column with concentrated masses, considering transition from stability to divergence under nonconservative forces 24 p4421 A70-45286

COMA

Coma cluster of galaxies morphological and statistical characteristics, determining major and minor axes 10 p1948 A70-25194

Comet tail structures in inner coma region using photographic observations 14 p2650 A70-31220

COMBAT

Air combat model /AIRCOM/ to evaluate close-in air-to-air fighter aircraft combat capability, determining relative changes in kill probability per firing pass 03 p0413 A70-13958

Aircraft life support systems and equipment evaluated in Vietnam combat environment, discussing combat ejection conditions, injuries cause and severity, fatalities, etc 05 p0806 A70-16298

Combat and noncombat ejection/extraction fatalities and major injuries to USAF crewmen
07 p1192 A70-19023

Air combat simulator with attacker and evader pilots control capability, comparing simulated interceptions with flight test maneuvers
[AIAA PAPER 70-340] 09 p1656 A70-23023

Weapon systems combat effectiveness measurements, stressing need for proper data acquisition from early R and D through obsolescence
09 p1794 A70-23414

AH-1G helicopters combat flight loads from on-board oscillograph data recording, defining performance in terms of critical variables
17 p3013 A70-34706

Combat and noncombat ejection/extraction fatalities and major injuries to USAF crewmen
17 p3039 A70-35576

Computerized air combat simulation with comparison of analog and digital approaches, noting Air to Air Combat Fort Worth
18 p3230 A70-36453

COMBINATION
Disproportionation to combination ratio of hydrazyl radicals generated in absence of hydrazine direct decomposition
14 p2544 A70-30120

COMBINATORIAL ANALYSIS
NT PARTITIONS [MATHEMATICS]
NT PERMUTATIONS

COMBINED STRESS
Fracture criteria in cracked plates under combined extension and cylindrical bending using Sih-Hartrant theory
[ASME PAPER 69-MET-L] 04 p0770 A70-14882

Stability of clamped, hinged and elastically supported circular cylindrical shells under critical combined torsional and transverse pressure
05 p0934 A70-16227

Plane deformation of plastic thin walled tubes under complex tensile and torsional load
05 p0935 A70-16233

Shallow spherical shells stability under combined loading, hinging and edge clamping conditions, deriving strain energy expressions
05 p0936 A70-16238

Gas turbine blades thermal fatigue strength under simultaneous temperature cycles and static tensile loads, analyzing temperature and stress fields
05 p0953 A70-17053

Crack formation and propagation kinetics in flat and cylindrical Cr-Mo-V steels under tension compression loading cycles
06 p1162 A70-17393

Numerical analysis of axisymmetric elastoplastic deformation of circular plates under combined lateral load and membrane force
07 p1402 A70-18977

Elastoplastic torsion of combined prismatic bars with transverse distribution of constant properties solved by computer
07 p1415 A70-20189

Unidirectional filamentary composites failure theory for uniaxial and combined stress, considering constituent material properties and fabrication processes
08 p1532 A70-21902

Cylindrical shell stability under combined torsion and internal pressure, noting yield point effect on critical load, obtaining buckling-internal pressure relationship
09 p1786 A70-23722

Cylindrical coil springs cold winding loading processes, considering initial tension or compression of wire and combined stresses
10 p1894 A70-24297

Length effect on modulus determination test for thin laminated tube under combined loading using shell theory
11 p2136 A70-26086

Stress relaxation in combined torsion-tension, developing expressions for torque and axial force
11 p2140 A70-26482

Shells of revolution under combined thermal and mechanical loading, presenting analytical basis of BOSOR 3 digital stress analysis program
12 p2320 A70-27144

Plates elastic-plastic behavior under combined stretching and bending by finite element method
12 p2320 A70-27146

Thin walled tubes plastic instability under combined internal pressure and axial load for open and closed end conditions
12 p2322 A70-27216

Aluminum sheets anomalous plastic behavior under balanced biaxial and uniaxial tensions
12 p2324 A70-27398

Critical loads for brittle bodies weakened by sharp holes under combined diffuse thermal fluxes and crack crossing
12 p0000 A70-28321

Combined internal pressure and axial loading influence on aeroelastic stability of thin walled cylindrical shell in supersonic flow field
16 p2991 A70-33851

Stability analysis of anisotropic cylindrical shells under combined loadings using inverse operators
16 p2994 A70-34246

Optimum filament orientation for maximum strength in composite with combined normal and shear stresses
17 p3183 A70-34563

Zero moment theory for stress-strain state of thin walled anisotropic shells with nonuniform moduli under simultaneous torsion and tension
18 p3340 A70-36578

Strain hardening directionality during creep tests of tubular samples under combined tensile stresses and bending moments
18 p3341 A70-36588

Combined mechanical and cyclic thermal stresses effect on plastic deformation buildup in E1435 alloy preceding breakdown
19 p3449 A70-37349

Circular sandwich arc subject to central concentrated load and symmetrically applied edge couple, obtaining shakedown interaction curve
19 p3546 A70-38354

Cylindrical or tapered composite shell structures optimal design with closed circular or elliptical cross section under combined bending and torsional loads
20 p3730 A70-40043

Solid and sandwich beams lateral vibrations under transverse shear, rotary inertia and variable midplane stretching
21 p3938 A70-41761

Circular cylindrical shell with varying thickness under circumferential load and radial pressure, calculating critical load
22 p4117 A70-43354

Carrying capacities of simply supported and clamped circular plates under combined lateral pressure and edge compression loads
22 p4118 A70-43548

COMBUSTIBILITY
U FLAMMABILITY
COMBUSTIBLE FLOW
Cold ducted supersonic flow of premixed ethylene and air ignition by hot turbulent jet
[AIAA PAPER 70-148] 06 p1131 A70-18057

Combustible gas /hydrogen-air/ subsonic and transonic flow past sphere, approximating combustion zone structure by model
10 p1801 A70-24142

Combustion research prospects, considering turbulence and flame stabilization, pollution control, flame self acceleration, subsonic/ supersonic flow combustion and flame diagnostics
11 p2150 A70-26376

Gas dynamic processes insufficiency for triggering transition to detonation obtained from laser schlieren records of nonsteady flow field ahead of accelerating turbulent flame
11 p2150 A70-26378

Temperature distribution in opposed jet diffusion flames, discussing mass fluxes and fuel and oxygen concentrations effect
11 p2151 A70-26385

Viscid-inviscid equations solution, describing flows with coupled mixing, combustion and lateral pressure gradients
15 p2718 A70-32516

Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures
16 p2998 A70-33860

Particle penetration of solid or liquid combustible additives injected into air breathing combustors airstreams
17 p3073 A70-35665

Shock layer and combustion in supersonic flows about conical bodies at various angles of attack
17 p3012 A70-35894

Combustion - Conference, Poitiers, France, July 1968
02 p0392 A70-12001

Ignition and combustion in ducted turbulent supersonic flow, discussing premixed and unpremixed ethylene
[AIAA PAPER 70-720] 16 p2997 A70-33488

Boron particles ignition and combustion in supersonic air stream, emphasizing axial and lateral two phase flow injection
[AIAA PAPER 70-737] 16 p2856 A70-33496

COMBUSTION CHAMBERS
Turbojet engines air pollution emissions processes resulting from combustor primary and secondary zone conditions, discussing engine design modifications
[AIAA PAPER 69-1040] 01 p0162 A70-10602

Pressure oscillograms and schlieren photographs of shock wave amplification during interaction of cellular flame of gas mixtures in cylindrical combustion chamber
01 p0217 A70-11014

Combustion chamber traveling oscillating shock wave as driving mechanism of high amplitude axial mode solid rocket combustion instability
02 p0353 A70-12009

Combustion instability in gas turbine main combustors, noting heat release and inlet air flow rates coupling
02 p0353 A70-12012

Premixed methane-oxygen-nitrogen combustion in conical reactor fed by choked sonic flow jet, analyzing reaction products chromatographically
02 p0397 A70-12030

Radiation from flames in gas turbines and rocket engines, discussing effects of soot formation fuel chemical composition, combustor operating conditions, etc.
02 p0354 A70-12050

High pressure tests of primary zone flame radiation, flame and tube metal temperatures in aircraft combustion chambers, including oxygen and vitiated inlet air effects
02 p0355 A70-12051

U-shaped combustion chamber two dimensional model for studying factors influencing flame spread and stabilization and heat transfer in gas turbines
02 p0355 A70-12257

Annular combustion chamber for turboprop engines, analyzing design data and development stages, discussing performance characteristics
03 p0552 A70-13928

Combustion chamber design for engines, considering atomization by rotating disk vs nozzle atomization
03 p0552 A70-14031

Interior ballistics of high-low propulsion system with fixed volume high pressure combustion chamber coupled to variable volume lower pressure action chamber
03 p0548 A70-14116

Liquid fuel film vaporizing combustor for gas turbines, considering combustion efficiency and flame intensity
03 p0552 A70-14324

Cold flow-porous plate simulation of swirling flow-field in spinning end-burning rocket chamber, noting vortex generation and flow characteristics
04 p0764 A70-15541

Thermal and gas dynamic characteristics of aircraft turbine engine annular vaporizing combustion chamber determined from air distribution ratio
05 p0895 A70-15897

Liquid rocket technology for chemical engineers, discussing insulating tanks, flexible lines, turbopumps and combustion chamber
05 p0896 A70-16168

Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine
[AIAA PAPER 69-452] 06 p1130 A70-17176

Heat transfer to hydrogen calculated with reference to design of cooled rocket nozzles and combustion chambers
06 p1174 A70-17677

Ramjet engines combustion chamber and air intake design for velocities between Mach 2 to 7
06 p1130 A70-17932

Main stream interaction with flame stabilizing jets in combustion chambers and afterburners using gas dynamic models
07 p1419 A70-18754

Propellant sprays behavior in high pressure combustors, calculating jet breakup or atomization length
07 p1257 A70-19331

Transverse and longitudinal combustion chamber oscillations in rocket motors with distributed mass and energy sources
07 p1364 A70-19581

Flame propagation rate and combustion zone extension dependence on chamber dimensions for turbulent flow of homogeneous mixtures
08 p1597 A70-21187

Turbulent combustion stability in chamber, taking into account boundary effects due to acoustic perturbations reflection
09 p1786 A70-22106

Chemical rocket propulsion systems approximate calculation for characteristic velocity dependence on mixture ratio and pressure in combustion chamber
[DFVLR-SONDDR-24] 10 p1929 A70-23842

Gas turbine components, discussing material selection, fabrication and assembly with emphasis on combustion and turbine sections, turbine coatings, shafts, bearings and seals
10 p1929 A70-23851

Entropy or material waves effects on HF pressure oscillations in liquid rocket combustor, assuming concentrated combustion zone and zero length nozzle
10 p1929 A70-24088

Chemical high energy rocket propellants, discussing metal combustion, hybrid and tribrid engines, combustion chambers, etc
11 p2100 A70-26282

Jet engine pollution reduction for airport areas, discussing chemical equilibrium failure in exhaust gases and combustor design 12 p2291 A70-27993

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios [AIAA PAPER 69-420] 13 p2473 A70-28507

Spin detonation of tangential HF vibrations in liquid rocket engine combustion chambers, discussing instability prevention 13 p2474 A70-29422

Tubular gas turbine combustors design by analytical model, summarizing theories of combustor analysis, turbulent flame speed, microvolume burning and stirred reactors [WSCI PAPER 70-2] 13 p2474 A70-29613

Monopropellant rocket combustion one dimensional theory with uniform velocity and size droplets injection, obtaining chamber length 14 p2629 A70-30773

Rolls-Royce RB 211 three shaft turbofan engine, discussing centrifugal compressor, tubular combustion chambers and single stage turbine 15 p2787 A70-31949

Two diaphragm combustion shock tube for plasma radiation energy transfer, describing development, performance, make-up and testing 15 p2779 A70-32019

Rocket motor combustion chamber lining thickness distribution matching to effusor by designing effusor as multiple nozzle made of circular graphite plate 15 p2790 A70-32271

Large scale hydrogen fueled supersonic combustor test at simulated Mach 8 flight, describing fuel injector design [AIAA PAPER 70-715] 16 p2965 A70-33539

Jet engine combustion chamber design, discussing performance range and geometry 16 p2970 A70-33682

Kuznetsov NK 8-4 bypass turbojet air entry vanes, pressure compressors, gear case, combustion chamber and turbine drives 17 p3147 A70-34629

German monograph on gas turbine combustion chambers part-load behavior improvement by load controlled change of flame tube air cross section 17 p3148 A70-35373

Water cooled pressure probes for measuring rocket chamber HF pressure variations 17 p3093 A70-35485

Particle penetration of solid or liquid combustible additives injected into air breathing combustors airstreams 17 p3073 A70-35665

Flameout and ignition correlation for diffusion fuel burnup behind angled stabilizers in annular turbine combustion chamber 18 p3300 A70-36127

Rocket engine with Teflon lined combustion chamber, considering design criteria and tests 18 p3301 A70-36662

High speed combustion chambers for gas turbine applications, using finite rate chemistry and turbulent mixing computer program for burner design [ASME PAPER 70-GT-25] 18 p3304 A70-36866

Aerodynamic stability of branched diffuser systems used in annular combustors of gas turbine engines [ASME PAPER 70-GT-27] 18 p3209 A70-36868

Turbine engine combustion chambers with various frontal devices, investigating burnout mechanism and heat yield in secondary air flow injection zone 19 p3489 A70-37246

Gas turbine engine combustion chamber efficiency dependence on injector characteristics, temperature and fuel physicochemical properties 19 p3489 A70-37247

Air-mechanical fuel injection effect on gas turbine engine combustion chamber working process, investigating heat generation coefficient, temperature field nonuniformity and combustion efficiency 19 p3489 A70-37248

Smoke chamber measurements of opacity developed in polymer pyrolysis or combustion, including Materials Smoke Obscurity Index (MSOI) 20 p3736 A70-39404

Jet engine combustor design and efficiency, discussing heat transfer, cooling and engine materials 20 p3688 A70-39648

Combustion chamber, turbopump and combustion control system for French turbopump-fed booster rocket motor 20 p3688 A70-39649

Reusable rocket engine for space shuttle, discussing propellants, configuration, design, combustion cycle and size 20 p3689 A70-40084

Gas turbine combustion chamber convective and radiant heat transmission, examining steam film cooling of flame tube 22 p4092 A70-43199

Liquid propellant rocket engine nonisobaric cylindrical combustion chamber parameters from thermodynamic data 22 p4092 A70-43355

Gas turbine engine combustion chamber starting, discussing effects of temperature, nozzle characteristics and fuel physicochemical properties 22 p4092 A70-43356

Jet engine air pollution in U.S., discussing fuel types, additives and burner design for smoke emission reduction 23 p4233 A70-44200

Liquid propellant rocket engine combustion instabilities, describing unsteady combustor flow by single nonlinear wave equation with stable and unstable finite amplitude limit cycles 23 p4233 A70-44425

Spinning cold-flow rocket motor, studying rotation effects on chamber flow velocity field 23 p4233 A70-44579

Combustion chamber flow visualization, obtaining information on pressure loss, velocity field, flow pattern and temperature gradients 24 p4393 A70-45444

Jet engine combustion chamber pressure loss, flow velocity through flare tube holes and air supply calculation, noting adaptation for computer use 24 p4393 A70-45446

Reduced smoke combustion chambers for jet aircraft engines tested in full scale JT8D engine 24 p4396 A70-46387

COMBUSTION CONTROL

Burning program for sounding rocket to reach maximum altitude with given initial and propellant masses, discussing numerical parameter optimization technique 01 p0161 A70-10150

Position control of burning solid nonmetalized propellant strand in combustion bomb using closed loop servomechanism 01 p0215 A70-10830

Compression wave mechanism of supersonic combustion controlled by mixing, discussing multiple injector design, thermal compression and geometry effect 02 p0399 A70-12041

Boron particles combustion behavior prediction by incorporating condensed phase effect into diffusion controlled model [WSCI PAPER 70-9] 13 p2472 A70-29612

Ignition delay-reducing catalyst for furfuryl alcohol-red fuming nitric acid hypergolic bipropellant 13 p2473 A70-29992

Solid propellant rocket motor combustion control by fluidic vortex valve, considering thrust variation [AIAA PAPER 70-643] 16 p2965 A70-33535

Optimal water quench of solid rockets using injection normal to propellant surface [AIAA PAPER 70-640] 16 p2968 A70-33598

Combustion extinguishment of composite solid propellant motors by fluid injection, considering binder, curing agent and burning rate catalyst [AIAA PAPER 70-641] 16 p2968 A70-33599

Optimal control for one dimensional compressible gas flow, combustion and heat exchange, described by first order partial differential hyperbolic equations 19 p3402 A70-37240

Combustion chamber, turbopump and combustion control system for French turbopump-fed booster rocket motor 20 p3688 A70-39649

Electric field control of oscillatory acetylene flame combustion for chemical rocket engines 21 p3942 A70-40885

Catalytic combustion fuel tank inerting techniques for fire protection in military and civilian aircraft 23 p4141 A70-44485

COMBUSTION EFFICIENCY

Combustor geometry and heat release effects on supersonic combustor thrust efficiency, considering shock-free, normal and oblique shock situations 02 p0354 A70-12043

Boron combustion in air augmented rockets, examining mixing and burning between subsonic air and supersonic fuel rich exhaust [AIAA PAPER 68-634] 03 p0603 A70-12910

Emulsified jet fuels cold flow, combustion and corrosion characteristics in gas turbine combustor compared with JP-4 fuel [ASME PAPER 69-WA/GT-3] 04 p0732 A70-14892

Optimum injector design for propellant spray mixing using nonreactive simulants and combustion efficiency model 04 p0737 A70-15419

Steady state and dynamic performance of variable geometry free gas turbine using nomogram and analog simulation 06 p1129 A70-17143

Mixture composition and airflow rate of combustion efficiency in turboprop afterburner chamber with air-fuel flame stabilizer 10 p1929 A70-24282

Excess air ratio and heat release efficiency in combustion of kerosene mixture determined by volumetric gas analysis 10 p1968 A70-24283

Residence times distribution in confined round swirling jet, considering mass conservation of 03 p0543 A70-13632

hypothetical tracer substance in combustion efficiency prediction 13 p2522 A70-29609

Liquid rocket engine injector elements design criteria, using noncircular orifice geometry to predict efficiency [AIAA PAPER 70-704] 16 p2967 A70-33565

Motor design parameters effects on solid propellant extinguishment predicted from mathematical combustion model 16 p2962 A70-33571

Pressure and grain size effect on burnout velocity and combustion capacity of ammonium perchlorate 17 p3145 A70-34639

Combustion efficiency and rate in oxygen enriched spacecraft atmosphere 17 p3177 A70-35210

Gas turbine engine combustion chamber efficiency dependence on injector characteristics, temperature and fuel physicochemical properties 19 p3489 A70-37247

Air-mechanical fuel injection effect on gas turbine engine combustion chamber working process, investigating heat generation coefficient, temperature field nonuniformity and combustion efficiency 19 p3489 A70-37248

Jet engine combustor design and efficiency, discussing heat transfer, cooling and engine materials 20 p3688 A70-39648

COMBUSTION HEAT

U HEAT OF COMBUSTION

COMBUSTION INSTABILITY

U COMBUSTION STABILITY

COMBUSTION PHYSICS

Mass loss rate of evaporating liquid droplet with vapor reacting with oxygen of atmosphere in combustion front [DFVLR-SONDDR-16] 01 p0216 A70-10932

Aerodynamic gas flame theory and computations, discussing diffusion burning, turbulent flow burning rate, Reynolds number effects, etc 01 p0217 A70-11006

Unmixed gases diffusion burning calculations, discussing turbulent flame burning aerodynamics in jet flows 01 p0217 A70-11007

Exothermic reaction front propagation in condensed phase, analyzing Novozhilov system of equations 01 p0217 A70-11009

Weightlessness effects on butyl alcohol diffusion flames, studying flame damping mechanism 01 p0217 A70-11012

Combustion time of Al powder, considering concentration, injection into gas flow, oxidizer composition and agglomeration 01 p0161 A70-11015

Injected B particles burning in hot gas stream of oxidant mixture with Ar and H, observing trace widening by motion picture technique 01 p0218 A70-11016

Steady burning process equations numerical solution for boundary conditions prescribed at saddle point singularity 01 p0218 A70-11019

Gas ignition and burning processes calculation with allowance for hydrodynamics, discussing time saving finite difference solution of differential equations system 01 p0218 A70-11020

Solid propellant combustion instability advances, discussing combustion flow interactions, response functions, etc 02 p0351 A70-12008

Three dimensional linear combustion instability in liquid propellant rocket motors using concentrated combustion model, presenting mathematical analysis as boundary value problem 02 p0353 A70-12011

Laminar diffusion flame spread against air stream over solid or liquid fuel bed, noting influence of stoichiometric and thermal properties and data inconsistency 02 p0396 A70-12016

Gas detonation dynamics associated with shock tube self ignition kinetics, noting chemokinetic factors role 02 p0397 A70-12024

Premixed perchloric acid-methane two flame structure, measuring burning velocities, spectra, temperatures and burned gas compositions 02 p0352 A70-12034

Combustion effects on base pressure of two dimensional body in supersonic flight, considering air-fuel ratio, combustion length and free stream Mach number 02 p0354 A70-12046

Ammonia/chlorine dioxide and ammonia/chlorine dioxide/methane flames burner stabilization and burst velocities 02 p0400 A70-12670

Hybrid propellant combustion mechanisms, connecting surface reactions to melting mechanism and subsequent liquid flow [ONERA-TP-736] 03 p0543 A70-13632

Transient response of heterogeneous solid propellant combustion surface determined by step technique regarding pressure buildup and drop conditions [ONERA-TP-748] 03 p0544 A70-13635

Powder and solid propellant combustion, discussing heterogeneous and homogeneous systems, characteristics of foam, fizz and flame zones, etc 03 p0544 A70-13860

Burning constants prediction for suspended hydrocarbon fuel droplets based on modified theoretical equation 03 p0544 A70-13916

Flame structure of liquid methanol burning spheres, discussing temperature and composition profiles 03 p0544 A70-13924

Atmosphere classification according to fire hazard based on heat capacity per mole of oxygen, noting exponential growth rate 03 p0607 A70-14054

Polyamide fabric burning rates in oxygen-inert gas mixtures, studying damping effects of density, thermal conductivity, molecular constants and mass flow 06 p1090 A70-17284

Hydrogen-oxygen difluoride flame burning velocity, diffusion coefficient and light output [WSCI PAPER 69-49] 06 p1178 A70-17982

Ignition of single particles of light metal hydrides, considering combustion stages and heat transfer [WSCI PAPER 69-47] 06 p1179 A70-17984

Heterogeneous ignition mechanism of solid fuels, deriving surface temperature history for time and nature of transition from weak to strong combustion mode [AIAA PAPER 70-119] 06 p1128 A70-18041

Combustion processes and ignition criteria in shock wave ignition of liquid fuel drop in oxidizing atmosphere [AIAA PAPER 70-9] 06 p1180 A70-18142

Shear wave interaction in infinite homogeneous reacting fluid, using Fourier and Taylor series for velocity, temperature, density, pressure and composition [AIAA PAPER 70-146] 06 p1040 A70-18154

Multiphase two dimensional mixing and combustion of flow fields suspended in gaseous medium for propulsion systems problems, obtaining governing equations [AIAA PAPER 70-145] 06 p1181 A70-18175

Main stream interaction with flame stabilizing jets in combustion chambers and afterburners using gas dynamic models 07 p1419 A70-18754

Quasi-steady radially symmetric theory of liquid drop vaporization and homogeneous combustion extended to burning of solid carbon spheres gasified by chemical attack 07 p1419 A70-18915

Integral method for time development of viscous, heat and mass conducting layer over leading edge of volatile drop instantaneously immersed in gas stream 07 p1358 A70-18916

Cold combustible mixture ignition at forward stagnation region of hot projectile, calculating temperatures for propane-air mixture 07 p1422 A70-19577

Metal particles additives behavior in solid rocket propellant combustion, using scanning electron microscope 07 p1359 A70-19585

Minimal initial size of explosion reaction center used to explain ignition process in flammable mixtures, noting dependence on pressure, temperature and composition 07 p1422 A70-19586

Granular diffusion flame theory application to low pressure burning of composite solid AP propellants 07 p1361 A70-19914

Liquid rocket engine combustion processes determined by injector design using similarity principles 07 p1362 A70-19919

Premixed flames of methane with chlorine dioxide and perchloric acid, comparing properties with methane-oxygen flames, suggesting unified reaction mechanism 07 p1425 A70-20007

Ammonium perchlorate combustion catalysis, studying preflame heating and mixing effects on gas phase flame burning velocity 07 p1425 A70-20010

Combustion kinetics in supersonic gas flows past various bodies, assuming exothermal and inverse recombination reactions behind adiabatic shock wave after induction period 08 p1596 A70-20855

Flame propagation rate and combustion zone extension dependence on chamber dimensions for turbulent flow of homogeneous mixtures 08 p1597 A70-21187

Condensed fuel mixtures and oxidizers combustion rates as function of pressure and particle size 09 p1786 A70-22104

Two body collisions reaction mechanisms with small heats of reaction for Be and Al gaseous oxida-

tion, noting low free energy properties of polymerization 10 p1928 A70-24089

Velocity and pressure distribution and flame front shape of confined flame in constant section duct 10 p1969 A70-24786

Combustion research prospects, considering turbulence and flame stabilization, pollution control, flame self acceleration, subsonic/ supersonic flow combustion and flame diagnostics 11 p2150 A70-26376

Artificial carbographites surface combustion processes using mercury porosimetry analysis 13 p2519 A70-28578

Shock wave interaction with burning liquid fuel droplets in gaseous oxygen atmosphere, observing wave amplification due to mass combustion rate increase 13 p2522 A70-29424

Heterogeneous combustion observation by motion picture holography, considering light source requirements and hologram separation at higher sampling rates [WSCI PAPER 70-10] 13 p2409 A70-29610

Boron particles combustion behavior prediction by incorporating condensed phase effect into diffusion controlled model [WSCI PAPER 70-9] 13 p2472 A70-29612

Evaporation and combustion kinetics of droplets and particles in hot air stream, observing luminous trace 14 p2664 A70-30392

Hyperbaric environment combustion, discussing burning rate data and fire resistance scale 14 p2665 A70-30626

Soviet book on rocket engine theory covering liquid and solid propellants, combustion physics, nozzle and thrust chamber geometry, etc 14 p2628 A70-30628

Two dimensional transonic flows bounded by free surface and wall with interior heat release and external burning, indicating application to control or propulsion 14 p2665 A70-30947

Al and Be single particles combustion in various oxidizers, using pulsed Nd-glass laser and Xe flash heating device and scanning electron microscope 14 p2628 A70-30949

Biphase rockets combustion characteristics, comparing results with propellant vaporization and nonlinear instability models 14 p2665 A70-30950

Book on electrical aspects of combustion processes covering formation, behavior in fields, diagnostics, uses of ions, electrons and charged particles, flame ionization, etc 16 p2996 A70-33030

Integral model for combustion of metal particle laden jet mixing with subsonic secondary stream in duct, considering air breathing engine design [AIAA PAPER 70-736] 16 p2964 A70-33490

Subsonic turbulent boundary layer with mass addition and combustion for combustion effects on velocity profiles in constant pressure and accelerating flows [AIAA PAPER 70-724] 16 p2997 A70-33498

Liquid rocket engine combustion analysis, discussing bipropellant spray mass distribution, drop size and velocity, spray evaporation interphase drag and ablative chambers [AIAA PAPER 70-622] 16 p2997 A70-33527

External burning fuels environmental temperature requirements from nonlinear droplet ignition model, emphasizing droplet size importance [AIAA PAPER 70-607] 16 p2997 A70-33604

Composite solid propellants burning rate and initial temperature relationship, investigating granular diffusion flame model [AIAA PAPER 70-656] 16 p2963 A70-33618

Uniform two dimensional turbulent boundary layer with hydrogen-nitrogen mixture injection and combustion at flame front, obtaining velocity distribution by kinetic energy equation 16 p2894 A70-33880

NRL research in flammability and combustion, discussing oxygen concentration effects on ignition and combustion, chemi-ion formation, etc 16 p3002 A70-33967

Pressure histories of burning modes in combustion driven shock tube using ignition of stoichiometric hydrogen-oxygen mixture with He dilution 17 p3195 A70-34922

Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire 17 p3198 A70-35646

Powdered metallic additions effect on combustion rates of ammonium perchlorate with bitumen and polymethyl methacrylate and potassium perchlorate with bitumen mixtures 18 p3299 A70-36247

High speed combustion chambers for gas turbine applications, using finite rate chemistry and turbulent mixing computer program for burner design [ASME PAPER 70-GT-25] 18 p3304 A70-36866

Soviet papers on kinetics and aerodynamics of fuel combustion processes covering supersonic flow, flame stabilization, fluid atomization, nonequilibrium recombination, etc 20 p3736 A70-39265

Combustion of decomposition products of Mg based pyrotechnic fuel in supersonic flow, obtaining heating device characteristics 20 p3736 A70-39266

Homogeneous opaque reactive solid heating and ignition by constant energy flux, examining physical and chemical parameters at critical conditions 20 p3738 A70-40078

Multicomponent fuels combustion in air, deriving simplified flame sheet model 21 p3942 A70-40881

Cool flame isothermal theory with oscillatory features accounting for damping time evolution and thermic reaction nature 21 p3942 A70-40886

Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection [AIAA PAPER 69-559] 21 p3950 A70-41728

Book on stationary flame structure, radiation and temperature covering flow visualization, burning velocity, propagation, ionization, etc 22 p4121 A70-42325

Chemical equilibrium premixed flame composition at given temperature, pressure and mixture strength, using Newton-Raphson iteration technique for simultaneous nonlinear equations 23 p4157 A70-43892

Oxygen atom catalytic recombination and flame inhibition mechanism literature survey 23 p4157 A70-44002

Combustion velocity in high pressure chamber, determining fire mechanism in overpressure environment 24 p4393 A70-45447

COMBUSTION PRODUCTS

Expansion isentropes of TNT/hexogen melts explosion products from measured shock wave parameters in Al, organic glass, foam polystyrene, argon and air 01 p0216 A70-11003

Apollo lunar module descent engine exhaust organic combustion products, estimating ion intensities of various species in all mass spectra 02 p0356 A70-12693

Copper chromite catalyst effects on sublimated ammonium perchlorate dissociation products, noting applications to solid propellants 03 p0544 A70-13923

Temperature evolution of detonation products of Na seeded propane-oxygen mixtures, observing periodic variation for helicoidal cases 03 p0608 A70-14356

Flow field between infinitely massive wall and rigid piston accelerated by detonation products, comparing analytical results to finite difference numerical integration 05 p0830 A70-15782

Jet aircraft air pollutant production and dispersion of nitric oxide and soot, discussing mixing process [AIAA PAPER 70-115] 06 p1131 A70-18070

Atmospheric contamination due to Be solid propellant exhaust products, discussing pollution levels, governmental restrictions on testing, etc [AIAA PAPER 70-117] 06 p0997 A70-18085

Preignition products from hydrazine propellants at simulated high altitude conditions using IR spectrophotometry, mass spectrometry and differential thermal analysis 07 p1358 A70-19579

Gas turbine engines contribution to air pollution, using model combustor to study burned gas composition, emphasizing nitric oxide concentration 08 p1559 A70-21481

Earth storable liquid propellants combustion products simulation by combustion of gaseous fuel and oxidizer combination, discussing elemental composition and thermodynamic considerations 08 p1557 A70-21622

Organic compounds chemical reactions during burning in laminar diffusive flames, describing technique for pyrolysis and combustion products sampling 09 p1787 A70-22107

OH, NH and amine radicals concentrations in flame gases from flat ammonia-oxygen-nitrogen flames measured as function of distance from burner surface 09 p1788 A70-22343

Oxygen-kerosene combustion product composition and characteristics in engine thermodynamic design allowing for intermolecular interaction forces 10 p1968 A70-24284

Expansion isentropes of TNT/hexogen melts explosion products from measures shock wave parameters in Al, organic glass, foam polystyrene, argon and air 10 p1960 A70-25008

Temperature and metallic contact effects on composition and structure of solid phase deposits during reactive fuel oxidation 12 p2289 A70-27493

- Detonation model, discussing combustion gases from solid explosives detonation 13 p2520 A70-28803
- Stefan-Boltzmann formula validity for flames and combustion products radiation affected by time dependence of emissivity coefficient, place and wavelength 14 p2662 A70-30179
- Particles shape and phase composition in combustion products of dispersed Al-Mg alloy powders by electron diffraction and X ray analysis 14 p2664 A70-30396
- Toxicity and downwind diffusion of Be rocket exhaust product measurements, using ADOBE experiment and AFRPL micromet meteorological data system 14 p2628 A70-30611
- Air pollution by turbojets and gas turbines, discussing control of carbon particles and nitrogen oxides 16 p2963 A70-32922
- Thermodynamic diagram indicating enthalpy and entropy of oil combustion gases for any state and air excess value 16 p2997 A70-33295
- Nonequilibrium combustion products and condensables containing reactive multiphase rocket nozzle flows and exhaust plumes characterization using generalized kinetics streamtube program [MGKS/ [AIAA PAPER 70-845]] 16 p3001 A70-33928
- Rocket chambers combustion products isotropic expansion effects within nozzle on dissociation degree, assuming shifting and frozen equilibria 16 p2963 A70-34341
- Secondary combustion products of air augmented boron loaded solid propellant rocket ramburner, measuring properties by spectroscopy 17 p3196 A70-35196
- Ni alloys with protective coatings for gas turbine blades, testing corrosion resistance in diesel fuel combustion products with intermittent salt water sprays 17 p3125 A70-35394
- Thermal fatigue cracking of gas turbine blades in fuel combustion product flow, investigating surface composition, microhardness and structure under simulated loads 19 p3490 A70-37338
- Nonequilibrium recombination in supersonic nozzle of dissociated combustion products of hydrogen in air, investigating initial system and rate constants effect 20 p3582 A70-39269
- Chemical and physical factors effect on smoke evolution from polymers 20 p3736 A70-39405
- Toxicity problems from burning or heating of polymeric materials, discussing laboratory experiments and standardized toxicity testing procedures 20 p3579 A70-39406
- Combustion products of 280-400 C oxidation of ethyl acetate, methyl propionate and i-propyl acetate 21 p3864 A70-40882
- Carbon monoxide vibrational population inversion in product molecule produced in free burning carbon disulfide/oxygen flame 21 p3950 A70-41708
- Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine 21 p3867 A70-41727
- Oxygen-kerosene fuel combustion products thermodynamic properties, tabulating computed values 21 p3865 A70-41771
- Laminar hexane diffusion flame, investigating distribution of final and intermediate combustion products 22 p4123 A70-42522
- German monograph on soot formation and separation in turbulent diffusion flame in power plant combustion chamber, noting pyrolysis role 24 p4428 A70-45087
- COMBUSTION STABILITY**
NT FLAME STABILITY
Hydrogen-oxygen variable length combustor longitudinal instability, studying hydrogen injection temperature effects on pressure interaction index and pressure sensitive time lag 01 p0214 A70-10324
- Composite propellants high pressure burning stability with various binders and oxidizers, showing ammonium perchlorate oxidized formulations susceptibility to instability 01 p0160 A70-10852
- Steady burning process equations numerical solution for boundary conditions prescribed at saddle point singularity 01 p0218 A70-11019
- Nonlinear combustion instabilities in liquid propellant rockets, considering various combustion models and experimental techniques 02 p0351 A70-12007
- Solid propellant combustion instability advances, discussing combustion flow interactions, response functions, etc 02 p0351 A70-12008
- Combustion chamber traveling oscillating shock wave as driving mechanism of high amplitude axial mode solid rocket combustion instability 02 p0353 A70-12009
- Three dimensional linear combustion instability in liquid propellant rocket motors using concentrated combustion model, presenting mathematical analysis as boundary value problem 02 p0353 A70-12011
- Combustion instability in gas turbine main combustors, noting heat release and inlet air flow rates coupling 02 p0353 A70-12012
- Combustion instability of solid propellants using response to pressure perturbations for T and L burners 02 p0352 A70-12013
- Three dimensional combustion instability in liquid-propellant rocket engines, investigating dependence on design and operating parameters via boundary value problem analysis 03 p0551 A70-13574
- Internal stability of turbulent combustion, developing analysis for one dimensional model and deriving sufficient instability criterion 03 p0607 A70-13862
- Cabin interior materials studied and tested for greater fire resistance, lower smoke and toxic gas by-products and flash fire possibility lessening 03 p0437 A70-14057
- Emulsified jet fuels combustion characteristics evaluation by laboratory technique, presenting data on emulsifiers and corrosion inhibitors effect [ASME PAPER 69-WA/GT-2] 04 p0785 A70-14893
- Rocket stability monitoring by temporal radiometry, using exhaust radiance measurement to detect frequencies in thrust chamber combustion pressure [AIAA PAPER 69-580] 04 p0737 A70-15429
- Combustion model for temperature inhomogeneities effect on stability of solid fuels steady combustion 05 p0958 A70-16960
- Combustion stability in air-liquid fuel zone of jet engine burner with burning rate controlled by droplet vaporization rate controlled mechanism [WSCI PAPER 69-44] 06 p1178 A70-17980
- Ammonium perchlorate deflagrations, determining intrinsic stability of one dimensional burning configuration based on flame structure modeling [AIAA PAPER 70-123] 06 p1128 A70-18044
- Liquid rocket motors with concentrated combustion, studying nonlinear longitudinal instabilities with shock waves in combustion chambers 07 p1362 A70-18917
- LF nonacoustic instability of solid propellant rocket motors, using combustion model allowing flame temperature oscillations with chamber pressure [AIAA PAPER 68-179] 07 p1421 A70-19319
- Solid propellant rocket engines design, considering nonlinear longitudinal combustion instability encountered in aluminumized propellants 08 p1558 A70-20623
- Turbine pump systems operation in terms of liquid rocket engine combustion stability, noting altitude effects on pressure pulsations 08 p1559 A70-21849
- Turbulent combustion stability in chamber, taking into account boundary effects due to acoustic perturbations reflection 09 p1786 A70-22106
- Ammonium perchlorate-polymer mixtures combustion rates with/without cobalt oxide additions, studying ignition temperatures of stable flameless burning 09 p1787 A70-22108
- Transient regimes of solid fuel diffusion combustion in channel with oxidizer fed in from outside, proposing finite difference scheme for integrating equations 09 p1741 A70-22114
- Book on fundamental aspects of solid propellant rockets covering nozzle flow, solid propellants performance, ignition, combustion instability, etc [AGARDGRAPH-116] 09 p1743 A70-22635
- Pressure surges originated by tangential instabilities in solid propellant motors, using double base homogeneously compounded cylindrical grains 09 p1743 A70-22661
- Propellant extinction near powder-metal contact to study nonsteady combustion mechanism 09 p1742 A70-23228
- Combustion stability effects of additives on hydrazine/nitrogen tetroxide propellant combination by measuring droplet burning rates 11 p2100 A70-26283
- Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants [AIAA PAPER 69-175] 12 p2332 A70-27804
- Spin detonation of tangential HF vibrations in liquid rocket engine combustion chambers, discussing instability prevention 13 p2474 A70-29422
- Solid fuel steady combustion regime stability dependence on heat generation in reaction zones and temperature and velocity fields inhomogeneity 13 p2522 A70-29423
- Detonation process one dimensional stability in combustible aerosol, considering gas dynamic disturbances effect 14 p2665 A70-30397
- Hybrid rocket engine with solid ammonium perchlorate oxidizer, discussing equilibrium conditions and engine performance 15 p2786 A70-32272
- Hybrid rocket motor with solid oxidizer in ammonium nitrate additive, determining stable combustion conditions 15 p2790 A70-32274
- High temperature combustion wind tunnels for investigating gas and liquid fuel combustion stabilized by shock waves in supersonic flow 16 p2996 A70-32991
- F-1 rocket engine acoustic liner, reevaluating damping data for combustion stability improvement 16 p2968 A70-33588
- LF unsteady behavior of liquid propellant rockets from droplets evaporation and combustion rates [AIAA PAPER 70-620] 16 p2968 A70-33589
- Acoustic cavities use in suppressing acoustic modes of combustion instability demonstrated on LM ascent engine [AIAA PAPER 70-618] 16 p2998 A70-33614
- Combustion instability due to narrow cavities in solid propellant engines 17 p3198 A70-35739
- Nonsteady combustion analysis, using method of flame front penetration through fine metal layer in solid propellant 18 p3300 A70-36704
- Liquid rocket combustion instability due to velocity vector effect, showing importance in longitudinal and transverse modes 20 p3689 A70-40079
- Liquid propellant rocket combustion instability, examining droplet vaporization, wake burning and chemical kinetics 20 p3689 A70-40080
- Solid rocket propellants linear and nonlinear pressure coupled combustion instability behavior relationship to exothermic surface processes 20 p3694 A70-40274
- Liquid propellant rocket engine combustion instabilities, describing unsteady combustor flow by single nonlinear wave equation with stable and unstable finite amplitude limit cycles 23 p4233 A70-44425
- COMBUSTION TEMPERATURE**
Combustion of stationary particle of metal with boiling point lower than ignition temperature in gaseous oxidizing medium 07 p1419 A70-18753
- Chemical composition effects on Zr-Ti, Zr-Si, Ni-Al and Ni-Ti alloy aerosols combustion temperature 07 p1419 A70-18755
- Steady flame propagation attainment for chemical reaction initiation in gaseous fuel by heated surface with various wall temperatures 09 p1787 A70-22115
- Powder combustion on metal plate, investigating unburned layer thickness dependence on initial temperature 17 p3198 A70-35738
- COMBUSTION VIBRATION**
Internal stability of turbulent combustion, developing analysis for one dimensional model and deriving sufficient instability criterion 03 p0607 A70-13862
- COMBUSTION WAVES**
U FLAME PROPAGATION
COMBUSTION WIND TUNNELS
High temperature combustion wind tunnels for investigating gas and liquid fuel combustion stabilized by shock waves in supersonic flow 16 p2996 A70-32991
- Combustion driven shock tunnel applied to tailored interface operating conditions, controlling mass flow into tube by throttling plates 22 p4006 A70-42765
- COMBUSTORS**
U COMBUSTION CHAMBERS
COMETS
NT HUMASON COMET
NT MOREHOUSE COMET
NT SCHWASSMANN-WACHMANN COMET
Stellar emission line spectra from comet-like nebulae, discussing stellar position instability and shell movements 01 p0174 A70-10198
- Solar wind-induced drag resulting from collisionless plasma shock on sunward-side of large magnetic comet, using similarity with earth magnetosphere 01 p0168 A70-10258
- Io and Europa mass and density anomalies, indicating asteroid capture by Jupiter as comet origin theory 01 p0182 A70-10671
- Visual observations of bright comets, deriving photometric parameters from comet head total magnitude 01 p0184 A70-10953

Comet observations analysis, tabulating total head magnitude, photometric parameters, nucleus magnitude, coma diameter, tail type and direction and magnitude correlation with solar activity

01 p0184 A70-10954

Cometary and asteroidal meteors discriminated by orbital elements in region of Jovian comet family adjoining asteroidal belt

02 p0373 A70-12371

Sudden comet brightness changes leading to discovery, tabulating and graphing comet discoveries

02 p0373 A70-12372

Interference filter for photography of comet heads, tabulating filter characteristics

02 p0303 A70-12707

Jupiter capture of comets with parabolic orbits taking into account solar gravitational influence

05 p0905 A70-15757

Photoelectric photometry of comets to obtain principal data and to classify comets by employing same filters and stellar photometric standards

06 p1140 A70-17731

Particle ejection moments from tail of comet Ikeya-Seki determined from photographs having visible terminal synchrones

06 p1140 A70-17732

Stellar light absorption in optically dense cometary atmospheres

06 p1141 A70-17738

Spatial properties of solar wind during maximum and minimum activity inferred from sodium D-line emissions for cometary nuclei

06 p1136 A70-18012

Large scale artificial plasma cloud experiments for magnetosphere, solar wind and cometary physics, discussing Ba ion and ice clouds released by satellites [AIAA PAPER 70-33]

06 p1145 A70-18183

Mass loss rates for short period comets from non-gravitational terms in equations of motion, paying particular attention to secular variations

06 p1151 A70-18490

Space probe investigation of comets, discussing feasibility, instrumentation, mission planning, etc

06 p1153 A70-18550

Single parameter photometric analysis for density distribution of matter in comets atmospheres

07 p1374 A70-18707

Classification and maximal lengths of cometary tails, investigating correlation to type, perihelion distances, absolute magnitudes and spectra

07 p1378 A70-19032

Maser coherent amplification possibility in comet atmospheres at various frequencies assuming thermodynamic nonequilibrium and nonBoltzmann populations

07 p1378 A70-19034

Particles and surface brightness distributions in nonionized cometary tails, considering near nucleus source and particle acceleration

07 p1378 A70-19035

Source power molecule lifetime, acceleration and particle velocity in region near comet nucleus determined from brightness

07 p1378 A70-19036

Recombination processes in comet atmospheres listing ion, atom and electron reactions, cross sections and resonance defects

07 p1379 A70-19037

Surface brightness distribution in comet head investigated photometrically

07 p1379 A70-19038

Dust growth, density distribution and collisions in interior of cometary head atmosphere, considering gravitational attraction to nucleus

07 p1379 A70-19039

Short wave radar tracking of comets, considering tail type criteria for signal reflection

07 p1379 A70-19040

Kilston comet 1966b brightness correlated with solar flares occurrence

07 p1379 A70-19041

Kilston Comet /1966b/ total brightness measurements, discussing integral head magnitudes, observational conditions and stars comparative magnitudes

07 p1379 A70-19042

Photometric observations of Ikeya-Seki comet 1965f by equidensity method, observing CN emission in head

07 p1379 A70-19043

Faye comet motion and secular orbital evolution of short period comets

07 p1379 A70-19048

Alfven wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface

08 p1565 A70-20567

Tungusk meteorite as comet nucleus, discussing comet structure, composition and behavior analysis

08 p1572 A70-20943

Orbit analysis of hypothetic comets formed by Jupiter surface eruptions using Lagrange origin hypothesis

08 p1573 A70-21012

Comet brightness outbursts monochromatic measurements for lifetime of parent gaseous molecules in solar radiation fields

08 p1575 A70-21373

Nongravitational effects, systematic residuals and close Jupiter approach problems in motions of comets

09 p1759 A70-22913

Photoelectric measurements of dust and CN/C2 molecular emission in atmosphere of Comet Ikeya-Seki

09 p1761 A70-23058

Comets ionized shells, studying plasma expansion in corpuscular solar wind magnetic field

10 p1940 A70-24372

Type I comet tails orientations dispersion attributed to nonradial plasma waves and discontinuities in interplanetary gas, calculating solar angular momentum loss rate

10 p1947 A70-24987

Meteor stream 11 Canis Minoris detected and associated with Comet Melish 1917, discussing true radiant and orbit

11 p2108 A70-25699

Short period hypothetical orbits distribution formed by flaring on Jovian satellites

11 p2109 A70-25925

Comet-asteroid evolutionary relationship based on Hidalgo orbital analysis

11 p2114 A70-26472

Comet model atmospheres for head theoretical spectra computation, considering collisional effects through total gas density distribution

11 p2116 A70-26647

Solar radiation effects on evaporation of dust with high latent heat of vaporization, considering particles in comets and zodiacal cloud

11 p2117 A70-26648

Ring micrometer radius determination and application to right ascension changes in determining positions of comets, planets and planetary moons

11 p2057 A70-26675

Comet tail simulation by using fast acting gas valve to produce gas cloud for interaction with plasma stream

12 p2298 A70-27190

Honda 1968c comet head light polarization measurements, noting correspondence to scattering on dust particles

12 p2300 A70-27499

Attitude control system of three axis stabilized payload for spectral survey of comet head light

13 p2505 A70-28770

Long period comets energy change due to planetary perturbations tabulated, obtaining orbital major axes before and after passage

13 p2489 A70-28906

Orionid and eta Aquarid meteor shower structure and association with comet Halley

13 p2491 A70-29044

Southern and Northern hemispheric comet observations

13 p2494 A70-29483

Spectrophotometry of comet Honda 1968c, showing free cation and radical emissions and head asymmetry

14 p2635 A70-30304

Comet Bennett 1969i photometric observations, showing blackbody-like continuum at short wavelengths with sharp peak due to silicate grains

14 p2642 A70-30895

Comet tail structures in inner coma region using photographic observations

14 p2650 A70-31220

Thermodynamic stability of methane clathrate hydrate, building up ice grains halo within comets inner coma

14 p2650 A70-31243

Gases adsorption on water snows in cometary nucleus, noting sublimation rate role as regulating mechanism in gas production

14 p2650 A70-31244

Churumov-Gerasimenko 1969h comet photographs and preliminary orbital characteristics

15 p2800 A70-32146

Alfven wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface

15 p2805 A70-32722

Tungusk meteorite as comet nucleus, discussing comet structure, composition and behavior analysis

15 p2806 A70-32755

Comet Alcock flareup on 27-29 May 1969, noting visible rays in coma, dust grains expulsion from nucleus, tail structure, etc

16 p2980 A70-34304

Periodic comet nature, origin and anomalous behavior with space mission planning implications, assuming solar plasma source and solar-interstellar interaction [AAS PAPER 70-029]

17 p3155 A70-34795

Ephemeris of periodic comet Wolf-Harrington for 1970-72 reappearance, assuming non-gravitational motion anomaly and secular acceleration

17 p3158 A70-34862

Periodic comet Slaughter-Burnham improved ephemeris for 1970-71, based on 1958-59 and 1969 orbital elements

17 p3158 A70-34863

Lyman alpha emission from Comet Bennett observed with photometer on board OGO-5 satellite

17 p3163 A70-35049

Comet Bennett 1969 visual observations in Southern Hemisphere, using photometer ocular

18 p3319 A70-37049

Surface temperature distribution over rotating nucleus of comet deficient in volatiles

18 p3319 A70-37058

Comet de Arres 1976 opportunity mission analysis, considering flyby and rendezvous trajectories and guidance problems [AIAA PAPER 70-1073]

19 p3513 A70-37426

Comet nuclei internal structure from photometric measurements, discussing gas emanation and free surface ice evaporation

19 p3514 A70-37640

Physical properties of comet heads, considering apparent diameters and internal magnitudes

19 p3514 A70-37641

Ammonium molecules dissociation and ionization in comet atmospheres due to solar corpuscular and photon radiation

19 p3514 A70-37642

Fine structure of solar radiation-induced electrostatic fields on dielectric surface of comets and meteoroids

19 p3514 A70-37656

Photoelectric and polarimetric observations of comet 1968 c Honda in BV system, noting dust scattering role in emission

19 p3515 A70-37657

Triple polarization astrophotograph observations of comet 1968 c Honda, noting dust component-Wolf number agreement

19 p3515 A70-37658

Lunar and planetary laboratory communications, Volume 8 covering IR astronomy, Mercury, Mars, Uranus, comets, etc

19 p3515 A70-37929

Bester comet 1946k-1947l orbit, showing original and future orbits as long period ellipses

19 p3515 A70-37931

Burnham-Slaughter 1958e-1959l comet orbit, showing nearly parabolic ellipse

19 p3516 A70-37933

Comet shapes mechanical theory inverse problem approximate solution

19 p3525 A70-38773

Comet brightness curves asymmetry with respect to perigee attributed to pre- and post-heating

19 p3526 A70-38781

Atomic hydrogen population distribution in far UV of comets

19 p3526 A70-38782

Photometric cometary parameters from Van Biesbroeck data, using least squares method to compare naked eye, field glasses and small telescope observations

19 p3526 A70-38783

Kylston comet head diameter relation to brightness from photometric observations using north polar sequence stars as reference, noting camera, equipment and exposure times

19 p3526 A70-38784

Comet Ikeya-Seki 1965 f tail formed by dust particles continuous ejection, using preperihelion photographs

19 p3527 A70-38792

Future spacecraft mission for short period comets rendezvous, considering trajectory requirements and launch vehicle payload capabilities [AIAA PAPER 70-1072]

19 p3530 A70-38885

Jupiter swingby trajectory analysis for comet flyby and rendezvous missions, discussing approach velocity and payloads [AIAA PAPER 70-1074]

19 p3530 A70-38886

Ikeya-Seki /1967n/, Thomas /1968b/ and Honda /1968c/ comet photoelectric spectrum examining swan bands, continuum and reflected scattered light

20 p3703 A70-39024

Upper atmosphere ammonia release experiments testing hypothetical mechanisms of radicals and ions formation in comets

20 p3708 A70-39962

Microwave transitions for molecules in comets and interstellar space

21 p3887 A70-41110

Comet Bennett basic characteristics, discussing orbits, periods and observational summaries of other comets

21 p3890 A70-41164

Small craters number density in southern lunar highlands, supporting Tycho Association cometary impact origin

21 p3920 A70-41882

Radio search for formaldehyde rotational transition and H 109 alpha recombination line in comet Bennett during perihelion passage

21 p3921 A70-41976

- Comet Bennett /1969 i/ spectrograms, discussing linear diameter, trajectory, Lyman alpha emission and hydrogen mass 22 p4097 A70-42468
- Jupiter perturbations on short period comets during close approaches, discussing orbital distribution 23 p4241 A70-44252
- Minor planets, comets and natural satellites positions and motions, discussing orbit and ephemerides calculation, Icarus asteroid, etc 23 p4256 A70-45038
- Orbital elements from secular acceleration in motion assumption, proving Comet Harrington identity with Comet Wolf 23 p4257 A70-45045
- Short period hypothetical and real comets in Jupiter sphere of influence distributed according to orbital elements 24 p4409 A70-45637
- COMFORT**
- Comfort plane switch mounting design for helicopter collective controls, noting mock-up evaluation by test pilots 19 p3372 A70-38922
- COMMAND AND CONTROL**
- Analytic guidance and control for minimum fuel expenditure and optimal guidance corrections for low thrust vehicle in Martian orbit [AIAA PAPER 68-862] 04 p0716 A70-15544
- VTOL flight investigation to develop decelerating instrument approach capability with control-command information display for three degrees of freedom [SAE PAPER 690693] 05 p0792 A70-15862
- Displays for command and control centers - NATO/AGARD Conference, Munich, November 1966 05 p0826 A70-16176
- Command control systems characterized as problem solving information processing systems, discussing information requirements specification prior to man-display design 05 p0806 A70-16177
- Command and control display operational requirements within Allied Command Europe (ACE), information flow, decision making and evaluation 05 p0959 A70-16178
- Command and control functions of DOD Manager for Manned Space Flight Support Operations in spacecraft recovery 05 p0827 A70-16180
- BR-90 visual analysis control as flexible and versatile display for command and control, discussing on-line data processing, maintenance, etc 05 p0827 A70-16182
- CRT display design for command and control with digital symbol and vector generation 05 p0817 A70-16184
- Computer generated displays and USAF equipment design for operational command and control systems, discussing Ag halide film technique 05 p0847 A70-16185
- Radar and sonar data processing for display in command and control systems using digital technique, discussing processor configuration 05 p0828 A70-16189
- Large wall display system for USAF command and control with central computer and seven color projector, discussing hardware and operational features 05 p0828 A70-16193
- Display/control system and key technical decisions at Manned Space Mission Control Center, discussing command consoles 05 p0829 A70-16194
- Machinery for management of Sea Dart missile development using managerial concepts of planning, organizing, commanding, coordinating and controlling 08 p1601 A70-21036
- Satellite Integrated Communications, Navigation and Identification System for implementing worldwide command-control system and equipment and signal integration [AIAA PAPER 70-503] 11 p2000 A70-25466
- Pilot leadership qualities as criteria for selection, examining command training 11 p1993 A70-26607
- Intermittent positive control system for issuing commands to normally uncontrolled aircraft for midair collision avoidance, discussing aircraft and conflict detection 12 p2267 A70-27634
- Intermittent positive control (IPC) role in midair collision avoidance, using mathematical model to determine command frequency and implementation 12 p2269 A70-27913
- Remote signal measurement and analysis in hazardous environment by command terminal utilizing manual or computerized control 12 p2201 A70-28134
- Signal decoder for barium USA Germany (BUG)/project command reception system, discussing Ba ion cloud propagation and expansion along geomagnetic field 13 p2367 A70-29557

- Digital signals conversion into command and control TV displays in multiconsole systems 13 p2411 A70-29789
- Intelsat IV command and control system, describing ground stations, control center, telemetry data handling and acquisition, etc 17 p3046 A70-35275
- Ground and cockpit initiated collision avoidance commands system based on satellites surveillance of aircraft position and velocity data 19 p3466 A70-38242
- PCM command control system for high altitude ballooning operations, discussing component equipment 20 p3587 A70-40085
- UpSTAGE interceptor missile flight control system, discussing command logic to capitalize on lifting body advantages to enhance roll maneuver 21 p3927 A70-40782
- COMMAND GUIDANCE**
- Pseudonoise code command system for scientific satellite, describing added bits and decoder 17 p3046 A70-35276
- COMMAND MODULES**
- Nondestructive testing for Apollo Command and Service Module, describing requirements added to quality control scope 01 p0098 A70-10026
- Apollo spacecraft hardware, command, service and lunar modules, discussing design factors and tests contributing to spacecraft reliability [AIAA PAPER 69-1095] 01 p0194 A70-10618
- Materials selection and Apollo command module atmosphere design considerations, discussing fire extinguisher system, equipment design changes, etc 03 p0437 A70-14058
- Spacecraft telecommunication and tracking systems in Gemini, Mercury and Apollo programs, emphasizing Apollo command and lunar modules equipment and mission ground stations 05 p0813 A70-16326
- Shock tunnel preflight assessment of Apollo Block 2 command module base heating 07 p1394 A70-19722
- Fuel cell assemblies as primary electrical source for Apollo command and service modules, discussing heat removal, water vapor control and transient performance 08 p1439 A70-20702
- Apollo mission simulation, discussing Command Module Simulator (CMS), onboard computer system and dynamic visual presentation via infinity-optics display [SMPTE PAPER 105-74] 09 p1655 A70-22226
- Apollo command and service modules from metallurgical viewpoint 09 p1766 A70-22792
- Apollo Command Module inverter experience for post-Apollo spacecraft applications, discussing phase loads and control logic circuits 12 p2165 A70-27693
- Apollo command and service modules environmental control system, discussing redesign of faulty hardware [SAE PAPER 690618] 12 p2167 A70-27948
- NDT techniques in manufacturing of Apollo command and service modules 13 p2420 A70-29243
- Side access hatch system for Apollo command module 16 p2986 A70-34153
- Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts 17 p3040 A70-35645
- Command module simulators for Apollo astronaut training in moon landing, using computer, exterior visual scenes and spacecraft interior replica 21 p3804 A70-41195
- Apollo command module land impact capability, discussing impact dynamics, possible landing area, spacecraft structure, crew couch and strut attenuation system, etc [AIAA PAPER 70-1165] 21 p3930 A70-41847
- COMMAND SERVICE MODULES**
- Nondestructive testing of Apollo CSM /Command and Service Module/ spacecraft ordnance explosive devices by indirect and direct neutron radiography 03 p0494 A70-14123
- Apollo Command and Service Modules for lunar orbital science missions, discussing spacecraft-experiment integration 21 p3928 A70-40978
- COMMAND SYSTEMS**
- U COMMAND GUIDANCE**

- Data analysis of inertial systems for commercial aircraft overseas operations, classifying systems error propagation as linear time drift or Foucault period oscillation 01 p0137 A70-10314
- Aeronautical satellites for monitoring positions of many commercial aircraft simultaneously crossing North Atlantic, discussing navigational error correction and atmospheres 01 p0178 A70-10454
- Soviet book on operational maintenance of flight vehicles /civilian/, emphasizing maintenance under various climatic conditions 01 p0004 A70-10502
- Economic tradeoffs in airport and commercial aircraft design, considering traffic growth, increased weight impact minimization and costs [AIAA PAPER 69-1087] 01 p0056 A70-10623
- Commercial aircraft design, considering structural allowables effect on economics, using shear web analysis program as example 02 p0225 A70-11947
- Air traffic problems connected with Boeing 747 introduction, discussing cargo/passenger handling, fueling and maintenance procedures 02 p0227 A70-12620
- Computerized airline fleet planning methods for aircraft economics and airline operations [SAE PAPER 690415] 03 p0609 A70-12898
- Flexible pavements for commercial jet planes representative of current and future aircraft 03 p0462 A70-13173
- Turbine noise significance in civil aircraft noise problem [ASME PAPER 69-WA/GT-12] 04 p0734 A70-14884
- Emergency auxiliary hydraulic and electric power for commercial and military aircraft control, proposing self contained monofueled turbine system [SAE PAPER 690658] 05 p0797 A70-15838
- Design safety requirement and philosophy differences distinguishing commercial from military aircraft programs 05 p0792 A70-15855
- British military and civilian aircraft and flying between World War I and II, discussing weapons systems and accidents 05 p0794 A70-16113
- Commercial navigation systems for long range subsonic transports, discussing accuracy, avionics hardware and crew responsibility optimization 06 p1102 A70-17638
- Emergency in-flight evacuation concepts adapted from military experience considered for application to commercial aircraft 06 p0986 A70-17722
- Filamentary composite materials for commercial aircraft and engine construction noting boron, graphite and glass reinforcement 07 p1316 A70-18950
- V/STOL demand for short haul business travel noting time savings, convenient approach, safety records, weather reliability and comfort 07 p1428 A70-19680
- V/STOL concepts for short haul commercial aircraft compared for gross weight, operating cost, gust sensitivity and noise levels [AIAA PAPER 67-938] 07 p1195 A70-20409
- Signal properties of VHF satellite-to-aircraft communications link, discussing results of ATS tests 08 p1463 A70-21779
- Aerodynamics role in large commercial aircraft design, noting mathematics models problem in high speed wing design 09 p1609 A70-22024
- Commercial aircraft inertial navigation, examining gyroscope, accelerometer and electronic computer and gyroscopic stabilization 10 p1914 A70-23848
- Commercial aviation safety on basis of aircraft accidents relationship to distance covered, considering clear air turbulence and cosmic radiation dangers 10 p1804 A70-24050
- VFW 614 nose-contoured cockpit panes, discussing structural weight and strength, vision and window frame fabrication 10 p1806 A70-24866
- Light aircraft-airliner collision avoidance, discussing Time-Frequency Collision Avoidance System cost restriction, Pilot Warning Instruments, etc 11 p2079 A70-25872
- Gas turbine engine technology for military and commercial aircraft, discussing operations economy, design matching to missions and fabrication methods 11 p2101 A70-25873

Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and interplot speech interference
11 p1991 A70-26275

Commercial jet passenger emergency oxygen needs for cabin decompression studied in determining time of safe unconsciousness
11 p1992 A70-26511

Aircraft turbofan and turbojet engines military-commercial interrelationships
[SAE PAPER 700268] 12 p2290 A70-27436

Rigid wing subsonic and supersonic civil and military aircraft utilizing aerodynamic lift at takeoff and landing
13 p2344 A70-28543

Commercial aircraft manufacturing industry in UK, discussing SST, wide cabin aircraft, turboprop replacement, engine influence on airframe industry, etc
14 p2668 A70-30936

Civil aircraft design optimization, considering operating and seat mile costs, speed, wing and fuselage, engine location, etc
14 p2531 A70-30941

BAC 111 commercial aircraft family development, discussing program management
14 p2532 A70-31334

British light aircraft designs, engines and costs, considering business, agricultural, gliding, private, school and club flying
14 p2532 A70-31394

High energy chemical systems for postcrash emergency evacuation of commercial passenger aircraft, discussing exit opening via explosive methods
15 p2675 A70-32221

Emergency auxiliary electric and/or hydraulic power for commercial and military aircraft using self contained monofueled gas turbine system
16 p2964 A70-33472

Emergency auxiliary hydraulic and electric power for commercial and military aircraft control, proposing self contained monofueled turbine system
[AIAA PAPER 70-651] 16 p2970 A70-33616

Equipment and subsystems application to flight management avionics in military and commercial aircraft, noting role of ground-air information transfer
16 p2878 A70-33724

Book on air safety and commercial aviation accidents
16 p2842 A70-33964

Investment risks and technical impact on aircraft development, world aviation growth and airline costs
17 p3200 A70-34915

Airborne data acquisition and flight recorder systems, comparing civil and military aircraft requirements
17 p3094 A70-35515

Wide body commercial jet transport structural design considerations applied to DC 10 aircraft
[AIAA PAPER 70-895] 17 p3193 A70-35812

Commercial air transport mission payload and range capability analysis, noting on-line flight planning computers
[AIAA PAPER 70-899] 17 p3204 A70-35815

Integrated flight management system for commercial aircraft pilot using computer
[AIAA PAPER 70-908] 17 p3134 A70-35820

Commercial aircraft flight deck systems controls and time sharing displays, emphasizing crew management
[AIAA PAPER 70-938] 17 p3021 A70-35847

Heat-up display (HUD) system, discussing development, production, commercial aircraft applications and flight sequences uses
18 p3223 A70-36210

Commercial aircraft strapdown inertial navigation systems, examining initial self alignment techniques
18 p3289 A70-36442

High speed civil and commercial transport aircraft, discussing jet-orbital flight
18 p3333 A70-36664

Military and commercial transports turbofan propulsion systems impact on future aircraft design and development
[SAE PAPER 700267] 18 p3214 A70-36820

Military and commercial aircraft maintenance costs reduction, discussing labor/material ratio, spare parts use, diagnostic systems, etc
21 p3749 A70-40750

Commercial transport aircraft fatigue loading data from NASA VGH /airspeed-acceleration-altitude-program, discussing instrumentation, sample sizes, etc
23 p4270 A70-44548

Hybrid fluidic damper control for yaw axis stability augmentation of commercial jet aircraft
[SAE PAPER 700794] 24 p4294 A70-45853

Commercial STOL aircraft propulsion systems from airline viewpoint, emphasizing subsystem design, engine selection, thrust deterioration and maintainability
[SAE PAPER 700810] 24 p4395 A70-45904

Military helicopter test program application to commercial VTOL operations, discussing military-civil design and development relationships
[AIAA PAPER 70-1242] 24 p4292 A70-46327

COMMERCIAL AVIATION
U CIVIL AVIATION
U COMMERCIAL AIRCRAFT
COMMUNITION
NT GRINDING [COMMINUTION]
COMMITTEE ON SPACE RESEARCH
COSPAS report on UK space research /1969/ covering neutral atmosphere, ionosphere, solar radiation, etc

COMMUNICATING
NT AIRCRAFT COMMUNICATION
NT ELECTROCUTANEOUS COMMUNICATION
NT GROUND-AIR-GROUND COMMUNICATIONS
NT INFORMATION DISSEMINATION
NT INTERSTELLAR COMMUNICATION
NT POINT TO POINT COMMUNICATIONS
NT VERBAL COMMUNICATION
Human communication in pilots and in maintenance and administrative personnel, noting time factor influence
04 p0644 A70-14985

Information transfer for quantitative relationships to error- and cause-controlled regulations
07 p1216 A70-18859

R and D idea flow studies, analyzing liaison, interface, coupling and technology transfer /LINCOTT/
09 p1794 A70-23410

Computer aided on-line test generation for prelaunch checkout, describing interpretive test language for rapid man machine information transfer
[AIAA PAPER 70-384] 10 p1846 A70-24921

Information transfer services potential demand including telephone, telegraph, videophone, electronic mail, etc
[AIAA PAPER 70-443] 11 p2152 A70-25448

Amino acids L-glutamate and gamma-aminobutyric acid as communication agents in brain
23 p4148 A70-44864

COMMUNICATION CABLES
NT BEAM WAVEGUIDES
NT COAXIAL CABLES
NT PLASMA GUIDES
NT WAVEGUIDES
Boeing 747 airliner passenger entertainment and service electronics multiplexing system, discussing cable and connectors selection and design
23 p4174 A70-44544

Commercial satellite system circuit quality and reliability in digital communications, considering Automatic Digital Network Trans-Pac cable cut incident
24 p4311 A70-45223

COMMUNICATION EQUIPMENT
NT CLOSED CIRCUIT TELEVISION
NT RADIO RECEIVERS
NT SATELLITE TELEVISION
NT SPACECRAFT TELEVISION
NT SUPERHETERODYNE RECEIVERS
NT TRANSMITTER RECEIVERS
NT WHISTLER RECORDERS
Airborne DME minimum operational characteristics for air traffic control navigation and communication systems including equipment specifications, environmental conditions, accuracy and range
[DO-141] 01 p0138 A70-11050

Airborne SHF communication system for operation with passive satellites installed in C-121 aircraft
01 p0045 A70-11122

Digital onboard telecommunications and tracking equipment based on Dioscures two satellite system for L band operation
03 p0442 A70-12990

Transmission equipment of Pleumeur-Bodou space communication installation including modulators, converters and amplifiers for telephone and TV carriers
05 p0819 A70-15986

Three frequency heterodyne system for acquisition and tracking of radar and communications signals, noting applicability in optical and microwave ranges
06 p1010 A70-17948

Radio propagation characteristics and communication system performance, discussing concepts of MUF, LUF, error rate, communication system modeling, prediction techniques, etc
07 p1229 A70-19157

Monolithic, thick film, thin film and multichip integrated circuit techniques applied to communication equipment design
08 p1471 A70-20785

Intersite trunk elements design and usage in integrated mission control center /IMCC/ as interface equipment between internal voice communication and worldwide network
08 p1460 A70-20814

Microwave IC-compatible resonators for communication systems filters, comparing microstrips, disks, waveguide cavities and dielectric-loaded cavities
10 p1852 A70-24892

Computerized data communication system /CDCS/ equipment unit capacities and topology specified with aid of vertex weighted linear graph
11 p2009 A70-26253

COMMUNICATION SATELLITES

Nonlinear phase locked loops compared with linear loops in communication and navigation, considering interference vulnerability
12 p2187 A70-27909

Digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device. [AIAA PAPER 69-988] 14 p2615 A70-30771

Service multiplex for communications network via satellite, discussing reliability
18 p3229 A70-36667

Magnetic bubbles in miniaturized electronic circuits, discussing fabrication and uses in communication and computers
19 p3484 A70-37574

Coherent receiver as hybrid carrier tracking loop consisting of standard phase locked and modified Costas loop
21 p3802 A70-41351

COMMUNICATION SATELLITES
NT EARLY BIRD SATELLITES
NT INTEL SAT SATELLITES
NT MOLNIYA SATELLITES
NT SYNCOM SATELLITES
Delta boosted electrically raised high power synchronous satellite for communication tasks
[AIAA PAPER 69-1104] 01 p0194 A70-10617

Communication satellite system proposed for small users, assessing viability based on market saturation points estimation
[AIAA PAPER 69-1073] 01 p0043 A70-10629

Dual frequency ranging within narrow bandwidth of VHF communications satellite repeater for transmitted signals correction of ionospheric refraction error
01 p0043 A70-10781

TV broadcast satellite system operating with home receivers or special receivers, evaluating technological and cost factors
[AIAA PAPER 68-1061] 01 p0044 A70-10831

Airborne SHF communication system for operation with passive satellites installed in C-121 aircraft
01 p0045 A70-11122

Satellite mounted mm wave parabolic dish antenna for tracking communication satellite in synchronous orbit
02 p0392 A70-11933

Structural qualification testing of experimental tactical communication satellite /TAC COM SAT/
02 p0274 A70-11936

Continuous and pulsed parameter stabilization for circular orbits of navigation and communication satellites under perturbing effects of oblateness and atmospheric drag
02 p0374 A70-12402

Remote data processing and wideband data transmission between France and U.S. via telecommunication satellites, discussing error detection and correction
02 p0263 A70-12612

Future phase of satellite TV programs distribution in Europe
02 p0403 A70-12645

Operational requirements of shipping for satellite communication systems, discussing distress cases, satellite navigation systems, information distribution traffic control, etc
03 p0522 A70-13605

Low altitude 24-hr orbit twin satellite system joined by long light cord, assessing communications efficiency and physical limitations
03 p0579 A70-13621

German-French communication satellite project Symphonie for radio, TV, telephone, teletype and data transmission, discussing objectives, organization and technical problems
[DVL-910] 03 p0580 A70-13796

Directional transponders for telemetry command, tracking and communications in retrodirective communication satellites
03 p0457 A70-13838

Intelsat communications /1963-1969/, discussing boosters, satellites, system characteristics and ground stations
03 p0451 A70-13840

Experimental Washington Agreement /1964/ governing international juridical rules and regulations regarding telecommunication satellites
03 p0609 A70-13853

Channels demand assignment between earth terminals of international satellite communication systems, examining multiple access problems
03 p0453 A70-14323

Orbit mechanical investigations for increasing Europa 2 booster rocket payload to place German-French communications satellite Symphonie into 24 hr orbit
04 p0754 A70-15153

Mission objectives and technical realization of AZUR research satellite and Symphonie communication satellite
04 p0763 A70-15303

Solar powered communications spacecraft weight, electrical power and communication capacity models for optimizing size and launch vehicle fractionation
04 p0763 A70-15347

Hybrid system for allocating domestic synchronous communication satellites in concentric circles within inclined elliptical synchronous orbits

05 p0906 A70-15801

Satellite communications influence on ground stations design, describing steerable antenna and receive and transmit configurations for domestic station

05 p0811 A70-16095

Satellite relay systems to provide polarization discrimination in antenna main beam to double spectrum for communications

05 p0815 A70-16661

Electric thrusters for putting communications satellite into synchronous orbit analyzed for mission performance, finding hydrogen resistojets as attractive compromise between payload and transfer time

05 p0897 A70-16899

Domestic telecommunication via satellite to reduce terrestrial switching to two levels, discussing system parameters, operation, hardware and cost estimate

06 p1006 A70-17344

Broad beam Tracking Data Relay Satellite (TDRS) for manned and automated spacecraft using VHF bands

06 p1006 A70-17345

Wideband transmission of photographic reconnaissance information over long distances using Initial Defense Communication Satellite Program satellites

06 p1006 A70-17346

Multiple access channel control system operating in variable destination multiple access mode for application in PCM-TDMA satellite communication system

06 p1011 A70-18412

Flywheel stabilization for communication satellites, considering stabilization by reaction wheels, gyros, gas jets, etc

[DGLR-69-058]

07 p1392 A70-18817

Space systems for communications, surveillance and navigation needs of international aviation, discussing service requirements, spectrum utilization, technology limitations and terminal design

07 p1330 A70-19290

Spot III satellite-supported system for transoceanic aircraft navigation, traffic control, voice and data communication, etc

07 p1331 A70-19291

Communication satellite transponders design, cost, reliability, manufacturing, testing and future developments

07 p1241 A70-19620

Optimal distance between satellite communication system ground stations for surface network cost equivalent, analyzing economic efficiency for various cases

08 p1456 A70-20569

Noise mean duration in surface communications links due to communications satellites interference, discussing irradiation emission and termination

08 p1456 A70-20570

Modem selection for satellite communications system, considering bandwidth and power constraints, propagation characteristics, point-to-multipoint operation, etc

08 p1459 A70-20807

Operational figure of merit of high performance antennas in communication satellite earth stations as function of design

08 p1471 A70-20825

Book on navigation and communication satellites for military uses, considering design, operation, computers role, etc

08 p1582 A70-21298

Omega Position Location Experiment with synchronous satellite (ATS-3) as radio relay for merchant shipping, air traffic control and moving vehicle location and communication

09 p1720 A70-22193

Communications satellite technology for earth resources data collection

09 p1634 A70-22857

ARCOM earth terminal for Domestic Satellite Communication System bringing telephone, TV and data service to northern Canada

09 p1656 A70-22945

Digital satellite communication - Conference, London, November 1969

10 p1833 A70-24326

Digital record message communication satellite network system involving synchronous satellites and small earth terminals

10 p1834 A70-24327

Worldwide telephone network optimum interoperation including communication satellites complementation

10 p1834 A70-24328

Satellite communication system using delta modulation for telephone service to large number single channel earth stations

10 p1834 A70-24329

PCM-TDMA satellite communication system for maximum time slot utility without guard time slots

10 p1834 A70-24330

Digital satellite communication system using multiphase modulation optimized for phase positions number to maximize transmission capacity

10 p1835 A70-24334

Communication satellite PSK modulator-demodulator /modem/ implementation requirements and design for optimal performance

10 p1835 A70-24336

Geostationary orbit capacity based on multichannel technology, comparing digital and analog modulation techniques

10 p1836 A70-24343

Communication commercial satellite systems capacity in terms of telephone channels, using frequency modulation and digital methods

10 p1836 A70-24344

Interference problems arising during digital satellite communications, discussing PCM telephone system and PSK modulation

10 p1836 A70-24345

Multiple access PCM satellite communication system with minimum interference to earth radio links, using programmable switch for improved traffic handling and frequency coordination

10 p1837 A70-24346

Signaling system for communication satellites demand assignment, considering error control, unit negative acknowledgement, system parameters selection, control signals, etc

10 p1837 A70-24347

Demand assignment signaling and switching subsystems /DASS/ design for communication satellite, examining voice channels modulation

10 p1837 A70-24348

Transmission performance of telephone calls routed through PCM satellite circuit between London and White Plains

10 p1837 A70-24349

DASS operational parameters and performance in SPADE satellite voice communication system

10 p1837 A70-24350

Demand assignment techniques applicability to TDMA satellite communication systems, discussing operational modes and optimum mode selection

10 p1837 A70-24351

PCM-TDMA satellite communication systems operation modes and applicability, considering efficient circuit utility, equipment cost and control complexity

10 p1837 A70-24352

Time division multiple access /TDMA/ system for Symphonic communication satellite using PCM phase shift keyed RF carrier

10 p1837 A70-24353

FDMA and TDMA systems for demand assignment of satellite circuits noting PCM/TDM operation trends in satellite and ground communications

10 p1838 A70-24355

Traffic simulation in telephone network via communication satellite with presassigned and demand assigned circuits

10 p1838 A70-24356

Demand assignment /DAMA/ and preassignment /PAMA/ Multiple Access Systems mix for cost minimization, developing algorithm for satellite high usage groups and overflow facilities

10 p1838 A70-24357

Adaptive multiple access satellite communication system at millimeter wavelengths in time- and frequency-division modes, compensating rainfall attenuation

10 p1838 A70-24358

Multiple access technique for millimeter wave satellite communications, noting weight and size of on-board equipment

10 p1838 A70-24359

Intermeshed TDMA systems efficiency in interconnecting ground stations in communications satellite systems, discussing rigid and variable burst lengths

10 p1839 A70-24363

Message traffic problems in satellite telephone network, considering traffic distribution characteristics, interarrival mean time, bidirectional traffic, etc

10 p1839 A70-24367

Bit clock synchronous system for communications satellites TDMA

10 p1839 A70-24368

Satellite relayed integrated digital multiple access systems, discussing traffic handling, satellite positioning, demand assignment, etc

10 p1839 A70-24369

Time allocation with sampling interpolation /ATIC/ for TDMA satellite telephone communications, considering auxiliary circuits, transmission quality, bit rates, demand assignment, etc

10 p1840 A70-24370

Soviet book on satellite communication systems for telephone and TV transmission covering orbit selection, signal level calculation, channel characteristics for frequency bands, etc

10 p1840 A70-24378

European space and communication satellite programs priority considerations, noting operational hardware

10 p1970 A70-24568

TDMA communication satellite system compared favorably with FDMA or CDMA systems in efficiency, flexibility and feasibility for commercial and military uses

10 p1842 A70-24884

Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number

11 p1995 A70-25345

Franco-German telecommunication satellite Symphonic mission objectives and system design [AIAA PAPER 70-406]

11 p1996 A70-25401

Canadian geostationary satellite communication system design and performance, discussing transponder with six RF channels [AIAA PAPER 70-429]

11 p1996 A70-25402

Satellite capacity utilization for mixed earth stations network using SPADE concept/digital satellite communication system employing demand-assignment and voice-activated carrier techniques

[AIAA PAPER 70-420]

11 p1996 A70-25404

Geostationary satellite communication bandwidth increase by reusing same frequency band in multiple independent earthward beams, discussing modulation and interference noise allocation effects

[AIAA PAPER 70-442]

11 p1996 A70-25405

Traveling wave tube amplifier performance in numerous orbiting communication satellites, emphasizing life test data

[AIAA PAPER 70-507]

11 p2015 A70-25406

Signal attenuation and bandwidth limitations imposed by atmospheric hydrometeors on communications satellite systems above 10 GHz, discussing Comsat measurement programs [AIAA PAPER 70-500]

11 p1997 A70-25408

Satellite distribution of TV signal over earth surface as alternative to terrestrial linkups, overcoming rain attenuation by high power spot beam

[AIAA PAPER 70-454]

11 p1997 A70-25410

Radiation environmental model of synchronous communication satellite solar cell degradation by particle fluxes

[AIAA PAPER 70-481]

11 p2103 A70-25411

Report on 1969 London International Conference on digital satellite communication session on operational requirements covering circuit operation modes, demand-assignment control, etc

[AIAA PAPER 70-466]

11 p1997 A70-25412

Canadian domestic satellite communications policy, discussing Telesat Canada for commercial telecommunications services

[AIAA PAPER 70-428]

11 p2152 A70-25416

TV network distribution in Canada by communications satellite and terrestrial microwave links, discussing signal to noise ratios and picture quality

[AIAA PAPER 70-430]

11 p1998 A70-25417

Communication satellites geostationary orbit sharing problem, considering system design and utilization criteria

[AIAA PAPER 70-441]

11 p1998 A70-25419

UK UHF telemetry command station capabilities for Skynet satellites control, discussing equipment

[AIAA PAPER 70-415]

11 p2030 A70-25420

Attitude stabilization of synchronous communications satellites employing multiple narrow beam antennas

[AIAA PAPER 70-457]

11 p2119 A70-25422

Commercial communication satellite earth station technology and operations covering frequency allocations, antennas, orbits, etc

[AIAA PAPER 70-421]

11 p1998 A70-25424

Communication satellite repeater design requirements to achieve adequate SNR for varying rain and cloud attenuation

[AIAA PAPER 70-498]

11 p1998 A70-25425

Communication satellite technology impacts on potential socio-economic developments of emerging nations of Asia, Africa and South America

[AIAA PAPER 70-473]

11 p2152 A70-25426

Communications and attitude control on Phase 2 satellite for Defense Satellite Communication System

[AIAA PAPER 70-493]

11 p1998 A70-25427

Orbit utilization, discussing sharing of satellite communication frequency bands and use of multiple earthward antenna beams

[AIAA PAPER 70-468]

11 p1999 A70-25428

Three axis attitude control of earth oriented non-spinning synchronous communications satellite, using gimbal-mounted momentum wheel and pulsed plasma thrusters

[AIAA PAPER 70-456]

11 p2119 A70-25431

Power sources, transfer and conditioning subsystems design, fabrication and testing for high power communication satellites

[AIAA PAPER 70-433]

11 p2120 A70-25438

Temperature control of USAF tactical communications satellite /TACSAT/ by passive techniques

[AIAA PAPER 70-461]

11 p2120 A70-25441

Italian SIRIO SHF experiment for study of atmospheric effects on satellite link, discussing system design and performance

[AIAA PAPER 70-502]

11 p1999 A70-25442

Air transportation and air traffic control factors relating to satellites applications to surveillance, navigation and communication over contiguous U.S.

[AIAA PAPER 70-488]

11 p2077 A70-25443

Satellite communications subsystem performance testing from initial integration through launch under all environmental exposure
[AIAA PAPER 70-448] 11 p2030 A70-25445

TACSAT 1 communication satellite design, dual-spin stabilization principles and dynamic characteristics, noting nutation behavior
[AIAA PAPER 70-455] 11 p2120 A70-25447

Initial Defense Communication Satellite Program/augmentation satellite design and mission, on-board communications equipment, control subsystems, American-British cooperation, etc
[AIAA PAPER 70-492] 11 p2121 A70-25449

Titan 3 launch vehicles capabilities communication satellites deployment modes, presenting cost and availability data for preliminary mission planning
[AIAA PAPER 70-482] 11 p2121 A70-25451

Step-Track automatic angle tracking technique for communication satellites, seeking peak of antenna single beam
[AIAA PAPER 70-416] 11 p1999 A70-25454

Channel separation in RF transponder for communication satellite achieved with RF multiplexers consisting of microwave filters and combiners with superior electrical performance
[AIAA PAPER 70-509] 11 p2016 A70-25457

Multiple feed waveguide lens in variable coverage communications antenna for geostationary LES-7 satellite
[AIAA PAPER 70-423] 11 p2016 A70-25461

Instructional communication system for U.S. using synchronous satellites over 15 regions
[AIAA PAPER 70-450] 11 p2000 A70-25465

Satellite Integrated Communications, Navigation and Identification System for implementing worldwide command-control system and equipment and signal integration
[AIAA PAPER 70-503] 11 p2000 A70-25466

Electric propulsion system selection for Lockheed Communications Satellite (LCS) based on weight, development status and complexity considerations, discussing optimization procedure
[AIAA PAPER 70-478] 11 p2101 A70-25470

Despin ball bearing assemblies performance data for TACSAT and Intelsat 4, discussing technology needed for accelerated testing, higher precision, failure detection and lubricants
[AIAA PAPER 70-459] 11 p2058 A70-25471

Communications satellite for Alaska and Mountain States TV defined using computerized synthesis program
[AIAA PAPER 70-453] 11 p2001 A70-25473

Wideband transmission media for global communication networks, comparing submarine cables and satellites based on economic tradeoff in terms of circuit density and distance
[AIAA PAPER 70-444] 11 p2001 A70-25475

Product oriented cost data bank for satellite system cost prediction and negotiation designed for USAF communications satellite program
[AIAA PAPER 70-445] 11 p2152 A70-25477

Global commercial communications satellite system arrangements, considering evolutionary political, economic and technological developments within INTELSAT context
[AIAA PAPER 70-446] 11 p2152 A70-25478

Communications satellite systems for developing nations, considering educational TV, economic growth, cost estimates, etc
[AIAA PAPER 70-475] 11 p2152 A70-25479

X band mechanically despun antenna system with RF and motor drive assembly developed for earth coverage communications satellite
[AIAA PAPER 70-422] 11 p2001 A70-25481

Multiple channel communication satellite interchannel interference including preamplifier intermodulation, direct interference, multipath amplification, crosstalk and multiplexer reflections considered for capacity maximization
[AIAA PAPER 70-508] 11 p2002 A70-25483

Horizon sensor design with null operating capabilities for synchronous orbit 3-axis stabilized communication satellites, discussing operation and testing
[AIAA PAPER 70-476] 11 p2121 A70-25484

Low noise wideband uncooled preamplifier for small unattended satellite communication terminals, discussing theory, design and performance
[AIAA PAPER 70-419] 11 p2016 A70-25485

VHF aeronautical communication satellites extended for use in aircraft position determination and surveillance, discussing accuracy and error source reduction
[AIAA PAPER 70-490] 11 p2002 A70-25487

Digital techniques application to military communication satellite systems, discussing 40 Mbps quadriphase modem, convolutional encoders, TDMA, etc
[AIAA PAPER 70-495] 11 p2002 A70-25488

Ground frequency converters for reception of NTSC color TV transmission from synchronous communication satellites, tabulating cost estimates
[AIAA PAPER 70-440] 11 p2002 A70-25490

TATS Master tactical communication satellite network controller with modems and digital computer for semiautomatic control over terminals
[AIAA PAPER 70-412] 11 p2002 A70-25491

Digital satellite communications systems, discussing time division multiplexing, steerable beam antennas and satellite-to-satellite transmission
[AIAA PAPER 70-491] 11 p2003 A70-25492

Ammonia micropropulsion operation modes and performance for stabilizing synchronous communication satellite, noting advantages over chemical and ion propulsions
11 p2122 A70-25817

Symphonic satellite telecommunication network for multiple access telephone, telegraph, data transmission, radio and TV dissemination
11 p2005 A70-26008

Plumeur-Bodou satellite telecommunications center, discussing antennas
11 p2031 A70-26009

Space technology exploitation, describing applications of multimission information transfer satellites
11 p2005 A70-26058

Multiple access to communication satellite by limiting repeater, considering model of a signals plus band limited white Gaussian noise in zero memory device
11 p2008 A70-26229

Trends in military communication satellite repeaters, noting influence by increased payload size, weight and complexity
11 p2009 A70-26258

SHF tactical satellite communications ground terminals, discussing system concepts, relationship to satellites and design problems
11 p2031 A70-26259

Satellite communication systems optimal utilization achievable through supervisory control system
11 p2009 A70-26261

Roll and pitch attitude control for long range station-keeping mission of synchronous flywheel stabilized communication satellite, discussing constraints on on-board equipment and technology
11 p2126 A70-26279

Passive and active satellite systems for point-to-point communication network with multiple access capacity, comparing technical and economic competitiveness
11 p2011 A70-26335

Nonlinear phase shift equation derived from TWT single carrier performance, predicting multicarrier performance of communications satellites
12 p2195 A70-27248

Telecommunication satellite system operation reliability taking into account maintenance and economics, discussing spacecraft acceptance and performance tests
12 p2313 A70-27470

Symphonic communication satellite orbit and attitude stabilization systems components, operation and accuracy requirements
13 p2502 A70-28432

Europa 3D carrier rocket design and operational data, discussing communication satellites
13 p2502 A70-28446

Space traffic control, discussing special problems of synchronous orbiting communications satellites
13 p2449 A70-29268

Earth resources satellite real time wideband relay communication link to ground station
[AIAA PAPER 70-326] 13 p2368 A70-29614

Commercial satellite communications, discussing creation and objectives of Comsat and establishment of Intelsat
13 p2368 A70-29618

Lunar communications systems considering use of satellites, metallic particle belts, rockets, lasers and particle beams
14 p2634 A70-30196

Soviet book on legal aspects of artificial satellites for meteorology and radio communication purposes
14 p2668 A70-30632

Demand assigned domestic satellite communications system with capability of single hierarchy switching and serving terrestrial common carriers and direct users
14 p2552 A70-31351

IR radiating bodies angular displacement determination by vacuum evaporated thermocouple radiation detectors, describing stationary communication satellite altitude control
15 p2740 A70-32422

Integrated tunnel diode amplifiers design using hybrid technique for communications satellites, noting stability and noise performance
15 p2710 A70-32469

UHF ground communication dish antennas transmit and receive gains calibration by communication satellite repeater
16 p2872 A70-32967

Satellite communication/navigation/surveillance systems for domestic and transoceanic ATC
16 p2949 A70-33479

COMMUNICATION SATELLITES

Lens antennas design for communication satellites, discussing power gain, beam width, sidelobe level, temperature distribution, etc
16 p2982 A70-33772

Tactical communications satellite /TACSAT/ design, emphasizing communications repeater characteristics
16 p2983 A70-34051

Artificial pilot phased array /APPA/ for use as multiple narrow beam communication satellite, obtaining beam steering from phase shifter setting
16 p2983 A70-34070

Range and velocity components for ray paths between tracking and data relay satellite and user communication satellite
16 p2866 A70-34073

Torque motor driven despun bearing assembly design with integral slip ring for tactical communications satellite /TACOMSAT/
16 p2986 A70-34160

Brushless despun mechanical drive and control system design and performance for orientation of high gain communications antenna from spin stabilized satellite
16 p2986 A70-34161

Communication satellite UHF link with FSK or PSK modulation, considering coded digital transmissions
16 p2867 A70-34331

Optimal receiving systems for satellite broadcasting, considering costs, power requirements, service area, etc
17 p3046 A70-35272

High power TWT for satellite communications ground stations, including Intelsat experience
17 p3054 A70-35282

Luneberg lens application to construct multiple beam mechanically despun antenna for spin stabilized satellites, discussing temperature problems
17 p3055 A70-35663

Juridical structure, risks and control of satellite telecommunication ensuring equality of nations
17 p3202 A70-35782

Application satellites, discussing uses in communications, meteorology, earth survey and navigation
18 p3333 A70-36348

Service multiplex for communications network via satellite, discussing reliability
18 p3229 A70-36667

Parabolic antennas for satellite communications network and radio telescopes, investigating surface utilization coefficient
19 p3395 A70-37267

Worldwide multichannel air communications system in 10 GHz to IR range by Quasi Laser Link modulation and satellites
19 p3378 A70-37855

U.S. nationwide satellite network for multichannel community antenna TV /CATV/ operated at 12 GHz band
19 p3382 A70-38891

Telecommunication, ATC and navigation satellite systems, examining economic bases for aeronautical and maritime space systems
20 p3740 A70-39407

Space law aspects of direct broadcasting satellites for TV and sound transmission
20 p3740 A70-39408

Communication satellites systems for civil application, considering ground stations design, regional communication, ATC and maritime communications and navigation
20 p3585 A70-39409

Satellites for direct radio and TV broadcasting, considering system quality and cost, network planning, frequency economy, etc
20 p3588 A70-40158

Communication satellites low thrust transfer to synchronous orbit by two-stage operation using hydrogen resistojets and Hg ion motors
[AIAA PAPER 70-1110] 20 p3691 A70-40227

SKYNET PCM telemetry and command station, discussing system design, pseudomonopulse feed, command and computer subsystems, etc
20 p3589 A70-40322

Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number
20 p3589 A70-40457

Global integrated communications satellite system, discussing International Telecommunication Union regulatory functions, etc
21 p3955 A70-40625

Monograph on communicating by satellite covering INTELSAT system design, pricing, procurement, broadcasting, international community responsibilities, etc
21 p3955 A70-40739

Small ground stations in communication satellite systems involving regional telecommunication, TV distribution, air traffic and maritime applications, data exchange, weather and education service
21 p3785 A70-40764

- Regenerative hydrogen-oxygen secondary fuel cells as rechargeable battery for communication satellites 21 p3756 A70-41007
- Frequency division multiple access satellite communication system, calculating bandwidth variations effects on intermodulation distortion 21 p3787 A70-41328
- FM transmission of multiplex telephone signals by communication satellites, deriving impulse noise due to adjacent channel interference 21 p3787 A70-41330
- Millimeter wave space-to-space and space-to-ground satellite communication links frequency allocation problems 21 p3787 A70-41335
- Communications satellite carrier instrumentation, using computer controlled frequency shift radiometer for power monitoring 21 p3826 A70-41345
- Baseline satellite design for U.S. domestic communications, discussing structural weight, transponders and bandwidth, antennas, etc 21 p3790 A70-41356
- Multiple beam earth station torus microwave antenna for satellite communication with nonplanar field of view over geostationary arc 21 p3798 A70-41357
- Multiple beam antenna system for regional communications satellite directing high radiated power toward specific earth areas 21 p3790 A70-41358
- Millimeter wave high gain Cassegrain antenna for wide bandwidth data link between communications satellites, obtaining accurate parabolic contours 21 p3799 A70-41359
- Single multiple access satellite communication system requirements for worldwide, trunked and local operations, considering transponder allocation and antennas 21 p3790 A70-41365
- Multiple access communication satellite systems providing reliable speech communication for low density use in remote areas [JPL-TR-32-1501] 21 p3791 A70-41368
- Synchronous satellites characteristics and applications to radio connection, light signals, positioning, telecommunications, manned space stations and space shuttles 22 p4109 A70-42467
- Management organization of European operational application satellite systems, concerning interurban telecommunication and air traffic control 22 p4127 A70-43502
- Eurospace Symphonie satellite communication system and ground facilities, discussing international and regional coverage 22 p4111 A70-43504
- Intelsat compatibility with independent regional telecommunication satellite systems 22 p4111 A70-43514
- European space applications program, discussing communication and meteorological satellites 22 p4111 A70-43515
- Communications satellites for offshore systems, noting development of small earth station 22 p3991 A70-43576
- Electromagnetic interference reduction between communication satellite earth stations and microwave radio relay stations by pit shielding 22 p3991 A70-43577
- Ground TV station network operating with communication satellites in remote areas 23 p4159 A70-43758
- Low noise dual receiver system for satellite communication earth station using parametric and transistor amplifiers 23 p4169 A70-43791
- TV broadcast satellites program distribution direct to home by network and by community 23 p4164 A70-44646
- Commercial satellite system circuit quality and reliability in digital communications, considering Automatic Digital Network Trans-Pac cable cut incident 24 p4311 A70-45223
- Military communication satellite requirements considerations including tactical and strategic concepts integration to provide advantages over terrestrial systems [AIAA PAPER 70-1295] 24 p4315 A70-46188
- COMMUNICATION SYSTEMS**
U TELECOMMUNICATION
COMMUNICATION THEORY
 NT WORDS [LANGUAGE]
 Book on communication and information theories application to fading dispersive communication channels, discussing tropospheric scatter, HF ionospheric links, moon bounds, etc 02 p0253 A70-11700
- Electrical analogs for optical systems in communication problem of optimum filtering to improve SNR 04 p0653 A70-15660
- Critique of theory of electromagnetic wave transmission in turbulent atmosphere, considering effects of approximation 05 p0811 A70-16044
- Optimum transmitter strategy and receiver gain for linear feedback communication in nonstationary additive noise 11 p2011 A70-26328
- Stationary phase error variance for second order phase locked loop for low signal to noise ratios 13 p2383 A70-29590
- HF electrical communication based on Kelvin transmission line and Maxwell field theories, noting linear arrays 16 p2860 A70-32951
- Book on random processes, communications and radar covering optimum filtering, detection, information theory, ergodic theory, probability and integration axioms, parameter estimation, coding, etc 17 p3043 A70-34602
- Monograph on state variable approach to continuous estimation of random processes with applications to analog communication theory 17 p3045 A70-35189
- Heisenberg uncertainty principle in communications technology, discussing variance products deficiencies and limits in carrier frequency pulses application 20 p3584 A70-39160
- Uncertainty principle in optimum communication theory, discussing existence and value of minimum product of pulse duration in terms of calculus of variations and differential equations 20 p3584 A70-39161
- Soviet book on complex signals in ranging, navigation and communications, discussing correlation and ambiguity functions and bandwidth effect 20 p3587 A70-39723
- Book on state variable solution techniques for homogeneous and inhomogeneous Fredholm integral equations in communication theory, discussing application to linear estimation theory 21 p3846 A70-41791
- Optimal detectors for two signals with fluctuating amplitudes and arbitrary mutual coherence, discussing distribution function processing 22 p3987 A70-42556
- Communication network approach to submillimeter wave applications in nondestructive testing, deriving transport equations for EM wave propagation 22 p4028 A70-42591
- Microwave communication - Conference, Budapest, April 1970, Volume 1, Communication system theory 23 p4158 A70-43751
- Optimal two-way communication system with feedback and decision constraint, developing algorithm for random code reliability lower bounds 23 p4159 A70-43754
- Radio signal source encoding, investigating error exponent 23 p4159 A70-43755
- Communication channel modeling with feedback for small error probability compared to unfolding capacity 24 p4313 A70-46056
- COMMUNITIES**
 NT CITIES
 NT MOUNTAIN INHABITANTS
 Aviation environment master plan concerning public relations problems confronted by USAF bases with adjoining communities 05 p0960 A70-16634
- COMMUTATION**
 Nonlinear control systems on-off oscillations with instants of commutation determined by simultaneous equations, noting feedback control 11 p2027 A70-26254
- Stress energy tensor equal time commutation, observing metric dependence inability to satisfy relations for linearized gravitational fields 19 p3536 A70-37550
- COMMUTATORS**
 NT DECOMMUTATORS
 Brushless DC motors speed regulation with electronic commutators, discussing photoelectronic, magnetic sensing and magnetic-coil commutation 02 p0229 A70-12616
- Transistorized pistol grip probe design, circuit and operation for testing wobble and asymmetry in rotating ring commutators of electric motors 12 p2165 A70-27495
- Brushless DC motor with rotor position sensor and transistor commutator for armature current switching, describing design and operation 12 p2165 A70-27525
- COMPACTING**
 Book on powder metallurgy treating characterization of powders, compaction, sintering and engineering considerations and applications 02 p0316 A70-11735
- Niobium powder hot pressing compaction in terms of porous body volume viscous flow, determining viscosity shift time dependence 04 p0696 A70-14461
- Titanium carbide sintering under continuous heating in Ar atmosphere, studying ultrasonic waves effects on compaction process 04 p0696 A70-14463
- Optimal temperature for sintering of compact titanium carbide in Ar atmosphere 04 p0697 A70-14468
- Al powder explosive compacting processing, equipment and tests noting heat treatment effect 05 p0894 A70-16324
- Hard alloy mixture shaping by free vibrational compaction of powders 07 p1296 A70-19801
- Optimum composition of sand-bentonite materials for aluminum alloy casting in molds compacted by high pressure 08 p1506 A70-21137
- Contact compaction methods of metal powders involving vibration, shock, detonation and hydrodynamical pressure 09 p1706 A70-23122
- COMPACTNESS**
U VOID RATIO
COMPANION STARS
 Companion galaxies on spiral arms endings, discussing age, expansion and ejection and stopping mechanism 04 p0759 A70-15710
- Bright southern Cepheids UVB observations, discussing blue companion effect on two color plot 14 p2639 A70-30726
- COMPARATORS**
 Comparator design for triplicated attitude indicator instrumentation system in aircraft to achieve reliability, discussing system failure characteristics 02 p0224 A70-11844
- Stereocomparator and electronic computer used to determine aerial photographs relative orientation elements, discussing measurement error elimination 03 p0482 A70-13108
- Comparator for measuring relative phase difference between identical frequency signals within microwave octave band 09 p1647 A70-22715
- Dispersion effect on accuracy of measuring polycrystalline samples electronograms by comparator using statistical method 09 p1682 A70-23392
- Plate coordinate measurements obtained with Zeiss precision monocomparator at satellite observation station 10 p1889 A70-24501
- Heat flow comparator for nondestructive testing of resin-impregnated fiber glass, detecting nonuniformities leading to thermal properties variation 11 p2059 A70-25764
- Thermal comparator for conductivity determination, discussing probe fabrication, surface finish, sensitivity, etc 11 p2050 A70-25765
- Digital frequency and phase flip-flop comparator for slave oscillators fine control by master frequency 22 p3996 A70-42819
- COMPARTMENTATION**
U COMPARTMENTS
COMPARTMENTS
 NT AIR LOCKS
 NT AIRCRAFT COMPARTMENTS
 NT ANECHOIC CHAMBERS
 NT COMMAND MODULES
 NT PRESSURE CHAMBERS
 NT PRESSURIZED CABINS
 NT SPACECRAFT CABINS
 NT TEST CHAMBERS
 NT VACUUM CHAMBERS
 Decompressed crewmember rescue onboard spacecraft and aircraft by compartmentalization combined with air locks 08 p1454 A70-21938
- Petrel payloads taking into consideration rocket stability after launch and compartment design 13 p2503 A70-28683
- COMPASSES**
 NT GYROCOMPASSES
COMPATIBILITY
 Color coding effects in compatible and noncompatible display control arrangements 02 p0247 A70-12381
- Compatibility conditions of theory of micromorphic elastic solids using Riemann theorem 06 p1164 A70-17530
- Compatibility of single metal coated carbon fibers, discussing structural recrystallization in contact with Ni or Co matrix by dissociation/diffusion/precipitation mechanism 07 p1315 A70-20048
- Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media 08 p1585 A70-20962
- Solid state IC-compatible display devices optical, electrical, mechanical and thermal characteristics 09 p1642 A70-22018
- Inlet-engine compatibility testing for aircraft system development program [AIAA PAPER 70-941] 16 p2965 A70-33534
- Strain compatibility equations for continuous shells from physical and mathematical considerations 16 p2991 A70-33893

Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media 20 p3719 A70-39384

Biological compatibility problem in long duration space operation crew change, discussing human metabolic processes and difference effects 22 p3980 A70-43641

COMPENSATION

Quantitative characteristics of central compensatory process, investigating nystagmus responses in guinea pigs subjected to bilateral labyrinthectomy 06 p0995 A70-17806

Lens aberrations compensations in partially coherent image holography 10 p1891 A70-24838

Decoupling by dynamic compensation using algebraic machinery, considering state space extension role in pole assignment 16 p2886 A70-33333

Terminal compensation influence on radiative recombination in n- and p-type GaAs, observing emission band in photoluminescence and electroluminescence spectra 23 p4231 A70-45063

COMPENSATORS

Corrective open-loop circuit, using delay elements for compensation of transient response in linear circuits with lumped parameters for pulse modulation transmissions 06 p1023 A70-17774

Radiometers sensitivity increasable by combining quasi-zero method with compensation circuits 08 p1495 A70-21053

Pulse signal transmission rate increase by transient processes compensator, discussing stability relation to signal to noise ratios 09 p1639 A70-23696

Dynamic force measurement, evaluating hybrid system with reaction force summation and operational compensation subsystems 10 p1889 A70-24580

Random processes correlation coefficients and functions measured by quasi-compensator with potentiometer and digital/analog readout 12 p2235 A70-27770

Automatic cancelling devices with compensating coils for terrestrial magnetic field vector 13 p2401 A70-30044

Computer oriented algebraic method for duplicator control systems applied to loop network, lag, feedback, phase lead and phase lead lag compensator design 14 p2560 A70-30620

Dynamic compensation of thermal pumping-induced deformation of laser active elements via thermal bending of resonator mirrors achieved by coatings 20 p3642 A70-39744

Sampled data compensators hybrid realization for discrete controllers, selecting canonical representation with minimum number of delay elements 22 p4002 A70-42846

Liquid compensators for gamma ray flaw detection of complex metal product configurations, considering radiation source energy spectrum and specimen density 24 p4348 A70-45849

COMPENSATORY TRACKING

Human operator remnant data normalization noting observation noise spectral characteristics for compensatory tracking 10 p1824 A70-23899

Human controllers nonlinear time domain mathematical model for analyzing compensatory tracking task data 11 p1992 A70-26396

Human performance as controller evaluated in man machine control system, considering pursuit or compensatory tracking tasks 12 p2177 A70-27039

Compensatory tracking task with tactile displays determining gains and body locations by describing function and error power analyses 13 p2354 A70-29599

Motion cue requirements in one and two axis closed loop compensatory control tracking tasks, discussing error rates 14 p2540 A70-30247

Optimal manual control model of human compensatory tracking response 14 p2543 A70-31408

Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking situation, considering application to manual control system design 16 p2852 A70-33463

Step and ramp input functions and pursuit and compensatory display modes effects on tracking performance 21 p3767 A70-40753

Vestibular sinusoidal stimulation effects on compensatory tracking under various postures and display conditions 22 p3976 A70-43706

COMPETITION

Optimal control theory applied to oligopoly, considering economic problems and Nash equilibrium solutions 15 p2831 A70-32552

COMPILATION (COMPUTERS)

U COMPILERS

COMPILER PROGRAMS

U COMPILERS

COMPILERS

ALGOL program modification for Fast Fourier Transform to eliminate computation time difference with Fortran 07 p1238 A70-19677

Aerospace compiler design for software cost reduction without affecting reliability, describing input language 16 p2868 A70-33432

COMPLEX NUMBERS

Imaginary numbers of Riabuchinskii, noting irreducibility to ordinary imaginaries 07 p1326 A70-19784

Three stage variable shift iteration algorithm for calculating zeros of polynomial with complex coefficients 09 p1712 A70-23419

Stability of multiconnected nonlinear controlled systems with nonsingle equilibrium position, representing lumped parameter system with characteristic equation having complex roots 11 p2021 A70-25338

COMPLEX SYSTEMS

Complex automatic systems effectiveness synthesis based on invariance principles 20 p3603 A70-39835

Complex plants process control by experimental statistical methods, considering curves plotting, computer requirements, optimum method selection, etc 20 p3592 A70-39902

Statistical analyzer for complex plants dynamic characteristics 20 p3604 A70-39912

COMPLEX VARIABLES

NT AIRY FUNCTION

NT ANALYTIC FUNCTIONS

NT BESSEL FUNCTIONS

NT CAUCHY INTEGRAL FORMULA

NT CONFORMAL MAPPING

NT CONJUGATES

NT ELLIPTIC FUNCTIONS

NT ENTIRE FUNCTIONS

NT EXPONENTIAL FUNCTIONS

NT LOGARITHMS

NT MATHIEU FUNCTION

NT MEROMORPHIC FUNCTIONS

NT ORTHOGONAL FUNCTIONS

NT RATIONAL FUNCTIONS

NT SCHWARZ-CHRISTOFFEL TRANSFORMATION

NT SINGULARITY [MATHEMATICS]

NT SPHERICAL HARMONICS

Difference set D of k distinct residues, extending Hall search with negative results, discussing multipliers, polynomial congruence, etc 01 p0132 A70-11073

Book on function theoretic methods for partial differential equations covering complex variables, harmonic functions, envelope method for singularities, operators, etc 01 p0133 A70-11325

Operational calculus for semisimple complex Lie group 07 p1321 A70-18658

Algebraic criterion for polynomial with complex coefficients having all zeros in certain regions of complex plane 07 p1324 A70-19201

Prandtl problem solution by reducing integrodifferential equation to linear differential equation in disk of complex variable, noting application to elliptical or rectangular wings 07 p1258 A70-19783

Electromagnetic and gravitational fields classification methods using spinor techniques, introducing five dimensional complex linear space with Weyl tensors elements 07 p1337 A70-20302

Complex Gaussian processes with complex density functions, computing covariances and marginal distributions 10 p1915 A70-24057

Complex variable technique for electrochemical machining of insulated and uninsulated straight sided tool, using minimal computer time 10 p1894 A70-24416

Root-locus approximation technique extended for complex plane analysis of equations with quadratic

term in variable parameter for linear multivariable feedback systems 10 p1855 A70-24449

Complex potentials used in semicomplex variable method for plane-strain problems in two dimensional linearized elasticity with couple stresses 13 p2508 A70-28494

Complex vector parametrization of Lorentz group in relativistic kinematics, discussing Wigner rotation, Lorentz transformation and particles classification during scattering 13 p2453 A70-29722

Asymptotic expansion of contour integrals involving analytic functions of complex variable, using steepest descent method 15 p2767 A70-31696

Point heat source generation of thermal stresses in elliptical plate with circular hole, using functions of complex variable for stress field determination 15 p2818 A70-32182

Stability criteria for differential equations with complex variables, considering boundary value requirements and sufficient conditions theorems 18 p3281 A70-36352

Sufficient conditions for local solvability of linear partial differential equations with operator on complex functions 19 p3457 A70-37682

Two dimensional piezoelectric problems of electroelasticity, formulating general solutions in terms of stress and electric potentials using complex variables 19 p3487 A70-37946

Plane wave reflection from stratified isotropic medium using ray tracing in complex space, noting agreement with phase integral method 19 p3380 A70-38404

Composite materials physical properties based on linearly reinforced media models and complex variable functions theory 20 p3655 A70-39860

Numerical methods, FORTRAN program and table form for complex integrals evaluation along unit circle in positive direction 20 p3605 A70-40120

Perforated infinite plate finite elastic deformation under biaxial tension, using successive approximation in connection with complex variable method of plane elasticity 21 p3932 A70-40551

COMPONENT RELIABILITY

Nondestructive evaluation of components and materials in aerospace, weapons systems and nuclear applications - Conference, San Antonio, April 1969 01 p0095 A70-10001

NDT peculiar to airline maintenance, emphasizing inspection of complex parts hidden within assembly 01 p0099 A70-10028

Life-test sampling plan for electron tubes based on exponential failure distribution for reliability demand of military specifications 01 p0099 A70-10112

Cost-effective look at vacuum testing of spacecraft components, noting sensitivity prediction and thermal cycle test 01 p0055 A70-10113

Equipment reliability data application in analytic techniques to predict human requirements for system, using in-space maintenance as reference frame 01 p0055 A70-10117

Cost tradeoff analysis of electronic equipment for systems reliability design, considering component derating, redundancy and selection 01 p0049 A70-10119

Long life subsystems design and testing for orbital space station programs, considering nuclear generation, electromechanical equipment, positive expulsion of fluids, instrumentation, etc 01 p0103 A70-10626

High power TV broadcast satellite subsystems technologies requirements, considering transmitters, power conditioners, solar arrays and component reliability [AIAA PAPER 69-1080] 01 p0194 A70-10632

Commercial transport aircraft landing gear electrical circuitry dispatch reliability improvement, considering components causing flight delays due to maintenance problems 01 p0006 A70-10703

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number 02 p0383 A70-11654

Machine parts fatigue behavior and service life, studying endurance margin under load cycles spectra below initial endurance limit

02 p0383 A70-11657

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc

02 p0352 A70-11659

Magnetic components design, manufacturing and handling for use in space communication satellites, noting design group role in parts construction and quality control

02 p0267 A70-12057

Product reliability using statistical probability technology with product failure studies, discussing performance prediction accuracy

02 p0309 A70-12301

Product reliability engineering analysis, discussing coordination, communication and data accumulation systems

02 p0309 A70-12302

Concorde aircraft main landing gear reliability, discussing design, corrosion, hydraulic contamination, metallurgy, sealing and tests

02 p0226 A70-12366

Electronic integration assembly (EIA)/incorporating modular electronic packaging design techniques to provide reliable mechanical configuration for spacecraft equipment

02 p0268 A70-12579

Optimal use of adaptive renewal capability determined for first order time varying linear systems with quadratic performance index by exponential model of component failure

02 p0273 A70-12729

Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability

03 p0588 A70-13251

Neutron radiography for visual nondestructive failure analysis and production inspection of ordnance components compared with X ray radiography

03 p0494 A70-14122

German Space Research Association reliability and testing function, using failure analysis for space projects components and structures

[DGLR-69-30]

04 p0698 A70-15137

Reliability engineering related to general and professional levels, discussing space program methods and Concerto program for electronic components

05 p0853 A70-15810

Design and qualification test criteria for components derived by enveloping peaks of shock response spectra in ground tests of missile stages explosive separation

[SAE PAPER 690616]

05 p0922 A70-15849

Soviet papers on vibrations, strength and structure of aircraft engine elements

07 p1363 A70-19109

Amplifier design effects on device reliability, considering sudden and gradual system failures

07 p1246 A70-19635

Optimal spare parts inventory determined for stochastically failing components using mathematical model

08 p1501 A70-20603

Galvanoplasty process for parts for UHF circuits, discussing cost, safety and quality

08 p1468 A70-20611

Matched filter SNR behavior under time and frequency domains distortion and random distortion, deriving design equations for energy loss coefficients

08 p1474 A70-21223

Nondestructive process control analyzer for spot welds in aircraft structural components, monitoring expansion, current and spotweld properties

08 p1507 A70-21486

Semiconducting components reliability test involving electrical parameters measurement following thermomechanical stresses

09 p1689 A70-22002

Tin oxide film resistors reliability test based on measurement of resistance nonlinearity by third harmonic voltage

09 p1689 A70-22005

Reliability estimations precision evaluated by Monte Carlo simulation, analyzing causes of data inaccuracy

09 p1689 A70-22019

Turbine components design for low cycle fatigue, estimating thermal cycle number for high temperature crack initiation and propagation

09 p1774 A70-22583

Turbine components thermal stress calculations for static and variable loads, considering plastic strain, creep and temperature effects

09 p1775 A70-22592

Turbines rotary shafts and stationary components thermal fatigue analysis, considering cycle numbers and stress concentrations under start-up, continuous operation and shut-down

09 p1775 A70-22593

Fault finding strategy optimization in systems with single defective element

09 p1693 A70-22974

Reliability testing of waveguide ferrite devices based on quantitative technique using circular charts with filled in endurance test results

09 p1652 A70-23661

Qualification and testing procedures for Apollo Spacecraft Program components and systems, discussing vibration tests

09 p1693 A70-23705

Component tolerances effect on transfer function of networks, calculating sum variance for two terminal networks

10 p1833 A70-24223

Optimization of controlled systems with allowance for failures of parallel connected elements dependent on control inputs and phase coordinates

10 p1854 A70-24279

Microwave device test system design, considering measurement ranges and parameters, calibration, repeatability, accuracy, maintainability, etc

10 p1852 A70-24890

Biosatellite Primate Mission Program for component qualification levels validated by flight tests data, performing vibration tests on prime structure spacecraft

[AIAA PAPER 70-403]

10 p1951 A70-24902

Fail-operational fail-safe redundant yaw damper system, comparing reliability requirements with reliability prediction, development and production testing and field usage data

[AIAA PAPER 70-392]

10 p1896 A70-24913

Time-optimal testing sequence for system failure detection, considering maintenance and reliability data

10 p1896 A70-25048

Components life determination from calculating cumulative damage using empirical stress amplitude distributions

11 p2133 A70-25844

Low cycle fatigue problems, environmental influence of operational differences on component life, life limits and controls for safe operation of jet engines

[SAE PAPER 700207]

11 p2102 A70-25879

Algorithm based on component reliability used to determine complex systems reliability

12 p2192 A70-28009

Weibull process with unknown scale and shape parameters analyzed by Bayesian decision making model, with application to component reliability problem

12 p2243 A70-28011

Orifice leak test for electronic components hermeticity

13 p2405 A70-28840

Supply phase voltage loss detection failure by voltage sensors in industry

13 p2378 A70-29349

Severity comparisons of specified and actual impulse tests determining component reliability

14 p2563 A70-30867

Minimum cost systems engineering in aviation equipment maintenance and reliability

14 p2669 A70-30943

Improved standard electrical equipment components development by test by use method, reducing cost and time

15 p2828 A70-31572

Quality assurance R and D for product design and operational integrity in manned space flight, noting space developments application to aircraft safety

15 p2676 A70-32231

Parts standardization in military electronics industry for cost reduction and reliability, discussing design transform from software to hardware

15 p2831 A70-32632

F-111A reliability levels achieved via high reliable hardware and redundancy and alternate mode capability requirements in contract

15 p2676 A70-32638

Electronic equipment reliability performance measurements during tests correlated to performance observed under field use

15 p2712 A70-32645

Electronic components prefailure analysis resulting in reduced failure rates, scrap and rework

15 p2832 A70-32652

Practical electronic components criteria accommodating reliability engineer and circuit designer

15 p2832 A70-32653

Boeing 707 and 727 aircraft components on condition maintenance program based on statistical analysis and performance monitoring for replacing scheduled overhauls

15 p2748 A70-32656

Nondestructive screen test efficiency, determining potential failures of electric components by Bayes theorem

15 p2748 A70-32659

Reliability assurance of LSI components consisting of complex electronic functions fabricated by semiconductor technology on single chip

15 p2713 A70-32662

Wearout life and reliability of rate gyros from field service test data

15 p2748 A70-32668

Mathematical reliability model for quasi-redundant electronic system with two failure modes for each component

15 p2769 A70-32827

Fluidic technology for avionics systems, considering potential cost reduction and reliability improvement

16 p2843 A70-33445

Electrical, electronic, electromechanical, pneumatic and hydraulic subsystems failure pattern determination, discussing sensing techniques in signature analysis

[ASME PAPER 70-DE-34]

16 p2917 A70-33505

Rocket engine thrust chambers and valves, discussing component lifetime extension and operational flexibility of reaction control systems

[AIAA PAPER 70-603]

16 p2964 A70-33526

Monopropellant hydrazine RCS rocket engine module, discussing operating conditions, development, thermal control and valve internal leakage

[AIAA PAPER 70-654]

16 p2965 A70-33544

Design and reliability of digital systems for hard cores of fault tolerant computers /hybrid- redundant systems/, discussing advantages over multiplexed systems

[JPL-TR-32-1490]

16 p2887 A70-33734

Plastic structural components service life estimation based on creep diagrams and short time tests

16 p2941 A70-34323

Aircraft, helicopters and rockets aviation systems design and components service life problems, emphasizing maintenance intervals

17 p3100 A70-34686

High reliability release mechanism with mechanical redundancy on SERT 2 satellite

17 p3174 A70-34759

Linear stress based cumulative damage law for structural component failures

17 p3186 A70-34987

Cost effective reliability apportionment in spacecraft subsystems, allocating failure-risk goals by mathematical model

17 p3101 A70-35160

Space vehicle optimal design based on reliability analysis, taking into account cost of materials strength tests

[JPL-TR-32-1496]

17 p3188 A70-35224

Photoelectric conversion efficiency and radiation resistance of Li-doped Si solar cells, showing improved reliability over Li-free cells

17 p3023 A70-35311

Service multiplex for communications network via satellite, discussing reliability

18 p3229 A70-36667

Critical aviation gas turbine rotating component life limit determination, describing statistical, maintenance, inspection and life evaluation computer program /SMILE/

[ASME PAPER 70-GT-66]

18 p3303 A70-36841

Normalization of mechanical properties of aircraft engine components, increasing weight efficiency and reliability

19 p3490 A70-37254

Electrical tests on satellites and space probes applied to spaceborne subassemblies, subsystems and electronic systems EM compatibility

19 p3532 A70-38287

Environmental tests and checkout procedures for Azur satellite subsystems and subassemblies integration into flight readiness

19 p3533 A70-38289

Space environment simulator for thermal vacuum performance of artificial satellites and components

19 p3401 A70-38308

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number

19 p3547 A70-38427

Machine parts fatigue behavior and service life, studying endurance margin under load cycles spectra below initial endurance limit

19 p3547 A70-38430

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc

19 p3547 A70-38432

Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability

19 p3548 A70-38469

Si photocells fabrication, reliability and energy conversion efficiency

19 p3358 A70-38479

Electronic components mass production for automatic control equipment, determining parameters probabilistic scatter

19 p3390 A70-38578

Military electronic equipment reliability limitations in terms of mean time to failure, considering quality control of components

19 p3390 A70-38596

Computer program for assessment and modification of mechanical component life predictions by discrete formulation of Bayes theorem 19 p3440 A70-38816

Technical methods defining, monitoring and controlling life limited aerospace components during storage 19 p3441 A70-38831

Hazard functions, renewal and peril rates for reliability models of nonrepairable parts, sockets and repairable systems 19 p3442 A70-38839

Rotating mechanical components reliability under complex fatigue, presenting design data 19 p3442 A70-38845

Structural design load factors statistical evaluation for element optimal reliability 19 p3550 A70-38850

Fatigue strength distributions at specific cycles of finite life with given cycles-to-failure, calculating reliability 19 p3550 A70-38851

Hollow test platform for gyros and accelerometers used in inertial navigation [AIAA PAPER 70-952] 20 p3606 A70-39577

Automatic control system components parameter variation effects on invariance conditions 20 p3602 A70-39830

Nonrepairable elements reliability under external influences, discussing linear damage accumulation hypothesis 20 p3638 A70-40180

Air navigation Dioscures project satellites, discussing spin or three axis stabilization, system replenishment strategies and subsystem reliability 21 p3929 A70-41259

Electronic parts testing for long duration Mariner spacecraft missions 21 p3799 A70-41798

Ni-Cd cell plates screening and selection by weight for reliability and uniformity improvement 21 p3760 A70-42147

Fluidic oscillators frequency stability evaluation, noting analog circuits superiority over digital [ASME PAPER 70-FLCS-20] 22 p3963 A70-42407

Helicopter parts and assemblies fatigue life estimation and testing, discussing loading spectra, service conditions, etc 22 p4046 A70-43119

Algorithm for communication network synthesis from limited elements selection, considering fixed reliability requirements 23 p4160 A70-43763

Integration operators for transient structural response in qualification tests for internal components of dynamically loaded structures 23 p4273 A70-44719

Avionic components reliability, determining non-steady cooling air environment effects 23 p4175 A70-44744

Electrical and electronic semiconductor device failures from metallurgical viewpoint 23 p4175 A70-44746

Nondestructive testing technology, emphasizing component designer role in facilitating inspection of surface defects 24 p4342 A70-45679

DC potentiometer for nondestructive tests of structural components, obtaining crack detection, depths and angles and wall thicknesses 24 p4338 A70-45740

Si crystal microdefects influence on semiconductor device performance and reliability 24 p4391 A70-46015

COMPONENTS

Pressure sensitive components in cordwood modules noting temperature and pressure damaging stresses during encapsulation 05 p0855 A70-16037

Components and microelectronics - Conference, San Francisco, August 1969, Volume 13, Part 5 06 p1018 A70-17355

Transfer molding process in fabrication of electronic modules components, emphasizing criticality and unfavorable characteristics 13 p2420 A70-29253

Internal stresses in transfer molding of electronic modules by photoelastic technique, discussing component failure 13 p2420 A70-29254

Millimeter waveguide components, discussing impedance measuring equipment, matched loads, variable short circuits and attenuators, power measurement equipment, etc 14 p2556 A70-30446

Design component size index as function of various system demands, using Monte Carlo method 21 p3846 A70-41870

Radio electronic circuits precision, deriving relationship between frequency response and component variations solvable by linear programming 23 p4171 A70-43958

COMPOSITE MATERIALS

NT CERMETS

NT COMPOSITE PROPELLANTS

NT LAMINATES

NT METAL MATRIX COMPOSITES

NT REINFORCED PLASTICS

NT WHISKER COMPOSITES

Ultrasonics inspection applied to reentry vehicle heat shields and composite materials, verifying anomalies by microscopic area examination 01 p0097 A70-10016

Interfaces in composites - ASTM Conference, San Francisco, June 1968 01 p0126 A70-10476

Fiber-matrix interface mechanics in composites, considering shear strength, stress distribution, fiber strength effects, etc 01 p0127 A70-10479

Fiber-composite materials fracture, noting interface mechanical strength effects on composite properties under tension and shear 01 p0127 A70-10481

Microstructural interfacial stability and property retention after elevated temperature exposure of eutectic composites, discussing coarsening rate relationship to interfacial area and energy 01 p0117 A70-10485

Solid glass sphere reinforced nylon resins properties, processing and applications, noting tensile and impact strength and heat distortion 01 p0128 A70-10772

Electrically conductive plastics fabrication and applications limitations, discussing plastic matrix materials loaded with various conductive fillers 01 p0129 A70-10938

Fiber reinforced composites emphasizing refractory fibers, preparation methods, properties and fabrication 01 p0129 A70-10939

Glass reinforced and unreinforced thermoplastics HF fatigue failure modes, discussing isothermal and nonisothermal test procedure 01 p0129 A70-11081

Plane sinusoidal wave propagation through material reinforced with parallel fibers, using integral formulation for multiple scattering in infinite slab 01 p0130 A70-11187

Reinforced metals properties and applications including fibers and lamination, notch sensitivity, brittle fracture, failure and heat resistance characteristics 01 p0124 A70-11619

Expandable space hangar with composite wall for orbiting maintenance shelter, providing radiation and meteoroid protection for occupants 02 p0380 A70-11934

Boron-polyimide composite reinforced Ti fuselage stringers design and test program for SST 02 p0387 A70-11950

Bolted and bonded joints design in composite materials loaded in tension, presenting methods for strength prediction, testing and analysis 02 p0306 A70-11952

Composite fibrous materials applicability to V/STOL rotor blades design and fabrication confirmed by structural analysis 02 p0225 A70-11953

Fiber reinforced composites fabrication, properties and industrial applications, discussing modulus of elasticity and tensile strength equations, bonding and temperature applicability 02 p0322 A70-12713

Stress-optic law for orthotropic composites photoelastic stress analysis, investigating use of transparent filament-resin composites 03 p0481 A70-12956

Fiber composites dimensional changes, stresses and plastic flow during component allotropic transformation, studying temperature variations effects 03 p0585 A70-12973

Momentless design of composite plate and shell structures with variable elastic constants based on loading and shape requirements 03 p0586 A70-13112

Viscosity anisotropy in fluid matrix suspensions of parallel rigid flakes as function of flake content and width-to-thickness ratio 03 p0515 A70-13122

Graphite fiber content determination technique for plastic composites based on epoxy, polyimide and phenolic resins, using concentrated sulfuric acid 03 p0515 A70-13123

Failure mechanisms in notched or damaged fiber reinforced composite materials determined from analysis of axial tensile strength and broken fibers 03 p0515 A70-13124

Constitutive equations for orthotropic bilinear elastic materials in plane stress case, discussing unidirectional composites 03 p0587 A70-13127

Unidirectional composite materials properties, discussing stiffer filaments effect on Young modulus and shear coupling constant relating shear strain to longitudinal strain 03 p0587 A70-13128

Stiffness and expansion properties of oriented short fiber composites, discussing longitudinal modulus and expansion strain dependence on aspect ratio 03 p0587 A70-13129

Deformability calculation of two phase composite solid materials through laminated structural models 03 p0602 A70-14337

Brittle composites /including fiber reinforced material/ deformability and plastic deformation effect on tensile strength, discussing pressure induction of sound flow [ASME PAPER 69-WA/PROD-28] 04 p0705 A70-14834

Thermal damping in gas-filled composite materials during impact loading due to heat transport, discussing role in impact energy dissipation [ASME PAPER 69-APM-V] 04 p0712 A70-14867

Stress intensity and strain energy release rate in elastic fiber-reinforced composites with different thermomechanical properties and imperfect bonding [ASME PAPER 69-WA/APM-15] 04 p0771 A70-14913

Material coupling in two layered orthotropic cylindrical shell subjected to normal external pressure 04 p0778 A70-15547

Structural design of boron/epoxy front housing for T-56 turboprop reduction gear case achieving reduced weight and increased stiffness [SAE PAPER 690666] 05 p0853 A70-15837

Axisymmetric elasticity problem for straight fiber imbedded into infinite matrix, noting homogeneous temperature changes causing residual stresses, tractions at infinity and fiber pulling 05 p0931 A70-16088

Continuum model for plastic-elastic behavior of fiber reinforced composite material, formulating yield condition and constitutive equations 05 p0931 A70-16131

Displacement determination by orthogonality relationship for dynamic vibrations and stresses in composite elastic plates 05 p0937 A70-16406

Composite materials use in nonload bearing and heavily stressed materials, considering applications in aircraft industry and high strength fibers role 05 p0870 A70-16576

High modulus fibers as reinforcing fillers in thermoplastic matrices, discussing cost compensation in low fiber loadings 05 p0870 A70-16578

Composite strength and stiffness prediction from fiber and matrix properties using computer 05 p0870 A70-16579

Handbook on fiberglass and advanced plastics composites covering raw materials, processing methods, design and applications 05 p0872 A70-16601

Glass filled thermoplastics fabrication techniques and composites, discussing molding compounds and processes, reinforced thermoplastics properties and applications 05 p0873 A70-16605

Graphite yarn, cloth and fiber composites physical properties tabulated, discussing multiply laminates for graphite-epoxy composites 05 p0873 A70-16610

Filament winding methods of aerospace industry based on motor case winding, emphasizing reinforcing materials, winding geometry and finished composite evaluation methods 05 p0856 A70-16615

Boron-epoxy composite materials for secondary and primary aircraft structural components, discussing multidirectional laminates, joint analysis, etc 05 p0942 A70-16620

Composite materials properties test methods, discussing nondestructive method for shear or rigidity modulus of square plates 05 p0874 A70-16622

Thermal conductivity and aperiodic temperature distribution in microstructure of composite materials reinforced with solid and hollow fibers 05 p0958 A70-16952

Fibers random curvature effect on thermoelastic properties of unidirectionally reinforced fibrous materials 05 p0946 A70-16953

Mechanical behavior of cylinders with alternating layers of reinforcing and matrix materials derived from governing equations, including equations of motion [AIAA PAPER 70-134] 06 p1169 A70-18051

Dynamic elastic modulus of graphites and composites measured as function of temperature using thin rod resonance method 06 p1070 A70-18447

Reinforced graphite cloth composite for reentry heat shielding of SNAP 27 isotopic heat sources, describing structure, thermal and mechanical properties and ablative characteristics 07 p1332 A70-18933

Filamentary composite materials for commercial aircraft and engine construction noting boron, graphite and glass reinforcement 07 p1316 A70-18950

Arbeitsgemeinschaft Verstärkte Kunststoffe - Conference, Freudenstadt, West Germany, September-October 1969

07 p1316 A70-19753
Stress analysis of multiaxially loaded tubes of fiberglass reinforced composite wound in three directions

07 p1318 A70-19755
Buckling stress calculation and measurement in cylindrical fiberglass reinforced composite shells under axial pressure

07 p1409 A70-19756
Sizing and design of large vessels of fiberglass reinforced composites based on minimum cost

07 p1409 A70-19757
Fiberglass reinforced materials characteristics under stress evaluated by ring test in form of split disk or hydraulic tests

07 p1410 A70-19758
Boron and carbon fiber reinforced composites mechanical properties compared with fiberglass reinforced composites

07 p1318 A70-19770
Boron fiber reinforced composites structure and loading capacity, describing network-like fiber winding technique for light reinforced structures

07 p1318 A70-19771
Heat resistant fibers fabrication and properties for composite materials, noting metal whiskers, C, B, Be and alumina

07 p1318 A70-19802
Compression strength of polyester resin reinforced with hard drawn and softened steel wires, discussing variations from predicted performance

07 p1320 A70-19954
Bending tests for characterizing off-axis unidirectional composite beams, discussing errors due to lift off from supports

07 p1412 A70-19963
Structural composite materials for thermal protection of reusable weight-saving vehicles in space transportation system

07 p1397 A70-20382
[AIAA PAPER 70-272]
Boride composites with high strength and thermal resistance suitable as nose cap and leading edge materials for reusable lifting reentry systems

07 p1315 A70-20387
[AIAA PAPER 70-278]
Residual stresses in continuous fiber reinforced composites with unknown strain history determined by empirical methods

08 p1520 A70-21498
Thermoelectric energy functions bounding by variational principles for anisotropic composite materials properties

08 p1592 A70-21510
Thermal conductivity and diffusivity of two phase composites determined by iterative solution of heat conduction equation with space fluctuating properties

08 p1598 A70-21511
Carbon fiber composite materials production technology, physical properties and potential applications in aerospace

08 p1527 A70-21520
Mechanical properties and fracture behavior of chemically bonded glass matrix-metal composites

08 p1521 A70-21699
Composite materials application to structural members, considering bond or adhesive shear strength

08 p1594 A70-21855
Stress analysis of composite materials reinforced with glass ribbons embedded in epoxy matrix by photoelastic technique, discussing perturbation effect

08 p1594 A70-21862
Composite materials testing and design - ASTM Conference, New Orleans, February 1969

08 p1528 A70-21876
Composite materials shear strength test problems with high modulus fibers

08 p1529 A70-21877
Tension, compression and in-plane shear tests to obtain boron epoxy composite materials mechanical properties to design FB-111 wing box extension

08 p1529 A70-21879
Uniaxial and multiaxial stiffness and property characterization of anisotropic composite materials formed as thin walled cylinders

08 p1529 A70-21880
Test methods for evaluating tensile, compressive, interlaminar shear and bearing strength properties of carbon yarns and flat and tubular composites

08 p1529 A70-21881
Geometry effect on short beam tests for interlaminar shear strength of composite materials

08 p1529 A70-21882
Inplane shear stress-strain response determined for unidirectional composites, using uniaxial test method for laminated plates

08 p1530 A70-21884
Specimen design of laminated angle-ply composite materials for straight-sided axial coupon and long beam flexure tension testing

08 p1530 A70-21885
Split ring load test method for determining shear modulus of isotropic and composite materials

08 p1530 A70-21888

End plugs bending moment and shear loads reduction during compression tests of composite orthotropic cylinders

08 p1594 A70-21889
Failure criteria application to quasi-homogeneous anisotropic materials, discussing material constants

08 p1595 A70-21890
Matrix optimization of boron filament reinforced polymeric for short duration high temperature aerospace applications

08 p1530 A70-21891
Composite materials fatigue determinations providing curves of stress-strain magnitude vs usable life or time to failure, considering environmental effects in service for design criteria

08 p1531 A70-21895
Design allowables and factors of safety for filamentary composite materials, discussing reliability

08 p1595 A70-21900
Unidirectional filamentary composites failure theory for uniaxial and combined stress, considering constituent material properties and fabrication processes

08 p1532 A70-21902
Fiber composites-Ti alloy adhesive, rivet and combined joints for aircraft applications, noting fiber orientation role in joint tensile strength

08 p1509 A70-21905
Filament tensile strengths and pressure strain characteristics of high modulus boron filament wound/resin composite pressure vessels for cryogenic applications

08 p1509 A70-21909
Structural analysis of Titan 3 Stage 2 ablative nozzle extension made of composite material

08 p1595 A70-21910
Fracture processes in homogeneous anisotropic fiber composite materials, describing microcrack initiation, growth and unstable propagation at critical stress level

08 p1532 A70-21912
Composite material tensile strength, discussing statistical scatter in fiber strength and local fiber overstress caused by fiber discontinuities

08 p1532 A70-21914
Failure mode in shear loaded graphite filament reinforced epoxy composites dependent on interfacial bond strength

08 p1533 A70-21915
Longitudinal strength characteristics of filament reinforced composites, discussing bond strength effect on filament fracture

08 p1533 A70-21918
Materials for separator matrix of rechargeable hydrogen oxygen fuel cell, noting use of composite potassium titanate

09 p1612 A70-22045
Strength and plasticity criteria for anisotropic reinforced materials model taking into account material structure, components properties and behavior

09 p1768 A70-22119
Stress-strain characteristics of reinforced elastoplastic layer using mathematical model

09 p1769 A70-22183
Composite materials macroscopic thermoelastic properties relationships to constituents properties, discussing effective thermal expansion coefficients and specific heats

09 p1703 A70-22682
Carbon fibers and fiber-reinforced composites fabrication, structural properties and uses

09 p1710 A70-22758
Composite window permitting visual or photographic observation and IR irradiation of test materials in ultrahigh vacuum system

09 p1698 A70-22994
C-5A airframe composite materials fabrication, tooling, processing, quality assurance and nondestructive test methods

11 p2058 A70-25572
Aircraft turbine engines structural materials and design concepts, describing fiber reinforced materials, oxide dispersion hardened alloys and integral and honeycomb structures

11 p2101 A70-25625
Polyimide resins and composites state of cure determination by thermomechanical analysis (TMA)

11 p2069 A70-25807
Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations

11 p2135 A70-25986
[AIAA PAPER 69-93]
Cost-property index (B/P) to compare economic success of composites, metals, glass and ceramics for load bearing applications

11 p2136 A70-26077
Elastic-plastic shear cracks propagation in two phase composite materials using dislocation model, determining critical fracture strength

11 p2136 A70-26081
Elastic properties determined for reinforced composite material with hollow spherical inclusions embedded in matrix

11 p2136 A70-26083

Tensile strength of nitrided boron-aluminum alloy composite modules, noting effect of Ti cladding on panel surfaces

11 p2066 A70-26085
Elastic moduli of fiber reinforced composites calculated, deriving reinforcement factor in Halpin-Tsai equation from volume fraction

11 p2070 A70-26087
Ultrasonic pulse technique for measuring fiber reinforced composites elastic constants

11 p2052 A70-26341
Flexural stress relaxation properties of thermoplastics and composite materials, assessing strain energy by ballistic pendulum

11 p2070 A70-26342
Open pattern winding technique for composite materials, laying fibers without weaving around pillars at edge of table and to stiff beam

11 p2060 A70-26344
Electrical conductance test for composite materials adhesive bond degradation by liquids

11 p2071 A70-26345
Gas-filled composites under impact loading, studying thermal damping due to heat transfer between compressed gas and solid structure

11 p2140 A70-26480
Anisotropic fiber reinforced composites elastic moduli determined by analytical matrix method

11 p2141 A70-26488
Fiber reinforced composites under longitudinal shear loading, noting orthotropic nature and shear moduli assuming circular fibers

11 p2141 A70-26489
Thin shell design for minimum bending stresses and transverse shear for composite materials with low interlaminar shear strength

11 p2141 A70-26490
Steady state creep of composite material with short fibers, discussing effects of fiber/aspect ratio, fiber volume fraction and distribution

11 p2144 A70-26671
Elastic stiffness of unidirectional glass reinforced epoxy fiber composite determined from ultrasonic velocity measurements

11 p2071 A70-26692
Frequency equation for harmonic waves propagating in composite circular-cylindrical rods consisting of circular core and circular casing of different material

11 p2145 A70-26693
Boron fibrous composite panels machining methods including drilling, routing, band sawing and reaming

12 p2240 A70-27077
[ASTM PAPER EM-69-141]
Wide goods fabrication of boron composites, discussing mechanical properties and cost effectiveness

12 p2240 A70-27078
[ASTM PAPER EM-69-142]
Semiinfinite composite medium displacement caused by nucleus of torsional strain with axis perpendicular to constituent isotropic layers interfaces

12 p2321 A70-27159
Interfacial tractions between matrix and fiber in elastic composite materials reinforced with elastic fibers

12 p2322 A70-27230
Stress and strain in matrix of fiber reinforced material within elastic region, calculating interface shear stress for rectangular fiber

12 p2322 A70-27231
Composite materials fabrication with glass, boron and graphite fibers reinforcement, discussing matrix and binder materials

12 p2253 A70-27267
NDT methods for fiberglass, graphite and boron fiber composites for aircraft structures

12 p2243 A70-27465
Composite reinforced materials similarity criteria to relate static and dynamic fields of various physical parameters, outlining mathematical simulation

12 p2259 A70-27526
Aluminum-boron composite material applications to structural components of F-106 aircraft, noting weight saving and mechanical properties

12 p2257 A70-28082
[AIAA PAPER 68-975]
Glass- and quartz-fabric reinforced polymers for high temperature microwave insulation, evaluating electrical and thermal aging properties

12 p2259 A70-28149
Fiberglass content effects on reinforced polycarbonates long term dimensional stability during compression and tension creep tests

12 p2259 A70-28298
Annealed compressed ground synthetic mica and silver dust composite materials, analyzing physicochemical properties

12 p2260 A70-28319
Al-aluminum oxide composite steady state creep due to grain boundary sliding, accounting for activation energy level

12 p2258 A70-28348
Stress concentration in fiber reinforced materials resulting from thermal self straining, using finite element method and photoelastic analysis

13 p2509 A70-28533

- Complex moduli of isotropic viscoelastic composites from elastic moduli 13 p2511 A70-28735
- Nonlinear theory describing mechanical behavior of prestressed laminated composites subjected to large deformations 13 p2511 A70-28738
- Wool felt based carbon and graphite composite materials for orthogonally isotropic high shear strength compared with rayon felt based composites 13 p2437 A70-28776
- Aircraft structure fabrication combining unidirectional strength and stiffness of B composite with metal, including test and weight/cost data 13 p2418 A70-28777
- Synthetic foam material of hollow carbon microsphere fillers embedded in high compression strength epoxy resin matrix 13 p2437 A70-28780
- Griffith flaws limitation effect on glass matrix-tungsten composites strength, considering dispersed phase with wide particle size distribution 13 p2437 A70-28827
- Unidirectional composite with transversely isotropic fibers, calculating elastic stiffness constants by modified point-matching technique 13 p2515 A70-29466
- Laminated composite materials dynamic elastic properties, outlining resonant frequency effect on apparent Young modulus 13 p2515 A70-29467
- Stainless steel fiber reinforced Sn-Pb eutectic alloy composite mechanical properties, noting tensile strength and rupture behavior 13 p2436 A70-29625
- Filled elastomers elastic and anelastic behavior, investigating strain dependence 13 p2440 A70-29964
- Book on high modulus fibers and composites providing data for preparation, microstructure, structure and properties 14 p2598 A70-31315
- WC as densification aid for NbC-C composites, examining fabrication temperature, mechanical properties, solid solution composition, etc 15 p2757 A70-31797
- Colloidal filler /carbon black/ reinforced rubber for various applications, noting fabrication into composite material 15 p2764 A70-31930
- Fiber reinforced viscoelastic composites complex elastic moduli derivation 15 p2816 A70-32003
- Optimal design for composite material structure, considering internal and external reinforcement 15 p2816 A70-32005
- Stress distribution in fiberglass unidirectionally reinforced composite material under uniaxial tension 15 p2765 A70-32180
- Statistical theory of material strength applied to composite materials reinforced with whiskers and noncontinuous fibers 15 p2763 A70-32833
- Isotropic composite materials with anisotropic components, determining microconstants for heat conduction, elasticity and thermoelasticity problems 15 p2766 A70-32896
- Material data file and retrieval system for designers in automotive, equipment and appliance industries, discussing applications to other FRP markets 16 p2935 A70-33352
- Diluent resins properties for blending with glass fiber reinforced high density polyethylene concentrate 16 p2935 A70-33353
- Mechanical properties of composite materials reinforced with ribbon fibers consisting of stainless steel and polyethylene ionomer resins 16 p2988 A70-33366
- Ablative composites containing in situ reaction formed refractory metal carbides 16 p2937 A70-33371
- Graphite fiber reinforced polyimide composites with low void content, high strength and modulus 16 p2938 A70-33384
- Composite beam testing concepts and interpretation under three and four point loading, noting shear deformation effect 16 p2989 A70-33385
- Laminated multioriented filamentary composites strength and fracture characteristics under longitudinal tension and compression [ASME PAPER 70-DE-31] 16 p2989 A70-33502
- Reinforced polymer composites design for aircraft structures [ASME PAPER 70-DE-67] 16 p2939 A70-33518
- Elastic constants for plates of unidirectional fiber reinforced anisotropic composite material determined by ultrasonic wave propagation 16 p2991 A70-33847
- Constitutive equation for fiber reinforced viscoelastic materials, using continuum theory of mixtures 16 p2994 A70-34231
- Thermal and thermoelastic constants of macroscopically isotropic composite materials based on self consistent calculations 17 p3194 A70-34555
- Inelastic analysis of unidirectional composite subjected to transverse normal loading, discussing linear response up to elastic limit and subsequent crack propagation and failure 17 p3182 A70-34557
- Optimum filament orientation for maximum strength in composite with combined normal and shear stresses 17 p3183 A70-34563
- Longitudinal shear modulus of unidirectional fibrous composite, involving series solution of Laplace equation 17 p3183 A70-34564
- Composite materials in aerospace vehicle design, discussing mechanical behavior, applications and characteristics 17 p3127 A70-34674
- CH-47C helicopter fiberglass main rotor blade, discussing composite materials impact on design 17 p3013 A70-34702
- Composite tail rotor driveshaft for next generation helicopter, discussing materials, fabrication and tests [AHS PREPRINT 451] 17 p3100 A70-34703
- Circular inclusion interface separation in matrix under incident compressive waves interpreted for fiber reinforced composites 17 p3185 A70-34963
- Plastic flow and failure of elastic fiber reinforced composite materials with noninteracting and interacting discontinuities, obtaining stress distribution for various work hardening degrees 17 p3187 A70-34991
- Fiber reinforced composite with ductile matrix, discussing fatigue life prediction from strain hardening characteristics 17 p3128 A70-35465
- Weld transition joints from explosive bonded Al-steel and Al-Cu composite plates, discussing mechanical and electrical properties 17 p3102 A70-35551
- Aligned composite materials preparation by unidirectional lamellar eutectoid decomposition in Co-Si, Cu-Al, Ni-In and in supersaturated solid solution Sn in Pb 18 p3274 A70-36052
- Cracks and tensile failure of interface bonds in elastic composite hollow cylinder, deriving wave front propagation equations 18 p3283 A70-36388
- Boron composites development for aircraft structures compared with titanium [ASME PAPER 70-GT-120] 18 p3344 A70-36851
- Thermal expansion anisotropy in graphite-epoxy composites causing residual stresses [ASME PAPER 70-GT-129] 18 p3279 A70-36855
- Fiber reinforced materials with oriented armoring, calculating stress strain state under transverse shear 19 p3454 A70-37348
- Stress wave propagation based on elasticity theory for reentry heat shield composites reinforced with unidirectional high strength high modulus fibers 19 p3537 A70-37788
- Stress and displacement within internally pressurized composite cylinders having continuous fiber reinforcement in circumferential direction, using finite element method 19 p3538 A70-37797
- Physically nonlinear elastic solid three dimensional and generalized plane strain problem, discussing application to composite materials 19 p3538 A70-37798
- Elastic particulate composite solid with microinclusions, deriving dispersion relations governing plane longitudinal wave propagation modes by analogy with continuum theory 19 p3540 A70-37942
- Fiber reinforced solid material, determining swelling or temperature change induced dilatation by micromechanics and physical chemistry 19 p3540 A70-37943
- Dynamics of composite materials using extensions of continuum theories based on combination of elastic and geometric properties 19 p3455 A70-37950
- Composite bodies under plane deformations, determining stress dependence on elastic constants 19 p3455 A70-37952
- Unidirectional composites subjected to free vibration and axial end loading, considering longitudinal stress wave propagation in fiber direction 19 p3540 A70-37954
- Thermoelastic composite materials, deriving crystal lattice type model of equations for predicting dynamic or thermomechanical behavior 19 p3540 A70-37958
- Micropolar mechanics application to stress and displacement within separate components of fibrous composite material 19 p3541 A70-37961
- Soviet book on fiber reinforced composites covering strength, rheologic and elastic properties, thermal conductivity, diffusion processes, etc 19 p3456 A70-38795
- Hydrofoil and hovering craft design by fiber technology, discussing composite materials, whisker mechanical properties, polycrystalline fibers, matrix materials, etc 19 p3456 A70-38941
- Carbon composite technology - Conference, University of New Mexico, January 1970 20 p3652 A70-39201
- Composite technology effects on engineering design, emphasizing carbon-carbon materials for aircraft structural weight reduction, performance improvement and high temperature applications 20 p3653 A70-39202
- Carbon/carbon composites constituent characteristics effects on thermal and mechanical properties, using polarized light and scanning electron microscopy 20 p3653 A70-39204
- Chemical vapor deposition of carbon matrix material in fiber structure, investigating thermodynamic fundaments in processes 20 p3654 A70-39207
- Carbon fiber/carbon matrix composites fabrication by isotropic casting, flock and spray lay-up and pulp molding, describing physical and mechanical properties 20 p3636 A70-39208
- Composite materials physical properties measurement and defect locations detection by NDT techniques 20 p3636 A70-39210
- Unidirectional and multidirectional carbon/carbon composites quality and performance evaluation by NDT methods, including X ray radiography, ultrasonic test, pulse echo mapping, etc 20 p3654 A70-39211
- Carbon/carbon composites thermal and mechanical properties measurements by NDT including image transducer, IR scanning and ultrasonic methods 20 p3636 A70-39213
- Short graphite fiber classification and orientation control in matrix by electrostatic methods 20 p3654 A70-39215
- Reinforced materials endurance testing, discussing clamping and edge restraints effects 20 p3655 A70-39775
- Composite materials physical properties based on linearly reinforced media models and complex variable functions theory 20 p3655 A70-39860
- Multicomponent composite materials, discussing fiber reinforced structures, clad metals and bulk materials 20 p3650 A70-39947
- Mechanics of composite materials - Conference, Philadelphia, May 1967 20 p3728 A70-40026
- Composite material engineering problems, discussing tensile, compressive and shear strengths, design approaches, unidirectional properties and substance characterizations 20 p3651 A70-40027
- Filamentary composite materials for space vehicles structural design, noting mass reduction, strength, foldability, formability, etc 20 p3656 A70-40030
- Composite materials theory to predict macroscopic physical properties prediction, discussing conductivity, dielectric constant, magnetic permittivity, etc 20 p3729 A70-40032
- Heterogeneous materials statistical theory, evaluating bounds for effective elastic constants by cell model using variational principles and perturbation solution 20 p3729 A70-40033
- Dynamic theories for wave propagation in laminated and fiber reinforced composites, using dispersion curves for transverse and longitudinal motions 20 p3730 A70-40036
- Thermoelasticity of fiber reinforced materials, considering stress concentration in beams and reinforcing fibers buckling under thermal loading 20 p3730 A70-40037
- Continuum mechanics application to elastic composite materials, investigating plane deformation of reinforced medium 20 p3730 A70-40038
- Structural mechanics of continuous fiber reinforced composites, discussing bending and stretching of cylinders, pressure vessels, plates and beams 20 p3730 A70-40039
- Composites potential structural performance, determining mechanical properties for fiber and matrix materials and unidirectional and isotropic composites in cylinders and box beams 20 p3651 A70-40042
- Structural synthesis concept in optimal design of composite material structural systems, considering failure modes of rectangular fiber composite plate 20 p3731 A70-40044

Stress concentrations due to cylindrical inclusions in homogeneous matrix, using stress function methods
20 p3656 A70-40045

Uniaxial fiber composites tensile strength models, including failure analysis
20 p3731 A70-40046

Composite material dynamic properties, discussing modulus and damping during constant strain rate, viscoelasticity, fracture strength and high loading tests
20 p3731 A70-40048

Wire reinforced solid rocket propellant grains mechanical properties and failure modes
20 p3689 A70-40050

Unidirectional fiber reinforced composites strength, obtaining limit load bounds from plasticity analysis
20 p3731 A70-40051

Environmental factors effect on composite materials structural performance, using rate theory
20 p3656 A70-40053

Filament wound composites, investigating interaction of fabrication variables and outward environments by delineating effect of each on structural performance
20 p3731 A70-40055

Composite accelerator electrodes on Cs bombardment microthrusters, testing various designs and electrode coatings
[AIAA PAPER 70-1089] 20 p3693 A70-40246

Mechanical behavior of cylinders with alternating layers of reinforcing and matrix materials derived from governing equations, including equations of motion
20 p3732 A70-40267

Multilayer three dimensionally woven fiberglass-reinforced materials, measuring strength and deformation under tension, compression, bending, torsion and shear tests
21 p3841 A70-40646

Bond stresses between fiber and matrix of fiber reinforced composite materials determined by numerical method based on superposition
21 p3934 A70-41252

Composites reinforced with weakened fibers, investigating weak points effect on fracture toughness by fiber pullout and tensile tests
21 p3843 A70-41889

Fracture toughness and surface energy of fibrous reinforced composites as function of fiber content, strength, diameter, modulus and matrix flow stress
21 p3843 A70-41890

Energy release during flux jump in Nb-Ti single core wires and multifilament composite superconductors
21 p3863 A70-42011

Unidimensional composite materials nonstructural applications, tabulating characteristics
21 p3840 A70-42148

Hot pressed zirconia-zirconia ceramic fiber reinforced ceramic matrix composites, discussing mechanical properties and failure modes
22 p4057 A70-42285

Ceramic fiber technology, forming processes and matrix composites fabrication, discussing chemical and physical compatibility factors, plastic forming, slip casting, cold pressing, etc
22 p4045 A70-42477

High thermal stability glass fibers alternatives improving stiffness-to-weight ratio of resin and Al-based composites used in F-111 boron epoxy wings
22 p4058 A70-42480

Load transfer to elastic fiber in infinite elastic matrix, determining fiber force distribution
22 p4113 A70-42539

Filamentary composites stress wave amplitude distribution calculation and plotting
22 p4114 A70-42645

Ultrasonic wave velocity measurements for flaw detection and modulus of elasticity of carbon-carbon composites
22 p4047 A70-43519

Elastic wave front control volume analysis in laminated and fiber reinforced composite materials
22 p4119 A70-43677

Laminated composites time dependent static strength and reliability under uniaxial tension
22 p4119 A70-43678

Graphite and carbon fiber surfaces, correlating Raman spectrum and shear strength of composite
22 p4060 A70-43680

Unidirectional fiber reinforced composite longitudinal shear deformation, deriving effective shear modulus
22 p4060 A70-43681

Macroscopically homogeneous composites control volume approach, examining Hugoniot equation of state
22 p4060 A70-43683

Mechanical properties and internal stress fields in composite materials reinforced by glass fibrous filler under transverse shear
22 p4061 A70-43724

Ceramic composite materials structural application, improving brittleness and thermal shock resistance via reinforcing refractory fibers
[ICAS PAPER 70-40] 23 p4267 A70-44138

Charring ablative composites pyrolysis products composition determination, comparing chemical analysis techniques
23 p4158 A70-44519

Incremental complementary energy method of stress analysis of orthotropic nonlinear materials having different behavior in tension and compression
[AIAA PAPER 69-119] 23 p4270 A70-44563

German monograph on fiberglass, matrix and filler effect on service life of composites with low fiberglass content
24 p4365 A70-45084

Strong fibrous solids - Conference, London, January 1970
24 p4366 A70-45165

Whiskers and filaments properties compared for fiber reinforcement applications in composite materials production
24 p4356 A70-45167

High melting point fibrous composites, discussing fiber-matrix systems for high temperature applications as in gas turbine blades
24 p4357 A70-45168

Fibrous composites use in compressor blades, discussing materials characteristics requirements relative to environmental and stress conditions in aircraft operational service
24 p4392 A70-45169

Fibrous composites thermomechanical properties derivation by theoretical analysis from basic constituents characteristics, presenting comparisons with experimental results
24 p4366 A70-45170

Fibrous composite interface effects and fracture work, discussing tip stresses of crack normal to fiber, energy dissipation by pullout and debonding in brittle fiber composites, etc
24 p4419 A70-45171

Fibrous composites design for mechanical properties improvement, discussing interfacial properties conflicting requirements as to interlaminar shear, transverse tensile strength, high work of fracture values, etc
24 p4419 A70-45172

Materials design and development for engineering applications, discussing relationships and importance of strength, stiffness, weight, toughness and work of fracture
24 p4419 A70-45174

Unidirectionally solidified carbide reinforced Co-Cr eutectic alloy, examining tensile strength and creep behavior
24 p4358 A70-45236

Unimodal and bimodal distribution of fiber composite properties at different stress levels using quantitative metallography
24 p4359 A70-45250

Thermal IR nondestructive testing of adhesively bonded boron composite/Al honeycomb structures, discussing surface, cross section and instrumentation sensitivity effects
24 p4341 A70-45570

Nonmetallic nonconductive composite materials physical properties by swept microwave frequency nondestructive testing
24 p4345 A70-45705

Stress-strain curves of polycrystalline metals and composites using single crystal elastoplastic model
24 p4425 A70-45779

Betatron monoenergetic electron beams in radiometric, spectrometric and radiographic testing of composite materials
24 p4339 A70-45850

Matched-die compression molding of complex shape structures from composite materials
[SAE PAPER 700751] 24 p4348 A70-45874

Low cost fabrication for solid rocket nozzles using carbon or graphite reinforcements in throat inserts
[SAE PAPER 700796] 24 p4349 A70-45897

Si-carbide composites electrical conductivity from temperature and thickness dependence, obtaining volt-ampere characteristics via computer method
24 p4391 A70-46154

Composite materials tensile strength dependence on reinforced fibers with dispersed tensile strength, using model to predict crack propagation from fiber rupture
24 p4427 A70-46270

COMPOSITE PROPELLANTS

Composite propellants high pressure burning stability with various binders and oxidizers, showing ammonium perchlorate oxidized formulations susceptibility to instability
[AIAA PAPER 69-438] 01 p0160 A70-10852

Aluminized composite solid propellants burning rates in acceleration fields noting time dependent increase
[AIAA PAPER 68-529] 04 p0709 A70-15581

Surface thermal factors influencing ignition delay time of composite solid propellants, using double wavelength optical detector
[AIAA PAPER 70-121] 06 p1128 A70-18043

Burning rate for composite solid propellant, using model with specific gas phase combustion distribution
07 p1422 A70-19584

Heat transfer from composite propellant burning zone to regressing surface measured using microjet burner
07 p1359 A70-19587

Polyvinyl chloride plastisol propellants consisting of fine solid oxidizer and powdered metal, discussing composition, propellant flow, curing time and temperature dependence
07 p1360 A70-19908

Propellants chemistry based on chemically cross-linked binder
07 p1360 A70-19909

Polyurethane-based solid rocket propellants, discussing catalyst modification, mix viscosities, moisture embrittlement, etc
07 p1360 A70-19910

Butadiene prepolymers containing carboxyl functional groups used in binder matrix for solid composite propellants
07 p1360 A70-19911

Processing methods for manufacturing composite solid propellants, describing oxidizer, binder and fuel preparation, propellant mixing and chamber insulation and lining and instrumental analysis
07 p1361 A70-19912

Granular diffusion flame theory application to low pressure burning of composite solid AP propellants
07 p1361 A70-19914

Composite solid propellant ignition characteristics using arc imaging furnace for radiant energy source, discussing minimum initial pressure determined by binder thermal decomposition
09 p1742 A70-23226

Burning solid ammonium perchlorate composite propellants surface structure observation to assess heterogeneous or subsurface reactions, using scanning electron microscope
09 p1742 A70-23234

Composite and double base solid rocket propellants manufactured by French factory for ballistic missiles, discussing plant installations
11 p2030 A70-25520

Composite propellant catalysts /copper chromate and chromite/ thermal decomposition using simultaneous thermogravimetric and differential thermal analysis
11 p2100 A70-26382

Collection of papers on solid propellant technology covering rocket interior ballistics, composite rocket propellants, etc
13 p2472 A70-29602

Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant
[AIAA PAPER 69-144] 13 p2473 A70-29955

Composite solid propellants surface structure and profile characteristics burning with various oxidizers and polyurethane binder by scanning electron microscopy
14 p2628 A70-30948

Combustion extinguishment of composite solid propellant motors by fluid injection, considering binder, curing agent and burning rate catalyst
[AIAA PAPER 70-641] 16 p2968 A70-33599

Composite solid propellants burning rate and initial temperature relationship, investigating granular diffusion flame model
[AIAA PAPER 70-656] 16 p2963 A70-33618

Burning rate increase of nonmetalized composite propellants in acceleration field, assuming surface retention of ammonium perchlorate particles
16 p2963 A70-33861

Extinction model of composite solid propellant combustion including wall and flame heat release zones
17 p1347 A70-34511

Thermal decomposition of perchlorates evaluated by mass spectrometer, with regard to composite propellants combustion processes
17 p1345 A70-34638

Chemical rocket propellant research covering composite liquid monopropellants, lateral thrust in solid propellant rockets, ELDO third stage, friction losses, etc
17 p1348 A70-35211

Ammonium perchlorate filler fraction effect on viscoelastic behavior, relaxation modulus and failure mechanisms of solid composite propellants
17 p1345 A70-35216

Ignition delay of uncompressed composite solid or hybrid propellant mixtures in rocket engine igniters
18 p3301 A70-36651

Internal ballistics of composite propellant charge in first stage of burning
19 p3489 A70-38373

Ammonium perchlorate composite solid propellant pressure vs burning rate at various temperatures, discussing granular diffusion flame theory
20 p3694 A70-40266

Temperature measurements in gaseous reaction zone near surface of burning composite solid propellant, using modified line reversal pyrometer
20 p3694 A70-40273

- Composite solid propellant thermal ignition from hot wire tests and model 21 p3942 A70-40877
- Multicomponent fuels combustion in air, deriving simplified flame sheet model 21 p3942 A70-40881
- Radiant energy flux effect on atmospheric pressure burning rate of composite solid propellant 23 p4232 A70-44552

- Compressibility, viscosity and thermal conductivity of dense gases, examining high temperature and pressure effects
23 p4222 A70-44431

COMPRESSIBILITY EFFECTS

- Symmetry energy of infinite nuclear matter calculated for cases of constant density and minimum saturation energy by density variation, considering finite compressibility effects
01 p0148 A70-11105
- Stress-strain analysis of rectangular plates under concentrated load, noting sealed liquid compressibility effect on deflections and bending moments
02 p0388 A70-12499
- Impact against elastoplastic blank allowing for base and striker compressibility, giving solution in region of plane wave first reflection from base
05 p0947 A70-17016
- Rarefied gas shear flow over infinite plane wall, using Boltzmann-Krook-Welander equation to determine compressibility effect on Knudsen layer
06 p1048 A70-18327
- Compressibility effect on density explaining Mercury-Venus density near equality to earth-Mars-moon, discussing theory of rotational break-up of parent planets
08 p1563 A70-20496
- Strain energy method applied to stability analysis of short longitudinally reinforced cylindrical shells under axial compression
08 p1584 A70-20536
- Air compressibility effects on aerodynamic characteristics of slender rectangular wings moving at subsonic speed near earth surface approximated by lifting surface theory
10 p1801 A70-24276
- Pneumatic compression effects on canine cardiovascular dynamics after hemorrhage tested in G-suit inflation
11 p1988 A70-26516
- Swirling and meridional flow induced by steady rotation of gravitating sphere in compressible monatomic gas, considering compressibility effects and surface layer
[ASTME PAPER MR-69-714] 11 p1978 A70-26690
- Compression effects in air-oxygen mixture on male mice, observing no adversity on mortality, growth and nitrogen content
13 p2353 A70-29436
- Turbulent boundary layer structure, considering flow properties prediction, wakelike behavior, bursts, compressibility, transport properties, etc
17 p3068 A70-34665
- Helicopter rotors noise intensity prediction for high tip Mach number, including compressibility and thickness effects
17 p3015 A70-34729
- Infinite elastic plates traveling wave flutter in compressible flow, investigating viscous damping effects on critical flow velocity
18 p3343 A70-36701
- Fluid inertia and compressibility effects considered in equations for foil over lubricating film
[ASME PAPER 69-WA/LUB-10] 19 p3435 A70-37615
- Large deflection of simply supported aluminum alloy annular plate with nonlinear stress-strain curve, considering compressibility effects and membrane force
20 p3718 A70-39138
- Umbral flash as magnetoacoustic wave, examining Ca II K line variations formation during adiabatic compression
21 p3885 A70-40958
- Axisymmetric laminar compressible jet flow characteristics, allowing for compressibility effects due to temperature dependent density and viscosity variations
24 p4325 A70-45584
- Precompression and pressurization effects on ductile-brittle transition of polycrystalline cast Cr, W and Mo bcc transition metals
24 p4365 A70-46371

COMPRESSIBLE BOUNDARY LAYER

- Density and heat transfer effects on compressible turbulent boundary layers used to investigate velocity

- and temperature profiles, skin friction, Mach number and Reynolds number
01 p0003 A70-10936
- Unsteady heat transfer from porous flat plate with impulsive motion and rising temperature, analyzing compressible boundary layer equations using Laplace transform
01 p0067 A70-11390
- Finite difference solution of compressible turbulent boundary layer equations of motion, using eddy viscosity concept
02 p0286 A70-12353
- Integral method for studying wall heat transfer influence on compressible boundary layer on cone at angle of attack in supersonic flow
03 p0409 A70-13953
- Numerical integration of equations of motion of three dimensional laminar compressible boundary layers
[DVL-915] 06 p1033 A70-17229
- Skin friction law for compressible boundary layer allowing calculation of coefficient of friction for isothermal walls with heat transfer
06 p1033 A70-17232
- Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles, momentum and displacement thicknesses
[AIAA PAPER 69-35] 07 p1256 A70-19312
- Unsteady boundary layer in compressible fluid laminar flow over accelerating semiinfinite flat plate
07 p1258 A70-19566
- Heat insulated plate compressible boundary layer energy equations approximate solutions in hypergeometric functions
10 p1966 A70-23867
- Compressibility transformation theory extended for turbulent boundary layer, involving mass transfer with/without chemical reactions
[AIAA PAPER 69-161] 12 p2211 A70-27825
- Axisymmetric compressible boundary layer on body of revolution transformed into two dimensional turbulent boundary layer
13 p2391 A70-29995
- Laminar compressible boundary layer similar solutions for axisymmetric blunt body, considering viscosity and density variations
16 p2833 A70-33123
- Laminar compressible flat plate boundary layer dependence on Prandtl number and viscosity-temperature relations
16 p2893 A70-33673
- Control efficiency of flaps at hypersonic speeds, considering thick turbulent boundary layer compression process
16 p2836 A70-33751
- Fluctuation measurements at wall and across laminar, transitional and turbulent compressible boundary layers on flat plate, using hot film probes
[AIAA PAPER 70-745] 17 p3066 A70-34498
- Roughness effects on heat transfer to surfaces in supersonic compressible turbulent boundary layer
[AIAA PAPER 70-742] 17 p3066 A70-34505
- Compressible turbulent boundary layers with heat and mass transfer in two dimensional and axisymmetric flows, using eddy transport coefficients
[AIAA PAPER 70-741] 17 p3066 A70-34506
- Favorable pressure gradient effect on compressible two dimensional supersonic turbulent boundary, using temperature and pressure probes and shear balance
18 p3242 A70-36690
- Stratford prediction method of separation position for compressible boundary layer flow
19 p3406 A70-38617
- Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor
20 p3684 A70-40269
- Nonstationary compressible laminar boundary layer similar solutions by parameter-invariant method, obtaining velocity and temperature profiles by partial differential equations numerical integration
21 p3806 A70-40555
- Flat plate compressible laminar boundary layer flow with variable fluid properties, using series solution by splitting up flow variables into sets of universal functions
21 p3806 A70-40825
- Accelerated self similar compressible laminar boundary layer flows with and without mass transfer, obtaining numerical solutions
21 p3807 A70-41031
- Two dimensional compressible laminar MHD boundary layer flow across flat plate with heat transfer, considering continuity, momentum and energy equations
21 p3856 A70-41039
- Compressible boundary layer equations with second order surface curvature and displacement effects
21 p3809 A70-41751
- Unsteady compressible boundary layer formation on rotating disk, assuming uniform fluid rotation
22 p4009 A70-42616

- Vane type vortex generators to prevent turbulent compressible boundary layer separation, measuring drag in supersonic flow
23 p4133 A70-44527

COMPRESSIBLE FLOW

NT MAGNETOHYDRODYNAMIC FLOW

- Direct and incremental variational formulations for steady compressible lubrication based on finite element method, noting limitations of numerical techniques
[ASME PAPER 69-LUB-12] 01 p0102 A70-10393
- Compressible swirling inviscid nozzle flows approximate solution showing changed choking at throat, axial velocity distributions and reversing in subsonic region
01 p0003 A70-11128
- Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas
01 p0172 A70-11489
- Compressible flows with circular sector hodographs, discussing Chaplygin equation for simple wedge flow and theorem on sonic jets
04 p0613 A70-14612
- Compressible fluid flow satisfying perfect gas equation in presence of thin foil, developing operators characterizing incompressible and compressible flows without Hall effect
05 p0790 A70-16158
- Pressure distribution and drag measurements at flat triangular bodies and rectangular plates with blunt trailing edge in compressible flow
06 p0965 A70-17243
- Viscosity and heat conductivity effects in compressible fluid flow past finite body showing dependence on spatial dimensions
10 p1800 A70-24135
- Unsteady compressible laminar boundary layer flow around flat plate influenced by compressibility as function of Mach number
[ONERA-TP-803] 10 p1869 A70-24543
- Closed streamline low Mach number compressible fluid flow without temperature restrictions, noting incompressible flow behavior
10 p1869 A70-24547
- Compressible flow equations of motion applied to incompressible fluid flow through nozzle with eddies and springs
10 p1871 A70-24796
- One dimensional compressible constant entropy flows stability, noting unstable regions with fluid particles undergoing compression
11 p2034 A70-25679
- Compressible turbulent boundary layer with adverse pressure gradients and crossflow over revolving bodies, integrating numerically three dimensional compressible integral equations
11 p2035 A70-25689
- Numerical techniques and solutions for compressible and incompressible laminar separated flows using time dependent finite difference equations
[AIAA PAPER 68-741] 11 p2035 A70-25972
- One dimensional compound compressible nozzle flow solution dependence on initial conditions and nozzle geometry, discussing applications to bypass turbojets and solid propellant motors
11 p1976 A70-26137
- One dimensional compressible flow with heat addition in nonconstant area duct extended for friction addition, discussing critical thermal shocking
11 p2041 A70-26651
- Compressible turbulent plane Couette flow solution with variable heat transfer based on von Karman model extended to arbitrary wall temperature
12 p2211 A70-27839
- Compressible turbulent boundary layers velocity profiles, Coles universal wake function, least squares methods, wake-wall representation, etc
12 p2157 A70-28080
- Unsteady compressible pipe flows with large cross sectional variations studied by two dimensional difference method
13 p2386 A70-28806
- Viscous and compressible fluid flow in presence of plane plate
13 p2389 A70-29489
- Contraction coefficients for compressible discharge through axisymmetric sharp edged orifice, obtaining approximate analytical expression based on one dimensional theory
13 p2389 A70-29549
- Aerodynamic pressures dependence on angle of incidence for profiles in adiabatic compressible flow
16 p2833 A70-33074
- Laminar and turbulent boundary layer equations solutions for incompressible/compressible flows about two dimensional and axisymmetric bodies, using finite difference method
[ASME PAPER 70-FE-A] 16 p2892 A70-33641
- Aerodynamic drag coefficients of micron size particle clouds in compressible transonic flow, using light extinction method
16 p2894 A70-33882

Forces on two dimensional oscillating airfoil in subsonic compressible wind tunnel flow, solving partial differential equation for pressure potential by integral transform technique

16 p2839 A70-34248

Local skin friction law for turbulent boundary layers in incompressible flow, applying rule for compressible flow conditions

17 p3075 A70-35922

Pressure distribution measurements on wedges in compressible flow at Mach 0.5-2.2, discussing wedge angle, Mach number and boundary layer thickness effects

17 p3013 A70-35923

Compressible flow of two component two phase mixtures through convergent nozzles and orifices, determining initially or annular dispersed flow patterns

18 p3239 A70-36231

Plane compressible sonic flow around symmetrical cylinder subjected to parallel incident flow, using function-theoretic method

18 p3241 A70-36378

Infinite elastic plates traveling wave flutter in compressible flow, investigating viscous damping effects on critical flow velocity

18 p3343 A70-36701

Optimal control for one dimensional compressible gas flow, combustion and heat exchange, described by first order partial differential hyperbolic equations

19 p3402 A70-37240

Compressible fluids flow with conductivity tensor in presence of thin wing under orthogonal fields, reducing integral equation to Fredholm equation

19 p3351 A70-37599

Direct and incremental variational formulations for steady compressible lubrication based on finite element method, noting limitations of numerical techniques

[ASME PAPER 69-LUB-12] 19 p3436 A70-37616

Steady compressible supersonic planar flow of viscous heat conducting fluid under linearization freestream conditions, describing slip flow past finite flat plate

20 p3557 A70-39228

Plasma accelerator compressible turbulent boundary layers numerical calculation taking into account MHD effects, electron thermal nonequilibrium and finite rate ionization

20 p3682 A70-40017

Boundary conditions on vector and scalar potentials in viscous three dimensional hydrodynamics, investigating compressible flow problems

20 p3612 A70-40115

Compressible plasma axisymmetric channel flow under electromagnetic forces and ohmic heating, noting velocity profiles and current density

[AIAA PAPER 70-1098] 20 p3683 A70-40239

Heat transfer from thin plate in compressible gas flow, considering interface temperature as nonanalytic function

21 p3953 A70-42086

Compressible plasma flow in axisymmetric channels under EM body forces and Joule heating

23 p4228 A70-44934

German monograph on casing and hub wall friction effects on three dimensional flow in turbocompressors in subsonic compressible working fluids

24 p4287 A70-45096

Viscous heat conducting compressible fluid flow past slender axisymmetric body, presenting Navier-Stokes hypersonic strong interaction theory

24 p4289 A70-46020

COMPRESSIBLE FLUIDS

Vortex diffusion in viscous compressible fluid, deriving nonlinear differential equations from density velocity and pressure discontinuities considerations

01 p0060 A70-10145

Reflection and transmission characteristics of screens in duct obstructing shock propagating in unsteady compressible fluid, describing theoretical models and experimental detection

01 p0060 A70-10224

Cauchy problem solution asymptotic behavior for linearized system of rotating compressible fluid at time approaching infinity

01 p0064 A70-11031

Navier-Stokes hypersonic weak interaction theory for viscous heat conducting compressible fluid flow past slender axisymmetric body

01 p0003 A70-11097

Pressure waves in accelerated sphere filled with compressible liquid, using convolution integral for pressure distribution on inner surface

01 p0067 A70-11186

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas

01 p0068 A70-11579

Boundary layer processes under unsteady suction allowing for compressibility, relating suction value to external velocity and wall temperature

03 p0465 A70-13275

Flow characteristics of compressible fluid in compressor or turbine stage, determining radial distribution of downstream Mach number

03 p0410 A70-14271

Boundary layer equations closed form similarity solutions for laminar jet of compressible pseudoplastic fluid, discussing velocity transverse behavior

04 p0671 A70-15053

Laminar and turbulent flows of compressible media in rotating pipes, analyzing velocity distribution, angular velocity and Coriolis effects using Abel equation

04 p0672 A70-15159

Poloidal magnetic field influence on compressible fluid convection in spherical shells, using variational method to obtain stability criteria

04 p0758 A70-15695

Compressible fluid flow velocity profile in turbine stage evaluated by streamline correlation and actuator disk method

06 p0967 A70-17469

Unsteady interaction of compressible fluid and flat circular deforming elastic membrane analyzed by coupled computer program method

[AIAA PAPER 70-75] 06 p1039 A70-18082

Navier-Stokes equations numerical integration in Eulerian coordinates, applying results to compressible and incompressible fluids steady flow

[AIAA PAPER 70-2] 06 p1040 A70-18113

Acoustic impedances of periodically compressed thin fluid layers, discussing effect of mass, viscosity, elasticity and compressibility of medium

06 p1107 A70-18475

Solid surface-compressible liquid drop high speed impact damage, discussing contact pressure

06 p1053 A70-18611

Steady turbulent boundary layer of compressible perfect gas on heat insulated surface with suction and longitudinal pressure gradient

07 p1254 A70-19081

Hydrostatic journal bearing dynamic rigidity for compressible and incompressible fluids, describing fluid film elasticity and damping characteristics

07 p1293 A70-19121

Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow

[AIAA PAPER 69-169] 07 p1249 A70-19310

Transition from compressible to incompressible fluid assuming isothermal flows and finite stresses for density at or different from initial value

10 p1863 A70-24008

Quasi-one dimensional motion of perfect compressible fluid through pipe, considering one dimensional schemes in aerodynamics

10 p1865 A70-24102

Viscous compressible fluid steady laminar flow between coaxial cylinders, studying flow characteristics for uniform inner cylinder velocity

10 p1870 A70-24792

Heat conduction and viscosity effects on compressible fluids characteristics

11 p2037 A70-26399

Invariant transform of motion and continuity equations for steady three dimensional flows of compressible fluids in absence of massive forces

11 p2041 A70-26598

Regularity domain and singularity location of stream function of transonic two dimensional compressible fluid flow, using integral operators

12 p2260 A70-26972

Thermal boundary layer equations solved for compressible gas at rotating axisymmetric surface with viscosity as linear function of temperature

12 p2331 A70-27698

Reciprocity principle for biased and two component compressible plasmas

12 p2282 A70-27971

Plane electromagnetic wave interaction with compressible plasma fluid moving with uniform velocity in vacuum, calculating reflection and transmission coefficients

13 p2462 A70-29101

Compressible fluids steady state equations invariant transformation, establishing sound speed-Mach number relation

13 p2389 A70-29458

Compressible fluids Alfvén flow with Hall effect presence of thin foils, reducing problem to Fourier integral equation

13 p2442 A70-29484

Compressible fluid two dimensional irrotational flow past Roshko model in channel, deriving exact solution by hodograph method

13 p2341 A70-29487

Linearized two dimensional double vortex sheet model of inviscid compressible jet instabilities over all Mach numbers

15 p2722 A70-32375

Kinetic energy and pressure distribution of three dimensional compressible fluid flow, using invariant transformation of Euler motion equation

16 p2890 A70-33073

Aerodynamic forces exerted by compressible fluid on airfoil cascade in subsonic potential flow

16 p2833 A70-33075

Lagrangian invariants of inviscid compressible fluid dynamics applied to hydrodynamic equations

17 p3070 A70-35333

Free convection in compressible viscous heat conducting fluid, determining parameters leading to onset

17 p3198 A70-35697

Acoustic turbulence spectrum in compressible fluid with potential motion, using complex traveling wave amplitudes in hydrodynamic equations

18 p3242 A70-36637

Axisymmetric one dimensional compressible flow theory applications to compressible fluids ducted flow [ASME PAPER 70-GT-82] 18 p3243 A70-36882

Compressible and incompressible Stokesian fluids motion described by finite element analog of Navier-Stokes equation

20 p3607 A70-38999

Compressible viscous fluid steady plane flow in laminar boundary layer on impermeable isothermic surface, describing parametric method of integrating flow equations

20 p3611 A70-39806

French book on compressible fluid mechanics covering adiabatic, one and two dimensional flows, linear equations, friction factor, heat exchanges, supersonic, subsonic flows, etc

21 p3743 A70-40624

Hodography of compressible fluids three dimensional irrotational isentropic flow

21 p3808 A70-41439

Acoustic wave propagation in continuum of inviscid compressible heat conducting fluid, determining stability criteria

22 p4073 A70-42571

Miles-Howard theorem extension to gravitationally stratified compressible fluid containing parallel shear flow, considering stability against adiabatic perturbations

23 p4179 A70-43976

Turbulent nonadiabatic flow of compressible gas at inlet and main sections of variable cross section plane channel

23 p4183 A70-44739

COMPRESSION

Protein metabolism of mice exposed to compression of air-oxygen mixture containing 27 percent oxygen, showing relationship to food intake

01 p0028 A70-11363

Lateral compression of rocks and global shells multilayers, using equations for buckling of single free stratum

18 p3255 A70-37076

COMPRESSION BUCKLING

U BUCKLING

COMPRESSION LOADS

NT AXIAL COMPRESSION LOADS

NT IMPACT LOADS

Welded flat plate specimen to evaluate low cycle crack initiation and propagation of butt welds under compressive loading, discussing design, fabrication and testing

[ASME PAPER 69-SESA-7] 01 p0199 A70-10452

Curved cylindrical panel flutter in presence of uniform compressive load, taking into account relationship between actual and ideal shape

01 p0202 A70-10946

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads

02 p0315 A70-11662

Mathematical model for local postbuckling strength of flat truss core sandwich panels loaded in compression, considering application to Ti structures

02 p0386 A70-11948

Load and strain trajectory vectors components determined for tension followed by transverse compression in five dimensional space

02 p0390 A70-12803

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering Lure theory and variational principle for uniform compression load

03 p0589 A70-13336

Stability analysis of orthotropically symmetric strip under uniformly distributed compressive forces applied to shorter ends, deriving critical load formula

03 p0590 A70-13402

Elastoplastic bodies stability under compression, using theory of small elastoplastic deformations and linearized equations of nonlinear elasticity theory

03 p0591 A70-13440

Local buckling and failure of thin walled compression column with supported flanges, analyzing strength reduction by eccentricity

03 p0600 A70-14254

Elastoplastic bar stability compressed by tangential force, showing ductility effect on critical parameters, perturbed motion and stability loss process

04 p0767 A70-14484

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression

04 p0773 A70-15008

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading

04 p0773 A70-15009

Metals and alloys creep under tension and compression at elevated temperatures, considering plastic deformation equation applicability

04 p0707 A70-15265

Computational procedures for matrix analysis of stability and vibration of thin flat rectangular plates in longitudinal compression

05 p0927 A70-16010

Compressive forces eccentricity influence on circular cylindrical shell stability noting relation to bending moments

05 p0936 A70-16239

Isotropic elastic cylindrical shell stability under combined compressive and axisymmetric local loads, using equilibrium equations for shallow shells

05 p0936 A70-16240

Shape optimization of elastic rod compressed by force directed toward point on undeformed rod axis, deriving optimal bending line

05 p0937 A70-16373

Resistance strain gauge load cell for measuring compressive loads under high hydrostatic pressure, discussing gauge bonding

05 p0848 A70-16377

Buckling behavior of elliptical cylinders under normal pressure using linear thin shell theory and Galerkin method, compared with test results
[AIAA PAPER 70-105]

06 p1169 A70-18038

Elastic membranes deformation compressed by restraints using discrete dynamic programming

07 p1400 A70-18680

Metallic adhesion produced by surfaces compression, discussing asperities plastic deformation and macrodeformation caused by contact area growth

07 p1292 A70-18939

Stress relaxation in polytetrafluoroethylene (PTFE) at various compression deformations and temperatures, considering residual stresses degree

07 p1321 A70-20228

Limiting equilibrium of shells of revolution with different yield points under tension and compression

08 p1583 A70-20527

Rib-reinforced cylindrical shells stability under longitudinal compressive loading, studying stress-strain state using network method

08 p1583 A70-20528

Limiting equilibrium of rigid-plastic cylinder subjected to compression by concave stamps

08 p1583 A70-20533

Hertzian contact stress deformation coefficients defined in transcendental equation with elliptic integrals noting errors

08 p1593 A70-21617

Limiting equilibrium of unbounded cracked elastic plate with circular hole, studying crack propagation under compression

09 p1769 A70-22121

Optimizing shape of elastic bar compressed by polar force obtained by determining functional extremum representing volume of bar at constant critical force

09 p1769 A70-22252

Elastic beam stability, natural frequencies and critical forces under longitudinal impact with nonuniform compressing force

09 p1780 A70-23116

Flat rectangular elastic body stable oscillations with clamped base under compression loads, deriving difference scheme for approximation

09 p1782 A70-23297

Buckling stability of slender knife-edge suspended rods subjected to compression end loads

10 p1955 A70-24053

Cylindrical coil springs cold winding loading processes, considering initial tension or compression of wire and combined stresses

10 p1894 A70-24297

Minimum weight design for symmetrically stiffened cylindrical shells under compression based on linear orthotropic stability theory

10 p1958 A70-24560

Limiting load for annular plates made of material having different yield points in tension and compression

11 p2129 A70-25560

Rectangular conical shells reinforced along ribs by belts under tension/compression calculated by initial functions method

11 p2130 A70-25568

Compressive stress critical moment induced instability and weakening incorporated in thin walled beam design

11 p2131 A70-25590

Compression process in turbulent boundary layer on control surface at hypersonic speeds, noting influence on surface effectiveness and heating
[ONERA-TP-814]

11 p1979 A70-25815

Elastic bending of clamped and supported elliptic and parabolic plates under external pressure investigated by lines of equal deflection

11 p2133 A70-25839

Polycrystalline lanthanides and metals resistance to deformation under compression and tension at different temperatures and strain rates

12 p2257 A70-28273

Cantilevered column stability under constant lower load in presence of external damping

13 p2510 A70-28733

Critical loads and stability of isotropic cylindrical shells under uniformly distributed longitudinal compression loads based on network method

13 p2514 A70-29287

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering theory and variational principle for uniform compression load

14 p2657 A70-30714

Elastic membranes deformation compressed by restraints using discrete dynamic programming

15 p2813 A70-31472

Bifurcation stability in geometrically nonlinear shells of revolution under transverse loads, considering tension and compression deformation

15 p2817 A70-32168

Stability characteristics of elastic shallow shells of revolution in temperature field and under compression, reducing variational equation of bending by Ritz method

15 p2817 A70-32169

Hysteresis loop behavior under tension-compression cycle fatigue related to Meyer strain hardness values of cyclically strained metals

16 p2934 A70-34334

Temperature and constant compressive loading effects on mechanical characteristics of fiberglass reinforced plastics

17 p3127 A70-35341

Anisotropic disk compressed by isotropic ring of smaller radius, considering elastic equilibrium

18 p3336 A70-36134

Barium fluorides single crystals compression, investigating stress-strain behavior and dislocation mobility

19 p3483 A70-37339

Buckling equilibrium equations for thick rectangular block under compression loads, noting bifurcation points

19 p3536 A70-37683

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads

19 p3453 A70-38436

Compressive force on elastic plate of arbitrary shape related to number of equilibrium forms, using Karman equations

20 p3724 A70-39861

Weighing systems electronic load cells calibration for tension and compression loading, attributing non-repeatability to bending moments
[SAWE PAPER 816]

20 p3634 A70-40356

German monograph on refractory materials softening under bending and compression at high temperatures

22 p4061 A70-43742

Fatigue strength of stiffened aircraft panels subjected to repeated buckling by compression loads
[ICAS PAPER 70-35]

23 p4267 A70-44132

Cylindrical shell stability under off-center compression loads applied to end faces, determining collapse conditions

23 p4268 A70-44169

Axially compressed circular cylindrical shells subject to relaxed boundary conditions, calculating buckling loads as function of length to radius ratio
[ASME PAPER 70-APM-O]

23 p4269 A70-44397

German monograph on notched structural steels fatigue properties and crack propagation under tensile-compressive alternating loads

24 p4356 A70-45086

COMPRESSION TESTERS

U COMPRESSION TESTS

COMPRESSION TESTS

Offset yield strengths of TD-Ni and Al-aluminum oxide SAP type two phase alloys in tension and compression

01 p0119 A70-10736

Polyethylene and polypropylene mechanical behavior under tensile and compressive loads and subject to hydrostatic pressure, obtaining tensile nominal stress-strain curves for various pressures

03 p0517 A70-14201

Compression failure of unidirectional fiberglass reinforced plastics

04 p0712 A70-14487

Compression test for ductile materials based on Saint Venant principle of plasticity to reduce friction effects on deformation by lubricant pressurization

04 p0776 A70-15373

P-v-T-x relationships determination method for gaseous mixtures at high pressures and temperatures, studying He-nitrogen mixtures compressibility

07 p1420 A70-19205

Test specimen shapes for determining tensile, compressive and edge-wise shear properties of reinforced plastic laminates

08 p1529 A70-21878

Tension, compression and in-plane shear tests to obtain boron epoxy composite materials mechanical properties to design FB-111 wing box extension

08 p1529 A70-21879

Test methods for evaluating tensile, compressive, interlaminar shear and bearing strength properties of carbon yarns and flat and tubular composites

08 p1529 A70-21881

Compression test data of Al-B composites used for predicting structural element failure

08 p1523 A70-21886

Test standards for boron epoxy flat laminates, proposing specimen geometries and testing methods

08 p1530 A70-21887

End plugs bending moment and shear loads reduction during compression tests of composite orthotropic cylinders

08 p1594 A70-21889

Failure compression tests of flat rectangular Al alloy panels presented in unitary form, adopting structural load index for solution from weight standpoint

09 p1782 A70-23376

High temperature compressive creep tests at constant stress, describing strain measurement techniques and servocontrolled compressive equipment

12 p2206 A70-27214

Stress-strain relationships model for nonlinear restrained cylinders, using compression tests and finite element method

14 p2660 A70-31135

Materials testing machine for tension, compression and flexure at constant strain rate and for fatigue

16 p2900 A70-33067

Plastic materials Poisson ratio and Young modulus measurements by triaxial compression method

17 p3089 A70-35048

Strain measuring apparatus for multiple samples simultaneous compression tests at near absolute zero temperatures

20 p3632 A70-39628

Thin walled column buckling relation to plate element buckling, studying deformation, stress state, failure mechanism and ultimate load

22 p4116 A70-43214

COMPRESSION WAVES

Steady one dimensional flow in gas filled cylindrical tube, studying shock induced compression wave generated by sudden piston acceleration

01 p0062 A70-10804

Compression wave mechanism of supersonic combustion controlled by mixing, discussing multiple injector design, thermal compression and geometry effect

02 p0399 A70-12041

Resonant compression waves in geomagnetic tail estimated for frequency and spatial distribution by single layered two dimensional model

04 p0680 A70-15127

Premixed compression initiated supersonic combustion, noting sensitivity to small perturbations in inlet flow variables
[AIAA PAPER 68-995]

07 p1421 A70-19318

Multiple scattering of plane time harmonic compressional elastic wave impinging on parallel circular cylindrical inclusions in finite domain, analyzing stress field

08 p1592 A70-21469

Shock wave configurations across compression cascades in transonic approach flow

09 p1604 A70-22657

Compression stress wave generated by longitudinal impact of two cylindrical elastic rods, measuring propagation along rod by strain gage stations

12 p2325 A70-27617

Solar radar echo characteristics, discussing coronal compressional waves and refraction by plasma clouds and moving plasma irregularities

13 p2370 A70-29852

Circular cylindrical cavity in elastic space, calculating stresses due to incident plane harmonic compression wave

15 p2819 A70-32204

Gravitational compression of spherical cloud, determining asymptotic features of gas motion near center

15 p2808 A70-32882

Circular inclusion interface separation in matrix under incident compressive waves interpreted for fiber reinforced composites

17 p3185 A70-34963

Omni-directional dynamic stress gage as embedded elastic inclusion, discussing transient response to ground shock compression wave pressure

19 p3422 A70-37699

Compressional sound waves electromagnetic generation in metals in static magnetic fields, examining acoustic amplitude variations

22 p4074 A70-42968

Exponential compression wave propagation in conical rod with smooth tapering cross section

22 p4121 A70-43726

Two dimensional steady flow around slender profiles at free transonic stream with curved compression shocks, approximating by hodographic method

23 p4131 A70-44023

Shock wave structure calculation in liquids containing gas bubbles, taking into account compression wave steepening by convection

24 p4326 A70-45783

COMPRESSIVE STRENGTH

Axial and traction loaded boron epoxy laminates tensile and compressive elastic properties and strengths compared from test data including strain gauge measurements

03 p0586 A70-13115

Creep, ductility and short term tensile and compression strength test facility for graphite in 300-3500 K temperature range

05 p0875 A70-17068

Compression strength of polyester resin reinforced with hard drawn and softened steel wires, discussing variations from predicted performance

07 p1320 A70-19954

Dynamic compressive properties of polypropylene, polystyrene bead and extruded polystyrene foams tested at given strain rate under room temperature

08 p1527 A70-21329

Compressive yield strength of iron meteorites, discussing flow stress, microstructure, grain size, plastic deformation, slip lines, etc

18 p3314 A70-36498

Composite material engineering problems, discussing tensile, compressive and shear strengths, design approaches, unidirectional properties and substance characterizations

20 p3651 A70-40027

Weightlessness and immobilization effects on mechanical tolerance of bone compressive and breaking strength in monkeys

22 p3973 A70-43648

COMPRESSOR BLADES

Ultrasonic detection of service induced cracks near tenon base region of second stage A1 compressor disks

01 p0096 A70-10003

Two stage axial flow compressor with variable pitch guide vanes, discussing HF vibration reduction of rotor blades

01 p0166 A70-11419

Rotating compressor vanes vibration frequencies and modes using shell theory, considering Coriolis forces and rotation rates effects

01 p0211 A70-11427

Single stage experimental front fan designed for aircraft engines, measuring overall and blade element performances

02 p0355 A70-12258

Radiation pyrometers development for in-flight measuring and controlling aircraft engine compressor blades temperature

[SAE PAPER 690432]

03 p0480 A70-12900

Discrete frequency noise generation from axial flow compressor blade row, using experiments in small scale Freon loop

[ASME PAPER 69-WA/FE-22]

04 p0733 A70-14777

Optimized compressor blades, examining Le Foll boundary layers theory possibilities as design method

04 p0621 A70-15667

Bladed wheels stability in centrifugal compressors, calculating natural vibration frequencies of rotors

07 p1364 A70-19634

Stetson-Powell time fringe hologram technique of vibration analysis applied to nodal patterns in compressor blade and turbine disks

09 p1679 A70-22979

Tandem axial compressor performance for various blade stagger and flap angle values of rotor row, investigating gap influence

09 p1608 A70-23736

Transonic two stage compressor design and performance, discussing interblade row traverse data

09 p1608 A70-23742

Compressor blade performance dependence on Reynolds number, turbulence intensity and axial velocity ratio, considering wind tunnel tests with porous side walls

09 p1609 A70-23748

Axial flow compressor blade rings interaction effect on angular speed of rotating stall zones

11 p1974 A70-25780

Compressor cascade flutter phenomenon, investigating factors affecting aerodynamic damping force on annular cascade blades

13 p2341 A70-29447

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance

[ASME PAPER 69-GT-6]

14 p2529 A70-31023

Secondary effect signatures for potential failure detection in jet aircraft engine compressor blades

[ASME PAPER 70-DE-58]

16 p2918 A70-33517

Circular blade cascade design for supersonic vane diffuser of radial flow centrifugal compressor

16 p2837 A70-33764

High strength Ti alloys for aircraft gas turbine engines, determining critical properties for compressor fan blades

17 p3122 A70-34436

Pure impulse principle applied to axial compressor impellers with high solidity high camber blades

18 p3301 A70-36647

Two dimensional compressor cascades of double circular arc and wedge shape blades testing performance in transonic and supersonic wind tunnels

[ASME PAPER 70-GT-7]

18 p3302 A70-36829

Supersonic cascade wind tunnel performance evaluation, using compressor blades of simple geometric shapes

[ASME PAPER 70-GT-110]

18 p3238 A70-36848

Vibration characteristics of low aspect ratio compressor blades, using thin shell theory and Rayleigh-Ritz method

[ASME PAPER 70-GT-94]

18 p3305 A70-36876

Boundary layer optimization for high turning axial flow compressor blades, using flow theory and conformal mapping

[ASME PAPER 70-GT-88]

18 p3209 A70-36879

Cascade tunnel testing role in designing supersonic compressor rotor blading for lower jet engine weight and fuel consumption

[ASME PAPER 70-GT-79]

18 p3305 A70-36885

Blade root design for axial flow compressors and turbines, avoiding tensile stress concentration

19 p3490 A70-38616

Turbocompressor disk materials selection by low cycle fatigue tests, discussing stop and start repetition and cracks in stress concentration zones

21 p3867 A70-41261

Low aspect ratio compressor blade cascade performance at blade span center, discussing pressure loss, angle of attack and staggering

22 p3957 A70-42272

German monograph on three dimensional flow and blade pressure measurements at axial flow compressor casing wall, discussing test control and digital data processing

24 p4332 A70-45093

Fibrous composites use in compressor blades, discussing materials characteristics requirements relative to environmental and stress conditions in aircraft operational service

24 p4392 A70-45169

Turbine compressor blades vibration mode measurements by holographic interferometry

24 p4334 A70-45563

COMPRESSOR EFFICIENCY

Ballistic compressor performance as high intensity pulsed light source, discussing Xe gas heating and laser pumping

02 p0311 A70-11921

Axial compressor aerodynamics and efficiency in aircraft turbine engines

[ONERA-TP-767]

09 p1604 A70-22656

Transonic two stage compressor design and performance, discussing interblade row traverse data

09 p1608 A70-23742

Stagnation pressure losses in radial vaneless diffusers to estimate compressor performance, noting one dimensional analysis

11 p1974 A70-25782

Supersonic axial flow compressors, studying shocks shared by rotor and stator to obtain high efficiency

11 p2101 A70-25819

Axial flow compressor clearance control coatings at blade tip paths for efficiency

[SAE PAPER 700330]

12 p2291 A70-27462

Air intake distortions effect on compressor performance, discussing radial and peripheral gradients

15 p2787 A70-32248

Axial flow compressors off-design performance calculation using radial equilibrium equation

15 p2791 A70-32770

Turbofan engine compressor system performance dependence on circumferential extent, magnitude and rate of change of inlet temperature in altitude test facility

[AIAA PAPER 70-625]

16 p2968 A70-33590

Axial compressor aerodynamics investigation methods concerning compressor flow for efficiency improvement

16 p2836 A70-33757

Axial flow compressor off-design performance optimization by adjustable inlet guide vanes with variable trailing edge flaps

18 p3304 A70-36846

Rotor wakes intrastator transport effects on high Mach number axial flow compressors performance, considering stagnation temperature profile and rotor blade loss factor

[ASME PAPER 70-GT-39]

18 p3209 A70-36869

Axial flow compressor stage efficiency under rotary separation conditions, investigating dependence on flow rate

19 p3490 A70-37252

COMPRESSOR ROTORS

Bladed wheels stability in centrifugal compressors, calculating natural vibration frequencies of rotors

07 p1364 A70-19634

Pressure balanced rotor flow path design for mixed flow centrifugal compressors, calculating losses in rotor and diffuser section

[ASME PAPER 70-GT-12]

18 p3209 A70-36863

Cascade tunnel testing role in designing supersonic compressor rotor blading for lower jet engine weight and fuel consumption

[ASME PAPER 70-GT-79]

18 p3305 A70-36885

Off-design pressure losses in single stage axial flow compressor, using test rotor in annular duct

[ASME PAPER 70-GT-78]

18 p3210 A70-36886

Gas turbine engine compressor rotor roller bearing operation conditions analysis by computer calculation of thermal regime

21 p3834 A70-41777

COMPRESSORS

NT CENTRIFUGAL COMPRESSORS

NT SUPERCHARGERS

NT SUPERSONIC COMPRESSORS

NT TRANSONIC COMPRESSORS

NT TURBOCOMPRESSORS

Corrosion induced fatigue damage suppression in jet engine compressor steel components, describing various surface treatment effects

01 p0165 A70-10699

Free piston compression with sonic flow outlet for determining orifice size by matching with bounce parameters

07 p1249 A70-19334

Martensitic stainless steels corrosion damage in jet engine compressors noting effects of temperature, surface condition, time and chloride presence

12 p2252 A70-26963

Steady and nonsteady engine/inlet flow field simulation for engine/compressor testing, determining feasibility of variable ramp aerodynamic device

[AIAA PAPER 70-591]

15 p2672 A70-31788

F-111A airplane in-flight inlet pressure fluctuations for engine compressor surge, discussing average turbulence factor

[AIAA PAPER 70-624]

16 p2840 A70-33543

Soviet book on vibration and balancing of aircraft engine rotors covering structural deformation and dynamics of turbine engines and compressors

19 p3489 A70-37237

Aircraft noise sources, examining compressors with dynamic pressure devices and jets with turbulence investigations

[ICAS PAPER 70-22]

23 p4232 A70-44111

COMPTON EFFECT

Diffused X ray background in isotropic world models in terms of Compton radiation from cosmic ray electrons in intergalactic space

02 p0356 A70-11743

Cosmic X ray background interpreted as Compton collisions between cosmic black body photons and relativistic electrons in radio sources

02 p0360 A70-12792

Galactic X rays and high energy gamma rays in terms of cosmic ray electrons Compton scattering by submillimeter radiation

05 p0900 A70-16100

Electron momentum distributions from Compton profiles of Li-Mg polycrystalline samples, exhibiting discontinuity at free electron value of Fermi momentum

05 p0892 A70-16471

Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar

05 p0917 A70-16904

Compton-Getting effect for cosmic ray particles and photons and Lorentz-invariance of distribution functions, discussing thermal background radiation, proton spectra, etc

07 p1369 A70-20071

Inverse Compton collisions of relativistic electrons with universal black body photons for diffuse component of cosmic X rays

07 p1369 A70-20166

Compton scattering of synchrotron radiation from parent electrons in pulsars, calculating Compton-synchrotron radiation from NP 0532 leads to lower limit for magnetic field

07 p1369 A70-20221

Compact nonthermal radio sources in M87 giving rise to X ray source through Compton effect

09 p1744 A70-22520

Magnetic monopole flux limits in primary cosmic radiation derived from moon-poor shower data and inverse Compton scattering

16 p2972 A70-33050

Magnetic field effects on Compton scattering and radiative opacity, considering longitudinal and transverse propagation with circular polarization

17 p3154 A70-34538

Diffuse cosmic X rays produced by Compton scattering of far IR radiation on cosmic ray electrons

19 p3505 A70-38113

Polarization in inverse Compton effect for arbitrary photon and electron distributions, discussing monochromatic photon beam

19 p3524 A70-38696

Diffuse cosmic X and gamma ray spectrum analysis, considering implications for Compton scattering models in intergalactic space

20 p3695 A70-39049

Crab Nebula electromagnetic spectrum deviation from power law in microwave region, investigating origin from Compton scattering of high energy electrons

21 p3875 A70-40683

COMPUTATION

NT ORBIT CALCULATION

- Turbulent boundary layers computations - Conference, Stanford University, August 1968, Volume 2
02 p0280 A70-12271
- Optimization problems computing methods - Conference, San Remo, Italy, September 1968
03 p0461 A70-14338
- Computing methods in optimization problems - Conference, San Remo, September 1968, Volume 2
07 p1324 A70-19266
- Trachtenberg rapid calculation methods for multiplication, describing triangular or double product method and general algebraic theory
07 p1327 A70-19785

Soviet collection of papers on control mechanics and processes, computational mathematics
09 p1772 A70-22532

Artifices to allow computing time reduction in recursive data elaboration for high order differential system
09 p1720 A70-22647

Computational load reduction in aircraft tracking, comparing sensitivity and Hilbert norm methods
11 p2025 A70-26212

Computational methods for multiinput linear control systems applied to designing lateral and longitudinal autopilots for jet transports subject to gust loads
12 p2203 A70-27417

Automatic computation at SNECMA for turbomachines R and D, emphasizing digital computer for scientific calculation and analog simulator for engine regulation
12 p2193 A70-28073

Collection of papers on methods in computational physics, plasma physics covering Vlasov equation, simulation, finite difference, etc
18 p3295 A70-36787

COMPUTER COMPONENTS

NT COMPUTER GRAPHICS

Digital computers in aircraft, discussing automatic control systems, components and advantages over analog systems
15 p2705 A70-32299

Cellular logic arrays design for nonrestoring binary division, with application to Napierian logarithm generation
17 p3050 A70-34571

Dual mode suboptimum minimum time control of high order systems with negative roots and step displacement inputs, using simplified computer switching
21 p3801 A70-40756

Modular aerospace digital computer system architecture using off-shelf components for rapid avionic computing system realization
21 p3795 A70-41691

COMPUTER DESIGN

Aerospace digital computer design development, proposing data processing system with improved flexibility by making subassemblies more independent with multiplexed interface
01 p0047 A70-10305

Digital adaptive-element building blocks in monolithic Si structures for MOS large scale integration, considering serial/parallel multiplier and shift register chips
01 p0047 A70-10458

Aerospace computers stringent design requirements and applications in spacecraft, ballistic missiles and integrated avionic systems
02 p0264 A70-11688

Associative processor with content addressability and simultaneous arithmetic capability to circumvent speed restriction, comparing performance and cost with conventional digital computer
02 p0265 A70-12186

Digital systems design laboratory as instructional tool and experimental model for education
02 p0275 A70-12190

Spaceborne computer system for manned space station to perform functions in addition to guidance and navigation including processing
[AAS PAPER 69-581] 04 p0654 A70-14651

Systems concepts in design of computer operated display systems in air defense and air traffic control systems, discussing alphanumeric display, panoramic display, etc
05 p0827 A70-16183

Federated and integrated computer systems for aerospace applications, discussing system dependent variables
06 p1013 A70-17352

Complex integrated avionics computer system design for navigation, guidance and control of rotary wing aircraft, emphasizing microelectronic modular assembly
06 p1014 A70-17353

Aircraft computer design performing basic arithmetic operations by sampling method noting speed increase
06 p1014 A70-17859

Prototype Onboard Processor (OBP) designed for high reliability, low power dissipation, small size and

low weight, discussing attitude control signal processing
08 p1464 A70-20609

Automatic test equipment from fourth generation computer viewpoint, considering cost and size reduction trends in avionics
08 p1469 A70-20654

Fourth generation systems architecture in microprogramming in terms of control logic, describing inner computer as subroutine processor for controlling interstation communication
08 p1465 A70-20816

Hybrid computers capabilities, programming and operation
09 p1640 A70-22212

Machine design similar to human brain for recognition and classification of information
09 p1641 A70-22708

Computer and system design automation, considering language problems, microprograms, optimization on subsystem suboptimal basis, etc
10 p1845 A70-24874

Airborne computer design for short range attack missile /SRAM/ to perform aircraft navigation and missile fire control
12 p2192 A70-27800

Digital correlator LSI circuits design, layout and mask considerations, diffusion, metallization and dielectric deposition
13 p2378 A70-29551

Biresidue error-correcting codes for digital computers involving use of residue check circuitry working with arithmetic unit
13 p2375 A70-29938

Berkeley array processor /special purpose digital computer/ for correlation, convolution, recursive filtering, matrix multiplication, etc
13 p2376 A70-29941

Parallel associative unstructured element computer design for real time radar track data processing
16 p2869 A70-33466

General purpose parallel processor design for avionics, considering radar signal processing
16 p2910 A70-33467

Design and reliability of digital systems for hard cores of fault tolerant computers /hybrid- redundant systems/, discussing advantages over multiplexed systems
16 p2887 A70-33734

[JPL-TR-32-1490] Coherent optical computer system driven by membrane light modulator /MLM/, describing electro-optical properties and operating characteristics
16 p2871 A70-34055

Real time computers design tradeoffs in avionics systems
17 p3050 A70-35510

Brain-like computer with learning rather than programmable capability, discussing pattern recognition and task performance
18 p3230 A70-36775

Soviet book on computer design and construction covering man machine interfaces, internal languages, interpretation systems, memory distribution, solution processes, etc
19 p3385 A70-38794

Small hybrid computer design, describing algorithms and subsystems for statistical studies
20 p3593 A70-39914

Small digital computer arithmetic unit design, discussing number representation, addition and subtraction methods for performance and cost
21 p3793 A70-40757

Aerospace computers design, considering real time operation and reliability requirements
21 p3794 A70-41686

Aerospace digital computer family structural commonality, considering architecture, hardware and support software
21 p3794 A70-41687

Modular aerospace digital computer system architecture using off-shelf components for rapid avionic computing system realization
21 p3795 A70-41691

Semiconductor circuits large scale integration for aerospace computers, discussing fabrication and design
21 p3799 A70-41692

Aerospace microelectronic digital computer design, discussing optimal packaging by use of integrated circuits
21 p3795 A70-41694

Ultrasurvivable and maintainable computer design involving redundant spare modules and own tester for aerospace applications
21 p3795 A70-41695

Airborne digital computers in aircraft systems, discussing optimization, design and economic effectiveness
21 p3796 A70-41920

Reprogrammable read-mostly memory /RMM/ using integrated circuit array of amorphous and crystalline semiconductor devices, discussing design and applications
22 p3996 A70-42772

Modular plated-wire digital associative processor with content addressable memory, distributed arithmetic and I/O capability at each word
22 p3994 A70-43104

Optical read-write mass memory based on holographic storage and light addressable matrix array, discussing significance to computer design and usage
22 p3994 A70-43606

Digital computer constructed with diodes and transistors logic for evaluating matrix determinants and minors
23 p4166 A70-43955

Computer hardware and software technology for complex problems, discussing switching speeds and parallel and pipeline designs
23 p4167 A70-44716

COMPUTER GRAPHICS

NT DATA PROCESSING TERMINALS

NT PLOTTERS

Man-computer graphic systems utilization for wing/body aerodynamic design and analysis concept for subsonic vehicles
01 p0002 A70-10610

Computer driven display terminal as part-task limited area simulator, examining operational requirements and input characteristics
01 p0059 A70-11277

Dynamic structural analysis using computer graphics display, emphasizing applicability to man machine interaction at key decision making points
02 p0386 A70-11943

ALGOL Dynamic Display System for debugging and optimizing computer source language program, providing real time portrayal of static and dynamic block structure, etc
02 p0264 A70-12128

Display system utilization for diverse graphical operations, discussing interactive tasks and tradeoffs
02 p0265 A70-12153

Two dimensional structural analysis of engineering systems by computer graphics, outlining discrete element representation
02 p0388 A70-12477

Autostereoscopic display using vibrating varifocal mirrors, including laboratory computer generated real time image and movie projection systems
02 p0302 A70-12631

Computer graphics method for determining total magnetic field magnitude for various coil configurations and spacing, indicating optimum field uniformity near Helmholtz spacing
02 p0271 A70-12745

Integrated flight test data acquisition and processing system with real time graphic display, discussing ground station function
05 p0793 A70-15867

Computer-aided design using third generation computers and interactive graphic systems applied to transonic aerodynamics problems
05 p0816 A70-16122

Computer display graphic technique for business decision making, noting electronic aids
05 p0959 A70-16451

Deep reflector antennas mode composition by graphic computer techniques for maximum efficiency feed matches
06 p1021 A70-17575

Spherical frame of reference variations and additions for three dimensional vectorcardiograms composed of solid figures drawn by computer-driven CRT
07 p1221 A70-19594

Digital computer applications to structural analysis, discussing interactive graphics and engineering design
07 p1239 A70-20360

Alphanumeric and graphic computer driven CRT displays, discussing systems and component selection
08 p1465 A70-20672

Computer graphics applications to three dimensional vibration analysis, changing mass, stiffness, exciting load or load frequency at any point with light pen
08 p1467 A70-21050

Display objectives and relationships to recording techniques examined for memory/display system, considering requirement for elastic erasing technique
08 p1467 A70-21761

Airfoil analysis and synthesis, discussing computer graphics application to low speed shape and improved pressure distribution
08 p1594 A70-21867

Computer-generated shaded flicker-free on-line digital video display, allowing superimposed vector graphics with light-pen interaction
09 p1640 A70-22033

Hidden-line determination for computer-drawn polyhedra using edge classification scheme for CRT display applications
09 p1641 A70-22966

Digital computer impact on aerospace sciences and technologies in terms of computerized design, interactive graphics, flight simulation, Apollo systems checkout, etc
09 p1642 A70-23277

Computer-generated holography involving three dimensional object perspective projections computation for incremental rotations

09 p1683 A70-23529

Digital and analog computers applicability to graphic arts noting lack of aesthetic theories

10 p1845 A70-24235

Digital plotters operational characteristics, capabilities and applications

10 p1845 A70-24581

Pattern prerecognition processing for multioject pictures, describing illumination, contour and curvature computation

10 p1845 A70-24659

Real nonnegative function representing transmittance of computer synthesized Fourier transform hologram displayed on flying spot scanner and recorded on film

11 p2049 A70-25631

Aircraft design structural development and substantiation utilizing computer analysis and testing [SAE PAPER 700216]

11 p2134 A70-25888

Computer texture analysis for two dimensional scenery pictures involving periodicity invariance under Fourier transform

11 p2014 A70-26251

Computers graphical display devices for rapid designer-computer communication

12 p2191 A70-27013

Direct view storage tube /DVST/ as graphical display unit for small digital computer installation

12 p2232 A70-27374

Computer plotting of flow patterns and orographic cloud over/in lee wave flow, including rotors, blocking and high level turbulence

12 p2264 A70-27722

Binary-valued digital pictures noise cleaning by propagation processes

12 p2188 A70-27937

Interactive computer graphics using modified Continuous Systems Modeling Program /CSMP/

15 p2705 A70-31773

Plotter induced reconstruction errors minimization in computer generated binary Fourier transform holograms

15 p2737 A70-32044

Filters design by on-line graphic interface computerized synthesis utilizing three screen CRT display

16 p2867 A70-33041

CRT symbol generators design for high speed computer data display as function of electro-optical and human operator constraints

16 p2850 A70-33133

Foreground presence for computer generated and painted three dimensional photographic displays using fly eye lenses

16 p2906 A70-33177

Interactive computer graphics in six degree of freedom control, lunar roving vehicle navigation, orbital elements calculations, drop test simulation, etc

16 p2869 A70-33726

Interactive computer graphics applied to continuous system modeling program /CSMP/, describing hardware system configuration

16 p2870 A70-33727

Computer driven on-line CRT graphics displays for data acquisition and reduction

17 p3063 A70-35513

Ion-polar molecule collision time history plots and computer movies, calculating capture cross sections for mass spectrometry

18 p3292 A70-36561

Apollo spacecraft parts environmental simulation and testing, using real time computer generated graphic display

19 p3532 A70-37918

Coding device for computer storage of graphical information, describing construction and operation

19 p3385 A70-38576

Ion-molecule pair relative motion in capture collisions, using computer-made movies

19 p3474 A70-38796

Computer generated holograms production, reducing memory size and plotter resolution

20 p3627 A70-39098

Aircraft loadability design by computerized loading program using graphic plotter [SAE PAPER 836]

20 p3562 A70-40364

Mathematically defined curve incremental generation by computer, discussing parametric and non-parametric representations and digital differential analyzer technique

22 p3993 A70-43072

Graphical link between operator and digital computer using CRT display and light-pen input system during automatic electronic circuit design

23 p4150 A70-43952

Interactive man computer systems evaluation considering speech communication, SKETCHPAD and graphics capabilities, FORTRAN and programming languages and future manned space missions [AIAA PAPER 70-1292]

24 p4317 A70-45928

COMPUTER METHODS U COMPUTER PROGRAMS

COMPUTER PROGRAMMING NT LANGUAGE PROGRAMMING NT MICROPROGRAMMING NT MULTIPROGRAMMING NT ON-LINE PROGRAMMING

Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis

02 p0384 A70-11665

Algebraic properties of indefinite Riemann in integral useful in computer programming, emphasizing invariant algebras

04 p0654 A70-14683

Human controller decision in air traffic control, discussing manpower, on-line computer use and maximized systems

[ASME PAPER 69-WA/AV-1] 04 p0643 A70-14903
Problems experienced in using computers for medical diagnosis and treatment processes, discussing Bayes formula application

04 p0644 A70-15358

Computer aided medical diagnosis

04 p0644 A70-15359

Programming system for Poisson series manipulation on computer, writing subroutines in machine language

05 p0817 A70-16342

Book on digital computer methods in engineering covering numerical and programming methods, algebraic and differential equations solutions, time-frequency domain analysis, etc

05 p0877 A70-16771

Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

07 p1268 A70-19460

Computer scheduling model and timeline plot for Apollo Telescope Module /ATM/ experiments using orbital trajectory simulation

07 p1394 A70-19572

Phased-array radars and parallel processing computers system in high target density environment, input-output, array steering and data storage and handling

07 p1236 A70-20150

Extendable computer simulation model /ECSS/ overcoming programming and debugging problems, discussing language selection, design, specification, work load, etc

08 p1466 A70-20928

Digital differential analyzers improved speed and accuracy by extended resolution on Euler integration for differential equations solution programming

08 p1467 A70-21756

Hybrid computers capabilities, programming and operation

09 p1640 A70-22212

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques

09 p1603 A70-22265

Analog computation in supersonic steady flow and digital technique for wing-fuselage and wing-tail interactions

[ONERA-TP-804] 10 p1802 A70-24544

Eyeball technique smoothing procedure discarding wild data points using minimum computer time for automatic treatment of digitally sampled test data [AIAA PAPER 70-386]

10 p1861 A70-24919

Problem oriented computer programming language and translator for solving partial differential equations

11 p2013 A70-25367

Computer applications in aerospace research involving flutter, supersonic flow, unsteady wing flow, etc

12 p2191 A70-27025

Computer programmed automatic circuit analyzers, discussing unit adaptation, wire data processing and analyzer programming

[SME PAPER MS-70-727] 12 p2241 A70-27084

Automatic test equipment programming procedure including analysis, coding, validation and demonstration

13 p2422 A70-29689

Computer simulation model documentation exemplified by cardiovascular simulation using Continuous Systems Modeling Program /CSMP/ and emphasizing format uniformity

15 p2689 A70-31774

Common high order programming language and program debugging in aerospace software

16 p2868 A70-33430

Aerospace program oriented language /APOL/ requirements for flight programs, discussing cost, design and applicability

16 p2868 A70-33431

Computer generated holograms, using binary transmittance for wave fronts and three dimensional images construction

17 p3085 A70-35006

Two dimensional free boundary problems approximate solution by finite difference method, deriving algorithms for computer program implementation

18 p3230 A70-35941

Human operator and computer interrelations, noting sources of error

18 p3223 A70-36079

Computer language related to ALGOL 60 for handling nonnumerical problems of mechanics

18 p3283 A70-36367

Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

18 p3250 A70-36934

Artificial satellite theory main problem for small and moderate eccentricities, using perturbation techniques based on Lie transforms for computer programming

18 p3334 A70-37062

Computer aided laboratory testing of flight vehicles in real environmental conditions, illustrating vertical stabilizer subject to gust loads

19 p3396 A70-37874

Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis

19 p3547 A70-38439

Computerized assembly of production space vehicle with controlled mass properties, discussing automated system of data collection, storage and retrieval [SAWE PAPER 851]

20 p3639 A70-40375

Programming and checkout of computer for ELDO inertial guidance system, including flight simulation and autopilot tests

[AIAA PAPER 69-961] 21 p3795 A70-41862

Binary codes linear metric properties description reduced to finite set determination by convex programming procedure

22 p3993 A70-42494

Computer-aided production engineering involving numerically controlled machines for Rolls-Royce aircraft engines manufacture

24 p4341 A70-45299

Interactive man computer systems evaluation considering speech communication, SKETCHPAD and graphics capabilities, FORTRAN and programming languages and future manned space missions [AIAA PAPER 70-1292]

24 p4317 A70-45928

COMPUTER PROGRAMS

NT COMPILERS

NT COMPUTER SYSTEMS PROGRAMS

NT INPUT/OUTPUT ROUTINES

NT OPERATING SYSTEMS [COMPUTERS]

NT SUBROUTINES

Monograph on future air traffic control concerning radio navigation, color display and computer determined flight paths

01 p0136 A70-10090

Computer program for automatically selecting redundant parts and redundancy types for various aerospace systems characteristics

01 p0103 A70-10488

Computer applications in French missile testing center, describing real and delayed time equipment and computations

01 p0057 A70-10798

Semiautomatic mass condensation transformation for reducing structural vibration calculations, including computer program and mode shape plotting

01 p2000 A70-10868

Textbook on applied numerical methods covering interpolation, approximation, integration, matrices, etc, with emphasis on digital computer algorithms

01 p0132 A70-11306

Book on numerical solution of partial differential equations, discussing methods for physical and chemical problems on digital computer

01 p0134 A70-11326

Stony meteorite trace elements groups neutron activation analysis with computer reduction of Ge/Li spectra

02 p0249 A70-11680

Digital computer program /LANDIT/ for predicting structural impact response of axisymmetric landing vehicles consisting of rigid payload and crushable impact limiter system

02 p0380 A70-11945

Aircraft landing measurement system /ALMS/ designed to provide computer analysis of all traffic landing at airport

02 p0331 A70-11964

Terminal area approach control sequencing, using digital computer to allocate identification mode and landing time slot

02 p0332 A70-11971

Computerized navigation system for controlling aircraft movement on airports under zero visibility conditions

02 p0274 A70-11978

Valvular aortic stenosis severity estimation using digital computer program and tape recorder for determining valve area

02 p0243 A70-12094

Human decision making via man-computer interaction, noting skill role in nonoptimal performance handling of simultaneous factors

02 p0245 A70-12140

Computer application to Navier-Stokes equations numerical integration for incompressible viscous fluid deflected flow with large Reynolds number

02 p0287 A70-12376

Jet aircraft long range flight planning using computer for wind and temperature forecasts, path altitude profile computation and optimization

02 p0403 A70-12841

Computerized airline fleet planning methods for aircraft economics and airline operations [SAE PAPER 690415]

03 p0609 A70-12898

Plastic flow under biaxial stress, discussing data acquisition system and computer program for comparing test and theory

03 p0480 A70-12954

Meteorological data processing computer center of German Weather Service, discussing equipment, data system, forecasting techniques and prediction control

03 p0434 A70-13171

Computer evaluation of photographic imagery of left ventricle volume obtained by cineangiography, including densitometric measurements

03 p0434 A70-13678

Earth satellite orbit parameters determination from angle measurements using computer program and least squares estimation technique

03 p0573 A70-13843

Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations

03 p0436 A70-13900

Computerized stepwise construction of Hugoniot curve for detonation waves and Chapman-Jouguet detonation and deflagration points

03 p0607 A70-13920

AMPROD /Automated Mission Profile Design/ generating schedules for long duration missions with real cost and time savings

03 p0581 A70-14023

Computer processing role in film scanning and digitizing for enhancing X ray and radioisotope scanner images in medical radiographs, discussing image noise reduction

04 p0654 A70-14562

Computer method to combine autofluorescence data to produce three dimensional display of absorbed radioactive material from multiview images

04 p0686 A70-14563

Mathematical model based on equivalent electrical circuit for transient radiation analysis by computer /TRAC/ family of circuit analysis programs, simulating semiconductor devices

04 p0657 A70-14737

Reliability analysis formulation for statically indeterminate structures, using modified transition probabilities and computer program for systematic failure paths counting

04 p0768 A70-14747

Computer programs for numerical analysis of shell structures, considering series expansion, numerical integration, finite differences and finite elements

04 p0768 A70-14787

Thermionic converter with oriented W electrodes, describing test method and computerized data acquisition for performance mapping

04 p0627 A70-14945

Diode transistor microelectronic logic circuit reliability, efficiency and optimization using digital computer

04 p0659 A70-15210

Computer program for electrical and transient thermal analysis of satellite electric power subsystem consisting of solar array, battery and power controls

04 p0628 A70-15332

Algorithmic and digital computer method for approximating irrational transfer functions by rational functions in control systems

04 p0662 A70-15336

Equation for disturbance of ILS localizer signals by reflection from flat hangar wall, discussing computer program

04 p0652 A70-15344

Computer program for evaluating measured lung function values by comparison with accepted norms, using matrices containing regression coefficients

04 p0644 A70-15360

Analog computer schemes for solving dynamic plants identification reducible to optimizing parametric problem of many variables function

04 p0654 A70-15435

NASTRAN digital computer program for static and dynamic structural analysis using finite element method [SAE PAPER 690612]

05 p0816 A70-15851

Cosmic ray intensity variations recording device adaptable to computer forming centralized data processing system

05 p0845 A70-15932

Computer program to decide structure for aliphatic ketone from low resolution mass spectrum using DENDRAL algorithm

05 p0810 A70-16048

Display Oriented Computer Usage System /DOCUS/, discussing on-line display console management in multiaccess environment, display oriented language, compiler, etc

05 p0817 A70-16181

Computer generated displays and USAF equipment design for operational command and control systems, discussing Ag halide film technique

05 p0847 A70-16185

Computerized method for processing photographic earth satellite observation results, transforming coordinates by nonconformal approximation of polynomial function

05 p0814 A70-16367

Digital computer program for analyzing axisymmetrically loaded ring-stiffened segmented composite elastic shells of revolution, giving vibration frequencies

05 p0944 A70-16814

MTRAC program for transient analysis of circuits with square loop magnetic cores based on linearization of nonlinear circuit elements and Kirchhoff current law

05 p0825 A70-16999

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion [AIAA PAPER 69-979]

06 p1172 A70-17180

Flight deck displays based on digital computer providing signals for CRT and instrumentation

06 p1061 A70-17319

Spatially homogeneous distribution function describing uniform gas motion derived to permit computer calculations in obtaining numerical solutions to kinetic equation

06 p1036 A70-17753

Ionospheric vertical electron concentration computer calculations compared to direct measurements data by satellite and rockets over Sofia

06 p1057 A70-17843

Frontal solution program for symmetric positive definite equations met in finite element applications

06 p1014 A70-17936

Flight software for onboard Apollo Primary Guidance, Navigation and Control System flight qualification by digital simulation, including software diagnostics [AIAA PAPER 70-173]

06 p1029 A70-18060

Apollo-Saturn Launch Vehicle Targeting Program for Lunar Landing Missions, describing functions of integrated digital computer programs [AIAA PAPER 70-172]

06 p1145 A70-18093

Black box modeling of linear integrated circuits for computer analysis in frequency domain

06 p1026 A70-18416

Network analysis for systems application program /NASAP/ computer-aided circuit design program for network analysis, discussing application in education

06 p1015 A70-18418

Computer aided network design course using FORTRAN 4 emphasizing modeling of semiconductor devices

06 p1015 A70-18419

NASAP program FORTRAN subroutine LOOPS for loop detection in circuit analysis, discussing automatic instrumentation process for computation time reduction

06 p1015 A70-18421

Hybrid NASAP program module for direct design of linear dynamic circuits using simple optimization without sophisticated computer programming

06 p1015 A70-18422

Mathematical techniques for selenodesy computer simulation program, solving problems arising from infinite series of spherical harmonics for lunar gravitational potential

06 p1152 A70-18498

Lift fan V/STOL tactical aircraft performance capabilities determination, using digital computer program

07 p1191 A70-18975

LUF for F layer propagation modes, discussing mode cut-off significance using computer ray tracing program

07 p1229 A70-19159

Three dimensional ray tracing computer program in Fortran for determining radio paths in ionosphere

07 p1230 A70-19163

Oblique ionospheric sounder automatic data analysis by computer programs, analog to digital conversion, magnetic tape data recording, signal detection, pattern recognition, etc

07 p1234 A70-19185

Radio signal reception beyond normal horizon by partial reflection from elevated layer in troposphere calculated by computer

07 p1234 A70-19218

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions [AIAA PAPER 69-421]

07 p1365 A70-19706

Lumped element microwave Y circulator, describing device performance and ALGOL program for potentials calculation

07 p1241 A70-19751

Computer procedures for solving temperature stresses in thin infinite isotropic viscoelastic plate with heat transfer

07 p1411 A70-19817

Point matching technique for plane elastic problems extended to axisymmetrically loaded elastic body of revolution, developing general computer program

07 p1416 A70-20303

Radiation Shielding Information Center computer code library for radiation transport or shielding calculations, listing programs available

07 p1239 A70-20364

Computer program /SAFETE/ for evaluating missile launch risk on near real time basis [AIAA PAPER 70-248]

07 p1250 A70-20370

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories

07 p1239 A70-20414

Automatic testing hardware and software compatibility emphasizing versatile avionics shop test /VAST/

08 p1470 A70-20662

Computer program for automated test station simulation, considering station operating characteristics and performance prediction

08 p1465 A70-20666

Aircraft roll rate response and aileron step input matching in terms of modal parameters with flight test records by analog computer program

08 p1465 A70-20781

Quasi-linearization technique in computer program for aircraft parameters identification featuring efficient search for optimal parameters in algebraic or differential equations

08 p1465 A70-20784

Computer controlled remote manipulator development, operation, components and applications, describing system programs consisting of executive control programs and subroutines

08 p1465 A70-20817

Extendable computer simulation model /ECSS/ overcoming programming and debugging problems, discussing language selection, design, specification, work load, etc

08 p1466 A70-20928

SOAR /Simulation of Airlift Resources/ model for stochastic productivity variations of strategic airlift systems

08 p1466 A70-20930

Boeing 747 aircraft container system deployment simulation written in GPSS/360 to minimize stockholding of containers at individual stations

08 p1481 A70-20931

Queue control techniques in generating predicted trajectory, discussing queue control logic requiring minimum storage

08 p1467 A70-21049

Analytic solution for computerized vibration analysis of high speed tension test

08 p1590 A70-21332

Computer program predicting thermal response of fusion welding tooling chill bars and holding fixtures, simulating moving heat source and contact

08 p1508 A70-21487

Algorithm for evaluating nth order partial derivatives of network functions and corresponding sensitivity functions

08 p1467 A70-21643

Cardiac output in humans by analog computer program using mass spectrometer analysis of expired air

08 p1454 A70-21948

IR absorption spectral curve interpretation using computer program for iterative solution

09 p1726 A70-22138

Lunar photographs on star-calibrated plates for lunar features coordinates or physical libration determination, outlining photographic technique and computer program

09 p1674 A70-22308

Computer program for generating tables to calculate lunar libration at any epoch

09 p1752 A70-22313

Axisymmetric or plane bodies temperature distribution from heat conduction analysis using computer program based on finite element method

09 p1788 A70-22581

Potential flow and boundary layer theory application as design tools in aerodynamics, basing calculations on digital computer methods

09 p1605 A70-22947

Computer aided design programs as decision-making tool for fighter development projects technical management [AIAA PAPER 70-364]

09 p1611 A70-23024

Aliphatic ethers low resolution mass spectra interpretation using computer program heuristic DENDRAL

09 p1631 A70-23400

Long range army budget forecasting model based on research projects cost distributions and parameters, describing computer program

09 p1794 A70-23415

Soviet monograph on method of functional equations for solving boundary value problems, discussing computer programs and various applications
09 p1712 A70-23548

Geomagnetic field orientation effects on VLF nighttime propagation, checking computer program predictions
09 p1639 A70-23664

Lunar daily variation in geophysical data determined by Chapman-Miller method, improving probable error determination method and giving computer program in FORTRAN
09 p1764 A70-23701

Modified fast Fourier transform for hybrid computer program data processing of human operator describing functions
10 p1824 A70-23900

Continuous media mechanics by applying fractional steps method to numerical solutions, outlining theoretical basis for computer algorithms
10 p1866 A70-24114

Mechanized Algebraic Operations software package for manipulation on computer Poisson series, noting application to celestial and nonlinear mechanics and astrodynamics
10 p1845 A70-24179

Ground based moving-base aircraft flight simulator using computer program to establish motion requirements
[AIAA PAPER 70-348] 10 p1859 A70-24213

Period length calculation method for physiological rhythms by digital computer
10 p1811 A70-24380

ALGOL algorithm for Runge-Kutta type numerical integration of simultaneous differential equations, using Merson method for step length determination
10 p1845 A70-24405

Computer-aided class C amplifier design, discussing algorithm and computer program
10 p1849 A70-24447

Structural behavior during creep by step by step process suitable for computers after linearizing nonlinear equations
[ONERA-TP-805] 10 p1958 A70-24545

Impact problems of slip clutch and beam scales dynamic characteristics simulation by 1130 CSMP /Continuous System Modeling Program/
10 p1860 A70-24653

Remote sensor input radiation at aperture, signals within and sensed data processing by computer techniques, noting automatic image interpretation
10 p1841 A70-24733

Satellite orbit prediction using computer program based on first order secular node-to-node drag perturbations
10 p1943 A70-24822

Flight test programs site selection method using computer program analysis of magnetic tape weather records
[AIAA PAPER 70-397] 10 p1806 A70-24908

Automatic Malfunction Analysis /AMA/ digital computer software system supporting checkout and testing, defining normal system status by computer simulation
[AIAA PAPER 70-383] 10 p1861 A70-24922

Dynamic characteristics of structures measured, using digital computer to analyze transient data from frequency sweep tests
10 p1961 A70-25059

Software production for Brazilian Advanced Educational Technology System
[AIAA PAPER 70-470] 11 p2152 A70-25403

Computerized data communication system /CDCS/ equipment unit capacities and topology specified with aid of vertex weighted linear graph
11 p2009 A70-26253

Linear networks fault detection and isolation using computerized test procedure and symbolic transfer function generation technique
11 p2029 A70-26337

Slender body transonic wave drag double integral, describing computer program for numerical evaluation
11 p1977 A70-26644

Finite element computer code /AXICRP/ for creep analysis of plane stress, plane strain and axisymmetric bodies of revolution
11 p2015 A70-26682

Batch program testing, developing standards for various computer installations by daily work error case examples
12 p2191 A70-27012

Shells of revolution under combined thermal and mechanical loading, presenting analytical basis of BOSOR 3 digital stress analysis program
12 p2320 A70-27144

Computer programs for calculating spectral lines oscillator strength in Coulomb approximation, proposing Fortran program
12 p2192 A70-27595

Multiterminal electronic networks computerized fault detection based on linearized Taylor expansion algorithm
12 p2197 A70-27932

Radio propagation over sea water path, predicting transmission loss by computer programs
12 p2188 A70-27936

Computer program for flying spot scanner pattern recognition, analyzing human chromosome contour
12 p2170 A70-27938

Remote signal measurement and analysis in hazardous environment by command terminal utilizing manual or computerized control
12 p2201 A70-28134

Radar systems EM compatibility simulation, describing FORTRAN IV operational interference prediction program
12 p2193 A70-28139

Phase lattice constants determination by computer method of debyegram line indexing
12 p2258 A70-28350

Navigation satellite systems, analyzing error sources in signal processing and propagation developing computer programs
13 p2447 A70-28429

Dynamic programming applications to optimal stochastic orbital transfer strategy, describing computer program
[AIAA PAPER 68-872] 13 p2447 A70-28502

Configurations stress stability liquid propellant rocket nozzle analysis by BOSOR 3 digital program, describing mathematical model construction
13 p2508 A70-28509

Computer techniques for determining physical libration of moon in longitude
13 p2488 A70-28765

Computerized control of aircraft spare parts inventories, using optimization method maximizing aircraft availability and minimizing handling costs
13 p2524 A70-28836

Dimensional stability derivatives from XV-4B aircraft simulator varied in computer program for extracting roots of lateral-directional characteristic equation
[AIAA PAPER 70-551] 13 p2346 A70-29016

Ordinary differential eigenvalue problems solution by successive transformations, describing computer program and applications to hydrodynamic stability
13 p2440 A70-29085

Computer program for system reliability prediction, using probability tree approach and block probabilities
13 p2373 A70-29565

Computerized Monte Carlo prediction of maintenance time distribution of complex system, concerning man hours, elapsed time and schedule meeting
13 p2524 A70-29566

Configuration management of software concerning automatic test systems in large maintenance depot
13 p2422 A70-29692

Computer techniques for rounding error analysis, stability in linear algebra, matrices factorization, Jacobi rotation method and iteration procedures
13 p2443 A70-29768

Multimode system analysis, using automated technique to calculate effectiveness and cost down to component level
13 p2525 A70-29837

DMC computer code for simulation of two dimensional viscous incompressible flow about arbitrarily shaped bodies
14 p2527 A70-30271

SCAMP I DC statistical circuit analysis program for linear and nonlinear circuits, describing program structure
14 p2560 A70-30664

SCAMP 2 program for statistical analysis of electronic circuit sensitivity to variations in parameters and DC input values
14 p2560 A70-30665

SCAMP 3 program for calculation of electronic circuit DC performances statistical distribution as function of component parameters variation
14 p2560 A70-30666

SCAMP 4 program for electronic circuits statistical analysis in frequency domain, obtaining mathematical models and transfer functions
14 p2561 A70-30667

Computer program for two body problem literal series expansions using Kepler functions with Bessel and Poisson series operation
14 p2638 A70-30702

Real time Apollo lunar module thermal mission data analysis using computer programs
14 p2653 A70-30774

Book on space flight simulation systems examining real time and real performance requirements, mathematical models and various simulation programs
14 p2563 A70-30955

Approximating hazard rate function parameters estimation from failure data, using computer program
14 p2592 A70-31113

Aircraft design optimization by multisearch programs, considering mathematical model role
14 p2532 A70-31400

Interactive computer graphics using modified Continuous Systems Modeling Program /CSMP/
15 p2705 A70-31773

Computer simulation model documentation exemplified by cardiovascular simulation using Continuous Systems Modeling Program /CSMP/ and emphasizing format uniformity
15 p2689 A70-31774

Computer control of nonlinear systems with varying performance specifications, using Popov stability and nonlinear programming
15 p2715 A70-31973

Hybrid rocket engine with solid oxidizer based on ammonium perchlorate and Al, studying performance with FORTRAN 5 program
15 p2787 A70-32273

SIRIO mission algorithm and computer program, determining spacecraft position, ground trace and tracking station visibility
15 p2811 A70-32286

Computerized statistical analysis programs finding plastic stress and acoustic emission as predictors of annealed steel fatigue life
15 p2760 A70-32326

Computer program for limit analysis of rotationally symmetric shells, generating yield point load upper and lower bounds and velocity profile
15 p2822 A70-32351

Heuristic programs and approaches in artificial intelligence
15 p2706 A70-32565

Real time computer algorithm for achieving optimal position of tracking antenna with nonlinear control system
15 p2703 A70-32575

Large signal junction FET model involving piecewise linear approximation for ECAP circuit analysis program
15 p2711 A70-32596

Interrelated computer programs and comprehensive parts data bank /REACT/ for reliability assurance analysis
15 p2706 A70-32654

Computer program /SORCBE/ for systems unavailability tradeoff vs added cost for various versions
15 p2706 A70-32658

Software reliability program development, functional analysis and error sources
15 p2742 A70-32667

Surface temperature color contour maps of objects undergoing aerodynamic testing, utilizing electro-optical and computer techniques
16 p2905 A70-33169

Self alignment for gimballing inertial navigation system fixed base by generating computer programs from error signals derived from inertial sensors
16 p2946 A70-33302

Optimal fixed-form pilot model computer program for VTOL longitudinal control hover task evaluation
16 p2851 A70-33341

Space programming language SPI/J6 replacing machine language programming in flight software capable of expressing complex vector mathematics and decision control
16 p2868 A70-33429

Aerospace program oriented language /APOL/ requirements for flight programs, discussing cost, design and applicability
16 p2868 A70-33431

Interactive computer graphics in six degree of freedom control, lunar roving vehicle navigation, orbital elements calculations, drop test simulation, etc
16 p2869 A70-33726

Interactive computer graphics applied to continuous system modeling program /CSMP/, describing hardware system configuration
16 p2870 A70-33727

Functional equivalence between FS expression and programs
17 p3130 A70-35139

Program for function computation replaced by notion of flow algorithm
17 p3130 A70-35140

Fluid flow longitudinal temperature profiles for inclusion in heat transfer computer program
17 p3198 A70-35659

Dynamic system modeling pulse test data reduction by digital computer and functional approximation for Fourier transform calculations
18 p3230 A70-36458

Left ventricular dynamics ultrasonic visualization, involving catheter-borne transducers array and computer for data acquisition and display
18 p3225 A70-36750

Computer programs for photogrammetric aerial triangulation with independent models
18 p3248 A70-36778

Adjustment program for aerial block triangulation with independent models, using planimetry-height iterations
18 p3248 A70-36779

Electrostatic sheet model for plasma, emphasizing computer solutions of various problems
18 p3295 A70-36788

Potential calculation from given source distribution, including direct and iterative methods, error analysis,
18 p3295 A70-36788

convergence, computer programs and applications in plasma physics 18 p3284 A70-36790

Critical aviation gas turbine rotating component life limit determination, describing statistical, maintenance, inspection and life evaluation computer program (SMILE) 18 p3303 A70-36841 [ASME PAPER 70-GT-66]

High speed combustion chambers for gas turbine engines, using finite rate chemistry and turbulent mixing computer program for burner design 18 p3304 A70-36866 [ASME PAPER 70-GT-25]

Iterative Hansen method of general perturbations programmed for digital computer, evaluating major and minor planetary theory 18 p3320 A70-37060

Soviet book on numerical methods of Chebyshev approximation covering minimax problems, computer methods, linear programming, etc 19 p3456 A70-37232

Ballistocardiogram autocorrelation function and spectrum by scanning graph decoder and computer, determining total power, harmonics periodicity and energy concentration 19 p3370 A70-38211

Kahan Babuska summation method variant in Triplex-ALGOL 60 for reducing roundoff errors in finite series calculation 19 p3385 A70-38678

Many body gravitational problem, computing evolution of two groups by numerical integration with two different computers 19 p3523 A70-38692

Hydrometeorological information processing using ALGOL-60 translator language 19 p3463 A70-38759

Computer program for assessment and modification of mechanical component life predictions by discrete formulation of Bayes theorem 19 p3440 A70-38816

Weapon systems effective reliability analysis, using degraded mode evaluation and deterministic computer program 19 p3442 A70-38833

Singular integral equation formulation for torsion from membrane analogy, obtaining boundary value problem solution by computer program 20 p3718 A70-39000

Computer program transforming spherical harmonic coefficients into arbitrarily tilted coordinate systems, tabulating coefficients of International Geomagnetic Reference Field 1965 in dipole coordinate system 20 p3621 A70-39353

Modified McNish-Lincoln method for Zurich sunspot numbers prediction, adapting for computer operation 20 p3704 A70-39410

Aircraft and rocket guidance systems navigation error analysis, discussing numerical integration techniques and computer program 20 p3667 A70-39527 [AIAA PAPER 70-1004]

Computer calculations automation in mathematical models construction by statistical methods, discussing programs for distributed parameter systems, stochastic approximation, etc 20 p3592 A70-39903

Conducting wall MHD generator channel current distribution, examining computer program for anode and cathode currents 20 p3566 A70-40013

Computer program for systems reliability approximation, giving algorithm for cut and tie sets identification 20 p3594 A70-40060

Numerical methods, FORTRAN program and table form for complex integrals evaluation along unit circle in positive direction 20 p3605 A70-40120

Automatic weight analysis by calculation and orientation of mass properties (COMP) program, using remote terminal time sharing computer system [SAWE PAPER 824] 20 p3595 A70-40353

Aircraft loadability design by computerized loading program using graphic plotter [SAWE PAPER 836] 20 p3562 A70-40364

Weight, moments and mass centers computer calculation by surface integral method, using FORTRAN language [SAWE PAPER 852] 20 p3660 A70-40373

Computer algorithm for optimal linear impulse corrections to satellite orbit under inequality type constraints 21 p3801 A70-40828

Linearly elastic skeletal structures, calculating natural frequencies of undamped vibration by computer program 21 p3935 A70-41254

Aerospace digital computer family structural commonality, considering architecture, hardware and support software 21 p3794 A70-41687

Mission analysis and trajectory simulation (MATTS) program, discussing computer controls, modular design, integration evaluation [AIAA PAPER 69-939] 21 p3920 A70-41872

Electromagnetic wave diffraction at multilayer wire grating, discussing computer program for diffraction field calculation 22 p3985 A70-42399

Horizontal Situation Display (HSD) map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection [AIAA PAPER 69-987] 22 p4068 A70-42710

Computerized nonequilibrium thermochemical gas dynamic solutions for nozzle, shock tube and stream tube flow with arbitrary species and kinetic reactions numbers 22 p3982 A70-42762

Automatic diagnosis of clinical electroencephalogram with digital computer, showing maximum and minimum points, basic pattern and paroxysmal wave 22 p3977 A70-42869

Aircraft accident filing system data analysis using Fortran programs 22 p3962 A70-42880

Rational polynomial matrices inversion by automatic computational procedures, considering Gaussian elimination and Faddeev algorithm 22 p4062 A70-42926

Algorithm for fast digital computer recursive estimation of mean of random variable 22 p3993 A70-43074

Computer photokymographic recording of gravitational-inertial force environment effects on cardiovascular and respiratory systems on centrifuge 22 p3976 A70-43709

Hyperthyroidism diagnosis by pattern recognition, using computerized class featuring information compression 22 p3977 A70-43732

Deep penetration radiation shielding calculations using discrete ordinates difference equations and computer program 23 p4216 A70-43808

Radiation shielding calculations using multidimensional Monte Carlo computer programs 23 p4217 A70-43809

Radiation shield design and transport calculations, reviewing kernel methods development and relevant computer programs 23 p4217 A70-43811

Conducting bodies of revolution, calculating surface currents due to axially incident plane electromagnetic wave by computer program 23 p4162 A70-44005

Linear phased arrays computer aided design, discussing search algorithms in multivariable optimization program 23 p4172 A70-44015

Short haul jet transport aircraft design, discussing Computer Aid Design, Airline System Simulator and Traffic Demand Predictor computer programs [ICAS PAPER 70-28] 23 p4284 A70-44105

Computer program for nonlinear differential equations related to nonlinear boundary value problems based on Newtonian iteration process difference analog of linearization method 23 p4212 A70-44338

Automatic electronics test equipment, discussing choice between tape or computer controlled interpreter systems based on language, time, versatility and cost 23 p4173 A70-44539

Electronic equipment automated testing objectives and requirements, considering man machine interaction, system controls, on-line reporting, and software/hardware availability 23 p4174 A70-44541

Computerized algorithm facilitating automatic synthesis of time invariant linear compensation for highly complex multiloop control systems [AIAA PAPER 69-941] 23 p4177 A70-44561

Space shuttle economic risk analysis, using computer program as design and management tool 23 p4261 A70-44674

Digital computer codes for production finite element structural analysis, discussing input, output and engineering details 23 p4270 A70-44701

Asymptotic and computer methods interaction in thin walled shells structural analysis and design, considering pressure vessels, cone vibration and dynamic loads 23 p4271 A70-44703

Thin walled shells structural vibration, buckling and stress analysis by computer methods, discussing shell theory and design 23 p4271 A70-44704

General purpose computer programs for shell structural analysis, using finite element modeling and displacement methods 23 p4271 A70-44707

Arbitrary shells large deflection transient response, using finite difference computer program 23 p4272 A70-44710

Computer hardware and software technology for complex problems, discussing switching speeds and parallel and pipeline designs 23 p4167 A70-44716

Finite element structural analysis (FESTRAN) computer program predicting static structural response of plate and shell structures 23 p4272 A70-44717

Complex structures component modal dynamic analysis technique, describing investigations with combination of finite element and composite modes computer program 23 p4273 A70-44722

Nonlinear shell analysis by finite difference energy method, using BOSOR3 and STAGS computer programs 23 p4273 A70-44723

Computer program for geometrical nonlinear static and dynamic structural analysis of arbitrarily loaded shells of revolution 23 p4273 A70-44724

Stress, buckling and vibration analysis of shells of revolution by numerical integration and finite difference methods, summarizing computer programs 23 p4273 A70-44725

General Optimization Software Package for Electrical network and system design, noting application to engineering problems and education 23 p4177 A70-44750

Gradient iterative solution of large algebraic systems arising from finite element discretization, using computer methods 24 p4419 A70-45153

Matrix-vector computer program for three dimensional perspective projection and shell analysis in FORTRAN IV 24 p4419 A70-45155

Shell of revolution /pressure vessel/ with meridional slope discontinuity, calculating pressurization effect on stresses by computer program 24 p4420 A70-45277

Numerical integration of equations of motion from finite element analysis in structural mechanics, using computer program 24 p4420 A70-45278

Rapid satellite orbit prediction program by numerical integration including oblateness squared and radiation pressure effects over long time spans 24 p4406 A70-45528

Short period lunar perturbation on satellites by computer program with Fortran statements, considering errors, program output and table driven algebraic processors 24 p4406 A70-45532

Air traffic flow digital computer simulation model including departure, enroute and arrival phases for collision avoidance, weather effects and control constraints [AIAA PAPER 70-1316] 24 p4373 A70-45945

COMPUTER SIMULATION
U COMPUTERIZED SIMULATION
COMPUTER STORAGE DEVICES
NT ACCUMULATORS (COMPUTERS)
NT DELAY LINES (COMPUTER STORAGE)
NT MAGNETIC CORES
NT MAGNETIC TAPES
NT SHIFT REGISTERS

Information storage in complex automatic control systems with hierarchical structure composed of computers 01 p0047 A70-10983

Memory volume necessary to store intermediate data estimated for group processing from dependent Poisson information sources 04 p0661 A70-14552

Memory exchange between pairs of electrodes amorphous semiconductors, discussing switch-on and unlocking 04 p0732 A70-15687

Technique for coding data on cosmic ray variations based on packing digital information in computer storage, proposing selective statistical control for tape recording phase 05 p0898 A70-15929

Digital computers structural and operational address format dependence on number of storage readouts expressible with aid of linear function 05 p0818 A70-17004

Memory systems described by integrodifferential equations with distributed time lag, obtaining optimality condition in form of maximum principle 08 p1480 A70-21177

Switching and memory phenomena in semiconducting glasses, thin films and variable threshold metal-oxide-nitride-semiconductor MNOS transistor 08 p1556 A70-21304

Flexible PCM telemetry used in low power plated wire memory system for multiple applications 08 p1462 A70-21359

Display objectives and relationships to recording techniques examined for memory/display system, considering requirement for elastic erasing technique 08 p1467 A70-21761

Holographic optical memory feasibility for digital data storage using Ar ion laser, acousto-optic beam deflector system, hologram storage plane and photodetector array 09 p1642 A70-23780

Holographic optical memory systems operational principles and potential advantages, discussing feasibility of 100 million bit memory capacity and one microsecond random access time 10 p1892 A70-25245

Electronic switching effects in amorphous semiconductors emphasizing mass memory for computers based on thin films of chalcogenides 11 p2017 A70-25524

Holographic memory devices design for information storage 13 p2405 A70-28792

Memory systems in measurement and control equipment, describing applications to linearizing, compression and data refresh operations 14 p2554 A70-30676

Graphical data conversion into code for storage in computer memory 15 p2705 A70-31576

Portable MOS memory module with optical loading and electrical readout, using hybrid array of complementary silicon on sapphire chips 16 p2868 A70-33457

Memory technology based on electrically alterable nonvolatile silicon nitride variable threshold transistor 16 p2868 A70-33458

MOS transistor associative memory cell design utilizing LSI technology 16 p2869 A70-33464

Military aircraft avionics central digital computers, discussing memory capacity, computational speed requirements, cost and tradeoffs 17 p3049 A70-34673

Solar image spectrum magnetic recording for computer, using photomultipliers with coding devices 18 p3256 A70-36107

Three digit hydromechanical step type actuator drives with slide valve assembly for computer data sampling systems 18 p3216 A70-37071

Magnetic bubbles in miniaturized electronic circuits, discussing fabrication and uses in communication and computers 19 p3484 A70-37574

Optically bistable crystal applications, discussing photochromaticity, catochromatic tubes, oscilloscopes, computer storage devices and laser systems 19 p3446 A70-37860

Computer generated holograms production, reducing memory size and plotter resolution 20 p3627 A70-39098

Multichannel cosmic ray recorder providing input to computer memory 20 p3629 A70-39313

Digital optical storage for information system components 21 p3823 A70-40852

Holography application to high capacity permanent memory systems 21 p3825 A70-41125

Computer storage technology, discussing magnetic films, semiconductor cells, content addressable and read-only memories, etc 21 p3795 A70-41693

Airborne test computer for in-flight radar checkout featuring tape storage of computer program and cockpit mounted optical readout 22 p3993 A70-42320

Reprogrammable read-mostly memory /RMM/ using integrated circuit array of amorphous and crystalline semiconductor devices, discussing design and applications 22 p3996 A70-42772

Semiconductor storage unit with decoding circuit, memory matrix and read-out amplifiers 22 p3996 A70-42847

Modular plated-wire digital associative processor with content addressable memory, distributed arithmetic and I/O capability at each word 22 p3994 A70-43104

Avionics digital computer system using associative memory for executive control functions implementation to mechanize task assignment algorithm 22 p3994 A70-43105

Optical read-write mass memory based on holographic storage and light addressable matrix array, discussing significance to computer design and usage 22 p3994 A70-43606

Optical system for read-write holographic memory capable of high storage density 22 p3994 A70-43607

Magnetic holography, considering Faraday and polar Kerr effect reconstructions and potential as computer storage 22 p3994 A70-43608

Integrated ferroelectric photoconductor device for hologram storage, discussing improved phase readout technique for reconstruction 22 p3994 A70-43609

Computer-aided aircraft design, discussing parts geometry data bank, visual display, etc [ICAS PAPER 70-27] 23 p4200 A70-44106

MIS model applied to memory transistor with thin insulator consisting of silicon nitride on silicon dioxide 23 p4172 A70-44197

Optimum finite memory model for sequential minimum-mean-square-error estimation of random variable in added noise 24 p4317 A70-46052

COMPUTER SYSTEMS PROGRAMS

NT INPUT/OUTPUT ROUTINES

NT OPERATING SYSTEMS [COMPUTERS]

Time sharing computer systems for data reduction from semiconductor strain gauges applied to FORTRAN IV programs 03 p0453 A70-12969

Airborne computer system program for antisubmarine warfare enhancing human element in man machine system 06 p1185 A70-17974

Space programming language SPL/J6 replacing machine language programming in flight software capable of expressing complex vector mathematics and decision control 16 p2868 A70-33429

Computer time sharing system for real time mass properties measurements [SAWE PAPER 853] 20 p3595 A70-40374

Computer system for ECG interpretation in hospital heart station 22 p3979 A70-43483

COMPUTERIZED DESIGN

Computer calculation in elastoplastic range of statically indeterminate structure of bars, considering collapse load, stress and hinge rotation 01 p0200 A70-10524

Time sharing computer systems to perform circuit design and analysis, discussing effectiveness in terms of immediate access, accuracy and cost 02 p0265 A70-12187

Linear arrays computerized design with variable element spacing and excitation amplitude 02 p0269 A70-12596

Microwave circuits automatic analysis and design using digital computer in batch mode, describing analysis-optimization program 03 p0457 A70-13562

Optimal synthesis and design of distributed parameter system for waveguides using gradient technique with devised algorithm to overcome convergence problem 03 p0449 A70-13563

Device modeling for computer aided design and analysis of integrated circuits, discussing list of desirable properties and applications to transistor design 03 p0454 A70-14026

Matrix algorithm from parallel element method derived for reducing computer time required in structural modification analysis 04 p0779 A70-15589

Computer-aided design using third generation computers and interactive graphic systems applied to transonic aerodynamics problems 05 p0816 A70-16122

Network analysis for systems application program /NASAP/ computer-aided circuit design program for network analysis, discussing application in education 06 p1015 A70-18418

Computer aided network design course using FORTRAN 4 emphasizing modeling of semiconductor devices 06 p1015 A70-18419

NASAP program FORTRAN subroutine LOOPS for loop detection in circuit analysis, discussing automatic instrumentation process for computation time reduction 06 p1015 A70-18421

Hybrid NASAP program module for direct design of linear dynamic circuits using simple optimization without sophisticated computer programming 06 p1015 A70-18422

Digital computer design of electric and radio equipment using secondary source method for field boundary calculation in inhomogeneous environment 07 p1241 A70-19480

Integrated switching circuits design optimization by ALGOL program, analyzing circuits transient behavior 07 p1242 A70-19752

Large scale integration /LSI/ in electronics, discussing high density microelectronic, memory and logic circuits, fabrication and computer aided design 08 p1468 A70-20468

Automatic test equipment for electronic devices, discussing computerized design of interface adapters for unit under test 08 p1470 A70-20657

Computerized generation of cost optimal decision logic for malfunction analysis 08 p1470 A70-20659

Integrated man machine shipboard maintenance systems design, describing computerized model based on information flow network 08 p1465 A70-20665

Tandem link multichannel LOS FDM-FM communication system cost optimization by computer-aided design 08 p1459 A70-20798

Optimal control synthesis for flight vehicle in vertical plane involving digital and analog computers 08 p1479 A70-20997

Computers impact on engineering science and design, detailing digital computers use in aerodynamics, structures and aeroelasticity 08 p1466 A70-21030

Controllable microwave phase shift varactor diode circuit parameters design optimization using digital computer for transmittance matrix coefficients calculation 08 p1474 A70-21230

Commensurate transmission line circuits design approximating periodic frequency characteristics on digital computer 08 p1476 A70-21286

Airfoil analysis and synthesis, discussing computer graphics application to low speed shape and improved pressure distribution 08 p1594 A70-21867

Lossless three-port H-plane waveguide junction circulator performance evaluation using computerized design 09 p1646 A70-22710

Hidden-line determination for computer-drawn polyhedra using edge classification scheme for CRT display applications 09 p1641 A70-22966

Computer aided design programs as decision-making tool for fighter development projects technical management [AIAA PAPER 70-364] 09 p1611 A70-23024

Digital computer impact on aerospace sciences and technologies in terms of computerized design, interactive graphics, flight simulation, Apollo systems checkout, etc 09 p1642 A70-23277

Concorde SST aerodynamic, structural and thermal analysis and simulation using computers 10 p1849 A70-24382

Computer-aided class C amplifier design, discussing algorithm and computer program 10 p1849 A70-24447

Hybrid computer applications in systems approach to engineering design, discussing design process and computer description 10 p1861 A70-24658

Computer-aided circuit design by imbedding singular elements to transform network synthesis into analysis problem 10 p1855 A70-24762

Computer and system design automation, considering language problems, microprograms, optimization on subsystem suboptimal basis, etc 10 p1845 A70-24874

Avionics test station optimum design by computerized simulation involving iteration of computer run, analysis and model change [AIAA PAPER 70-398] 10 p1861 A70-24907

Poseidon missile optimized and automated computer aided electronic packaging design, considering partitioning, placement, internal and external cable, etc 10 p1853 A70-25210

Communications satellite for Alaska and Mountain States TV defined using computerized synthesis program [AIAA PAPER 70-453] 11 p2001 A70-25473

Computerized design of aircraft contours, determining three dimensional surface by second degree equation [SAE PAPER 700202] 11 p2013 A70-25876

Computerized tradeoff analysis for planetary landing vehicle entry capsule and lander design optimization, emphasizing weight allocation for Mars 1973 missions 11 p2126 A70-26320

Computerized design of microwave circuits with S matrix 11 p2019 A70-26714

Linville bipolar transistor model for computer-aided design programs 11 p2021 A70-26830

Computerized automation of R and D engineering, discussing critical effects of generalization and oversimplification 12 p2334 A70-27006

Computers graphical display devices for rapid designer-computer communication 12 p2191 A70-27013

Aircraft all-movable stabilator computer aided design for optimized structural weight and performance 12 p2319 A70-27137

Automated optimum structural design by variable step direct search algorithm, noting application to stiffened cylindrical shells 12 p2319 A70-27138

Computer aided electronic circuit design, describing calculations, graph and table generation, data storage, etc 12 p2192 A70-27769

Computer-aided MOS/LSI four phase logic circuit design, discussing software, design cycles and testing 13 p2380 A70-28375

Mathematical cartography, discussing uses of electronic computers in network design 13 p2395 A70-28925

Minimum weight structural member size and configuration simultaneous optimization using computer program

13 p2516 A70-29550

Monograph on analysis of reflector antennas covering electromagnetic field equations, computer aided design, etc

13 p2367 A70-29600

Minimum weight design for complex structures subject to frequency constraint using finite element method and computer program

13 p2517 A70-29965

Computer oriented algebraic method for duplicator control systems applied to loop network, lag, feedback, phase lead and phase lead lag compensator design

14 p2560 A70-30620

Electronic systems automatic design problems including man machine communication and data organization

14 p2554 A70-30663

Computerized design of transistorized UHF wide-band amplifier, using successive approximations for optimum circuit automatic selection

14 p2556 A70-30668

Integrated circuits design by combined automatic and manual system

14 p2554 A70-30670

Flat circular parachute stress analysis in steady vertical descent, using computer program for design change effects on shape, drag and stress

14 p2531 A70-30863

Microstrip circuit design, obtaining dimensions by computer programs incorporating subroutine sets

14 p2561 A70-30922

Computerized design of multipad and multirecess incompressible fluid film bearings

15 p2744 A70-31958

Cascade digital filter computerized design with favorable signal to noise ratio, considering round-off errors

15 p2709 A70-32465

Linear time varying low pass filters computer aided design, introducing quadratic performance criterion to calculate steepest descent in function space

15 p2710 A70-32588

Topology and component values in computerized design of distributed lumped active networks

15 p2711 A70-32595

Large signal junction FET model involving piecewise linear approximation for ECAP circuit analysis program

15 p2711 A70-32596

Integrated analog shift register circuits computer aided design, using insulated gate field effect transistor (IGFET)

15 p2711 A70-32597

On-line computer aided design of fixed point digital filters simulating direct, cascade and parallel bit representations

15 p2711 A70-32598

Superdirective small linear antennas computer aided design using Fourier integral and transform techniques

15 p2711 A70-32601

Computer aided design for microwave branch line couplers dimensions practical for integrated circuit microstrip fabrication

15 p2711 A70-32602

Filters design by on-line graphic interface computerized synthesis utilizing three screen CRT display

16 p2867 A70-33041

Nonlinear digital programming techniques for airplane stability augmentation systems design

16 p2840 A70-33343

Fixed and variable sweep wing structure computerized design optimization

[ASME PAPER 70-DE-41] 16 p2869 A70-33506

Fluid power systems computer aided design and optimization, describing modeling and simulation, parameter sensitivity, systems stability, etc

[ASME PAPER 70-DE-44] 16 p2869 A70-33508

Fluid logic systems synthesis by computer aided design programs, proposing referee system

[ASME PAPER 70-DE-47] 16 p2844 A70-33510

Computerized design for radial flow splitters in three dimensional fan exhaust nozzles

18 p3207 A70-36462

Linear feedback control system with dead time compensated by proportional integral derivative action controller, evaluating stability by digital computer

18 p3236 A70-36944

Airport planning and design, discussing role of computers in capacity and site analysis, wind data processing, passenger and baggage flows analysis, etc

19 p3396 A70-37749

DC-to-sinusoidal inverter employing PWM waveform, analyzing circuit parameters effect on harmonic content

19 p3358 A70-37854

Structural weight design optimization by computer aided geometrical programming technique

[SAWE PAPER 822] 20 p3733 A70-40357

Aircraft loadability design by computerized loading program using graphic plotter

[SAWE PAPER 836] 20 p3562 A70-40364

Aircraft manufacturing cost estimation in conceptual design phase, using structural synthesis program for cost buildup simulation

[SAWE PAPER 853] 20 p3741 A70-40371

Structural mass properties solution using programmable printing desk computer for fast data point plotting

[SAWE PAPER 856] 20 p3595 A70-40372

Supersonic aerodynamic design tools, discussing technological application of high speed computer and limitations

[AIAA PAPER 68-1018] 22 p3958 A70-42701

Linear FM radar pulse compression matched filter response calculated by computer evaluation of cross ambiguity function for design tradeoff between resolution and performance

22 p3992 A70-43589

Digital computer algorithm for automatic electronic circuit design using design engineer experience

23 p4171 A70-43953

MOS transistor trigger circuit design parameters statistical calculation and optimization by Monte Carlo method using computer

23 p4171 A70-43957

Linear phased arrays computer aided design, discussing search algorithms in multivariable optimization program

23 p4172 A70-44015

Short haul jet transport aircraft design, discussing Computer Aid Design, Airline System Simulator and Traffic Demand Predictor computer programs

[ICAS PAPER 70-28] 23 p4284 A70-44105

Computer-aided aircraft design, discussing parts geometry data bank, visual display, etc

[ICAS PAPER 70-27] 23 p4200 A70-44106

Aerobee rocket-borne cryogenic air samplers heat exchanger design by mathematical model and computer solution

23 p4280 A70-44365

Optimal design of minimum weight bar and beam structures under static loads, comparing computer time with nonlinear programming methods

23 p4271 A70-44702

Nonlinear shell analysis by finite difference energy method, using BOSOR3 and STAGS computer programs

23 p4273 A70-44723

Electrostatic potential distribution and ion trajectories in extraction gage design by computer

23 p4198 A70-44873

Computerized design of broadband microwave amplifiers with complex terminations, using transfer scattering parameters for analysis and optimization

24 p4316 A70-45211

Optimality criterion selection for asynchronous microelectric motor design by computer

24 p4293 A70-45470

Computer optimization program for solid state components and integrated circuits design with conversational system for man machine dialogues

24 p4317 A70-46321

COMPUTERIZED SIMULATION

NT ANALOG SIMULATION

NT DIGITAL SIMULATION

Equivalent linear dynamic systems obtained by analog computers for determining equivalence equations coefficients and by Chebyshev functional to assess discrepancy

01 p0052 A70-10193

Bioelectrically controlled system for indirect heart massage, noting dynamic simulation of system on digital computers using block oriented programming languages

01 p0047 A70-10261

Hardware CRT display system based on digital computer for dynamic flight simulation of moving spatial objects

01 p0089 A70-10818

Computer model for evolution investigation of disks of stars, discussing methods to obtain gravitational potential

01 p0185 A70-11065

Computer driven display terminal as part-task limited area simulator, examining operational requirements and input characteristics

01 p0059 A70-11277

Analog, analog/digital, digital and hybrid computer simulation current advances, emphasizing physiological problems and optimum solution

02 p0264 A70-11687

Trainers and simulators based on digital computers, eliminating system sensitivity to ambient conditions, power fluctuations, circuit imperfections and digital to analog conversion

02 p0274 A70-11841

Computer simulation of automated ATC systems, discussing operational gaming and mathematical models

02 p0274 A70-11968

Digital real time simulation for training and evaluating ATC controllers, discussing system hardware, software, design and implementation

02 p0274 A70-11977

Computer simulation of automated air traffic control concepts, formulating and implementing general-

ized model of automated transition/terminal area systems

02 p0335 A70-12133

Reactive forces and torques of musculoskeletal system during lifting and carrying materials, using computerized biomechanical models

02 p0247 A70-12549

Photographic negatives analysis, storage and reconstruction using facility permitting photography conditions simulation and computer image treatment

02 p0302 A70-12614

Air combat model /AIRCOM/ to evaluate close-in air-to-air fighter aircraft combat capability, determining relative changes in kill probability per firing pass

03 p0413 A70-13958

Terrain computerized mathematical model for determining unobstructed line of sight between observer and target

03 p0455 A70-14172

Mathematical model for computer simulation of homogeneous neuron nets with recurrent inhibition control, considering activated and inactivated states

04 p0640 A70-14553

Cloud cover consequence on earth photographing space missions simulated by Monte Carlo method using worldwide statistics

04 p0676 A70-14636

Computer modeling of operational amplifier integrated circuit in ionizing radiation environment, using RLC network and voltage transfer curve

04 p0658 A70-14740

Computer program for electrical and transient thermal analysis of satellite electric power subsystem consisting of solar array, battery and power controls

04 p0628 A70-15332

Hybrid computer simulation of small nonlinearities effects in human arterial system, using perturbation techniques

05 p0805 A70-16045

Haze model atmospheres scattering characteristics by computer simulation concerning optical contrast reduction by aerosols for direct and diffuse radiation

[AIAA PAPER 70-194] 06 p1057 A70-18156

Monte Carlo method for modeling gas flow by simulated molecules concurrently followed through collisions and boundary interactions in simulated physical space within computer

06 p1113 A70-18314

Computerized FORTRAN equations simulation of linear and nonlinear circuits for symbolic analysis and transient response

06 p1026 A70-18424

Mathematical techniques for selenodesy computer simulation program, solving problems arising from infinite series of spherical harmonics for lunar gravitational potential

06 p1152 A70-18498

Visual simulation in Lunar Module Mission simulator provided by computer controlled infinity optics system

06 p1031 A70-18603

Narrow band limiter influence on SNR at FM reception output by computer simulation using threshold pulse model

07 p1227 A70-19124

Ionospheric motions and irregularities effects on HF radio propagation using computer simulation involving ray tracing and ionosphere modeling

07 p1264 A70-19192

Computer scheduling model and timeline plot for Apollo Telescope Module (ATM) experiments using orbital trajectory simulation

07 p1394 A70-19572

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories

07 p1239 A70-20414

Man-computer interactions in experiment design analysis, discussing applications to computer simulation

08 p1464 A70-20606

Plasma oscillations analytic second order theory verification by computerized simulation, using Fourier-Hermitian expansion of distribution function in phase space

08 p1550 A70-20636

Extremal statistics for signal and noise error probabilities estimation and computer simulation of digital feedback communication systems

08 p1459 A70-20800

Simulation applications - Conference, Los Angeles, December 1969

08 p1466 A70-20926

Alternative equipment maintenance procedures costs by combined discrete event and continuous system simulation, discussing additional model applications

08 p1466 A70-20927

Extendable computer simulation model /ECSS/ overcoming programming and debugging problems, discussing language selection, design, specification, work load, etc

08 p1466 A70-20928

GPSS simulation for airport capacity, analyzing aircraft ground traffic flow characteristics and developing expansion schemes minimizing investment

08 p1481 A70-20929

SOAR /Simulation of Airlift Resources/ model for stochastic productivity variations of strategic airlift systems

08 p1466 A70-20930

Boeing 747 aircraft container system deployment simulation written in GPSS/360 to minimize stockholding of containers at individual stations

08 p1481 A70-20931

Saturn 5 Prelaunch Systems Simulation Model for launch opportunity containing multiple launch windows, considering last 26 hours of countdown

08 p1582 A70-20933

Real time simulation of air traffic control problems in Brussels upper information region /UIR/

08 p1541 A70-21361

Reticular formation of central nervous system in vertebrates described as behavior controlling circuit of interconnected modules, proposing hybrid computer method for operational scheme

08 p1447 A70-21461

Textured gray-scale imagery by computer simulating lunar display

09 p1642 A70-23771

Ground based moving-base aircraft flight simulator using computer program to establish motion requirements

[AIAA PAPER 70-348]

10 p1859 A70-24213

Computer simulation of six degree of freedom motion system and actual system test, substantiating simulation accuracy

[AIAA PAPER 70-358]

10 p1859 A70-24218

Concorde SST aerodynamic, structural and thermal analysis and simulation using computers

10 p1849 A70-24382

Impact problems of slip clutch and beam scales dynamic characteristics simulation by 1130 CSMP /Continuous System Modeling Program/

10 p1860 A70-24653

SIMCON digital simulation control system optimizing man machine interaction, noting capability to generate solutions with minimum computer memory

10 p1860 A70-24654

Avionics test station optimum design by computerized simulation involving iteration of computer run, analysis and model change

[AIAA PAPER 70-398]

10 p1861 A70-24907

Hybrid simulation, determining vehicle and performance parameters on longitudinal flying qualities of STOL transport in power approach configuration

[AIAA PAPER 70-387]

10 p1806 A70-24918

Cloud cover effect on earth photographing space missions by Monte Carlo computer simulation, using worldwide cloud statistics

11 p2075 A70-25600

Insulators, ablaters, reflectors and computer analyses for aerodynamic and engine heat for aerospace thermal design

11 p1980 A70-25874

Two dimensional unsteady fluid flow in square cavity numerically analyzed from continuity and Navier-Stokes equations and recorded as computer-generated motion picture

11 p2035 A70-25971

Spacecraft launch computerized simulator, discussing operational characteristics applicable to on-line real time process control

11 p2013 A70-26217

Steady state large signal computer model for junction-gate field effect transistors below pitch-off

11 p2019 A70-26711

Electron beam-plasma interaction nonlinear development in time and space using computer simulation

11 p2095 A70-26758

Empennage loads on T tail transport determined for combined vertical and lateral gust loads using real time analog-digital computer simulation

12 p2160 A70-27113

Collisionless electrostatic shock generation conditions, simulating homogeneous counterstreaming plasmas by computer

13 p2462 A70-29110

Delta modulation with slope-overload prediction, showing signal to noise ratio improvement from computer simulation

13 p2365 A70-29146

Computer modeling of nonlinear phase automatic frequency control systems under noise and oscillating disturbance

13 p2383 A70-29303

Cloud model development and computer simulation uses, noting applications to aerospace experiment design

14 p2608 A70-30597

Computer models simulating plasma motion applied to sheet pinch stability, investigating relativistic and nonrelativistic regimes

14 p2623 A70-30696

Gas flow calculations application to gas turbines simulations, considering engine dynamics, one dimensional flow and program structure

14 p2629 A70-30990

Quality control variables optimization for maximum net revenue, using computerized simulation

14 p2592 A70-31105

Electromagnetic interference /EMI/ effects on TALOS missile guidance receiver by expanding computer simulation test results

14 p2655 A70-31345

Computerized thermal modeling of spacecraft environmental control systems /ECS/

15 p2705 A70-32523

On-line computer aided design of fixed point digital filters simulating direct, cascade and parallel bit representations

15 p2711 A70-32598

Complex systems effectiveness analysis by computer simulation technique

15 p2706 A70-32633

Hybrid computer simulation of steady state oxygen transport and consumption in capillary-tissue system

15 p2694 A70-32845

Optimal control solution for dynamic entry vehicle along planar trajectory, using hybrid computer simulation

16 p2981 A70-33443

Automatic alphabetic characters classification model based on cross correlation and discrete Walsh-Fourier transforms, using computerized simulation

16 p2851 A70-33460

Human and machine pattern discrimination correlated by statistical correlation method from pattern recognition task involving computer simulation and humans

16 p2852 A70-33461

Remote real time simulation, using CDC 6600 computers, peripheral equipment and wideband communication link

16 p2870 A70-33732

Real time simulation of space vehicle and ground support equipment by digital computer for launch programs checkout

16 p2870 A70-33733

NERVA XE-Prime test series, discussing computer simulation, full power and high specific impulse operation and startup under varying initial conditions

[AIAA PAPER 70-709]

16 p2951 A70-33950

Human body radiation shielding, describing development of computerized standing and seated model for space missions

[AAS PAPER 70-053]

17 p3036 A70-34794

Real time hybrid computer simulation of guided and controlled rocket flight, noting correlation with digital simulation

17 p3060 A70-35285

Systems operation hybrid simulator for computer checkout of Saturn S-1C stage

17 p3061 A70-35489

Digital computer simulation and analysis of control loops for ion thruster control

[AIAA PAPER 69-239]

17 p3149 A70-35654

Japanese scientific satellite magnetic attitude and spin rate control system design and computer simulation

18 p3332 A70-36065

Computerized simulation role in air traffic control

18 p3236 A70-36398

Optimum approach and departure paths for VTOL aircraft simulated by hybrid computer under constraints

[AIAA PAPER 69-209]

18 p3213 A70-36452

Computerized air combat simulation with comparison of analog and digital approaches, noting Air to Air Combat Fort Worth

18 p3230 A70-36453

Finite size particle physics for plasma computerized simulation, considering longitudinal oscillations, scattering cross sections, diffusion coefficients, etc

18 p3296 A70-36791

Soviet book on isolated animal heart autoregulation, considering cardio-pulmonary preparations, functional capacity, biometrics and computer technology for heart activity simulation models

19 p3359 A70-37404

Airport capacity analysis for terminal areas, using simulation for alternatives to parallel runway operation

19 p3397 A70-38236

Airport capacity and layout, considering air traffic increase, runway occupancy, taxiway and computer simulation

19 p3468 A70-38636

Operational analysis and real time computer simulation models in ATC development

19 p3468 A70-38637

ATC simulation at EUROCONTROL Experimental Center, discussing dynamic simulator, data processor and display

19 p3468 A70-38638

Mariner 7 preencounter anomaly in radio tracking data and trajectory investigated by computerized simulation

[AIAA PAPER 70-1065]

19 p3534 A70-38878

Computer simulated decision hierarchical model of helicopter and VTOL pilot for multiloop closure and tracking characteristics of man-vehicle system

19 p3372 A70-38921

Digital computer model of total body ECG surface maps, simulating male torso with lungs

20 p3578 A70-39369

Satellite-borne conical IR scanner flight data hybrid simulation and error analysis, suggesting carbon dioxide horizon noise model

[AIAA PAPER 70-1021]

20 p3631 A70-39513

Interactive hybrid simulation of TRIAD satellite motions, describing attitude control system with magnetic hysteresis damping

[AIAA PAPER 70-994]

20 p3714 A70-39536

Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth

[AIAA PAPER 69-936]

20 p3591 A70-39684

Acoustic /microwave/ holography for large masses by crossed linear array of microphones, discussing computer simulation of virtual holograms and image reconstruction

21 p3822 A70-40715

Command module simulators for Apollo astronaut training in moon landing, using computer, exterior visual scenes and spacecraft interior replica

21 p3804 A70-41195

Lunar module simulator for Apollo flight training using computers, digital conversion, cockpit replica, infinity-optics display and instructor control

21 p3805 A70-41196

Computer real time Apollo simulation, checkout and training system duplicating actual mission for flight controllers in Mission Control Center

21 p3805 A70-41198

Gliding parachute air cargo systems using nonproportional and proportional automatic manual control, estimating wind effects on ground track and impact computer simulation

[AIAA PAPER 70-1193]

21 p3753 A70-41823

Mission analysis and trajectory simulation /MATS/ program, discussing computer controls, modular design, integration evaluation

[AIAA PAPER 69-939]

21 p3920 A70-41872

Computer model of self gravitating gas-stars system with spiral structure surviving galactic rotations

22 p4103 A70-42982

Computer synthesis of completely eclipsing binary light curves including limb darkening and simulated observational errors

22 p4103 A70-42990

STOL system traffic analysis simulation model for interurban transportation system as tool for flight hardware evaluation

22 p4007 A70-43731

Computerized mathematical modeling of transistors statistical and dynamic characteristics as functions of structural parameters

23 p4171 A70-43954

Various Frank loops in quenched and annealed Pt, examining dislocations with field ion microscopy and computer simulated approximations

23 p4230 A70-44758

Computerized simulation and hardware for propulsion control of turbine engines

[SAE PAPER 700827]

24 p4394 A70-45892

Computerized simulation of raindrop effects on initiation of cloud-to-ground lightning strokes

24 p4371 A70-45978

Vortices growth in vortex sheets bounding jets flowing from two dimensional slit and circular orifice observed by computer experiments

24 p4327 A70-46244

COMPUTERS

NT AIRBORNE/SPACEBORNE COMPUTERS

NT ANALOG COMPUTERS

NT DIGITAL COMPUTERS

NT HYBRID COMPUTERS

NT IBM 360 COMPUTER

NT SEQUENTIAL COMPUTERS

NT SITE DATA PROCESSORS

Cost effective phased buildup of computerized ATC systems

02 p0401 A70-11961

Instruments and procedures for photogrammetry automation, discussing automatic pattern recognition, data correlation and computer role

02 p0302 A70-12652

Computers - IEEE Conference, Minneapolis, June 1969

05 p0817 A70-16413

Matrix Computer equisolution matrices for nonlinear algebraic and integrodifferential equation systems solution

06 p1014 A70-17427

Management systems growth in relation to computer applications development, noting second industrial revolution

10 p1971 A70-24661

Computerized aircraft navigation utilizing Doppler dead reckoning system and Tacan integration with least square adjustment method

13 p2447 A70-28550

Computer system maintainability demonstration test in accordance with MIL-STD-471, discussing techniques for failure indication and repair crew qualifications and training

15 p2706 A70-32657

Computer applications in radar and air traffic control, large steerable aerials, systems design and graphical displays

15 p2832 A70-32704

Computers - AFIPS Conference, Atlantic City, May 1970

16 p2870 A70-33730

Computer users functions to determine preparation level for effective dialog with computer, discussing teaching stages

18 p3223 A70-36077

Computer merits in test laboratory data acquisition systems

19 p3383 A70-37921

Multichannel computer for statistical investigations of complex nonlinear controlled plants based on recordings of input, output and internal state variables

20 p3594 A70-39921

Biocybernetics of human central nervous system, discussing electronic computers analogy to human brain

23 p4145 A70-44222

Electronic simulation of indicator-dilution curves for comparative evaluation of cardiac output computers

24 p4309 A70-46120

COMSAT PROGRAM

Signal attenuation and bandwidth limitations imposed by atmospheric hydrometeors on communications satellite systems above 10 GHz, discussing Comsat measurement programs

11 p1997 A70-25408

COMSAT measurement of precipitation scatter effects on propagation for frequency sharing with terrestrial radio relay terminals

11 p1997 A70-25413

Commercial communication satellite earth station technology and operations covering frequency allocations, antennas, orbits, etc

11 p1998 A70-25424

Launch vehicle selection, utilization and mission planning and analysis in Comsat programs, discussing INTELSAT I-IV

11 p2002 A70-25489

Commercial satellite communications, discussing creation and objectives of Comsat and establishment of Intelsat

13 p2368 A70-29618

Si and CdS solar cell research at COSMAT laboratories, discussing proton and electron irradiations and thermal cycling

15 p2677 A70-31804

CONCAVITY

Plane stationary shock wave reflection from rigid concave wall at low Mach numbers

21 p3811 A70-42204

CONCENTRATION (COMPOSITION)

NT ATMOSPHERIC MOISTURE

NT ATOM CONCENTRATION

NT CARBON DIOXIDE CONCENTRATION

NT MASCONS

NT METEOROID CONCENTRATION

NT MOISTURE CONTENT

Thermomechanical processing of high strength low alloy steels to evaluate effects of composition, coiling temperature and cooling rate on mechanical properties and microstructures

01 p0118 A70-10726

Vertical concentration and size distribution determinations for aerosols in stratosphere, suggesting volcanic origin

02 p0294 A70-12842

Flame structure of liquid methanol burning spheres, discussing temperature and composition profiles

03 p0544 A70-13924

Laser induced Raman scattering as diagnostic technique for measuring specie concentrations in gas mixtures

[AIAA PAPER 70-224]

06 p1066 A70-18214

Continuous generation of gas trace component quantities into carrier gas flow using dosage device

09 p1672 A70-22028

Initial cloud formation model, computing drop concentration and supersaturation

11 p2075 A70-25917

Analytic expressions for concentration distribution functions in inhomogeneous solids within intermediate stages of homogenization process

12 p2253 A70-27282

Turbulent boundary layer velocity, temperature and concentration instantaneous measurements, describing automatic circuit procedure

17 p3088 A70-35041

Optical observation of laminar convective flow caused by combined action of concentration and temperature fields

18 p3346 A70-36276

Transport ratio for I-131 air to milk concentrations, determining mean value and statistical variation from Project Rover data

19 p3361 A70-38012

Apollo 11 lunar rock and fines primordial radionuclide abundances and concentration gradients by gamma ray spectrometry at Lunar Receiving Laboratory

21 p3776 A70-41595

Apollo 11 lunar surface fine material and rocks cosmogenic radio nuclides Al 26 and Na 22 concentrations determination by gamma ray spectroscopy

21 p3910 A70-41618

Cu-Ni diffusion couples voids and edges effect on concentration gradients measurement by electron probe microanalysis

22 p4054 A70-42740

CONCENTRATORS

Solar energy concentrator with truncated conical mirror and toroidal lens to illuminate cylindrical thermoelectric generators or radiation pumped lasers

01 p0010 A70-10760

Hydrogen-oxygen fuel cell reaction water removal and heat loss using reconcentration device

12 p2163 A70-27066

CONCENTRIC CYLINDERS

Torque upper bounds in Couette flow between concentric rotating cylinders, considering dissipation integral and boundary and continuity conditions validity

03 p0468 A70-13787

Navier-Stokes boundary value problem describing viscous incompressible fluid flow between coaxial fixed and rotating cylinders, emphasizing stability analysis

03 p0470 A70-14242

Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties

03 p0608 A70-14304

Rarefied gas heat conduction between concentric cylinders at small Knudsen number and temperature gradient, using integral equations obtained from Krook equation

[ASME PAPER 69-WA/HT-19]

04 p0783 A70-14816

Viscous frictional torque on inner cylinder of eccentrically rotating concentric cylinders measured from laminar to turbulent flow

06 p1074 A70-17134

Rarefied gas flows and heat transfer between parallel plates, concentric cylinders and spheres in presence of fractionally accommodating boundaries

06 p1049 A70-18330

Time dependent stability of viscous rotational Couette flow induced by impulsively started rotating inner cylinder, using dye injection and motion pictures

07 p1255 A70-19209

Viscous compressible fluid steady laminar flow between coaxial cylinders, studying flow characteristics for uniform inner cylinder velocity

10 p1870 A70-24792

Eccentric cylinders with outer cylinder rotating measured for eccentricity and clearance ratios effects on pressure distribution and force on inner cylinder

11 p2060 A70-26409

Homogeneous viscous fluid steady state parallel Stokes flow in annular region between concentric cylinders at low Reynolds numbers

11 p2038 A70-26478

Steady state and transient heat transfer by radiation and conduction in absorbing medium bounded by infinite coaxial cylindrical surfaces

12 p2331 A70-27697

Flow stability of electrically conducting inviscid fluid in coaxial cylindrical annular space under influence of axial magnetic field

12 p2210 A70-27799

Swirling flow between concentric cylinders, studying helical instability modes

13 p2386 A70-28805

Mean field approximations to Couette flow stability between fixed and coaxial rotating inner cylinder, using Roberts preferred mode method

13 p2392 A70-30007

Viscoelastic fluid in Couette flow between coaxial cylinders and flow between fixed plane and rotating cone

14 p2567 A70-31358

Annular turbulent flow between coaxial rotating cylinders, analyzing energy balance of averaged and pulsating motions

15 p2721 A70-32138

Initial thermally stressed state of solid bounded by concentric cylindrical cylinders, applying Cauchy thermoelastic stress theory

16 p2987 A70-32993

Thin concentric circular cylindrical shells joined at ends by rigid diaphragms, describing free and forced torsional motion

16 p2992 A70-34019

Modified discrete ordinate approach in rarefied gas dynamics tested on linearized Couette flow between concentric cylinders, using integral iteration

17 p3067 A70-34548

Couette flow stability between coaxial rotating cylinders, calculating eigenvector in first approximation small perturbation equations

17 p3073 A70-35695

Gunn effect devices with concentric cylindrical electrodes, examining oscillation natural frequency-applied voltage relation

19 p3392 A70-38900

Unsteady temperature field in cylinder surrounded by thin shell under uniformly distributed heat sources

20 p3737 A70-39640

Nonuniform radiation heat transfer between two coaxial cylinders, obtaining temperature distribution by Fourier series expansion

21 p3952 A70-42082

Poiseuille-Couette spiral flow stability between concentric rotating cylinders

22 p4010 A70-42691

Thermal conductivity of water, toluene and benzene in coaxial cylinders, taking into account edge heat losses

23 p4276 A70-44216

Rarefied gas heat conduction between concentric cylinders in slip regime, obtaining perturbed temperature and density variations

23 p4284 A70-44985

Temperature profiles for viscous fluid contained between two concentric rotating porous cylinders

24 p4327 A70-46005

Viscous fluid two dimensional steady natural convection between horizontal concentric cylinders for low Grashof numbers

24 p4429 A70-46007

CONCORDE AIRCRAFT

Concorde aircraft structural acoustics and design problems, discussing noise, fatigue and testing techniques and facilities

01 p0199 A70-10288

Concorde power plant tests using supersonic free jet altitude test facility with Olympus 593 engine

01 p0165 A70-10701

Concorde aircraft flight simulator, describing pilot training system refinement and pilot training

01 p0057 A70-10797

Concorde engine and air intake electronic controls

02 p0353 A70-11837

Concorde aircraft main landing gear reliability, discussing design, corrosion, hydraulic contamination, metallurgy, sealing and tests

02 p0226 A70-12366

Structural aluminum alloy developed for Concorde Mach 2.2 flight, discussing cold mechanical properties, zero creep and fatigue resistance

04 p0706 A70-15041

Concorde microelectronic power plant control system, noting overfueling prevention by throttle actuator during startup and speed governor function

05 p0896 A70-16003

Concorde electronics systems for testing and flight safety, controlling center of gravity, braking, kinetic heating, air conditioning, fuel flow and inertial navigation

07 p1194 A70-19741

Computer-controlled automatic test bench for black box modifications and electronic, hydraulic and pneumatic testing on Concorde aircraft

07 p1249 A70-19742

Concorde simulator for determining aircraft control responses and integrating pilot function into problem

07 p1249 A70-19743

Simulated Concorde kinetic heating system for ground studies of thermal stresses

07 p1250 A70-19744

Laboratory electronics role in Concorde aircraft structural and acoustical fatigue analysis, flight simulation and flight studies

07 p1250 A70-19745

Concorde aerodynamic design compromise between high and low speed requirements, kinetic heat problems and materials selection

[AIAA PAPER 69-759]

07 p1195 A70-20399

Concorde flight testing program, discussing results on prototype, preproduction and production aircraft

08 p1436 A70-21727

Concorde aircraft test flight results, considering ground handling, takeoff, approach and landing, low speed flight, aeroelasticity, stability, power plant, etc

08 p1437 A70-21728

Concorde SST aerodynamic, structural and thermal analysis and simulation using computers

10 p1849 A70-24382

Metal working technology of Ti and alloys for structural parts fabrication for Concorde aircraft, describing laser cutting, electron beam welding, explosive forming, etc

10 p1895 A70-24594

Concorde aircraft radar signal transmission, describing modified Flexwell waveguide

13 p2379 A70-29561

Concorde Olympus 593 power plants air intake and engine control system design for rapid servicing, discussing fault diagnosis and checkout

14 p2535 A70-31337

Aeroelastic test equipment for Concorde, describing operating principles, installation, test results, etc 15 p2717 A70-31810

Hazard analyses of Concorde aircraft design, noting engine control failures and emergency equipment use probabilities 15 p2675 A70-32213

Concorde aircraft design for emergency passenger evacuation, emphasizing overwing inflatable escape slides and kinetic heating effects 15 p2675 A70-32222

Ti alloys use in Olympus 593 engine for Concorde SST, discussing weight saving, mechanical properties and manipulation characteristics 17 p3146 A70-34449

Concorde aircraft man machine simulation and handling using fixed cabin, variable stability and ground based simulators [AIAA PAPER 70-923] 17 p3064 A70-35834

Concorde engine bay thermal insulation combining stainless steel foil and polytetrafluorethylene film, considering noise level, engine fire conditions and molten Ti globules penetration 18 p3346 A70-36345

Suborbital space transports problem solution by recoverable jet orbital or jet assisted aircraft, discussing implications of Concorde supersonic flight 18 p3350 A70-36663

Concorde design limitations for commercial success in civil airlines 18 p3350 A70-36665

Olympus 593 engine for Concorde aircraft, describing design and test procedures [SAE PAPER 700291] 18 p3302 A70-36805

Concorde aircraft powerplant design using fire tunnel test [ASME PAPER 70-GT-128] 18 p3238 A70-36854

Concorde prototype 002 flight test data recording instrumentation, emphasizing digital system for quasi-static parameters 19 p3432 A70-38545

Aeroelastic test equipment for Concorde SST using harmonic method and electromagnetic shakers 19 p3402 A70-38548

Concorde loadability, with comparison of flight balance situation for supersonic and subsonic aircraft, describing fuel system [SAWE PAPER 835] 20 p3563 A70-40365

Concorde aircraft flight test program for verifying design features of wing vortices, fuel transfer, longitudinal stability, etc 21 p3749 A70-40580

Concorde SST horizontal navigation, discussing data sources, equipment specifications, flight rules, man-machine interaction, etc 22 p4067 A70-42660

Concorde downstream thrust reversal nozzle, noting weight saving by use of welded stainless steel honeycomb construction 22 p4092 A70-43213

Sonic boom effects on building structures, using Concorde measurements and explosion simulation studies 24 p4289 A70-45151

Concorde thrust control by employment of variable area nozzle and reheat system, discussing crew work load [SAE PAPER 700817] 24 p4394 A70-45900

Meteorological wind and temperature distributions on selected routes at Concorde cruising level, noting computer use for flight planning 24 p4374 A70-46204

CONCRETES

German monograph on creep in statically indeterminate reinforced concrete beams with graduated cross sections 19 p3548 A70-38473

CONDENSATES

Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies [AIAA PAPER 69-270] 01 p0166 A70-10836

Smoked-foil technique for transverse wave quantitative study in condensed-phase explosives 03 p0606 A70-13814

CONDENSATION

Nonequilibrium effect of expanding water vapor condensation on supersonic nozzle flows with or without inert carrier gas 01 p0063 A70-10806

Water vapor condensation by homogeneous nucleation measured for cluster number using laser light scattering compared with theory in condensing supersonic flow 02 p0279 A70-12048

Approximate solution for far downstream flow of condensation in hypersonic wind tunnels and nozzles for colloidal thrusters and EHD generators 04 p0621 A70-15600

Irreversible phase transition analysis of atmospheric condensation-crystallization processes 08 p1538 A70-21427

Condensation start dependence on air humidity at inlet and nozzle geometry applied to supersonic wind tunnel using undried atmospheric air 09 p1606 A70-23614

Electrostatic rocket exhaust condensation on spacecraft solar electric panels cover glasses, noting deleterious effects [AIAA PAPER 69-271] 11 p2103 A70-26131

High temperature gaseous molecular beams impingement on Cu surfaces at cryogenic temperatures measured for condensation rates 12 p2271 A70-27265

Carbon dioxide jet plumes condensation on model nozzle in vacuum chamber, noting particle size and growth rate 13 p2523 A70-29983

Protein synthesis, dialysis and Mg ion concentration effects on chemical condensation of mixed amino acid adenylates 17 p3042 A70-35146

Moist air expansion through supersonic nozzle, investigating small ions role in water condensation 22 p4011 A70-42774

Contoured nozzle shock tunnel condensation point, determining flow supercooling over specified pressure range 23 p4182 A70-44588

CONDENSATION TRAILS

U CONTRAILS

CONDENSER RADIATORS

U HEAT RADIATORS

CONDENSING

NT FILM CONDENSATION

Liquid nucleation in vapor condensation on wettable, unwettable, smooth, rough and cavitated surfaces, showing positive effect of roughness elements 06 p1177 A70-17838

Supersonic free jets condensation, examining kinetics of reactions in mono- or diatomic gases 06 p1044 A70-18282

Supersonic molecular free jets using electron diffraction technique, discussing vibrational and condensation states 06 p1044 A70-18301

Cloud particles growth and interactions, discussing water vapor condensation, ice phase nucleation, rain droplet growth rate, etc 07 p1262 A70-18897

Linear kinetic theory for condensation and evaporation at small Knudsen numbers, considering extrapolated temperature jump determination 07 p1422 A70-19656

Atmospheric condensation nuclei activity with rough surface with decreasing spherical hollows 09 p1718 A70-23172

Carrier gas effect on homogeneous condensation in supersonic nozzle using liquid drop theory 12 p2211 A70-27829

Coronal condensations temperature and electron density measurements at meter wavelengths and in white light 13 p2488 A70-28717

Condensed products of vaporized primordial terrestrial material accounting for moon formation, using single stage precipitation earth origin hypothesis 13 p2488 A70-28719

Boron particles combustion behavior prediction by incorporating condensed phase effect into diffusion controlled model 13 p2472 A70-29612

Surface temperature fluctuations during dropwise condensation at various heat fluxes 14 p2663 A70-30256

Linear kinetic theory for condensation and evaporation at small Knudsen numbers, considering extrapolated temperature jump determination 15 p2828 A70-32693

Hygroscopic materials warm fog clearing capabilities comparison, recommending urea and ammonium nitrate 20 p3664 A70-40065

Cetyl alcohol and water vapor growth by absorption and condensation on hygroscopic nuclei population in atmosphere under cooling 20 p3664 A70-40066

Saturated nitrogen vapors condensing coefficients measurement by cryostat, comparing results with theoretical prediction 23 p4218 A70-44364

Aerobee rocket-borne cryogenic air samplers heat exchanger design by mathematical model and computer solution 23 p4280 A70-44365

CONDITIONED RESPONSES

U CONDITIONING [LEARNING]

CONDITIONING [LEARNING]

Conditioned suppression after differential training, discussing shock tests on rats with safe and danger signals 01 p0036 A70-10794

Temporary interneuron connections mechanisms during conditioned reflexes development 01 p0025 A70-11040

Accelerative and decelerative heart rate responses in human subjects given differential conditioning trials by auditory and electric shock stimuli under paced respiration 02 p0239 A70-12628

Cats cerebral cortex background electrical activity measured during development of conditioned reflexes, noting shift toward higher frequencies 03 p0418 A70-13217

Conditioned fear reaction produced by electric stimulation of cat anterior hypothalamus, discussing effect of neocortex removal 03 p0420 A70-13425

Work and exercise conditions effect in early training stages of learning sensorimotor skill, considering different body positions 03 p0432 A70-14295

Complex conditioned reflexes to three component visual-acoustic-tactile stimulus in dogs analyzed by secretory and thermoelectrical techniques 04 p0638 A70-15504

Human macrosaccadic eye movements related to four dial display conditioned by concurrent variable interval schedules of signals 05 p0800 A70-16127

Pavlovian conditioned reflexes theory reappraisal, discussing cortex-subcortical formations interrelations models 07 p1197 A70-18694

Rabbits sensorimotor and visual cortical responses during defensive conditioning to rhythmic light 07 p1197 A70-18695

Human motor reactions rhythmic system, relating reaction-skin-galvanic reflex to formation of successive conditioned connections 07 p1197 A70-18697

Amysyl effects on conditioned passive avoidance reflexes development and reinforcement in white mice under electric shock 07 p1198 A70-18717

Canines conditioned reflex activity as function of cortex sections following head exposure to X ray irradiation 07 p1199 A70-18729

Phase correlation of conditioned and electrophysiological postirradiation disturbances in central nervous system of monkeys 08 p1446 A70-21447

Bioelectrical activity of brain during conditioned motor reflex system operation modes in response to stimulating light pulses 08 p1447 A70-21450

Hippocampus nerve cells protein fractions synthesis in rats, noting relation to learning process during transfer of handedness 12 p2172 A70-28217

Electrical activity of visual cortex, subcortical structures and reticular formations in cats during conditioned reflex stimulation by light 12 p2173 A70-28351

Dynamic interaction between stored and active memory images in apes and monkeys with conditioned alimentary motor reflexes stimulated by visual signals 12 p2173 A70-28352

Threshold excitation of cutaneous analyzer in man under vascular conditioned reflexes in response to acoustic signals with shock 12 p2173 A70-28353

Vestibular nystagmus evocation by conditioned reflexes technique after pure tone stimulation 14 p2538 A70-30910

Thermoregulatory vasodilation conditioned reflexes developed by combination of prolonged physical and acoustic stimuli 15 p2679 A70-31606

Noise bursts response of positive and inhibitory conditioned eyelid reflexes in cats brain, discussing auditory system function 15 p2687 A70-32871

Cortical evoked potentials in human motor conditioning to photic stimulus 18 p3221 A70-37212

Evoked potentials in dogs sensorimotor cortex during defensive instrumental conditioning 18 p3221 A70-37213

Electrophysiological characteristics of man during disorders in rhythmic system of conditioned motor reactions 18 p3221 A70-37217

Soviet monograph on secondary signaling system role in development of speech, thought, conditioned and unconditioned reflexes, human will and hypnosis, noting salivary gland function 19 p3359 A70-37407

Fixed-ratio performance patterns of pigeon key-peck responses to fractional punishments by electric shock 22 p3971 A70-43375

CONDUCTING FLUIDS

Entrainment of electrically conducting liquid by moving wall in long duct with rectangular cross section and magnetic induction field

01 p0151 A70-10656

Three dimensional instability of perturbed conducting fluid laminar boundary layer flow on concave walls in transverse magnetic field, analyzing various Hartmann numbers

01 p0152 A70-10934

MHD wave propagation in electrically conducting fluid contained in finite length circular cylinder subject to axial magnetic field and nonelectromagnetic forces

01 p0152 A70-10944

Ultrasonic wheel-type portable inspection device with internal coupling immersion fluid contained in silicone tire, allowing angle beam inspection without temperature correction

01 p0105 A70-11396

Unsteady MHD flow of viscous incompressible electrically conducting fluid through rectangular duct under transverse magnetic field

03 p0471 A70-14333

Heat transfer in steady state flow of electrically conducting incompressible viscous fluid in annular channel between coaxial circular cylinders under magnetic field

03 p0608 A70-14335

Conducting fluid laminar flow between parallel planes in traveling magnetic field, integrating Maxwell and Navier-Stokes equations

04 p0726 A70-14542

Conducting fluid as MHD lubricant for cylindrical bearings, deriving equations for ideally conducting shaft and bearing and arbitrary Reynolds numbers

04 p0697 A70-14544

Incompressible electrically conducting fluid flow along rectangular duct under transverse magnetic field, noting equivalency of Hunt solutions and thin wall restriction

04 p0726 A70-14614

MHD Stokes flow for magnetized bodies of revolution, rotating with steady motion in viscous conducting fluid at rest at infinity

04 p0726 A70-14615

Conducting fluid steady convection due to combined effects of thermal gradient and DC electric field predicted by analytical model

04 p0785 A70-14989

Fundamental matrix asymptotic forms obtained for supersonic and subsonic three dimensional steady flows past body in uniform stream of viscous thermally conducting fluid

04 p0673 A70-15320

Electrically driven jets of slightly conducting viscous fluids drawn from conducting tubes, discussing cylindrical soap film instability under radial electric field

05 p0831 A70-15917

Gravitational instability of finitely conducting incompressible fluid layer of finite thickness surrounded by nonconducting medium

05 p0915 A70-16696

Incompressible boundary layer flow of conducting fluid on solid two dimensional and axisymmetric bodies under transverse magnetic field approximated by momentum method

06 p1031 A70-17199

Linearized MHD equations for motion of solids in viscous and electrically conducting fluids

06 p1120 A70-17532

Velocity, magnetic field and drag equations for steady incompressible viscous conducting fluid flow around spherical hollow shell

06 p1122 A70-17917

Hall effect measurements in liquid semiconductors and metals

06 p1127 A70-17919

MHD free convection of electrically conducting fluid in strong cross field using perturbation technique, considering liquid metals and ionized gases

07 p1348 A70-19208

Conducting fluids flow instabilities characterized by incipience at critical electric Hartmann number and convection rate proportional to electric Reynolds number

07 p1348 A70-19265

Incompressible conducting fluid MHD flow at infinite plane wall forward stagnation point, considering suction or injection effects

07 p1354 A70-20237

Finite amplitude effects on MHD thermal convection in rotating layer of conducting fluid, discussing subcritical instability

08 p1563 A70-20472

Steady pressure driven flow of conducting fluid through insulating circular pipe in transverse magnetic field

08 p1549 A70-20502

Model for magnetic field-line reconnection in conducting incompressible fluid, determining maximum reconnection rate entirely by null point conditions

08 p1553 A70-21615

Plane flow of electrically conducting fluids around oscillating plate, using equations linearized by Oseen method

09 p1734 A70-22316

Two dimensional radial flow of inviscid infinitely conducting compressible fluid under influence of magnetic field

09 p1735 A70-22757

Charged particles velocity profile across shock determined by induction velometry, considering eddy currents effects on induced potential gradient

09 p1738 A70-23677

Unsteady MHD flows of viscous, incompressible and electrically conducting fluid, proving boundary value problem solutions existence and uniqueness

10 p1922 A70-24095

Alfven flow of dissipative conducting incompressible fluids in presence of thin airfoil in magnetic field, considering flow turbulence calculation

10 p1922 A70-24143

Conducting gas unsteady efflux from plane tube into vacuum, determining time dependent position of expanding rarefaction wave fronts

10 p1924 A70-24569

MHD boundary layer on rotating body in viscous incompressible conducting fluid, studying magnetic field effects on time-to-separation

10 p1924 A70-24572

MHD exact solutions class, observing conducting flow intensification by magnetic field application

10 p1924 A70-24573

Navier-Stokes-Maxwell equations solutions for conducting fluid flow in azimuthal magnetic field, noting jet acceleration near symmetry axis

10 p1924 A70-24574

Solid body acceleration by ideally conducting gas in constant gravity field under magnetic field, considering rarefaction, reflected waves, motion equation, wall pressure, etc

11 p2082 A70-25389

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface

[ALAA PAPER 69-724]

11 p2035 A70-25977

Homogeneous turbulent velocity effect on magnetic field distribution in electrically conducting fluid with no external source, observing dynamo action

11 p2091 A70-26545

Velocity fluctuations measurements in conducting fluids flowing through tubes

12 p2230 A70-27091

MHD disturbances in semiinfinite electrically conducting fluid, introducing magnetic dipole to act as source of disturbance

12 p2277 A70-27156

Two dimensional viscous incompressible conducting fluid flow between parallel porous walls in magnetic field, studying skin friction fluctuations

12 p2209 A70-27157

Stability of MHD dissipative circular flow of viscous electrically conducting fluid between concentric stationary cylinders impressed with axial magnetic and radial electric fields

12 p2277 A70-27195

Externally pressurized bearing with electrically conducting gas lubricant under axial magnetic field, considering load capacity

12 p2244 A70-28018

Turbulence energy balance equations for conducting fluid flow in longitudinal magnetic field with Joule dissipation

12 p2282 A70-28227

Plane incompressible conducting fluid laminar jets analysis in magnetic field, using boundary layer equations for zero electric field

13 p2461 A70-28964

Stationary ring vortices in unbounded conducting fluid, investigating self excitation of magnetic field by vortices

13 p2461 A70-28965

Wind tunnel interference for inviscid compressible conducting fluid on slender body of revolution, discussing disturbance potential

13 p2464 A70-29449

Gas parameters determination near singular point of slow magnetosonic wave propagating in conducting medium in uniform magnetic field

13 p2464 A70-29507

Linearized steady plane axisymmetric flows of inviscid finitely conducting incompressible fluid past insulator under magnetic induction with zero components

13 p2464 A70-29541

Incompressible, viscous and electrically conducting fluid flow due to rotating disk in uniform magnetic field, discussing hydromagnetic interaction effect on velocity and friction

13 p2465 A70-29544

Thermal boundary layer separation in conducting fluids by rotating magnetized blunt body

13 p2469 A70-30008

Two dimensional unsteady flow of weakly conducting fluid in perpendicular magnetic field using Green function

14 p2621 A70-30180

Thermal radiative transfer and magnetic field effects on hydromagnetic stability of hot electrically conducting fluid

14 p2623 A70-30996

Conducting incompressible fluid flow past sphere, examining effect on magnetic field for small magnetic Reynolds number

15 p2778 A70-31913

Uniform electric and magnetic fields effects on flow of conducting compressible fluid in channel, using multiple scales method

15 p2779 A70-31914

Conducting incompressible fluid laminar flow between rotating disks in transverse magnetic field with source at center

15 p2779 A70-31915

Hydromagnetic viscous flow of incompressible conducting fluid due to electric current radial divergence from point source

15 p2780 A70-32426

Unsteady hydromagnetic flow of viscous electrically conducting incompressible fluid due to rotating disk under perpendicular magnetic field

16 p2958 A70-33297

Heterogeneous conducting fluid stability between fixed rigid cylinders with radiant gravitational force and magnetic field

16 p2894 A70-33784

Current sheet structure of hydromagnetic boundary layer formed by mixing two conducting fluid streams containing oppositely directed magnetic fields

17 p3140 A70-34930

Supersonic electrically conducting gas flow in flat channel with dielectric walls in inhomogeneous magnetic field

17 p3141 A70-35334

Supersonic conductive gas recombination fronts for arbitrarily oriented magnetic field, allowing for dissipative coefficients

18 p3294 A70-36255

Spatially periodic dynamos, analyzing homogeneous conducting fluid motions and magnetic field forms

18 p3291 A70-36407

Magnetohydrodynamic flow of electrically conducting viscous incompressible fluid past nonconducting semiinfinite flat plate under transverse magnetic field

18 p3295 A70-36431

Thermodynamics and velocity of MHD shock waves in perfect conducting fluid, using compressibility conditions and relativistic Hugoniot equation

19 p3477 A70-37580

Relativistic effects for MHD Riemann waves in electrically conducting fluid

19 p3478 A70-37583

Liquid with small electrical conductivity and kinematic viscosity in intense transverse magnetic field, examining plane and three dimensional duct flow

19 p3478 A70-37589

Electrically conducting perfect compressible fluid flow in semiinfinite channel under electromagnetic field, using multiple scales method

19 p3479 A70-37595

Thin airfoil theory in magnetohydrodynamics, considering steady two dimensional flow of compressible perfectly conducting inviscid fluid in presence of uniform magnetic field

19 p3351 A70-37597

Compressible fluids flow with conductivity tensor in presence of thin wing under orthogonal fields, reducing integral equation to Fredholm equation

19 p3351 A70-37599

Magnetic field effect on hydromagnetic Goertler instability in boundary layer flow of conducting fluid over concave wall

19 p3481 A70-38352

Viscous incompressible electrically conducting fluid steady flow between parallel coaxial rotating disks with transverse magnetic field

19 p3481 A70-38446

Steady compressible supersonic planar flow of viscous heat conducting fluid under linearization freestream conditions, describing slip flow past finite flat plate

20 p3557 A70-39228

Electrically conducting gas flow past slender body of arbitrary cross section in presence of crossed magnetic field by MHD Stokes approximation

20 p3558 A70-39613

Plane parallel viscous conducting fluid flows stability in transverse magnetic field, considering small perturbation spectrum, Hartmann and Reynolds numbers

20 p3684 A70-40397

Elastoviscous incompressible electrically conducting oscillating free stream flow along infinite porous plate with suction in transverse magnetic field

20 p3685 A70-40508

Turbulent incompressible conducting fluid jets velocity and temperature characteristics in presence of longitudinal and transverse magnetic fields

21 p3860 A70-42226

Electrically conducting fluid hydromagnetic spin-up between infinite flat insulating plates in uniform magnetic field normal to boundaries

23 p4223 A70-43972

Gravity waves produced in liquid electric conductor by piston subjected to sinusoidal pulsation, calculating magnetic field effect on amplitude and phase velocity

23 p4425 A70-44208

Conducting viscoelastic fluid flow near harmonically oscillating nonconducting flat plate under uniform transverse magnetic field, considering stress-strain rate relationship

23 p4226 A70-44375

Viscous conducting liquid forced vortex motion, considering radial velocity distribution and rotation effect on free surface shape

24 p4383 A70-45140

Magnetized conducting sphere steady rotation in viscous conducting liquid, solving for fluid velocity and induced magnetic field

24 p4386 A70-45609

Conducting sphere MHD rotation in viscous conducting fluid under uniform magnetic field

24 p4387 A70-46028

CONDUCTING MEDIA

U CONDUCTORS

CONDUCTION

Local control loop model of multiphase rectifier used as power amplifier, considering extension to nonautonomous and discontinuous conduction systems

21 p3802 A70-42267

CONDUCTION BANDS

Indium arsenide crystals conduction band structure with various electron concentrations, determining electron mass dependence on concentration and temperature

01 p0154 A70-10096

Electron surface states bands in insulators induced by image potential, determining lower limits for liquid and solid gases

02 p0345 A70-12823

Negative resistance mechanism model with larger electron accumulation in conduction band than free holes

03 p0539 A70-13212

Piezoelectric scattering effects on electron temperature and mobility in IIB-VIA semiconductor compounds with nonparabolic conduction band

13 p2471 A70-29373

Light absorption coefficient of two band superconductor with nonmagnetic impurity, observing electron pairs removal from condensate and transition into excited states

13 p2472 A70-29723

Ovshinsky switching effect, considering electrothermal initiation and field dependent conductivity at elevated temperatures

14 p2626 A70-30336

Energy zone bending near surface of n-type semiconductor, discussing surface plasma level

18 p3298 A70-36619

Optical density of valence and conduction states by UV photoelectric spectroscopy, outlining experimental techniques and inelastic scattering effects

19 p3471 A70-37711

Fermi energy and bandtail parameters in heavily doped and degenerate n-type GaAs, calculating conduction band density of states by screened Coulomb potential

21 p3864 A70-42018

Direct gap conduction band and alloy composition monitoring InAlP, using electron microprobe cathodoluminescence and X ray emission

22 p4086 A70-43019

Conducting state propagation in p-n-p-n structure involving minority carrier diffusion between regions

23 p4232 A70-45068

CONDUCTION ELECTRONS

Laser emission photons scattering by semiconductor conduction electrons allowing for electron-phonon interaction

07 p1357 A70-19857

MOS field effect transistor, measuring electrons and holes thermal emission rates and activation energies at gold centers in Si

22 p3997 A70-43016

CONDUCTIVE HEAT TRANSFER

Three dimensional thermal conductivity problems solution applied to moving body, body of revolution and hollow cylinder

01 p0213 A70-10218

Flip chip and beam lead methods for microcircuit assembling, discussing heat removal using heat spreader and temperature cycling effects on tensile strength

01 p0050 A70-10330

Steady state heat conduction problems solved by finite element method, with examples involving internal heat generation and various boundary conditions

01 p0215 A70-10558

Length calculation method for nonadiabatic imaginary tip extension of heat exchanger fins, predicting heat conduction rate

01 p0215 A70-10842

Conductive heat transfer coefficients of densely packed electronic subassemblies

01 p0051 A70-10990

Discrete models formulated for thermomechanical behavior of materials with memory, obtaining equations of motion and heat conduction for finite elements of nonlinear continua

01 p0208 A70-11183

Integral theorems for wave-type heat conductivity equation

01 p0219 A70-11398

Radiative, conductive and convective combined heat transfer mechanism in nonisothermal atomic hydrogen plasma laminar flow

02 p0400 A70-12660

Boundary conditions of heat conduction in systems of vessels connected by rods with given heat capacity and unknown temperature

02 p0400 A70-12674

Stefan heat conduction problem with time dependent first kind boundary conditions approximate solution, taking into account unsteady temperature field of solidifying liquid

03 p0604 A70-13210

Discontinuous solutions of nonlinear boundary value problems of heat conduction for second order ordinary differential equations using modified difference method

03 p0604 A70-13390

Periodic process analysis method based on trigonometric Fourier series, noting applications to heat conduction problems

03 p0606 A70-13519

Unsteady heat conduction in hollow cylinder, using transfer functions to solve direct and inverse two dimensional problems

03 p0606 A70-13520

Solid propellants ignition response to radiative and conductive heat transfer

03 p0544 A70-13921

Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties

03 p0608 A70-14304

Unsteady heat conduction and thermal stresses in thin isotropic semibounded plates with butt joint possessing internal thermal resistance

04 p0766 A70-14479

Heat transport conduction mode and earth as heat sink in solar atmosphere, discussing mesopause coldest region, turbulence and solar plasma-earth electromagnetic interactions

[AAS PAPER 69-622]

04 p0677 A70-14644

Heat conduction equation solutions, comparing finite element and finite difference methods

[ASME PAPER 69-WA/HT-35]

04 p0781 A70-14805

Finite element method applied to heat conduction in solids with temperature dependent thermal conductivity, using nonlinear constitutive equation for heat flux

[ASME PAPER 69-WA/HT-34]

04 p0782 A70-14806

Rarefied gas heat conduction between concentric cylinders at small Knudsen number and temperature gradient, using integral equations obtained from Krook equation

[ASME PAPER 69-WA/HT-19]

04 p0783 A70-14816

Distribution functions for solving moment equations of Maxwell-Boltzmann equation used in studying heat conduction through rarefied gases within concentric cylinders and spheres

[ASME PAPER 69-WA/HT-17]

04 p0783 A70-14817

Finite element method applied to finite dimensional state variable formulation of transient heat conduction with surface diffusion of thin circular rotating disk

[ASME PAPER 69-DE-B]

04 p0785 A70-14874

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection

04 p0671 A70-15013

Steady circulation and temperature perturbations in stratified nonrotating ideal gas atmosphere with viscosity and heat conduction

04 p0681 A70-15517

Numerical solution of transient heat conduction with radiating surface, imposing Runge-Kutta type integration on surface

04 p0787 A70-15613

Thermoelasticity generalization from physically motivated modification of Fourier heat conduction law, postulating constitutive equations valid for finite deformations and temperature variations

05 p0929 A70-16062

Thermal resistance of multicontact heat conducting stainless steel plate stacks with different interface purities in vacuum

05 p0957 A70-16293

Unsteady heat conduction numerical approximation for infinite cylinder with variable heating and boundary conditions of third kind

05 p0936 A70-16294

One dimensional unsteady heat conduction with variable boundary conditions solved by difference-

differential method using rectangular and cylindrical coordinates

05 p0957 A70-16295

Magnetized solar wind steady state inviscid single fluid model developed using MHD, including heat equation with thermal conduction

05 p0902 A70-16445

Heat conduction in anisotropic materials to measure thermophysical parameters, using pulsed point or line heat source

05 p0957 A70-16457

Heat conduction equation containing diffusivity coefficient as Stefan type function

05 p0958 A70-16667

Unsteady inverse heat conduction of semibounded body solved by least squares method

06 p1178 A70-17856

Temperature distribution law for semiinfinite and infinite solid bodies under steady heat conduction in presence of concentrated heat source

06 p1178 A70-17872

Heat conduction transient field problems in two and three dimensional isoparametric finite element solutions using Galerkin method

06 p1178 A70-17938

Transient heat conduction in dual-layer insulated plate exposed to pulse heating, discussing temperature response

[AIAA PAPER 70-14]

06 p1180 A70-18120

Three dimensional ablation calculated for reentry sphere-cone taking into account shape changes and internal heat conduction

[AIAA PAPER 70-199]

06 p1181 A70-18150

Measurement error associated with heat conduction in temperature sensor, using mathematical model

06 p1070 A70-18843

Collisional skewing of electron distribution function associated with heat conduction in solar wind, exciting collisionless ion-acoustic, electrostatic ion cyclotron and magnetoacoustic waves

06 p1136 A70-18527

Rough metal surfaces thermal constriction resistance for total heat flow through microcontacts

07 p1418 A70-18648

Boundary value problems solutions estimated for heat conduction equation in unbounded domain, considering function satisfying heat induction equation

07 p1419 A70-18852

Integral method for time development of viscous, heat and mass conducting layer over leading edge of volatile drop instantaneously immersed in gas stream

07 p1358 A70-18916

Perturbation solution for fins taking into consideration interaction of conduction with radiation and convection

07 p1422 A70-19333

Radial heat conduction in infinite hollow cylinder with circular cross section and periodic heat transfer coefficient at inner and outer cylinder surfaces

07 p1423 A70-19816

Unsteady heat conduction in plate, solid or hollow infinite cylinder and sphere with internal heat source and radiative heat transfer on surface

07 p1423 A70-19818

Penetrative thermal convection stability for statically unstable layer surmounted by statically stable layer from numerical integration of linearized equations of motion and heat conduction

07 p1269 A70-19947

Finite element models for nonlinear problems analysis in coupled thermoelasticity dynamical theory, deriving heat conduction equations from energy balance considerations

07 p1417 A70-20363

Boundary value problem solution in study of axisymmetric viscous heat conducting gas flow past body of revolution

08 p1431 A70-20854

Difference schemes approximating quasi-linear heat conduction equation, demonstrating convergence

08 p1596 A70-20857

One dimensional difference scheme for gas dynamics with heat conduction

08 p1482 A70-20859

Oscillatory relaxation of binary system of heat conducting viscous gases composed of nonspherical molecules

08 p1547 A70-21085

Transient heat conduction and stationary temperature distribution calculation in curvilinear coordinates using finite element method

08 p1590 A70-21362

Thermal conductivity and diffusivity of two phase composites determined by iterative solution of heat conduction equation with space fluctuating properties

08 p1598 A70-21511

Retinal temperature increases produced by intense light absorption described by heat conduction equation

09 p1614 A70-22075

Transient heat conduction of thin circular disk with uninsulated surfaces rotating past stationary point source by finite element method

09 p1787 A70-22269

Lunar internal temperature approximation correcting solution of heat conduction equation for moon thermal histories

09 p1753 A70-22385

Axisymmetric or plane bodies temperature distribution from heat conduction analysis using computer program based on finite element method

09 p1788 A70-22581

Elastic solution and finite element method applied to heat conduction and thermal stress in temperature field determination

09 p1774 A70-22587

Temperature distribution in infinite and finite circular hollow cylinders, considering surface heat flux and linear heat transfer

09 p1788 A70-22595

Temperature distributions in multidimensional transient conduction heat transfer, using variational method and Laplace transformation

09 p1788 A70-22705

Cauchy problem solution for heat conduction equation stabilization, deriving necessary conditions

09 p1789 A70-23167

Weighted residual and Biot variational methods for solving one dimensional heat conduction problems

09 p1789 A70-23260

One dimensional numerical solution for steady state thermal behavior of trapezoidal profile annular fins transferring heat by conduction and radiation

[ASME PAPER 69-HT-6] 09 p1790 A70-23557

Conduction to isothermal insulated cylinder from seminfinit region

09 p1790 A70-23563

Time-temperature charts for one dimensional unsteady conduction with uniform internal heat generation

09 p1791 A70-23567

Temperature field and combined radiative-conductive heat flux in weakly absorbing cylindrical layer bounded by nonblack surfaces

10 p1966 A70-23866

Heat conduction analysis for plane body with boundary condition and time variable heat exchange coefficient, applying automatic control technique

10 p1966 A70-23869

Temperature field and heat conduction equation for two layer polymer cylinder multiply heated from within, considering material decomposition

10 p1966 A70-23870

Nonstationary thermoelasticity in half space with moving boundary condition described in Cartesian rectilinear coordinates allowing for time term in heat conduction equation

10 p1954 A70-24012

One dimensional Navier-Stokes equations solution for viscous heat conducting gas flow involving spherical sink for finite pressure at infinity

10 p1865 A70-24104

Thermal conductivity on coupled heat conducting rods calculated by implicit difference scheme on finite graphs

10 p1969 A70-25189

Radiative heat transfer due to radiation conductivity and transmission in low density glass fiber insulations by heat flowmeter for hot and cold surfaces

11 p2148 A70-25769

Spacecraft temperature prediction and heat conduction problems with nonlinear radiation boundary conditions by perturbation theory, applying to heat shield analysis

11 p2150 A70-26355

Heat conduction and viscosity effects on compressible fluids characteristics

11 p2037 A70-26399

Coordinate function selection for boundary value problems solution by Galerkin method demonstrated for heat conduction equation of anisotropic parallelepiped with internal source

12 p2271 A70-27291

Heat conduction for thermally insulated bilayer metal wall for time-variable heat transfer and ambient temperature, using Green function

12 p2330 A70-27292

Asymptotic properties of Cauchy problem solution for heat conduction equation

12 p2331 A70-27300

Contact and unsteady heat transfer through vacuum cavity applied to hollow cylinders, solving nonlinear integral equations by piecewise linear approximation

12 p2331 A70-27326

Steady state and transient heat transfer by radiation and conduction in absorbing medium bounded by infinite coaxial cylindrical surfaces

12 p2331 A70-27697

Transient heat transfer combining conduction and radiation in absorbing plane layer analyzed by differential approximation

12 p2332 A70-27801

Linearized Fredholm equation solution, describing temperature field for energy transport by radiation and heat conduction

13 p2521 A70-28860

Surface emissivity effects on combined conduction, convection and radiation heat transfer in nonisother-

mal hydrogen plasma, discussing optically thin and thick solutions

13 p2521 A70-29134

Boundary value problems of ordinary and generalized heat conduction equations using reflection method

13 p2521 A70-29311

Time variable dynamic medium nonlinear conductive heat transfer equation obtained by power series procedure

13 p2521 A70-29313

Steady state heat conduction in wedge shaped bodies with boundary conditions of third kind

13 p2522 A70-29515

Time dependent simultaneous solution for continuity, heat conduction and motion equations of system involving neutral, electron and ion gases

14 p2665 A70-30744

Boundary value problem of nonlinear one dimensional conduction in radiating heat shields, using perturbation and numerical methods

15 p2824 A70-31450

Axial wall conduction effects on steady state laminar flow heat transfer

15 p2825 A70-31815

Steady state temperature dependence of heat conduction coefficient using arc approximation

15 p2826 A70-32106

Heat conductivity of Xe-He binary gas mixtures, allowing for molecular transfer and polarity effects

15 p2827 A70-32107

Boundary value problem in linear elastodynamics, investigating Ignaczak type theorems for microstructure effects in transient heat conduction problems

15 p2822 A70-32343

Nonlinear two dimensional free boundary problem of axisymmetric heat conduction in tubes with internal surface solidification by variational technique

16 p2996 A70-33002

Difference schemes approximating boundary value problem for heat conductivity and oscillation equations, considering brute force method stability

16 p2951 A70-33245

Radiation and conduction of open joint multilayer insulation systems, analyzing dependence on contact area by numerical methods

[AIAA PAPER 70-848] 16 p2939 A70-33915

Nonabsorbing gas effect in radiation-conduction heat transfer interaction, predicting magnitude and pressure trends by wideband gas model

[AIAA PAPER 70-836] 16 p3001 A70-33931

Correction techniques for thermal network lumped parameter inaccuracies with conduction and radiation coupling, considering temperature control system

[AIAA PAPER 70-821] 16 p3002 A70-33943

Surface temperature or heat flux density estimation for nonlinear inverse heat conduction problem involving temperature dependent thermal properties

16 p3002 A70-34195

Thermomagnetoelasticity wave equations of heat conduction for thermal and coupled perturbations propagating in isotropic medium at finite velocities

16 p2953 A70-34326

Onsager reciprocal relations experimental validity in irreversible processes application to metals, electrokinetics, isothermal diffusion, heat conduction, chemical reactions, etc

17 p3197 A70-35538

Free convection in compressible viscous heat conducting fluid, determining parameters leading to onset

17 p3198 A70-35697

Viscous heat-conducting one dimensional piston driven gas flow, assuming sharp shock discontinuity

17 p3075 A70-35890

Stationary heat conduction model of two cylinders abutting at ends with internal nonuniform temperature distribution

18 p3345 A70-36128

Elastic continuum conducting heat under general loads, investigating stability thermodynamics- Liapunov criterion relations

18 p3337 A70-36336

Unsteady temperature fields in heat conduction problems associated with high temperature effects on abutted cylinders

18 p3348 A70-36572

Heat conduction three dimensional problem in radiation heated thin crystalline plates with temperature dependent thermophysical characteristics

18 p3348 A70-36644

Book on heat transfer covering conduction, convection, thermal radiation and heat exchange equipment

19 p3550 A70-37231

Book on variational principles in heat transfer covering conduction, convection, dissipation, thermal potential and force boundary layer problem and Lagrangian analysis

20 p3735 A70-39224

Small viscosity and heat conductivity in solutions to critical layer in stratified shear flow

20 p3608 A70-39447

Uniqueness theorem for first boundary value problem of heat conduction equation with discontinuous coefficient

20 p3737 A70-39710

Stellar wind theory and related steady radial flows, discussing gravitating point mass, heat conduction, shocks, viscosity, outflows and inflows

20 p3706 A70-39928

Book on nonuniform gas theory covering viscosity, thermal conduction, diffusion, Maxwell-Boltzmann equations, density, quantum theory, transport phenomena, mixtures, electric fields, etc

20 p3673 A70-40135

Heat conduction problems solved allowing for radiation on electrical models, using nonlinear resistance and composite circuit methods

20 p3738 A70-40178

Eroding surface transient heat conduction problem, considering temperature dependent surface properties, ablation, convective heating, etc

20 p3738 A70-40279

Steady one dimensional temperature field of cylindrical shell spacecraft, allowing for heat conduction and convective and radiative heat transfer within shell

21 p3942 A70-40841

Heat conduction errors in immersion thermocouples and resistance temperature sensors, using mathematical model

21 p3823 A70-40856

Contact and unsteady heat transfer through vacuum cavity applied to hollow cylinders, solving nonlinear integral equations by piecewise linear approximation

21 p3952 A70-42067

Nonlinear one dimensional conduction in radiating heat shields, solving two point boundary value problem by asymptotic and numerical solutions

[ASME PAPER 70-HT-E] 22 p4121 A70-42422

Variational formulation for steady and transient heat conduction with variable thermal conductivity, applying to cylindrical element

22 p4123 A70-42546

Acoustic wave propagation in continuum of inviscid compressible heat conducting fluid, determining stability criteria

22 p4073 A70-42571

Heat conduction into semiinfinite homogeneous solid with thermal conductivity dependence on temperature, noting temperature profile asymptotic behavior for similarity solution

22 p4123 A70-42641

Heat exchange coefficients on side surfaces of constant thickness gas turbine disk, using temperature distribution method and integral transformations

22 p4125 A70-43367

Nonlinear unsteady thermal conductivity problems linearization based on temperature substitution by integral analogs

22 p4125 A70-43370

Cylindrically symmetric transient heat conduction in biological systems for inhomogeneous media and internal sources, using finite difference method

23 p4150 A70-43900

Thermal defocusing and deflection of light beam by lateral wind effect in absorbing media

23 p4200 A70-43950

Thin plates two dimensional dynamic thermoelastic problem, determining hyperbolic type heat conduction for temperature field

23 p4265 A70-43985

Heat conduction of doubly connected square and triangular isotropic plates with hole, applying small parameter method

23 p4276 A70-44217

Iterative method for boundary value problems in mathematical physics, showing convergence by heat conduction equation solutions

23 p4276 A70-44218

Heat conductivity problem of body with variable density and specific thermal conductivity reduced to differential equation via power series

23 p4277 A70-44340

Rarefied gas heat conduction between concentric cylinders in slip regime, obtaining perturbed temperature and density variations

23 p4284 A70-44985

Heat conduction problems numerical solution, using hypermatrices

24 p4428 A70-45127

Contact region structure with viscosity, conduction and radiative transfer effects applied to plane shock wave reflection from heat conducting wall

24 p4326 A70-46001

Viscous heat conducting compressible fluid flow past slender axisymmetric body, presenting Navier-Stokes hypersonic strong interaction theory

24 p4289 A70-46020

One-phase Stefan problem of heat conduction with melting, proving existence and uniqueness theorems for solid and free boundary temperature determination

24 p4429 A70-46036

CONDUCTIVITY

Acoustic conductivity of burning solid propellant surface, discussing critical conditions and variable surface measurement methods

13 p2522 A70-29421

MHD and thermal boundary layer, considering difference scheme for conducting medium flow past body in crossed electric and magnetic fields

18 p3293 A70-36116

CONDUCTORS

NT AIRCRAFT ANTENNAS
 NT ANTENNAS
 NT CASSEGRAIN ANTENNAS
 NT DIPOLE ANTENNAS
 NT DIRECTIONAL ANTENNAS
 NT ELECTRIC CONDUCTORS
 NT ELECTRIC WIRE
 NT ELECTROLYTES
 NT EXPLODING WIRES
 NT FLAT CONDUCTORS
 NT HELICAL ANTENNAS
 NT HORN ANTENNAS
 NT ION EXCHANGE MEMBRANE ELECTROLYTES
 NT LENS ANTENNAS
 NT LOG PERIODIC ANTENNAS
 NT LOOP ANTENNAS
 NT MICROWAVE ANTENNAS
 NT MISSILE ANTENNAS
 NT MOLTEN SALT ELECTROLYTES
 NT MONOPOLE ANTENNAS
 NT MONOPULSE ANTENNAS
 NT MULTIPLE BEAM INTERVAL SCANNERS
 NT OMNIDIRECTIONAL ANTENNAS
 NT PARABOLIC ANTENNAS
 NT PHOTOCONDUCTORS
 NT RADAR ANTENNAS
 NT RADIO ANTENNAS
 NT RHOMBIC ANTENNAS
 NT SLOT ANTENNAS
 NT SPIRAL ANTENNAS
 NT STEERABLE ANTENNAS
 NT SUPERCONDUCTORS
 NT THERMAL CONDUCTORS
 NT TWO REFLECTOR ANTENNAS
 NT WAVEGUIDE ANTENNAS
 NT YAGI ANTENNAS

Eddy currents magnetic field structure over surface defects in conducting objects, noting NDT applications

13 p2404 A70-28661

Plane electromagnetic wave in moving conductive medium, analyzing without approximation of velocity limitation

13 p2462 A70-29104

Concentrated pulsed electromagnetic fields penetration into conductor, assuming magnetic field along metal surface

22 p4041 A70-43621

CONES

NT ABLATIVE NOSE CONES
 NT CIRCULAR CONES
 NT CONICAL BODIES
 NT NOSE CONES
 NT ROCKET NOSE CONES
 NT SLENDER CONES

Boundary layer around blunted cone solved numerically by finite difference method

01 p0001 A70-10297

Monograph on weak interactions on cones in supersonic and hypersonic flows, discussing flow divergence, measurement errors and data reliability

04 p0615 A70-15141

Laminar hypersonic blunt cone wakes, discussing flow fields and axial static pressure distributions

06 p0968 A70-17553

Higher order boundary layer effects on zero-lift drag of sphere-cones, investigating transverse curvature, shock vorticity, displacement, slip and temperature jump

[AIAA PAPER 70-185] 06 p1041 A70-18173

Duality theorem for complex quadratic programming over polyhedral cones

07 p1238 A70-19356

Passive radiant cooler design involving patch cone radiative coupling calculation based on specular image technique

07 p1425 A70-20091

Three dimensional flow field codes for sphere-cones at nonzero angles of attack, comparing numerical and experimental results

09 p1606 A70-23254

Cone roll dynamics-ablation patterns coupling in hypersonic wind tunnels

[AIAA PAPER 70-562] 13 p2340 A70-29025

Internal shock waves in axisymmetric flowfield of perfect gas past blunted cone, noting roles of Mach number and cone half angle

15 p2672 A70-31592

Axisymmetric mixed boundary problem for elastic infinite cone, obtaining solution by assuming zero shearing stresses

17 p3192 A70-35698

Turbulent boundary layer on cone in supersonic flow in presence of inflowing foreign substance, considering local surface friction coefficient

20 p3559 A70-39814

Internal shock waves in axisymmetric flow field of perfect gas past blunted cone, noting poles of Mach number and cone half angle

23 p4133 A70-44276

CONFERENCES

Nondestructive evaluation of components and materials in aerospace, weapons systems and nuclear applications - Conference, San Antonio, April 1969

01 p0095 A70-10001

Interfaces in composites - ASTM Conference, San Francisco, June 1968

01 p0126 A70-10476

Biomechanics - Conference, Rock Island, Illinois, April 1967

01 p0033 A70-10494

GaAs - Conference, Dallas, October 1968

01 p0157 A70-10515

Solar-terrestrial physics, Terrestrial aspects - IQSY and COSPAR Conference, London, July 1967

01 p0071 A70-10577

Environmental effects on aircraft and propulsion systems - Conference, Bordentown, N.J., October 1969

01 p0162 A70-10678

Reinforced thermoplastics - Conference, Hartford, October 1969

01 p0128 A70-10769

Photooptical techniques in simulators - Conference, South Fallsburg, N.Y., April 1969

01 p0057 A70-10807

Occupational and medicative hazards in ophthalmology - Conference, Amsterdam, June 1968

01 p0022 A70-10855

Myocardial infarct and other psychosomatic disturbances - Conference, Wiesbaden, West Germany, August 1967, Part 3

01 p0023 A70-10864

Ultrasonics for industry - Conference, London, October 1969

01 p0089 A70-10877

Developments in mechanics - Conference, Ames, Iowa, August 1969

01 p0203 A70-11126

Information display - Conference, Arlington, Va., May 1969

01 p0048 A70-11276

Germ-free biology experimental and clinical aspects - Conference, Buffalo, June 1968

01 p0027 A70-11309

Low luminosity stars - Conference, Charlottesville, March 1968

01 p0187 A70-11330

Automated inspection for defects and dimensions - Conference, Eastbourne, England, May 1969

01 p0105 A70-11394

Jovian planets atmosphere - Conference, Tucson, April-May 1969

02 p0364 A70-11801

Civil aviation electronics - Conference, London, September 1969, Part 1, Electronics in flight control

02 p0329 A70-11831

Aerospace structures design - Conference, Seattle, Washington, August 1969

02 p0385 A70-11931

Civil aviation electronics - Conferences, London, September 1969, Part 3, Air traffic control

02 p0330 A70-11956

Civil aviation electronics - Conference, London, September 1969, Part 2

02 p0333 A70-11979

Combustion - Conference, Poitiers, France, July 1968

02 p0392 A70-12001

Electronic components - Conference, Washington, D.C., April-May 1969

02 p0267 A70-12052

Rocky Mountain Bioengineering - Conference, Laramie, Wyoming, May 1969

02 p0242 A70-12093

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 1, Man-computer interaction

02 p0264 A70-12126

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 2, Transport systems and vehicle control

02 p0334 A70-12130

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 3, Decision making and mental work load

02 p0244 A70-12137

Adaptive man machine systems, display design - IEEE/ERS Conference, Cambridge, England September 1969, Volume 4

02 p0245 A70-12147

Resources roundup - IEEE Conference, Phoenix, April 1969

02 p0257 A70-12177

Turbulent boundary layers computations - Conference, Stanford University, August 1968, Volume 2

02 p0280 A70-12271

Turbulent boundary layers computation - Conference, Stanford University, California August 1968, Volume 1, Methods, predictions, evaluation and flow structure

02 p0280 A70-12326

CONFERENCES

Application of atmospheric studies to satellite transmissions - Conference, Bedford, Mass., September 1969

02 p0259 A70-12564

Ballistocardiography and cardiovascular performance - Conference, Atlantic City, May 1968

02 p0240 A70-12675

Two phase flow instrumentation - Conference, Minneapolis, August 1969

02 p0304 A70-12833

Service life analysis at randomly varying load - Conference, Muelheim-Ruhr, Germany, April 1969 [DFVLR-SONDDR-4]

02 p0391 A70-12851

Cosmic ray physics - Conference, Tashkent, Uzbek SSR, October 1968

03 p0553 A70-13028

Atom ordering and effects on alloy properties - Conference, Kiev, Ukrainian SSR, 1969

03 p0505 A70-13101

Artificial satellite rotation study on basis of SPIN program photometric data - Conference, Kishinev, Moldavian SSR, September 1968

03 p0443 A70-13176

Geodetic treatment of satellite observation - Conference, Tashkent, Uzbek SSR, November 1968

03 p0444 A70-13182

Nonperiodic phenomena in variable stars - Conference, Budapest, September 1968

03 p0565 A70-13312

Photo-optical instrumentation - Conference, Washington, D.C., August 1968, Volume 1

03 p0487 A70-13651

Earth exploration and service by satellites - Conference, Rome, March 1969

03 p0572 A70-13826

Electroexplosive devices - Conference, San Francisco, July 1969

03 p0544 A70-14101

Applied mechanics - Conference, Stanford, August 1968

03 p0596 A70-14226

Nutrition and atherosclerosis - Conference, Bad Ragaz, Switzerland, October 1968

03 p0430 A70-14276

Theoretical and applied mechanics - Conference, Coimbatore, India, December 1966

03 p0601 A70-14326

Optimization problems computing methods - Conference, San Remo, Italy, September 1968

03 p0461 A70-14338

Phenomena in ionized gases - Conference, Bucharest, September 1969

03 p0534 A70-14359

Astronomy - Conference, Hobart, Australia, May 1969

04 p0746 A70-14506

Applied MHD and high temperature gas dynamics - Conference, Prague, May 1968

04 p0724 A70-14526

Imagery in medicine - Conference, Ann Arbor, May 1969

04 p0640 A70-14556

Nuclear and space radiation effects - IEEE Conference, Pennsylvania State University, July 1969

04 p0656 A70-14726

Numerical methods of solving problems in mechanics of continuous media - Conference, Kiev, Ukrainian SSR, June-July 1966

04 p0669 A70-14956

European space research - Conference, Dusseldorf, West Germany, December 1968

04 p0664 A70-15301

Acute myocardial infarction - Conference, Phoenix, March 1969

04 p0633 A70-15455

Time determination and georotation - Conference, Riga, Latvian SSR, June 1965

04 p0755 A70-15476

Electrical insulation - Conference, Boston, September 1969

05 p0869 A70-16032

Displays for command and control centers - NATO/AGARD Conference, Munich, November 1966

05 p0826 A70-16176

Computers - IEEE Conference, Minneapolis, June 1969

05 p0817 A70-16413

Mechanical engineering and mechanics-Conference, Haifa, June-July 1969

05 p0939 A70-16508

Differential equations and applications - Conference, Bratislava, Czechoslovakia, September 1966

05 p0876 A70-16560

Geoscience electronics - IEEE Conference, Washington, D.C., April 1969

05 p0849 A70-16683

Contamination control - Conference, New York, May 1969

05 p0798 A70-16701

Aerodynamic noise - Conference, University of Toronto, May 1968

05 p0795 A70-16776

Pressure vessel technology - Conference, Delft, Netherlands, September-October 1969
05 p0942 A70-16801

Pressure vessel technology - Conference, Delft, Netherlands, September-October 1969, Part 1, Design and analysis
05 p0943 A70-16808

Magnetics - IEEE Conference, Amsterdam, April 1969
05 p0893 A70-16995

Thermal stability of materials and structural elements - Conference, Kiev, Ukrainian SSR, December 1967
05 p0947 A70-17026

Aerodynamics - Conference, Berlin, October 1968
06 p0961 A70-17226

Electronic circuit packaging - IEEE Conference, San Francisco, August 1960, Part 7
06 p1016 A70-17334

Communications and displays - Conference, North Hollywood, August 1969
06 p1005 A70-17342

Instruments and systems - Conference, San Francisco, August 1969
06 p1017 A70-17351

Components and microelectronics - Conference, San Francisco, August 1969, Volume 13, Part 5
06 p1018 A70-17355

Plasma waves in space and laboratory - NATO Conference, Norway, April 1968
06 p1114 A70-17359

Fatigue at high temperatures - ASTM Conference, San Francisco, June 1968
06 p1086 A70-17451

Flight safety, survival and personal equipment - Conference, Las Vegas, October 1969, Volume 1
06 p1001 A70-17702

Rarefied gas dynamics - Conference, Cambridge, Mass., July 1968, Volume 2
06 p0976 A70-18251

Rarefied gas dynamics - Conference, Cambridge, Mass., July 1968, Volume 1
06 p1044 A70-18309

Instrumentation - ISA Conference, Houston, October 1969, Part 1
06 p1067 A70-18426

Instrumentation - ISA Conference, Houston, October 1969, Part 2
06 p1068 A70-18430

Thunderstorms and thunderstorm phenomena - ASM Conference, Chicago, April 1969
06 p1099 A70-18567

Instrumentation - ISA Conference, Houston, October 1969, Part 3
06 p1072 A70-18590

Instrumentation - ISA Conference, Houston, October 1969, Part 4
06 p1073 A70-18595

Gravitational effects on organisms - Conference, Warsaw, March 1969
07 p1200 A70-18784

Flight safety, survival and personal equipment - Conference, Las Vegas, October 1969, Volume 2
07 p1217 A70-19003

Multivariate analysis - Conference, Dayton, June 1968
07 p1323 A70-19026

Maritime and aeronautics technology - Conference, Paris, May 1969
07 p1192 A70-19126

Oblique ionospheric radio wave propagation at frequencies near lowest usable HF - NATO/AGARD Conference, Leicester, England, July 1966
07 p1227 A70-19151

LF waves and irregularities in ionosphere - Conference, Frascati, Italy, September 1968
07 p1263 A70-19186

Computing methods in optimization problems - Conference, San Remo, September 1968, Volume 2
07 p1324 A70-19266

Arbeitsgemeinschaft Verstärkte Kunststoffe - Conference, Freudenstadt, West Germany, September-October 1969
07 p1316 A70-19753

Photogrammetry - Conference, Karlsruhe, West Germany, September 1969
07 p1284 A70-19776

Numerical calculation and applied mathematics - Conference, Tours, France, July 1965
07 p1326 A70-19781

High temperature technology - Conference, Pacific Grove, California, September 1967
07 p1311 A70-19876

Propellants manufacture, hazards and testing - Conference, Miami Beach, April 1967
07 p1359 A70-19905

High and medium energy molecular beams - Conference, Cannes, July 1969
07 p1339 A70-20101

Cosmic ray physics - Conference, Tashkent, Uzbek SSR, October 1968
07 p1370 A70-20326

Lunar science - NASA Conference, Houston, January 1970, covering moon rock composition, magnetic, electrical and physical properties, etc
08 p1565 A70-20587

Automatic support systems for advanced maintainability - IEEE Conference, St. Louis, November 1969
08 p1468 A70-20651

Power sources - U.S. Army Conference, Atlantic City, May 1969
08 p1438 A70-20701

Electronics - Conference, Chicago, December 1969
08 p1457 A70-20776

Simulation applications - Conference, Los Angeles, December 1969
08 p1466 A70-20926

High speed testing - Conference, Boston, March 1969, Volume 7, Rheology of solids
08 p1526 A70-21326

Display media - Conference, Cambridge, Mass., September 1967
08 p1498 A70-21676

Experimental test pilots - Conference, Beverly Hills, September 1969
08 p1436 A70-21726

Composite materials testing and design - ASTM Conference, New Orleans, February 1969
08 p1528 A70-21876

Supersonic turbojet propulsion systems and components - NATO/AGARD Conference, Varenna, Italy, May 1967
08 p1559 A70-21926

Supernovae and remnants - Conference, New York, November 1967
09 p1748 A70-21987

Photo-optical instrumentation applications and theory - Conference, San Francisco, August 1969
09 p1672 A70-22029

Spectra of meteorological variables - Conference, Stockholm, June 1969
09 p1713 A70-22351

Phase diagrams of metal systems - U.S.S.R. Conference, Moscow, June 1967
09 p1702 A70-22559

Quality control - Conference, Tokyo, October 1969
09 p1690 A70-22568

Instrumentation and measurement - IEEE Conference, Ottawa, May 1969
09 p1647 A70-22713

Navigational techniques - NATO/AGARD Conference, Milan, September 1967
09 p1721 A70-23026

Instrumentation - ISA conference, New York, October 1968
09 p1613 A70-23683

Thermodynamics and fluid mechanics - Conference, Glasgow, March 1970
09 p1607 A70-23733

Photo-optical instrumentation - Conference, San Francisco, August 1969
09 p1684 A70-23751

Advanced fluid dynamics - Conference, Tarda, Poland, September 1967
10 p1863 A70-24101

Digital satellite communication - Conference, London, November 1969
10 p1833 A70-24326

Fuel cells - Conference, Brussels, June 1969
10 p1828 A70-24451

Earth Observation Satellites - BIS-NATO Conference, Cambridge, England, July 1969
10 p1950 A70-24635

Attention and reaction time - Conference, Eindhoven, Netherlands, July-August 1968
10 p1825 A70-24710

Photogrammetry - Conference, Washington, D.C., March 1970
10 p1877 A70-24726

Applied mechanics - Conference, Bucharest, June 1969
10 p1802 A70-24776

Applied mechanics - Conference, Bucharest, June 1969
10 p1870 A70-24794

Structural dynamics - Conference, Loughborough, Leics., England, March 1970, Volume 1
10 p1960 A70-25051

Structural dynamics - Conference, Loughborough, Leics., England, March 1970, Volume 2

12 p2214 A70-26901

Remote environmental sensing - Conference, Ann Arbor, October 1969, Volume 1
12 p2218 A70-26929

Aviation psychological research - Conference, Zurich, September 1969
12 p2175 A70-27026

Growth points of physics - Conference, Florence, April 1969
12 p2297 A70-27053

Materials and structural dynamics - AIAA-ASME Conference, Denver, April 1970
12 p2315 A70-27101

Structures, structural mechanics and materials - AIAA-ASME Conference, Denver, April 1970
12 p2317 A70-27126

Magnetism and magnetic materials - Conference, Philadelphia, November 1969
12 p2283 A70-27238

Vacuum science and technology - Conference, Seattle, October 1969
12 p2284 A70-27251

Nuclear science and nuclear power systems engineering - IEEE Conference, San Francisco, October 1969
12 p2232 A70-27401

Systems theory - Conference, Gainesville, Florida, March 1970
12 p2203 A70-27408

Astronomy - Conference, Mannheim, Germany, September 1969
12 p2300 A70-27576

Manned laboratories in space - Conference, New York, October 1968
12 p2313 A70-27741

Fuel cell systems - ACS Conference, Chicago, September 1967, Part II
12 p2165 A70-27757

Quiescent plasma physics - Conference, Paris, September 1969, Part 1
12 p2279 A70-27776

Physics of quiescent plasmas - Conference, Paris, September 1969, Part 2
12 p2279 A70-27782

Physics of quiescent plasmas - Conference, Paris, September 1969, Part 3
12 p2280 A70-27790

Stars of galactic nebulae - Conference, Biurakan, Armenian SSR, September 1968
12 p2304 A70-27851

Electronics and Aerospace Systems - IEEE Conference, Washington, D.C., October 1969
12 p2185 A70-27901

Automatic image interpretation and classification - Conference, Pisa-Tirrenia, Italy, August-September 1968 12 p2193 A70-28101

Electromagnetic compatibility - IEEE Conference, Atlanta, October 1969 12 p2200 A70-28126

Plasticity and superplasticity exploitation - Conference, Eastbourne, Sussex, England October 1969 12 p2327 A70-28143

Nonlinear effects in plasmas - Conference, Orsay, Essonne, France, September 1966 13 p2456 A70-28551

Solid propellant combustion - Conference, Novosibirsk, November 1965 13 p2519 A70-28576

Fluid sealing - ASLE-ASME Conference, Philadelphia, May 1969 13 p2416 A70-28609

Atmospheric water effects on electromagnetic wave propagation - NATO Conference, University of Western Ontario, August-September 1969 13 p2393 A70-28781

Engineering properties and structure of plastics - Conference, New York, May 1970 13 p2438 A70-29251

System reliability and effectiveness - Conference, Beverly Hills, February 1969 13 p2524 A70-29564

Automatic test systems - Conference, Birmingham, England, April 1970 13 p2421 A70-29676

Plasma waves in space and laboratory - NATO Conference, Roros, Norway, April 1968 13 p2466 A70-29901

Weak magnetic fields in geo- and space physics - Conference, Paris, May 1969 13 p2413 A70-30026

Particles and fields in magnetosphere - Conference, Santa Barbara, August 1969 13 p2479 A70-30058

Air traffic, navigation and community - Conference, London, May 1970 14 p2611 A70-30101

Applied sciences research and utilization of lunar resources - Conference, New York, October 1968 14 p2633 A70-30192

Heat transfer and fluid mechanics - Conference, Stanford, California, June 1970 14 p2662 A70-30251

Medical electronics and biological engineering - Conference, Nancy, France, June-July 1969 14 p2540 A70-30376

Space navigation theory and practice - Conference, Ames Research Center, Moffett Field, California, February 1970 14 p2612 A70-30451

Aerospace meteorology - AMS-AIAA Conference, Las Vegas, May 1970 14 p2604 A70-30551

Otoneurology - Conference, Basel, 1969 14 p2538 A70-30908

Economic factors in aviation - RAS Conference, London, May 1970 14 p2668 A70-30935

Scintillation and semiconductor counters - IEEE Conference, Washington, D.C., March 1970 14 p2586 A70-31001

Planetary atmospheres and surfaces - Conference, Woods Hole, Mass., August 1969 14 p2643 A70-31051

Quality control - ASQC Conference, Pittsburgh, May 1970 14 p2591 A70-31101

Finite element methods application in civil engineering - Conference, Vanderbilt University, November 1969 14 p2658 A70-31126

Flight safety - Conference, Montreux, Switzerland, October 1969 15 p2674 A70-32206

Impact testing of metals - ASTM Conference, Atlantic City, June 1969 15 p2758 A70-32232

Space propulsion evolution in 1970s - Conference, Rome, March 1970 15 p2788 A70-32251

Solar energy - Conference, Athens, September 1969 15 p2677 A70-32418

IEEE Conference, Dallas, April 1970 15 p2701 A70-32551

Reliability - IEEE Conference, Los Angeles, February 1970 15 p2745 A70-32626

Interactions of electrons, phonons and magnons with crystalline surfaces - Conference, University of Lille, France, September 1969 15 p2785 A70-32763

Laser applications in geosciences - Conference, Huntington Beach, California, June-July 1969 16 p2925 A70-33013

Physical principles of biological membranes - Conference, University of Miami, December 1968 16 p2847 A70-33026

Circuits and systems - Conference, Pacific Grove, California, December 1969 16 p2881 A70-33031

Electro-optical systems design - Conference, New York, September 1969 16 p2901 A70-33126

Automatic control - Conference, Atlanta, June 1970 16 p2883 A70-33301

Plastics - Conference, Washington, D.C., February 1970 16 p2934 A70-33351

Microwaves - IEE Conference, London, September 1969 16 p2873 A70-33387

Aerospace electronics - IEEE Conference, Dayton, May 1970 16 p2908 A70-33426

Technology - Conference, Cocoa Beach, Florida, April 1970, Volume 1 16 p2975 A70-33701

Computers - AFIPS Conference, Atlantic City, May 1970 16 p2870 A70-33730

Mechanics - Conference, Bucharest, June 1969 16 p2893 A70-33740

Technology - Conference, Cocoa Beach, Florida, April 1970, Supplement 16 p2982 A70-33801

Sliding electrical contacts in vacuum and space - Conference, Virginia Polytechnic Institute, September-October 1969 16 p2919 A70-33805

Flight safety - Conference, Washington, D.C., May 1969 16 p2841 A70-33813

Electronic packaging and production - Conference, Brighton, England, October 1969 16 p2878 A70-33955

Corrosion by liquid metals - AIME Conference, Philadelphia, October 1969 16 p2932 A70-34201

Linear, nonlinear and random vibrations - Conference, Poznan, Poland, April 1968 16 p2994 A70-34276

Titanium science, technology and applications - Conference, London, May 1968 17 p3109 A70-34351

Optimization - Conference, Toronto, June 1968 17 p3181 A70-34542

Materials research - Conference, Tokyo, September 1969 17 p3123 A70-34651

Control theory and calculus of variations - Conference, University of California, Los Angeles, July 1968 17 p3129 A70-34866

UV stellar spectra and related ground based observations - Conference, Lunteren, Netherlands, June 1969 17 p3158 A70-34876

Engineering uses of holography - Conference, University of Strathclyde, Glasgow, September 1968 17 p3083 A70-35001

Laser measurements - Conference, Warsaw, September 1968 17 p3103 A70-35080

Crab Nebula - Conference, Flagstaff, Arizona, June 1969 17 p3163 A70-35112

Environmental challenge of 1970s - Conference, Boston, April 1970 17 p3058 A70-35151

Space technology and science - Conference, Tokyo, August 1969 17 p3164 A70-35201

Aerospace Medical Association Conference, St. Louis, April 1970 17 p3026 A70-35326

Normal stellar atmospheres - Conference, Cambridge, Mass., April 1968 17 p3168 A70-35379

Aerospace industry instrumentation - Conference, Las Vegas, May 1969, Volume 15 17 p3091 A70-35476

Remote sensing in ecology - Conference, Madison, Wisconsin, June 1968 17 p3078 A70-35611

Outer space law - Conference, Mar del Plata, Argentina, October 1969 17 p3200 A70-35776

Air transportation growth with regularity and safety - Conference, London, November 1969 17 p3021 A70-35851

Gas dynamics of explosions and reacting systems - Conference, Novosibirsk, U.S.S.R., August 1969 17 p3074 A70-35882

Bird hazards to aircraft - Conference, Queens University, Canada, September 1969 18 p3210 A70-35976

Applied mathematics and mechanics - Conference, Aachen, Germany, April 1969 18 p3280 A70-36351

Air traffic - Conference, Versailles, June 1970 18 p3288 A70-36389

Air traffic control - Conference, Versailles, June 1970 18 p3289 A70-36396

Thermodynamics - Conference, University of Pittsburgh, April 1969 18 p3347 A70-36551

Semiconductor lasers - IEEE Conference, Mexico City, December 1969 18 p3267 A70-36726

Electronic packaging - IEEE Conference, Cambridge, Massachusetts, June 1970 18 p3232 A70-36758

Milky Way spiral structure - Conference, Basel, August-September 1969 18 p3324 A70-37151

Classical and relativistic MHD - Conference, Lille, France, June 1969 19 p3476 A70-37576

Ferrite single crystals physical properties - Conference, Krasnoyarsk, U.S.S.R., June-July 1969 19 p3484 A70-37621

Ferrite single crystals physical properties - Conference, Krasnoyarsk, U.S.S.R., June-July 1969 19 p3485 A70-37626

Engineering science - Conference, Princeton University, November 1968 19 p3537 A70-37782

Engineering for 1970s - IEEE Conference, Huntsville, Alabama, November 1969 19 p3392 A70-37842

Instrumentation in aerospace industry - Conference, Seattle, May 1970 19 p3423 A70-37873

Engineering science - Conference, Princeton University, November 1968, Part I 19 p3539 A70-37940

Cosmic rays - Conference, Budapest, August-September 1969, Volume 1, Origin and galactic phenomena, covering supernovae, ray spectra, pulsar gamma rays, etc 19 p3497 A70-38076

Air traffic control - Conference, St. Louis, April 1970 19 p3464 A70-38226

Space simulation for satellites and space probes - Conference, Aachen, Germany, March 1970 19 p3397 A70-38276

Space simulation for satellites and space probes - Conference, Aachen, Germany, March 1970 19 p3398 A70-38285

Attention and performance - Conference, Soesterberg, Netherlands, August 1969 19 p3361 A70-38310

Theoretical and applied mechanics - Conference, Tulane University, February-March 1968 19 p3543 A70-38326

Aerospace instrumentation - Conference, Cranfield Institute of Technology, England, March 1970 19 p3428 A70-38514

Reliability - ASQC Conference, Los Angeles, May 1970 19 p3438 A70-38593

Air traffic control - Conference, Stockholm, March 1969 19 p3466 A70-38629

Reliability and maintainability - Conference, Detroit, July 1970, Volume 9, Assurance technology spinoffs 19 p3440 A70-38815

Solar eclipses and ionosphere - NATO Conference, Lagonissi, Greece, May-June 1969 19 p3417 A70-38901

Aerospace methods for revealing and evaluating earth resources - Conference, Princeton University, September 1969 20 p3615 A70-39051

Physical geodesy - Conference, Prague, September 1969 20 p3617 A70-39068

Carbon composite technology - Conference, University of New Mexico, January 1970 20 p3652 A70-39201

Pathophysiology of congenital heart disease - Conference, University of California, Los Angeles, July 1967 20 p3570 A70-39361

Invariant automatic control systems - Conference, Kiev, May-June 1966, Volume 2 20 p3601 A70-39826

Statistical problems in technical automation - Conference, Moscow, February 1967 20 p3592 A70-39901

Materials technology - Conference, Mexico City, August 1970 20 p3649 A70-39939

Magnetohydrodynamics - MIT Conference, Cambridge, Mass., March 1969 20 p3679 A70-39982

Magnetohydrodynamics - JPL Conference, Padasena, March 1970 20 p3565 A70-40001

Mechanics of composite materials - Conference, Philadelphia, May 1967 20 p3728 A70-40026

Atmospheric studies application to satellite transmissions t USAF Conference, Boston, September 1969 20 p3589 A70-40476

Nonsolar X and gamma ray astronomy - Conference, Rome, May 1969 21 p3870 A70-40651

Test measurement instruments - Conference, Houston, October 1969 21 p3823 A70-40855

Space technology and heat transfer - ASME Conference, Los Angeles, June 1970, Part 1 21 p3927 A70-40976

Space systems and thermal technology - ASME Conference, Los Angeles, June 1970, Part 2 21 p3942 A70-41014

Position finding and navigation in space, air and sea - Conference, Hamburg, October 1969, Volume 1 21 p3847 A70-41126

Astronomy - Conference, Canberra, Australia, December 1969 21 p3890 A70-41176

Nucleation role in boiling and cavitation - ASME Conference, Detroit, May 1970 21 p3948 A70-41201

Power conditioning - IEEE Conference, Greenbelt, Maryland, April 1970 21 p3757 A70-41206

Ballistocardiography and cardiovascular therapy - Conference, Oporto, Portugal, March-April 1969 21 p3762 A70-41226

Communications - IEEE Conference, San Francisco, June 1970, Volume 1 21 p3786 A70-41326

Communications - IEEE Conference, San Francisco, June 1970, Volume 2 21 p3788 A70-41340

Thermoinelasticity - Conference, East Kilbride, Scotland, June 1968 21 p3936 A70-41426

Apollo 11 lunar science - NASA Conference, Houston, January 1970, Volume 1, Mineralogy and petrology 21 p3893 A70-41501

Apollo 11 lunar science - Conference, Houston, January 1970, Volume 2, Chemical and isotope analyses 21 p3903 A70-41560

Apollo 11 lunar science - Conference, Houston, January 1970, Volume 3, Physical properties 21 p3911 A70-41636

Mechanical Engineering - Conference, Haifa, July 1970 21 p3809 A70-41951

Theoretical and applied mechanics - Conference, Haifa, July 1970 21 p3938 A70-41958

Palaeogeophysics - Conference, University of Newcastle-upon-Tyne, England, April 1968 21 p3921 A70-41969

Polymers in space research - ACS Conference, Pasadena, July 1968 21 p3781 A70-42126

Chromosphere-corona transition region - Conference, Boulder, Colorado, August 1969 21 p3924 A70-42182

Gas discharges - IEE Conference, London, September 1970 22 p4077 A70-42351

Information transmission and coding theory - Conference, Tashkent, Uzbek SSR, September-October 1969, Section 1, Data transmission theory, Methods of coding and decoding 22 p3985 A70-42490

Aircraft acoustical duct treatments - ASA Conference, Philadelphia, April 1969 22 p4089 A70-42528

Information transmission and coding theory - Conference, Tashkent, September-October 1969, Section 2, Statistical theory of signals and noise, Optimal reception methods 22 p3986 A70-42551

Astrophysics and general relativity - Waltham, Mass., June-July 1968, Volume 1 22 p4098 A70-42576

Applied mechanics - Conference, Bucharest, June 1969 22 p4113 A70-42601

Applied mechanics - Conference, Bucharest, June 1969 22 p4009 A70-42605

Applied mechanics - Conference, Bucharest, June 1969 22 p4113 A70-42610

High temperature systems - Conference, Pasadena, December 1964, Volume 2 22 p4090 A70-42751

Planetary electrodynamics - Conference, Tokyo, May 1968, Volume 2 22 p4014 A70-42776

Motor activity and aging - Conference, Kiev, April 1968 22 p3967 A70-42893

Aerospace nuclear applications - Conference, Huntsville, Alabama, April 1970 22 p4069 A70-43177

Air cargo - Conference, Frankfurt am Main, September 1970 22 p4006 A70-43267

Nondestructive tests and controls in metallurgy and nuclear technology - Conference, Saclay, France, June 1968 22 p4040 A70-43617

Orbital international laboratory and space sciences - Conference, Cloudcroft, New Mexico, September 1969 22 p4107 A70-43626

Dynamic gravimetry - Conference, Fort Worth, March 1970 22 p4024 A70-43656

Aerospace medicine - Conference, Amsterdam, September 1969 22 p3973 A70-43690

Microwave communication - Conference, Budapest, April 1970, Volume 1, Communication system theory 23 p4158 A70-43751

Microwave communication - Conference, Budapest, April 1970, Volume 3, Electromagnetic theory 23 p4160 A70-43764

Microwave communication - Conference, Budapest, April 1970, Volume 4, Microwave theory and techniques 23 p4168 A70-43776

Microwave communication - Conference, Budapest, April 1970, Volume 5, Microwave electronics, system measurements 23 p4170 A70-43793

Hot plasmas physics - Conference, Newbattle Abbey, Scotland, July-August 1968 23 p4224 A70-44176

Position finding and navigation in space, air and at sea - Conference, Hamburg, October 1969, Volume 2 23 p4162 A70-44227

Environmental engineering - Conference, Delft University, Netherlands, April 1970 23 p4268 A70-44326

Cryogenic engineering - Conference, University of California, Los Angeles, June 1969 23 p4277 A70-44351

X ray analysis - Conference, University of Denver, August 1969 23 p4243 A70-44414

Thermophysical properties - ASME Conference, Newton, Mass., September-October 1970 23 p4219 A70-44426

Survival and flight equipment - Conference, Las Vegas, September-October 1970, Volume 1 23 p4151 A70-44453

Survival and flight equipment - Conference, Las Vegas, September-October 1970, Volume 2 23 p4152 A70-44479

Electronic packaging and production - Conference, Anaheim, California, February 1970 and New York, June 1970 23 p4173 A70-44532

Failure analysis - IEEE Conference, University of Pennsylvania, May 1970 23 p4174 A70-44743

Stellar rotation - Conference, Ohio State University, Columbus, September 1969 23 p4248 A70-44801

Astronautics - IAF Conference, New York, October 1968, Volume 1, Spacecraft systems 23 p4262 A70-45001

Astrodynamics and astronautics - Conference, New York, October 1968, Volume 2 23 p4254 A70-45013

Astronautics - IAF Conference, New York, October 1968, Volume 3, Propulsion reentry physics 23 p4234 A70-45017

Astronautics - IAF Conference, New York, October 1968, Volume 4, Bioastronautics 23 p4155 A70-45022

Strong fibrous solids - Conference, London, January 1970 24 p4366 A70-45165

Fluidics - Conference, Chicago, November 1968 24 p4293 A70-45426

Satellite dynamics - Conference, Prague, May 1969 24 p4405 A70-45526

Applied mechanics - Conference, Bucharest, June 1969 24 p4423 A70-45576

Applied mechanics - Conference, Bucharest, June 1969 24 p4423 A70-45586

Nondestructive testing - Conference, Hanover, June 1970, General problems 24 p4342 A70-45676

Nondestructive testing - Conference, Hanover, June 1970, Ultrasound, Part 1, Instruments, methods and defect evaluation 24 p4342 A70-45680

Nondestructive testing - Conference, Hanover, June 1970, Electric and magnetic methods 24 p4343 A70-45693

Nondestructive testing - Conference, Hanover, June 1970, Radiography 24 p4345 A70-45706

Nondestructive testing - Conference, Hanover, June 1970, Material properties determination 24 p4345 A70-45717

Radiography and stray flux methods in nondestructive testing - Conference, Hanover, June 1970 24 p4346 A70-45722

Nondestructive testing - Conference, Hanover, June 1970, Materials properties determination, Stress measurements 24 p4347 A70-45728

Nondestructive testing - conference, Hanover, June 1970, Material properties determination, covering electric, magnetic, liquid penetrant and thermal methods 24 p4347 A70-45735

Nondestructive testing - Conference, Hanover, June 1970, Neutronradiography and holography 24 p4375 A70-45745

Hypertensive mechanisms - Conference, Canberra, Australia, January 1970 24 p4298 A70-45803

Electronic Packaging and Production - Conference, Chicago, April 1970 24 p4320 A70-46246

CONFIDENCE LIMITS

Confidence limits on percent defective estimates for production processes characterized by two specification limits 16 p2921 A70-34025

Maximum likelihood estimates for setting confidence limits of Weibull percentiles and shape parameters 17 p3128 A70-34579

Aircraft systems safety requirements, consisting of accident probability, confidence level and demonstration test period 19 p3442 A70-38840

Prior distributions computer aided selection for generating Monte Carlo confidence bounds on system reliability 20 p3658 A70-39641

Statistical confidence levels for frequency analysis, detecting peak sinusoid for desired signal to noise ratio 21 p3825 A70-40867

CONFIGURATION MANAGEMENT

Configuration management of software concerning automatic test systems in large maintenance depot 13 p2422 A70-29692

Quality control role in configuration management, considering quality assurance organization of aircraft manufacturer 14 p2669 A70-31104

Space Station long term operations and logistics concerning inventory, configuration and cargo management [SAE PAPER 700757] 24 p4416 A70-45871

CONFINEMENT

Galactic disk model for confinement of cosmic ray electrons, assuming isotropic background radiation 19 p3510 A70-38156

CONFIRMATION

U PROVING

CONFLUENCE

U CONVERGENCE

CONFORMAL MAPPING

Nonlinear modification of Maxwell equations, discussing conformal invariance and nonsingular solutions to neutral and charged states with zero mass 02 p0339 A70-12067

Small parameter method applied to numerical solution of conformal mapping and viscous fluid motion problems 04 p0719 A70-14960

Circular cascade design from rectangular cascade flow data using conformal transformation, considering aerodynamic properties 11 p1974 A70-25786

Jet flow through rectangular orifices in cylindrical wall using conformal mapping for potential, velocity, volume flow rate, viscosity, etc 14 p2567 A70-31359

Equations system for determining constants in Sedov integral for conformal mapping of polygonal airfoil lattice onto Riemann surface 20 p3658 A70-39767

Cold plate immersed in warm flowing liquid, calculating two dimensional transient and steady state solidification by conformal mapping 21 p3949 A70-41319

Cracks stress intensity factors in plane problems by cracked conformal mapping and boundary collocation technique 21 p3940 A70-42036

Horizontal Situation Display (HSD)/ map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection [AIAA PAPER 69-987] 22 p4068 A70-42710

CONFORMAL TRANSFORMATIONS

U CONFORMAL MAPPING

CONGENITAL ANOMALIES

Cardiovascular model for closed loop analog simulation of congenital heart defects hemodynamics 11 p1990 A70-25705

CONGENITAL CONDITIONS

U CONGENITAL ANOMALIES

CONGESTION

Human nostril airflow resistance during supported sitting and lateral recumbency and crutch pressure, discussing ipsilateral nasal congestion mechanisms 08 p1448 A70-21874

CONICAL BODIES

NT SLENDER CONES

Surface roughness effects on dry friction between two metals, considering conical asperities and friction coefficients [ASME PAPER 69-LUB-10] 01 p0102 A70-10394

Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path [AIAA PAPER 68-1150] 01 p0195 A70-10827

Characteristics method for calculating steady supersonic flow of burning gas mixture past wedge and rotating cones 01 p0218 A70-11018

Integral method for studying wall heat transfer influence on compressible boundary layer on cone at angle of attack in supersonic flow 03 p0409 A70-13953

Radiation view factor from differential area to conical surface determined using Stokes theorem and contour integration 04 p0787 A70-15598

Ballistic range measurements of vibrational nonequilibrium effects on leading edge shock wave shape for cone-cylinders fired through chlorine atmosphere at supersonic speeds 04 p0621 A70-15601

Supersonic flow past elliptic cone of small eccentricity treated as axisymmetric conical flow perturbation 05 p0790 A70-16506

Steady and frictionless supersonic flow of ideal gas of constant heat capacity around slightly deformed cone, calculating force exerted by gas 06 p0964 A70-17240

Induced electromotive force method for determining impedance changes of monopole on base of large cone 06 p0109 A70-17558

Radiation patterns from finite conducting cone excited by quarter wave monopole protruding from center of base computed on digital computer 06 p0120 A70-17559

Cone bluntness effect on merging onset and downstream flow in merged region at Mach 8 and various Reynolds numbers 06 p0980 A70-18352

Downstream distribution of trace element injected into boundary layer of flat plate or cone with self similar mass transfer [SAMSO-TR-69-56] 07 p1256 A70-19313

Plane electromagnetic wave scattering at apex of conical body, presenting scattered field calculations for various cone sizes and surface impedances 08 p1461 A70-20974

Aerodynamic coefficients for blunt cones in rarefied gas calculated as functions of angle of attack using empirical formulas 08 p1432 A70-21092

Boundary layer transition measurements on flight tests of experimental 22 degree conical reentry vehicle with Be heat shield and graphite nose [AIAA PAPER 68-1152] 09 p1606 A70-23243

Drag measurement for star-shaped body at hypersonic speeds, comparing results with cone-shaped model 10 p1799 A70-24122

Steel conical disks two dimensional stressed state determined with deformations at elastic and elastoplastic strains using digital computers 10 p1956 A70-24242

Laminar boundary layer in symmetry plane of cone of revolution at angle of attack calculated by finite difference method 10 p1802 A70-24706

Gasdynamic functions of supersonic flow past spherically and ellipsoidally blunted inverted cones 11 p1973 A70-25522

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics [AIAA PAPER 69-187] 11 p1975 A70-25969

Metal surfaces contact with cones and pyramids asperities, analyzing surface roughness effects on dry friction 11 p2060 A70-26412

Newtonian fluid laminar throughflow between coaxial corotating cones, applying solution for flow between disks 11 p2038 A70-26491

Axial incidence HF backscattering cross section for absorbing flat based cone assumed to obey impedance boundary condition 12 p2185 A70-27716

Wide angle emitter images transformation into circular by reflecting cone and lens system, describing photographic and photoelectric methods 12 p2237 A70-28157

Turbulent boundary layer and base pressure profiles of supersonic flow past conical models in wind tunnel 12 p2159 A70-28229

Pressure distribution over lateral surface of truncated cones in nonequilibrium flow, analyzing physicochemical transformations effect 12 p2159 A70-28246

Turbulent base pressure on conical afterbodies in supersonic axisymmetric flow, including initial direction effect [AIAA PAPER 70-555] 13 p2340 A70-29020

Supersonic rigid cone motion in elastic medium, obtaining partial solutions to motion equation yielding boundary problem solution 13 p2341 A70-29508

Sliding rigid conical indenter friction experiments over work hardenable metal flats in high adhesion conditions, observing forces, stresses and deformation modes 13 p2421 A70-29548

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases [AIAA PAPER 69-716] 13 p2523 A70-29977

Nonequilibrium dissociation effect on supersonic oxygen flow past inverted blunted cones at angle of attack, considering thermal fluxes and aerodynamic forces 15 p2671 A70-31496

Cone geometry for electromagnetic and acoustic scattering 15 p2701 A70-32417

Incompressible viscous fluid divergent turbulent flow detection in conical tube of revolution based on measuring wall pressure differences along tube generatrix 16 p2894 A70-33849

Turbulent boundary layer growth and thickness on yawed cones, discussing angle of attack effect along windward and leeward rays 16 p2838 A70-33875

Hypersonic flow field around yawed half angle cone from wind tunnel measurements including surface pressure distributions and flow visualization photographs 17 p3007 A70-34485

Blunt nose effects on drag of flared conical body in supersonic flow, considering pressure loss through shock wave and vorticity 17 p3196 A70-35237

Steady supersonic flow past conical bodies at yaw, adapting Telenin numerical method 17 p3012 A70-35889

Shock layer and combustion in supersonic flows about conical bodies at various angles of attack 17 p3012 A70-35894

Hypersonic gas flow around blown plane of segmentally blunted cones at large angle of attack, using two dimensional model 18 p3206 A70-36258

Stress decay rates in Saint Venant boundary region in truncated semiinfinite elastic cone, using Papkovitch-Neuber functions for eigenfunctions formulation 18 p3339 A70-36489

Turbulent mixing in supersonic cone near wake, using laser planogram technique for flow visualization 19 p3351 A70-37529

Heat shield analysis covering high temperature ablation interactions in conical anisotropic structure immersed in hypersonic environment 20 p3738 A70-40054

Hypersonic flat and biconvex conical wings, calculating yaw effects on shock shape and pressure distribution 21 p3761 A70-40918

Loads induced by terminal shock boundary layer interaction on cone-cylinder bodies, discussing angle of attack effect 21 p3746 A70-41863

Surface pressure coefficient dependence on specific heat ratio for yawed conical lifting bodies in supersonic streams 21 p3747 A70-41877

Exponential compression wave propagation in conical rod with smooth tapering cross section 22 p4121 A70-43726

Axisymmetric vibration modal properties /frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences 23 p4270 A70-44501

Oscillatory motion of triangular wing with conical body of arbitrary cross section in supersonic flow, considering wing-body interference effects 24 p4288 A70-45592

CONICAL CAMBER

Quasi-conical supersonic wings with curved subsonic leading edges, discussing perturbation potential, boundary conditions, homogeneous flow and gothic and ogee planforms 21 p3747 A70-42108

CONICAL FLARE

U CONES

CONICAL FLOW

Supersonic flow past elliptic cone of small eccentricity treated as axisymmetric conical flow perturbation 05 p0790 A70-16506

Small disturbance theory for internal conical inlet hypersonic flows, using method of characteristics for similarity law verification [AIAA PAPER 70-127] 06 p0969 A70-18048

Laminar boundary layer on cone at incidence in supersonic flow evaluated by pressure distribution technique, comparing heat transfer, pitot probe measurements, etc [AIAA PAPER 70-48] 06 p0974 A70-18189

Hypersonic rarefied merged layer flow over sharp slender cones, using strong interaction theory and free molecular flow to analyze surface pressures 06 p0982 A70-18363

Massive blowing from porous cone with embedded shock wave in supersonic flow, assuming inviscid and conical injected flow field 09 p1662 A70-23216

Supersonic flow behind cone, studying bottom pressure and stagnation zone dependence on incident flow parameters and static pressure distribution 09 p1663 A70-23623

Supersonic flow around slender polyhedral wings with nonsymmetrically distributed incidence using method for conical flow around angular wings 10 p1803 A70-24797

Second order conical flows around wing-fuselage system, deriving expressions for axial perturbation velocity for various attack geometries 10 p1804 A70-24972

Nonuniform partitioning of flowfield in three dimensional laminar boundary layer in supersonic conical flow at zero angle of attack, using numerical integration 10 p1804 A70-25192

Numerical solution for steady supersonic inviscid flow around smooth conical bodies by solving elliptic partial differential equations for conical flow 12 p2155 A70-27202

Boundary layer formation on walls of conical pressure nozzle during vortex flow 16 p2896 A70-34299

Shock curvature at wedge or cone tip in radiating gas flow, noting differences between radiative and chemically coupled gas dynamics 23 p4135 A70-44638

Axisymmetrical nozzle aerodynamic shape design for conical to axially uniform flow conversion, using method of characteristics 23 p4136 A70-44991

CONICAL INLETS

Small disturbance and similitude applicability to internal hypersonic conical flows in edge shock and Busemann inlets 09 p1606 A70-23245

CONICAL NOZZLES

Flow development in conical diffusers, delaying stall with high velocity air injection through annular slot at diffuser inlet predicted by finite difference method 02 p0224 A70-12866

One dimensional steady adiabatic source nonisentropic flow of thermally and calorically perfect gas in conical nozzle, considering exit divergence and nonuniform flow effects 04 p0619 A70-15427

Base pressure effects on cone angle of fixed length conical nozzle yielding maximum thrust 11 p1977 A70-26156

Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump [AIAA PAPER 69-653] 13 p2386 A70-28513

Transonic flow in convergent and convergent-divergent conical nozzles with nonuniform inlet predicted by time dependent flow equations, discussing discharge and thrust coefficients [AIAA PAPER 70-635] 16 p2834 A70-33548

Mass flow rate and geometry effects on pressure recovery of conical diffusers with annular secondary injection at inlet [ASME PAPER 70-FE-18] 16 p2835 A70-33631

Shock waves in supersonic conical nozzle flow due to secondary gas injection, using conical lens for flow visualization 17 p3011 A70-35236

Underexpanded carbon dioxide free jet expanding into vacuum from conical nozzles 17 p3070 A70-35246

Conical expansion nozzles manufacturing errors effect on flow expansion considered for large Mach numbers 17 p3011 A70-35662

Conical convergent nozzles discharge coefficient for varying pressure ratios 19 p3352 A70-38243

- Conical diffuser-tailpipe system performance, discussing cone angle, area ratio, Reynolds number and velocity distribution effects on pressure recovery 20 p3559 A70-40082
- LF acoustic disturbances effect on root portion of turbulent jet from conical nozzle 21 p3954 A70-42223
- Twisted incompressible viscous fluid flow in conical diffuser described by differential equation system, considering flow velocity field and separation point 23 p4133 A70-44159
- ### CONICAL SHELLS
- Elastic bending of thin circular conical shell subject to arbitrary variation of edge loads 01 p0209 A70-11385
- Orthotropic axially compressed conical shell stability, evaluating lower critical load and postbuckling state 04 p0772 A70-14921
- Stability analysis of deflected shallow thin walled elastic noncircular conical and cylindrical orthotropic shells using straight lines method 06 p1167 A70-17865
- Retrorocket effects on aerodynamic stability and drag of conical aeroshell planetary entry vehicles, discussing supersonic wind tunnel tests and jet shock interaction [AIAA PAPER 70-219] 06 p0974 A70-18166
- Conical shells stability under uniform pressure, studying varying thickness influence by variational stress and bending equation 07 p1402 A70-19052
- Stress concentrations calculation at holes in plates and shells of positive Gaussian curvature applicable to hyperbolic shells 07 p1408 A70-19548
- Truncated conical shells buckling under hydrostatic pressure using Donnell equations, assuming membrane stress state for prebuckling deformation 07 p1414 A70-20170
- Multilayer orthotropic conical shell cyclic deformation equation obtained in hypergeometric functions 09 p1777 A70-23079
- Layered conical shell creep under axisymmetric load and time dependent temperature field by iterating boundary integral equation 09 p1779 A70-23099
- Liquid motion dynamic effects in open cylindrical and conical tanks with translational motion 09 p1662 A70-23293
- Truncated, structurally orthotropic and round conical shell oscillations taking into account reinforcing ribs eccentricity 10 p1964 A70-25195
- Rectangular conical shells reinforced along ribs by belts under tension/compression calculated by initial functions method 11 p2130 A70-25568
- Truncated conical shell buckling under axial compression using method for torsion buckling, correlating to equivalent cylindrical shells 11 p2135 A70-25980
- Elastic conical shells of revolution linear theory, calculating stress resultants and couples 11 p2145 A70-26689
- Axisymmetric and unsymmetric free vibrational modes of right-circular conical or cylindrical sandwich shells with free edges, discussing Rayleigh-Ritz solution 11 p2145 A70-26700
- Postwrinkling nonlinear behavior of conical shell of revolution subjected to bending loads [AIAA PAPER 69-90] 12 p2326 A70-27816
- Structural strength of fiberglass plastics reinforced conical shells, using impregnation technique of dry package under pressure 12 p2328 A70-28280
- Elastic material filled cylindrical, segmented toroidal and conical shells thermal stability, allowing for stiffer eccentricity 13 p2516 A70-29523
- Cylindrical conical shell junction axisymmetric bending, using numerical method and exact solution 15 p2822 A70-32360
- In-plane boundary conditions effect on axially compressed conical shell stability under low buckling loads, using linear Donnell-type theory 17 p3186 A70-34971
- Shallow conical shell stability under uniformly distributed pressure and concentrated force at apex for rigid and free clamping boundary conditions 18 p3341 A70-36589
- Thin elastic conical shell axisymmetric solution for free vibration in terms of power series 19 p3545 A70-38335
- Stresses around circular hole in shallow conical shell under torsional load, using perturbations in parameters for curvature and cone angle 21 p3934 A70-40779
- Bending stress at clamped support of impulsively loaded semiinfinite conical shell, obtaining formulas from perturbation theory 21 p3938 A70-41759

Radar cross section for thin dielectric plate and spherical and conical shells 23 p4166 A70-44975

Rumanian book on torsion in thin walled elastic structures of various cross sections covering calculation methods for box beams, cylindrical and conical shells, aircraft wings, etc 24 p4418 A70-45147

CONICS

NT HYPERBOLAS
NT PARABOLAS

Lawden primer vector theory applied to matched conic spacecraft trajectories optimization 07 p1381 A70-19325

Space mechanics problem of passing from perigee to radial distance in given time determined by fitting conic to radii, using iteration method 09 p1760 A70-22927

Hybrid patched conic iterative technique for accurate moon-earth/transearth/trajectory generation 09 p1760 A70-22929

CONJUGATE POINTS

Auroral phenomena interdisciplinary investigations, discussing electron precipitation and conjugate point drift due to geomagnetic axis position variations 19 p3411 A70-37493

Cosmic noise absorption diurnal variations at auroral zone conjugate areas during geomagnetically disturbed periods 19 p3414 A70-38379

VLF radiation observation at conjugate points, discussing hisses, choruses and geomagnetic effects 19 p3416 A70-38587

Auroral X-ray radiation at magnetoconjugate points Kerguelen/archangel region, using balloon-borne spectrometers 21 p3813 A70-40839

F 2 region critical frequency cross correlation coefficients for magnetically conjugate stations, considering magnetic disturbances effects 21 p3816 A70-41069

F 2 layer nighttime ionization at mid-latitudes, investigating conjugate point effects on observation point 23 p4188 A70-44055

CONJUGATES

NT CONJUGATE POINTS

Physical processes responsible for conjugate point phenomena involving particles and waves in magnetosphere and IQSY observations 01 p0075 A70-10598

Postbreakup pulsating aurora association with conjugate absorption bays, indicating hard electron precipitation source location 02 p0290 A70-12161

Existence conditions of conjugate points for non-trivial solution of fourth order differential equation 03 p0519 A70-14079

Geomagnetic conjugate point problems involving temporal displacement field line tracing, display, etc 03 p0479 A70-14385

Conjugate points for simple integral problems in calculus of variations extended to multiple integral problems, using Jacobi equation 04 p0713 A70-14674

Explorer 31 Langmuir probe data for electron temperature at conjugate point, tracing magnetic field line passing through spacecraft to earth 04 p0000 A70-14971

Positive correlation between normal ionizations at magnetically conjugate regions in ionospheric F 2 layer from aircraft vertical soundings 04 p0683 A70-15741

F 2 region critical frequency conjugacy latitudinal variations observation at conjugate stations compared with results from nonconjugate stations 05 p0839 A70-16286

High and medium whistler activity in Italy correlated with weather situation in South Africa 05 p0839 A70-16317

Protonospheric heating by photoelectrons from conjugate ionosphere using Explorer 31 data 08 p1489 A70-21387

Conjugate direction procedures for function minimization compared for convergence, recommending modified conjugate gradient procedure 08 p1535 A70-21875

Positive correlation between normal ionizations at magnetically conjugate regions in ionospheric F 2 layer from aircraft vertical soundings 14 p2575 A70-30825

Autofocus for variable magnification systems, discussing conjugate concepts and linkage and cam methods for enlargers and projectors 16 p2907 A70-33182

Auroral cosmic noise absorption, discussing east-west motion, conjugate magnitudes and breakdown 16 p2899 A70-34191

Soviet book on conjugate functions and trigonometric series covering Hilbert transform, Fourier series properties, Cesaro methods, etc 19 p3459 A70-38799

CONJUGATION

Conjugation principle for control system stabilization based on relation between controlled plant and stabilizing element stability 05 p0824 A70-16851
